
agreement and understanding between the Parties as to the matters contained herein, and any prior negotiations, written proposals or verbal agreements relating to such matters are superseded by this Agreement. Except as otherwise provided for herein, any amendment to this Agreement shall be in writing, approved by City and signed by City and Consultant.

8.7 This Agreement shall be governed by and construed in accordance with the laws of the State of California, without regard to its conflicts of laws provisions. The Parties agree that all actions or proceedings arising in connection with this Agreement shall be tried and litigated only in the state courts located in San Bernardino County, California, and the federal courts located in Riverside County, California.

8.8 If one or more of the sentences, clauses, paragraphs or sections contained in this Agreement is declared invalid, void or unenforceable by a court of competent jurisdiction, the same shall be deemed severable from the remainder of this Agreement and shall not affect, impair or invalidate the remaining sentences, clauses, paragraphs or sections contained herein, unless to do so would deprive a Party of a material benefit of its bargain under this Agreement.

IN WITNESS WHEREOF, duly authorized representatives of City and Consultant have signed in confirmation of this Agreement.

CITY OF REDLANDS

EXHIBIT "A"

SCOPE OF SERVICES

1 Video Management System (VMS) Replacement for City of Redlands

The City of Redlands aims to enhance its public safety and security infrastructure by replacing its existing, disparate video management systems with a unified, city-wide solution. The project will involve the design, installation, configuration, and maintenance of a new wireless camera system integrated with a robust VMS platform. The new system will provide comprehensive video surveillance coverage across the city, improve incident response capabilities, and offer a user-friendly interface for monitoring and management. The project will also ensure future integration with an access control system (ACS) to further enhance security measures.

2 Project Objectives

The core objectives of this project are as follows:

2.1 Consolidate and Upgrade:

Replace the existing camera system with a single, integrated Citywide Genetec Software Solution

The project will implement Genetec Security Center as the core software platform for the Video Management System (VMS). Genetec Security Center is a unified security platform that blends IP video surveillance, access control, and automatic license plate recognition (ALPR) into a single intuitive interface. Key features of Genetec Security Center include:

- Omnicast: The IP video management system of Security Center, providing seamless management of digital video, audio, and data across any IP network.
- Synergis: The IP access control system (ACS) that will allow for future integration and unified security operations – for future.
- Advanced reporting and analytics capabilities to support efficient incident response and investigation.
- Scalable architecture to support the city's growing needs.
- Robust cybersecurity features to protect the integrity and confidentiality of surveillance data.

2.2 Wireless Network Hardware

The project will involve the replacement (up to 100%) of the existing wireless network infrastructure with state-of- the-art equipment from Ubiquiti, Mikrotik, Mimosa, and Cambium Networks.

2.3 Camera Upgrades

The project will involve the replacement (up to 30%) of the existing camera network infrastructure with state-of- the-art equipment from Axis and Hanwha.

2.4 VMS Hardware Infrastructure

To support the new Genetec Security Center VMS, the project will deploy new server hardware from Dell Technologies:

- Dell PowerEdge Rack Servers for primary VMS operations for high-capacity, reliable video storage
- We will be re-using the existing network infrastructure where available and applicable for connectivity from City; any new required networking equipment will be additional to the scope of work

2.5 Comprehensive Coverage:

Provide reliable in place upgrade of existing infrastructure with proposed video surveillance system across public areas, critical infrastructure, and other designated locations throughout the city.

2.6 Enhanced Security:

Improve public safety and security by deterring crime, aiding in investigations, and facilitating rapid response to incidents with newer high resolution and multisensory cameras and higher reliability and higher bandwidth wireless equipment.

2.7 Efficient Incident Management:

Streamline incident response and investigation processes for law enforcement and city officials through improved access to video evidence and data though an IP driven Genetec Video Management System – Security Center.

2.8 User-Friendly Interface:

Implement the Genetec VMS platform that is intuitive and easy to use for monitoring, management, and retrieval of video footage.

2.9 Future-Proofing:

Ensure the system is scalable and adaptable to future needs, including integration with an access control (ACS) and automated license plate recognition (ALPR) systems.

3 Project Tasks

The project encompasses the following key deliverables:

3.1 Comprehensive System Design

3.1.1 Evaluate Existing Infrastructure:

- Conduct a thorough assessment of the current camera systems, network infrastructure, and user requirements to develop a comprehensive migration plan. The assessment will include documenting the brand, model, warranty, and capabilities of each existing camera, as well as identifying any undocumented routes, links, and credentials. The goal is to establish a clear baseline understanding of the current environment to inform the design and migration strategy.

3.1.2 Detailed Specifications:

- Provide detailed technical specifications for all hardware and software components, including cameras, wireless equipment, servers, storage, and VMS software. The specifications will ensure that all components are compatible and meet the city's performance and security requirements. This detailed planning will help prevent scope creep and ensure that the project stays on track. The proposed solution will utilize the **Genetec Security Center** platform, which includes the **Omnicast** VMS for video management.

3.1.3 Wireless Network Design:

- Design a robust and scalable wireless/mesh network infrastructure to support the camera system, ensuring reliable connectivity and bandwidth. The network design will leverage **Cambium PMP 450v** point- to-multipoint radios in the 6GHz band for high-bandwidth backhaul links and **Ubiquiti, Mikrotik, and Mimosa** point-to-point and point-to – Multipoint radios for additional connectivity where needed. The design will consider factors such as coverage area, signal strength, and potential interference to ensure optimal performance. This design phase emphasizes the importance of proactively addressing potential risks and challenges.

3.1.4 IP Network Design:

Develop an IP network design and addressing scheme that accommodates the new camera system and integrates with the existing city network infrastructure. The IP network design will ensure seamless communication between cameras, servers, and user workstations. This integration highlights the need for effective communication and coordination between different project elements.

3.1.5 Milestone for Payment: Contract Signature/Design Review (30%)

- - This milestone triggers the first payment upon successful completion of the system design and approval by the City. It signifies the completion of a major project phase

and ensures that the design meets the city's expectations before proceeding with further implementation.

3.2 Hardware Procurement and Installation

3.2.1 Camera Installation:

- Supply and install approximately 50 IP cameras from a total of 166 cameras, strategically positioned throughout the city, corresponding to **up to 30%** of existing cameras as needed to ensure compatibility and optimal coverage. The camera installation will include proper mounting, alignment, and configuration to ensure optimal image quality and coverage. This phase emphasizes the importance of quality control and ensuring that the installed equipment meets the project's specifications.

3.2.2 Network Deployment:

- Install wireless/mesh network equipment, including access points, antennas, and other necessary components, to establish a reliable communication network for the camera system. The network deployment will adhere to industry best practices and comply with all relevant regulations. This phase highlights the importance of adhering to technical standards and regulatory requirements. **Up to 100% of the existing wireless network will be replaced** to ensure compatibility and optimal performance with the new VMS solution

3.2.3 Infrastructure Implementation:

- Install power supplies, grounding systems, and other infrastructure elements to support the camera and network installations. Customer to provide mounting structures and continuous 120VAC power. The infrastructure implementation will be carried out safely and efficiently, minimizing disruption to the city's operations. This phase underscores the need for careful planning and execution to avoid delays and ensure the project's success.

3.2.4 VMS Implementation:

- Deploy the Genetec Omnicast VMS software and associated server infrastructure, ensuring adequate storage capacity and processing power to handle the video data. **New Dell servers** will be procured and configured to host the VMS software and provide reliable storage for video recordings. The VMS implementation will include configuring the server, installing the software, and setting up storage solutions. This phase emphasizes the importance of proper configuration and testing to ensure the system's functionality and reliability.

3.2.5 Milestone for Payment: Equipment Delivery (20%) –

- This milestone triggers the second payment upon successful delivery and verification of all necessary hardware and software components. It ensures that the city receives the agreed-upon equipment before making further payments.

3.2.6 Milestone for Payment: Start of Installation (20%) –

- This milestone triggers the third payment upon commencement of the physical installation of cameras, network equipment, and other infrastructure elements. It marks the transition from planning and procurement to the actual implementation phase.

3.3 System Configuration

3.3.1 VMS Configuration:

- Configure the VMS software according to the city's specific requirements, including camera settings, recording schedules, and user access levels. The configuration will ensure that the VMS operates optimally and meets the city's surveillance objectives. This phase highlights the importance of customizing the system to meet the specific needs and workflows of the city's users.

3.3.2 User Management:

- Set up user accounts, access rights, and monitoring views based on the roles and responsibilities of different city departments and personnel. User accounts and permissions will be configured to maintain data security and control access to sensitive information. This aspect emphasizes the importance of data security and access control in a surveillance system.

3.3.3 Storage Management:

- Implement storage policies that define retention periods for video footage based on camera location and importance, ranging from 3 to 24 months. The storage policies will ensure that video data is retained for the required duration while optimizing storage utilization. This phase reflects the need for efficient data management and balancing storage requirements with cost considerations.

3.4 Integration

3.4.1 Camera Integration:

- Integrate existing compatible cameras into the new VMS platform, ensuring seamless access to live and recorded video feeds from all cameras. The integration process will involve configuring the VMS to recognize and communicate with the existing cameras. This phase emphasizes the importance of integrating legacy systems and maximizing the value of existing investments.

3.4.2 ACS Integration (future SOW):

- Ensure the VMS platform is capable of future integration with an access control system (ACS), allowing for centralized management of both video surveillance and access control functions. The VMS will be selected and configured to support seamless integration with an ACS when the city decides to implement one. This future integration capability reflects the importance of scalability and adaptability in

a long-term technology solution.

3.5 Training

3.5.1 Administrator Training:

- Provide comprehensive training to designated city staff on the configuration, management, and maintenance of the VMS system. The administrator training will cover advanced topics such as system configuration, user management, and troubleshooting. This training emphasizes the importance of knowledge transfer and empowering city staffto manage the system effectively.

3.5.2 End-User Training:

- Conduct multiple training sessions for end-users from various city departments, covering system operation, video retrieval, and basic troubleshooting. The end-user training will focus on practical skills and knowledge required for day-to-day use of the system. This training ensures that all users can utilize the system efficiently and confidently.

3.5.3 Training Materials:

- Deliver all necessary training materials, including user manuals, quick reference guides, and system documentation, to ensure users can effectively utilize the system. The training materials will serve as a valuable reference for users after the training sessions are completed. The acceptance testing will involve both functional and performance tests to ensure the system operates as intended and meets the city's expectations. The successful completion of this phase will mark the formal acceptance of the system by the city.

3.5.4 Milestone for Payment: Training (20%)

- This milestone triggers the fourth payment upon completion of the first training session.

3.6 Project Acceptance and Completion

3.6.1 Acceptance Testing:

- The acceptance testing is jointly executed between CelPlan and Customer's staff to test each system component and functionality creating an eventual punch list that needs to be resolved by CelPlan ASAP. Once the pending items on the punch list are resolved, the project is completed and delivered to the Customer for normal operation along with all related documentation.

3.6.2 As-Built Documentation:

- Provide detailed as-built documentation, including network diagrams, equipment inventories, and configuration settings, to facilitate future maintenance and upgrades. The as-built documentation will serve as a valuable reference for future system modifications and troubleshooting. This documentation ensures that the city has a clear and accurate record of the installed system.

3.6.3 System Documentation:

- Deliver comprehensive system documentation and user guides, covering all aspects of system operation, maintenance, and troubleshooting. The system documentation will empower city staff to operate and maintain the system independently. This documentation promotes knowledge transfer and self-sufficiency, reducing the city's reliance on external support.

3.6.4 Milestone for Payment: Completion (10%)

- This milestone triggers the final payment upon successful completion of all project deliverables, including acceptance testing and documentation. It signifies the official handover of the system to the city.

3.7 Project Management

3.7.1 Dedicated Project Manager:

- Assign a dedicated project manager to oversee all aspects of the project, ensuring effective communication, coordination, and timely execution of tasks. The project manager will be the primary point of contact for the city and will ensure that the project is completed on time, within budget, and to the required quality standards. The project manager's role is crucial in ensuring the project's overall success and maintaining alignment with the city's goals and expectations.

3.7.2 Progress Reporting:

- Provide regular status reports to the city, detailing project progress, milestones achieved, and any potential issues or risks. The project manager will provide transparent and timely updates to the city, ensuring they are informed of the project's status and any potential challenges. Regular progress reporting fosters trust and transparency, keeping the city engaged and informed throughout the project lifecycle.

3.7.3 Project Meetings:

- Conduct regular project meetings with city representatives to discuss progress, address any concerns, and ensure alignment with project objectives and timelines. The project meetings will foster collaboration and ensure that the project remains on track and meets the city's evolving needs. These meetings provide a forum for open communication and collaboration, ensuring that the project stays aligned with the city's vision.

3.8 Ongoing Support

3.8.1 Warranty:

- Provide a one-year warranty on all installed equipment, covering any defects in materials or workmanship. The warranty will give the city peace of mind, knowing that any issues with the equipment will be addressed promptly. This warranty demonstrates the commitment to quality and provides assurance to the city that the system will be supported in the initial period after deployment.

3.8.2 Technical Support:

- Offer 24/7 technical support services to address any system issues or user inquiries promptly. The 24/7 technical support will ensure that any problems are resolved quickly, minimizing system downtime and disruptions. This ongoing support ensures that the city has access to expert assistance whenever needed, maximizing system uptime and user satisfaction.

3.8.3 Preventative Maintenance:

- Conduct regular preventative maintenance visits to ensure optimal system performance and identify any potential problems before they cause disruptions. Preventative maintenance will help to identify and address potential issues before they escalate, reducing the risk of system failures and costly repairs. This proactive approach to maintenance helps to extend the system's lifespan and ensure its continued reliability.

3.8.4 Software Updates:

- Provide software updates and patches as needed to address security vulnerabilities, improve system functionality, and enhance performance. Regular software updates will help to protect the system from cyber threats and ensure it continues to meet the city's evolving needs. This ongoing support ensures that the system remains secure and up to date with the latest technological advancements.

3.8.5 Milestone for Payment: Maintenance and Support - Annual (100%)

- This milestone triggers annual payments for ongoing maintenance and support services, ensuring the system's continued operation and optimal performance. This payment structure aligns the vendor's interests with the city's, incentivizing them to provide high-quality support and maintenance to ensure the system's longevity.

3.9 Final Project Report

3.9.1 Work Summary:

- Document all completed work, including a detailed description of the installed camera system, network infrastructure, and VMS configuration. The final project report will serve as a valuable reference for the city, documenting the project's scope, deliverables, and achievements. This documentation provides a comprehensive record of the project for future reference and audits.

3.9.2 Equipment Inventory:

- Provide a comprehensive inventory of all installed equipment, including make, model, serial number, and location. The equipment inventory will facilitate future maintenance, upgrades, and replacements. This inventory ensures that the city has a clear and organized record of its assets.

3.9.4 Performance Metrics:

- Summarize the results of acceptance testing and provide system performance metrics to demonstrate the effectiveness and reliability of the new VMS solution. The performance metrics will provide evidence of the system's effectiveness in meeting the city's security and surveillance objectives. This reporting helps to quantify the project's success and demonstrate the value delivered to the city.

This project scope of work outlines the key deliverables and responsibilities for the successful implementation of the City of Redlands' VMS replacement project. The project aims to provide a unified, reliable, and user-friendly video surveillance solution that enhances public safety, improves incident response, and supports future integration with an access control system. The project will be executed in accordance with industry best practices and project management principles, ensuring timely completion, cost-effectiveness, and high-quality deliverables.

The proposed solution will leverage the Genetec Security Center platform, incorporating the Omnicast VMS for video management and the Synergis system for future access control integration. The wireless network infrastructure will be built using Cambium PMP 450v and Mimosa radios, providing high-bandwidth and reliable connectivity. New Dell servers will be deployed to host the VMS software and store video data. The project will replace 100% of the existing wireless network and up to 30% of the existing cameras, ensuring compatibility and optimal performance with the new VMS solution.

EXHIBIT "B"
PROJECT SCHEDULE

Find below an initial project schedule describing the expected timeline for each task during project implementation. During project review, a detailed schedule shall be created incorporating the sequence and priority of implementation based on the Customer's requirements.

Task	Month 1	Month 2	Month 3	Month 4	Month 5	Month 6	Month 7	Month 8	Month 9	Month 10	Month 11	Month 12	Month 13
Contract Signing

MSP Y5	Maintenance and Support - Annual	100%	$0.00	$12,489.46	$240,733.61	0.00	**$253,223.07**

Notes on Pricing:

1. Validity: This proposal is valid for 180 days from the due date of the proposal.

2. Payment Terms: Proposal pricing is based on CelPlan's standard payment terms (Net 30) as follows:
   a. 30% upon Contract Signature/Design Review
   b. 20% upon Equipment Delivery
   c. 20% at the Start of Installation
   d. 20% upon Training
   e. 10% upon Completion
   f. 100% of Annual Maintenance and Support

3. Charges: Services, maintenance, and software charges (including applicable taxes) are based on items provided as part of the baseline proposal. Charges may need to be adjusted based on selected options, if applicable.

4. Assumptions: The statement of work and assumptions outlined in this proposal apply to this offer; any changes to these assumptions may impact the price or offer accordingly.

5. Equipment Counts and Installation: Final equipment counts, and installation services will be determined jointly with the customer during the design review.

6. Customer-Provided Equipment: Workstations and monitors will be provided and configured by the customer.

7. Warranty: The entire system includes standard and extended equipment manufacturer's warranty. An optional Maintenance Support Plan can be offered and acquired by the customer, limited to parts provided by CelPlan Technologies for the purchased period.

8. Maintenance Support Plan (MSP): The MSP is an end-to-end service that includes troubleshooting, labor, parts, and equipment needed to keep the system operational.

9. The MSP is offered as a Maintenance and Support line item on the pricing form.

10. Remote Access Requirement: The maintenance and support terms, including the proposed price, assume that CelPlan will have remote access to troubleshoot all systems. This is a mandatory requirement.

11. Liability Disclaimer: CelPlan will not take any responsibility for damage due to misuse, mishandling, accidents, purposely inflicted damage, vandalism, natural disasters, etc., from the time of delivery to the customer site, regardless of system acceptance. The customer is responsible for appropriate insurance or repair/replacement costs. CelPlan will charge the customer for any repair and/or replacement components, and associated services.

EXHIBIT "D"
EXCLUSIONS

6 Exclusions

6.1 Exclusions and Additional Terms:

- **Equipment Damages:** Any damages to equipment are not covered.
- **Permits:** The cost of permits is not covered under this proposal.
- **Project Delays:** Delays outside of the vendor's control are not covered and will be charged on an hourly basis.

6.2 Maintenance and Support Plan (MSP) Exclusions:

- **Non-CelPlan Components:** For any issues reported that do not pertain to CelPlan-provided components or equipment maintained by CelPlan, the Customer will be charged at standard or overtime hourly rates, with a minimum charge of four (4) hours.

- **Exclusions from Maintenance:** The scope of maintenance services excludes damage or loss resulting from natural disasters, weather-related events, accidents, theft, intentional damage, lightning, vandalism, electrical services, and the installation of pole hardware.

- **Liability Disclaimer:** CelPlan disclaims any liability for damage resulting from misuse, mishandling, accidents, intentional acts, vandalism, natural disasters, or other causes from the time of notice of completion of services. The Customer is fully responsible for the cost of appropriate insurance coverage and any repair or replacement expenses. CelPlan will invoice the Customer for the cost of repair and/or replacement components, as well as associated services.

6.3 System Assumptions:

- The system design assumes the reuse of existing network components and other city infrastructure that were originally part of the security network or city network. This assumption is made to optimize resources and reduce costs for the city by avoiding the purchase of new equipment. Any equipment that is currently in place and can be effectively reused is expected to be available and in working condition. If the existing equipment cannot be reused, additional costs for new resources may be incurred.

EXHIBIT "E"
STANDARD SUPPORT TERMS, STRUCTURE, AND PROCEDURE

7 Standard Support Terms, Structure and Procedure

7.1 Maintenance and Support Terms

7.1.1 Maintenance Plan Summary

Celplan's Standard Comprehensive Maintenance and Support Plan includes the following main features:

- Warranty of all CelPlan-provided equipment during maintenance period
- On-site (corrective) services
- Complete technical support service for all maintenance activities (phone calls, emails, visits, repairs, equipment rentals)
- Replacement parts
- Maintenance of local spares (at discretion of CelPlan)
- Preventative maintenance (inspection, cleaning)
- Software patches and upgrades (if applicable)
- Remote network health monitoring and diagnostics services (based on availability of VPN and suitable remote access)

7.1.2 Preventative Maintenance

CelPlan will perform weekly remote monitoring and diagnostics of the network to assure overall systems health (including verification of system bandwidth, redundant component failures - such as hard-drives, switches, power supply units, and UPS). If problems are detected, CelPlan will create a case number and report the Customer about the detected problem, and our resolution plan.

Secondly, CelPlan shall also perform periodic (annual at minimum) system field checks. Additionally, once per year, CelPlan shall perform a camera (lens) cleaning service for the CelPlan provided outdoor cameras.

CelPlan shall perform Software/Firmware updates on all components as required (semi-annually at minimum, if applicable).

7.1.3 Problem Reporting

A 24x7 customer service number and email address are available to report issues and create incident tickets. Detailed problem reporting procedure will be provided to the Customer at contract signature.

7.1.4 Problem Resolution Tracking

Based on received problem report, a case number will be assigned to the incident reported for mutual tracking purposes, with an acknowledgement provided to the Customer's assigned points of contact. Upon problem acknowledgement, the problem level will be assessed, upon which a resolution plan will be defined, and communicated to the Customer. Upon problem resolution, a notification of problem closure will be provided to assigned points of contact with the Customer.

7.1.5 Problem Definition

Using a tiered problem structure, we recognize three major categories of problems as follows:

- **Level 1**: Emergency problems, including overall network outage or server outage, and backhaul outage.
- **Level 2**: Problems affecting a portion of the network, with lack of access to camera(s).
- **Level 3**: Minor problems, affecting one camera unit, or a servicing requirement that does not immediately affect operation (such as failures in redundant components of the network).

7.1.6 Response Time

Adjusted to the problem level, the following standard response time targets are provided. In addition, case by case, CelPlan will collaborate as much as possible to adjust the response time to specific Customer needs in terms problem resolution and response time.

- **Level 1**: CelPlan targets to start on-line / remote diagnostics and resolution services within 4 business hours from problem reporting. In parallel, if required, CelPlan targets to mobilize the field team to target 24 business hour resolution.
- **Level 2**: CelPlan targets to start on-line / remote diagnostics and resolution services within 8 business hours from problem reporting. In parallel, if required, CelPlan targets to mobilize the field team and resolve within the next 2 business days.
- **Level 3**: CelPlan will provide problem acknowledgement within 8 business hours, and targets to start on- line / remote diagnostics and resolution services within 2 business days from problem reporting. In parallel, if required, CelPlan targets to mobilize the field team within 4 business days.
- **Level 4**: Third party related interruptions. Resolution time shall be identified on a case-by case basis.

7.1.7 Escalation Procedure

In addition to the standard support structure, CelPlan provides a (multi-tier) reporting escalation procedure to provide flexibility for specific cases, and immediately address problems or concerns regarding maintenance.

7.1.8 Spares and Equipment Replacement

Several spare items may be maintained locally or proximity of maintained site(s) at CelPlan's discretion.

7.1.9 Exceptions

For any reported problems not pertaining to CelPlan provided components or CelPlan maintained equipment the customers will be charged standard / overtime hourly rates with minimum 4-hour charge.

Maintenance excludes natural disasters, weather related damages, accidents, theft, inflicted damages, lightning, and vandalism.

CelPlan will not take any responsibility for damage due to misuse, mishandling, accidents, purposely inflicted damage, vandalism, natural disaster, etc., from time of notice of completion. The Customer will be responsible for cost or provisioning of appropriate insurance or repair/replacement costs. We will charge the Customer for the repair and/or replacement components, and associated services.

7.2 Procedure

Call support phone number(s) (see page 3) to explain the problem (during business hours). Depending on importance/urgency, 1st tier and/or 2nd tier number(s) can be used. (Leaving message is optional.)

In case the phone is not answered or outside of business hours, always immediately send an

e-mail to wi4netsupport@celplan.com to describe the problem.

CelPlan targets to acknowledge receipt of the request with a phone call and/or email within the subsequent 4 business hours.

CelPlan to provide a status update and plan for resolution within 24 hours.

CelPlan or partner field personnel will notify the monitoring staff (by phone) before field visits to notify such visit. Once the resolution is achieved, CelPlan will provide a phone call or email in order to provide the completion status.

In situations where vandalism is suspected and/or reported, the procedure is for our field team to remove the parts and send them to the manufacturer for full assessment and then based on their report a recommendation (and eventual quote) is sent to the customer where an approval is required for CelPlan's team to replace/reinstall components or complete nodes.

7.2 CelPlan Support

Main CelPlan support line is available 24/7:

- Phone numbers: (877)840-0734 or (703)259-4040
- Email address: wi4netsupport@celplan.com

7.3 CelPlan Escalation Procedure

For emergencies and report of structural support problems, the following additional CelPlan contacts are provided: Paulo Leite (COO): (703)259-4025 / paulo@celplan.com

Leonhard Korowajczuk (CEO/CTO): (703)259-4022 / leonhard@celplan.com

EXHIBIT "F"
GENETEC GLOBAL & PRIVACY POLICY

7.4 Genetec Global Privacy

At Genetec, we are committed to protecting our customers' personal data. This document will help you understand how we collect, manage and use their and their users' personal data as part of our provision of our products and services to you.

In essence, we (Genetec Inc., together with our affiliates, licensors, partners and contractors, including their respective successors and assigns, referred to as "**Genetec**", "**we**", "**us**" or "**our**") need to collect certain personal data about our customer (either you as an individual, or the legal entity that you represent, or for the benefit of which you are agreeing to these terms and have the full power and authority to bind contractually, as applicable; referred to as "Customer", "you", "your" or "yours") in order to be able to provide such Customer and/or its employees or other authorized users acting on its behalf (each a "user") with our products. We promise to work hard to preserve the integrity and the security of Customer's information (including that of its users) under our control. We will only use Customer's data in a manner consistent with this privacy policy, and will not share it with anyone for any other purpose.
In this document, the expression "**personal data**" means any information relating to an identified or an identifiable natural person. Such information may include, for example, the person's name, address, contact information (such as telephone numbers or email addresses), age, and gender. We further use the term "product" to refer to any product, service, solution or other offering made available by Genetec.

WE STRONGLY ENCOURAGE YOU TO CAREFULLY READ THIS DOCUMENT. YOUR (INCLUDING YOUR USERS') USE OF OUR PRODUCTS WILL MEAN THAT YOU ARE AWARE OF THE COLLECTION, STORAGE, USE AND DISCLOSURE OF PERSONAL DATA IN THE MANNER DESCRIBED IN THIS DOCUMENT.

1. **Why we need to collect personal data**

We need to collect certain personal data to better understand Customer's needs and preferences, and to provide our products to Customer and its users. Additionally, we may rely on such personal data to contact Customer regarding Customer's Genetec™ account, upcoming changes, improvements, software updates and upgrades, as well as to improve the effectiveness of our offerings, to conduct research, analysis and other business activities, as further explained in this privacy policy. In any event, the personal data will not be used, made available or otherwise disclosed for purposes other than those specified herein, unless we obtain Customer's prior approval or are required to do so by law.

2. **What kind of personal data may be concerned**

General
We make available a variety of products, any combination of which may be procured by Customer. Consequently, the scope and nature of information collected by us varies based on the products used by Customer. In any case, we access and collect personal data only to the extent necessary to ensure that Customer can access and use the products that it has procured. We may further collect information to identify and associate Customer with its Genetec account. This includes Customer's name, contact information, including mailing address, email addresses of certain users entitled to access and use the products for or on behalf of Customer, as well as other unique identifiers attributed to Customer (including its users) by us or by other service provider, as the case may be.

Additionally, we may collect and store personal data that Customer (including its users) chooses to provide to us, at its sole discretion, without us requiring it to do so. This may occur, for example, where you

disclose certain personal data to us when you contact us, or when you choose to store certain personal data in our products as part of your use of such offerings.
Please refer to relevant product privacy sheets for more information on the personal data that is collected and processed by us in relation to such product.

Personal data collected in relation to our products

Generally, our products may be grouped in four categories: on-premise software, cloud services, hybrid products and mobile applications. Below, you will find an overview of the type of information that may be collected and processed by us in relation to your use of our products. However, we encourage you to refer to the relevant product privacy sheet to better understand what information may be collected and processed by us in relation to your use of such product.

The first category combines our software products that are installed on infrastructure provided by or on behalf of Customer. In these cases, all personal data remains stored in the Customer's systems, and will not be shared with Genetec. Customer may, however, for its convenience, choose to enable the automated modules – known as the Genetec Update Service (GUS) and the System Availability Monitor (SAM) – which would respectively allow Customer, among other things, to receive automated software and firmware updates, security notifications, and other relevant nonmarketing content, and monitor the status of their physical security infrastructure. These modules, when enabled, will monitor and send to our systems information pertaining to the configuration, status and health of software and hardware associated with your installation of our on-premise products.

The second category groups cloud products that are hosted on systems made available by us. The extent of personal data that may be collected and processed by us as part of our cloud products will vary based on the type of cloud product being used.

Our hybrid products category represents products that are generally installed on infrastructure provided by or on behalf of Customer (with all of the personal data being hosted on-premise, as outlined above), but additionally require an internet connection to ensure that Customer holds a valid subscription to use such hybrid product.

We may also make available certain mobile applications to Customer in relation to its use of our products. Generally, our mobile applications are an extension of Customer's other Genetec products. Our mobile applications only collect and send to our systems a limited set of information, which includes hardware and operating system information, web browser version, certain anonymous usage data, as well as the mobile device's geographic location. All other information remains stored on the mobile device or in the relevant Genetec product.

Personal data collected in relation to Customer accounts
When you create a customer account with us in association with any Genetec product, we will require you to submit to us certain personal data to identify you (including your users) as the holder of such customer account, but also to protect information associated with your customer account from unauthorized disclosure. Such personal data may include, but is not limited to, Customer full name, user full name, address, contact information, you Genetec account username and password. It is your responsibility to provide all necessary information to and obtain all relevant approvals and consents from all your users in relation to their access and use of our products.
Personal data collected in relation to support services

When Customer contacts us, whether by phone, chat, email, through our websites or otherwise, we may keep a record of such communications to help solve issues that Customer might be dealing with, but also for training, quality assurance and statistical purposes, as well as to improve our products. Please note that we may aggregate personal data to generate various performance, analytical and statistical data, as well as to develop new products. When we do so, we ensure that such information becomes anonymized and may no longer be associated with an identifiable individual.

Personal data collected via our websites

When you visit our websites, we may collect certain information automatically from your device. In some countries, including countries in the European Economic Area, this information may be considered personal data under applicable data protection laws. Specifically, the information we collect automatically may include information like your IP address, device type, unique device identification numbers, browser-type, preferences, broad geographic location (e.g. country or city-level location) and other technical information. We may also collect information about how your device has interacted with our Website, including the pages accessed and links clicked. Collecting this information enables us to better understand the visitors who come to our website, where they come from, and what content on our website is of interest to them. We use this information for our internal analytics purposes and to improve the quality and relevance of our website to our visitors.

Some of this information may be collected using cookies and similar tracking technology (collectively, "**Cookies**"). We use cookies to collect and use personal data about you. For further information about the types of Cookies we use, why, and how you can control Cookies, please see our Cookie Notice.

3. **Who may have access to personal data**

At Genetec, we recognize and respect the importance of protecting our customer's personal data. Keeping personal data in strict confidence is a core part of our commitment to service excellence. We do not sell or rent any personal data to any third party. However, to provide Customer with our products, we may share Customer's personal data with our affiliated companies, parent entities and subsidiaries, for internal business purposes, as well as with our partners acting on our behalf in relation to the provision of such products.

As many other service providers, we use third party partners' help in some aspects of our business operations, which, in some cases, involves processing or handling of Customer's personal data. However, before we do so, we take appropriate measures to safeguard personal data, and to ensure that it is used only in a manner consistent with this privacy policy.

These measures also include protecting personal data within our organization. Such information may only be accessible by those employees, agents, representatives and contractors of Genetec who need to know such information as part of their duties. We further ensure that our employees, agents, representatives and contractors perform their duties in a way compatible with the terms and conditions described in this document.
We may be required to disclose information that we have on Customer and its users (including its and their personal data) to governing and law enforcement authorities, including where required by law, a court order, or by other legal obligations that we may have in any jurisdiction.

4. **How we protect personal data**

We work diligently to maintain administrative, technical and physical controls consistent with industry best practices to protect Customer's personal data against unauthorized access or use. We leverage industry-leading technologies, including server authentication and data encryption, to protect personal data during transit over the internet and at rest.

5. **Where personal data may be processed**

While our global headquarters are based in Montreal, Canada, Genetec, together with our partners and affiliated companies, operate in various locations worldwide. As a result, we may store or otherwise process personal data in many places around the world, including outside the state, province or country where Customer is located, in which case personal data may become subject to foreign laws, and, therefore, may be available to the governing authorities under local laws and regulations. We will use various legal and contractual means to ensure that data transfers are done in compliance with applicable laws and industry best practices.

In certain cases, we may enable Customer to choose the location of data centers where we will store Customer's personal data. Please note that the availability of choice of data center locations varies based on the product, as well as on Customer's geographical location.

If Customer is a resident of the European Union (EU) or the European Economic Area (EEA), we make sure that his/her personal data is transferred to third countries outside the EU/EEA that are deemed "adequate" by the European Commission (a list of adequate countries is available here). Alternatively, where your personal data is not sent to a country that provides adequate protection, we will put in place appropriate safeguards to ensure that your personal data remains protected while it is being processed outside the EU/EEA in accordance with applicable privacy laws. These appropriate safeguards may include signing the European Commission's Standard Contractual Clauses with the group entity, third party service provider or partner outside the EU/EEA with whom we share your personal data. For further information about transfers of personal data, please refer to the "How to contact us" section below.

6. **Keeping personal data accurate and up-to-date**

We rely considerably on your personal data to ensure that we provide Customer with the best possible experience. It is, therefore, important that your personal data available to us remains up to date. As such, if you notice that the information that we have on Customer in our files is no longer accurate or is incomplete, we strongly encourage you to contact us with the most current information. Not doing so may, in some cases, affect our capacity to deliver to our products. Note that before updating Customer's personal data, we may ask you to verify your identity before we can act on the request.

7. **Retention of personal data**

Customer's personal data will be stored in accordance with our retention policies and processes. We will keep Customer's information only for as long as it is necessary for us to fulfill our obligations. Thereafter, we will put necessary efforts to permanently dispose of your personal data, unless we are required to keep it for legitimate business or legal purposes.

8. **Legal basis for processing personal data**

The legal basis for collecting and using the personal data described above will depend on the personal data concerned and the specific context in which we collect it. However, we will normally collect personal data from you only where we have your consent to do so, where we need the personal data to perform a contract with you or to comply with applicable laws, or where the processing is in our legitimate interests and not overridden by your data protection interests or fundamental rights and freedoms.

If we ask you to provide personal data to comply with a legal requirement or to perform a contact with you, we will make this clear at the relevant time and advise you whether the provision of your personal data is mandatory or not (as well as of the possible consequences if you do not provide your personal data).

Similarly, if we collect and use your personal data in reliance on our legitimate interests (or those of any third party), we will make clear to you at the relevant time what those legitimate interests are.

In other situations, Customer (including its users) must always give us clear consent for the collection, use and processing of personal data in order for us to do so. This can be done in several ways, for example, by phone, chat, email, by click of a button, or other similar means.

Occasionally, a Customer may give us access to, or provide us with, additional personal data which may be necessary to enable us to provide our products to Customer. This may, for example, happen when Customer chooses to enable a relevant feature in a product. In such case, we will treat such personal data in accordance with the terms of this privacy policy and the applicable laws.

When Customer procures or uses our products, Customer acknowledges and agrees that Customer has the necessary authority and all relevant consents (including those that may be required from its uses) to transfer such personal data to us, and allow us to treat such personal data in accordance with this privacy policy.

9. **Minors**

The products that we provide are not intended for individuals below the age of 18. If you are under 18, please do not provide your personal information to us.

10. **Openness and accountability**

Within Genetec, our privacy team is responsible for our security and privacy-related matters, including the application of this privacy policy. He and his team oversee training of our staff to ensure security compliance and to raise privacy awareness. Security, transparency and integrity are among the key values at Genetec. We will gladly answer any questions or concerns that you may have with respect to your privacy or the security of your personal data, or if they wish to request a correction of your personal data in our custody or control. Please do not hesitate to reach us by visiting the "contact us" section of our website.

11. **Your data protection rights**

You have the right to request access to, and obtain a copy of, your personal data. You may also request that any personal data that is inaccurate or incomplete be rectified or completed. Note however that, in some cases, we may not be able to provide you access to your personal data. This may occur when providing such access would be likely to impact the privacy or the security of a third party, or for other valid reasons in accordance with applicable laws. In these events, we will advise you in writing of the grounds of our decision.

Under certain legal conditions (for example, where the personal data is no longer needed to achieve the purposes for which the information was initially collected) you may request that your personal data be erased. In addition, you may object to the processing of your personal data, ask us to restrict processing of your personal data or request portability of your personal data under certain legal conditions.

In situations, other than those outlined above in this section, where the processing of your personal data is based on your consent, you have the right to withdraw your consent at any time. Please note, however, that withdrawing your consent will not affect the lawfulness of any processing we conducted prior to your withdrawal, nor will it affect processing of your personal data conducted in reliance on other lawful processing grounds (such in relation to your account or use of your products under a contract).

You also have the right to opt-out of electronic marketing communications that we may send you at any time and free of charge. You may exercise this right by clicking on the "unsubscribe", "opt-out" or other similar links in the marketing e-mails that we may send you. To opt-out of other forms of marketing (such as postal marketing or telemarketing), please contact us using the contact details provided under the "How to contact us" heading below. However, we may still contact you using your contact information for example to share important technical or functional information relating to your account or use of our products.

If we are unable to resolve an issue to your satisfaction, you may choose to request assistance from, or submit a complaint to, the privacy authorities, such as the Privacy Commissioner of Canada, who may be contacted at 1-800-282-1376

You may exercise any of the rights described above at any time by contacting us as described under the "How to contact us" section below. We will respond to your request in accordance with applicable data protection laws.

12. **How to contact us**

If you have any questions, concerns or complaints about this privacy policy, or the way we process your personal data, or if you want to exercise your rights as described above, please contact our Data Protection Officer and our privacy team by email at privacy@genetec.com, or by postal mail at the following address: 2280 AlfredNobel Blvd., Suite 400, Montreal, QC, H4S 2A4, Canada. .

13. **Updates to this privacy policy**

Continuous improvement of our products is key to our goal to providing our customers with the most innovative and relevant solutions. We, therefore, continuously implement new technologies and improving our processes, software and services, which may require us to update this privacy policy from time to time, without prior notice. However, if we make any major changes to our privacy practices, we will publish a relevant notice on our corporate website.

The revised version of this document terms will take effect as soon as it is made available on our website with regards to all new customers. If any revision to this policy outlines any material changes to the way that we use or otherwise process any personal data, we will provide a more prominent notice.
Where applicable, we will also provide Customer with instructions on how to opt in to or opt out from our new products, or communications. Note that some aspects of our products may not be available to Customer if Customer chooses to opt out from certain communications.

This privacy policy has been last updated on December 4, 2019. Please note that this version takes into account the provisions of Regulation 2016/679 of the European Parliament and of the Council on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

7.5 Genetec Privacy Policy

Product Privacy Sheet - Genetec™ Security Center

This document is a supplement to the Genetec Privacy Policy and applies to the following Genetec product: Genetec™ Security Center.

December 4, 2019

This document is a supplement to the Genetec Global Policy available above (Section 7.4) and applies to the following Genetec Product (the "Product"): Genetec™ Security Center.

Overview

As part of your use of the Product, you (either you as an individual, or the legal entity that you represent, as applicable; referred to as "you", "your" or "yours"), or your users, may upload, receive or generate certain information or data ("Data"). This document outlines what type of Data is concerned and to what extent Genetec (also referred to as "we", "us" or "our") may access, store, use or otherwise process (referred to as "processing", "process" or other similar words) your Data.

Deployment environment

Please keep in mind that the Product deployment environment may impact the scope of Data processing. It is therefore essential to determine how the Product will be deployed in order to fully understand the implications of Data access.

The deployment in a "Local Environment" means that the Product is deployed in an infrastructure not provided by Genetec, all Data is stored in the data hosting systems and servers provided by you and is not made available to Genetec except as outlined in this document.

The deployment in a "Cloud Environment" means that the Product is deployed in the hosting environment provided by Genetec (and hosted by Microsoft Azure in its secure Azure data centers). The environment will normally contain the data of other Genetec customers, but each customer's respective Data is logically segregated so that no one single customer may see or access other customers' Data. Your Data will not be visible to any other customer using their instance of the Product from the same Cloud Environment.

When the Product is provided in a combination of a Cloud Environment and a Local Environment, we refer to such deployment as a Hybrid Environment. In these cases, the accessibility of the Data will vary according to the design of the deployed Product. Please refer to the description of Data use cases above to determine how such Data will be processed by us.

What type of Data will be captured by the

Product? Common components

Directory

The Security Center Director ("Directory") is the component of the Product that manages all system configurations, settings and other Data listed below, which will all remain in the Product until it is deleted.

User Data: The Directory is responsible for the authentication of all user connections and, as such, will capture user identifiers to uniquely identify authorized users. This includes their name, e-mail address, and contact information that is configured in the Product. Additionally, the Product keeps a record of all user activities as part of its audit trail, which may also include changes to the system configuration made by each

user. By default, this Data is stored for a period of 90 days, but you may disable its capture.

Usage Data: The Directory captures certain non-personal statistical and usage Data, such as the user action type, the type of capture (manual or automatic), and so forth. Usage Data does not contain any of your personal or confidential Data.

System configuration: Various Data regarding your configuration settings will be captured by the Product through the Directory, such as the operating system language used, your Product identification, the version of the Genetec products installed on your device, and so forth.

GUS and SAM

The Product includes two connected services that you may enable at your discretion: GUS and SAM.

The first, the Genetec Update Service (GUS), enables you to update your Product when a new release becomes available to you. Among other things, GUS allows you to receive automated software and firmware updates, security notifications and other relevant non marketing content. To do so, GUS collects Data about your system usage, comprised of directories, roles, units, entities that you have in your security system and their availability (up and down times), which does not contain any personal information.

The second, the System Availability Monitor (SAM), allows your system administrators (which may include your system integrator) to have a general overview of the status and availability of any security systems connected to the Product. To do so, SAM will use the same Data as collected by GUS to compile statistics on the availability and health of the Product, such as the uptime percentage, the average time between errors and the average time an entity takes to come back online. SAM requires an active subscription to Genetec Advantage program to operate.

To facilitate proactive support and improve communication, GUS and SAM are configured to allow Genetec to receive Data described above by default. You may choose to enable GUS and SAM on an anonymous basis, meaning that all the Data submitted to Genetec will be kept in an aggregate manner with the like Data from other Genetec customers and we will not be able to identify you as the source of such Data. You may also select to disable GUS and SAM, in which case no Data will be collected. Please note, however, that these last two options might limit some of the respective service's capabilities.

Optional components

As the Product is a modular platform, you need to obtain a license to use one or more of its optional components to fully leverage the capabilities of the Product. The Data collected by the Product will vary depending on the component covered by your license, as described below.

Omnicast™

Omnicast™ is our video management system, the core function of which is to record and enable you to manage video footage from your connected cameras. Omnicast™ is only available for deployment in Local Environments and, as such, none of the Data listed below will be made available to Genetec.

Video recording and metadata: The Product captures video recording from each camera enrolled in the Product, including the associated metadata, including timestamps, geolocation, and so forth.

Device Data: The Product will also capture Data on the connected cameras, such as their respective name and model. This information will also be used by the Product to recommend and make available to you firmware updates available for such cameras, where the feature is supported.

AutoVu™

AutoVu™ is our automatic license plate recognition system. AutoVu™ works natively with our AutoVu™ Sharp cameras. These cameras are designed to capture relevant Data allowing you to use them with AutoVu™, Genetec Patroller™ and/or Genetec Motoscan™ systems. To provide protection against system or network failures, these devices are designed to capture, and store internally, license plate identification, images and metadata (including timestamps and the geolocation) until such Data is offloaded.

Below is a list of the Data collected and stored as part of your use of AutoVu™, irrespective of the infrastructure in which you deploy the Product. AutoVu™ systems are available for deployments in Local, Cloud or Hybrid Environments. Additionally, the Data collected as described below is stored according to the retention periods you define, which may vary depending on the type of Data.

License plate identification: The Product will capture and recognise all license plate identification to enable you to geographically locate the vehicle identified using the Product. This includes the license plate number and the state / province / country of issuance.

Images and metadata: The Product further captures images of a vehicle identified using the Product, as well as the associated image metadata, such as the vehicle's make and model, its speed, relative motion and the like. This may include images of the license plate of the vehicle, the vehicle itself and images of the surrounding areas, which may include images of individuals passing by at the time the images were captured.

Device Data: The Product captures device Data on the AutoVu™ Sharp cameras connected to your AutoVu™ system, including the name and model of the connected cameras. The Product will further capture unique device identifiers on devices used to capture the Data of the vehicle identified using the Product, which may include unique identifiers of cameras, computers, sensors and other hardware or software used to capture and process such Data as part of the use of the Product.

Event Data: Based on your configuration of the Product, it will use the license plate identification, images and metadata (as described above), as well as the time when the captured event occurred and its geolocation to generate Data related to the event, such as parking sessions information and parking ticket transactions.

You may also choose to import additional Data into the Product, such as permit lists and hot lists. With this imported Data, you can further configure the Product to handle events to include whether a vehicle is being

looked for or not, whether a permit is valid or not, the capacity of the parking lot visited, descriptive information of vehicles you are looking for, and so forth.

Genetec Patroller™ and Genetec Motoscan™

Just like AutoVu™, Genetec Patroller™ and Genetec Motoscan™ are our specialized license plate recognition software. However, Genetec Patroller™ is intended for in vehicle deployments only, while Genetec Motoscan™ is intended for deployments on scooters and similar mobile vehicles. Genetec Patroller™ and Genetec Motoscan™ may connect to your instance of AutoVu™ but are designed to be autonomous and disconnected. Depending on your needs, you can therefore choose to store all Data locally, until offloaded into AutoVu™.

License plate Data: The Product will capture the same license plate Data as captured by AutoVu™ and described above.

Event Data: The Product will capture the same event Data as captured by AutoVu™ and described above.

