PUBLIC COMMENT

Open Government — Stephen Rogers raised questions about his lawsuit against the City, was hopeful the matter would not be delayed any further, and he wondered when the PARIS fees would be removed from residents' utility bills. He was curious why the Closed Session did not include a performance evaluation related to the City Attorney, and he again recommended the Council establish measurable goals and objectives for the City Manager position.

He urged for more pharmaceutical regulations to limit the use of Selective Serotonin Reuptake Inhibitors (SSRI) and antidepressants.

Citrus Avenue Widening — J.J. Orf and Daniel Espinoza voiced concerns regarding the planned widening of Citrus Avenue, between Dearborn and Wabash, as they weren't convinced the street needed widening. Limited-Term Building Maintenance Worker Positions

Facilities and Community Services Director Crocker described the needs of the Building Maintenance Division. The aging infrastructure of the City's buildings requires significant resources and time to ensure the proper function and safety of these spaces. Currently, there are a number of deferred painting projects that need to be completed to prevent potential damage or deterioration and maintain the visual appeal of the City's properties. The addition of two limited-term Building Maintenance Painter positions through the end of the 2025/26 fiscal year will allow the Building Maintenance Division to address different painting projects throughout the City and ensure the longevity of the properties while also enhancing the visual appeal to the community.

As public comment, Stephen Rogers was confused that this item was presented by Director Crocker and not Human Resources Director Meteau. He suggested the City was not in compliance with fair employment practices and these positions should be posted online and made available to anyone interested in applying. Director Crocker and Assistant City Manager Boatman clarified that these positions will be recruited and will not be under contract. The two limited-term Building Maintenance Worker (Painter) positions will go away at the end of the term, not-to-exceed 15 months.

WWTP Landfill Leachate Environmental Site Assessment

Municipal Utilities and Engineering Director Harris explained the need for a Sole Source Professional Services Agreement with Rincon Consultants, Inc., for a landfill leachate environmental site assessment at the Wastewater Treatment Plant for an amount not-to-exceed \$369,750. In 2020, MUED staff discovered that leachate from the City's landfill had been intermittently disposed of in an unlined sludge drying bed at the City's Wastewater Treatment Plant (WWTP) for approximately six years. Staff immediately discontinued the practice and notified the Santa Ana Regional Water Quality Control Board (Board). The Board requested that

the City prepare a Work Plan to investigate potential impacts to soil and groundwater.

Rincon Consultants, Inc. was hired to develop and submit the required Work Plan, titled "Redlands Wastewater Treatment Facility Landfill Leachate Investigation," due to their recent experience with installing ground monitoring wells for site assessment at another location within the City. The Board provided comments in 2022 and issued additional guidance via email in 2023. After incorporating all required revisions, the Work Plan was formally approved by the Board on March 25, 2025. The proposed Scope of Work presented tonight is based on the Board's comments and outlines the necessary level of effort to revise and finalize the Work Plan, implement a subsurface investigation, and prepare a report documenting findings and recommendations.