Configuration settings: The Product will collect various information regarding its settings, such as whether the Product is configured for traffic or law enforcement purposes, and the version of the Genetec Patroller™ used.

IP address: Finally, the Product will share its IP address with your instance of AutoVu™, and vice-versa, to ensure that the two systems interconnect to enable you to offload your Data from Genetec Patroller™ to AutoVu™.

Synergis™

Synergis™ is our access control system and allows you to control people access and flow on your site.

Permanent users and visitor Data: To allow you to configure access rights, the Product will collect various Data about the individuals to whom you grant such access rights, whether they are permanent users (such as your employees or contractors) or visitors. This includes the first and last name of these individuals, as well as any other attributes that you choose to enter to identify a person. Depending on your choice, these custom fields may include personal Data. This Data will be stored in the Product until you decide to delete it.

Access history: The Product will collect Data regarding the access history of a permanent user or a visitor, such as the places visited, the check-in and check-out time, if an access was denied or granted and the reason for the denied access, and so forth. By default, access history Data will be kept in the Product for a period of 90 days, but you may choose a different retention period.

Device Data: To leverage the Product and associate access rights with entry points, various Data related to the devices and the physical location they control will be collected, such as the name and model of the door sensors, the name of the access control readers, the format of the access cards, the door name, the name of an area or a zone, and so forth.

Federation™

Federation™ allows you to connect multiple Security Center installation instances that you use to secure your premises into a single virtual system. Federation™ allows you to use individual instances of Security Center to view, manage and control remotely other compatible Security Center installation instances forming part of your virtual system.

Federation™ does not store any Data, but solely allows remote access and transfer of your Data between interconnected Security Center instances forming part of your security infrastructure. However, certain Data related to your federated systems will be retained in the Directory of your local Security Center system, such as the name of your connected cameras, and other non-personal Data. In the case of Synergis™, a copy of your Permanent users and visitors Data (as defined above) will also be stored in the Directory. The retention period for this Data is configured by you.

Genetec Citigraf™

Genetec Citigraf™ enables you to connect sensors and other data sources to have a centralized view of your operations. It solely allows remote access to Data from connected sources and is not designed to store any of that Data. Genetec Citigraf™ may, however, allow you to retain the geolocation and timestamps for events that you choose to track to improve event searching capabilities.

Genetec Citigraf™ is only available for deployment in Local

Environments. Genetec Mission Control™

Genetec Mission Control™ is our collaborative decision management system. Available for deployment only in Local Environments, Genetec Mission Control™ remotely accesses Data from connected sensors and security devices to guide your security team to follow your organization-specific processes when an event (such as an incident) occurs.

Genetec Mission Control™ allows remote access to Data from connected sources and is not designated to store any of that source Data.

Incident Data: To allow for efficient incident management, the Product will collect various Data related to each captured incident, including the time at which it occurred and the source of the event. This Data will be retained in the Product for a period of 90 days by default, but you may choose to define a different retention period.

Operator performance Data: You can further monitor the performance of your operators and the actions taken to resolve the incident. As such, the Product will therefore retain the time to response and the time to resolution to each incident. Plus, the Product allows you to pre-set questions to be answered by your operators and provides a section should you or your operations wish to add comments in relation to a specific incident. This Data will be retained in the Product for a period of 90 days by default, but you may choose to define a different retention period.

Sipelia™

Sipelia™ allows you to make, receive and manage session initiation protocol (SIP) based voice and video calls over a network.

Audio/Video recording and metadata: To allow you to manage your calls, either to answer them, forward them or put them on hold, the Product will capture various Data related to the calls received. This includes the audio and video recording of the call, the call start and end time, the call type, the call state, and so forth. By default, this Data will be kept for a period of 30 days, but you may choose a different retention period. The Product also allows you to solely retain video or audio content, or none, as part of your retention configuration.

Device information: The Product captures Data related to the devices connected to it, such as the name of the intercom, the intercom extension, and so forth. This Data is captured to allow you to generate reports based on your needs.

Third-Party Software and Plugins

The Product further allows you to connect to compatible third-party software, hardware and plugins in order to import Data into the Product. Therefore, depending on your configuration and these third parties' policies, your Data may be accessible to them. In this event, such access is subject to their own terms and conditions and is expressly excluded from the scope of this document.

The same applies to the various add-ons that you can procure to complement the Product, which are not covered by this document.

Data access

Your Data may be accessed only by the authorized system administrators (which may include your system integrator) and users with appropriate access privileges, as defined by you.

To the extent that you deploy the Product in a Local Environment, no Data will be made available to Genetec, except for GUS and SAM, when enabled.

To the extent that you deploy the Product in our Cloud Environment, your Data will be processed in our data centers in the manner described in this document. A limited number of our employees will have access to your Data to enable us to provide you with the service.

To that extent that Genetec provides support to you with regards to the Product, our support team will only have access to information that you submit to us as part of your support request or to which you decide to grant us access through the Product. As such, in certain cases, we may ask you to share additional

information with us to be able to respond to your request for support. Unless otherwise stated in this document, Genetec employees will not have access to your Data.

Data ownership

You will always remain the owner of your Data. You are fully responsible for the content of your Data, which includes obtaining all rights, consents, authorizations and other approvals from all relevant third parties which may be necessary for you to make available your Data to us as part of your use of the Product, and for us to process your Data in accordance with the terms of our privacy policy and this document.

EXHIBIT "G"

WORKERS' COMPENSATION INSURANCE CERTIFICATION

Every employer, except the State, shall secure the payment of compensation in one or more of the following ways:

(a) By being insured against liability to pay compensation by one or more insurers duly authorized to write compensation insurance in this State.

(b) By securing from the Director of Industrial Relations, a certificate of consent to self-insure, either as an individual employer, or as one employer in a group of employers, which may be given upon furnishing proof satisfactory to the Director of Industrial Relations of ability to self-insure and to pay any compensation that may become due to his or her employees.

CHECK ONE

X I am aware of the provisions of Section 3700 of the Labor Code which requires every employer to be insured against liability for Workers' Compensation or to undertake self-insurance in accordance with the provisions of that Code, and I will comply with such provisions before commencing the performance of the work and activities required or permitted under this Agreement. (Labor Code §1861).

_____ I affirm that at all times, in performing the work and activities required or permitted under this Agreement, I shall not employ any person in any manner such that I become subject to the workers' compensation laws of California. However, at any time, if I employ any person such that I become subject to the workers' compensation laws of California, immediately I shall provide the City with a certificate of consent to self-insure, or a certification of workers' compensation insurance.

I certify under penalty of perjury under the laws of the State of California that the information and representations made in this certificate are true and correct.

CELPLAN TECHNOLOGIES, INC

By: Paulo Leite Date: 10/1/2024

Paulo Leite, Chief Operations Officer

City Council **AGENDA ITEM NO. L4.**

DATE: June 2, 2026

TO: Honorable Mayor and City Council Members

SUBJECT: Consideration of a new Enterprise License Agreement with Esri and related subscription services for a three-year term, in an amount not to exceed $271,185.15 (Interim Assistant City Manager Garcia)

MOTION:

If the City Council determines that staff's recommendation is appropriate, the following motion is provided:

I move to approve a new Enterprise License Agreement with Esri and related subscription services for a three-year term, in an amount not to exceed $271,185.15.

RECOMMENDATION:

Staff recommends that the City Council approve a new Enterprise License Agreement with Esri and related subscription services for a three-year term, in an amount not to exceed $271,185.15..

DISCUSSION:

In May 2011, the City entered into an Enterprise License Agreement (ELA) with Esri to utilize Esri's geographic information system (GIS) software and services. At that time, it represented the first ELA that Esri entered into with a city the size of Redlands. The agreement presented herein would represent the City's sixth consecutive ELA with Esri.

This type of licensing agreement has enabled the City to expand the use of Esri's GIS technology across multiple departments. Esri's ArcGIS Desktop software continues to be an integral part of many City business processes, supporting planning, engineering, utilities, public safety, and other operational activities.

In addition, the City has leveraged ArcGIS Online to extend GIS capabilities to mobile environments, allowing field crews to access and update data in real time, and enabling the public to interact with City information through web applications. Esri software is also used to develop a variety of applications that support departmental operations and improve service delivery.

The City also utilizes ArcGIS Server to publish and share geographic information with the public through interactive maps and dashboards. The City's GIS currently maintains more than 400 data layers and hundreds of interactive map applications and dashboards, all of which rely on Esri licensing. Examples include applications related to zoning, the General Plan, capital improvement projects, road closures and water shutdowns, which are made readily available to residents and businesses.

Additionally, the City maintains an Open Data Hub, which provides public access to GIS datasets and applications, further promoting transparency and community engagement. The Open Data Hub can be accessed at: https://datahub-coredlands.hub.arcgis.com/.

The proposed agreement establishes a three-year term with Esri for the City's core Geographic Information System (GIS) platform through a Small Government Enterprise Agreement (SGEA). The SGEA provides fixed and known pricing of $60,300 annually, for a total of $180,900 over the three-year term. The annual subscription details are included in Quote Q-573623.

In addition to the SGEA, the agreement includes several ancillary software subscriptions, including ArcGIS Hub, Site Scan, Drone2Map, and ArcGIS Indoors. The ancillary components are currently priced for the three-year term as follows:

- ArcGIS Hub Premium: $5,150 annually, for a total of $15,450 over three years
- ArcGIS Site Scan (2 subscriptions): $5,495.05 annually, for a total of $16,485.15 over three years
- ArcGIS Drone2Map: $1,750 annually, for a total of $5,250 over three years

These items are included in Quote Q-573623.

ArcGIS Indoors is provided under a separate quote (Q-573625) with an annual subscription fee of $17,700, for a total of $53,100 over the three-year term.

License	Year 1	Year 2	Year 3
Populations of 50,001 to 100,000 Small Government Enterprise Agreement Annual Subscription	$ 60,300.00	$ 60,300.00	$ 60,300.00
ArcGIS Hub Premium ArcGIS Online Community Annual Subscription	$ 5,150.00	$ 5,150.00	$ 5,150.00
Site Scan for ArcGIS Operator Annual Subscription	$ 4,995.50	$ 4,995.50	$ 4,995.50
Site Scan for ArcGIS Operator Annual Subscription	$ 499.55	$ 499.55	$ 499.55
ArcGIS Drone2Map Advanced for ArcGIS Online Annual Subscription	$ 1,750.00	$ 1,750.00	$ 1,750.00
ArcGIS Indoors Spaces for ArcGIS Online Annual Subscription	$ 5,900.00	$ 5,900.00	$ 5,900.00
ArcGIS Indoors Maps for ArcGIS Online Annual Subscription	$ 11,800.00	$ 11,800.00	$ 11,800.00
Total	**$ 90,395.05**	**$ 90,395.05**	**$ 90,395.05**

Examples of GIS Applications Used Across City Departments

The City uses Esri GIS technology across multiple departments to support planning, infrastructure management, public safety, and community services. Examples include:

1. Development Services
The OneStop Map helps staff locate development projects and analyze surrounding conditions using layers such as parcels, addresses, zoning boundaries, fire hazard zones, streets, traffic signals, and aerial imagery. It is available through ArcGIS Pro, and the OneStop Web App and has supported initiatives such as the Pavement Accelerated Repair Implementation Strategy (PARIS) and the Street Lighting Upgrade Program.

GIS layers also support the CityWorks asset management system, which processes work orders and infrastructure maintenance requests through the One Stop Permit Center. Additionally, Esri Business Analyst supports the City's economic development efforts by identifying opportunities to attract and expand businesses.

2. Facilities & Community Services
GIS applications support the management of parks, trails, and community resources, including public maps for City Parks, Public Trails, and Homeless Resources.

3. Fire Department
The Fire Department uses GIS tools to support emergency preparedness and inspections. The Weed Abatement Program uses Survey123 for field data collection and ArcGIS Dashboards to track inspection status. Additional applications include maps for High Fire Hazard Zones, Historical Flooding, and Illegal Fireworks Reporting.

4. Police Department
GIS data maintained through Esri products supports the Police Department's Spillman Computer-Aided Dispatch (CAD) system. Additional applications include the Voluntary Camera Registry, Traffic Collision analysis, and Shopping Center analysis dashboards.

5. Municipal Utilities & Engineering
GIS is used to maintain the City's water distribution and sewer infrastructure systems, with updates occurring both in the field and through desktop GIS tools. Additional applications support programs such as Measure I transportation projects, Average Daily Traffic analysis, Moratorium Streets, and Parcel Slope analysis.

6. Open Government
The City provides public access to GIS data and applications through its Open Data Hub, which organizes datasets and web mapping applications for residents and businesses (https://datahub-coredlands.hub.arcgis.com/). The new License Agreement incorporates new applications and continuous subscriptions listed below:

- ArcGIS Indoors Spaces for ArcGIS Online & ArcGIS Indoors Maps for ArcGIS Online: provides data management tools and focused apps to enhance operations, maintenance, safety, security, and wayfinding within your facilities. Visualize people, spaces, assets, and incidents on floor-aware 2D and 3D maps, modernize asset and space management, improve situational awareness in emergencies, and transform occupant and visitor experiences.
- ArcGIS Hub Premium for ArcGIS Online: a cloud-based collaboration and engagement platform that enables organizations to work together, share data openly or securely, and turn insight into measurable impact.
- Site Scan for ArcGIS: end-to-end, cloud-based drone mapping software for drone imagery data collection, processing, and analysis.
- ArcGIS Drone2Map Advanced: a desktop application that turns drone images into valuable 2D and 3D information products.

ALTERNATIVES:

The City Council could choose not to approve the Enterprise License Agreement. This alternative is not recommended because many City operations, applications, and workflows depend on Esri GIS technology. Without the agreement, the City would be unable to maintain many of its existing GIS systems and services.

STRATEGIC PLAN: Esri tools and software support the following initiatives -

- Supports Priority A Objective 2b: Increase accessibility to businesses and essential services through improvements to mobility and parking.
- Supports Priority A Objective 3b: Expand historic surveys to include areas that were not previously surveyed and properties with historically eligible buildings built in the 1950s and 1960s.
- Supports Priority A Objective 3c: Promote the City's historic preservation programs through new user-friendly educational materials.
- Supports Priority A Objective 4a: Develop an assessment and improvement plan for City parks and open spaces that includes adherence to industry standards.
- Supports Priority B Objective 2c: Evaluate public safety workforce to determine if staffing levels are consistent with population growth. Develop a plan for workforce growth based upon results.
- Supports Priority B Objective 4b: Develop methods to reduce and prevent homelessness.
- Supports Priority D Objective 2a: Expand the non-potable water system.

- Supports Priority D Objective 3b: Engineer and construct transportation facilities to accommodate all potential users – motorists, cyclists and pedestrians.
- Supports Priority D Objective 5a: Explore City initiatives to address the effect of climate change.

SUBMITTED BY:
Danielle Garcia, Interim Assistant City Manager

RECOMMENDED BY:
Charles M. Duggan Jr., City Manager

REVIEWED BY:
Yvette M. Abich Garcia, City Attorney
Janice McConnell, Assistant City Manager
James Garland, Interim Management Services/Finance Director

PREPARED BY:
Claudia Caceres, GIS Supervisor

FISCAL IMPACT

Fiscal Year: FY 2026

Amount: $90,395.05

Budgeted Y/N:

Account No.: 604900

Additional Appropriation Required: No

Discussion: Funding for the first year of the agreement is included in the current adopted budget. Funding for years two and three is incorporated in the Division's budget requests for FY 2027 & 2028 as part of the City's biennial budget process.

The items on this quotation are subject to and governed by the terms of this quotation, the most current product specific scope of use document found at https://assets.esri.com/content/dam/esrisites/media/legal/product-specific-terms-of-use/e300.pdf, and your applicable signed agreement with Esri. If no such agreement covers any item quoted, then Esri's standard terms and conditions found at https://go.esri.com/MAPS apply to your purchase of that item. If any item is quoted with a multi-year payment schedule, Esri may invoice at least 30 days in advance of each anniversary date without the issuance or a Purchase Order, and Customer is required to make all payments without right of cancellation. Third-party data sets included in a quotation as separately licensed items will only be provided and invoiced if Esri is able to provide such data and will be subject to the applicable third-party's terms and conditions. If Esri is unable to provide any such data set, Customer will not be responsible for any further payments for the data set. US Federal government entities and US government prime contractors authorized under FAR 51.1 may purchase under the terms of Esri's GSA Federal Supply Schedule. Supplemental terms and conditions found at https://www.esri.com/en-us/legal/terms/state-supplemental apply to some US state and local government purchases. All terms of this quotation will be incorporated into and become part of any additional agreement regarding Esri's offerings. Acceptance of this quotation is limited to the terms of this quotation. Esri objects to and expressly rejects any different or additional terms contained in any purchase order, offer, or confirmation sent to or to be sent by buyer. Unless prohibited by law, the quotation information is confidential and may not be copied or released other than for the express purpose of system selection and purchase/license. The information may not be given to outside parties or used for any other purpose without consent from Esri. Delivery is FOB Origin for customers located in the USA.

To expedite your order, please attach a copy of this quotation to your purchase order.
Quote is valid from: 5/1/2026 To: 7/30/2026

If you have made ANY alterations to the line items included in this quote and have chosen to sign the quote to indicate your acceptance, you must fax Esri the signed quote in its entirety in order for the quote to be accepted. You will be contacted by your Customer Service Representative if additional information is required to complete your request.

If your organization is a US Federal, state, or local government agency; an educational facility; or a company that will not pay an invoice without having issued a formal purchase order, a signed quotation will not be accepted unless it is accompanied by your purchase order.

In order to expedite processing, please reference the quotation number and any/all applicable Esri contract number(s) (e.g. MPA, ELA, SmartBuy, GSA, BPA) on your ordering document.

BY SIGNING BELOW, YOU CONFIRM THAT YOU ARE AUTHORIZED TO OBLIGATE FUNDS FOR YOUR ORGANIZATION, AND YOU ARE AUTHORIZING ESRI TO ISSUE AN INVOICE FOR THE ITEMS INCLUDED IN THE ABOVE QUOTE IN THE AMOUNT OF $_____, PLUS SALES TAXES IF APPLICABLE. DO NOT USE THIS FORM IF YOUR ORGANIZATION WILL NOT HONOR AND PAY ESRI'S INVOICE WITHOUT ADDITIONAL AUTHORIZING PAPERWORK.

Please check one of the following:

___I agree to pay any applicable sales tax.

___I am tax exempt, please contact me if exempt information is not currently on file with Esri.

SMALL ENTERPRISE AGREEMENT
COUNTY AND MUNICIPALITY GOVERNMENT
(E214-3)

This Agreement is by and between the organization identified in the Quotation (**"Customer"**) and **Environmental Systems Research Institute, Inc.** (**"Esri"**).

This Agreement sets forth the terms for Customer's use of Products and incorporates by reference (i) the Quotation and (ii) the Master Agreement. Should there be any conflict between the terms and conditions of the documents that comprise this Agreement, the order of precedence for the documents shall be as follows: (i) the Quotation, (ii) this Agreement, and (iii) the Master Agreement. This Agreement shall be governed by and construed in accordance with the laws of the state in which Customer is located without reference to conflict of laws principles, and the United States of America federal law shall govern in matters of intellectual property. The modifications and additional rights granted in this Agreement apply only to the Products listed in Table A.

Table A

1.0 —Additional Definitions

In addition to the definitions provided in the Master Agreement, the following definitions apply to this Agreement:

"Case" means a failure of the Software or Online Services to operate according to the Documentation where such failure substantially impacts operational or functional performance.

"Deploy", "Deployed" and "Deployment" mean to redistribute and install the Products and related Authorization Codes within Customer's organization(s).

"Fee" means the fee set forth in the Quotation.

"Maintenance" means Tier 2 Support, Product updates, and Product patches provided to Customer during the Term of Agreement.

"Master Agreement" means the applicable master agreement for Esri Products incorporated by this reference that is (i) found at https://www.esri.com/en-us/legal/terms/full-master-agreement and available in the installation process requiring acceptance by electronic acknowledgment or (ii) a signed Esri master agreement or license agreement that supersedes such electronically acknowledged master agreement.

"Product(s)" means the products identified in Table A—List of Products and any updates to the list Esri provides in writing.

"Quotation" means the offer letter and quotation provided separately to Customer.

"Technical Support" means the technical assistance for attempting resolution of a reported Case through error correction, patches, hot fixes, workarounds, replacement deliveries, or any other type of Product corrections or modifications.

"Tier 1 Help Desk" means Customer's point of contact(s) to provide all Tier 1 Support within Customer's organization(s).

"Tier 1 Support" means the Technical Support provided by the Tier 1 Help Desk.

"Tier 2 Support" means the Esri Technical Support provided to the Tier 1 Help Desk when a Case cannot be resolved through Tier 1 Support.

2.0 —Additional Grant of License

2.1 Grant of License. Subject to the terms and conditions of this Agreement, Esri grants to Customer a personal, nonexclusive, nontransferable license solely to use, copy, and Deploy quantities of the Products listed in Table A—List of Products for the Term of Agreement (i) for the applicable Fee and (ii) in accordance with the Master Agreement.

2.2 Consultant Access. Esri grants Customer the right to permit Customer's consultants or contractors to use the Products exclusively for Customer's benefit. Customer will be solely responsible for compliance by consultants and contractors with this Agreement and will ensure that the consultant or contractor discontinues use of Products upon completion of work for Customer. Access to or use of Products by consultants or contractors not exclusively for Customer's benefit is prohibited. Customer may not permit its consultants or contractors to install Software or Data on consultant, contractor, or third-party computers or remove Software or Data from Customer locations, except for the purpose of hosting the Software or Data on Contractor servers for the benefit of Customer.

3.0 —Term, Termination, and Expiration

3.1 Term. This Agreement and all licenses hereunder will commence on the Effective Date and continue for the duration identified in the Term of Agreement, unless this Agreement is terminated earlier as provided herein. Customer is only authorized to use Products during the Term of Agreement. For an Agreement with a limited term, Esri does not grant Customer an indefinite or a perpetual license to Products.

3.2 No Use upon Agreement Expiration or Termination. All Product licenses, all Maintenance, and Esri User Conference registrations terminate upon expiration or termination of this Agreement.

3.3 Termination for a Material Breach. Either party may terminate this Agreement for a material breach by the other party. The breaching party will have thirty (30) days from the date of written notice to cure any material breach.

3.4 Termination for Lack of Funds. For an Agreement with government or government-

owned entities, either party may terminate this Agreement before any subsequent year if Customer is unable to secure funding through the legislative or governing body's approval process.

3.5 Follow-on Term. If the parties enter into another agreement substantially similar to this Agreement for an additional term, the effective date of the follow-on agreement will be the day after the expiration date of this Agreement.

4.0—Product Updates

4.1 Future Updates. Esri reserves the right to update the list of Products in Table A—List of Products by providing written notice to Customer. Customer may continue to use all Products that have been Deployed, but support and upgrades for deleted items may not be available. As new Products are incorporated into the standard program, they will be offered to Customer via written notice for incorporation into the Products schedule at no additional charge. Customer's use of new or updated Products requires Customer to adhere to applicable additional or revised terms and conditions in the Master Agreement.

4.2 Product Life Cycle. During the Term of Agreement, some Products may be retired or may no longer be available to Deploy in the identified quantities. Maintenance will be subject to the individual Product Life Cycle Support Status and Product Life Cycle Support Policy, which can be found at https://support.esri.com/en/other-resources/product-life-cycle. Updates for Products in the mature and retired phases may not be available. Customer may continue to use Products already Deployed, but Customer will not be able to Deploy retired Products.

5.0—Maintenance

The Fee includes standard maintenance benefits during the Term of Agreement as specified in the most current applicable Esri Maintenance and Support Program document (found at https://www.esri.com/en-us/legal/terms/maintenance). At Esri's sole discretion, Esri may make patches, hot fixes, or updates available for download. No Software other than the defined Products will receive Maintenance. Customer may acquire maintenance for other Software outside this Agreement.

a. Tier 1 Support

1. Customer will provide Tier 1 Support through the Tier 1 Help Desk to all Customer's authorized users.

2. The Tier 1 Help Desk will be fully trained in the Products.

3. At a minimum, Tier 1 Support will include those activities that assist the user in resolving how-to and operational questions as well as questions on installation and troubleshooting procedures.

4. The Tier 1 Help Desk will be the initial point of contact for all questions and reporting of a Case. The Tier 1 Help Desk will obtain a full description of each reported Case and the system configuration from the user. This may include obtaining any customizations, code samples, or data involved in the Case.

5. If the Tier 1 Help Desk cannot resolve the Case, an authorized Tier 1 Help Desk individual may contact Tier 2 Support. The Tier 1 Help Desk will provide support in such a way as to minimize repeat calls and make solutions to problems available to Customer's organization.

6. Tier 1 Help Desk individuals are the only individuals authorized to contact Tier 2 Support. Customer may change the Tier 1 Help Desk individuals by written notice to Esri.

b. Tier 2 Support

1. Tier 2 Support will log the calls received from Tier 1 Help Desk.

2. Tier 2 Support will review all information collected by and received from the Tier 1 Help Desk including preliminary documented troubleshooting provided by the Tier 1 Help Desk when Tier 2 Support is required.

3. Tier 2 Support may request that Tier 1 Help Desk individuals provide verification of information, additional information, or answers to additional questions to

supplement any preliminary information gathering or troubleshooting performed by Tier 1 Help Desk.

4. Tier 2 Support will attempt to resolve the Case submitted by Tier 1 Help Desk.

5. When the Case is resolved, Tier 2 Support will communicate the information to Tier 1 Help Desk, and Tier 1 Help Desk will disseminate the resolution to the user(s).

6.0 — Endorsement and Publicity

This Agreement will not be construed or interpreted as an exclusive dealings agreement or Customer's endorsement of Products. Either party may publicize the existence of this Agreement.

7.0 — Administrative Requirements

7.1 OEM Licenses. Under Esri's OEM or Solution OEM programs, OEM partners are authorized to embed or bundle portions of Esri products and services with their application or service. OEM partners' business model, licensing terms and conditions, and pricing are independent of this Agreement. Customer will not seek any discount from the OEM partner or Esri based on the availability of Products under this Agreement. Customer will not decouple Esri products or services from the OEM partners' application or service.

7.2 Annual Report of Deployments. At each anniversary date and ninety (90) calendar days prior to the expiration of this Agreement, Customer will provide Esri with a written report detailing all Deployments. Upon request, Customer will provide records sufficient to verify the accuracy of the annual report.

8.0 — Ordering, Administrative Procedures, Delivery, and Deployment

8.1 Orders, Delivery, and Deployment

a. Upon the Effective Date, Esri will invoice Customer and provide Authorization Codes to activate the nondestructive copy protection program that enables Customer to download, operate, or allow access to the Products. If this is a multi-year Agreement, Esri may invoice the Fee up to thirty (30) calendar days before the annual anniversary date for each year.

b. Undisputed invoices will be due and payable within thirty (30) calendar days from the date of invoice. Esri reserves the right to suspend Customer's access to and use of Products if Customer fails to pay any undisputed amount owed on or before its due date. Esri may charge Customer interest at a monthly rate equal to the lesser of one percent (1.0%) per month or the maximum rate permitted by applicable law on any overdue fees plus all expenses of collection for any overdue balance that remains unpaid ten (10) days after Esri has notified Customer of the past-due balance.

c. Esri's federal ID number is 95-2775-732.

d. If requested, Esri will ship backup media to the ship-to address identified on the Ordering Document, FOB Destination, with shipping charges prepaid. Customer acknowledges that should sales or use taxes become due as a result of any shipments of tangible media, Esri has a right to invoice and Customer will pay any such sales or use tax associated with the receipt of tangible media.

8.2 Order Requirements. Esri does not require Customer to issue a purchase order. Customer may submit a purchase order in accordance with its own process requirements, provided that if Customer issues a purchase order, Customer will submit its initial purchase order on the Effective Date. If this is a multi-year Agreement, Customer will submit subsequent purchase orders to Esri at least thirty (30) calendar days before the annual anniversary date for each year.

a. All orders pertaining to this Agreement will be processed through Customer's centralized point of contact.

b. The following information will be included in each Ordering Document:

(1) Customer name; Esri customer number, if known; and bill-to and ship-to addresses
(2) Order number
(3) Applicable annual payment due

9.0 —MERGERS, ACQUISITIONS, OR DIVESTITURES

If Customer is a commercial entity, Customer will notify Esri in writing in the event of (i) a consolidation, merger, or reorganization of Customer with or into another corporation or entity; (ii) Customer's acquisition of another entity; or (iii) a transfer or sale of all or part of Customer's organization (subsections i, ii, and iii, collectively referred to as "**Ownership Change**"). There will be no decrease in Fee as a result of any Ownership Change.

9.1 If an Ownership Change increases the cumulative program count beyond the maximum level for this Agreement, Esri reserves the right to increase the Fee or terminate this Agreement and the parties will negotiate a new agreement.

9.2 If an Ownership Change results in transfer or sale of a portion of Customer's organization, that portion of Customer's organization will transfer the Products to Customer or uninstall, remove, and destroy all copies of the Products.

9.3 This Agreement may not be assigned to a successor entity as a result of an Ownership Change unless approved by Esri in writing in advance. If the assignment to the new entity is not approved, Customer will require any successor entity to uninstall, remove, and destroy the Products. This Agreement will terminate upon such Ownership Change.

Quote is valid from: 5/1/2026 To: 7/30/2026

If you have made ANY alterations to the line items included in this quote and have chosen to sign the quote to indicate your acceptance, you must fax Esri the signed quote in its entirety in order for the quote to be accepted. You will be contacted by your Customer Service Representative if additional information is required to complete your request.

If your organization is a US Federal, state, or local government agency; an educational facility; or a company that will not pay an invoice without having issued a formal purchase order, a signed quotation will not be accepted unless it is accompanied by your purchase order.

In order to expedite processing, please reference the quotation number and any/all applicable Esri contract number(s) (e.g. MPA, ELA, SmartBuy, GSA, BPA) on your ordering document.

BY SIGNING BELOW, YOU CONFIRM THAT YOU ARE AUTHORIZED TO OBLIGATE FUNDS FOR YOUR ORGANIZATION, AND YOU ARE AUTHORIZING ESRI TO ISSUE AN INVOICE FOR THE ITEMS INCLUDED IN THE ABOVE QUOTE IN THE AMOUNT OF $_____, PLUS SALES TAXES IF APPLICABLE. DO NOT USE THIS FORM IF YOUR ORGANIZATION WILL NOT HONOR AND PAY ESRI'S INVOICE WITHOUT ADDITIONAL AUTHORIZING PAPERWORK.

Please check one of the following:

___ I agree to pay any applicable sales tax.

___ I am tax exempt, please contact me if exempt information is not currently on file with Esri.

_____ _____
Signature of Authorized Representative **Date**

_____
Name (Please Print)

_____
Title

The quotation information is proprietary and may not be copied or released other than for the express purpose of system selection and purchase/license. This information may not be given to outside parties or used for any other purpose without consent from Environmental Systems Research Institute, Inc. (Esri).

Any estimated sales and/or use tax reflected on this quote has been calculated as of the date of this quotation and is merely provided as a convenience for your organization's budgetary purposes. Esri reserves the right to adjust and collect sales and/or use tax at the actual date of invoicing. If your organization is tax exempt or pays state tax directly, then prior to invoicing, your organization must provide Esri with a copy of a current tax exemption certificate issued by your state's taxing authority for the given jurisdiction.

Esri may charge a fee to cover expenses related to any customer requirement to use a proprietary vendor management, procurement, or invoice program.

The items on this quotation are subject to and governed by the terms of this quotation, the most current product specific scope of use document found at https://assets.esri.com/content/dam/esrisites/media/legal/product-specific-terms-of-use/e300.pdf, and your applicable signed agreement with Esri. If no such agreement covers any item quoted, then Esri's standard terms and conditions found at https://go.esri.com/MAPS apply to your purchase of that item. If any item is quoted with a multi-year payment schedule, Esri may invoice at least 30 days in advance of each anniversary date without the issuance or a Purchase Order, and Customer is required to make all payments without right of cancellation. Third-party data sets included in a quotation as separately licensed items will only be provided and invoiced if Esri is able to provide such data and will be subject to the applicable third-party's terms and conditions. If Esri is unable to provide any such data set, Customer will not be responsible for any further payments for the data set. US Federal government entities and US government prime contractors authorized under FAR 51.1 may purchase under the terms of Esri's GSA Federal Supply Schedule. Supplemental terms and conditions found at https://www.esri.com/en-us/legal/terms/state-supplemental apply to some US state and local government purchases. All terms of this quotation will be incorporated into and become part of any additional agreement regarding Esri's offerings. Acceptance of this quotation is limited to the terms of this quotation. Esri objects to and expressly rejects any different or additional terms contained in any purchase order, offer, or confirmation sent to or to be sent by buyer. Unless prohibited by law, the quotation information is confidential and may not be copied or released other than for the express purpose of system selection and purchase/license. The information may not be given to outside parties or used for any other purpose without consent from Esri. Delivery is FOB Origin for customers located in the USA.

WOODB **This offer is limited to the terms and conditions incorporated and attached herein.**

Master Agreement
Products and Services

Revised August 1, 2025
IMPORTANT—READ CAREFULLY

Unless superseded by a signed license agreement between you and Esri, Esri is willing to provide Esri Offerings and Services to you only if you accept all terms and conditions contained in this Agreement as the sole and final agreement of the parties regarding your acquisition of these Esri Offerings and Services. Please read the terms and conditions carefully. You may not use the Esri Offerings unless you agree to the terms and conditions of the Agreement. Your access and use of Esri Offerings, or Services, constitutes your acceptance of the terms and conditions of this Agreement. If you do not agree, contact your local sales representative prior to making your purchase.

This Master Agreement ("**Agreement**") is between you (**"Customer"**) and **Environmental Systems Research Institute, Inc.** (**"Esri"**), a California corporation with a place of business at 380 New York Street, Redlands, California 92373-8100 USA.

Attachment A contains definitions of capitalized terms used throughout this Agreement. Each section of this Agreement may include additional definitions that are used exclusively within that section.

1.0 GENERAL GRANT OF RIGHTS AND RESTRICTIONS

1.1 Grant of Rights. In consideration of Customer's payment of all applicable fees and in accordance with this Agreement, Esri

a. Provides Services as set forth in this Agreement;
b. Grants to Customer a nonexclusive, nontransferable right and license or subscription to access and use Esri Offerings as set forth in the Specifications and applicable Ordering Documents; and
c. Authorizes Customer to copy and make derivative works of the Documentation for Customer's own internal use in conjunction with Customer's authorized use of Esri Offerings. Customer will include the following copyright attribution notice acknowledging the proprietary rights of Esri and its licensors in any derivative work:

   "Portions of this document include intellectual property of Esri and its licensors and are used under license. Copyright © [*Customer will insert the actual copyright date(s) from the source materials*.] Esri and its licensors. All rights reserved."

The grants of rights in this section (i) continue for the duration of the subscription or applicable Term or perpetually if no Term is applicable or identified in the Ordering Documents and (ii) are subject to additional rights and restrictions in this Agreement including Attachment B.

1.2 Consultant or Contractor Access. Customer may authorize its consultants or contractors to (i) host Esri Offerings for Customer's benefit and (ii) use Esri Offerings exclusively for Customer's benefit. Customer will be solely responsible for its consultants' and contractors' compliance with this Agreement and will ensure that each consultant or contractor discontinues use of Esri Offerings upon completion of work for Customer. Access to or use of Esri Offerings by consultants or contractors that is not exclusively for Customer's benefit is prohibited.

1.3 Reservation of Rights. All Esri Offerings are the copyrighted works of Esri or its licensors; all rights not specifically granted in this Agreement are reserved.

1.4 Customer Content. Esri does not acquire any rights in Customer Content under this Agreement other than as needed to provide Esri Offerings and Services to Customer.

2.0 SOFTWARE AND ONLINE SERVICES

2.1 Definitions. The following definitions supplement the definitions provided in Attachment A:

a. **"Anonymous Users"** means all who have public access (i.e., without having to provide a Named User Credential) to any part of Customer Content or Customer's Value-Added Applications.
b. **"App Login Credential(s)"** means a system-generated application login and associated password, provided when registering a Value-Added Application with Online Services, which when embedded in a Value-Added Application allows the Value-Added Application to access and use Online Services.
c. **"Commercial App Deployment License"** means a license to distribute Value-Added Applications to third parties for a fee.
d. **"Concurrent Use License"** means a license to install and use Software on computer(s) on a network, provided that the number of simultaneous users may not exceed the number of licenses acquired. A Concurrent Use License includes the right to run passive failover instances of Concurrent Use License management software in a separate operating system environment for temporary failover support.
e. **"Deployment License"** means a license to incorporate ArcGIS Runtime components in Value-Added Applications and distribute Value-Added Applications to Customer's end users.
f. **"Deployment Server License"** means a license to use Software under a Server License for all uses permitted in this Agreement and as described in the Documentation.
g. **"Development Server License"** means a license to use Software under a Server License only to build and test Value-Added Applications as described in the Documentation.
h. **"Development Use"** means the right to install and use Products to build and test Value-Added Applications as described in the Documentation.
i. **"Failover License"** means a license to install Software on redundant systems for failover operations, but the redundantly installed Software may be operational only during the period the primary site is nonoperational. Except for system maintenance and updating of databases, the redundant Software installation(s) will remain dormant while the primary site (or any other redundant site) is operational.
j. **"Named User(s)"** is Customer's employee, agent, consultant, or contractor to whom Customer has assigned a unique, secure login credential (identity) enabling access to a Product that requires such identity in order to access identity-managed capabilities within a Product for Customer's exclusive benefit. For educational use, Named Users may include registered students.
k. **"Named User Credential(s)"** means an individual person's login and associated password enabling that person to access and use Products.
l. **"Named User License"** means the right for a single Named User to use a specific Esri Offering.
m. **"Online Services Subscription"** means a limited-term subscription conveying the right for one or more Named Users to access and use Online Services.
n. **"Redistribution License"** means a license to reproduce and distribute Software provided that

    1. Customer reproduces and distributes the Software in its entirety;
    2. A license agreement that protects the Software to the same extent as this Agreement accompanies each copy of the Software, and the recipient agrees to the terms and conditions of the license agreement;
    3. Customer reproduces all copyright and trademark attributions and notices; and
    4. Customer does not charge a fee to others for the use of the Software.

o. **"Server License"** means a license to install and use Software on any computer being used as a server. Server Licenses may be subject to a limited number of server cores or distributed deployment on multiple servers as described in the Ordering Documents or Documentation. If the Software description includes failover use rights, each Server License includes a Failover License.
p. **"Sharing Tools"** means publishing capabilities included with Customer's authorized use of Online Services or ArcGIS Enterprise that allow Customer to make Customer Content and Value-Added Applications available to third parties or Anonymous Users.
q. **"Single Use License"** means a license for a single authorized end user to install and use Software on a single computer. The single authorized end user may also install a second copy for the end user's exclusive use on a second computer as long as only 1 copy of Software is in use at any time. No other end user may use Software under the same license at the same time for any other purpose.

r. **"Staging Server License"** means a license to use Software under a Server License to build and test Value-Added Applications and map caches; conduct user acceptance, performance, and load testing of other third-party software; stage new commercial data updates; and conduct training activities as described in the Documentation. Customer may use Value-Added Applications and map caches with Development and Deployment Server Licenses.

2.2 License and Subscription Types. Esri provides Products under one or more of the license or subscription types identified in the definitions above. The Documentation or Ordering Documents identify which license or subscription type(s) applies to the ordered Products.

2.3 Software Terms of Use.

a. Customer may

1. Install, access, or store Software and Data on electronic storage device(s);
2. Make archival copies and routine computer backups;
3. Install and use a newer version of Software concurrently with the version to be replaced during a reasonable transition period not to exceed 6 months, provided that the deployment of either version does not exceed Customer's licensed quantity; thereafter, Customer will not use more Software in the aggregate than Customer's total licensed quantity. This concurrent use right does not apply to Software licensed for Development Use;
4. Move Software in the licensed configuration to a replacement computer;
5. Distribute Software and any associated Authorization Codes required for use of a Deployment License to third parties; and
6. Governmental or not-for-profit organizations that operate a website or offer Internet services may use server Software for revenue-generating purposes on a cost-recovery basis and not for profit.

b. Customer may customize Software using any macro or scripting language, APIs, or source or object code libraries but only to the extent that such customization is described in the Documentation.
c. Customer may use all fonts provided with Software for any authorized use of the Software. Customer may also use Esri fonts separately to print any output created by the Software. Any use restrictions for third-party fonts included with the Software are set forth in the font file itself.
d. Esri publishes Product-Specific Terms of Use at https://www.esri.com/legal/scope-of-use.

2.4 Online Services Terms of Use.

a. **Online Services Descriptions.** Esri publishes Product-Specific Terms of Use at https://www.esri.com/legal/scope-of-use. Use of Online Services is also subject to the Cloud Services terms found in Attachment B.
b. **Modifications of Online Services.** Esri may change Online Services and associated APIs at any time, subject to 30 days' notice of material changes and 90 days' notice for deprecations. If any modification, discontinuation, or deprecation of Online Services causes a material, adverse impact to Customer's operations, Esri may, at its discretion, attempt to repair, correct, or provide a workaround for Online Services. If a viable solution is not commercially reasonable, Customer may cancel its subscription to Online Services, and when applicable, Esri will issue a prorated refund.
c. **Sharing Customer Content.** Sharing Customer Content using Sharing Tools enables third parties to use, store, cache, copy, reproduce, (re)distribute, and (re)transmit Customer Content through Online Services. Esri is not responsible for any loss, deletion, modification, or disclosure of Customer Content resulting from use or misuse of Sharing Tools. Customer's use of Sharing Tools is at Customer's sole risk.

2.5 Named User Licenses. Except as expressly set forth in this Agreement, the following terms apply to Software and Online Services for which Customer acquires Named User Licenses.

a. **Named Users.**

1. Named User login credentials are for designated users only and may not be shared with other individuals.

2. Customer may reassign a Named User License to another user if the former user no longer requires access to the Software or Online Services.
3. Customer may not add third parties as Named Users, other than third parties included within the definition of Named Users.

b. **Anonymous Users.** Anonymous Users may only access Software or Online Services through Value-Added Applications that provide access to services or Content, that has been published for shared access through the use of Sharing Tools.

2.6 Value-Added Applications.

1. Customer is responsible for the development, operation, and technical support of Customer Content and Value-Added Applications.
2. Customer may not embed a Named User Credential into Value-Added Applications. Value-Added Applications that enable access to Customer Content that is not publicly shared through the use of Sharing Tools must require individual users to log in to the application(s) with their unique Named User login credentials.
3. Customer may embed an App Login Credential into Value-Added Applications that provide access by Anonymous Users to services or Content, that has been published for shared access by Anonymous Users through the use of Sharing Tools.
4. Customer may not embed an App Login Credential into Value-Added Applications that enables access to Customer Content that is not publicly shared through the use of Sharing Tools. Value-Added Applications that enable access to Customer Content that is not publicly shared through the use of Sharing Tools must require individual users to log in to the application(s) with their unique Named User login credentials.
5. Customer may not provide a third party, other than third parties included within the definition of Named Users, with access to Software or Online Services, other than through Customer's Value-Added Application(s).
6. Customer may transfer Value-Added Applications to any third party for use in conjunction with the third party's own Software license or Online Services Subscription.
7. Customer is responsible for ensuring that the access or use of Esri Offerings within its Value-Added Applications complies with the legal and regulatory requirements in all jurisdictions in which the Value-Added Applications are made available.

2.7 Limited-Use Programs.

a. **Trial, Evaluation, and Beta Programs.** Products acquired under a trial, evaluation, or Beta program are licensed for evaluation and testing purposes only and not for commercial use. Any such use is at Customer's own risk, and the Products do not qualify for Maintenance. If Customer does not convert to a purchased license or subscription prior to the expiration of the trial, evaluation, or Beta license, Customer may lose any Customer Content and customizations made during the license term. If Customer does not wish to purchase a license or subscription, Customer should export such Customer Content before the license expires.
b. **Educational Programs.** Customer agrees to use Products provided under an educational program solely for educational purposes during the educational use Term. Customer shall not use Products for any Administrative Use unless Customer has acquired an Administrative Use license. "Administrative Use" means administrative activities that are not directly related to instruction or education, such as asset mapping, facilities management, demographic analysis, routing, campus safety, and accessibility analysis. Customer shall not use Products for revenue-generating or for-profit purposes.
c. **Grant Programs.** Customer may use Products provided under a grant program for noncommercial purposes only. Except for cost recovery of using and operating the Products, Customer shall not use Products for revenue-generating or for-profit purposes.
d. **Other Esri Limited-Use Programs.** If Customer acquires Products under any limited-use program not listed above, Customer's use of the Products may be subject to the terms set forth in the applicable launching page or enrollment form or as described on Esri's website in addition to the nonconflicting terms of this Agreement.

3.0 DATA

3.1 Definitions. The following definitions supplement the definitions provided in Attachment A:

a. **“Business Listing Data”** means any dataset that includes a list of businesses and may include other associated business attributes.
b. **“Esri Content Package(s)”** means a digital file containing Online Services basemap Data extracted from the Online Services.
c. **“Street Data”** means Data that includes or depicts information about roads, streets, and related features.

3.2 Permitted Uses.

a. Unless otherwise authorized in writing, Customer may only use Data with the Products for which Esri has provided the Data.
b. Subject to the restrictions set forth in this Agreement and provided that Customer affixes an attribution statement to the Data representations acknowledging Esri or its applicable licensor(s) as the source of the portion(s) of the Data used for the Data representation, Customer may:

    1. Create representations of Data in hard-copy or static, electronic format (e.g., PDF, GIF, JPEG, HTML); in ArcGIS Web Maps; or in Esri Story Maps apps for the purposes of visualizing Data (including basic interactions such as panning, zooming, and identifying map features with simple pop-ups); and
    2. Use and include such representations of Data in presentation packages, marketing studies, or other reports or documents containing map images or data summaries derived from the use of Esri Products to third parties.

c. Customer may take Online Services basemaps offline through Esri Content Packages and subsequently deliver (transfer) them to any device for use with licensed ArcGIS Runtime applications and ArcGIS Desktop. Customer may not otherwise scrape, download, or store Data.
d. Customer may make any internal use of geocoded results that are obtained and stored in compliance with this Agreement. Customer may not redistribute geocoded results except to (i) use and/or display on a map in connection with Customer’s public, non-revenue generating website(s), (ii) permit access to third-parties for the purposes of Customer’s business, or (iii) deliver to third parties, on a noncommercial/non-revenue generating basis, static results, static output or static base map renderings.

3.3 Use Restrictions.

a. Customer may not act directly or authorize its customers to cobrand Data, use Data in any unauthorized service or product, or offer Data through or on behalf of any third party.
b. Customer may not use or allow third parties to use Data, for the purpose of compiling, enhancing, verifying, supplementing, adding to, or deleting from compilation of information that is sold, rented, published, furnished, or in any manner provided to a third party.
c. *Business Listing Data.* Unless authorized in writing, Customer may not use Business Listing Data for any direct marketing purposes, resale publication, or distribution to any third party as part of any mailing list, directory, classified advertising, or other compilation of information.
d. *Street Data.* Customer may use Street Data for mapping, geocoding, routing, and transportation network analysis purposes. Unless otherwise authorized in writing, Customer may not use Street Data for

    1. Real-time navigational guidance, including alerting a user about upcoming maneuvers, such as warning of an upcoming turn or calculating an alternate route if a turn is missed;
    2. Synchronized multivehicle routing; or
    3. Synchronized route optimization.

e. *Business Analyst Data.* Customer may cache Data provided with ArcGIS Business Analyst Mobile App on a mobile device for use in conjunction with its use of ArcGIS Business Analyst Server. Customer may not otherwise cache or download such Data.
f. *Partial Dataset Licenses:* If Customer orders a subset of a dataset (e.g., a country, region, state, or local portion of a global database), Customer may use only the licensed subset, not any other portion of the full dataset.

g. *Michael Bauer Research International Boundaries Data ("MBR Data")*. Customer's right to use data downloaded to Customer's premises (e.g., MBR Data stored in ArcGIS Enterprise, ArcGIS Desktop) terminates 2 years after download.
h. Customer may not use Data outside of the Software and Online Services to teach or train machine systems, models, software, databases, algorithms, and programs, including neural networks ("AI/ML Systems") that learn from experience, adjust to new inputs, and perform humanlike tasks, which allow those systems to sense, comprehend, act and learn.

3.4 Supplemental Terms and Conditions for Data. Certain Data licensors require Esri to flow down additional attribution requirements and terms of use to Customer. These terms supplement and amend the terms of this Agreement and are available at www.esri.com/legal/third-party-data.

4.0 MAINTENANCE

4.1 US Customers. Esri will provide Maintenance for Software and Online Services in accordance with the Esri Maintenance and Support Program and this Agreement if Customer is in the United States.

4.2 Customers outside the United States. Customer may obtain maintenance services from their local Esri authorized distributor under the authorized distributor's own standard support policy and in accordance with the Esri Product Life Cycle Support Policy.

5.0 PROFESSIONAL SERVICES

5.1 Definition. The following definition supplement the definitions provided in Attachment A:

a. **"Professional Service Package(s)"** means a predefined unit of Professional Services, provided at a firm fixed price.

5.2 Permitted Uses. Customer may use, copy, and modify Deliverables solely in conjunction with Customer's authorized use of Products.

5.3 Task Orders and Project Schedule.

a. Esri will provide Professional Services and Deliverables as specified in the Task Order.
b. Each Task Order will reference this Agreement and specify the commencement date and, if known, the period of performance.
c. Task Orders may have the format shown in Attachment C or any other agreed-upon format.
d. Each party will identify, in writing, the project manager who is responsible for Professional Services and Deliverables described in Task Orders. By written notice to the other party's technical administrator, either party may replace the project manager at any time with a similarly qualified person.
e. Other than pricing and descriptions of Professional Services to be performed, terms and conditions in a Task Order are not binding unless both parties have signed the Task Order. The terms of a signed Task Order take precedence over conflicting terms in this Agreement.

5.4 Ownership of Deliverables. Esri or its licensors own and retain ownership of Deliverables.

5.5 Acceptance.

a. **For Firm Fixed Price Task Orders.** Unless otherwise agreed to in the applicable Task Order, Customer will complete its acceptance review within 10 working days of receiving each Deliverable and classify the Deliverables as follows:

    1. "DELIVERABLE ACCEPTED" means a Deliverable conforming to the applicable Task Order with no more than minor nonconformities.
    2. "DELIVERABLE ACCEPTED WITH REWORK" means a Deliverable substantially conforming to the applicable Task Order but having a significant number of identified nonconformities and accepted subject

to rework by Esri. Esri will rework the Deliverable for the identified nonconformities and resubmit it within 30 days. Customer will rerun its acceptance review for the nonconformities detected in the initial review within 10 working days of such resubmission and will reclassify the Deliverable as either DELIVERABLE ACCEPTED or DELIVERABLE REJECTED.

3. "DELIVERABLE REJECTED" means a Deliverable that fails to substantially conform to applicable Task Order(s). Esri will rework the Deliverable and resubmit it to Customer within 30 days, at which time Customer will have 10 working days to rerun its acceptance review and reclassify the deliverable as either DELIVERABLE ACCEPTED or DELIVERABLE REJECTED.

Customer may not use any Deliverable in its business operations before acceptance as described in a.1 or a.2. If Customer does not notify Esri in writing within 10 working days after delivery that it has classified the Deliverable as ACCEPTED WITH REWORK or REJECTED in accordance with a.2 or a.3, or if Customer uses the Deliverable in its business operations, the Deliverable will be deemed, as of the first of either of these events to occur, to have been accepted.

b. **For Task Orders with Professional Service Packages.** Professional Services that Esri performs under Professional Service Packages will be deemed accepted unless Customer notifies Esri within 10 days after performance. Customer may purchase additional Professional Service Packages as needed to complete Customer's work requirements.
c. **For Time and Materials Task Orders.** Professional Services are provided strictly on a time and materials basis subject to the Task Order not-to-exceed funding limit. The Professional Services provided will be deemed accepted and in compliance with the professional and technical standards of the software industry unless Customer notifies Esri within 10 days after performance. Deliverables produced under a time and materials Task Order are consulting hours only will not be subject to acceptance testing.

5.6 Warranty for Deliverables. Esri warrants to Customer that firm fixed price Deliverables materially comply with Specifications for a period of 90 days from acceptance, subject to the limitations and disclaimers of liability set forth in the "Limited Warranties and Disclaimers" section of Attachment B.

5.7 Changes. The parties may make changes within the general scope of a Task Order by mutual agreement. To document any agreed-to scope changes within the general scope of the Task Order that affects the cost or time required to provide a Deliverable, the parties will jointly sign a written amendment to the Task Order that includes an equitable adjustment in the price, schedule, or both.

5.8 Customer Termination for Convenience. Customer may terminate any Task Order at any time upon 30 days' written notice to Esri and upon payment to Esri of all amounts due to date pursuant to this Agreement, including reasonable expenses incurred as a direct result of the termination and the pro rata contract price for the Task Orders affected.

5.9 Payment; Invoices.

a. **For Firm Fixed Price Task Orders.** Unless otherwise specified in a Task Order, Esri will prepare and submit monthly invoices based on the percentage of completion for each Deliverable as of the end of the preceding month. Upon acceptance of all Deliverables under a Task Order, the unpaid balance of the total Task Order value is due.
b. **For Professional Service Packages.** Esri will submit an invoice for Professional Service Packages on receipt of an agreed-upon Task Order. Esri may, at its sole discretion, stop work to avoid exceeding the total labor hours or number of days allotted in the applicable Professional Service Package description set forth in the applicable scope of work. Professional Service Packages expire if not used within 12 months of the Esri invoice date.
c. **For Time and Materials Task Orders.**

1. Esri will submit to Customer written monthly invoices to the Customer address provided in the Task Order. The invoices will include the payment due for work performed, including travel time, and any other direct costs (ODCs) incurred as authorized under a Task Order. The amount invoiced for labor will be equal to the number of hours expended during the previous month, multiplied by the applicable labor rates. Esri will invoice meals on a per diem basis in accordance with the full daily limits specified on the

government Defense Travel website at https://www.defensetravel.dod.mil/site/perdiemCalc.cfm. Esri may escalate hourly labor rates for Services; any increase in the first 5 years will not exceed 5 percent per year. Esri will invoice ODCs, including travel-related expenses incurred, plus a 15 percent burden.

2. Esri may reallocate the budget between activities, labor categories, and ODCs as necessary to facilitate the work effort, provided the overall price is not exceeded. If Esri reaches the funded not-to-exceed Task Order value and the activities are not completed, Customer may increase the order funding to allow additional work to be performed, or Esri may stop work without further obligation or liability.

5.10 System and Data Access. Each Task Order will specify any requirement for Customer to give Esri personnel access to Customer's systems or data.

6.0 ESRI MANAGED CLOUD SERVICES

6.1 Definitions. The following definitions supplement the definitions provided in Attachment A:

a. **"Esri Managed Cloud Services Environment"** means the hardware, Software, Data, and network platform that Esri or its third-party supplier provides as part of Esri Managed Cloud Services.
b. **"Hosting"** means the business of housing and making accessible Customer Content via the Internet.

6.2 Provision of Esri Managed Cloud Services.

a. **General Terms.** Use of Esri Managed Cloud Services is subject to the Cloud Services terms found in Attachment B of this Agreement.
b. **Requirements Planning.** It is Customer's responsibility to plan for and address with Esri changes to Customer's requirements, such as the need for additional capacity, the update of an application or dataset, or increased level of system availability.
c. **Compensation and Expenses.** Esri will invoice Customer for the one-time setup fee upon Task Order execution. Thereafter, Esri will invoice Customer monthly for the Esri Managed Cloud Services to be provided the following month. Customer will pay invoices within 30 days of receipt. Customer is responsible for any shipping or temporary storage costs incurred during the delivery of Customer Content to Esri or removal of Customer Content from the Esri Managed Cloud Services Environment. This paragraph does not apply to Esri Managed Cloud Services provided under the Advantage Program (see the section entitled "Advantage Program" in this Agreement).
d. **Risk of Loss.** Risk of loss for all Customer Content shall at all times remain with Customer, and it is Customer's sole responsibility to maintain regular backups of Customer Content. Risk of loss for the Esri Managed Cloud Services Environment shall at all times remain with Esri.
e. **Personally Identifiable Information.** Prior to providing any Customer Content under this Agreement, Customer shall notify Esri if Customer Content includes personally identifiable information.
f. **Public Software.** Customer may not use, and may not authorize its end users or contractors to combine or use any Esri Offerings with any software (including any underlying dependencies), documentation, or other material distributed under an open source or other similar licensing or distribution model that requires as a condition of such model that any component of the Esri Offering to be (1) disclosed or distributed in source code form, (2) made available free of charge to third parties, or (3) modifiable without restriction by third parties.
g. **Monitoring.** Customer will provide information and other materials related to its Customer Content as reasonably requested by Esri or its Hosting partner to verify Esri's or Customer's compliance with this Agreement. Esri or its Hosting partner, as applicable, may browse, index, or otherwise monitor the external interfaces of any Customer Content solely for the purpose of verifying compliance with this Agreement.

7.0 TRAINING

7.1 Definitions. The following definitions supplement the definitions provided in Attachment A:

a. **"Customer-Supplied Training Data"** means any digital dataset(s) including, but not limited to, geographic vector data, coordinates, raster data reports, or associated tabular attributes supplied by Customer for use in training.

b. **“Esri Academy LMS Integration Subscription”** means an optional term-limited subscription to Esri Academy enabling a specific number of unique Customer student(s) access to Self-Paced E-Learning through the customer’s Learning Management System.
c. **“Esri E-Learning Content (SCORM Format) License”** means an optional term-limited license that provides Esri customers with Esri’s e-learning content in SCORM (Shareable Content Object Reference Model) format to import into their Learning Management System.
d. **“Esri Mobile Lab”** means a service in which Esri will deliver and set up a training environment at the Customer’s site for use in conjunction with scheduled Esri Training Events only. The Esri Mobile Lab will include certain hardware, software, power cords, and network switches necessary for the instructor to set up the environment.
e. **“Esri Training Event(s)”** means an Esri site class, Esri instructor-led online class, a Customer site/private class, workshop, or coaching services.
f. **“Esri Training Representative”** means Customer’s primary Esri liaison in organizing private Esri Training Events.
g. **“Student(s)”** means a Customer employee or agent who is a registered participant in a specific Esri Training Event or Training-related services. If Customer is an individual, then Student means Customer.
h. **“Training Pass”** means a nonrefundable, nontransferable block of prepaid training days with a fixed price per day throughout the Term of the Training Pass.
i. **“Esri Mobile Router”** means a service in which Esri will deliver and setup a mobile router at the Customer’s site for use in conjunction with a scheduled Esri Training Event only. The mobile router provides high-speed wireless internet access needed to run the Esri Training Event.
j. **“Learning Management System”** or **“LMS”** shall mean third-party software acquired separately by Customer that allows Customer to consume E-Learning Content (SCORM Format) for the purpose of re-serving it to the Customer’s internal employees.

7.2 Permitted and Prohibited Uses.

a. Esri provides Training Materials for Training purposes only and for the exclusive use of the Student who attends the Training course for which the Training Materials are provided.
b. Customer may reproduce copies of Training Materials for registered Students.
c. Customer may not and may not permit any Student to (i) separate the component parts of Training Materials for any use or (ii) use audio or video recording equipment during an Esri Training Event.
d. Esri may issue temporary Product authorizations if Customer has an insufficient number of Products available for Training. Customer may use such Products as Training Materials under the terms of this Agreement. Customer will uninstall all deployed Products and return any media provided by Esri upon conclusion of the Esri Training Event.
e. Customer will retain ownership of any Customer-Supplied Training Data.

7.3 Esri’s Responsibilities.

Esri will

a. Provide an instructor qualified to conduct Training;
b. Provide all necessary Training Materials for Student; and
c. Confirm Esri Training Events approximately 10 business days prior to the scheduled start date. Esri will only confirm Student registrations that include a payment method. Registrations without a confirmed payment method are placed on the reservation waiting list. All reservations on the waiting list are subject to availability. Customer site/Private class and coaching services confirmation is also dependent on receipt of the completed Customer site training request form.

7.4 Customer's Responsibilities.

Customer will

a. Ensure that all Students have received confirmation from Esri to participate in an Esri Training Event. Esri reserves the right to disconnect any Student who permits unregistered student access to an online classroom Esri Training Event. In such case, the full Esri Training Event fee will be invoiced and payable;
b. Ensure that all Students meet the minimum prerequisites for the applicable Esri Training Event as listed on Esri's training website;
c. Submit Student registrations with payment method information at least 15 business days before the scheduled start date;
d. Provide the Esri Training Representative with a list of names and email addresses of any Students who are to attend an Esri Training Event at least 3 business days before the scheduled start date, for compliance with the US embargoed country lists and the various US Government Lists of Parties of Concern or Specially Designated Nationals lists;
e. For classes held at the Customer-designated facility, complete a client-site training request form; consult with Esri personnel to determine classroom, computer, and network requirements; and provide all such required classrooms, computers, and network access;
f. Ensure that Student use of Training Materials provided by Esri complies with the terms of this Agreement; and
g. Assume full liability and responsibility for Student attending Training course(s) under this Agreement.
h. If the Esri Mobile Lab or Mobile Router is used, Customer will

    1. Take delivery of the Esri Mobile Lab or Mobile Router from the shipping agent, and keep it in a secure, locked area at all times;
    2. Immediately report any previously damaged Esri Mobile Lab or Mobile Router equipment to the Esri Training Representative upon receipt of the shipment; and
    3. Be financially responsible for loss of, damage to, or theft of Esri Mobile Lab or Mobile Router equipment while in Customer's possession.

7.5 Student Registration and Training Event Change Policy.

a. Customer will provide advance written notice to Esri Customer Service at service@esri.com to reschedule or cancel any Esri Training Event or to substitute a student in a scheduled Esri Training Event.
b. A replacement Student must be from the same Customer organization as the Student being replaced.
c. If Customer reschedules an Esri Training Event three or fewer days before the scheduled start date, Esri will charge Customer 50 percent of the fee plus the cost of the rescheduled Esri Training Event.
d. If Customer (i) cancels an Esri Training Event 3 or fewer days before the scheduled start date without concurrently rescheduling or (ii) is absent without notice from the Esri Training Event, Customer will be liable for the full Esri Training Event fee.
e. If cancellation of an Esri Training Event is necessary due to causes beyond the party's reasonable control, the affected party may reschedule or cancel the Esri Training Event without incurring any liability.
f. *Termination of Agreement.* Students who are currently registered for an Esri Training Event as of the date of termination of this Agreement may attend the scheduled Esri Training Event, subject to the terms and conditions of this Agreement.

7.6 Invoicing; Prepaid Fees.

a. Esri will invoice Customer upon completion of the Esri Training Event or on purchase of a Training Pass. On Customer request, Esri will invoice in advance for an Esri Training Event.
b. If Customer is invoiced and pays that invoice prior to the scheduled Esri Training Event, then Customer has 1 year from the date of the invoice to consume training days. For a multiyear order, training days must be consumed by the end date specified on the Esri quotation. Thereafter, all prepaid fees are forfeited.
c. Training Pass policies and redemption rates are described at https://www.esri.com/training/training-for-organizations/.

This section 7.6 does not apply to Training provided under the Advantage Program.

7.7 Availability and General Provision of Wireless Service.

a. Esri will not be liable for any failure of or delay in the performance of this Agreement for the period that such failure or delay is due to wireless service interruptions or unavailability.

7.8 Esri E-Learning in the Customer's Learning Management System.

a. Esri E-Learning Content (SCORM format) License, specific terms of use incorporated by reference are found at https://www.esri.com/content/dam/esrisites/en-us/media/legal/scorm-lms/scorm-terms-and-conditions.pdf
b. Esri Academy LMS Integration Subscription, specific terms of use incorporated by reference are found at https://www.esri.com/content/dam/esrisites/en-us/media/legal/scorm-lms/lms-terms-and-conditions.pdf

8.0 ADVANTAGE PROGRAM

8.1 Definitions. The following definitions supplement the definitions provided in Attachment A:

a. **"Activity Description"** means a mutually agreed upon written statement that confirms the number of Learning and Services Credits that Esri estimates is required to perform an activity and authorizes Esri to begin work based on such estimate. The Activity Description serves as the Task Order for Services provided under the Advantage Program.
b. **"Advantage Program"** means either Advantage Program, as described at www.esri.com/services/eeap/components, or the Advantage Program for Partners, as described at www.esri.com/partners/bpap/components.
c. **"Authorized Contact"** means Customer's point of contact for the Advantage Program identified below.
d. **"Learning and Services Credits"** means a contracted unit of exchange that Customer may use to acquire Professional Services, Training, PSS, Esri Managed Cloud Services, or related travel expenses as described below.
e. **"Premium Support Services"** or **"PSS"** means a prioritized incident management and technical support program further described at https://support.esri.com/en/support/premium.
f. **"Advisor"** means an Esri consultant assigned to work with Customer to provide Professional Services such as advising Customer on GIS strategies, facilitating annual planning, and developing and coordinating a collaborative work plan under the Advantage Program.

8.2 Advantage Program Description. The Advantage Program is provided on an order-by-order, annual subscription basis and provides strategy and planning support in addition to a menu of items including Professional Services, Training, PSS, and Esri Managed Cloud Services that Customer can select to best meet its needs with guidance from Advisor. The Advantage Program may change from time to time. The Advantage Program includes the following:

a. **Advisor.** Customer will receive up to the number of Advisor hours ordered. Customer may elect to retain additional Advisor hours for a supplemental price.
b. **Annual Planning Meeting.** A 1-day annual planning meeting is included.
c. **Work Plan.** A collaboratively developed document is designed to drive the program's implementation through definition of Customer's GIS vision, goals, and objectives.
d. **Learning and Services Credits.** Customer will receive the number of Learning and Services Credits ordered. Customer may use the credits toward any combination of Professional Services, Training, PSS, Esri Managed Cloud Services, or related travel expenses. Customer may order, for an additional price, additional Learning and Services Credits. Learning and Services Credits may be exchanged as described at the applicable Advantage Program website. Esri will provide a monthly report outlining usage of Learning and Services Credits to date to the Authorized Contact.
e. **Technology Webcasts.** Esri will provide an email invitation to the Authorized Contact for webcasts presenting business and technical information related to enterprise GIS.
f. **No Project Services.** The Advantage Program is not designed for Esri to provide project-specific Professional Services such as custom application or database development for solutions or applications. Esri will not provide these types of Professional Services under the Advantage Program and does not warrant that Deliverables provided under an Advantage Program will comply with Specifications.

8.3 Authorized Contact Information. Customer identifies the following person as its initial Authorized Contact.

(to be completed by Customer):

Contact Name: _____
Address: _____
City, State, ZIP: _____
_____
Email: _____
Telephone: _____
Fax: _____

8.4 Current on Maintenance. Customer must remain current on standard Software Maintenance during the Advantage Program term.

8.5 Authorization of Learning and Services Credits Use. Customer will contact its account manager or Advisor to consume Learning and Services Credits for a particular request. Esri will submit an Activity Description by email to Customer for confirmation and authorization to use Learning and Services Credits. Customer may authorize the consumption of Learning and Services Credits by submitting an email. Esri will begin work and deduct the estimated credit amount stated in the Activity Description from the unused Learning and Services Credits available.

8.6 Activity Descriptions for Esri Managed Cloud Services. The Activity Description for Esri Managed Cloud Services orders must include the following:

a. **The Esri Managed Cloud Services Term.** The time period in which Esri provides the Esri Managed Cloud Services to Customer. The Esri Managed Cloud Services term does not begin until setup and deployment of the data and application are complete.
b. **Targeted System Availability.** The minimum percentage of time that Customer has external access to the application and associated Customer Content through the Internet. Examples of supported levels of system availability are 95 percent, 99 percent, and 99.9 percent. Not all Esri Managed Cloud Services offerings include a Targeted System Availability.
c. **Number of Anticipated Requests.** A The number of requests made by an end user through a client (e.g., desktop computer, web application, mobile device) and sent to a server(s) that is set up in the Esri Managed Cloud Services Environment by Esri and performs computational tasks on behalf of the end user. An example of a common request used in a GIS is a map request. A map request is made every time a user pans, zooms, or queries a map service.
d. **Amount of Data Storage.** The storage capacity required to retain digital data, which is to be used and consumed in Customer GIS applications or Cloud Services.
e. **Learning and Services Credits Consumption.** The price for the Esri Managed Cloud Services in Learning and Services Credits.

The Data storage location may be defined in the Activity Description.

8.7 Travel and Per Diem Expenses. Any Esri travel and per diem expenses will be quoted separately. Travel expenses will include a 15 percent burden, and meal per diem will be determined in accordance with the full daily limits specified on the government Defense Travel website at https://www.defensetravel.dod.mil/site/perdiemCalc.cfm. Customer will use Learning and Services Credits for travel and per diem expenses.

8.8 Notification of Consumed Credits. Esri will notify Customer if the authorized Learning and Services Credits are consumed prior to completion of the requested work. Customer may elect to direct the use of additional Learning and Services Credits, if available; procure additional Learning and Services Credits; or notify Esri to stop work on such requested work. Esri reserves the right to stop work if Customer has consumed all its Learning and Services Credits.

8.9 Review of Proposed Activities. Any activities proposed to be completed under the Advantage Program will be subject to Esri's review and approval to ensure alignment with the intent of the program.

8.10 Invoicing.

a. Esri shall invoice Customer as quoted for the Advantage Program subscription, additional Learning and Services Credits, or Advisor services upon receipt of Customer's order. Subsequently, Esri will invoice annually at least 30 days in advance of the Advantage Program subscription expiration date. Esri will extend the Advantage Program subscription for a subsequent annual term upon receipt of Customer's payment of the renewal invoice. Esri will invoice fees for additional Learning and Services Credits or Advisor services upon receipt of Customer's order.
b. Pricing for program renewals and new or additional Services will be in accordance with Esri's standard pricing at the time of purchase or renewal.

8.11 Termination and Expiration. Upon termination or expiration of an Advantage Program subscription:

a. Services will end as of the expiration or termination date stated; and
b. Unless either party terminates the Advantage Program subscription for cause, Customer may apply any unused Learning and Services Credits toward any Professional Services, Training, PSS, or related travel expenses that are scheduled as of the termination or expiration date, provided that the Learning and Services Credits are used within 3 months after the termination or expiration date. Any other unused Learning and Services Credits will expire 30 days after the expiration or termination date; if Customer renews the Advantage Program subscription within this time period, any unused Learning and Services Credits will remain valid for up to 2 years from the purchase date or termination of this Agreement, whichever comes first.

ATTACHMENT A
GLOSSARY OF TERMS

The following glossary of terms applies to all Esri Offerings and Services that Esri may provide to its customers. Certain Esri Offerings or Services may not be within the scope of this Agreement. Please disregard any terms that are not applicable to Esri Offerings or Services offered under this Agreement.

"Affiliate" means any entity that directly or indirectly (i) Controls; (ii) is Controlled by; or (iii) is under common Control with a party, where "Control" means having more than 50 percent of the voting stock or other voting interest in the Controlled entity.

"API" means application programming interface.

"ArcGIS Website" means www.arcgis.com and any related or successor websites.

"Authorization Code(s)" means any key, authorization number, enablement code, login credential, activation code, token, user name and password, or other mechanism required for use of Esri Offerings.

"Beta" means any alpha, beta, or other prerelease version of a Product.

"Cloud Services" means Online Services and Esri Managed Cloud Services.

"Content" means data, images, photographs, animations, video, audio, text, maps, databases, data models, spreadsheets, user interfaces, graphics components, icons, software, and other resources used in connection with Esri Offerings and Services.

"Control" means having more than 50 percent of the voting stock or other voting interest in the Controlled entity.

"Customer Content" means any Content that Customer provides, uses, or develops in connection with Customer's use of Esri Offerings or Services, including Value-Added Applications. Customer Content excludes any feedback, suggestions, or requests for improvements that Customer provides to Esri.

"Data" means any commercially available digital dataset(s) including, but not limited to, geographic vector data, raster data reports, or associated tabular attributes that Esri bundles with other Esri Offerings or delivers independently.

"Deliverables" means anything that Esri delivers to Customer as a result of performance of Professional Services.

"Documentation" means all user reference documentation that Esri provides with a Deliverable or an Esri Offering.

"Esri Managed Cloud Services" means a Customer-specific cloud infrastructure, Software, Data, and network platform that Esri hosts, manages, and makes available to Customer or Customer's end users via the Internet.

"Esri Offering(s)" means any Product or Documentation. If Esri provides Training or Professional Services directly to Customer, then Esri Offerings also include Deliverables and Training Materials. Esri Offerings exclude Services and Third-Party Content.

"GIS" means geographic information system.

"Maintenance" means a subscription program that Esri provides and that entitles Customer to Product updates and other benefits such as access to technical support and self-paced, web-based learning resources.

“Malicious Code” means software viruses; worms; time bombs; Trojan horses; or any other computer code, files, denial of service, or programs designed to interrupt, destroy, or limit the functionality of any computer software, hardware, or telecommunications equipment.

“Online Services” means any commercially available, Internet-based geospatial system that Esri provides, including applications and associated APIs for storing, managing, publishing, and using maps, data, and other information. Online Services exclude Data and Content.

“Ordering Document(s)” means a sales quotation, Maintenance renewal quote, purchase order, proposal, Task Order, or other document identifying Esri Offerings, updates, or Services that Customer orders.

“Perpetual License” means a license to use a version of the Esri Offering for which applicable license fees have been paid, indefinitely, unless terminated by Esri or Customer as authorized under this Agreement.

“Product(s)” means Software, Data, and Online Services.

“Professional Services” means any development or consulting services that Esri provides to Customer.

“Sample(s)” means sample code, sample applications, add-ons, or sample extensions of Products.

“Service(s)” means Maintenance. If Esri provides Esri Managed Cloud Services, Training, or Professional Services directly to Customer, then Services also include Esri Managed Cloud Services, Training, and Professional Services.

“Software” means any proprietary commercial off-the-shelf software, excluding Data, accessed or downloaded from an Esri-authorized website or that Esri delivers on any media in any format including backups, updates, service packs, patches, hot fixes, or permitted merged copies.

“Specification(s)” means (i) the Documentation for Software and Online Services, (ii) the scope of work set forth in any Task Order, or (iii) Esri’s published course descriptions for Training.

“Subscription” means a license for use of an Esri Offering for a limited time period or a right to receive Services for a limited time period.

“Task Order(s)” means an Ordering Document for Services.

“Term License” means a license for use of an Esri Offering for a limited time period (“**Term**”).

“Third-Party Content” means any Content that Customer may obtain from a third-party website or that persons other than Esri employees, suppliers, or contractors may directly contribute to Esri’s website.

“Training” means (i) Product training or (ii) related training that Esri provides under this Agreement.

“Training Materials” means digital or printed Content required to complete Training, which may include, but is not limited to, workbooks, data, concepts, exercises, assessments, and exams.

“Value-Added Application(s)” means an application developed by Customer for use in conjunction with the authorized use of any Software, Data, or Online Services.

ATTACHMENT B
GENERAL TERMS AND CONDITIONS

The following general terms and conditions apply to all Esri Offerings and Services that Esri may offer to its customers. Certain Esri Offerings or Services may not be available under this Agreement. Please disregard any terms that are not applicable to Esri Offerings or Services offered under this Agreement.

ARTICLE B.1—GENERAL USE RESTRICTIONS

Except as expressly permitted in this Agreement, Customer will not

a. Sell, rent, lease, sublicense, distribute, lend, time-share, or assign Services or Esri Offerings;
b. Distribute or provide direct access to Services or Esri Offerings to third parties, in whole or in part, including, but not limited to, extensions, components, or Dynamic Link Libraries;
c. Distribute Authorization Codes to third parties;
d. Reverse engineer, decompile, or disassemble any Product or Deliverable delivered in compiled form;
e. Make any attempt to circumvent the technological measure(s) that controls access to or use of Esri Offerings;
f. Store, cache, use, upload, distribute, or sublicense Content or otherwise use Esri Offerings in violation of Esri's or a third-party's rights, including intellectual property rights, privacy rights, nondiscrimination laws, export laws, or any other applicable law or regulation;
g. Remove or obscure any Esri or its licensors' patent, copyright, trademark, proprietary rights notices, or legends contained in or affixed to any Esri Offerings, output, metadata file, or online or hard-copy attribution page of any Data or Documentation;
h. Unbundle or independently use individual or component parts of Esri Offerings;
i. Incorporate any portion of Esri Offerings into a product or service for third-party use that competes with the Esri Offerings;
j. Publish or in any other way communicate the results of benchmark tests run on Beta Products without the prior written permission of Esri and its licensors; or
k. Use, incorporate, modify, distribute, provide access to, or combine any Esri Offerings in a manner that would subject any Esri Offering to open-source or open-database license terms (e.g. GPL) that require any part of the Esri Offering to be subject to additional terms, for example

    1. Disclosed in source code form to third parties;
    2. Licensed to third parties for the purpose of making derivative works; or
    3. Redistributable to third parties at no charge; or

l. Generate revenue by providing access to Software or Online Services through a Value-Added Application.

These restrictions will not apply to the extent that they conflict with applicable law or regulation.

ARTICLE B.2—TERM AND TERMINATION

B.2.1 Customer may terminate this Agreement or any Esri Offerings license or subscription at any time upon written notice to Esri. Termination without cause does not entitle Customer to receive any refund of fees paid. Any right to terminate pending Services engagements for convenience is set forth in the applicable section in the body of this Agreement. Either party may terminate this Agreement or any license or subscription for a material breach that is not cured within 30 days of written notice to the breaching party. Upon any termination of this Agreement for breach, Esri will stop providing Services. Any licenses in Esri Offerings that survive termination of this Agreement continue under the terms of this Agreement.

B.2.2 If Esri terminates this Agreement following Customer's breach, then Esri may also, at its election, terminate Customer's licenses or subscriptions to Esri Offerings. If Customer terminates this Agreement for cause or convenience, then Customer may, at its election, also terminate Customer's licenses or subscriptions to Esri Offerings.

B.2.3 Upon any termination or expiration of a license or subscription, Customer will

a. Stop accessing and using the terminated or expired Esri Offerings;
b. Clear any client-side data cache derived from the terminated or expired Cloud Services; and
c. Stop using and uninstall, remove, and destroy all copies of the terminated or expired Esri Offerings in Customer's possession or control, including any modified or merged portions thereof, in any form, and execute and deliver evidence of such actions to Esri or its authorized distributor.

Esri may stop performing Services immediately upon written notice to Customer if a bankruptcy or insolvency proceeding is commenced by or against Customer until the trustee cures any existing defaults and provides adequate assurance of future performance under this Agreement. This Agreement terminates upon the insolvency, liquidation, or dissolution of either party.

ARTICLE B.3—LIMITED WARRANTIES AND DISCLAIMERS

B.3.1 Limited Warranties. Except as disclaimed below, Esri warrants to Customer that (i) Products and Training will substantially comply with the applicable Specifications and (ii) Services will substantially conform to the professional and technical standards of the industry. The warranty period for Esri Offerings offered under a Perpetual License and for Services runs for 90 days from the date of delivery or from the date of acceptance if this Agreement provides an acceptance period. The warranty period for Esri Offerings offered under a subscription or Term License basis runs for the lesser of (i) the duration of the subscription or term or (ii) 90 days from delivery or acceptance if this Agreement provides an acceptance period.

B.3.2 Special Disclaimer. Third-Party Content; Data; Samples; hot fixes; patches; updates; Online Services provided at no charge; and trial, evaluation, and Beta Products are delivered "as is" and without warranty of any kind.

B.3.3 General Disclaimer. Except for the express limited warranties set forth in this Agreement, Esri disclaims all other warranties or conditions of any kind, whether express or implied, including, but not limited to, warranties or conditions of merchantability, fitness for a particular purpose, and noninfringement of intellectual property rights. Esri is not responsible for any nonconformities with Specifications or loss, deletion, modification, or disclosure of Customer Content caused by Customer's modification of any Esri Offering other than as specified in the Documentation. Esri does not warrant that Esri Offerings, or Customer's operation of the same, will be uninterrupted, error free, fault tolerant, or fail-safe or that all nonconformities can or will be corrected, or will result in Customer's compliance with any applicable law. Esri Offerings are not designed, manufactured, or intended for use in environments or applications that may lead to death, personal injury, or physical property or environmental damage. Customer should not follow any navigational route suggestions that appear to be hazardous, unsafe, or illegal. Any such uses will be at Customer's own risk and cost. Customer must use its independent judgment to determine whether (i) Esri Offerings are suitable for its Value-Added Applications and (ii) Value Added Applications are safe for use by end users and other third parties.

B.3.4 Disclaimers.

a. Internet Disclaimer. Neither party will be liable for damages under any theory of law related to the performance or discontinuance of operation of the Internet or to regulation of the Internet that might restrict or prohibit the operation of Cloud Services.
b. Third-Party Websites; Third-Party Content. Esri is not responsible for any third-party website or Third-Party Content that appears in or is referenced by Esri Offerings or Esri websites, including www.esri.com, developers.arcgis.com, livingatlas.arcgis.com and www.arcgis.com. Providing links to third-party websites and resources does not imply an endorsement, affiliation, or sponsorship of any kind.
c. Artificial Intelligence (AI)/Machine Learning (ML) Disclaimer. As specified in the Documentation, certain Esri Offerings may integrate third-party AI/ML software libraries and third-party or Esri created pre-trained AI/ML models for various tasks including, but not limited to, object detection, image obfuscation, image classification, or text or speech recognition. Customer may use these capabilities

at its option and such AI/ML capabilities are delivered "as is" and without warranty of any kind. In certain cases, the Esri Offering may provide Customers the ability to configure their own custom AI/ML models to meet Customer's unique requirements, which except for the express warranties contained in this Agreement, shall be at Customer's own risk.

B.3.5 Exclusive Remedy. Customer's exclusive remedy and Esri's entire liability for breach of the limited warranties in this section will be to replace any defective media and to (i) repair, correct, or provide a workaround for the applicable Esri Offering or Services or (ii) at Esri's election, terminate Customer's right to use and refund the fees paid for Esri Offerings or Services that do not meet Esri's limited warranties.

ARTICLE B.4—LIMITATION OF LIABILITY

B.4.1 Disclaimer of Liability.

(a) Neither Customer, Esri, nor any Esri authorized distributor or third-party licensor will be liable for any indirect, special, incidental, or consequential damages; lost profits; lost sales; loss of goodwill; or costs of procurement of substitute goods or services.
(b) Neither Customer, Esri nor any Esri authorized distributor or third-party licensor will be liable for any direct damages exceeding the applicable license fees, or current subscription fees, or Services fees paid or owed to Esri during the twelve (12) month period prior to the date upon which the related claim arose.

B.4.2 The limitations and exclusions of liability in the preceding paragraph do not apply to Customer's infringement, misuse, or misappropriation of Esri's or Esri's licensors' intellectual property rights, either party's indemnification obligations, gross negligence, willful misconduct, or violations of the Export Compliance clause of this Agreement.

B.4.3 Applicability of Disclaimers and Limitations. Esri or its authorized distributor has set its fees and entered into this Agreement in reliance on the disclaimers and limitations in this Agreement; the fees reflect an allocation of risk that is an essential basis of the bargain between the parties. **These limitations will apply whether or not a party is aware of the possibility of any damage and notwithstanding any failure of essential purpose of any exclusive, limited remedy.**

B.4.4 The foregoing disclaimers, limitations, and exclusions may be invalid in some jurisdictions and apply only to the extent permitted by applicable law or regulation in Customer's jurisdiction. Customer may have additional rights that may not be waived or disclaimed. Esri does not seek to limit Customer's warranty or remedies to any extent not permitted by law.

ARTICLE B.5—INDEMNIFICATIONS

B.5.1 Definitions. The following definitions supplement the definitions provided in Attachment A:

a. **"Claim"** means any claim, action, or demand by a third party.
b. **"Indemnitees"** means Customer and its directors, officers, and employees.
c. **"Infringement Claim(s)"** means any Claim alleging that Customer's use of or access to any Esri Offering or Service infringes a patent, copyright, trademark, or trade secret.
d. **"Loss(es)"** means expenditure, damage award, settlement amount, cost, or expense, including awarded attorneys' fees.

B.5.2 Infringement Indemnity.

a. Esri will defend, hold all Indemnitees harmless from, and indemnify any Loss arising out of an Infringement Claim.
b. If Esri determines that an Infringement Claim is valid, Esri may, at its expense, either (i) obtain rights for Customer to continue using the Esri Offerings or Services or (ii) modify the Esri Offerings or Services while maintaining substantially similar functionality. If neither alternative is commercially reasonable, Esri may terminate Customer's right to use the Esri Offerings or Services and will refund any (a) license fees that Customer paid for the infringing Esri Offerings or Services acquired under a Perpetual License, prorated on a

5-year, straight-line depreciation basis beginning from the initial date of delivery or (b) unused portion of fees paid for Term Licenses, subscriptions, and Maintenance.

c. Esri has no obligation to defend an Infringement Claim or to indemnify Customer to the extent the Infringement Claim arises out of (i) the combination or integration of Esri Offerings or Services with a product, process, system, or element that Esri has not supplied or specified in the Specification; (ii) alteration of Esri Offerings or Services by anyone other than Esri or its subcontractors; (iii) compliance with Customer's specifications; or (iv) use of Esri Offerings or Services after Esri either provides a modified version to avoid infringement or terminates Customer's right to use the Esri Offerings or Services.

B.5.3 General Indemnity. Esri will defend and hold all Indemnitees harmless from, and indemnify any Loss arising out of, any Claim for bodily injury, death, or tangible or real property damage brought against any of the Indemnitees to the extent arising from any negligent act or omission or willful misconduct by Esri or its directors, officers, employees, or agents performing Services while on Customer's site.

B.5.4 Conditions for Indemnification. As conditions for indemnification, Indemnitee will (i) promptly notify Esri in writing of the Claim, (ii) provide all available documents describing the Claim, (iii) give Esri sole control of the defense of any action and negotiation related to the defense or settlement of any Claim, and (iv) reasonably cooperate in the defense of the Claim at Esri's request and expense.

B.5.5 This section sets forth the entire obligation of Esri, its authorized distributor, and its third party licensors regarding any Claim for which Esri must indemnify Customer.

ARTICLE B.6—INSURANCE

If Esri is providing Services, Esri will carry, at a minimum, the following coverage:

a. Comprehensive general liability or commercial general liability with a minimum coverage of $1,000,000.00 (US dollars) combined single limit per occurrence for bodily injury, including death, and property damage liability to include the following:

    1. Premises and operations;
    2. Blanket contractual liability;
    3. Broad form property damage;
    4. Independent contractors;
    5. Personal injury, with employee exclusion deleted; and
    6. Completed operations.

b. Workers' compensation insurance, with waiver of subrogation, in an amount that complies with statutory limits.

ARTICLE B.7—SECURITY AND COMPLIANCE

B.7.1 Security. Esri publishes its security capabilities at https://trust.arcgis.com. Customer may give Esri personnel access to Customer systems or to Customer or third-party personal information, controlled information, or sensitive data if access is essential for Esri's performance of Services and if Esri expressly agrees to such access. Esri will use reasonable administrative, technical, and physical safeguards to protect such data and guard against unauthorized access. Customer bears responsibility to (i) confirm that Esri's published security and privacy controls meet all applicable legal requirements for protection of Customer Content and (ii) upload or share Customer Content through Cloud Services only when it is legal to do so. Esri is not responsible to review Customer Content to ensure compliance with applicable laws and regulations. Customer must contact Esri at securesupport@esri.com for further instruction before providing any Customer Content that requires security measures other than Esri's published security capabilities.

B.7.2 Malicious Code. Esri will use commercially reasonable efforts to ensure that Esri Offerings will not transmit any Malicious Code to Customer. Esri is not responsible for Malicious Code that Customer introduces to Esri Offerings or that is introduced through Third-Party Content.

B.7.3 Export Compliance. Each party will comply with all applicable export and trade sanctions laws and regulations, including the US Department of Commerce's Export Administration Regulations (EAR), the US

Department of State's International Traffic in Arms Regulations (ITAR), the US Department of Treasury, Office of Foreign Assets Control (OFAC) Regulations, and other applicable export laws. Customer will not export, reexport, transfer, release, or otherwise dispose of, in whole or in part, or permit access to or transfer or use of Services or Esri Offerings to any United States embargoed countries currently including Iran, North Korea, Cuba, Russia, Belarus, Crimea region of Ukraine, the Donetsk People's Republic (DNR) and Luhansk People's Republic (LNR), or denied entities or persons except in accordance with all then-current applicable US government export laws and regulations. Customer will not export, reexport, transfer, or use Services or Esri Offerings for certain missile, nuclear, chemical, or biological activities or end uses without proper authorization from the US government. Customer shall immediately notify Esri in writing if any US government entity or agency denies, suspends, or revokes Customer's export privileges. Customer will not upload, store, or process in Cloud Services any Customer Content that (i) has an Export Control Classification Number (ECCN) other than EAR99 or (ii) is controlled for export from the United States under ITAR or (iii) is subject to the EAR where the cloud host is on the US government's Specially Designated Nationals List, Denied Entity List, Unverified List or Denied Parties List or any other US government restricted list. Customer will notify Esri in advance if Esri's performance of any Services or provision of any Esri Offerings is related to any defense article, defense service, or technical data, as defined under the ITAR Sections 120.31, 120.32, and 120.33, respectively; Esri will not perform any such Services or provide any such Esri Offerings until Esri obtains any necessary export license from the US government. Customer will reasonably assist Esri in applying for and obtaining an export license if needed.

B.7.4 Privacy. Esri publishes its privacy notices at Esri's Privacy Statement and Products and Services Privacy Supplement and will process personal data according to the terms of the Data Processing Addendum available at https://www.esri.com/en-us/privacy/privacy-gdpr.

ARTICLE B.8—CLOUD SERVICES

B.8.1 Prohibited Uses. Customer shall not provide Customer Content or otherwise access or use Cloud Services in a manner that

a. Creates or transmits spam, spoofings, or phishing email or offensive, hate-related or defamatory material; or stalks or makes threats of physical harm;
b. Stores or transmits any Malicious Code;
c. Violates any law or regulation;
d. Infringes or misappropriates the rights of any third party;
e. Probes, scans, or tests the vulnerability of Cloud Services or breach any security or authentication measures used by Cloud Services without written approval from Esri's Product Security Officer; or
f. Benchmarks the availability, performance, or functionality of Cloud Services.

B.8.2 Service Interruption. System failures or other events beyond Esri's reasonable control may interrupt Customer's access to Cloud Services. Esri may not be able to provide advance notice of such interruptions.

B.8.3 Customer Content.

a. Customer grants Esri and its subcontractors a nonexclusive, nontransferable, worldwide right to host, run, modify, and reproduce Customer Content as needed to provide Cloud Services to Customer. Esri will not access, use, or disclose Customer Content without Customer's written permission except as reasonably necessary to support Customer's use of Cloud Services. Except for the limited rights granted to Esri under this Agreement, Customer retains all its rights, title, and interest in the Customer Content.
b. If Customer accesses Cloud Services with an application provided by a third party, Esri may disclose Customer Content to such third party as necessary to enable interoperation between the application, Cloud Services, and Customer Content.
c. Esri may disclose Customer Content if required to do so by law or regulation or by order of a court or other government body, in which case Esri will reasonably attempt to limit the scope of disclosure.
d. When Customer's use of Cloud Services ends, Esri will either

    1. Make Customer Content available to Customer for download for a period of 30 days unless Customer requests a shorter window of availability or Esri is legally prohibited from doing so; or

2. Download all Customer Content in Esri's possession to a medium of Customer's choosing and deliver such Customer Content to Customer.

Esri will have no further obligations to store or return Customer Content at the conclusion of the Cloud Services.

B.8.4 Removal of Customer Content. Esri may remove or delete Customer Content if there is reason to believe that uploading Customer Content to or using it with Cloud Services materially violates this Agreement. If reasonable under these circumstances, Esri will notify Customer before removing Customer Content. Esri will respond to any Digital Millennium Copyright Act takedown notices in accordance with Esri's copyright policy, available at www.esri.com/legal/dmca_policy.

B.8.5 Service Suspension. Esri may suspend access to Cloud Services (i) if Customer materially breaches this Agreement and fails to timely cure the breach; (ii) if Esri reasonably believes that Customer's use of Cloud Services will subject Esri to immediate liability or adversely affect the integrity, functionality, or usability of the Cloud Services; (iii) for scheduled maintenance; (iv) to enjoin a threat or attack on Cloud Services; or (v) if Cloud Services become prohibited by law or regulated to a degree that continuing to provide them would impose a commercial hardship. When feasible, Esri will notify Customer of any Cloud Services suspension beforehand and give Customer reasonable opportunity to take remedial action.

Esri is not responsible for any damages, liabilities, or losses that may result from any interruption or suspension of Cloud Services or removal of Customer Content as described above.

B.8.6 Notice to Esri. Customer will promptly notify Esri if Customer becomes aware of any unauthorized use of Customer's subscription or any other breach of security regarding Cloud Services.

ARTICLE B.9—GENERAL PROVISIONS

B.9.1 Payment. Customer will pay each correct invoice no later than 30 days after receipt and will remit payment to the address stated on the invoice. Customers outside the United States will pay the authorized distributor's invoices in accordance with the authorized distributor's payment terms.

B.9.2 Feedback. Esri may freely use any feedback, suggestions, or requests for Product improvement that Customer provides to Esri.

B.9.3 Patents. Customer may not seek, and may not permit any other user to seek, a patent or similar right worldwide that is based on or incorporates any Products. This express prohibition on patenting will not apply to Customer's software and technology except to the extent that Products, or any portion thereof, are part of any claim or preferred embodiment in a patent application or a similar application.

B.9.4 Reserved.

B.9.5 Taxes and Fees; Shipping Charges. Pricing of Esri Offerings and Services that Esri quotes to Customer is exclusive of any and all applicable taxes or fees including, but not limited to, sales tax, use tax, or value-added tax (VAT); customs, duties, or tariffs; shipping and handling charges; and vendor enrollment fees. Esri will add any fees that it is required to pay to the total amount of its invoice to Customer. Esri may include estimated taxes and shipping and handling charges in its quotations but may adjust these fees on invoicing. For Customers outside the United States, the authorized distributor may quote taxes or fees in accordance with its own policies.

B.9.6 Compliance Review. Customer will keep accurate and complete records and accounts pertaining to its compliance with its obligations under this Agreement. Esri or its authorized distributor may conduct a compliance review of these records and accounts with no less than 14 business days' written notice or may appoint an independent third party to conduct such a compliance review on its behalf. Customer will promptly correct any noncompliance identified during the compliance review. Neither Esri nor Esri's authorized distributor may conduct a compliance review of Customer within 12 months after the conclusion of any prior compliance review that does not reveal any material Customer noncompliance.

B.9.7 No Implied Waivers. The failure of either party to enforce any provision of this Agreement is not a waiver of the provisions or of the right of such party thereafter to enforce that or any other provision.

B.9.8 Severability. If any provision of this Agreement is held to be unenforceable for any reason, (i) such provision will be reformed only to the extent necessary to make the intent of the language enforceable, and (ii) all other provisions of this Agreement will remain in effect.

B.9.9 Successor and Assigns. Customer will not assign, sublicense, or transfer Customer's rights or delegate Customer's obligations under this Agreement without Esri's and its authorized distributor's prior written consent, and any attempt to do so without consent will be void. This Agreement will be binding on the respective successors and assigns of the parties to this Agreement. Notwithstanding, a contractor under contract to the government to deliver Products may assign this Agreement and Products acquired for delivery to its government customer upon written notice to Esri, provided the government customer assents to the terms of this Agreement. Upon mutual agreement, Esri's Affiliates may provide Esri Offerings and Services under the terms of this Agreement; in such cases, the Ordering Documents will identify the Affiliate as the party that provides the Esri Offerings and Services. Esri's authorized distributors are not Affiliates of Esri.

B.9.10 Survival of Terms. The Glossary of Terms and provisions of the following Articles of these General Terms and Conditions will survive the expiration or termination of this Agreement: "Limited Warranties and Disclaimers," "Limitation of Liability," "Indemnifications," and "General Provisions."

B.9.11 US Government Customer. The Products are commercial items, developed at private expense, provided to Customer under this Agreement. If Customer is a US government entity or US government contractor, Esri licenses or provides subscriptions to Customer in accordance with this Agreement under FAR Subparts 12.211/12.212 or DFARS Subpart 227.7202. Esri Data and Online Services are licensed or subscribed under the same DFARS Subpart 227.7202 policy as commercial computer software for acquisitions made under DFARS. Products are subject to restrictions, and this Agreement strictly governs Customer's use, modification, performance, reproduction, release, display, or disclosure of Products. Agreement provisions that are inconsistent with federal law regulation will not apply. A US government Customer may transfer Software to any of its facilities to which it transfers the computer(s) on which it has installed such Software. If any court, arbitrator, or board holds that a US government Customer has greater rights to any portion of Products under applicable public procurement law, such rights will extend only to the portions affected.

B.9.12 Governing Law. This Agreement is not subject to the United Nations Convention on Contracts for the International Sale of Goods.

a. **Government Entities.** If Customer is a government entity, the applicable laws of Customer's jurisdiction govern this Agreement.
b. **Nongovernment Entities.** US federal law and the law of the State of California exclusively govern this Agreement, excluding their respective choice of law principles.

B.9.13 Dispute Resolution. The parties will use the following dispute resolution processes:

a. **Equitable Relief.** Either party will have the right to seek an injunction, specific performance, or other equitable relief in any court of competent jurisdiction without the requirement of posting a bond or proving injury as a condition for relief.
b. **US Government Agencies.** This Agreement is subject to the Contract Disputes Act of 1978, as amended (41 USC 601–613).
c. **Other Government Entities.** Esri will comply with mandatory dispute resolutions under applicable law.
d. **Arbitration.** Except as noted above, the parties will submit to binding arbitration to resolve any dispute arising out of or relating to this Agreement that cannot be settled through negotiation. If Customer is in the United States or one of its territories or outlying areas, the Commercial Arbitration Rules of the American Arbitration Association will govern the arbitration proceedings. If Customer is outside the United States, the Rules of Arbitration of the International Chamber of Commerce will govern the proceedings. The parties will select a single arbitrator in accordance with the applicable arbitration rules. The language of the arbitration will be

English. Arbitration will be at an agreed-upon location. Either party will, at the request of the other, make available documents or witnesses relevant to the major aspects of the dispute.

B.9.14 Force Majeure. A party will not be liable for any failure of or delay in the performance of this Agreement for the period that such failure or delay is due to causes beyond the party's reasonable control. Such causes may include, but are not limited to, acts of God, war, strikes, labor disputes, cyber attacks, laws, regulations, government orders, or any other force majeure event.

B.9.15 Independent Contractor. Esri is and at all times will be an independent contractor. Nothing in this Agreement creates an employer/employee, principal/agent, or joint venture relationship between Esri or its authorized distributor and Customer. No party has any authority to enter into contracts on behalf of another party or otherwise act on behalf of another party.

B.9.16 Notice. Customer may send notices required under this Agreement to Esri at the following address:

Environmental Systems Research Institute, Inc.

SAMPLE TASK ORDER
Esri Agreement No. _____
Task Order No. _____

In accordance with the terms and conditions of the above-referenced Agreement between Environmental Systems Research Institute, Inc. (**"Esri"**), and _____ (**"Customer"**), _____ ("Customer Address"), this Task Order authorizes preparation and provision of the Deliverables described and in accordance with the terms, schedule, and start/end date(s) specified below.

1. Scope of Work: [*As applicable, specifically identify and describe Deliverables including custom code, map data, technical data (including technical assistance), and the resources to be provided by Customer (including Customer-supplied personnel, software, hardware, and digital or hard-copy data) and place of delivery and location where technical assistance will be provided.]*

   In addition to the foregoing, Customer agrees that its employees, representatives, and subcontractors will cooperate and communicate with Esri during performance of this Task Order. Without cost to Esri, Customer shall provide, allow access to, or assist Esri in obtaining all data Esri requests for performance of this Task Order, including, but not limited to, (1) copies of previously prepared reports, maps, plans, surveys, records, and other documents in the control or possession of Customer and (2) copies of ordinances, codes, regulations, or other governmental documents.

2. Contract Type: *[Firm Fixed Price (FFP) or Time and Materials (T&M)]*:

3. Total Task Order Value (if FFP) or Not-to-Exceed Value (if T&M):

4. Customer Address for the Receipt of Esri Invoices:

5. Delivery Schedule or Start/End Date(s) for Each Deliverable:

6. Special Considerations:

7. Esri Project Manager: [*insert name, telephone, and email address*]
   Esri Contract Specialist: [*insert name, telephone, and email address*]
   Customer Project Manager: [*insert name, telephone, and email address*]
   Customer Contract Contact: [*insert name, telephone, and email address*]
   Customer Accounts Payable Contact: [*insert name, telephone, and email address*]

[1]The ArcGIS Workflow Manager extension for ArcGIS Pro requires the ArcGIS Workflow Manager organizational license for ArcGIS Online or ArcGIS Enterprise.

[2]ArcGIS Business Analyst Web App Standard is available in ArcGIS Online. ArcGIS Enterprise customers with at least one ArcGIS Online license for the Creator user type or above can leverage Business Analyst Web App Standard through ArcGIS Online utility services as of the ArcGIS Enterprise 12.0 release.

[3]ArcGIS Knowledge Studio is available upon purchasing the ArcGIS Knowledge license, which includes ArcGIS Knowledge Server. Knowledge Studio is available for ArcGIS Enterprise customers only.

[4]ArcGIS for Microsoft 365 includes ArcGIS for Excel, ArcGIS for Power BI, ArcGIS for SharePoint, ArcGIS for Teams, and ArcGIS Connectors for Power Automate.

[5]ArcGIS Mission Manager and ArcGIS Mission Responder are available at the designated user types above upon purchasing ArcGIS Mission, which includes ArcGIS Mission Manager. It is available for ArcGIS Enterprise customers only.

[6]The Advanced Editing user type extension provides access to ArcGIS Parcel Fabric, ArcGIS Trace Network, and ArcGIS Utility Network. Full functionality of those three capabilities is available with ArcGIS Enterprise.

[7]ArcGIS Maps SDKs for Native Apps license levels correspond with ArcGIS Maps SDKs capabilities.

Note: This matrix is specific to user types only. It does not include all products licensed by Esri. Products that have been deprecated or retired are not listed.

City Council **AGENDA ITEM NO. L5.**

DATE: June 2, 2026

TO: Honorable Mayor and City Council Members

SUBJECT: Consideration of the procurement of three Solid Waste collection vehicles from Rush Truck Centers, in the amount of $1,443,559.68 (Facilities and Community Services Department Director Crocker)

MOTION:

If the City Council determines that staff's recommendation is appropriate, the following motion is provided:

I move to approve the purchase of three Solid Waste collection vehicles from Rush Truck Centers in the amount of $1,443,559.68.

RECOMMENDATION:

Staff recommends that the City Council approve the purchase and replacement of three Solid Waste Collection vehicles from Rush Truck Centers in an amount of $1,443,559.68.

DISCUSSION:

The City of Redlands operates a Solid Waste Enterprise that provides collection and landfill services, supported by a fleet of 43 vehicles requiring ongoing maintenance and scheduled replacement. The City's vehicle replacement policy is guided by industry standards established by the American Public Works Association (APWA) and is designed to ensure the most cost-effective, timely, and efficient replacement of fleet assets.

Several vehicles within the existing fleet have exceeded APWA-recommended service life standards and are due for replacement. In addition, ongoing global supply chain challenges affecting parts and labor have impacted heavy-duty original equipment manufacturers (OEMs) across North America. As a result, production of truck chassis has been constrained, leading to extended lead times of approximately 12 to 24 months for specialized vehicle builds. To address current and anticipated operational needs, staff recommends the purchase of three solid waste collection vehicles at this time.

The Solid Waste Division's adopted Fiscal Year 2025–26 budget includes sufficient funding for this purchase. The proposed procurement is consistent with the City's purchasing policies and will be conducted through a cooperative purchasing agreement with Sourcewell. This approach allows the City to utilize competitively solicited and awarded contracts, providing access to pricing and terms established through a national cooperative of more than 50,000 government, education, and nonprofit agencies.

Staff recommends that the City Council approve the cooperative purchase from Rush Truck Centers under Sourcewell Contract No. 032824. The proposed vehicle types and costs are as follows:

Side Loader	$ 521,381.81
Side Loader	$ 521,381.81
Roll Off	$ 400,796.06
TOTAL	**$ 1,443,559.68**

Replacing these aging vehicles with newer models not only reduces maintenance costs but also enhances the safety of staff operating the City's Solid Waste Collection vehicles, which will greatly improve the efficiency and reliability of waste collection services.

ALTERNATIVES:

City Council may elect not to approve the purchase; however, this would adversely affect the Solid Waste Division operations.

STRATEGIC PLAN:

Supports Priority D- Sustainability.

SUBMITTED BY:
Tabitha Crocker, Facilities & Community Services Director

RECOMMENDED BY:
Charles M. Duggan Jr., City Manager

REVIEWED BY:
Yvette M. Abich Garcia, City Attorney
Janice McConnell, Assistant City Manager
James Garland, Interim Management Services/Finance Director
Dana Abramovitz-Daniel, Procurement Manager

PREPARED BY:
Marion Cronin, Administrative Analyst

FISCAL IMPACT

Fiscal Year: FY 2025-26

Revenue Generating: No

Amount: $1,443,559.68

Budgeted Y/N: Yes

Account No.: 511910-8704-511005

Additional Appropriation Required: No

Discussion:

Sufficient funding for this purchase is included in the Solid Waste's Division's FY 2025-26 project budget as previously approved by City Council.

**(Model 220 – while supplies last!!!)*

Dealer Guidelines:

- Spec cab and chassis to customer requirements using current Price Level.
- In SmartSpec's Special Codes, select Option Code **9409843 PETERBILT SOURCEWELL PROGRAM** to identify the order as a Sourcewell sale.
- Sourcewell discount price to the customer comes off **Total LIST PRICE** of cab and chassis only
- All orders must be submitted at current price level and Marketing Program at the time of order, **NO CARS allowed.**
- **Included in the Customer Sourcewell price**: cab & chassis, factory-freight, Pre-Delivery-Inspection (PDI), marketing fee, SmartLINQ and dealer profit.

- **Sourcewell customers may be responsible for certain additional costs when applicable including flooring/interest, required taxes (FET or tariffs), surcharges from emissions regulations or supplier increases, etc.**
- **Sourced Goods Referenced on the Quote Sheet include**: any options/services provided by the dealer outside of PDI (i.e. body, lights, manuals, training, Doc Fees, local delivery, DEF fluid, decals, extended warranties, vehicle layout, etc.)
- Dealer quote to the customer must list the final chassis price separately from other costs, including body price and installation if applicable (see the quote/invoice template on PACCAR.net).
- Bodies can be marked up to 10%, with a maximum cap of $7,000.
- Customer Sourcewell Pricing must not exceed (X% off List Price).
- Dealer may provide additional discount to the Sourcewell Customer from Dealer profit.
- Dealers must submit a complete sales report to **PB.Loyalty@PACCAR.com** when prompted.
- Latest Sourcewell discount % available on PACCAR.net or Sourcewell Website: https://www.sourcewell-mn.gov/cooperative-purchasing/032824-PMC
- Customer Quote Sheet available on PACCAR.net.
- Sales Report Template available on PACCAR.net.
- Sourcewell Training available on PACCAR.net.

Other Requirements:

- **Canadian Peterbilt Dealers** have the option for orders to invoice in Canadian dollar or U.S. dollar.
- If a chassis is invoiced in U.S. dollars, Canadian Peterbilt Dealers can lock in the exchange rate and invoice in Canadian dollars before the build date (usually two weeks prior). Note: Once a locked rate is submitted, it cannot be changed.
- This program may **NOT** be combined with other customer rebate or promotional programs. Dealers can provide an additional discount from the dealer profit.
- **Dealer Stock units** are handled case-by-case, please reach out to your DSM.

Contact your Regional Sales Office with any questions.

FEDERAL EXCISE TAX
Exemption Certificate
for Use by States & Local Governments
Treas. Reg. 48.4221-5

I hereby certify that I am _____ (title of officer) of the _____ (state or local government) ("Purchaser"), that I am authorized to execute this certificate on behalf of Purchaser, and that:

(check applicable type of certificate)

A. _____ the article/articles specified in the accompanying order or below:

Article/Articles (by VIN):

_____ _____

_____ _____

(if more room is needed, attach list of additional articles to this certificate)

OR

B. X all orders placed by Purchaser for the period commencing January 1, 2026 (date) and ending December 31, 2026 (date) (period not to exceed 12 calendar quarters)

are, or will be, purchased from Rush Truck Centers of California, Inc. ("**Dealer"**) for the exclusive use of Purchaser.

Purchaser understands that this statement is made under penalties of perjury.

Purchaser understands that the exemption from tax in the case of sales of articles under this exemption certificate to a State, etc., is limited to the sale of articles purchased for its exclusive use. Purchaser understands that the fraudulent use of this certificate for the purpose of securing this exemption will subject Purchaser and all parties making such fraudulent use of this certificate to a fine of not more than $10,000, or to imprisonment for not more than 5 years, or both, together with costs of prosecution.

Notice Regarding Security Interest and Payment of Purchase Price

1. BMO Harris Bank N.A. ("Bank") financed or will finance the acquisition of each vehicle that Rush Enterprises, Inc. and its subsidiaries ("Rush") will in turn sell to you on deferred payment terms ("Vehicle"). Bank's agreement with Rush requires that Bank's security interest in each Vehicle continue until Bank receives the full amount that Bank financed for such Vehicle. Based on that agreement, your purchase of a Vehicle will be subject to Bank's prior, unrelinquished security interest, which will continue until Bank receives the total amount that Bank financed for such Vehicle.

2. By written notice to you, Bank may require you to pay the purchase price for Vehicles directly to Bank. If you pay any portion of the purchase price for a Vehicle directly to Bank, Rush will credit such payment(s) against the amount you owe to Rush.

3. Notwithstanding the foregoing, on full payment for a Vehicle, Rush shall ensure that the Vehicle is free and clear of any liens, mortgages, security interests or other encumbrances of third parties, including BMO, and shall pay all amounts necessary to discharge any such encumbrance.

Sales Code	Std/ Opt	Description	$ List	Weight
Base Model				
0005201	S	**Model 520** Peterbilt's Model 520 is built to withstand the harsh demands of the refuse industry. The rugged, aluminum cab delivers best-in-class durability for increased uptime and lap seam construction on a zinc-coated steel sub-frame for corrosion resistance. Bulkhead-style doors provide years of watertight performance. This low-cab forward vehicle adds a new dimension of productivity and versatility. An industry-leading, 65-degree cab tilt enhances maintenance and serviceability. Body installation is cost effective and efficient and the center console provides convenient access to body control integration points.	232,861	**16,475**
0091180	S	**Refuse, Scrap, Recycling**	0	**0**
0093040	O	**Refuse/Landfill** Truck which picks up refuse or recycled material from curbside containers in residential areas. Operation typically includes very frequent stops and starts. Unloading can be at transfer station or at landfill (may enter landfill).	0	**0**
0095220	O	**Automated Side Loader / Push-Out**	0	**0**
0098010	O	**California Registry** California RegistryRequired for all vehicles that will be registered in the State of California.	0	**0**

4256740	O	**Allison 6-Speed Configuration, Wide Ratio Gears** Allison 4500 transmission only	0	**0**
4256870	O	**Allison Output Function S Neutral Indicator** Allison output function S Neutral Indicator for PTO. Required on Refuse Packer Applications. With this configuration NEUTRAL only, PTO engagement is permitted only when the transmission is in Neutral. Once the transmission is in Neutral, the PTO is automatically engaged and fast idle is initiated when the PTO switch is on. In addition with this configuration Pack-on-the-fly, the PTO is automatically engaged and fast idle is initiated when the PTO switch is On concurrently with shifting of the transmission to Neutral.	0	**0**
4256990	O	**Rolling Direction Change Shift Inhibit Feature** Allison transmissions. A programmable feature that keeps the transmission from shifting from Drive to Reverse or from Reverse to Drive above a preset speed. This wireless function is enabled when a switch is closed to complete the circuit between input wire 101 and ground. Frequently the function is interfaced with a switch indicating activation of another vehicle function, such as application of the service brakes. When the function is enabled, the TCM will recognize the request for a direction change shift, Reverse-to-Drive or Drive-to-Reverse. If all other operating conditions are acceptable, the TCM will command the requested shift. The enable remains in effect until the switch is opened, followed by the selection of a different direction, Reverse or Drive, at the shift selector. This could be used for doc spotters and refuse. If the function is not enabled, any shift which results in a change of direction is inhibited.	0	**0**
Air & Trailer Equipment				

Sales Code	Std/ Opt	Description	$ List	Weight
4510210	S	**Bendix AD-HF EP Air Dryer, Heater** Coalescing filter, extended purge. Bendix AD-HF air filters protects the life of your engine system and components. Proven PuraGuard oil coalescing technonlgy in the the air dryer catridge. This oil coalescing filter ensures the removal of oil and oil aerosols before they can contaminate the moisture removing desiccant.	0	**0**

Quick Reference Guide

This is a Quick Reference Guide "ONLY"

It is an itemized general listing of the components and/or items used in the assembly of a Peterbilt Vehicle and their respective level of warranty coverage. This list is NOT to be construed as all-inclusive.
Refer to the complete text of the Peterbilt Warranty Agreement Cat. No.5201, 5278, 5018 for specific details on the terms, conditions and limitations of said agreement.

BASIC VEHICLE WARRANTY — 12 Months / 100,000 Miles / 160,000 Kilometers whichever comes first

- Air Cleaner System (Excludes Filter Element)
- Air Conditioner System
  - Accumulator
  - Actuators, HVAC
  - Blend, Mode, Fresh Air Doors
  - Blower Motor & Wheel
  - Coil, Heater
  - Compressor, Freon
  - Condenser
  - Control, HVAC
  - Drain Valve & Hose
  - Expansion Valve
  - Evaporator
  - Freeze Control Switch
  - Hardlines, Refrigerant
  - Heater Hoses & Clamps
  - Low/High Pressure Switches
  - O-rings
  - Receiver -Dryer
  - Resistor
- Airshield
- Air System
- Air Compressor (Bendix)
- Air Dryer & Purge Valve
- Air Governor
- Air Tank & Drain Valve
- Alternator
- Antenna
- Auxiliary Heater Assembly (Espar)
- Auxiliary Transmissions
- Battery (PACCAR)
- Battery/Tool Box Assembly
- Battery Hold Downs
- Brake - Disc
  - Chamber
  - Camshaft
  - Spider
  - Drum (Excludes Scored or Heat Checked)
- Bumper (Includes Aerodynamic Type)
- Cab
  - Heater and Duct
  - Side Extender
  - Skirt
  - Water Leak
  - Tilt Mechanism (Includes Pump)
- Charge Air Cooler
- Charge Air Cooler Hoses & Clamps
- Circuit Breakers
- Clamps, Turbocharger Air Inlet
- Clock (Analog / Digital)
- Clutch, Clutch Linkage
- Collision Avoidance System
- Control Cable
- Cooling Module
- Cruise Control Component
- Deck Plate Lamp
- DEF Heater Control Relay
- DEF Heater Coolant Control Valve
- DEF Heated Lines
- DEF Heating Elements
- DEF Heating Fittings on Supply Module
- DEF Lamp
- DEF Tank
- Door Latch, Lock and Hinge
- Door Pad and Soft Trim
- Driveline, U-Joint and Center Bearing
- Driveline Midship Plate
- Electrical Power Distribution Box
- Electrical Printed Circuit & Harness (Excludes Fuse)
- Engine Related Components
  - Engine Brake (PACBrake)
  - Dipstick and Tube
  - Fan, Fan Clutch and Sending Unit
  - Fan Shroud
  - Heater
  - Manufactured Messaging Products
  - Mount
  - Shutdown System
- Exhaust Stanchion
- Exhaust piping, clamps, gaskets
- Fairing
- Fuel
  - Tank
  - Tank Strap, Cap and Vent
  - Fuel Water Separator and/or Heater
  - Gauge and Sending Unit
- Heat Shield
- Hood Assist Spring and Hook
- Horn - Air or Electric
- Hose and Fitting (Excludes Rubbed or Loose)
- Hub Assembly (Excludes Bearing & Races)
- Hub Caps
- Hubometer
- Ignition Timer
- Instruments
- Lift/Tag/Pusher Axle
- Lift/Tag/Pusher Suspension
- Light Fixture (Excludes Bulb)
- Mirror
- Mud Flap Bracket (Excludes Mud Flap)
- Muffler
- Muffler Clamps
- Muffler Standpipe
- Navigation System (Smart Nav)
- Plating (Includes Chrome)
- Power Steering Pump
- Power Steering Reservoir
- Quarter Fender
- Radiator (Includes Header Gasket)
- Radiator Cap
- Radiator Mounting Brackets
- Radiator Mounting Bushings
- Radiator Tie Rods
- Radio/CB (Unlimited Mileage)
- Relay
- Seat Assembly
- Seat Belt
- Seat Structure
- Shift Control
- Shock Absorber
- Slack Adjuster
- Sleeper Boot
- Sleeper Extender
- Speaker
- Starter
- Steering
  - Shaft and U-Joint
  - Drag Link
  - Gear Mounting Bracket
  - Pitman Arm
- Steering Wheel and Column
- Step
- Supplemental Restraint System (Rollover Airbag)
- Suspension
  - Axle
  - Beams
  - Dowel Pin
  - Height Control Valve
- Suspension - Continued
  - Height Control Valve Bracket
  - Height Control Valve Linkage
  - Shock Bracket & Stud
  - Spring, Air
  - Spring Bracket
  - Spring, Leaf
  - Spring Pin
  - Spring Saddles
  - Spring Shackle & Pins
  - Torque Rods
  - Tracking Rods & Brackets
  - U-Bolts & U-Bolt Saddles
- Cab
  - Height Control Valve
  - Height Control Valve Bracket
  - Height Control Valve Linkage
  - Spring, Air
- Sleeper
  - Height Control Valve
  - Height Control Valve Bracket
  - Height Control Valve Linkage
  - Spring, Air
  - Suspension Bushings
- Switches
- Throttle Linkage and Cable
- Transfer Case
- Transmission Shift Control & Oil Cooler
- Turbocharger Piping, Clamps & Gaskets to Inlet of SCR
- Upholstery (Excludes Wear)
- Valve, All
- Vent - Fresh Air
- Visor (Outside and Inside)
- Weather Stripping
- Wheel Bearing (Wear Not Covered)
- Window Defroster Fan
- Window Lift (Includes Power Lift)
- Window Regulator
- Windshield Washer
- Wiper Arm (Excludes Wiper Blade)
- Wiper Motor and Control Valve
- Wiring and Connectors (Excludes Visible Rubbed or Loose)

PAINT

- Cab, Hood, Sleeper Paint	12 Months 100,000 Miles / 160,000 Kilometers
- Frame Paint - Black Only	12 Months 100,000 Miles / 160,000 Kilometers
- Frame Paint - All colors other than black	6 Months 50,000 Miles / 80,000 Kilometers
- Frame Paint - Logger, Mixer, Dump, Refuse, Oil Field & Construction applications	3 Months 25,000 Miles / 40,000 Kilometers

MAJOR COMPONENTS

36 Months or 300,000 Miles/480,000 Kilometers whichever shall occur first. 100% Parts and Labor

Axle - Eaton, Meritor and Dana Spicer Axles, Non-Driving and Driving, Single Speed, On-Highway with a Capacity of 46,000 Lbs. or Less (Includes Axle Input and Output Seals)(Excludes Axle Shaft Flange Gaskets, Brake Drums, Brake Shoes, Filters, Hub Assemblies, Hub Caps and Gaskets, Wheel Bearings and Wheel Seals)

Brakes – Bendix and Meritor (except air Disc Brakes)
Applies to Brackets, Cam Shafts, Slack Adjusters and Spiders

Cab, Hood, Hood Half-Fenders, and Sleeper Structure
Cab Fasteners (Excludes Add-On Aerodynamic Devices)

Sheppard and TRW Steering Gears

Manual Transmissions (Excludes Oil Coolers and Shift Controls)

Eaton Auto Shift Transmission

PACCAR 40k Tandem Axle

Line Haul (ave. 60,000 mi / 96,000 km annually)	60 mo. / 750,000 mi /1,200,000 km
Regional Haul & Pick-up & Delivery	24 mo. / Unlimited miles / kilometers

FRAME RAILS, GUSSETS, CROSSMEMBERS AND CAB / HOOD / or SLEEPER CORROSION

60 Months or 500,000 Miles/800,000 Kilometers whichever shall occur first. 100% Parts and labor

Frame Side Rails, Crossmembers, Gussets, A-Braces

Cab, Hood and Sleeper perforation caused by corrosion from within. Corrosion warranty applies to perforation - an actual hole in a cab, hood or sleeper panel due to corrosion. Warranty does not apply to corrosion caused by damage to a cab panel or finish paint.

OTHER COVERAGES

12 Months or 50,000 Miles/80,000 Kilometers whichever shall occur first. 100% Parts and Labor

Axle Shaft Flange Gaskets	Wheel Seals (Except LMS)
Hub Cap Gaskets	All Gaskets and Seals not specified above

General Warranty Exclusions

- The following components are warranted directly to you by their respective manufacturer, and are not warranted by Peterbilt Motors Company: Engine and Engine Manufacturer's Accessories, Engine Brake (except PAC Brake), Automatic Transmissions, Tires, Tubes, Fifth Wheel, Pintle Hooks, Hitch, Wheels and Batteries not listed.
- Peterbilt does not warrant antifreeze, lubricants, bulbs, fuses, filters, mud flaps, reflectors, winter fronts, wiper nozzles or wiper blades. Trade accessories such as fire extinguishers, chains, emergency kits and tools are not warranted.
- Peterbilt is not responsible for storage deterioration, wear, and changes in adjustment resulting from normal service. This includes brake and clutch linings, drive belts, wheel balance and axle alignments or upholstery.
- Peterbilt does not warrant metallic chassis (frame) paint. Peterbilt is not responsible for paint chipping or fading, peeling from frame bolts relating to maintenance, or paint peeling from road chemical damage.
- Damage due to accident, misuse, negligence, improper or inadequate maintenance, or unauthorized modification is not warranted. Failure of replacement parts used to repair above conditions are not warrantable.
- Vibrations, squeaks, fitting and hose leaks, unusual noises, rattles, loose nuts/bolts and hose and electrical connections can develop during the early shakedown trips of the vehicle. Up to 25,000 miles/40,000 kilometers, but not later than 90 days after date of delivery, the necessary adjustments will be made without charge. Such developments after this period are usually the result of use and are not warrantable items.
- Peterbilt is not responsible for damage resulting from engine horsepower/torque upgrades.

NON - WARRANTABLE COMPONENTS/ITEMS

 # File with Engine Manufacturer

Engine (see engine coverage)
Engine Accessories
Air Compressor (Engine Manufacturer)
Add-on Aerodynamic Device (Dealer Installed)
Antifreeze Solution
Automatic Transmission (Allison)
Brake Lining
Bulb
Fifth Wheel
Filter Element
Fire Extinguisher
Flag and Flare Kit
Fuel
Fuse
Light Bulb
Lubricant
Mudflap

Wiper Nozzle

NON - WARRANTABLE:

WEAR, DETERIORATION and/or ADJUSTMENTS

Peterbilt assumes no responsibility for wear and/or Deterioration of parts or Changes in Adjustment as a result of Normal Service.

Examples:
Brake Adjustment
Brake Drum
Brake Lining
Bushings (Serviceable)
Clutch Facing
Engine accessory belt
Fuse
Key Fob
Wheel Bearings
Mattress
Paint Chip and/or Fade
Soft Trim and Upholstery
Stainless Steel Discoloration
Tightening a Bolt and/or Fitting
Wheel and/or Axle Alignment
Window and Windshield Glass

This list is NOT to be construed as all-inclusive

NON - WARRANTABLE FUNCTIONS OR ACTS

Any Vehicle on Which the Odometer has been Altered
Any Vehicle that has been Altered or Modified in a Manner Unauthorized by Peterbilt
Damage Due to Accidents
Dyno Testing (Without Prior Regional Authorization)
Improper or Insufficient Maintenance Service
Misuse
Negligence
Storage (Includes Deterioration)
Towing and Road Calls
Transport
Troubleshooting and Road Testing

Revised 04/17

Rush Limited Warranty

NEW PRODUCTS – MANUFACTURER WARRANTIES ONLY. Any warranties on any new product(s) sold by Rush are limited only to any printed warranty provided by the applicable manufacturer of the product. EXCEPT FOR ANY SUCH WARRANTIES MADE BY MANUFACTURERS, THE PRODUCT(S) ARE SOLD WITHOUT ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, EACH OF WHICH IS EXPRESSLY DISCLAIMED.

USED PRODUCTS – NO WARRANTIES. All used product(s) sold by Rush are sold on an "AS IS, WHERE IS" basis, without any warranties by Rush. EXCEPT FOR ANY MANUFACTURERS' WARRANTIES THAT MAY STILL BE IN EFFECT, ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE EXPRESSLY DISCLAIMED.

LIMITED WARRANTY ON SERVICES. Rush warrants that all services performed by Rush for a customer, including repair, maintenance and installation services ("Services"), will be performed in a good and workmanlike manner ("Services Warranty"). The Services Warranty is valid for a period of ninety (90) days from the date the Service is completed. Customer's sole and exclusive remedy, and Rush's entire liability, under the Services Warranty is the repair of any nonconforming portion of the Services. RUSH PROVIDES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, CONCERNING ITS SERVICES. The Services Warranty is strictly limited to Services performed by Rush for customer. Rush does not warrant any services provided by any third-party. Any warranties are solely those that are provided by the third-party service provider.

75 DGE RM for FEL, Rialto Install - $36,879.40
Front Bumper Fill - $1,842.00

Terms & Conditions
For Fuel System installation: Additional charges may be incurred if chassis does not meet specified space requirements or if any modifications are needed. Fuel is not provided unless otherwise specified. If fuel is specified, system will be fueled to a minimum of 2000 psi.

Effective immediately, in the event of chassis delays extending significantly beyond the customer requested delivery date, Hexagon reserves the right to require a Customer deposit in the amount of the price of the fuel system, as further set forth in the Standard Terms and Conditions and Warranty.

Standard lead times are 12-14 weeks from receipt of purchase order and placement of order. Lead times are dynamic Please check with your Sales Representative for up-to-date lead time information.

Vehicle layouts are necessary to ensure proper installation and eliminate interference of components on the truck. Failure to supply Hexagon Agility with a frame layout for review and approval could result in additional installation chargebacks.

By accepting this sales quotation, you hereby agree to Hexagon Agility's terms and conditions of purchase. Hexagon Agility's Terms and Conditions and Warranty, and applicable addenda, apply. Please download a copy at https://hexagonagility.com/terms-conditions-supplier-info/ .

MODEL
520
A CLASS OF ITS OWN
Peterbilt

STREET TOUGH MEETS STREET SMARTS

MODEL 520

The Model 520 is built to withstand the harsh demands of the refuse industry. Powered by the lightweight PACCAR MX-11, the Model 520 delivers outstanding performance and reliability. New features include a redesigned gauge cluster with a 7-inch digital display that provides critical vehicle information and integrates with Advanced Driver Assistance Systems such as Bendix Fusion and side object detection.

The Model 520 incorporates many driver safety and comfort features including knurled exterior grab handles for a reliable grip, high-visibility bright yellow interior grab handles, LED headlamps and Electronic Stability Control (ESC). The updated VMUX electrical architecture and pre-configured frame layouts are optimized for seamless body integration. No matter the application, the Model 520 is designed to get the job done day in and day out.

DRIVER COMFORT & PRODUCTIVITY

The 520 interior features a thoroughly updated ergonomic dash design with a new gauge cluster and a 7-inch digital display. The switches are optimally placed within easy reach for maximum driver comfort and productivity. The center console features angled side panels for easy access to controls from either side.

POWER & PERFORMANCE

A PACCAR MX-11 engine provides outstanding power in a lightweight package and is fully integrated with the truck's electrical system for the ultimate in PTO Body control customization.

PACCAR MX-11

For more information on the Model 520, contact your local Peterbilt dealer or visit **peterbilt.com**.

MOVE TO ZERO

Setting new standards for performance and reliability with near-zero emissions.

L9N™

THE L9N.
MOVE TO ZERO.

Introducing the next generation of low-emission engine technology.

The Cummins Westport L9N natural gas engine is the next evolution of the industry-leading ISL G. It sets a new standard for performance and reliability while offering near-zero emissions. Leveraging the experience gained from over 80,000 Cummins Westport engines in service, the L9N delivers product improvements and emissions leadership that bus and truck customers can count on.

The L9N is available as a first-fit option from leading bus and truck manufacturers for a variety of applications such as urban transit, vocational and medium-duty truck and tractor, and shuttle and school bus.

Near-Zero Emissions

The L9N is certified to the California Air Resources Board (ARB) and Environmental Protection Agency (EPA) Optional Low NOx emissions standard of 0.02 g/bhp-hr — 90% lower than current emissions standards. It also meets the 2017 EPA greenhouse gas (GHG) emission requirements. Cummins Westport natural gas engines have met the 2010 EPA standard for particulate matter (0.01 g/bhp-hr) since 2001.

Natural gas is a low-carbon, domestically abundant fuel source. All Cummins Westport Inc. engines offer customers the choice of using compressed natural gas (CNG), liquefied natural gas (LNG) or renewable natural gas (RNG) as a fuel. RNG is pipeline-quality natural gas produced from the decomposition of organic wastes, which can come from a variety of sources such as dairy farm waste, landfills and urban waste treatment plants. Using RNG to fuel Cummins Westport ultra low emission engines provides additional and significant GHG reductions. Learn more with the Cummins Westport GHG Emissions calculator at **cwiplaybook.com.**

Next Generation Natural Gas Technology

Cummins Westport natural gas engines feature spark-ignited stoichiometric combustion with cooled exhaust gas recirculation. They use a simple maintenance-free Three-Way Catalyst (TWC) for consistent emissions control. Beginning in 2018, Cummins Westport natural gas engines include a new Engine Control Module (ECM), On-Board Diagnostics (OBD) capability, an enhanced TWC and a closed crankcase ventilation system.

L9N™

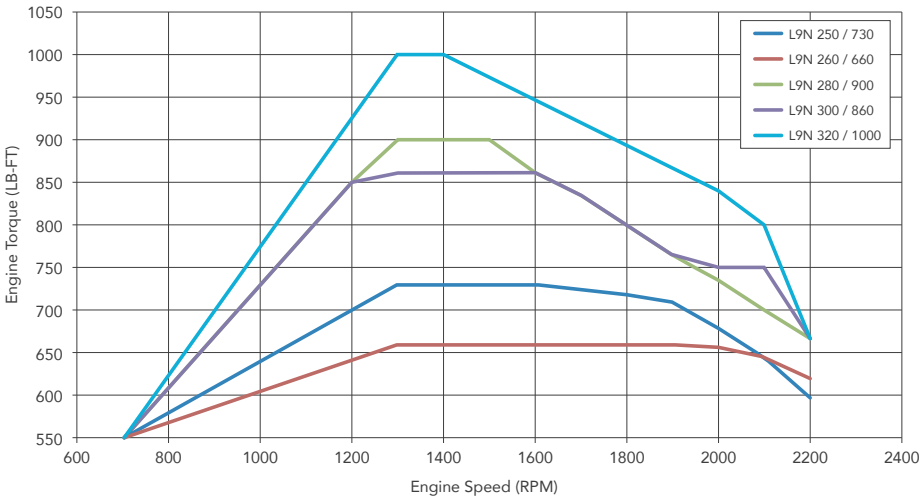
Maintenance

L9N Truck < 66,000 lbs (29,937 kg) GCVW

Maintenance Item^	Distance	Hours	Months
Oil and Filter*	15,000 mi (24,000 km)	500	6
Fuel Filter	30,000 mi (48,000 km)	1,000	9
Coolant Filter	15,000 mi (24,000 km)	500	6
Closed Crankcase Ventilation Filter	60,000 mi (96,000 km)	2,000	18
Spark Plugs	45,000 mi (72,000 km)	1,500	12
Cooling System Flush	60,000 mi (96,000 km)	2,000	18
Overhead Set Adjustment**	60,000 mi (96,000 km)	2,000	18
Ignition Coil Extension	300,000 mi (480,000 km)	10,000	5 yrs
Air Cleaner / Element	Follow manufacturer's published recommendations		

Consult your Owners or Operation and Maintenance manual for the complete daily and routine maintenance schedule.

^Based on a duty cycle of 30 mph / 48 kph average speed. Distance intervals may decrease based on average speed.
*Requires Natural Gas Engine Oil
**Initial overhead set adjustment at 1,000 hours.



L9N Urban Transit Bus and Refuse Truck

Maintenance Item^	Distance	Hours	Months
Oil and Filter*	7,500 mi (12,000 km)	500	6
Fuel Filter	15,000 mi (24,000 km)	1,000	9

Engine Features & Enhancements

New Engine Control Module (ECM)
The ECM provides full monitoring and control of the engine sensors, and the fuel and ignition systems. Cummins Westport 2018 engines feature a new ECM, Model CM2380, which offers faster processing to support heavy duty OBD requirements (500K baud rate). It is also telematics capable, and provides improved diagnostics and durability.

On-Board Diagnostics (OBD)
The OBD system continuously monitors the engine and after-treatment system. It gives the vehicle owner or repair technician electronic access to the status of various vehicle subsystems for diagnostic purposes. A Malfunction Indicator Lamp (MIL) is connected to the OBD system and is located on the vehicle's instrument panel. If the OBD system detects a malfunction related to the emissions control system, the MIL will come on and alert the operator. The engine will continue to operate normally until a diagnosis is made.

Closed Crankcase Ventilation (CCV) system
A CCV system reduces engine emissions by capturing crankcase emissions and rerouting these gases back to the engine. This results in more complete combustion and lower emissions.

Enhanced Three-Way Catalyst (TWC)
TWCs are effective, simple, passive devices. They provide consistent emissions control performance, are maintenance-free and can be mounted vertically or horizontally on the vehicle. Cummins Westport engines don't require active aftertreatment such as a diesel particulate filter or selective catalytic reduction.

High-Energy Ignition System
New ignition control module – provides better performance and improved spark plug and coil durability, plus self-diagnostics.

Control System
Full drive-by-wire ECM provides full monitoring and control of engine sensors, fuel system and ignition system. Full interface capability to Cummins INSITE™ and diagnostic service tools.

Electronic Features
- Road-speed governing
- Accelerator interlock
- SAE J1587/J1939
- Power Take-Off (PTO) control
- Cruise control
- Engine protection system

Wastegate Turbocharger
Water-cooled bearing housing for durability. Electronic control for precise air handling.

Specifications

NOx Emission	0.02 g / bhp-hr. (90% below EPA)
Maximum Horsepower	320 HP | 239 kW
Peak Torque	1,000 LB-FT | 1,356 Nm
Governed Speed	2200 RPM
Type	4-cycle, spark-ignited, in-line 6-cylinder, turbocharged, CAC
Engine Displacement	540 CU IN | 8.9 LITERS
Number of Cylinders	6
Operating Cycles	4
Net Weight (dry)	1,625 lb | 737 KG
Fuel Type	CNG / LNG / RNG
Aftertreatment	Three-Way Catalyst

Base Warranty

Cummins Westport engines feature the same factory base warranty coverage as Cummins diesel engines. For transit and shuttle bus engines, a standard 2-year, unlimited-miles/kilometers warranty with full parts and labor coverage on warrantable failures* applies. For school bus engines, standard coverage is 5 years/100,000 miles (160,934 km), whichever comes first. For truck customers, full engine coverage is provided for 2 years/250,000 miles (402,336 km), whichever comes first. Major components coverage is also available – contact your local Cummins distributor or Cummins Westport representative for details.

*Covers defects in Cummins materials or factory workmanship

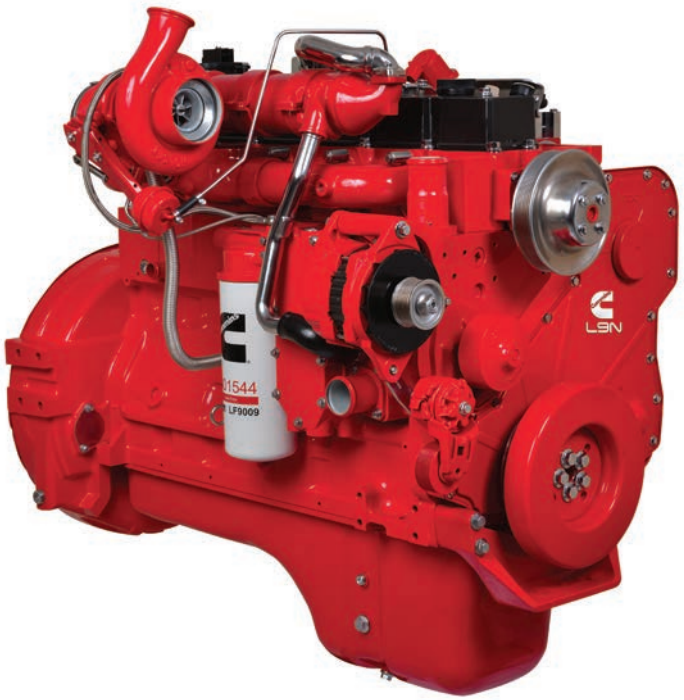
Extended Coverage

Cummins Westport Inc. also offers a variety of extended coverage plans to meet every customer's need. For full extended coverage plan details, contact your local Cummins distributor or Cummins Westport representative.

Better Customer Care

Cummins Westport-powered vehicles are supported by the Cummins service network, the largest and most capable in North America. Cummins-authorized technicians are fully trained on Cummins Westport natural gas engines, with ready access to Cummins parts and warranty support. For questions regarding your Cummins Westport engine or for assistance in finding a repair facility in the United States or Canada, call Cummins Care at 1-800-CUMMINS™ (1-800-286-6467).

1 800 CUMMINS™
CUMMINS CARE
ALWAYS ON



Cummins Westport – The Natural Choice

Cummins Westport designs, engineers and markets 6- to 12-liter spark-ignited natural gas engines for commercial transportation applications such as trucks and buses. Our natural gas engines are manufactured by Cummins, and are available from leading truck and bus manufacturers.

Natural Gas Playbook

To learn more about how to incorporate natural gas engines into your fleet, visit our Natural Gas Playbook website. We'll guide you through what you need to know to ensure a successful implementation and operation of your natural gas engines.

THE TRANSMISSION WITH A WORK ETHIC AS STRONG AS YOURS.

Think of the roughest job site. The most grueling route. The toughest terrain. Now think about how your trucks and your drivers are going to handle the challenge. If you've got the Allison Rugged Duty Series (RDS) automatic transmissions in your trucks, it's no sweat.

Introducing

RDS

RUGGED DUTY SERIES

Rush Truck Centers of California, Inc. dba Rush Truck Center, Los Angeles

Allison RDS transmissions provide an extended torque range, higher GVW capacity and advanced electronic controls to get more out of the latest engines, while putting more control to the wheels. They're engineered to take whatever you have to throw at them. And proven reliable in the field.

Each model is designed to meet the demands of your business and provide exceptional value. Rest assured, Allison has designed a transmission specifically for the way you work.

Rugged. Duty.

ENGINE hp (kW)	TORQUE lb-ft (N•m)
300–540 (224–403)	550–1590 (746–2156)
GVW lbs (kg)	
19,500–80,000 (8,845–36,288)	RDS

1000 RDS, 2100 RDS, 2200 RDS, 2500 RDS	3000 RDS, 3500 RDS	4000 RDS, 4500 RDS, 4700 RDS

Any vehicle that operates on/off highway and/or requires a PTO requires an Allison RDS.

- Dump
- Concrete Mixer
- Landscaping
- Snow Plow
- Utility
- Tow
- Refuse Front/ Side/Rear Loader
- Refuse Roll On/Roll Off
- Agriculture
- Recycling
- Liquid Delivery

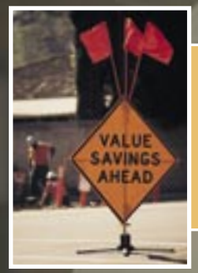
THE 3000 RDS — Increased horsepower and torque ratings

- Uprated to 370 hp (MD 3060 285 hp)
- Uprated to 1100 lb-ft (MD 3060 800 lb-ft)

The 4000 RDS horsepower and torque ratings also increased.

The newly designated 1000, 2100, 2200 and 2500 RDS transmissions offer a variety of features ideally suited for on-/off-highway vocational usage. The 1000, 2100 and 2200 RDS models feature high-density start and stop calibrations* providing improved shift operation, especially in congested traffic environments. The 2500 RDS is rated up to the maximum Class 7 weight range of 33,000 lbs. GVW.

Weight. Management.



*Calibrations are required for the 1000, 2100 and 2200 RDS.

Convert a fleet to the Allison RDS, and watch driver productivity soar. Drivers with Allison Automatic-equipped vehicles are able to make more deliveries per day (compared to AMT- or manual-equipped vehicles) because the Allison Automatic shortens route times.

In a recent USAC-sanctioned study* an Allison-equipped truck completed a typical delivery route 9% faster than a comparably equipped AMT truck. If a vehicle averages 10 stops a day, that is one extra stop per day and nearly four extra productive hours a week, per truck.

An increase in productivity.

Allison Automatics retain their value over the life of the vehicle, while manuals hold little to no value at trade in.

Depending upon the weight class or vocation, owners of Allison Automatics could expect to receive 10% of the total trade-in vehicle value for the transmission.

The Allison RDS has brains in addition to its brawn. Optional electronic control packages provide precisely the performance features you need to get the job done.

Smart. Real smart.

Integrates PTO operation with the transmission system so you can command how and when the PTO engages. The ECU monitors operating conditions to minimize potential damage and hazards.

PTO
ENABLE

When the PTO switch is open, the transmission will not shift into range. It's like an extra set of eyes – making sure there are no unwanted shifts out of Neutral when auxiliary equipment is in operation.

AUXILIARY
FUNCTION RANGE INHIBIT

When the vehicle comes to a stop, the transmission's electronic controls automatically command to Neutral. The driver must re-select a moving range to shift out of Neutral.

AUTOMATIC
NEUTRAL

You choose the range and an auxiliary vehicle system to activate at a chosen range. The Range Indicator provides a useable electric signal when the transmission shifts to the chosen range.

RANGE
INDICATOR

When you activate Fourth Lockup to Pump and select Drive, the transmission operates in direct drive fourth gear with the converter in lockup. When deactivated, normal automatic shifting can resume.

FOURTH LOCKUP
TO PUMP

Vocation	Additional Productivity Per Day	Average Revenue Per Stop	Additional Revenue Per Week	Additional Revenue Per Year
Construction Dump	One Stop	$55	$275	$13,200
Construction Mixer	One Stop	$250	$1,250	$60,000

The Allison RDS warranty covers 100% parts and labor with unlimited mileage. The 1000, 2100, 2200 and 2500 RDS have three-year standard coverage. The 3000, 3500, 4000, 4500 and 4700 RDS have two-year standard coverage. Extended Transmission Coverage (ETC) is available on all models at an additional cost.

A comprehensive warranty.

You can get in and out of the job site faster, safer and more efficiently with the RDS Allison Automatics. For more information, contact your Allison Transmission representative or visit **www.allisontransmission.com.**

Ask for the Allison RDS

* USAC certified testing conducted on a city and highway course with two identical trucks, with the exception that one was equipped with an Allison Automatic and the other was equipped with an automated manual transmission. Your results may vary, depending upon driver and vehicles.

DEALER BULLETIN

SUBJECT: Sourcewell Customer Pricing CY2026-2028

DB # 26-07
DATE: 3-9-26

Peterbilt is excited to announce the Sourcewell Customer Pricing program for 2026-2028. Sourcewell holds national contracts that offer an easy, time-saving procurement process for all levels of government and education. The discount by model represents the "% Off List" price the customer will pay when ordering units on the Sourcewell program.

Sourcewell Customer Pricing CY-2026-2028
Peterbilt Motors Company Contract #032824-PMC

Model	Avg List Price	"CY2026-2028 Sourcewell Discount"	Estimated Sourcewell Customer Price
220*	$ 119,935	5%	$ 113,938
535	$ 122,843	15%	$ 104,417

520	$ 313,513	28%	$ 225,729

**(Model 220 – while supplies last!!!)*

Dealer Guidelines:

- Spec cab and chassis to customer requirements using current Price Level.
- In SmartSpec's Special Codes, select Option Code **9409843 PETERBILT SOURCEWELL PROGRAM** to identify the order as a Sourcewell sale.
- Sourcewell discount price to the customer comes off **Total LIST PRICE** of cab and chassis only
- All orders must be submitted at current price level and Marketing Program at the time of order, **NO CARS allowed.**
- **Included in the Customer Sourcewell price**: cab & chassis, factory-freight, Pre-Delivery-Inspection (PDI), marketing fee, SmartLINQ and dealer profit.

- **Sourcewell customers may be responsible for certain additional costs when applicable including flooring/interest, required taxes (FET or tariffs), surcharges from emissions regulations or supplier increases, etc.**
- **Sourced Goods Referenced on the Quote Sheet include**: any options/services provided by the dealer outside of PDI (i.e. body, lights, manuals, training, Doc Fees, local delivery, DEF fluid, decals, extended warranties, vehicle layout, etc.)
- Dealer quote to the customer must list the final chassis price separately from other costs, including body price and installation if applicable (see the quote/invoice template on PACCAR.net).
- Bodies can be marked up to 10%, with a maximum cap of $7,000.
- Customer Sourcewell Pricing must not exceed (X% off List Price).
- Dealer may provide additional discount to the Sourcewell Customer from Dealer profit.
- Dealers must submit a complete sales report to **PB.Loyalty@PACCAR.com** when prompted.
- Latest Sourcewell discount % available on PACCAR.net or Sourcewell Website: https://www.sourcewell-mn.gov/cooperative-purchasing/032824-PMC
- Customer Quote Sheet available on PACCAR.net.
- Sales Report Template available on PACCAR.net.
- Sourcewell Training available on PACCAR.net.

Other Requirements:

- **Canadian Peterbilt Dealers** have the option for orders to invoice in Canadian dollar or U.S. dollar.
- If a chassis is invoiced in U.S. dollars, Canadian Peterbilt Dealers can lock in the exchange rate and invoice in Canadian dollars before the build date (usually two weeks prior). Note: Once a locked rate is submitted, it cannot be changed.
- This program may **NOT** be combined with other customer rebate or promotional programs. Dealers can provide an additional discount from the dealer profit.
- **Dealer Stock units** are handled case-by-case, please reach out to your DSM.

Contact your Regional Sales Office with any questions.

Notice Regarding Security Interest and Payment of Purchase Price

1. BMO Harris Bank N.A. ("Bank") financed or will finance the acquisition of each vehicle that Rush Enterprises, Inc. and its subsidiaries ("Rush") will in turn sell to you on deferred payment terms ("Vehicle"). Bank's agreement with Rush requires that Bank's security interest in each Vehicle continue until Bank receives the full amount that Bank financed for such Vehicle. Based on that agreement, your purchase of a Vehicle will be subject to Bank's prior, unrelinquished security interest, which will continue until Bank receives the total amount that Bank financed for such Vehicle.

2. By written notice to you, Bank may require you to pay the purchase price for Vehicles directly to Bank. If you pay any portion of the purchase price for a Vehicle directly to Bank, Rush will credit such payment(s) against the amount you owe to Rush.

3. Notwithstanding the foregoing, on full payment for a Vehicle, Rush shall ensure that the Vehicle is free and clear of any liens, mortgages, security interests or other encumbrances of third parties, including BMO, and shall pay all amounts necessary to discharge any such encumbrance.

Base Model				
0005201	S	**Model 520** Peterbilt's Model 520 is built to withstand the harsh demands of the refuse industry. The rugged, aluminum cab delivers best-in-class durability for increased uptime and lap seam construction on a zinc-coated steel sub-frame for corrosion resistance. Bulkhead-style doors provide years of watertight performance. This low-cab forward vehicle adds a new dimension of productivity and versatility. An industry-leading, 65-degree cab tilt enhances maintenance and serviceability. Body installation is cost effective and efficient and the center console provides convenient access to body control integration points.	232,861	**16,475**

Transmission & Equipment				
4052970	O	**Allison 4500 RDS-P Transmission, Gen 6** Rugged Duty Series	22,238	**390**
4210190	O	**1810 HD Driveline, 1 Midship Bearing** 4.5in x .180 wall tubing	-529	**15**
4216590	O	**1710 Driveline Interaxle** For tandem rear axles	-122	**-5**
4252170	S	**Auto Neutral Activates With Parking Brake** Auto Neutral helps improve jobsite safety by reducing the possibility of the truck moving due to throttle application.	20	**0**
4252890	O	**Allison FuelSense Not Desired** Dynamic Shift Sensing	-131	**0**
4253060	O	**Remote Mount Allison Transmission Vent**	121	**2**
4256020	S	**Console Mounted Push Button Shifter**	0	**0**
4256740	O	**Allison 6-Speed Configuration, Wide Ratio Gears** Allison 4500 transmission only	0	**0**
4256870	O	**Allison Output Function S Neutral Indicator** Allison output function S Neutral Indicator for PTO. Required on Refuse Packer Applications. With this configuration NEUTRAL only, PTO engagement is permitted only when the transmission is in Neutral. Once the transmission is in Neutral, the PTO is automatically engaged and fast idle is initiated when the PTO switch is on. In addition with this configuration Pack-on-the-fly, the PTO is automatically engaged and fast idle is initiated when the PTO switch is On concurrently with shifting of the transmission to Neutral.	0	**0**
4256990	O	**Rolling Direction Change Shift Inhibit Feature** Allison transmissions. A programmable feature that keeps the transmission from shifting from Drive to Reverse or from Reverse to Drive above a preset speed. This wireless function is enabled when a switch is closed to complete the circuit between input wire 101 and ground. Frequently the function is interfaced with a switch indicating activation of another vehicle function, such as application of the service brakes. When the function is enabled, the TCM will recognize the request for a direction change shift, Reverse-to-Drive or Drive-to-Reverse. If all other operating conditions are acceptable, the TCM will command the requested shift. The enable remains in effect until the switch is opened, followed by the selection of a different direction, Reverse or Drive, at the shift selector. This could be used for doc spotters and refuse. If the function is not enabled, any shift which results in a change of direction is inhibited.	0	**0**
Air & Trailer Equipment				
4510210	S	**Bendix AD-HF EP Air Dryer, Heater** Coalescing filter, extended purge. Bendix AD-HF air filters protects the life of your engine system and components. Proven PuraGuard oil coalescing technonlgy in the the air dryer catridge. This oil coalescing	0	**0**

Quick Reference Guide

This is a Quick Reference Guide "ONLY"

It is an itemized general listing of the components and/or items used in the assembly of a Peterbilt Vehicle and their respective level of warranty coverage. This list is NOT to be construed as all-inclusive.
Refer to the complete text of the Peterbilt Warranty Agreement Cat. No.5201, 5278, 5018 for specific details on the terms, conditions and limitations of said agreement.

BASIC VEHICLE WARRANTY

12 Months / 100,000 Miles / 160,000 Kilometers whichever comes first

- Air Cleaner System (Excludes Filter Element)
- Air Conditioner System
  - Accumulator
  - Actuators, HVAC
  - Blend, Mode, Fresh Air Doors
  - Blower Motor & Wheel
  - Coil, Heater
  - Compressor, Freon
  - Condenser
  - Control, HVAC
  - Drain Valve & Hose
  - Expansion Valve
  - Evaporator
  - Freeze Control Switch
  - Hardlines, Refrigerant
  - Heater Hoses & Clamps
  - Low/High Pressure Switches
  - O-rings
  - Receiver -Dryer
  - Resistor
- Airshield
- Air System
- Air Compressor (Bendix)
- Air Dryer & Purge Valve
- Air Governor
- Air Tank & Drain Valve
- Alternator
- Antenna
- Auxiliary Heater Assembly (Espar)
- Auxiliary Transmissions
- Battery (PACCAR)
- Battery/Tool Box Assembly
- Battery Hold Downs
- Brake - Disc
  - Chamber
  - Camshaft
  - Spider
  - Drum (Excludes Scored or Heat Checked)
- Bumper (Includes Aerodynamic Type)
- Cab
  - Heater and Duct
  - Side Extender
  - Skirt
  - Water Leak
  - Tilt Mechanism (Includes Pump)
- Charge Air Cooler
- Charge Air Cooler Hoses & Clamps
- Circuit Breakers
- Clamps, Turbocharger Air Inlet
- Clock (Analog / Digital)
- Clutch, Clutch Linkage
- Collision Avoidance System
- Control Cable
- Cooling Module
- Cruise Control Component
- Deck Plate Lamp
- DEF Heater Control Relay
- DEF Heater Coolant Control Valve
- DEF Heated Lines
- DEF Heating Elements
- DEF Heating Fittings on Supply Module
- DEF Lamp
- DEF Tank
- Door Latch, Lock and Hinge
- Door Pad and Soft Trim
- Driveline, U-Joint and Center Bearing
- Driveline Midship Plate
- Electrical Power Distribution Box
- Electrical Printed Circuit & Harness (Excludes Fuse)
- Engine Related Components
  - Engine Brake (PACBrake)
  - Dipstick and Tube
  - Fan, Fan Clutch and Sending Unit
  - Fan Shroud
  - Heater
  - Manufactured Messaging Products
  - Mount
  - Shutdown System
- Exhaust Stanchion
- Exhaust piping, clamps, gaskets
- Fairing
- Fuel
  - Tank
  - Tank Strap, Cap and Vent
  - Fuel Water Separator and/or Heater
  - Gauge and Sending Unit
- Heat Shield
- Hood Assist Spring and Hook
- Horn - Air or Electric
- Hose and Fitting (Excludes Rubbed or Loose)
- Hub Assembly (Excludes Bearing & Races)
- Hub Caps
- Hubometer
- Ignition Timer
- Instruments
- Lift/Tag/Pusher Axle
- Lift/Tag/Pusher Suspension
- Light Fixture (Excludes Bulb)
- Mirror
- Mud Flap Bracket (Excludes Mud Flap)
- Muffler
- Muffler Clamps
- Muffler Standpipe
- Navigation System (Smart Nav)
- Plating (Includes Chrome)
- Power Steering Pump
- Power Steering Reservoir
- Quarter Fender
- Radiator (Includes Header Gasket)
- Radiator Cap
- Radiator Mounting Brackets
- Radiator Mounting Bushings
- Radiator Tie Rods
- Radio/CB (Unlimited Mileage)
- Relay
- Seat Assembly
- Seat Belt
- Seat Structure
- Shift Control
- Shock Absorber
- Slack Adjuster
- Sleeper Boot
- Sleeper Extender
- Speaker
- Starter
- Steering
  - Shaft and U-Joint
  - Drag Link
  - Gear Mounting Bracket
  - Pitman Arm
- Steering Wheel and Column
- Step
- Supplemental Restraint System (Rollover Airbag)
- Suspension
  - Axle
  - Beams
  - Dowel Pin
  - Height Control Valve
- Suspension - Continued
  - Height Control Valve Bracket
  - Height Control Valve Linkage
  - Shock Bracket & Stud
  - Spring, Air
  - Spring Bracket
  - Spring, Leaf
  - Spring Pin
  - Spring Saddles
  - Spring Shackle & Pins
  - Torque Rods
  - Tracking Rods & Brackets
  - U-Bolts & U-Bolt Saddles
- Cab
  - Height Control Valve
  - Height Control Valve Bracket
  - Height Control Valve Linkage
  - Spring, Air
- Sleeper
  - Height Control Valve
  - Height Control Valve Bracket
  - Height Control Valve Linkage
  - Spring, Air
  - Suspension Bushings
- Switches
- Throttle Linkage and Cable
- Transfer Case
- Transmission Shift Control & Oil Cooler
- Turbocharger Piping, Clamps & Gaskets to Inlet of SCR
- Upholstery (Excludes Wear)
- Valve, All
- Vent - Fresh Air
- Visor (Outside and Inside)
- Weather Stripping
- Wheel Bearing (Wear Not Covered)
- Window Defroster Fan
- Window Lift (Includes Power Lift)
- Window Regulator
- Windshield Washer
- Wiper Arm (Excludes Wiper Blade)
- Wiper Motor and Control Valve
- Wiring and Connectors (Excludes Visible Rubbed or Loose)

PAINT

- Cab, Hood, Sleeper Paint	12 Months 100,000 Miles / 160,000 Kilometers
- Frame Paint - Black Only	12 Months 100,000 Miles / 160,000 Kilometers
- Frame Paint - All colors other than black	6 Months 50,000 Miles / 80,000 Kilometers
- Frame Paint - Logger, Mixer, Dump, Refuse, Oil Field & Construction applications	3 Months 25,000 Miles / 40,000 Kilometers

MAJOR COMPONENTS

36 Months or 300,000 Miles/480,000 Kilometers whichever shall occur first. 100% Parts and Labor

Axle - Eaton, Meritor and Dana Spicer Axles, Non-Driving and Driving, Single Speed, On-Highway with a Capacity of 46,000 Lbs. or Less (Includes Axle Input and Output Seals)(Excludes Axle Shaft Flange Gaskets, Brake Drums, Brake Shoes, Filters, Hub Assemblies, Hub Caps and Gaskets, Wheel Bearings and Wheel Seals)

Brakes – Bendix and Meritor (except air Disc Brakes)
Applies to Brackets, Cam Shafts, Slack Adjusters and Spiders

Cab, Hood, Hood Half-Fenders, and Sleeper Structure
Cab Fasteners (Excludes Add-On Aerodynamic Devices)

Sheppard and TRW Steering Gears

Manual Transmissions (Excludes Oil Coolers and Shift Controls)

Eaton Auto Shift Transmission

PACCAR 40k Tandem Axle

Line Haul (ave. 60,000 mi / 96,000 km annually)	60 mo. / 750,000 mi /1,200,000 km
Regional Haul & Pick-up & Delivery	24 mo. / Unlimited miles / kilometers

FRAME RAILS, GUSSETS, CROSSMEMBERS AND CAB / HOOD / or SLEEPER CORROSION

60 Months or 500,000 Miles/800,000 Kilometers whichever shall occur first. 100% Parts and labor

Frame Side Rails, Crossmembers, Gussets, A-Braces

Cab, Hood and Sleeper perforation caused by corrosion from within. Corrosion warranty applies to perforation - an actual hole in a cab, hood or sleeper panel due to corrosion. Warranty does not apply to corrosion caused by damage to a cab panel or finish paint.

OTHER COVERAGES

12 Months or 50,000 Miles/80,000 Kilometers whichever shall occur first. 100% Parts and Labor

Axle Shaft Flange Gaskets	Wheel Seals (Except LMS)
Hub Cap Gaskets	All Gaskets and Seals not specified above

General Warranty Exclusions

- The following components are warranted directly to you by their respective manufacturer, and are not warranted by Peterbilt Motors Company: Engine and Engine Manufacturer's Accessories, Engine Brake (except PAC Brake), Automatic Transmissions, Tires, Tubes, Fifth Wheel, Pintle Hooks, Hitch, Wheels and Batteries not listed.
- Peterbilt does not warrant antifreeze, lubricants, bulbs, fuses, filters, mud flaps, reflectors, winter fronts, wiper nozzles or wiper blades. Trade accessories such as fire extinguishers, chains, emergency kits and tools are not warranted.
- Peterbilt is not responsible for storage deterioration, wear, and changes in adjustment resulting from normal service. This includes brake and clutch linings, drive belts, wheel balance and axle alignments or upholstery.
- Peterbilt does not warrant metallic chassis (frame) paint. Peterbilt is not responsible for paint chipping or fading, peeling from frame bolts relating to maintenance, or paint peeling from road chemical damage.
- Damage due to accident, misuse, negligence, improper or inadequate maintenance, or unauthorized modification is not warranted. Failure of replacement parts used to repair above conditions are not warrantable.
- Vibrations, squeaks, fitting and hose leaks, unusual noises, rattles, loose nuts/bolts and hose and electrical connections can develop during the early shakedown trips of the vehicle. Up to 25,000 miles/40,000 kilometers, but not later than 90 days after date of delivery, the necessary adjustments will be made without charge. Such developments after this period are usually the result of use and are not warrantable items.
- Peterbilt is not responsible for damage resulting from engine horsepower/torque upgrades.

NON - WARRANTABLE COMPONENTS/ITEMS

 # File with Engine Manufacturer

Engine (see engine coverage)
Engine Accessories
Air Compressor (Engine Manufacturer)
Add-on Aerodynamic Device (Dealer Installed)
Antifreeze Solution
Automatic Transmission (Allison)
Brake Lining
Bulb
Fifth Wheel
Filter Element
Fire Extinguisher
Flag and Flare Kit
Fuel
Fuse
Light Bulb
Lubricant
Mudflap
Pintle Hook
Non-Original Equipment
Power Converter
Reflector
Refrigerator
Tire
Tow Pin
Wheels
Winter Front and Bug Screen
Wiper Blade
Wiper Nozzle

NON - WARRANTABLE:

WEAR, DETERIORATION and/or ADJUSTMENTS

Peterbilt assumes no responsibility for wear and/or Deterioration of parts or Changes in Adjustment as a result of Normal Service.

Examples:
Brake Adjustment
Brake Drum
Brake Lining
Bushings (Serviceable)
Clutch Facing
Engine accessory belt
Fuse
Key Fob
Wheel Bearings
Mattress
Paint Chip and/or Fade
Soft Trim and Upholstery
Stainless Steel Discoloration
Tightening a Bolt and/or Fitting
Wheel and/or Axle Alignment
Window and Windshield Glass

This list is NOT to be construed as all-inclusive

NON - WARRANTABLE FUNCTIONS OR ACTS

Any Vehicle on Which the Odometer has been Altered
Any Vehicle that has been Altered or Modified in a Manner Unauthorized by Peterbilt
Damage Due to Accidents
Dyno Testing (Without Prior Regional Authorization)
Improper or Insufficient Maintenance Service
Misuse
Negligence
Storage (Includes Deterioration)
Towing and Road Calls
Transport
Troubleshooting and Road Testing

Revised 04/17

Rush Limited Warranty

NEW PRODUCTS – MANUFACTURER WARRANTIES ONLY. Any warranties on any new product(s) sold by Rush are limited only to any printed warranty provided by the applicable manufacturer of the product. EXCEPT FOR ANY SUCH WARRANTIES MADE BY MANUFACTURERS, THE PRODUCT(S) ARE SOLD WITHOUT ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, EACH OF WHICH IS EXPRESSLY DISCLAIMED.

USED PRODUCTS – NO WARRANTIES. All used product(s) sold by Rush are sold on an "AS IS, WHERE IS" basis, without any warranties by Rush. EXCEPT FOR ANY MANUFACTURERS' WARRANTIES THAT MAY STILL BE IN EFFECT, ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE EXPRESSLY DISCLAIMED.

LIMITED WARRANTY ON SERVICES. Rush warrants that all services performed by Rush for a customer, including repair, maintenance and installation services ("Services"), will be performed in a good and workmanlike manner ("Services Warranty"). The Services Warranty is valid for a period of ninety (90) days from the date the Service is completed. Customer's sole and exclusive remedy, and Rush's entire liability, under the Services Warranty is the repair of any nonconforming portion of the Services. RUSH PROVIDES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, CONCERNING ITS SERVICES. The Services Warranty is strictly limited to Services performed by Rush for customer. Rush does not warrant any services provided by any third-party. Any warranties are solely those that are provided by the third-party service provider.

Terms & Conditions
For Fuel System installation: Additional charges may be incurred if chassis does not meet specified space requirements or if any modifications are needed. Fuel is not provided unless otherwise specified. If fuel is specified, system will be fueled to a minimum of 2000 psi.

Effective immediately, in the event of chassis delays extending significantly beyond the customer requested delivery date, Hexagon reserves the right to require a Customer deposit in the amount of the price of the fuel system, as further set forth in the Standard Terms and Conditions and Warranty.

Standard lead times are 12-14 weeks from receipt of purchase order and placement of order. Lead times are dynamic Please check with your Sales Representative for up-to-date lead time information.

Vehicle layouts are necessary to ensure proper installation and eliminate interference of components on the truck. Failure to supply Hexagon Agility with a frame layout for review and approval could result in additional installation chargebacks.

By accepting this sales quotation, you hereby agree to Hexagon Agility's terms and conditions of purchase. Hexagon Agility's Terms and Conditions and Warranty, and applicable addenda, apply. Please download a copy at https://hexagonagility.com/terms-conditions-supplier-info/ .

MODEL
520
A CLASS OF ITS OWN
Peterbilt

STREET TOUGH MEETS STREET SMARTS

MODEL 520

The Model 520 is built to withstand the harsh demands of the refuse industry. Powered by the lightweight PACCAR MX-11, the Model 520 delivers outstanding performance and reliability. New features include a redesigned gauge cluster with a 7-inch digital display that provides critical vehicle information and integrates with Advanced Driver Assistance Systems such as Bendix Fusion and side object detection.

The Model 520 incorporates many driver safety and comfort features including knurled exterior grab handles for a reliable grip, high-visibility bright yellow interior grab handles, LED headlamps and Electronic Stability Control (ESC). The updated VMUX electrical architecture and pre-configured frame layouts are optimized for seamless body integration. No matter the application, the Model 520 is designed to get the job done day in and day out.

DRIVER COMFORT & PRODUCTIVITY

The 520 interior features a thoroughly updated ergonomic dash design with a new gauge cluster and a 7-inch digital display. The switches are optimally placed within easy reach for maximum driver comfort and productivity. The center console features angled side panels for easy access to controls from either side.

POWER & PERFORMANCE

A PACCAR MX-11 engine provides outstanding power in a lightweight package and is fully integrated with the truck's electrical system for the ultimate in PTO Body control customization.

PACCAR MX-11

For more information on the Model 520, contact your local Peterbilt dealer or visit **peterbilt.com**.

MOVE TO ZERO

Setting new standards for performance and reliability with near-zero emissions.

L9N™

THE L9N.
MOVE TO ZERO.

Introducing the next generation of low-emission engine technology.

The Cummins Westport L9N natural gas engine is the next evolution of the industry-leading ISL G. It sets a new standard for performance and reliability while offering near-zero emissions. Leveraging the experience gained from over 80,000 Cummins Westport engines in service, the L9N delivers product improvements and emissions leadership that bus and truck customers can count on.

The L9N is available as a first-fit option from leading bus and truck manufacturers for a variety of applications such as urban transit, vocational and medium-duty truck and tractor, and shuttle and school bus.

Near-Zero Emissions

The L9N is certified to the California Air Resources Board (ARB) and Environmental Protection Agency (EPA) Optional Low NOx emissions standard of 0.02 g/bhp-hr — 90% lower than current emissions standards. It also meets the 2017 EPA greenhouse gas (GHG) emission requirements. Cummins Westport natural gas engines have met the 2010 EPA standard for particulate matter (0.01 g/bhp-hr) since 2001.

Natural gas is a low-carbon, domestically abundant fuel source. All Cummins Westport Inc. engines offer customers the choice of using compressed natural gas (CNG), liquefied natural gas (LNG) or renewable natural gas (RNG) as a fuel. RNG is pipeline-quality natural gas produced from the decomposition of organic wastes, which can come from a variety of sources such as dairy farm waste, landfills and urban waste treatment plants. Using RNG to fuel Cummins Westport ultra low emission engines provides additional and significant GHG reductions. Learn more with the Cummins Westport GHG Emissions calculator at **cwiplaybook.com.**

Next Generation Natural Gas Technology

Cummins Westport natural gas engines feature spark-ignited stoichiometric combustion with cooled exhaust gas recirculation. They use a simple maintenance-free Three-Way Catalyst (TWC) for consistent emissions control. Beginning in 2018, Cummins Westport natural gas engines include a new Engine Control Module (ECM), On-Board Diagnostics (OBD) capability, an enhanced TWC and a closed crankcase ventilation system.

L9N™

Maintenance

L9N Truck < 66,000 lbs (29,937 kg) GCVW

Maintenance Item^	Distance	Hours	Months
Oil and Filter*	15,000 mi (24,000 km)	500	6

Engine Features & Enhancements

New Engine Control Module (ECM)
The ECM provides full monitoring and control of the engine sensors, and the fuel and ignition systems. Cummins Westport 2018 engines feature a new ECM, Model CM2380, which offers faster processing to support heavy duty OBD requirements (500K baud rate). It is also telematics capable, and provides improved diagnostics and durability.

On-Board Diagnostics (OBD)
The OBD system continuously monitors the engine and after-treatment system. It gives the vehicle owner or repair technician electronic access to the status of various vehicle subsystems for diagnostic purposes. A Malfunction Indicator Lamp (MIL) is connected to the OBD system and is located on the vehicle's instrument panel. If the OBD system detects a malfunction related to the emissions control system, the MIL will come on and alert the operator. The engine will continue to operate normally until a diagnosis is made.

Closed Crankcase Ventilation (CCV) system
A CCV system reduces engine emissions by capturing crankcase emissions and rerouting these gases back to the engine. This results in more complete combustion and lower emissions.

Enhanced Three-Way Catalyst (TWC)
TWCs are effective, simple, passive devices. They provide consistent emissions control performance, are maintenance-free and can be mounted vertically or horizontally on the vehicle. Cummins Westport engines don't require active aftertreatment such as a diesel particulate filter or selective catalytic reduction.

High-Energy Ignition System
New ignition control module – provides better performance and improved spark plug and coil durability, plus self-diagnostics.

Control System
Full drive-by-wire ECM provides full monitoring and control of engine sensors, fuel system and ignition system. Full interface capability to Cummins INSITE™ and diagnostic service tools.

Electronic Features
- Road-speed governing
- Accelerator interlock
- SAE J1587/J1939
- Power Take-Off (PTO) control
- Cruise control
- Engine protection system

Wastegate Turbocharger
Water-cooled bearing housing for durability. Electronic control for precise air handling.

Specifications

NOx Emission	0.02 g / bhp-hr. (90% below EPA)
Maximum Horsepower	320 HP | 239 kW
Peak Torque	1,000 LB-FT | 1,356 Nm
Governed Speed	2200 RPM
Type	4-cycle, spark-ignited, in-line 6-cylinder, turbocharged, CAC
Engine Displacement	540 CU IN | 8.9 LITERS
Number of Cylinders	6
Operating Cycles	4
Net Weight (dry)	1,625 lb | 737 KG
Fuel Type	CNG / LNG / RNG
Aftertreatment	Three-Way Catalyst

Base Warranty

Cummins Westport engines feature the same factory base warranty coverage as Cummins diesel engines. For transit and shuttle bus engines, a standard 2-year, unlimited-miles/kilometers warranty with full parts and labor coverage on warrantable failures* applies. For school bus engines, standard coverage is 5 years/100,000 miles (160,934 km), whichever comes first. For truck customers, full engine coverage is provided for 2 years/250,000 miles (402,336 km), whichever comes first. Major components coverage is also available – contact your local Cummins distributor or Cummins Westport representative for details.

*Covers defects in Cummins materials or factory workmanship

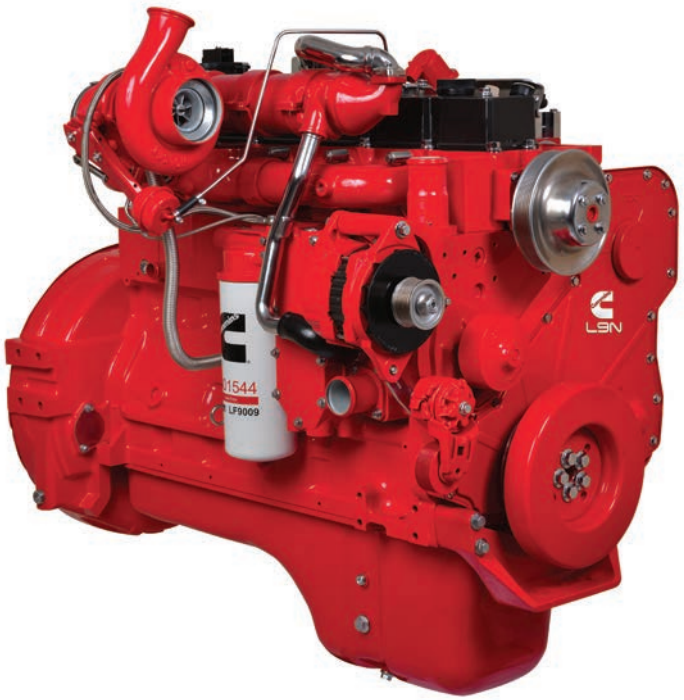
Extended Coverage

Cummins Westport Inc. also offers a variety of extended coverage plans to meet every customer's need. For full extended coverage plan details, contact your local Cummins distributor or Cummins Westport representative.

Better Customer Care

Cummins Westport-powered vehicles are supported by the Cummins service network, the largest and most capable in North America. Cummins-authorized technicians are fully trained on Cummins Westport natural gas engines, with ready access to Cummins parts and warranty support. For questions regarding your Cummins Westport engine or for assistance in finding a repair facility in the United States or Canada, call Cummins Care at 1-800-CUMMINS™ (1-800-286-6467).

1 800 CUMMINS™
CUMMINS CARE
ALWAYS ON



Cummins Westport – The Natural Choice

Cummins Westport designs, engineers and markets 6- to 12-liter spark-ignited natural gas engines for commercial transportation applications such as trucks and buses. Our natural gas engines are manufactured by Cummins, and are available from leading truck and bus manufacturers.

Natural Gas Playbook

To learn more about how to incorporate natural gas engines into your fleet, visit our Natural Gas Playbook website. We'll guide you through what you need to know to ensure a successful implementation and operation of your natural gas engines.

Rush Truck Centers of California, Inc. dba Rush Truck Center, Los Angeles

THE TRANSMISSION WITH A WORK ETHIC AS STRONG AS YOURS.

Think of the roughest job site. The most grueling route. The toughest terrain. Now think about how your trucks and your drivers are going to handle the challenge. If you've got the Allison Rugged Duty Series (RDS) automatic transmissions in your trucks, it's no sweat.

Introducing

RDS

RUGGED DUTY SERIES

Rush Truck Centers of California, Inc. dba Rush Truck Center, Los Angeles

Allison RDS transmissions provide an extended torque range, higher GVW capacity and advanced electronic controls to get more out of the latest engines, while putting more control to the wheels. They're engineered to take whatever you have to throw at them. And proven reliable in the field.

Each model is designed to meet the demands of your business and provide exceptional value. Rest assured, Allison has designed a transmission specifically for the way you work.

Rugged. Duty.

ENGINE hp (kW)	TORQUE lb-ft (N•m)
300–540 (224–403)	550–1590 (746–2156)
GVW lbs (kg)	RDS
19,500–80,000 (8,845–36,288)	

1000 RDS, 2100 RDS, 2200 RDS, 2500 RDS	3000 RDS, 3500 RDS	4000 RDS, 4500 RDS, 4700 RDS

Any vehicle that operates on/off highway and/or requires a PTO requires an Allison RDS.

- Dump
- Concrete Mixer
- Landscaping
- Snow Plow
- Utility
- Tow
- Refuse Front/ Side/Rear Loader
- Refuse Roll On/Roll Off
- Agriculture
- Recycling
- Liquid Delivery

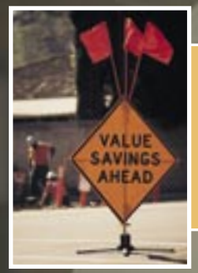
THE 3000 RDS — Increased horsepower and torque ratings

- Uprated to 370 hp (MD 3060 285 hp)
- Uprated to 1100 lb-ft (MD 3060 800 lb-ft)

The 4000 RDS horsepower and torque ratings also increased.

The newly designated 1000, 2100, 2200 and 2500 RDS transmissions offer a variety of features ideally suited for on-/off-highway vocational usage. The 1000, 2100 and 2200 RDS models feature high-density start and stop calibrations* providing improved shift operation, especially in congested traffic environments. The 2500 RDS is rated up to the maximum Class 7 weight range of 33,000 lbs. GVW.

Weight. Management.



*Calibrations are required for the 1000, 2100 and 2200 RDS.

Convert a fleet to the Allison RDS, and watch driver productivity soar. Drivers with Allison Automatic-equipped vehicles are able to make more deliveries per day (compared to AMT- or manual-equipped vehicles) because the Allison Automatic shortens route times.

In a recent USAC-sanctioned study* an Allison-equipped truck completed a typical delivery route 9% faster than a comparably equipped AMT truck. If a vehicle averages 10 stops a day, that is one extra stop per day and nearly four extra productive hours a week, per truck.

An increase in productivity.

Allison Automatics retain their value over the life of the vehicle, while manuals hold little to no value at trade in.

Depending upon the weight class or vocation, owners of Allison Automatics could expect to receive 10% of the total trade-in vehicle value for the transmission.

Smart. Real smart.

The Allison RDS has brains in addition to its brawn. Optional electronic control packages provide precisely the performance features you need to get the job done.

Integrates PTO operation with the transmission system so you can command how and when the PTO engages. The ECU monitors operating conditions to minimize potential damage and hazards.

PTO
ENABLE

When the PTO switch is open, the transmission will not shift into range. It's like an extra set of eyes – making sure there are no unwanted shifts out of Neutral when auxiliary equipment is in operation.

AUXILIARY
FUNCTION RANGE INHIBIT

When the vehicle comes to a stop, the transmission's electronic controls automatically command to Neutral. The driver must re-select a moving range to shift out of Neutral.

AUTOMATIC
NEUTRAL

You choose the range and an auxiliary vehicle system to activate at a chosen range. The Range Indicator provides a useable electric signal when the transmission shifts to the chosen range.

RANGE
INDICATOR

When you activate Fourth Lockup to Pump and select Drive, the transmission operates in direct drive fourth gear with the converter in lockup. When deactivated, normal automatic shifting can resume.

FOURTH LOCKUP
TO PUMP

Vocation	Additional Productivity Per Day	Average Revenue Per Stop	Additional Revenue Per Week	Additional Revenue Per Year
Construction Dump	One Stop	$55	$275	$13,200
Construction Mixer	One Stop	$250	$1,250	$60,000

The Allison RDS warranty covers 100% parts and labor with unlimited mileage. The 1000, 2100, 2200 and 2500 RDS have three-year standard coverage. The 3000, 3500, 4000, 4500 and 4700 RDS have two-year standard coverage. Extended Transmission Coverage (ETC) is available on all models at an additional cost.

A comprehensive warranty.

You can get in and out of the job site faster, safer and more efficiently with the RDS Allison Automatics. For more information, contact your Allison Transmission representative or visit **www.allisontransmission.com.**

Ask for the Allison RDS

* USAC certified testing conducted on a city and highway course with two identical trucks, with the exception that one was equipped with an Allison Automatic and the other was equipped with an automated manual transmission. Your results may vary, depending upon driver and vehicles.
Rush Truck Centers of California, Inc. dba Rush Truck Center, Los Angeles

Sourcewell

Solicitation Number: RFP #032824

CONTRACT

This Contract is between Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 (Sourcewell) and Rush Truck Centers of Texas, L.P., 555 IH-35 South Ste. 500, New Braunfels, TX 78130 (Supplier).

Sourcewell is a State of Minnesota local government unit and service cooperative created under the laws of the State of Minnesota (Minnesota Statutes Section 123A.21) that offers cooperative procurement solutions to government entities. Participation is open to eligible federal, state/province, and municipal governmental entities, higher education, K-12 education, nonprofit, tribal government, and other public entities located in the United States and Canada. Sourcewell issued a public solicitation for Class 4-8 Chassis and Cabs with Related Equipment, Accessories, and Services from which Supplier was awarded a contract.

Supplier desires to contract with Sourcewell to provide equipment, products, or services to Sourcewell and the entities located in the United States that access Sourcewell's cooperative purchasing contracts (Participating Entities).

1. TERM OF CONTRACT

A. EFFECTIVE DATE. This Contract is effective upon the date of the final signature below.

EXPIRATION DATE AND EXTENSION. This Contract expires July 9, 2028, unless it is cancelled sooner pursuant to Article 22. This Contract allows up to three additional one-year extensions upon the request of Sourcewell and written agreement by Supplier. Sourcewell retains the right to consider additional extensions beyond seven years as required under exceptional circumstances.

B. SURVIVAL OF TERMS. Notwithstanding any expiration or termination of this Contract, all payment obligations incurred prior to expiration or termination will survive, as will the following: Articles 11 through 14 survive the expiration or cancellation of this Contract. All other rights will cease upon expiration or termination of this Contract.

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

2. EQUIPMENT, PRODUCTS, OR SERVICES

A. EQUIPMENT, PRODUCTS, OR SERVICES. Supplier will provide the Equipment, Products, or Services as stated in its Proposal submitted under the Solicitation Number listed above. Supplier's Equipment, Products, or Services Proposal (Proposal) is attached and incorporated into this Contract.

All Equipment and Products provided under this Contract must be new and the current model. Supplier may offer close-out or refurbished Equipment or Products if they are clearly indicated in Supplier's product and pricing list. Unless agreed to by the Participating Entities in advance, Equipment or Products must be delivered as operational to the Participating Entity's site.

This Contract offers an indefinite quantity of sales, and while substantial volume is anticipated, sales and sales volume are not guaranteed.

B. WARRANTY. Supplier warrants that all Equipment, Products, and Services furnished are free from liens and encumbrances, subject to the Notice of Security Interest attached hereto as Exhibit A for Participating Entities with deferred payment terms. Any warranties on any Equipment and Products sold by Rush are limited only to any printed warranty provided by the applicable manufacturer of the Equipment or Product. Supplier agrees to assist the Participating Entity in reaching a resolution in any dispute over warranty terms with the manufacturer. Supplier warrants that all services performed by Supplier for a Participating Entity, including repair, maintenance, and installation services ("Services"), will be performed in a good and workmanlike manner in accordance with industry standards ("Services Warranty"). The Services Warranty is valid for a period of ninety (90) days from the date the Service is completed.

C. DEALERS, DISTRIBUTORS, AND/OR RESELLERS. Equipment, Products and Services will be offered for sale to Participating Entities through Supplier and its affiliates as stated in Supplier's Proposal. Upon Contract execution and throughout the Contract term, Supplier must provide to Sourcewell a current means to validate or authenticate Supplier's authorized dealers, distributors, or resellers relative to the Equipment, Products, and Services offered under this Contract, which will be incorporated into this Contract by reference. It is the Supplier's responsibility to ensure Sourcewell receives the most current information.

3. PRICING

All Equipment, Products, or Services under this Contract will be priced at or below the price stated in Supplier's Proposal.

When providing pricing quotes to Participating Entities, all pricing quoted must reflect a Participating Entity's total cost of acquisition. This means that the quoted cost is for delivered

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

Equipment, Products, and Services that are operational for their intended purpose, and includes all costs to the Participating Entity's requested delivery location.

Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. SHIPPING AND SHIPPING COSTS. All delivered Equipment and Products must be properly packaged. Damaged Equipment and Products may be rejected. If the damage is not readily apparent at the time of delivery, Supplier must permit the Equipment and Products to be returned within a reasonable time at no cost to Sourcewell or its Participating Entities. Participating Entities reserve the right to inspect the Equipment and Products at a reasonable time after delivery where circumstances or conditions prevent effective inspection of the Equipment and Products at the time of delivery. In the event of the delivery of nonconforming Equipment and Products, the Participating Entity will notify the Supplier as soon as possible and the Supplier will replace nonconforming Equipment and Products with conforming Equipment and Products that are acceptable to the Participating Entity.

Supplier must arrange for and pay for the return shipment on Equipment and Products that arrive in a defective or inoperable condition.

Sourcewell may declare the Supplier in breach of this Contract if the Supplier intentionally delivers substandard or inferior Equipment or Products.

B. SALES TAX. Each Participating Entity is responsible for supplying the Supplier with valid tax-exemption certification(s). When ordering, a Participating Entity must indicate if it is a tax-exempt entity.

C. HOT LIST PRICING. At any time during this Contract, Supplier may offer a specific selection of Equipment, Products, or Services at discounts greater than those listed in the Contract. When Supplier determines it will offer Hot List Pricing, it must be submitted electronically to Sourcewell in a line-item format. Equipment, Products, or Services may be added or removed from the Hot List at any time through a Sourcewell Price and Product Change Form as defined in Article 4 below.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities.

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

4. PRODUCT AND PRICING CHANGE REQUESTS

Supplier may request Equipment, Product, or Service changes, additions, or deletions at any time. All requests must be made in writing by submitting a signed Sourcewell Price and Product Change Request Form to the assigned Sourcewell Supplier Development Administrator. This approved form is available from the assigned Sourcewell Supplier Development Administrator. At a minimum, the request must:

- Identify the applicable Sourcewell contract number;
- Clearly specify the requested change;
- Provide sufficient detail to justify the requested change;
- Individually list all Equipment, Products, or Services affected by the requested change, along with the requested change (e.g., addition, deletion, price change); and
- Include a complete restatement of pricing documentation in Microsoft Excel with the effective date of the modified pricing, or product addition or deletion. The new pricing restatement must include all Equipment, Products, and Services offered, even for those items where pricing remains unchanged.

A fully executed Sourcewell Price and Product Change Request Form will become an amendment to this Contract and will be incorporated by reference.

5. PARTICIPATION, CONTRACT ACCESS, AND PARTICIPATING ENTITY REQUIREMENTS

A. PARTICIPATION. Sourcewell's cooperative contracts are available and open to public and nonprofit entities across the United States and Canada; such as federal, state/province, municipal, K-12 and higher education, tribal government, and other public entities.

The benefits of this Contract should be available to all Participating Entities located in the United States that can legally access the Equipment, Products, or Services under this Contract. A Participating Entity's authority to access this Contract is determined through its cooperative purchasing, interlocal, or joint powers laws. Any entity accessing benefits of this Contract will be considered a Service Member of Sourcewell during such time of access. Supplier understands that a Participating Entity's use of this Contract is at the Participating Entity's sole convenience and Participating Entities reserve the right to obtain like Equipment, Products, or Services from any other source.

Supplier is responsible for familiarizing its sales and service forces with Sourcewell contract use eligibility requirements and documentation and will encourage potential participating entities to join Sourcewell. Sourcewell reserves the right to add and remove Participating Entities to its roster during the term of this Contract.

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

B. PUBLIC FACILITIES. Supplier's employees may be required to perform work at government-owned facilities, including schools. Supplier's employees and agents must conduct themselves in a professional manner while on the premises, and in accordance with Participating Entity policies and procedures, and all applicable laws.

6. PARTICIPATING ENTITY USE AND PURCHASING

A. ORDERS AND PAYMENT. To access the contracted Equipment, Products, or Services under this Contract, a Participating Entity must clearly indicate to Supplier that it intends to access this Contract; however, order flow and procedure will be developed jointly between Sourcewell and Supplier. Typically, a Participating Entity will issue an order directly to Supplier or its authorized subsidiary, distributor, dealer, or reseller. If a Participating Entity issues a purchase order, it may use its own forms, but the purchase order should clearly note the applicable Sourcewell contract number. All Participating Entity orders under this Contract must be issued prior to expiration or cancellation of this Contract; however, Supplier performance, Participating Entity payment obligations, and any applicable warranty periods or other Supplier or Participating Entity obligations may extend beyond the term of this Contract.

Supplier's acceptable forms of payment are included in its attached Proposal. Participating Entities will be solely responsible for payment and Sourcewell will have no liability for any unpaid invoice of any Participating Entity.

B. ADDITIONAL TERMS AND CONDITIONS/PARTICIPATING ADDENDUM. Additional terms and conditions to a purchase order, or other required transaction documentation, may be negotiated between a Participating Entity and Supplier, such as job or industry-specific requirements, legal requirements (e.g., affirmative action or immigration status requirements), or specific local policy requirements. Some Participating Entities may require the use of a Participating Addendum, the terms of which will be negotiated directly between the Participating Entity and the Supplier or its authorized dealers, distributors, or resellers, as applicable. Any negotiated additional terms and conditions must never be less favorable to the Participating Entity than what is contained in this Contract.

C. SPECIALIZED SERVICE REQUIREMENTS. In the event that the Participating Entity requires service or specialized performance requirements not addressed in this Contract (such as e-commerce specifications, specialized delivery requirements, or other specifications and requirements), the Participating Entity and the Supplier may enter into a separate, standalone agreement, apart from this Contract. Sourcewell, including its agents and employees, will not be made a party to a claim for breach of such agreement.

D. TERMINATION OF ORDERS. Participating Entities may terminate an order, in whole or in part, immediately upon notice to Supplier in the event of any of the following events:

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

1. The Participating Entity fails to receive funding or appropriation from its governing body at levels sufficient to pay for the equipment, products, or services to be purchased; or
2. Federal, state, or provincial laws or regulations prohibit the purchase or change the Participating Entity's requirements.

E. GOVERNING LAW AND VENUE. The governing law and venue for any action related to a Participating Entity's order will be determined by the Participating Entity making the purchase.

7. CUSTOMER SERVICE

A. PRIMARY ACCOUNT REPRESENTATIVE. Supplier will assign an Account Representative to Sourcewell for this Contract and must provide prompt notice to Sourcewell if that person is changed. The Account Representative will be responsible for:

- Maintenance and management of this Contract;
- Timely response to all Sourcewell and Participating Entity inquiries; and
- Business reviews to Sourcewell and Participating Entities, if applicable.

B. BUSINESS REVIEWS. Supplier must perform a minimum of one business review with Sourcewell per contract year. The business review will cover sales to Participating Entities, pricing and contract terms, administrative fees, sales data reports, performance issues, supply issues, customer issues, and any other necessary information.

8. REPORT ON CONTRACT SALES ACTIVITY AND ADMINISTRATIVE FEE PAYMENT

A. CONTRACT SALES ACTIVITY REPORT. Each calendar quarter, Supplier must provide a contract sales activity report (Report) to the Sourcewell Supplier Development Administrator assigned to this Contract. Reports are due no later than 45 days after the end of each calendar quarter. A Report must be provided regardless of the number or amount of sales during that quarter (i.e., if there are no sales, Supplier must submit a report indicating no sales were made).

The Report must contain the following fields:

- Participating Entity Name (e.g., City of Staples Highway Department);
- Participating Entity Physical Street Address;
- Participating Entity City;
- Participating Entity State/Province;
- Participating Entity Zip/Postal Code;
- Participating Entity Contact Name;
- Participating Entity Contact Email Address;
- Participating Entity Contact Telephone Number;

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

- Sourcewell Assigned Entity/Participating Entity Number;
- Item Purchased Description;
- Item Purchased Price;
- Sourcewell Administrative Fee Applied; and
- Date Purchase was invoiced/sale was recognized as revenue by Supplier.

B. ADMINISTRATIVE FEE. In consideration for the support and services provided by Sourcewell, the Supplier will pay an administrative fee to Sourcewell on all Equipment, Products, and Services provided to Participating Entities. The Administrative Fee must be included in, and not added to, the pricing. Supplier may not charge Participating Entities more than the contracted price to offset the Administrative Fee.

The Supplier will submit payment to Sourcewell for the percentage of administrative fee stated in the Proposal multiplied by the total sales of all Equipment, Products, and Services purchased by Participating Entities under this Contract during each calendar quarter. Payments should note the Supplier's name and Sourcewell-assigned contract number in the memo; and must be mailed to the address above "Attn: Accounts Receivable" or remitted electronically to Sourcewell's banking institution per Sourcewell's Finance department instructions. Payments must be received no later than 45 calendar days after the end of each calendar quarter.

Supplier agrees to cooperate with Sourcewell in auditing transactions under this Contract to ensure that the administrative fee is paid on all items purchased under this Contract.

In the event the Supplier is delinquent in any undisputed administrative fees, Sourcewell reserves the right to cancel this Contract and reject any proposal submitted by the Supplier in any subsequent solicitation. In the event this Contract is cancelled by either party prior to the Contract's expiration date, the administrative fee payment will be due no more than 30 days from the cancellation date.

9. AUTHORIZED REPRESENTATIVE

Sourcewell's Authorized Representative is its Chief Procurement Officer.

Supplier's Authorized Representative is the person named in the Supplier's Proposal. If Supplier's Authorized Representative changes at any time during this Contract, Supplier must promptly notify Sourcewell in writing.

10. AUDIT, ASSIGNMENT, AMENDMENTS, WAIVER, AND CONTRACT COMPLETE

A. AUDIT. Pursuant to Minnesota Statutes Section 16C.05, subdivision 5, the books, records, documents, and accounting procedures and practices relevant to this Contract are subject to examination by Sourcewell or the Minnesota State Auditor for a minimum of six years from the

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

end of this Contract. This clause extends to Participating Entities as it relates to business conducted by that Participating Entity under this Contract.

B. ASSIGNMENT. Neither party may assign or otherwise transfer its rights or obligations under this Contract without the prior written consent of the other party and a fully executed assignment agreement. Such consent will not be unreasonably withheld. Any prohibited assignment will be invalid.

C. AMENDMENTS. Any amendment to this Contract must be in writing and will not be effective until it has been duly executed by the parties.

D. WAIVER. Failure by either party to take action or assert any right under this Contract will not be deemed a waiver of such right in the event of the continuation or repetition of the circumstances giving rise to such right. Any such waiver must be in writing and signed by the parties.

E. CONTRACT COMPLETE. This Contract represents the complete agreement between the parties. No other understanding regarding this Contract, whether written or oral, may be used to bind either party. For any conflict between the attached Proposal and the terms set out in Articles 1-22 of this Contract, the terms of Articles 1-22 will govern.

F. RELATIONSHIP OF THE PARTIES. The relationship of the parties is one of independent contractors, each free to exercise judgment and discretion with regard to the conduct of their respective businesses. This Contract does not create a partnership, joint venture, or any other relationship such as master-servant, or principal-agent.

11. INDEMNITY AND HOLD HARMLESS

Supplier must indemnify, defend, save, and hold Sourcewell and its Participating Entities, including their agents and employees, harmless from any claims or causes of action, including attorneys' fees incurred by Sourcewell or its Participating Entities, brought or alleged by unaffiliated third parties arising out of any negligent act or omission in the performance of this Contract by the Supplier or its agents or employees; this indemnification includes injury or death to person(s) or property alleged to have been caused by the negligent act or omission of Supplier relating to the Equipment, Products, or Services provided by Supplier under this Contract. Sourcewell's responsibility will be governed by the State of Minnesota's Tort Liability Act (Minnesota Statutes Chapter 466) and other applicable law.

12. GOVERNMENT DATA PRACTICES

Supplier and Sourcewell must comply with the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13, as it applies to all data provided by or provided to Sourcewell

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

under this Contract and as it applies to all data created, collected, received, maintained, or disseminated by the Supplier under this Contract.

13. INTELLECTUAL PROPERTY, PUBLICITY, MARKETING, AND ENDORSEMENT

A. INTELLECTUAL PROPERTY

1. *Grant of License.* During the term of this Contract:

   a. Sourcewell grants to Supplier a royalty-free, worldwide, non-exclusive right and license to use the trademark(s) provided to Supplier by Sourcewell in advertising and promotional materials for the purpose of marketing Sourcewell's relationship with Supplier.

   b. Supplier grants to Sourcewell a royalty-free, worldwide, non-exclusive right and license to use Supplier's trademarks in advertising and promotional materials for the purpose of marketing Supplier's relationship with Sourcewell.

2. *Limited Right of Sublicense*. The right and license granted herein includes a limited right of each party to grant sublicenses to their respective subsidiaries, distributors, dealers, resellers, marketing representatives, and agents (collectively "Permitted Sublicensees") in advertising and promotional materials for the purpose of marketing the Parties' relationship to Participating Entities. Any sublicense granted will be subject to the terms and conditions of this Article. Each party will be responsible for any breach of this Article by any of their respective sublicensees.

3. *Use; Quality Control.*

   a. Neither party may alter the other party's trademarks from the form provided and must comply with removal requests as to specific uses of its trademarks or logos.

   b. Each party agrees to use, and to cause its Permitted Sublicensees to use, the other party's trademarks only in good faith and in a dignified manner consistent with such party's use of the trademarks. Upon written notice to the breaching party, the breaching party has 30 days of the date of the written notice to cure the breach or the license will be terminated.

4. *Termination*. Upon the termination of this Contract for any reason, each party, including Permitted Sublicensees, will have 30 days to remove all Trademarks from signage, websites, and the like bearing the other party's name or logo (excepting Sourcewell's pre-printed catalog of suppliers which may be used until the next printing). Supplier must return all marketing and promotional materials, including signage, provided by Sourcewell, or dispose of it according to Sourcewell's written directions.

B. PUBLICITY. Any publicity regarding the subject matter of this Contract must not be released without prior written approval from the Authorized Representatives. Publicity includes notices, informational pamphlets, press releases, research, reports, signs, and similar public notices prepared by or for the Supplier individually or jointly with others, or any subcontractors, with respect to the program, publications, or services provided resulting from this Contract.

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

C. MARKETING. Any direct advertising, marketing, or offers with Participating Entities must be approved by Sourcewell. Send all approval requests to the Sourcewell Supplier Development Administrator assigned to this Contract.

D. ENDORSEMENT. The Supplier must not claim that Sourcewell endorses its Equipment, Products, or Services.

14. GOVERNING LAW, JURISDICTION, AND VENUE

The substantive and procedural laws of the State of Minnesota will govern this Contract. Venue for all legal proceedings arising out of this Contract, or its breach, must be in the appropriate state court in Todd County, Minnesota or federal court in Fergus Falls, Minnesota.

15. FORCE MAJEURE

Neither party to this Contract will be held responsible for delay or default caused by acts of God or other conditions that are beyond that party's reasonable control. A party defaulting under this provision must provide the other party prompt written notice of the default.

16. SEVERABILITY

If any provision of this Contract is found by a court of competent jurisdiction to be illegal, unenforceable, or void then both parties will be relieved from all obligations arising from that provision. If the remainder of this Contract is capable of being performed, it will not be affected by such determination or finding and must be fully performed.

17. PERFORMANCE, DEFAULT, AND REMEDIES

A. PERFORMANCE. During the term of this Contract, the parties will monitor performance and address unresolved contract issues as follows:

1. *Notification.* The parties must promptly notify each other of any known dispute and work in good faith to resolve such dispute within a reasonable period of time. If necessary, Sourcewell and the Supplier will jointly develop a short briefing document that describes the issue(s), relevant impact, and positions of both parties.
2. *Escalation.* If parties are unable to resolve the issue in a timely manner, as specified above, either Sourcewell or Supplier may escalate the resolution of the issue to a higher level of management. The Supplier will have 30 calendar days to cure an outstanding issue.
3. *Performance while Dispute is Pending*. Notwithstanding the existence of a dispute, the Supplier must continue without delay to carry out all of its responsibilities under the Contract that are not affected by the dispute. If the Supplier fails to continue without delay to perform its responsibilities under the Contract, in the accomplishment of all undisputed

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

work, the Supplier will bear any additional costs incurred by Sourcewell and/or its Participating Entities as a result of such failure to proceed.

B. DEFAULT AND REMEDIES. Either of the following constitutes cause to declare this Contract, or any Participating Entity order under this Contract, in default:

1. Nonperformance of contractual requirements, or
2. A material breach of any term or condition of this Contract.

The party claiming default must provide written notice of the default, with 30 calendar days to cure the default. Time allowed for cure will not diminish or eliminate any liability for liquidated or other damages. If the default remains after the opportunity for cure, the non-defaulting party may:

- Exercise any remedy provided by law or equity, or
- Terminate the Contract or any portion thereof, including any orders issued against the Contract.

18. INSURANCE

A. REQUIREMENTS. At its own expense, Supplier must maintain insurance policy(ies) in effect at all times during the performance of this Contract with insurance company(ies) licensed or authorized to do business in the State of Minnesota having an "AM BEST" rating of A- or better, with coverage and limits of insurance not less than the following:

1. *Workers' Compensation and Employer's Liability.*
Workers' Compensation: As required by any applicable law or regulation.
Employer's Liability Insurance: must be provided in amounts not less than listed below:
Minimum limits:
$500,000 each accident for bodily injury by accident
$500,000 policy limit for bodily injury by disease
$500,000 each employee for bodily injury by disease

2. *Commercial General Liability Insurance.* Supplier will maintain insurance covering its operations, with coverage on an occurrence basis, and must be subject to terms no less broad than the Insurance Services Office ("ISO") Commercial General Liability Form CG0001 (2001 or newer edition), or equivalent. At a minimum, coverage must include liability arising from premises, operations, bodily injury and property damage, independent contractors, products-completed operations including construction defect, contractual liability, blanket contractual liability, and personal injury and advertising injury. All required limits, terms and conditions of coverage must be maintained during the term of this Contract.
Minimum Limits:

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

$1,000,000 each occurrence Bodily Injury and Property Damage
$1,000,000 Personal and Advertising Injury
$2,000,000 aggregate for products liability-completed operations
$2,000,000 general aggregate

3. *Commercial Automobile Liability Insurance.* During the term of this Contract, Supplier will maintain insurance covering all owned, hired, and non-owned automobiles in limits of liability not less than indicated below. The coverage must be subject to terms no less broad than ISO Business Auto Coverage Form CA 0001 (2010 edition or newer), or equivalent.

Minimum Limits:
$1,000,000 each accident, combined single limit

4. *Umbrella Insurance*. During the term of this Contract, Supplier will maintain umbrella coverage over Employer's Liability, Commercial General Liability, and Commercial Automobile.

Minimum Limits:
$2,000,000

Failure of Supplier to maintain the required insurance will constitute a material breach entitling Sourcewell to immediately terminate this Contract for default.

B. CERTIFICATES OF INSURANCE. Prior to commencing under this Contract, Supplier must furnish to Sourcewell a certificate of insurance, as evidence of the insurance required under this Contract. Prior to expiration of the policy(ies), renewal certificates must be mailed to Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 or sent to the Sourcewell Supplier Development Administrator assigned to this Contract. The certificates must be signed by a person authorized by the insurer(s) to bind coverage on their behalf.

Failure to request certificates of insurance by Sourcewell, or failure of Supplier to provide certificates of insurance, in no way limits or relieves Supplier of its duties and responsibilities in this Contract.

C. ADDITIONAL INSURED ENDORSEMENT AND PRIMARY AND NON-CONTRIBUTORY INSURANCE CLAUSE. Supplier agrees to list Sourcewell and its Participating Entities, including their officers, agents, and employees, as an additional insured under the Supplier's commercial general liability insurance policy with respect to liability arising out of activities, "operations," or "work" performed by or on behalf of Supplier, and products and completed operations of Supplier. The policy provision(s) or endorsement(s) must further provide that coverage is primary and not excess over or contributory with any other valid, applicable, and collectible insurance or self-insurance in force for the additional insureds.

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

D. WAIVER OF SUBROGATION. Supplier waives and must require (by endorsement or otherwise) all its insurers to waive subrogation rights against Sourcewell and other additional insureds for losses paid under the insurance policies required by this Contract or other insurance applicable to the Supplier or its subcontractors. The waiver must apply to all deductibles and/or self-insured retentions applicable to the required or any other insurance maintained by the Supplier or its subcontractors. Where permitted by law, Supplier must require similar written express waivers of subrogation and insurance clauses from each of its subcontractors.

E. UMBRELLA/EXCESS LIABILITY/SELF-INSURED RETENTION. The limits required by this Contract can be met by either providing a primary policy or in combination with umbrella/excess liability policy(ies), or self-insured retention.

19. COMPLIANCE

A. LAWS AND REGULATIONS. All Equipment, Products, or Services provided under this Contract must comply fully with applicable federal laws and regulations, and with the laws in the states and provinces in which the Equipment, Products, or Services are sold.

B. LICENSES. Supplier must maintain a valid and current status on all required federal, state/provincial, and local licenses, bonds, and permits required for the operation of the business that the Supplier conducts with Sourcewell and Participating Entities.

20. BANKRUPTCY, DEBARMENT, OR SUSPENSION CERTIFICATION

Supplier certifies and warrants that it is not in bankruptcy or that it has previously disclosed in writing certain information to Sourcewell related to bankruptcy actions. If at any time during this Contract Supplier declares bankruptcy, Supplier must immediately notify Sourcewell in writing.

Supplier certifies and warrants that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Supplier certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this Contract. Supplier further warrants that it will provide immediate written notice to Sourcewell if this certification changes at any time.

21. PROVISIONS FOR NON-UNITED STATES FEDERAL ENTITY PROCUREMENTS UNDER UNITED STATES FEDERAL AWARDS OR OTHER AWARDS

Participating Entities that use United States federal grant or FEMA funds to purchase goods or services from this Contract may be subject to additional requirements including the

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

procurement standards of the Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards, 2 C.F.R. § 200. Participating Entities may have additional requirements based on specific funding source terms or conditions. Within this Article, all references to "federal" should be interpreted to mean the United States federal government. The following list only applies when a Participating Entity accesses Supplier's Equipment, Products, or Services with United States federal funds.

A. EQUAL EMPLOYMENT OPPORTUNITY. Except as otherwise provided under 41 C.F.R. § 60, all contracts that meet the definition of "federally assisted construction contract" in 41 C.F.R. § 60-1.3 must include the equal opportunity clause provided under 41 C.F.R. §60-1.4(b), in accordance with Executive Order 11246, "Equal Employment Opportunity" (30 FR 12319, 12935, 3 C.F.R. §, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and implementing regulations at 41 C.F.R. § 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor." The equal opportunity clause is incorporated herein by reference.

B. DAVIS-BACON ACT, AS AMENDED (40 U.S.C. § 3141-3148). When required by federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. § 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 C.F.R. § 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-federal entity must report all suspected or reported violations to the federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti-Kickback" Act (40 U.S.C. § 3145), as supplemented by Department of Labor regulations (29 C.F.R. § 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-federal entity must report all suspected or reported violations to the federal awarding agency. Supplier must be in compliance with all applicable Davis-Bacon Act provisions.

C. CONTRACT WORK HOURS AND SAFETY STANDARDS ACT (40 U.S.C. § 3701-3708). Where applicable, all contracts awarded by the non-federal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations (29 C.F.R. § 5).

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

Under 40 U.S.C. § 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. § 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence. This provision is hereby incorporated by reference into this Contract. Supplier certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Supplier must comply with applicable requirements as referenced above.

D. RIGHTS TO INVENTIONS MADE UNDER A CONTRACT OR AGREEMENT. If the federal award meets the definition of "funding agreement" under 37 C.F.R. § 401.2(a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or subrecipient must comply with the requirements of 37 C.F.R. § 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency. Supplier certifies that during the term of an award for all contracts by Sourcewell resulting from this procurement process, Supplier must comply with applicable requirements as referenced above.

E. CLEAN AIR ACT (42 U.S.C. § 7401-7671Q.) AND THE FEDERAL WATER POLLUTION CONTROL ACT (33 U.S.C. § 1251-1387). Contracts and subgrants of amounts in excess of $150,000 require the non-federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. § 7401- 7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. § 1251- 1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA). Supplier certifies that during the term of this Contract will comply with applicable requirements as referenced above.

F. DEBARMENT AND SUSPENSION (EXECUTIVE ORDERS 12549 AND 12689). A contract award (see 2 C.F.R. § 180.220) must not be made to parties listed on the government wide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 C.F.R. §180 that implement Executive Orders 12549 (3 C.F.R. § 1986 Comp., p. 189) and 12689 (3 C.F.R. § 1989 Comp., p. 235), "Debarment and Suspension." SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549. Supplier certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency.

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

G. BYRD ANTI-LOBBYING AMENDMENT, AS AMENDED (31 U.S.C. § 1352). Suppliers must file any required certifications. Suppliers must not have used federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Suppliers must disclose any lobbying with non-federal funds that takes place in connection with obtaining any federal award. Such disclosures are forwarded from tier to tier up to the non-federal award. Suppliers must file all certifications and disclosures required by, and otherwise comply with, the Byrd Anti-Lobbying Amendment (31 U.S.C. § 1352).

H. RECORD RETENTION REQUIREMENTS. To the extent applicable, Supplier must comply with the record retention requirements detailed in 2 C.F.R. § 200.333. The Supplier further certifies that it will retain all records as required by 2 C.F.R. § 200.333 for a period of 3 years after grantees or subgrantees submit final expenditure reports or quarterly or annual financial reports, as applicable, and all other pending matters are closed.

I. ENERGY POLICY AND CONSERVATION ACT COMPLIANCE. To the extent applicable, Supplier must comply with the mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act.

J. BUY AMERICAN PROVISIONS COMPLIANCE. To the extent applicable, Supplier must comply with all applicable provisions of the Buy American Act. Purchases made in accordance with the Buy American Act must follow the applicable procurement rules calling for free and open competition.

K. ACCESS TO RECORDS (2 C.F.R. § 200.336). Supplier agrees that duly authorized representatives of a federal agency must have access to any books, documents, papers and records of Supplier that are directly pertinent to Supplier's discharge of its obligations under this Contract for the purpose of making audits, examinations, excerpts, and transcriptions. The right also includes timely and reasonable access to Supplier's personnel for the purpose of interview and discussion relating to such documents.

L. PROCUREMENT OF RECOVERED MATERIALS (2 C.F.R. § 200.322). A non-federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 C.F.R. § 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; procuring

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

M. FEDERAL SEAL(S), LOGOS, AND FLAGS. The Supplier cannot use the seal(s), logos, crests, or reproductions of flags or likenesses of Federal agency officials without specific pre-approval.

N. NO OBLIGATION BY FEDERAL GOVERNMENT. The U.S. federal government is not a party to this Contract or any purchase by a Participating Entity and is not subject to any obligations or liabilities to the Participating Entity, Supplier, or any other party pertaining to any matter resulting from the Contract or any purchase by an authorized user.

O. PROGRAM FRAUD AND FALSE OR FRAUDULENT STATEMENTS OR RELATED ACTS. The Contractor acknowledges that 31 U.S.C. 38 (Administrative Remedies for False Claims and Statements) applies to the Supplier's actions pertaining to this Contract or any purchase by a Participating Entity.

P. FEDERAL DEBT. The Supplier certifies that it is non-delinquent in its repayment of any federal debt. Examples of relevant debt include delinquent payroll and other taxes, audit disallowance, and benefit overpayments.

Q. CONFLICTS OF INTEREST. The Supplier must notify the U.S. Office of General Services, Sourcewell, and Participating Entity as soon as possible if this Contract or any aspect related to the anticipated work under this Contract raises an actual or potential conflict of interest (as described in 2 C.F.R. Part 200). The Supplier must explain the actual or potential conflict in writing in sufficient detail so that the U.S. Office of General Services, Sourcewell, and Participating Entity are able to assess the actual or potential conflict; and provide any additional information as necessary or requested.

R. U.S. EXECUTIVE ORDER 13224. The Supplier, and its subcontractors, must comply with U.S. Executive Order 13224 and U.S. Laws that prohibit transactions with and provision of resources and support to individuals and organizations associated with terrorism.

S. PROHIBITION ON CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE SERVICES OR EQUIPMENT. To the extent applicable, Supplier certifies that during the term of this Contract it will comply with applicable requirements of 2 C.F.R. § 200.216.

T. DOMESTIC PREFERENCES FOR PROCUREMENTS. To the extent applicable, Supplier certifies that during the term of this Contract will comply with applicable requirements of 2 C.F.R. § 200.322.

Docusign Envelope ID: 5F8FB7AD-F93D-4280-A0F3-EB7758A0287D

22. CANCELLATION

Sourcewell or Supplier may cancel this Contract at any time, with or without cause, upon 60 days' written notice to the other party. However, Sourcewell may cancel this Contract immediately upon discovery of a material defect in any certification made in Supplier's Proposal. Cancellation of this Contract does not relieve either party of financial, product, or service obligations incurred or accrued prior to cancellation.

Exhibit A

Notice of Security Interest

Notice Regarding Security Interest and Payment of Purchase Price

1. BMO Harris Bank N.A. or Navistar Capital (collectively, "Bank") financed or will finance the acquisition of each vehicle that Rush Enterprises, Inc. and its subsidiaries ("Rush") will in turn sell to you on deferred payment terms ("Vehicle"). Bank's agreement with Rush requires that Bank's security interest in each Vehicle continue until Bank receives the full amount that Bank financed for such Vehicle. Based on that agreement, your purchase of a Vehicle will be subject to Bank's prior, unrelinquished security interest, which will continue until Bank receives the total amount that Bank financed for such Vehicle.

2. By written notice to you, Bank may require you to pay the purchase price for Vehicles directly to Bank. If you pay any portion of the purchase price for a Vehicle directly to Bank, Rush will credit such payment(s) against the amount you owe to Rush.

Table 2: Company Information and Financial Strength

Line Item	Question	Response *
10	Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested equipment, products or services.	Rush Truck Centers of Texas, L.P. (RTC Texas) is a limited partnership formed in the state of Texas. Rush Truck Centers of Texas, L.P. has two partners: Rushtex, Inc. (a Delaware corporation) is the General Partner and Rushco, Inc. (a Delaware corporation) is the Limited Partner. Rushtex, Inc. and Rushco, Inc. are wholly owned subsidiaries of Rush Enterprises, Inc. Rush Enterprises, Inc. was founded in 1965 with (1) GMC dealership in Houston, Texas. Today we are publicly traded with over (140) locations representing (8) OEMs nationwide. Across those locations Rush Truck Centers employs over 8,000 people helping us to achieve an annual revenue of $7.2B at the close of 2023. Rush Enterprises, is traded on NASDAQ under the symbols RUSHA and RUSHB. Productivity, fairness, positive attitude, excellence, and integrity are the core values that Rush Truck Centers pushes each employee to embody every day. We work to continually make sure that our sales, parts, service & admin teams have any and all tools necessary to accomplish this mission ultimately resulting in the best customer experience possible. At Rush Truck Centers, our business philosophy is to truly create a welcome atmosphere where our industry experts and can help customers purchase equipment and keep their equipment on the road. We aim to do that through top notch customer service, as well as expanding our national dealer network to add more locations to better service our customer base. We are always looking for opportunities to grow and expand.
11	What are your company's expectations in the event of an award?	If awarded, Rush Truck Centers intends to showcase the award to all of our municipal, education and not for profit customers. As our sales, parts & service teams go out and call on this business sector we will use our industry knowledge and experience to provide a single source solution option to the customer base. The capability of bringing the ease of purchase through the Sourcewell contract with the customer base while offering Rush's top tier industry experience will make this a win win for any of our clients.
12	Demonstrate your financial strength and stability with meaningful data. This could include such items as financial statements, SEC filings, credit and bond ratings, letters of credit, and detailed reference letters. Upload supporting documents (as applicable) in the document upload section of your response.	Rush Truck Centers is publicly traded on the Nasdaq, in 2023 Rush Enterprises reported $7.92B in revenue. We have attached our most recent SEC filing in the document upload section.
13	What is your US market share for the solutions that you are proposing?	The overall market share in 2023 for Rush Truck Centers was 6.2% of the Class 8 US Truck Market and 5.7% of the Class 4-7 US Truck Market.
14	What is your Canadian market share for the solutions that you are proposing?	Rush Truck Centers is not currently proposing a solution for the Canadian market.
15	Has your business ever petitioned for bankruptcy protection? If so, explain in detail.	No
16	How is your organization best described: is it a manufacturer, a distributor/dealer/reseller, or a service provider? Answer whichever question (either a) or b) just below) best applies to your organization. a) If your company is best described as a distributor/dealer/reseller (or similar entity), provide your written authorization to act as a distributor/dealer/reseller for the manufacturer of the products proposed in this RFP. If applicable, is your dealer network independent or company owned? b) If your company is best described as a manufacturer or service provider, describe your relationship with your sales and service force and with your dealer network in delivering the products and services proposed in this RFP. Are these individuals your employees, or the employees of a third party?	Rush Truck Centers is best described as a distributor/dealer/reseller for this proposal. Rush is a contracted franchisee of the specific manufacturers represented on this proposal.
17	If applicable, provide a detailed explanation outlining the licenses and certifications that are both required to be held, and actually held, by your organization (including third parties and subcontractors that you use) in pursuit of the business contemplated by this RFP.	The Rush entities listed in item 2 are licensed in each applicable state as a representative of the manufacturers presented in this proposal. In addition, we have franchise contracts in place with each of the manufacturers on this proposal.
18	Provide all "Suspension or Debarment" information that has applied to your organization during the past ten years.	Does not apply.

Table 3: Industry Recognition & Marketplace Success

Line Item	Question	Response *
19	Describe any relevant industry awards or recognition that your company has received in the past five years	Rush Truck Centers has been recognized by each of the manufacturers represented for performance and customer service levels.
20	What percentage of your sales are to the governmental sector in the past three years	Approximately 15%, market dependent.
21	What percentage of your sales are to the education sector in the past three years	Approximately 5%, market dependent.
22	List any state, provincial, or cooperative purchasing contracts that you hold. What is the annual sales volume for each of these contracts over the past three years?	Buyboard both State & National & H-GAC comprise between 250-350 units per year for an annual revenue in 2023 of $39.5MM.
23	List any GSA contracts or Standing Offers and Supply Arrangements (SOSA) that you hold. What is the annual sales volume for each of these contracts over the past three years?	Rush does not have any formal contracts in place with the GSA.

Table 4: References/Testimonials

Line Item 24. Supply reference information from three customers who are eligible to be Sourcewell participating entities.

Entity Name *	Contact Name *	Phone Number *	
City of Austin, Texas	Janet Opheim	(512) 978-2634	*
City of Euless, Texas	Kyle McAdams	(817) 685-1598	*
City of DeSoto, Texas	Wade Williams	(972) 230-5714	*
City of Cedar Hill, Texas	Kenneth Atkins	(972) 291-5126 ext. 2840	
City of Houston, Texas	Daniel Davis	(281) 740-8030	

Table 5: Top Five Government or Education Customers

Line Item 25. Provide a list of your top five government, education, or non-profit customers (entity name is optional), including entity type, the state or province the entity is located in, scope of the project(s), size of transaction(s), and dollar volumes from the past three years.

Entity Name	Entity Type *	State / Province *	Scope of Work *	Size of Transactions *	Dollar Volume Past Three Years *	
City of Austin	Government	Texas - TX	Provided chassis and bodied up equipment to the City of Austin.	108	$21,700,396.98	*
City of Phoenix	Government	Arizona - AZ	Provided chassis and bodied up equipment to the City of Phoenix.	86	$28,355,662.56	*
Virginia Department of Transportation	Government	Virginia - VA	Provided chassis and bodied up equipment to the Virginia Department of Transportation.	110	$18,650,715.50	*
Illinois Department of Transportation	Government	Illinois - IL	Provided chassis and bodied up equipment to the to the Illinoi Department of Transportation.	104	$14,934,920.93	*
Ohio Department of Transportation	Government	Ohio - OH	Provided chassis and bodied up equipment to the Ohio Department of Transportation.	78	$8,835,185.02	*

Table 6: Ability to Sell and Deliver Service

Describe your company's capability to meet the needs of Sourcewell participating entities across the US and Canada, as applicable.

Your response should address in detail at least the following areas: locations of your network of sales and service providers, the number of workers (full-time equivalents) involved in each sector, whether these workers are your direct employees (or employees of a third party), and any overlap between the sales and service functions.

Line Item	Question	Response *	
26	Sales force.	Rush Truck Centers has a nationwide truck sales staff of approximately 275 people who maintain direct contact with our customers. The sales team is supported by a team within each dealership that handles finance, title work, as well as other administrative duties so that the sales team can stay customer focused. Rush Truck Centers also maintains very close relationships with our vendors to provide new and used vehicles, as well as parts & service solutions to our customer base. This includes organizations like Knapheide Manufacturing, Federal Signal, Wabash, Morgan Corporation, and Reading Truck Body to name a few.	*
27	Dealer network or other distribution methods.	With over 140 locations across the nation, Rush's capability to service customers in the U.S. is unparalleled in the industry. Rush Truck Centers maintains $350MM in on hand parts inventory nationwide. This provides the ability the move parts across the nation between our locations as needed. Beyond that, being a Hino, Dennis Eagle, Ford & Isuzu franchised dealer we also have the ability to utilize the overall OEM dealer network for warranty repairs & service should occasion call for it.	*
28	Service force.	Rush Truck Centers alone currently has over 1,400 technicians nationwide and over 350 outside parts and service personnel that actively work to keep our customer's equipment on the road. At Rush we work tirelessly to make sure that our technicians/service teams have the most up to date training, equipment, and tooling in an effort to minimize customer down time. Outside of the Rush dealer network, we also maintain very close relationships with our OEMs to make sure that our customers can be serviced anywhere in the nation.	*
29	Describe the ordering process. If orders will be handled by distributors, dealers or others, explain the respective roles of the Proposer and others.	Rush Truck Centers believes in a boots on the ground approach. We task our sales, parts & service teams to actively call on customers to understand their business and to provide solutions for the issues that they have. When a member of the sales team gains an opportunity to quote a Sourcewell member, the local salesperson will gather all of the details, and build a spec that will best work for the customer based on the customer's needs. If there is a need for a body or upfit, Rush will engage our partners to facilitate the request or work with the customer's requested upfitter. From there the local representative will work with our corporate team to build a Sourcewell compliant quote for the customer. Once approved for purchase and a P.O. is received, Rush will process the P.O. immediately and will work to get the unit/part or service requested delivered as quickly as possible.	*
30	Describe in detail the process and procedure of your customer service program, if applicable. Include your response-time capabilities and commitments, as well as any incentives that help your providers meet your stated service goals or promises.	Rush Truck Centers prides itself in being timely. Our sales, parts and service teams will work to get quotes back from vendors and make sure that the customer has the final numbers as quickly as possible. We utilize our preferred vendor partnerships to maintain the shortest lead times possible for both quotes and deliveries. During the purchasing process our sales, parts and service teams will work to keep the customer informed of unit's status as it moves through the various stages of completion prior to delivery. Using our customer first philosophy we strive to provide the best customer service in the industry.	*
31	Describe your ability and willingness to provide your products and services to Sourcewell participating entities in the United States.	Rush Truck Centers is prepared to offer products and services nationwide. We have a national account presence with several large fleets that operate equipment across the United States. Rush Truck Centers intends to use that same business model to service Sourcewell clients regardless of their geographical location in the United States. Primarily utilizing the more than 2,000 sales, parts and service personnel that are employed by Rush Truck Centers nationwide.	*
32	Describe your ability and willingness to provide your products and services to Sourcewell participating entities in Canada.	At this time, we are not prepared to expand these proposed solutions into Canada.	*
33	Identify any geographic areas of the United States or Canada that you will NOT be fully serving through the proposed contract.	Rush is uniquely positioned to service all government, education, and not for profit customers in the United States. Each customer will be taken care of by one of our industry experts depending on their geographic location and need.	*
34	Identify any Sourcewell participating entity sectors (i.e., government, education, not-for-profit) that you will NOT be fully serving through the proposed contract. Explain in detail. For example, does your company have only a regional presence, or do other cooperative purchasing contracts limit your ability to promote another contract?	Except for the Federal government, as discussed below, Rush Truck Centers is willing to serve all participating entity sectors. As we currently hold Buyboard & H-GAC contracts, we do not have any type of exclusivity agreement in place. Rush's presence is national, and our goal is to serve every customer possible in the United States. Being awarded the Sourcewell contract would open another avenue for Rush Truck Centers to do just that. Regarding the Federal government, our ability to serve Federal agencies will be determined by Rush on a case-by-case as there may be certain Federal requirements that Rush or its suppliers cannot meet.	*
35	Define any specific contract requirements or restrictions that would apply to our participating entities in Hawaii and Alaska and in US Territories.	Logistical/Transportation cost will be a limiting factor. As equipment is moved to ports, there are loading fees, freight costs, and other logistical expenses that would be incurred to deliver units to Alaska, Hawaii and other U.S. Territories. These costs would of course need to be factored into sales price of the vehicle during the quote process.	*

Table 7: Marketing Plan

Line Item	Question	Response *
36	Describe your marketing strategy for promoting this contract opportunity. Upload representative samples of your marketing materials (if applicable) in the document upload section of your response.	Our marketing strategy is multifaceted. We rely heavily on digital marketing through our website, e-blast, social media platforms to reach our customer base. While also using more traditional forms of marketing such as mailers, print adds in magazines, NASCAR sponsorships, even wrapping our mobile trucks as well as many other media to ensure we are reaching as many prospects as possible. This broad-spectrum approach is ultimately anchored by our most important asset, our people, that ensure that the personal touch and support remain in the sales process with our customers while delivering the message of the capabilities that Rush Truck Centers has to offer. We have found that through this process we reach a relatively broad demographic of clientele creating a well-diversified portfolio of customers.
37	Describe your use of technology and digital data (e.g., social media, metadata usage) to enhance marketing effectiveness.	Rush Truck Centers uses a host of social media platforms to reach new/prospective clients. Platforms such as LinkedIn, Facebook, and others allow us to both reach out to customers directly via direct message as well as through broader marketing strategies such as government/educational/not for profit specific posts. We also monitor comments and messages on these platforms to either facilitate requests or respond to questions that clients may have. The goal of our marketing campaigns is to maximize click through. Rush has found that offering a more targeted marketing approach offers the best results where even our e-blasts are tailored to the business segment we serve. This approach ensures that our message is relevant to the specific clients that we are targeting.
38	In your view, what is Sourcewell's role in promoting contracts arising out of this RFP? How will you integrate a Sourcewell-awarded contract into your sales process?	Sourcewell is a very well known purchasing cooperative entity and is trusted by many of the municipal and not for profit organizations in the U.S.. If awarded, Rush intends to showcase the award to all of our clients through email campaigns, trade shows, in person meetings, as well as through our vendor relationships. In short, Sourcewell's members trust the cooperative and are loyal. Rush aims to build upon the brand recognition Sourcewell brings through communication with our industry experts, highlighting our complete offering of service capabilities. Allowing Sourcewell members to work with our industry experts for their fleet needs, while offering customers the flexibility of purchasing through a cooperative contract. Rush Enterprises goal if awarded is to combined Sourcewell (one of the largest purchasing cooperative in the nation) with the largest commercial truck dealer group in the nation to provide single source solutions to as many government, education and not for profit entities as possible.
39	Are your products or services available through an e-procurement ordering process? If so, describe your e-procurement system and how governmental and educational customers have used it.	Due to the variance in specifications in the vehicles that we provide, Rush prefers each client request be handled by one of our industry experts to ensure the right product is provided for the application. This approach allows Rush to have more interaction with the customer to offer solutions that they may not know is available to them. Our sales teams are trained to be solution minded and to make sure we offer customers all potential solutions that we feel may help their business, this is best accomplished with personal interaction. In support of this customer base, we do offer an ecommerce solution to sourcing parts and receiving service from our locations aross the United States. This customer-based solutions allows for comprehensive parts pricing, sourcing, and research. In addition we offer an extensive service incident management platform for managing vehicles that are being serviced and repaired in our dealerships. Real-time status updates, estimate review and approval, and historical repair reference are just some of the features of this platform that are available to Sourcewell members to assist with their fleet management.

Table 8: Value-Added Attributes

Line Item	Question	Response *
40	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	Rush works closely with our original equipment manufacturers as well as body upfitters and vendors to provide a comprehensive training strategy for vehicles and equipment provided. These programs are tailored to meet the specific needs of the Sourcewell member and will be developed as requested. Any associated costs for this training will be discussed upfront after maximizing support from all involved.
41	Describe any technological advances that your proposed products or services offer.	Working in concert with our represented OEM's in advancing fleet management technologies, Rush Truck Centers works to simplify the application of these technologies for the Sourcewell member. Through the development of our RushCare system, we offer real-time communication platforms that are often communicating with the technologies incorporated in the equipment provided. Monitored by our 24/7 call center, we aid customers in predictive incident and preventative maintenance of their fleets. Through our dedicated telematics division, Rush remains on the forefront of new and emerging technologies ensuring maximum uptime for our customers and solutions for their fleet needs.
42	Describe any "green" initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	Being a leader in emerging technologies, Rush again led the industry in the adoption of alternate-fuel vehicles and environmentally-focused dealer operations. This was evident of the early development of it's own CNG fuel systems, incorporating them into the vehicles provided to simarly-minded customers. It continues with the dedication to the electric initiatives in support of the adoption of these vehicles in the market by providing battery charging stations at our facilities, supported by solar panel based energy storage and delivery systems. In fact, the dedication to this initiative is evident by operating electric vehicles in our own delivery fleet. Our commitment to these environmental-based technologies will remain a focus and will continue to expand as more opportunities arise.
43	Identify any third-party issued eco-labels, ratings or certifications that your company has received for the equipment or products included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.	Ratings and certifications for the products included in the proposal are typically attained and managed at the original equipment manufacturer level. As a distributor that represents these manufacturers, we fully support the initiatives set forth to accomplish and maintain these sustainability recognitions.
44	Describe any Women or Minority Business Entity (WMBE), Small Business Entity (SBE), or veteran owned business certifications that your company or HUB partners have obtained. Upload documentation of certification (as applicable) in the document upload section of your response.	Rush Truck Centers does not hold any of these certifications.
45	What unique attributes does your company, your products, or your services offer to Sourcewell participating entities? What makes your proposed solutions unique in your industry as it applies to Sourcewell participating entities?	Being the largest commercial truck dealer group in the nation, Rush Truck Centers offers an expansive sales, parts, service and administrative team that offers top tier customer service. We pride ourselves on being a dedicated commercial dealer group that has extensive knowledge of commercial vehicle capabilities along with the industry expertise that our body/upfit partners provide. Clients will have a wealth of industry knowledge at their disposal while working with our expert teams.

Table 9A: Warranty

Describe in detail your manufacturer warranty program, including conditions and requirements to qualify, claims procedure, and overall structure.

You may upload representative samples of your warranty materials (if applicable) in the document upload section of your response in addition to responding to the questions below.

Line Item	Question	Response *	
46	Do your warranties cover all products, parts, and labor?	All product warranty coverages in reference to this proposal are provided to the end user by the original equipment manufacturer or upfitter. We have attached copies of the standard warranty coverage for each OEM that we are offering on this proposal.	*
47	Do your warranties impose usage restrictions or other limitations that adversely affect coverage?	Each OEM warranty has different usage restrictions and limitations. We have attached the standard warranty coverage for each of the manufacturers we are offering on this proposal.	*
48	Do your warranties cover the expense of technicians' travel time and mileage to perform warranty repairs?	Case dependent; typically the warranty coverage offered by the OEM does not include travel or mileage if mobile service is requested. Any associated costs with these services will be presented prior to any services being performed. In terms of towing, some OEMs will cover the expense of a tow into the closest factory certified warranty facility if the unit is undrivable.	*
49	Are there any geographic regions of the United States or Canada (as applicable) for which you cannot provide a certified technician to perform warranty repairs? How will Sourcewell participating entities in these regions be provided service for warranty repair?	Any potential geographic restrictions will be discussed with the client at the time of quote to ensure that the vehicle can be properly serviced and maintained for the Sourcewell member. We will work to spec equipment that maximizes operating capability, but also maximizes access to service support for the client whether through the OEM network or our network of Rush Enterprises locations.	*
50	Will you cover warranty service for items made by other manufacturers that are part of your proposal, or are these warranties issues typically passed on to the original equipment manufacturer?	All warranty coverage is passed on from the OEM.	*
51	What are your proposed exchange and return programs and policies?	Rush Truck Centers does not offer an exchange or return policy.	*
52	Describe any service contract options for the items included in your proposal.	Extended service contracts are offered through OE programs as well as from Rush through our third-party partners. However, these extended service contracts are somewhat customizable and need to be discussed, quoted and evaluated with each client on a case-by-case basis.	*

Table 10: Payment Terms and Financing Options

Line Item	Question	Response *	
53	Describe your payment terms and accepted payment methods.	Rush Truck Centers does offer NET30 terms from the date of delivery (upon credit risk approval by the Rush credit team).	*
54	Describe any leasing or financing options available for use by educational or governmental entities.	Rush Enterprises does offer municipal leasing and financing options through our third-party lending partners. At the time the vehicle is quoted we will gladly review these options with Sourcewell members to find the best option for them. Any leasing or financing terms would be agreed to separately by the customer and the leasing/financing company.	*
55	Describe any standard transaction documents that you propose to use in connection with an awarded contract (order forms, terms and conditions, service level agreements, etc.). Upload a sample of each (as applicable) in the document upload section of your response.	Rush Truck Centers requires a Retail Sales Order, Delivery Receipt, and a CARB Attestation form. The State of Attestation/Domicile form is required by Rush to be signed by the customer to make sure that non-California compliant trucks ultimately won't registered or primarily operated in the State of California due to new CARB, ACT, ACF, and Low Nox Omnibus regulations. Other forms may include warranty start forms depending on the OEM.	*
56	Do you accept the P-card procurement and payment process? If so, is there any additional cost to Sourcewell participating entities for using this process?	Rush Truck Centers does except P-cards for payment on parts and service without a credit card processing fee.	*

Table 11: Pricing and Delivery

Provide detailed pricing information in the questions that follow below. Keep in mind that reasonable price and product adjustments can be made during the term of an awarded Contract as described in the RFP, the template Contract, and the Sourcewell Price and Product Change Request Form.

Line Item	Question	Response *	
57	Describe your pricing model (e.g., line-item discounts or product-category discounts). Provide detailed pricing data (including standard or list pricing and the Sourcewell discounted price) on all of the items that you want Sourcewell to consider as part of your RFP response. If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	Rush Truck Centers will offer a discount off of List/MSRP for 3 of the 4 OEMs included in this proposal, the OEM that will not show a discount off of pricing is Dennis Eagle which does not have a List Price or MSRP. In the case of Dennis Eagle, the pricing shown is the Sourcwell member's price before any volume discounts are applied. Please note this is for the chassis only as any upfit that is requested or needed will need to be added to the quote to provide a complete price for the customer.	*
58	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	Rush Truck Centers is prepared to offer the following minimum discount range off of List/MSRP per OEM: Ford Motor Company: 1.50% to 7.00% Hino: 10% to 15% Isuzu: 10% to 15%" Dennis Eagle: 0% as Dennis Eagle does not have a List/MSRP	*
59	Describe any quantity or volume discounts or rebate programs that you offer.	Any Sourcewell member looking to purchase 10 or more units, please contact us for additional price concession.	*
60	Propose a method of facilitating “sourced” products or related services, which may be referred to as “open market” items or “nonstandard options”. For example, you may supply such items “at cost” or “at cost plus a percentage,” or you may supply a quote for each such request.	Products or Goods sourced through open market channels will be quoted with additional markup not to exceed 15% of the MSRP of the goods Products or Goods quoted to Rush Truck Centers.	*
61	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	From a chassis perspective we have included all applicable charges in our attached pricing list. If there is a specific need, training or special installation we will include that with the upfit portion of the quote to the Sourcwell members.	*
62	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	Some of the OEMs allow for courtesy delivery by other dealers in the OEM dealer network to minimize any additional freight cost. If this resource is available through the specific OEM quoted, or if the equipment quoted doesn't require any upfit and we're able to ship directly to the end user from the factory we will certainly do so. However, if the unit requires additional equipment to be added or an upfit prior to delivery then there will be freight cost incurred to move the unit from the body company to the dealership or its final destination.	*
63	Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, Canada, or any offshore delivery.	Shipping to Alaska, Hawaii, Canada and other off shore entities present several logistical hurdles that will require additional expense such as port fees, loading fees, etc.. These additional expenses will be listed out on the customer's quote for their review.	*
64	Describe any unique distribution and/or delivery methods or options offered in your proposal.	In addition to working with the franchised dealer network of the represented OEMs, Rush will utilize its extensive network of dealerships to optimize delivery to the Sourcewell member while minimizing associated costs.	*

Table 12: Pricing Offered

Line Item	The Pricing Offered in this Proposal is: *	Comments
65	c. better than the Proposer typically offers to GPOs, cooperative procurement organizations, or state purchasing departments.	Rush Truck Centers is offering Sourcewell pricing that is more aggressive than we've priced on other cooperative contracts.

Table 13: Audit and Administrative Fee

Line Item	Question	Response *	
66	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed Contract with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing, that the Vendor reports all sales under the Contract each quarter, and that the Vendor remits the proper administrative fee to Sourcewell. Provide sufficient detail to support your ability to report quarterly sales to Sourcewell as described in the Contract template.	Rush Truck Centers has a strict self-audit process in place to help ensure compliance to not only company policy and procedures, but also to requirements of contracts with our customer base. This oversight is provided by our internal audit staff in our accounting department as well as auditors from our Ethics and Compliance division based at corporate headquarters. The Rush Sales Operations group will also help ensure compliance with the business requirements of the contract in place as well as providing reporting based on the terms requested in the contract.	*
67	If you are awarded a contract, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the contract.	This Sales Operation Team will track the performance of the contract in place. While using a broad distribution model to approach this opportunity, the management of the contract will be handled centrally by the responsible representative assigned to the contract with senior leadership oversight. Extensive reporting tools are in place to assist with this management.	*
68	Identify a proposed administrative fee that you will pay to Sourcewell for facilitating, managing, and promoting the Sourcewell Contract in the event that you are awarded a Contract. This fee is typically calculated as a percentage of Vendor’s sales under the Contract or as a per-unit fee; it is not a line-item addition to the Member’s cost of goods. (See the RFP and template Contract for additional details.)	Rush is prepared to offer a per unit fee of: $400.00 for all units class 3-5 $750.00 for all units class 6-8	*

Table 14A: Depth and Breadth of Offered Equipment Products and Services

Proposers submitting a proposal in Category 1 as defined herein will be submitting in the broad category that includes all types of engines, fuel, and propulsion systems. For example, if a Proposer offers chassis and cabs with Internal Combustion Engines (ICE) as well as chassis and cabs with electric propulsion systems the Proposer should designate it is seeking an award in Category 1 **only**. Proposers seeking an award in Category 2, as defined herein, must include at least one solution offered within the scope of Category 2 for electric propulsion systems **only**.

Line Item	Category Selection *	
69	Category 1: All engines, fuel, and propulsion type chassis and cabs	*

Table 14B: Depth and Breadth of Offered Equipment Products and Services

Line Item	Question	Response *	
70	Provide a detailed description of the equipment, products, and services that you are offering in your proposal.	Rush Truck Centers is offering (4) OEMs on this proposal comprising of (39) individual models with even more specific order codes under each model. We are also offering a range of upfit options from spray in bed liners and toolboxes to service bodies, refuse equipment and sewer inspection equipment. To provide a complete solution to meet the customer's needs Rush Enterprises will work with our extensive list of vendors and even work with vendors specifically requested by the Sourcewell member (once approved by Rush Truck Centers risk team).	*
71	Within this RFP category there may be subcategories of solutions. List subcategory titles that best describe your products and services.	Our subcategories will be broken down by Make, Model, and trim level (where applicable).	
72	Describe any manufacturing processes or materials utilized that contribute to chassis strength, cab strength, overall durability, driver safety.	Rush Truck Centers has the utmost confidence in the manufacturers we represent to produce the highest quality products available on the market.	
73	Describe any differentiating serviceability attributes (remote diagnostics, etc.) your proposal offers.	As detailed above, Rush Truck Centers offers a unique business case to Sourcewell members. Its network and forward-looking approach to solutions technologies positions Rush to offer products and services at a customizable-level to meet any transportation need proposed. Between the tools developed and available to the Sourcewell member base and the team of experts assembled to provide the solutions, Rush is a differentiator in the industry. Whether it be the widely available, pre-upfitted quick delivery inventory of vehicles, extensive and diverse parts inventory, or available service bays at our state-of-the-art facilities supported by a fleet of 600+ mobile service technicians, Rush Truck Centers is prepared to offer solutions to Sourcewell members.	

Table 15: Category 1 - Depth and Breadth of Offered Equipment Products and Services

Indicate below if the listed types or classes of equipment, products, and services are offered within your proposal. Provide additional comments in the text box provided, as necessary.

Proposers submitting a proposal in Category 1 will be submitting in the broad category that includes all types of engines, fuel, and propulsion systems. See RFP Section II. B. 1 for details.

☐ We will not be submitting for Table 15: Category 1 - Depth and Breadth of Offered Equipment Products and Services

Line Item	Category or Type	Offered *	Chassis Type (ICE and/or BEV)	Comments	
74	Class 4 chassis	◉ Yes ○ No	Internal Combustion Engine fuel types (ICE)	The OEMs Rush is offering currently only offer ICE solutions for the class 4 space.	*
75	Class 5 chassis	◉ Yes ○ No	Both Chassis Types (ICE and BEV)	None of the OEMs Rush is offering currently offer BEV solutions for the class 5 space. However, Isuzu is releasing a BEV class 5 that is projected to be available in 2025. We are looking to offer that product once pricing is published and able to be ordered.	*
76	Class 6 chassis	◉ Yes ○ No	Internal Combustion Engine fuel types (ICE)	None of the OEMs Rush is offering currently offer BEV solutions for the class 6 space. Although Hino is projecting to announce a class 7 BEV in 2025 at which time we will work with Sourcwell to have the product added to the contract.	*
77	Class 7 chassis	◉ Yes ○ No	Internal Combustion Engine fuel types (ICE)	None of the OEMs Rush is offering currently offer BEV solutions for the class 7 space. Although Hino is projecting to announce a class 7 BEV in 2025 at which time we will work with Sourcwell to have the product added to the contract.	*
78	Class 8 chassis	◉ Yes ○ No	Internal Combustion Engine fuel types (ICE)	None of the OEMs Rush is offering on this proposal offer BEV solutions for the class 8 space.	*
79	Related equipment, accessories, parts, upfitting, services, used chassis and Class 3 chassis	◉ Yes ○ No	Both Chassis Types (ICE and BEV)	Through Ford Rush is offering both ICE & BEV on the Transit T-250 & T-350 in the class 3 space. The Super Duty line, more specifically F-250 & F-350 are offered as ICE only.	

Table 16: Category 2 - Depth and Breadth of Offered Equipment Products and Services

Indicate below if the listed types or classes of equipment, products, and services are offered within your proposal. Provide additional comments in the text box provided, as necessary.

Proposers seeking an award in Category 2, as defined herein, must include at least one solution offered within the scope of Category 2 for electric propulsion systems **only**. See RFP Section II. B. 1 for details.

☐ We will not be submitting for Table 16: Category 2 - Depth and Breadth of Offered Equipment Products and Services

Line Item	Category or Type	Offered *	Comments
80	Battery Electric Vehicle (BEV) Class 4 Chassis	○ Yes ◉ No	Rush Truck Centers is not offering an OEM that has a BEV vehicle for the class 4 space.
81	Battery Electric Vehicle (BEV) Class 5 Chassis	◉ Yes ○ No	Isuzu is looking to offer a BEV class 5 unit towards the end of 2024/beginning of 2025. Although pricing isn t currently available, once made available to Rush Truck Centers, we intend to work with Sourcewell to have this model added to the contract.
82	Battery Electric Vehicle (BEV) Class 6 Chassis	○ Yes ◉ No	Rush Truck Centers is not offering an OEM that has a BEV vehicle for the class 6 space on.
83	Battery Electric Vehicle (BEV) Class 7 Chassis	○ Yes ◉ No	Rush Truck Centers is not offering an OEM that has a BEV vehicle for the class 7 space.
84	Battery Electric Vehicle (BEV) Class 8 Chassis	○ Yes ◉ No	Rush Truck Centers is not offering an OEM that has a BEV vehicle for the class 8 space.
85	Related equipment, accessories, parts, upfitting, services, used chassis and Class 3 chassis	◉ Yes ○ No	Rush Truck Centers is offering the Ford E-Transit line which we are offering on this proposal.

Exceptions to Terms, Conditions, or Specifications Form

Only those Proposer Exceptions to Terms, Conditions, or Specifications that have been accepted by Sourcewell have been incorporated into the contract text.

Documents

Ensure your submission document(s) conforms to the following:

1. Documents in PDF format are preferred. Documents in Word, Excel, or compatible formats may also be provided.

2. Documents should NOT have a security password, as Sourcewell may not be able to open the file. It is your sole responsibility to ensure that the uploaded document(s) are not either defective, corrupted or blank and that the documents can be opened and viewed by Sourcewell.

3. Sourcewell may reject any response where any document(s) cannot be opened and viewed by Sourcewell.

4. If you need to upload more than one (1) document for a single item, you should combine the documents into one zipped file. If the zipped file contains more than one (1) document, ensure each document is named, in relation to the submission format item responding to. For example, if responding to the Marketing Plan category save the document as "Marketing Plan."

Addenda, Terms and Conditions

PROPOSER AFFIDAVIT AND ASSURANCE OF COMPLIANCE

I certify that I am the authorized representative of the Proposer submitting the foregoing Proposal with the legal authority to bind the Proposer to this Affidavit and Assurance of Compliance:

1. The Proposer is submitting this Proposal under its full and complete legal name, and the Proposer legally exists in good standing in the jurisdiction of its residence.
2. The Proposer warrants that the information provided in this Proposal is true, correct, and reliable for purposes of evaluation for contract award.
3. The Proposer, including any person assisting with the creation of this Proposal, has arrived at this Proposal independently and the Proposal has been created without colluding with any other person, company, or parties that have or will submit a proposal under this solicitation; and the Proposal has in all respects been created fairly without any fraud or dishonesty. The Proposer has not directly or indirectly entered into any agreement or arrangement with any person or business in an effort to influence any part of this solicitation or operations of a resulting contract; and the Proposer has not taken any action in restraint of free trade or competitiveness in connection with this solicitation. Additionally, if Proposer has worked with a consultant on the Proposal, the consultant (an individual or a company) has not assisted any other entity that has submitted or will submit a proposal for this solicitation.
4. To the best of its knowledge and belief, and except as otherwise disclosed in the Proposal, there are no relevant facts or circumstances which could give rise to an organizational conflict of interest. An organizational conflict of interest exists when a vendor has an unfair competitive advantage or the vendor's objectivity in performing the contract is, or might be, impaired.
5. The contents of the Proposal have not been communicated by the Proposer or its employees or agents to any person not an employee or legally authorized agent of the Proposer and will not be communicated to any such persons prior to Due Date of this solicitation.
6. If awarded a contract, the Proposer will provide to Sourcewell Participating Entities the equipment, products, and services in accordance with the terms, conditions, and scope of a resulting contract.
7. The Proposer possesses, or will possess before delivering any equipment, products, or services, all applicable licenses or certifications necessary to deliver such equipment, products, or services under any resulting contract.
8. The Proposer agrees to deliver equipment, products, and services through valid contracts, purchase orders, or means that are acceptable to Sourcewell Members. Unless otherwise agreed to, the Proposer must provide only new and first-quality products and related services to Sourcewell Members under an awarded Contract.
9. The Proposer will comply with all applicable provisions of federal, state, and local laws, regulations, rules, and orders.
10. The Proposer understands that Sourcewell will reject RFP proposals that are marked "confidential" (or "nonpublic," etc.), either substantially or in their entirety. Under Minnesota Statutes Section 13.591, subdivision 4, all proposals are considered nonpublic data until the evaluation is complete and a Contract is awarded. At that point, proposals become public data. Minnesota Statutes Section 13.37 permits only certain narrowly defined data to be considered a "trade secret," and thus nonpublic data under Minnesota's Data Practices Act.
11. Proposer its employees, agents, and subcontractors are not:
    1. Included on the "Specially Designated Nationals and Blocked Persons" list maintained by the Office of Foreign Assets Control of the United States Department of the Treasury found at: https://www.treasury.gov/ofac/downloads/sdnlist.pdf;
    2. Included on the government-wide exclusions lists in the United States System for Award Management found at: https://sam.gov/SAM/; or
    3. Presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this solicitation.

☑ By checking this box I acknowledge that I am bound by the terms of the Proposer's Affidavit, have the legal authority to submit this Proposal on behalf of the Proposer, and that this electronic acknowledgment has the same legal effect, validity, and enforceability as if I had hand signed the Proposal. This signature will not be denied such legal effect, validity, or enforceability solely because an electronic signature or electronic record was used in its formation. - Whitt Michael, Senior of Medium Duty Sales, Rush Truck Centers of Texas, LP

The Proposer declares that there is an actual or potential Conflict of Interest relating to the preparation of its submission, and/or the Proposer foresees an actual or potential Conflict of Interest in performing the contractual obligations contemplated in the bid.

City Council **AGENDA ITEM NO. L6.**

DATE: June 2, 2026

TO: Honorable Mayor and City Council Members

SUBJECT: Consideration of a cooperative purchase of a 623 Scraper from Caterpillar Inc., in the amount of $1,346,837.80 (Facilities and Community Services Department Director Crocker)

MOTION:

If the City Council determines that staff's recommendation is appropriate, the following motion is provided:

I move to approve the cooperative purchase of a 623 Scraper from Caterpillar Inc., Equipment Identification No. GL8C95, in the amount of $1,346,837.80.

RECOMMENDATION:

Staff recommends that the City Council approve the cooperative purchase of a 623 scraper from Caterpillar Inc., in the amount $1,346,837.80.

DISCUSSION:

The City of Redlands relies on a 623 scraper at the City Landfill for daily operations, Equipment Identification No. GL8C95 (EIN GL8C95), where it plays a critical role in ongoing site management. The City's existing scraper, a 1990 model now approximately 37 years old, no longer meets compliance standards established by the California Air Resources Board (CARB).

The 623 scraper is essential for efficiently hauling and placing soil for daily cover, which is necessary to control odors, reduce fire risk and prevent erosion. In addition, it supports key landfill functions including capping, subsidence repair, and the construction and maintenance of slopes and landfill cells. Use of a compliant scraper is necessary to maintain effective soil management and ensure adherence to environmental and operational regulations.

The proposed purchase of a CAT 623 Scraper is consistent with the City's procurement policies for cooperative purchasing through Sourcewell. Sourcewell contracts are competitively solicited and awarded, allowing participating agencies to leverage pre-established pricing and terms from a large network of government, education, and nonprofit entities. Staff recommends utilizing Sourcewell contract No. 011723-CAT with Caterpillar Inc., which complies with the City's procurement requirements.

Replacement of the existing scraper is critical to maintaining compliance with California Air Resources Board (CARB) regulations while ensuring the continued efficiency and reliability of landfill operations. Approval of the cooperative purchase will allow the City to obtain necessary equipment in a cost-effective and compliant manner, supporting both operational needs and regulatory obligations.

ALTERNATIVES:

City Council may elect not to approve the purchase; however, this would adversely affect the Solid Waste Division operations and may result in continued non-compliance with CARB requirements.

STRATEGIC PLAN:

Supports Priority D - Sustainability.

SUBMITTED BY:
Tabitha Crocker, Facilities & Community Services Director

RECOMMENDED BY:
Charles M. Duggan Jr., City Manager

REVIEWED BY:
Yvette M. Abich Garcia, City Attorney
Janice McConnell, Assistant City Manager
James Garland, Interim Management Services/Finance Director
Dana Abramovitz-Daniel, Procurement Manager

PREPARED BY:
Marion Cronin, Administrative Analyst

FISCAL IMPACT

Fiscal Year: FY 2025-26

Revenue Generating: No

Amount: $1,346,837.80

Budgeted Y/N: Yes

Account No.: 511910-8704

Additional Appropriation Required: No

Discussion:

Sufficient funding for this purchase is included in the Solid Waste's Project Division's FY 2025-26 Budget.

Solicitation Number: RFP # 011723

CONTRACT

This Contract is between Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 (Sourcewell) and **Caterpillar Inc.**, 100 NE Adams Street, Peoria, IL 61629 (Supplier).

Sourcewell is a State of Minnesota local government unit and service cooperative created under the laws of the State of Minnesota (Minnesota Statutes Section 123A.21) that offers cooperative procurement solutions to government entities. Participation is open to eligible federal, state/province, and municipal governmental entities, higher education, K-12 education, nonprofit, tribal government, and other public entities located in the United States and Canada. Sourcewell issued a public solicitation for **Heavy Construction Equipment with Related Attachments and Technology** from which Supplier was awarded a contract.

Supplier desires to contract with Sourcewell to provide equipment, products, or services to Sourcewell and the entities that access Sourcewell's cooperative purchasing contracts (Participating Entities).

1. TERM OF CONTRACT

A. EFFECTIVE DATE. This Contract is effective upon the date of the final signature below.

B. EXPIRATION DATE AND EXTENSION. This Contract expires April 14, 2027, unless it is cancelled sooner pursuant to Article 22. This Contract may be extended one additional year upon the request of Sourcewell and written agreement by Supplier.

C. SURVIVAL OF TERMS. Notwithstanding any expiration or termination of this Contract, all payment obligations incurred prior to expiration or termination will survive, as will the following: Articles 11 through 14 survive the expiration or cancellation of this Contract. All other rights will cease upon expiration or termination of this Contract.

2. EQUIPMENT, PRODUCTS, OR SERVICES

A. EQUIPMENT, PRODUCTS, OR SERVICES. Supplier will provide the Equipment, Products, or Services as stated in its Proposal submitted under the Solicitation Number listed above. Supplier's Equipment, Products, or Services Proposal (Proposal) is attached and incorporated into this Contract.

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

Pursuant to Section 10(b), Supplier will subcontract certain obligations under this Contract to its dealers. Only those dealers that sign a Participation Agreement with Supplier obligating them to comply with the terms of this Contract will be eligible to provide Equipment, Products, or Services as a subcontractor under this Contract. In the event there is no dealer who has entered into a Participation Agreement available to provide Equipment, Products, or Services to a Participating Entity, Supplier will be under no obligation to provide Equipment, Products, or Services to such Participating Entity under this Contract. Supplier will provide a copy of this Contract to its dealers that would normally service Participating Entities and invite such dealers to enter into a Participation Agreement as a subcontractor of Supplier under the terms of this Contract.

All Equipment and Products provided under this Contract must be new and the current model. Supplier may offer close-out or refurbished Equipment or Products if they are clearly indicated in Supplier's product and pricing list. Unless agreed to by the Participating Entities in advance, Equipment or Products must be delivered as operational to the Participating Entity's site.

This Contract offers an indefinite quantity of sales, and while substantial volume is anticipated, sales and sales volume are not guaranteed.

B. WARRANTY. Supplier warrants that all Equipment, Products, and Services furnished are free from liens and encumbrances, and are free from defects in design, materials, and workmanship. In addition, Supplier warrants the Equipment, Products, and Services are suitable for and will perform in accordance with the ordinary use for which they are intended. Supplier's dealers and distributors must agree to assist the Participating Entity in reaching a resolution in any dispute over warranty terms with the manufacturer. Any manufacturer's warranty that extends beyond the expiration of the Supplier's warranty will be passed on to the Participating Entity.

C. DEALERS, DISTRIBUTORS, AND/OR RESELLERS. Upon Contract execution and throughout the Contract term, Supplier must provide to Sourcewell a current means to validate or authenticate Supplier's authorized dealers, distributors, or resellers relative to the Equipment, Products, and Services offered under this Contract, which will be incorporated into this Contract by reference. It is the Supplier's responsibility to ensure Sourcewell receives the most current information.

3. PRICING

All Equipment, Products, or Services under this Contract will be priced at or below the percentage list discount stated in the supplier's proposal.

Upon request made to a participating CAT dealer, from a Participating Entity identifying themselves as a Sourcewell member by providing their Sourcewell member number and contract number; formal quotes will list all costs, including all delivery expenses, such as freight and permits (when required).

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

Alternatively, Participating Entities may choose to make their own transportation arrangements. In such case, there would be no delivery charges from the local participating Cat dealer.
Regardless of the payment method chosen by the Participating Entity, the total cost associated with any purchase option of the Equipment, Products, or Services must always be disclosed in the pricing quote to the applicable Participating Entity at the time of purchase.

A. SHIPPING AND SHIPPING COSTS. All delivered Equipment and Products must be properly packaged. Damaged Equipment and Products may be rejected. If the damage is not readily apparent at the time of delivery, Supplier must permit the Equipment and Products to be returned within a reasonable time at no cost to Sourcewell or its Participating Entities. Participating Entities reserve the right to inspect the Equipment and Products at a reasonable time after delivery where circumstances or conditions prevent effective inspection of the Equipment and Products at the time of delivery. In the event of the delivery of nonconforming Equipment and Products, the Participating Entity will notify the Supplier as soon as possible and the Supplier will replace nonconforming Equipment and Products with conforming Equipment and Products that are acceptable to the Participating Entity.

Supplier must arrange for and pay for the return shipment on Equipment and Products that arrive in a defective or inoperable condition.

Sourcewell may declare the Supplier in breach of this Contract if the Supplier intentionally delivers substandard or inferior Equipment or Products.

B. SALES TAX. Each Participating Entity is responsible for supplying the Supplier with valid tax-exemption certification(s). When ordering, a Participating Entity must indicate if it is a tax-exempt entity.

C. HOT LIST PRICING. At any time during this Contract, Supplier may offer a specific selection of Equipment, Products, or Services at discounts greater than those listed in the Contract. When Supplier determines it will offer Hot List Pricing, it must be submitted electronically to Sourcewell in a line-item format. Equipment, Products, or Services may be added or removed from the Hot List at any time through a Sourcewell Price and Product Change Form as defined in Article 4 below.

Hot List program and pricing may also be used to discount and liquidate close-out and discontinued Equipment and Products as long as those close-out and discontinued items are clearly identified as such. Current ordering process and administrative fees apply. Hot List Pricing must be published and made available to all Participating Entities.

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

4. PRODUCT AND PRICING CHANGE REQUESTS

Supplier may request Equipment, Product, or Service changes, additions, or deletions at any time. All requests must be made in writing by submitting a signed Sourcewell Price and Product Change Request Form to the assigned Sourcewell Supplier Development Administrator. This approved form is available from the assigned Sourcewell Supplier Development Administrator. At a minimum, the request must:

- Identify the applicable Sourcewell contract number;
- Clearly specify the requested change;
- Provide sufficient detail to justify the requested change;
- Individually list all Equipment, Products, or Services affected by the requested change, along with the requested change (e.g., addition, deletion, price change); and
- Include a complete restatement of pricing documentation in Microsoft Excel with the effective date of the modified pricing, or product addition or deletion. The new pricing restatement must include all Equipment, Products, and Services offered, even for those items where pricing remains unchanged.

A fully executed Sourcewell Price and Product Request Form will become an amendment to this Contract and will be incorporated by reference.

5. PARTICIPATION, CONTRACT ACCESS, AND PARTICIPATING ENTITY REQUIREMENTS

A. PARTICIPATION. Sourcewell's cooperative contracts are available and open to public and nonprofit entities across the United States and Canada; such as federal, state/province, municipal, K-12 and higher education, tribal government, and other public entities. Supplier may not enter into a contract with a U.S. Federal Government entity prior to obtaining necessary internal approvals and shall not be obligated to provide Equipment, Products or Services to any U.S. Federal Government entity under this Contract unless separately agreed in writing. Caterpillar may work with such parties and may agree to provide equipment or services under the Contract on a case-by-case basis.

The benefits of this Contract should be available to all Participating Entities that can legally access the Equipment, Products, or Services under this Contract. A Participating Entity's authority to access this Contract is determined through its cooperative purchasing, interlocal, or joint powers laws. Any entity accessing benefits of this Contract will be considered a Service Member of Sourcewell during such time of access. Supplier understands that a Participating Entity's use of this Contract is at the Participating Entity's sole convenience and Participating Entities reserve the right to obtain like Equipment, Products, or Services from any other source.

Supplier is responsible for familiarizing its sales and service forces with Sourcewell contract use eligibility requirements and documentation and will encourage potential participating entities

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

to join Sourcewell. Sourcewell reserves the right to add and remove Participating Entities to its roster during the term of this Contract.

B. PUBLIC FACILITIES. Supplier's employees may be required to perform work at government-owned facilities, including schools. Supplier's employees and agents must conduct themselves in a professional manner while on the premises, and in accordance with Participating Entity policies and procedures, and all applicable laws.

6. PARTICIPATING ENTITY USE AND PURCHASING

A. ORDERS AND PAYMENT. To access the contracted Equipment, Products, or Services under this Contract, a Participating Entity must clearly indicate to Supplier that it intends to access this Contract; however, order flow and procedure will be developed jointly between Sourcewell and Supplier. Typically, a Participating Entity will issue an order directly to Participating Dealers with payments made to the Participating Dealers. If a Participating Entity issues a purchase order, it may use its own forms, but the purchase order should clearly note the applicable Sourcewell contract number. All Participating Entity orders under this Contract must be issued prior to expiration or cancellation of this Contract; however, Supplier performance, Participating Entity payment obligations, and any applicable warranty periods or other Supplier or Participating Entity obligations may extend beyond the term of this Contract.

Supplier's acceptable forms of payment are included in its attached Proposal. Participating Entities will be solely responsible for payment and Sourcewell will have no liability for any unpaid invoice of any Participating Entity.

B. ADDITIONAL TERMS AND CONDITIONS/PARTICIPATING ADDENDUM. Additional terms and conditions to a purchase order, or other required transaction documentation, may be negotiated between a Participating Entity and Supplier's Participating Dealer, such as job or industry-specific requirements, legal requirements (e.g., affirmative action or immigration status requirements), or specific local policy requirements. Some Participating Entities may require the use of a Participating Addendum, the terms of which will be negotiated directly between the Participating Entity and Supplier's Participating Dealer or its authorized dealers, distributors, or resellers, as applicable. Any negotiated additional terms and conditions must never be less favorable to the Participating Entity than what is contained in this Contract.

C. SPECIALIZED SERVICE REQUIREMENTS. In the event that the Participating Entity requires service or specialized performance requirements not addressed in this Contract (such as e-commerce specifications, specialized delivery requirements, or other specifications and requirements), the Participating Entity and the Supplier may enter into a separate, standalone agreement, apart from this Contract. Sourcewell, including its agents and employees, will not be made a party to a claim for breach of such agreement.

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

D. TERMINATION OF ORDERS. Participating Entities may terminate an order, in whole or in part, immediately upon notice to Supplier in the event of any of the following events:

1. The Participating Entity fails to receive funding or appropriation from its governing body at levels sufficient to pay for the equipment, products, or services to be purchased; or
2. Federal, state, or provincial laws or regulations prohibit the purchase or change the Participating Entity's requirements.

E. GOVERNING LAW AND VENUE. The governing law and venue for any action related to a Participating Entity's order will be determined by the Participating Entity making the purchase.

7. CUSTOMER SERVICE

A. PRIMARY ACCOUNT REPRESENTATIVE. Supplier will assign an Account Representative to Sourcewell for this Contract and must provide prompt notice to Sourcewell if that person is changed. The Account Representative will be responsible for:

- Maintenance and management of this Contract;
- Timely response to all Sourcewell and Participating Entity inquiries; and
- Business reviews to Sourcewell and Participating Entities, if applicable.

B. BUSINESS REVIEWS. Supplier must perform a minimum of one business review with Sourcewell per contract year. The business review will cover sales to Participating Entities, pricing and contract terms, administrative fees, sales data reports, performance issues, supply issues, customer issues, and any other necessary information.

8. REPORT ON CONTRACT SALES ACTIVITY AND ADMINISTRATIVE FEE PAYMENT

A. CONTRACT SALES ACTIVITY REPORT. Each calendar quarter, Supplier must provide a contract sales activity report (Report) to the Sourcewell Supplier Development Administrator assigned to this Contract. Reports are due no later than 45 days after the end of each calendar quarter. A Report must be provided regardless of the number or amount of sales during that quarter (i.e., if there are no sales, Supplier must submit a report indicating no sales were made).

The Report must contain the following fields:

- Participating Entity Name (e.g., City of Staples Highway Department);
- Participating Entity Physical Street Address;
- Participating Entity City;
- Participating Entity State/Province;
- Participating Entity Zip/Postal Code;

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

- Participating Entity Contact Name;
- Participating Entity Contact Email Address;
- Participating Entity Contact Telephone Number;
- Sourcewell Assigned Entity/Participating Entity Number;
- Item Purchased Description;
- Item Purchased Price;
- Sourcewell Administrative Fee Applied; and
- Date Purchase was invoiced/sale was recognized as revenue by Supplier.

B. ADMINISTRATIVE FEE. In consideration for the support and services provided by Sourcewell, the Supplier will pay an administrative fee to Sourcewell on all Equipment, Products, and Services provided to Participating Entities. The Administrative Fee must be included in, and not added to, the pricing. Supplier may not charge Participating Entities more than the contracted price to offset the Administrative Fee.

The Supplier will submit payment to Sourcewell for the percentage of administrative fee stated in the Proposal multiplied by the total sales of all Equipment, Products, and Services purchased by Participating Entities under this Contract during each calendar quarter. Payments should note the Supplier's name and Sourcewell-assigned contract number in the memo; and must be mailed to the address above "Attn: Accounts Receivable" or remitted electronically to Sourcewell's banking institution per Sourcewell's Finance department instructions. Payments must be received no later than 45 calendar days after the end of each calendar quarter.

Supplier agrees to cooperate with Sourcewell in auditing transactions under this Contract to ensure that the administrative fee is paid on all items purchased under this Contract.

In the event the Supplier is delinquent in any undisputed administrative fees, Sourcewell reserves the right to cancel this Contract and reject any proposal submitted by the Supplier in any subsequent solicitation. In the event this Contract is cancelled by either party prior to the Contract's expiration date, the administrative fee payment will be due no more than 30 days from the cancellation date.

9. AUTHORIZED REPRESENTATIVE

Sourcewell's Authorized Representative is its Chief Procurement Officer.

Supplier's Authorized Representative is the person named in the Supplier's Proposal. If Supplier's Authorized Representative changes at any time during this Contract, Supplier must promptly notify Sourcewell in writing.

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

10. AUDIT, ASSIGNMENT, AMENDMENTS, WAIVER, AND CONTRACT COMPLETE

A. AUDIT. Pursuant to Minnesota Statutes Section 16C.05, subdivision 5, the books, records, documents, and accounting procedures and practices relevant to this Contract are subject to examination by Sourcewell or the Minnesota State Auditor for a minimum of six years from the end of this Contract. This clause extends to Participating Entities as it relates to business conducted by that Participating Entity under this Contract.

B. ASSIGNMENT. Neither party may assign or otherwise transfer its rights or obligations under this Contract without the prior written consent of the other party and a fully executed assignment agreement. Such consent will not be unreasonably withheld. Any prohibited assignment will be invalid. Provided, however, that Supplier is permitted to subcontract certain of its rights and obligations to Supplier Participating Dealers for performance without Sourcewell's prior written consent.

C. AMENDMENTS. Any amendment to this Contract must be in writing and will not be effective until it has been duly executed by the parties.

D. WAIVER. Failure by either party to take action or assert any right under this Contract will not be deemed a waiver of such right in the event of the continuation or repetition of the circumstances giving rise to such right. Any such waiver must be in writing and signed by the parties.

E. CONTRACT COMPLETE. This Contract represents the complete agreement between the parties. No other understanding regarding this Contract, whether written or oral, may be used to bind either party. For any conflict between the attached Proposal and the terms set out in Articles 1-22 of this Contract, the terms of Articles 1-22 will govern.

F. RELATIONSHIP OF THE PARTIES. The relationship of the parties is one of independent contractors, each free to exercise judgment and discretion with regard to the conduct of their respective businesses. This Contract does not create a partnership, joint venture, or any other relationship such as master-servant, or principal-agent.

11. INDEMNITY AND HOLD HARMLESS

Intentionally omitted.

12. GOVERNMENT DATA PRACTICES

Supplier and Sourcewell must comply with the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13, as it applies to all data provided by or provided to Sourcewell

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

under this Contract and as it applies to all data created, collected, received, maintained, or disseminated by the Supplier under this Contract.

13. INTELLECTUAL PROPERTY, PUBLICITY, MARKETING, AND ENDORSEMENT

A. Intentionally Deleted.

B. PUBLICITY. Any publicity regarding the subject matter of this Contract must not be released without prior written approval from the Authorized Representatives. Publicity includes notices, informational pamphlets, press releases, research, reports, signs, and similar public notices prepared by or for the Supplier individually or jointly with others, or any subcontractors, with respect to the program, publications, or services provided resulting from this Contract.

C. MARKETING. Any direct advertising, marketing, or offers with Participating Entities must be approved by Sourcewell. Send all approval requests to the Sourcewell Supplier Development Administrator assigned to this Contract.

D. ENDORSEMENT. The Supplier must not claim that Sourcewell endorses its Equipment, Products, or Services.

14. GOVERNING LAW, JURISDICTION, AND VENUE

The substantive and procedural laws of the State of Minnesota will govern this Contract. Venue for all legal proceedings arising out of this Contract, or its breach, must be in the appropriate state court in Todd County, Minnesota or federal court in Fergus Falls, Minnesota.

15. FORCE MAJEURE

Neither party to this Contract will be held responsible for delay or default caused by acts of God or other conditions that are beyond that party's reasonable control. A party defaulting under this provision must provide the other party prompt written notice of the default.

16. SEVERABILITY

If any provision of this Contract is found by a court of competent jurisdiction to be illegal, unenforceable, or void then both parties will be relieved from all obligations arising from that provision. If the remainder of this Contract is capable of being performed, it will not be affected by such determination or finding and must be fully performed.

17. PERFORMANCE, DEFAULT, AND REMEDIES

A. PERFORMANCE. During the term of this Contract, the parties will monitor performance and address unresolved contract issues as follows:

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

1. *Notification.* The parties must promptly notify each other of any known dispute and work in good faith to resolve such dispute within a reasonable period of time. If necessary, Sourcewell and the Supplier will jointly develop a short briefing document that describes the issue(s), relevant impact, and positions of both parties.
2. *Escalation.* If parties are unable to resolve the issue in a timely manner, as specified above, either Sourcewell or Supplier may escalate the resolution of the issue to a higher level of management. The Supplier will have 30 calendar days to cure an outstanding issue.
3. *Performance while Dispute is Pending*. Notwithstanding the existence of a dispute, the Supplier must continue without delay to carry out all of its responsibilities under the Contract that are not affected by the dispute. If the Supplier fails to continue without delay to perform its responsibilities under the Contract, in the accomplishment of all undisputed work, the Supplier will bear any additional costs incurred by Sourcewell and/or its Participating Entities as a result of such failure to proceed.

B. DEFAULT AND REMEDIES. Either of the following constitutes cause to declare this Contract, or any Participating Entity order under this Contract, in default:

1. Nonperformance of contractual requirements, or
2. A material breach of any term or condition of this Contract.

The party claiming default must provide written notice of the default, with 30 calendar days to cure the default. Time allowed for cure will not diminish or eliminate any liability for liquidated or other damages. If the default remains after the opportunity for cure, the non-defaulting party may:

- Exercise any remedy provided by law or equity, or
- Terminate the Contract or any portion thereof, including any orders issued against the Contract.

18. INSURANCE

A. REQUIREMENTS. At its own expense, Supplier must maintain insurance policy(ies) in effect at all times during the performance of this Contract with insurance company(ies) licensed or authorized to do business in the State of Minnesota having an "AM BEST" rating of A- or better, with coverage and limits of insurance not less than the following:

1. *Workers' Compensation and Employer's Liability.*

Workers' Compensation: As required by any applicable law or regulation.

Employer's Liability Insurance: must be provided in amounts not less than listed below:

Minimum limits:
$500,000 each accident for bodily injury by accident
$500,000 policy limit for bodily injury by disease
$500,000 each employee for bodily injury by disease

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

2. *Commercial General Liability Insurance.* Supplier will maintain insurance covering its operations, with coverage on an occurrence basis, and must be subject to terms no less broad than the Insurance Services Office ("ISO") Commercial General Liability Form CG0001 (2001 or newer edition), or equivalent. At a minimum, coverage must include liability arising from premises, operations, bodily injury and property damage, independent contractors, products-completed operations including construction defect, contractual liability, blanket contractual liability, and personal injury and advertising injury. All required limits, terms and conditions of coverage must be maintained during the term of this Contract.

Minimum Limits:
$1,000,000 each occurrence Bodily Injury and Property Damage
$1,000,000 Personal and Advertising Injury
$2,000,000 aggregate for products liability-completed operations
$2,000,000 general aggregate

3. *Commercial Automobile Liability Insurance.* During the term of this Contract, Supplier will maintain insurance covering all owned, hired, and non-owned automobiles in limits of liability not less than indicated below. The coverage must be subject to terms no less broad than ISO Business Auto Coverage Form CA 0001 (2010 edition or newer), or equivalent.

Minimum Limits:
$1,000,000 each accident, combined single limit

4. *Umbrella Insurance*. During the term of this Contract, Supplier will maintain umbrella coverage over Employer's Liability, Commercial General Liability, and Commercial Automobile.

Minimum Limits:
$2,000,000

Failure of Supplier to maintain the required insurance will constitute a material breach entitling Sourcewell to immediately terminate this Contract for default.

B. CERTIFICATES OF INSURANCE. Prior to commencing under this Contract, Supplier must furnish to Sourcewell a certificate of insurance, as evidence of the insurance required under this Contract. Prior to expiration of the policy(ies), renewal certificates must be mailed to Sourcewell, 202 12th Street Northeast, P.O. Box 219, Staples, MN 56479 or sent to the Sourcewell Supplier Development Administrator assigned to this Contract. The certificates must be signed by a person authorized by the insurer(s) to bind coverage on their behalf.

Failure to request certificates of insurance by Sourcewell, or failure of Supplier to provide certificates of insurance, in no way limits or relieves Supplier of its duties and responsibilities in this Contract.

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

C. ADDITIONAL INSURED ENDORSEMENT AND PRIMARY AND NON-CONTRIBUTORY INSURANCE CLAUSE. Supplier agrees to list Sourcewell and its Participating Entities, including their officers, agents, and employees, as an additional insured under the Supplier's commercial general liability insurance policy with respect to liability arising out of activities, "operations," or "work" performed by or on behalf of Supplier, and products and completed operations of Supplier. The policy provision(s) or endorsement(s) must further provide that coverage is primary and not excess over or contributory with any other valid, applicable, and collectible insurance or self-insurance in force for the additional insureds. A Participating Dealer may name a Participating Entity as an additional insured on a case-by-case basis.

WAIVER OF SUBROGATION. Supplier waives and must require (by endorsement or otherwise) all its insurers to waive subrogation rights against Sourcewell and other additional insureds for losses paid under the insurance policies required by this Contract or other insurance applicable to the Supplier or its subcontractors. The waiver must apply to all deductibles and/or self-insured retentions applicable to the required or any other insurance maintained by the Supplier or its subcontractors.

D. UMBRELLA/EXCESS LIABILITY/SELF-INSURED RETENTION. The limits required by this Contract can be met by either providing a primary policy or in combination with umbrella/excess liability policy(ies), or self-insured retention.

19. COMPLIANCE

A. LAWS AND REGULATIONS. All Equipment, Products, or Services provided under this Contract must comply fully with applicable federal laws and regulations, and with the laws in the states and provinces in which the Equipment, Products, or Services are sold.

B. LICENSES. Supplier's Participating Dealers must maintain a valid and current status on all required federal, state/provincial, and local licenses, bonds, and permits required for the operation of the business that the Participating Dealer conducts with Sourcewell and Participating Entities.

20. BANKRUPTCY, DEBARMENT, OR SUSPENSION CERTIFICATION

Supplier certifies and warrants that it is not in bankruptcy or that it has previously disclosed in writing certain information to Sourcewell related to bankruptcy actions. If at any time during this Contract Supplier declares bankruptcy, Supplier must immediately notify Sourcewell in writing.

Caterpillar: Confidential Green

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

Supplier certifies and warrants that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Supplier certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this Contract. Supplier further warrants that it will provide immediate written notice to Sourcewell if this certification changes at any time.

21. PROVISIONS FOR NON-UNITED STATES FEDERAL ENTITY PROCUREMENTS UNDER UNITED STATES FEDERAL AWARDS OR OTHER AWARDS

Intentionally omitted.

22. CANCELLATION

Sourcewell or Supplier may cancel this Contract at any time, with or without cause, upon 60 days' written notice to the other party. However, Sourcewell may cancel this Contract immediately upon discovery of a material defect in any certification made in Supplier's Proposal. Cancellation of this Contract does not relieve either party of financial, product, or service obligations incurred or accrued prior to cancellation.

Table 2: Company Information and Financial Strength

Line Item	Question	Response *	

10	Provide a brief history of your company, including your company's core values, business philosophy, and industry longevity related to the requested equipment, products or services.	The history of Caterpillar is all about doing: creating, building, problem solving, innovating, testing, servicing and improving. We're proud of the ingenious machines that are part of our rich heritage. More importantly, we are proud of the people who founded and built the company one breakthrough at a time. Beginning with Benjamin Holt and C. L. Best, the people of Caterpillar have always been - and continue to be - extraordinary. In 1925, when Holt and Best merged to form their new tractor company, they used the name so familiar to people around the world: Caterpillar. The Caterpillar Tractor Company is today known as Caterpillar Inc. With 2021 sales and revenues of $51.0 billion, Caterpillar Inc. is the world's leading manufacturer of construction and mining equipment, off-highway diesel and natural gas engines, industrial gas turbines and diesel-electric locomotives. For nearly 100 years, we've been helping customers build a better, more sustainable world and are committed and contributing to a reduced-carbon future. Our innovative products and services, backed by our global dealer network, provide exceptional value that helps customers succeed. Caterpillar does business on every continent, principally operating through three primary segments – Construction Industries, Resource Industries and Energy & Transportation – and providing financing and related services through our Financial Products segment. Our Worldwide Code of Conduct, first published in 1974, defines what we stand for and believe in, documenting the uncompromisingly high ethical standards our company has upheld since its founding in 1925. The Code helps Caterpillar employees put our values and principles into action every day by providing detailed guidance on the behaviors and actions that support our values of Integrity, Excellence, Teamwork, Commitment and Sustainability. Caterpillar's Code of Conduct that can be found at https://www.caterpillar.com/en/company/code-of-conduct.html	*
11	What are your company's expectations in the event of an award?	Caterpillar is honored to have served Sourcewell and its members who have purchased Cat® construction equipment, attachments (work tools), and electrical power generation products through Sourcewell since 2008. Furthermore, we are proud to have earned the Sourcewell Legacy Award in 2019, and have recently been awarded contracts 060122-CAT and 092222-CAT. Caterpillar's expectations in the event of an award would be to focus on customer needs and continued growth across all governmental segments. Sourcewell has built a strong reputation within the industry that has shown the importance of how this cooperative contract delivers upon customer needs. This contract will be a top factor in our go to market strategy within our strong Cat dealer network. If awarded, we will send out an email to our entire sales force, applicable to governmental, introducing the contract along with ways to train our salesforce, market, and grow the contract. We look forward to the opportunity to further grow business and serve member needs together in this new Heavy Construction Equipment RFP opportunity.	*
12	Demonstrate your financial strength and stability with meaningful data. This could include such items as financial statements, SEC filings, credit and bond ratings, letters of credit, and detailed reference letters. Upload supporting documents (as applicable) in the document upload section of your response.	Caterpillar Inc. is a publicly traded company, and as such, its financial information is updated quarterly and available at: https://investors.caterpillar.com/overview/default.aspx Caterpillar's 2021 Annual Report provides details about our financial position. Our SEC filing documents can be found at: https://investors.caterpillar.com/financials/sec-filings/default.aspx. Both documents are included as attachments in our Financial Strength and Stability Documents. As 2022 results are yet to be released, below you can find a summary of our full year 2021 financials. In 2021 full year sales and revenues were $51B of which, North American sales were $22B. Operating profit was $6.9B with a profit per share of USD $11.83. Dividends paid per share of USD $4.28.	*
13	What is your US market share for the solutions that you are proposing?	Caterpillar is a significant contributor to the overall Heavy Equipment sector within the US and Canada. Market share information beyond what is made publicly available through our annual reports is considered confidential.	*
14	What is your Canadian market share for the solutions that you are proposing?	Caterpillar is a significant contributor to the overall Heavy Equipment sector within the US and Canada. Market share information beyond what is made publicly available through our annual reports is considered confidential.	*
15	Has your business ever petitioned for bankruptcy protection? If so, explain in detail.	No.	*

16	How is your organization best described: is it a manufacturer, a distributor/dealer/reseller, or a service provider? Answer whichever question (either a) or b) just below) best applies to your organization. a) If your company is best described as a distributor/dealer/reseller (or similar entity), provide your written authorization to act as a distributor/dealer/reseller for the manufacturer of the products proposed in this RFP. If applicable, is your dealer network independent or company owned? b) If your company is best described as a manufacturer or service provider, describe your relationship with your sales and service force and with your dealer network in delivering the products and services proposed in this RFP. Are these individuals your employees, or the employees of a third party?	Caterpillar is a world class manufacturer which distributes products through a vast and capable independent dealer network. Our dealers are strong independently owned companies and in North America alone our 47 dealers have a combined net worth of billions of dollars. Their large valuation is a competitive advantage because it allows them to have the infrastructure to support customers regardless of location, industry, fleet size, or application. Another advantage of independently owned dealers is that they know their customers and market well. They tailor their services specifically to their customers' needs. Although we will sign this contract as a manufacturer, our Cat dealers will be given the opportunity to avail themselves of the opportunity presented by the contract and will execute all the transactions with governmental customers as they do today. This includes but is not limited to consultation, quoting, accepting payment, delivery, warranty support, parts sales, and service. Caterpillar dealers heartily embrace the other Sourcewell contracts currently available to them (032119-CAT, 092222-CAT, 062320-CAT, 060122-CAT). They have all been trained on contract usage. In fact, the current Heavy Equipment contract is leveraged by 95% of our dealers in North America. Caterpillar offers specific discounts to Sourcewell members. By using any Sourcewell Contract, our dealers agree to honor those discounts.	*
17	If applicable, provide a detailed explanation outlining the licenses and certifications that are both required to be held, and actually held, by your organization (including third parties and subcontractors that you use) in pursuit of the business contemplated by this RFP.	Caterpillar and its subsidiaries operate across the globe in a variety of markets that require Caterpillar to adhere to all locally mandated laws and regulations in order to do business. With regards to the territories covered by this RFP, Caterpillar will comply with applicable laws in order to do business in the territories described herein. As an equipment manufacturer focused on quality, Caterpillar created the Caterpillar Quality Management System, which is a process-based, ISO 9001:2015 compliant quality management system used throughout Caterpillar to continually improve the quality of our products and services to meet customer, statutory, and regulatory requirements. It is registered with IRCA (International Register of Certificated Auditors) as Caterpillar Quality Management System CAT791A.	*
18	Provide all “Suspension or Debarment” information that has applied to your organization during the past ten years.	N/A	*

Table 3: Industry Recognition & Marketplace Success

Line Item	Question	Response *	

19	Describe any relevant industry awards or recognition that your company has received in the past five years	Please note: To list all the awards received in the past 5 years would unnecessarily lengthen our response. For brevity, we are highlighting some recognition received in 2020, 2021 and 2022. Also note there are many global awards. Fortune Magazine #78 on the Fortune 500 2021 Fortune Magazine World's Most Admired Companies World & North America Dow Jones Sustainability Index Forbes Best Employers for diversity 2020 and 2021 #82 Best Global Brands- Interbrand 2021 The Wall Street Journal Best Managed Companies in 2020 and 2021 The Wall Street Journal World's Most Sustainably Managed Companies Human Rights Campaign Foundation Corporate Equality Index Dow Jones Sustainability Index (World and North America) 21 years World's Most Sustainably Managed Companies – The Wall Street Journal United Way World Wide's Global Corporate Leadership Program U.S. President's Volunteer Service Award from Junior Achievement Corporate Equality Index – Human Rights Campaign Foundation CSR China Top 100 – the 4th CSR China Education Award (China) China CSR Excellence Award – China Philanthropy Times (China) Corporate Social Responsibility Research Center of Southern Weekly (China) Outstanding Contribution to Poverty Alleviation – China Foundation for Poverty Alleviation (China) 2020 Global 500 – Fortune Magazine America's Most Responsible Companies 2020, 2021 & 2022 – Newsweek Best-Managed Companies of 2020 & 2021 – The Wall Street Journal Top Companies for Customer Satisfaction – The Wall Street Journal The CEO Leaderboard: COVID-19 Reputation Rankings – SJR All-America Executive Team – Institutional Investor Top 150 Global Licensors – Global License Best Global Brands Top 100 – Interbrand World's Most Valuable Brands 2020 – Forbes 2020 Best Places to Work for Disability Inclusion – Disability Equality Index World's Best Employers 2020 – Forbes Best Employers for Women 2020 – Forbes America's Best Employers by State 2020 – Forbes America's Best Employers for Diversity 2020 – Forbes Best Employers for New Grads 2020 – Forbes Global 2000 – Forbes 2020, 2021 & 2022 Best Employers for Veterans 2020 and 2021– Forbes Top Veteran-Friendly Company – U.S. Veterans Magazine #1 Great Place to Work – Great Place to Work Institute (Brazil) #1 Great Place to Work in the Ag Business - Great Place to Work Institute (Brazil) Chile's 20 Best Places in 2020 to Work for LGBTQ Equality, pwc Human Rights Campaign Top of Mind Company "Industry category" (Piracicaba, Brazil) Certification on Promoting Work-Life Balance in Hyogo Prefecture – Hyogo Work and Life Center (Japan) Hyogo's Women's Success in Business Promotion Company – Hyogo Women Empowerment & Promotion Center (Japan) Hanada Award for WIN Akashi – Hyogo Women and Future Association (Japan) Hyogo Childcare Supporting Company Award (Japan) Science & Technology Industry Summit: Outstanding Contribution – The Economic Observer (China)	*
20	What percentage of your sales are to the governmental sector in the past three years	The governmental and educational sector is extremely important to Caterpillar. We have a dedicated team to support governmental customers and their specific needs. However, percentage of sales to governmental is considered confidential.	*
21	What percentage of your sales are to the education sector in the past three years	The governmental and educational sector is extremely important to Caterpillar. We have a dedicated team to support governmental customers, including the education sector, and their specific needs. However, percentage of sales to education is considered confidential.	*
22	List any state, provincial, or cooperative purchasing contracts that you hold. What is the annual sales volume for each of these contracts over the past three years?	While Cat dealers would typically hold contracts with states and provinces, as an exception Caterpillar holds the state contract with Ohio and NY. Additionally, we are contract holders with OMNIA and NASPO ValuePoint. Just as we would never share Sourcewell sales information with other cooperatives, we also keep the sales volumes from other cooperatives confidential.	*

23	List any GSA contracts or Standing Offers and Supply Arrangements (SOSA) that you hold. What is the annual sales volume for each of these contracts over the past three years?	Listed below are the current GSA contracts that Caterpillar holds: SIN 333924 Utility Trucks and Tractors: 2020=$6,857,211 2021=$14,071,364 SIN 333120 Street Repair and Cleaning Equipment and Attachments: 2020=$0 / 2021=$143,837 SIN 335999 Power Distribution Equipment: 2020=$151,267.70 / 2021=$9,473.07 These contracts are used by Caterpillar, but we do not allow our dealers to use GSA contracts. Final sales for the year 2022 have yet to be fully reported.	*

Suwannee County	Government	Florida - FL	A county local to Florida. Caterpillar requests that Sourcewell treat the information in this table as confidential.	Purchased 26 units.	$6,567,420	*

Table 6: Ability to Sell and Deliver Service

Describe your company's capability to meet the needs of Sourcewell participating entities across the US and Canada, as applicable. Your response should address in detail at least the following areas: locations of your network of sales and service providers, the number of workers (full-time equivalents) involved in each sector, whether these workers are your direct employees (or employees of a third party), and any overlap between the sales and service functions.

Line Item	Question	Response *	

26	Sales force.	The Cat dealer salesforce is highly capable and trained in the construction industry. The Cat dealer salespeople are consultants to their customers and advise their customers on the best solutions for their application and job. As a manufacturer we request our dealers to follow strict training protocols to ensure our sales force remains current on all product updates. Specifically, as it relates to governmental sales, each dealer has one or more people named to be a key liaison between us as manufacturer and their dealer sales team. They're offered additional in depth training on Sourcewell and ensures that all contract terms are followed. Caterpillar has Operational Excellence Programs that recognize dealers' excellence in marketing and sales processes and operations, among other areas of the business. In North America, our dealers employ more than 53,000 people across the machine, energy, parts and service divisions. The dealer sales teams are supported by a network of Caterpillar professionals. Each dealer has in territory support of 5 to 8 Caterpillar sales/marketing employees. It is the responsibility of these people to ensure that the dealer and Caterpillar are working well together to constantly improve and to adapt to marketplace changes. Beyond the territory experts, the sales and marketing department at Caterpillar is staffed by more than 600 people whose mission is to focus on customer satisfaction. Even more are employed "behind-the scenes" to ensure industry leading product design, up to date product information, and maintaining the ease of doing business in an increasingly connected marketplace.	*
27	Dealer network or other distribution methods.	The Cat dealer network is key to the success of our company. Boasting over 160 dealers throughout 193 countries worldwide, the Cat dealer network is widely considered to be the best in industry. Within Canada and the United States, we have 47 dealers and more than 800 dealer owned locations that sell and rent equipment. Please refer to our directory listing of Cat dealer locations and our easy to view locations map in the attached "Additional Documents" zip file. Cat dealers are independently-owned. Each dealer has multiple branches and a mobile service fleet than can serve customers regardless of location. These are full physical locations our governmental customers can use. Because of the size of Cat dealers, they are exceptionally capable to serve governmental customers. Dealers have trained specialists that cover many industries including heavy equipment. Collectively, Cat dealers' large net worth permits them to stock a high volume of replacement parts - allowing governmental customers the fastest turnaround on parts availability and repair time. Cat dealers recognize the importance of governmental business to their overall success and they each have one or more governmental specialists whose job it is to serve governmental agencies well. Please refer to the Cat dealer locations map included in "Additional Documents". Additionally, you can leverage https://www.cat.com/en_US/support/dealer-locator.html to locate dealers by location.	*

28	Service force.	At Caterpillar we are very proud of the saying "The sales department sells the first machine; the service department sells every one after that." The Cat dealer network in North America collectively employs more than 20,000 factory trained technicians, parts experts, product support managers and other service-oriented staff. These subject matter experts are supported by the best repair shop equipment and materials. As machines and engines are constantly updated, so too are our service experts. We conduct product-specific training every week of the year. Technician shortage is an industry-wide concern, but because Cat dealers are large, long established companies, they can offer strong compensation and benefit packages that encourage the best people to seek employment and to retain them once hired. Caterpillar works very closely with dealers and through a program called "ThinkBIG", we are able to keep the pipeline of high quality employees full. ThinkBIG is a Caterpillar-specific instructional program that pays the student while they train to become a technician. It is a 2-year program with lab and classroom work, and a paid internship at a sponsoring Cat Dealer. As a result, the student will graduate with an accredited degree backed with over 2,000 hours of work experience. In addition to the technicians and mechanics that work on the machines directly, each dealer has a service support staff that includes customer-facing consultants who are responsible for working with customers to set up maintenance and repair schedules to ensure the best possible up-time. Collectively, service support staff makes up the bulk of each dealers' staff. Roughly half of their personnel investment goes to ensuring customer success via product support. The dealer service teams are supported by a network of Caterpillar professionals. Each dealer has in territory support of 5 to 8 Caterpillar parts/service employees. It is the responsibility of these specialists to ensure that the dealer and Caterpillar are working well together to constantly improve and to adapt to marketplace changes. Beyond the territory experts, the service and support groups at Caterpillar are staffed by thousands of people whose mission is to focus on post-sale customer satisfaction. Even more are employed "behind-the-scenes" to ensure technical literature is up to date, service standards are adhere to and repair questions are answered quickly. We exceed our 95% 2-hour response rate target in responding to dealer service inquiries.	*
29	Describe the ordering process. If orders will be handled by distributors, dealers or others, explain the respective roles of the Proposer and others.	Our simple order process has been and will continue to be well appreciated by Sourcewell and Sourcewell members: 1) When a member decides to purchase a new Cat machine, they simply include their Sourcewell member number on the Purchase Order they issue to the Cat dealer. 2) The Cat dealer then accepts the PO, issues the invoice, accepts payment and delivers the machine. 3) After the machine has been delivered, the dealer, as part of their normal process, includes the member number when filing their sales claims with Caterpillar. 4) At month's end, Caterpillar aggregates these reports and sends the sales information quarterly to Sourcewell along with the administrative fee. IMPORTANT NOTE: Should a member wish to include additional terms and conditions to this contract, or to otherwise request a Participating Addendum, that agreement / PA should be executed between the member and Cat dealer directly.	*

30	Describe in detail the process and procedure of your customer service program, if applicable. Include your response-time capabilities and commitments, as well as any incentives that help your providers meet your stated service goals or promises.	We are proud that our reputation stands on having the best customer support in the industry. In fact, our capabilities are industry leading. In the event a customer ever has a problem or issue with a machine, their Cat dealer is empowered to resolve that issue locally. If the problem is a result of a defect in material or workmanship, within the standard warranty period, the local Cat dealer will work with Caterpillar to apply the appropriate warranty, and keep the customer informed. Every Cat dealer has a common detailed service process in place. Caterpillar supports and verifies that all the dealer service technicians are supplied with the tools and equipment needed to repair all Cat products. Technicians have access to an electronic library of technical information including Service Letters, Technical Information Bulletins, System Operations, Troubleshooting and Disassembly and Assembly manuals. These manuals are provided for every Cat product. Each dealer also has one or more "Technical Communicators" who are dedicated to supporting the service technicians by acting as a liaison between the shop personnel and Caterpillar. The service technicians also have a dealer support network (DSN) system with direct access to Caterpillar's Service Engineers. Caterpillar responds to more than 95% of all high priority tickets within one hour. Caterpillar is got everything customers need to keep their Cat machines in top shape. Whether they want Genuine Cat parts, manuals and resources to do maintenance and repairs themselves, or prefer to have one of our expert dealer technicians do the work. We make it easy to keep their Cat equipment running. Some of our service solutions include: -Cat Fleet Management (Condition Monitoring) - Lowers the total cost of ownership of machine. By connecting your fleet, you will be able to: track the location of your assets, monitor & manage the fuel consumption, identify the operators who would need extra training, and plan & schedule your maintenance. All of which will maximize your uptime. -Customer Value Agreements (CVA) - Customizable plans for your equipment new or used - to do more work with lower, more predictable costs. It's a convenient plan to get the most from your equipment throughout its life. Examples of CVAs may include but are not limited to: Maintenance CVAs, Component CVAs, and Machine CVAs. -S•O•S SM Services - A fluid analysis program that provides results that you can trust including trend analysis that provides benefit to your machine and fleet. -Cat Inspect - A digital way to perform checklists, pre-work inspections, annual inspections and PM checklists. All of which can be captured in the easy to use app.	*
31	Describe your ability and willingness to provide your products and services to Sourcewell participating entities in the United States.	We are proud to serve all geographic areas and all Sourcewell member sectors within the United States to offer our complete products and services. Caterpillar has successfully and proudly utilized Sourcewell to sell machines in all 50 states. Caterpillar's global reach and presence is unmatched in the industry, and we serve customers around the globe. Our manufacturing, marketing, logistics, services, research and development and related facilities, along with our dealer locations, total more than 500 locations worldwide. North America specifically is home to 47 factories and 10 parts distribution centers, which make up 40% of our global footprint! The Caterpillar parts network delivers 98% of the parts orders within 24 hours. In addition to our facilities listed above, Cat Parts are available through the Cat dealer network in at different price points, including: Cat New, Cat General Duty and Cat Reman. The Cat dealer network also have the capability to provide dealer exchange components, dealer rebuilt components and used parts when available. Each dealer can match the appropriate parts offering to match the customers application and productivity. For example, Cat dealers offer Cat factory remanufactured parts (Cat reman) to follow the same quality, performance, and reliability as Cat new parts. This product line provides the same as new parts warranty, includes critical engineering changes, reduces waste, and protects the environment and saves critical repair time on machines. Cat reman also uses 100% Cat parts in the remanufacture process. Our 1.4 million parts are available to order 24/7 on Parts.Cat.Com.	*

32	Describe your ability and willingness to provide your products and services to Sourcewell participating entities in Canada.	We are serve all geographic areas and all Canoe member sectors within Canada with our complete product and service offerings. In fact, we see the Canadian market as a significant growth opportunity for Canoe through Sourcewell contract usage. We have gained momentum with our current contract 032119-CAT in Canada. Caterpillar's global reach and presence is unmatched in the industry, and we serve customers around the globe. Our manufacturing, marketing, logistics, services, research and development and related facilities, along with our dealer locations, total more than 500 locations worldwide. North America specifically is home to 47 factories and 10 parts distribution centers, which make up 40% of our global footprint! The Caterpillar parts network delivers 98% of the parts orders within 24 hours. In addition to our facilities listed above, Cat Parts are available through the Cat dealer network in at different price points, including: Cat New, Cat General Duty and Cat Reman. The Cat dealer network also have the capability to provide dealer exchange components, dealer rebuilt components and used parts when available. Each dealer can match the appropriate parts offering to match the customers application and productivity. For example, Cat® dealers offer Cat® factory remanufactured parts (Cat reman) to follow the same quality, performance, and reliability as Cat new parts. This product line provides the same as new parts warranty, includes critical engineering changes, reduces waste, and protects the environment and saves critical repair time on machines. Cat reman also uses 100% Cat parts in the remanufacture process. Our 1.4 million parts are available to order 24/7 on Parts.Cat.Com.	*
33	Identify any geographic areas of the United States or Canada that you will NOT be fully serving through the proposed contract.	We are proud to serve all geographic areas of the United States and Canada.	*
34	Identify any Sourcewell participating entity sectors (i.e., government, education, not-for-profit) that you will NOT be fully serving through the proposed contract. Explain in detail. For example, does your company have only a regional presence, or do other cooperative purchasing contracts limit your ability to promote another contract?	We are proud to serve all Sourcewell Member sectors within the United States and Canada with our complete product and service offering through Sourcewell. Caterpillar's cooperative purchasing contracts are non-exclusive; i.e. none of them restrict Caterpillar from promoting our Sourcewell contracts.	*
35	Define any specific contract requirements or restrictions that would apply to our participating entities in Hawaii and Alaska and in US Territories.	There are no restrictions or limitations for sales to members in Hawaii, Alaska or U.S. Territories.	*

Table 7: Marketing Plan

Line Item	Question	Response *	
36	Describe your marketing strategy for promoting this contract opportunity. Upload representative samples of your marketing materials (if applicable) in the document upload section of your response.	Our current marketing strategy with Sourcewell contract 032119-CAT proves to be effective with year over year sales growth. Our primary strategy to promote this contract with participating entities is through our Cat dealers' sales force. We provide group and individual training to our dealer sales reps, focusing on benefits from selling through cooperative contracts vs bids. We proudly announce the award publicly through our multiple customer facing touchpoints which may include: 1) Press Release 2) Government Solutions Magazine (Caterpillar produced magazine distributed to governmental customers in the US and Canada) 3) Government Training & Safety Days (Government customer training events at Caterpillar facilities) 4) Announcement in our governmental customer e-newsletter 5) Feature on our governmental focused website: www.cat.com/governmental 6) Announcement on our social media channels (FB, Instagram, LinkedIn) 7) Display mentions at all governmental tradeshows we attend. (NACE Annual Conference, APWA Snow Show, Waste EXPO, GFX, NIGP Annual Forum & Products Expo, and APWA PWX & Annual Roadeo) 8) Update literature with the new contact information. (An updated version can be found within our attached marketing plan attachment.)	*
37	Describe your use of technology and digital data (e.g., social media, metadata usage) to enhance marketing effectiveness.	Caterpillar and the Cat dealer network are leaders in using technologies to reach our customers. - Focus on organic search and Search Engine Optimization (SEO) to help our customers digitally find our products and the information they need. - Leverage Caterpillar's social media platforms (YouTube, Facebook, LinkedIn, Instagram, etc) and ability to target governmental segments. - Leverage predictive data analytics (past purchase history and financing information) to recognize in advance when customers may be considering replacing machines they currently own. - Leverage Deltek's GovWIN data in the US and Canada for governmental lead generation. Caterpillar has a Customer Interaction Center available 24/7 who handles digital leads received from cat.com, social media, etc. Our team qualifies those leads and passes them on to our Cat Dealer network using the Salesforce platform (Customer Relationship Management system). We have processes that allows us to confirm our Cat dealers have reached out to those customers.	*
38	In your view, what is Sourcewell's role in promoting contracts arising out of this RFP? How will you integrate a Sourcewell-awarded contract into your sales process?	Sourcewell is a well-respected contracting agency within the public procurement industry. It is important, in the event of an award, that our products and logos be included in Sourcewell marketing and website. We believe that the most important role that Sourcewell can play in marketing our contract and products, is to market themselves and promote contract purchasing across the industry. In the event of an award, Caterpillar will put high priority in building awareness and enthusiasm within our dealer network and customer base to leverage the Sourcewell contract as our go to market strategy.	*
39	Are your products or services available through an e-procurement ordering process? If so, describe your e-procurement system and how governmental and educational customers have used it.	We do offer a e-procurement ordering process for parts via parts.cat.com. We can also integrate into a variety of procurement systems for high volume customers. Our wide machine portfolio and multiple configurations per machine model allows us to provide the best machine for the customer need. Our Cat dealers are trained to configure our equipment and advise the customer on the best machine and configuration for their application. Therefore, a consultative salesperson is integral in this process, and we do not use an e-procurement machine ordering process.	*

Table 8: Value-Added Attributes

Line Item	Question	Response *	

40	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	All dealers offer basic operation, safety, and maintenance training with every sale. Should a customer desire more advanced training, such as productivity improvement or advanced repairs, each of our dealers can supply that training. Often there is a cost associated with that specific training and it would be negotiated between the dealer and the customer. Caterpillar also offers training programs directly to customers in three areas: operation, safety and service. Members may access courses online, via CD's, or through instructor-led classes leading to operator certifications. The fees for these services vary depending on the depth of training desired. These high-level instruct-led courses can be conducted at one of our dedicated training facilities in the US or on a customer's local site using their own equipment. Caterpillar also has a licensed supplier that offers Cat Simulators to teach operational techniques from real job sites. For more information visit: https://catsimulators.com/	*

41	Describe any technological advances that your proposed products or services offer.	Cat technology gives you the power to track, monitor, automate and manage all types of assets- from a single machine, engine, to an entire fleet. We even offer technologies that protect your people. Listed below are a few technology offerings (standard and optional) that are used throughout the world in our Cat equipment. Next Generation Excavators: Cat Vision Link - Delivering valuable data with connected machine. Cat Payload - Precisely load targets every time for faster cycle times. Cat Skid Steer and Compact Track Loaders: Electronic Torque Management System - Helps maximize performance, minimize fuel consumption. Sealed and Pressurized Cabs - Provides a cleaner, quieter work environment. Cat Backhoe Loaders: Selectable Power Management Modes - Saves fuel while maintaining machine performance. Load-Sensing Hydraulic System - Provides excellent response for improved hoe and loader productivity and greater bucket breakout force. Cat Tractors: Stable Blade - Produces a smoother surface finish. Autocarry - Automatic raising and lowering of blade to maximize pushing capacity and prevent excessive track slippage. Cat Wheel Loaders: Operator Assist - Helps the operator reduce tire slippage, automatic rimpull management and provides up to 10% better cycle time resulting in higher productivity. Autodig - consistent high bucket fill factors delivers up to 10% more productivity. Cat Off Highway Trucks: Adaptive Economy Mode - Automatically optimizes fuel consumption without affecting productivity just pressing a button. Truck Production Management System (TPMS) - Weighting system with side indicator lights showing the operator when they are on last pass and when the truck is fully loaded. Cat Articulated Trucks: Advanced Automatic Traction Control (AATC) - Technology that proactively applies inter- and cross-axle differential locks ‘on-the-go’ when needed without assistance from operator's interaction. Cat Detect with Stability Assist - Warns the operator if machine is approaching a pre-set angle during operation, when driving and tipping. Machine/Operator Safety Technology: Machine Security System - Gives you control over who can operate your machines and when. Prevents theft. Seat Belt Reminder - Cost effective safety upgrade that significantly improves operator safety. Cat Detect for Personnel - Alert ground crews in close proximity to mobile equipment. Cat® Detect for Personnel sounds an immediate, unique alert that cuts through the white noise of engines, generators, cell phones and job site chatter to protect ground workers from equipment backing incidents. Cat Command - Remote control in operations where an operator could be at safety risk. Whether you're looking to add technology to your current machine, or want new ways to get more value out of the technology on your equipment, we have options for you.	*

42	Describe any “green” initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	Caterpillar shares the concerns of governments and the public about the risks of climate change and supports global efforts to mitigate its impact. We are committed to contributing to a reduced-carbon future. We demonstrate this in many ways including through our significant progress in reducing greenhouse gas (GHG) emissions from our operations and our continued investment in new products, technologies and services. Caterpillar is engineering a brighter future through: - Product innovations - Advanced technologies leveraging know-how and R&D - Usage of renewable fuels and fluids - Solutions to improve jobsite efficiency - Maintenance solutions - Manufacturing operations’ carbon efficiency Caterpillar's long-standing commitment to sustainability inspires us to set and achieve meaningful environmental, social and governance (ESG) goals and develop innovative products, technologies and services to support our customers on their sustainability journey. Caterpillar is fully committed to our customers’ success by not only the design and manufacture of durable, reliable, innovative and rebuildable construction equipment, but also through our extensive and unmatched dealer network that provides you the best service and support to keep your equipment running, regardless of the environment or challenges. We consider this as we work toward a vision of a world in which people's basic needs - such as shelter, clean water, education, and reliable energy - are fulfilled. We provide work environments, products, services, and solutions that make productive and efficient use of resources as we strive to achieve our vision. We believe this commitment supports the enduring success of our customers, stockholders, dealers, and our people. Caterpillar is a proud 20-year member of the Dow Jones Sustainability Indices, including both the World and North America Indices. The annuals DJSI process follows a best-in-class approach, evaluating numerous corporate economic, environmental, and social performance factors. For more on sustainability please visit our full report attached in the Financial and Stability attachment section.	*
43	Identify any third-party issued eco-labels, ratings or certifications that your company has received for the equipment or products included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.	Plants certified with IDO 14001:2004 Environmental Management System include: 1) Anchor Coupling - Goldsboro NC, ISO 14001:2004- Sept 2018 2) Anchor Coupling - Menominee - ISO 14001: 2015 - Jan. 2021 3) Gen Sets - Newberry 0 ISO 14001:2004 - Nov. 2017 4) Mapleton - 14001:2004 self-certification issued Jan 2013 5) Reman Services - Corinth MS - ISO 14001-2015- Sept. 2021 6) Reman Services - Franklin - ISO 14001:2004-May 2017	*

44	Describe any Women or Minority Business Entity (WMBE), Small Business Entity (SBE), or veteran owned business certifications that your company or hub partners have obtained. Upload documentation of certification (as applicable) in the document upload section of your response.	Caterpillar has long drawn on the diversity of its people as a source of innovation and competitive advantage. We are proud that our people come from across the globe, with diverse backgrounds, experiences and perspectives. Despite our differences – in geography, culture, language and business – we are one Caterpillar, one company united by these common principles with a shared commitment to the highest standards of conduct. For example: Foley Equipment, a Cat® dealer, with territory primarily in Kansas and Missouri, is woman owned. In addition to Foley equipment, there are 31 other women in our North American dealer network who hold the titles of President, Vice President or Director. One of the more recognized initiatives within Caterpillar's Global Supply Network Division is the Caterpillar Inc. Proprietary Information Supplier Diversity Program which spurs economic growth by increasing business opportunities to minority-owned, women-owned, veteran and service disabled veteran-owned, small disadvantaged businesses and those certified in HUBZones, all while ensuring expectations are met with regards to quality, velocity, capacity, and cost. Currently more than 37% of our direct and indirect purchasing is conducted with suppliers in these categories. Caterpillar is a proud member of the National Minority Supplier Development Council (NMSDC). We also use the System for Aware Management (SAM), SBA, and NMSDC databases to locate SDB, VOSB, SDVOSB and HUBZone suppliers. Supplier Diversity is discussed with Global Supply Network Division leadership during the Monthly Operating Results Review meetings. This in turn forces accountability for supplier inclusion by measuring drivers, such as the number of sourcing projects, which include Divers Suppliers and the values of the projects in which they participate. The goal is to create greater transparency to determine which teams are creating inclusive environments and which are not. For more detail, please see our attached 2021 Global Diversity & Inclusion Report in the Additional Documents folder.	*

45	What unique attributes does your company, your products, or your services offer to Sourcewell participating entities? What makes your proposed solutions unique in your industry as it applies to Sourcewell participating entities?	BEST OVERALL VALUE / LOWEST LIFE CYCLE COST: Cat products deliver the best value for the money. While we rarely have the lowest initial purchase price, we are happy to demonstrate to customers that our machines offer the lowest overall owning and operating costs when factors such as fuel efficiency, repair frequency, productivity, and resale value are factored in. We believe that government agencies are tasked to be the best stewards of taxpayer funds and our products can prove that they are the best solution. Sourcewell members are in the best position to allow these discussions to take place in contrast to a local bid situation where the focus is often only on initial price. CAT SAFETY SERVICES / SAFETY FEATURES: In addition to the tangible, measurable aspects of the life cycle cost equation, we also bring our focus on safety to every product that we manufacture. Quantifying a human life or debilitating injury is impossible, but each machine has industry-leading features that strive to minimize the possibility for accidents. In addition to built-in safety features, we also offer products and services that are unique in the industry. Cat Safety Services include, but are not limited to, the following: Safety Perception Survey - Used to establish a baseline safety-culture assessment by measuring employee perceptions and gaps in beliefs between management and employees on the front line across 20 Safety Culture Indicators. Safety Leadership Assessment - Used to measure individual safety leadership capability around four domains of safety leadership. Worksite Assessment - Compares onsite observations of safety practices and employee interview data to the documented processes and procedures. Continuous Improvement Process - Involving all levels of the organization to generate engagement, involvement, and ownership in the safety improvement process. Training - can be conducted with e-learning courses on http://safelyhome.cat.com, instructor-led training products or as Supplier-facilitated workshops. Topics available include, but are not limited to, safety culture, effective communication, supervisor safety training, recognition, etc. Fleet Management & Services through Caterpillar Job Site Solutions: We leverage the power of Caterpillar and our dealers by designing innovative solutions that solve customer problems and that have a positive impact on their bottom line. We approach each site differently, striving to deliver exactly what's needed — no more, no less. Every solution includes a unique mix of Caterpillar and dealer capabilities using industry best products, technology, services and expertise necessary to meet the customer's definition of success. The goal is to leave customers better off tomorrow than they are today. Details on products and services are available at www.cat.com/safety. More information can be found in the additional document section. Pricing can be found in the pricing document section.	*

Table 9: Warranty

Describe in detail your manufacturer warranty program, including conditions and requirements to qualify, claims procedure, and overall structure. You may upload representative samples of your warranty materials (if applicable) in the document upload section of your response in addition to responding to the questions below.

Line Item	Question	Response *	
46	Do your warranties cover all products, parts, and labor?	Caterpillar has extensive warranty coverage. Please see our warranty statements attached in the warranty information documents.	*
47	Do your warranties impose usage restrictions or other limitations that adversely affect coverage?	Please see applicable warranty statements in the attached documents.	*
48	Do your warranties cover the expense of technicians' travel time and mileage to perform warranty repairs?	Caterpillar does not cover travel time and mileage. Dealer territories vary considerably from state to state as do their policies about travel time and mileage during the warranty period.	*
49	Are there any geographic regions of the United States or Canada (as applicable) for which you cannot provide a certified technician to perform warranty repairs? How will Sourcewell participating entities in these regions be provided service for warranty repair?	One of our key differentiating strengths is our ability to service equipment regardless of where it is located. Please see applicable warranty statements in the attached documents.	*
50	Will you cover warranty service for items made by other manufacturers that are part of your proposal, or are these warranties issues typically passed on to the original equipment manufacturer?	Warranty service for machines ordered from a Caterpillar facility are generally provided by Caterpillar and performed by Cat dealers. Some items, such as tires, are covered under their manufacturers' warranties.	*
51	What are your proposed exchange and return programs and policies?	Please see applicable warranty statements in the attached documents.	*
52	Describe any service contract options for the items included in your proposal.	We have a large variety of service contract options which can all be customized according to customer needs. Below are just two examples. More solutions are available and we encourage members and dealers to explore all options. 1) Equipment Protection Plans (EPP): After the initial warranty period ends, members may choose to purchase additional protection plans to reduce their exposure to unplanned costs. These policies are written based on months and hours of operation. There are four standard levels of coverage: 1) Powertrain 2) Powertrain + Hydraulics 3) Powertrain + Hydraulics + Technology 4) Premier A description of all these options is included in the attached Equipment Protection Plans document. EPP can be purchased at the same time as the machine purchase, or anytime before the standard warranty expires. 2) Customer Value Agreements (CVA's): A member may choose to enter into an agreement with their Cat dealer to perform routine maintenance and/or repairs. These contracts are customizable based on member needs. The selling Cat dealer can take responsibility for some or all the required service and maintenance needs to allow the agency to gain efficiency by focusing on the performance demands more than maintenance. CVA's are a useful tool to manage expenses. CVAs can be purchased at the same time as the machine purchase, or anytime after. Cat Financial also offers CVAs, which can be performed by Cat dealers in the United States, and are particularly helpful for customers who move their machine fleet to multiple locations which may have different servicing Cat dealers.	*

Table 10: Payment Terms and Financing Options

Line Item	Question	Response *	
53	Describe your payment terms and accepted payment methods.	Cat dealers are independently owned businesses. As such their payment terms and accepted payment methods vary, but all will be stated on individual invoices. The most common terms are net 30.	*
54	Describe any leasing or financing options available for use by educational or governmental entities.	We offer both leasing and financing options to governmental members of Sourcewell at rates lower than available to the general public. Caterpillar has its own financing arm, Cat Financial. Cat Financial was founded in 1981 and serves Cat customers and dealers. With over 1,900 employees, Cat Financial is active in more than 40 countries covering more than 148,000 customers worldwide. Cat Financial offers you a complete solution for your acquisition needs: - Equipment & Attachments - Parts - Service - Rebuilds Financial products are aligned and customized with the project and work site requirements such as operating lease, loan or finance lease. Find more information from Cat Financial here: https://www.cat.com/en_US/support/financing-protection.html	*
55	Describe any standard transaction documents that you propose to use in connection with an awarded contract (order forms, terms and conditions, service level agreements, etc.). Upload a sample of each (as applicable) in the document upload section of your response.	Cat dealers are independently owned businesses. As such their standard transaction documents will vary.	*
56	Do you accept the P-card procurement and payment process? If so, is there any additional cost to Sourcewell participating entities for using this process?	Because Cat dealers will be receiving payments directly from members, accepting P-card procurement will be at their discretion. Many dealers do accept this method without additional fees. Some have limitations on the amount that can be processed.	*

Table 11: Pricing and Delivery

Provide detailed pricing information in the questions that follow below. Keep in mind that reasonable price and product adjustments can be made during the term of an awarded Contract as described in the RFP, the template Contract, and the Sourcewell Price and Product Change Request Form.

Line Item	Question	Response *	
57	Describe your pricing model (e.g., line-item discounts or product-category discounts). Provide detailed pricing data (including standard or list pricing and the Sourcewell discounted price) on all of the items that you want Sourcewell to consider as part of your RFP response. If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	We offer a deep list discount off the current Caterpillar machine and work tool list prices to all Sourcewell members. We have provided base machine list pricing in the document pricing section. Base machines must be properly configured with other mandatory and optional items from the price list before they are considered operational. For the execution of the agreement we will ask our Cat dealer and Sourcewell member to use the Caterpillar price list that is current at the time of the quote. Dealers, in consultation with the member, will configure the machine to the desired specifications and apply the stated list discount to that configured list price amount. Dealer and members should remember to factor in any expected price increases if a machine will be built to order. The pricing document, in the applicable pricing document attachment section, shows the list discount offered for each new machine. Additionally, we are pleased to offer a list discount of 15% off all products and consulting services under Cat Safety Services.	*
58	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	Pricing in this proposal is a percentage discount from list on current machine and work tools list prices. Our discount range varies between 3 - 34% off of the list price depending on the product family or model.	*
59	Describe any quantity or volume discounts or rebate programs that you offer.	Our dealers are empowered to consider purchase order volume, repeat purchases, etc. They may offer members additional discounts and /or services at their discretion.	*
60	Propose a method of facilitating “sourced” products or related services, which may be referred to as “open market” items or “nonstandard options”. For example, you may supply such items “at cost” or “at cost plus a percentage,” or you may supply a quote for each such request.	Sourced goods / Open Market Items are available to members from Cat dealers. The prices for these good or services will represent fair marketing value and will be determined between the member and the selling dealer. We encourage our dealers and members to use these options as it facilitates complimentary products and streamlines the procurement process. Customers and dealers are responsible for including their Sourcewell member numbers on all documentation related to these purchases. Caterpillar Inc. is not a party to these sales and is exempted from including them in quarterly reports. For audits, inclusion of a customer's Sourcewell member number on the PO and /or invoice shall be deemed sufficient.	*
61	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	Machines are unique in their requirements for preparation prior to use. Some may require local final assembly due to their large size others may have locally installed options (fire suppression, beacons, auto lube systems for example). When a dealer issues a quote for a machine, any dealer costs (like pre-delivery inspection, installation, set up, training, etc.) will be itemized separately and are not subject to the Caterpillar list discount for Sourcewell members.	*
62	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	There is no additional cost to members who choose to pick up their machines from the Cat dealer. Dealers may charge fees for delivery to the Sourcewell member's location.	*
63	Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, Canada, or any offshore delivery.	Just as for members in the 48 contiguous states, there is no additional cost to members who choose to pick up their machine from their Cat dealer. Dealers may charge fees for delivery to the Sourcewell members' location.	*
64	Describe any unique distribution and/or delivery methods or options offered in your proposal.	Machines are large purchases and if there are unique Sourcewell member requirements our dealers will be happy to discuss on a case by case basis.	*

Table 12: Pricing Offered

Line Item	The Pricing Offered in this Proposal is: *	Comments
65	b. the same as the Proposer typically offers to GPOs, cooperative procurement organizations, or state purchasing departments.	Caterpillar wants to provide the governmental customer the best list discount possible to allow them to be good stewards of tax-payers funds. We want our governmental customers to have the ability to choose which cooperative contract better fits their needs.

Table 13: Audit and Administrative Fee

Line Item	Question	Response *	
66	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed Contract with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing, that the Vendor reports all sales under the Contract each quarter, and that the Vendor remits the proper administrative fee to Sourcewell. Provide sufficient detail to support your ability to report quarterly sales to Sourcewell as described in the Contract template.	We plan to continue our very robust process to ensure reporting speed, accuracy, and contract compliance. Caterpillar and our Cat dealers have very close and trusting relationships. Our dealers are long-established, and the current process (under contract #032119-CAT) is working well. 1) To ensure pricing accuracy, we maintain our current Sourcewell customer discount sheet on our dealer facing pricing pages. Dealers integrate these numbers automatically in their quoting software. 2) To ensure new machines and work tool sales are recorded properly, we use our post-sale credit system. In a nutshell, this means that we corporately support the pricing offered in this contract at a level below what's available to other customers. To receive this additional monetary support after the machine is delivered, dealers must supply the member's name, address, and member number. There is no additional burden or cost to our dealers to use the Sourcewell contract and this is part of the reason for their high engagement and our high reporting accuracy. 3) At month end, we gather the new machine and work tool sales data attributed to Sourcewell and aggregate it for our reporting. 4) After quarter end, we will send the quarterly sales report and administration fee payment to Sourcewell for all items that are subject to the administrative fee.	*
67	If you are awarded a contract, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the contract.	We regularly track the % of sales that are sold using a cooperative contract. We will continue this practice if we are awarded a contract for RFP 011723.	*
68	Identify a proposed administrative fee that you will pay to Sourcewell for facilitating, managing, and promoting the Sourcewell Contract in the event that you are awarded a Contract. This fee is typically calculated as a percentage of Vendor's sales under the Contract or as a per-unit fee; it is not a line-item addition to the Member's cost of goods. (See the RFP and template Contract for additional details.)	Per amendment #1 to Contract #032119-CAT, we will be pleased to offer an administrative fee of 0.33% of Caterpillar's list price for each piece of new equipment and serialized work tools purchased by Sourcewell's Participating Entities. Caterpillar will pay this fee and will not ask dealers or members to pay the fee.	*

Table 14A: Depth and Breadth of Offered Equipment Products and Services

Line Item	Question	Response *	
69	Provide a detailed description of the equipment, products, and services that you are offering in your proposal.	The Cat equipment product line, consisting of more than 300 machines, sets the standard for our industry. We plan to help you meet your needs with our equipment, with our distribution and product support system, and the continual introduction and updating of products. Caterpillar is pleased to offer a wide variety of products for Sourcewell members. Excluding paving products, equipment and services awarded on 060122-CAT these include: - Cat Backhoe Loaders (9 models offered) - Cat Compact Track Loader/Skid Steer Loader (14 models offered) - Cat Track/Wheel Hydraulic Excavators (41 models offered) - Cat Motor Graders (7 models offered) - Cat Telehandlers (8 models offered) - Cat Track Loaders (3 models offered) - Cat Track/Wheel Dozers (15 models offered) - Cat Wheel Loaders (19 models offered) - Cat Wheel Tractor Scrapers (7 models offered) - Cat Articulated Trucks (5 models offered) - Cat Rigid Frame Trucks (2 models offered) - Cat Material Handlers (3 models offered) - Cat Landfill Compactors (3 models offered) - Product offerings by model and discount can be found in the pricing attachment within the applicable proposal pricing section. Services and support include: - Cat Attachments (Worktools) - Cat Technology - Cat Safety Services - Cat Job Site Solutions - Product offerings by model and discount can be found in the pricing attachment within the applicable proposal pricing section. - Services and support brochures can be found in the additional documents section by name of offering. For more detailed information on each of these products/offerings see the following website: https://www.cat.com/en_US.html	*
70	Within this RFP category there may be subcategories of solutions. List subcategory titles that best describe your products and services.	N/A	*

Table 148: Depth and 8readth of Offered Equipment Products and Services

Indicate below if the listed types or classes of equipment, products, and services are offered within your proposal. Provide additional comments in the text box provided, as necessary.

Line Item	Categor\ or T\pe	Offered	Comments
71	Wheeled, tracked, and backhoe loaders	(•) Yes ( ) No	Manufactured by Caterpillar. Offerings listed in applicable pricing attachment section.
7	Motor Graders	(•) Yes ( ) No	Manufactured by Caterpillar. Offerings listed in applicable pricing attachment section.
73	Wheeled and tracked excavators	(•) Yes ( ) No	Manufactured by Caterpillar. Offerings listed in applicable pricing attachment section.
74	Bulldozers, compactors, scapers, articulated and rigid haulers	(•) Yes ( ) No	Manufactured by Caterpillar. Offerings listed in applicable pricing attachment section.
75	Cranes	( ) Yes (•) No	NIA
76	Accessories or attachments for the offering in #71-75 above	(•) Yes ( ) No	Manufactured by Caterpillar. Offerings listed in applicable pricing attachment section.
77	Technology or services for the offering in #71-75 above	(•) Yes ( ) No	Manufactured or offered by Caterpillar. Offerings listed in applicable pricing attachment section.

Table 14C: Required Offering of Equipment

Indicate below if the proposer's proposal includes at least one (1) of the following listed types or classes of equipment. Provide additional comments in the text box provided, as necessary.

Line Item	Categor\ or T\pe	Offered	Comments
78	Wheel loader with published net horsepower (HP) of at least 300 HP	(•) Yes ( ) No	Manufactured by Caterpillar. Offerings listed in applicable pricing attachment section.
79	Wheeled or tracked excavator with a published net horsepower (HP) of at least 150 HP	(•) Yes ( ) No	Manufactured by Caterpillar. Offerings listed in applicable pricing attachment section.
80	Motor Grader with a published maximum operating weight of at least 30,000 lbs.	(•) Yes ( ) No	Manufactured by Caterpillar. Offerings listed in applicable pricing attachment section.
81	Rough terrain, all terrain, crawler, floating, lattice, or telescopic crane with a published maximum lifting capacity of at least 300 tons and a published maximum boom length of at least 150 feet	( ) Yes (•) No	NIA

Exceptions to Terms, Conditions, or Specifications Form

Only those Proposer Exceptions to Terms, Conditions, or Specifications that have been accepted by Sourcewell have been incorporated into the contract text.

Documents

Ensure your submission document(s) conforms to the following:

1. Documents in PDF format are preferred. Documents in Word, Excel, or compatible formats may also be provided.

2. Documents should NOT have a security password, as Sourcewell may not be able to open the file. It is your sole responsibility to ensure that the uploaded document(s) are not either defective, corrupted or blank and that the documents can be opened and viewed by Sourcewell.

3. Sourcewell may reject any response where any document(s) cannot be opened and viewed by Sourcewell.

4. If you need to upload more than one (1) document for a single item, you should combine the documents into one zipped file. If the zipped file contains more than one (1) document, ensure each document is named, in relation to the submission format item responding to. For example, if responding to the Marketing Plan category save the document as "Marketing Plan."

Addenda, Terms and Conditions

PROPOSER AFFIDAVIT AND ASSURANCE OF COMPLIANCE

I certify that I am the authorized representative of the Proposer submitting the foregoing Proposal with the legal authority to bind the Proposer to this Affidavit and Assurance of Compliance:

1. The Proposer is submitting this Proposal under its full and complete legal name, and the Proposer legally exists in good standing in the jurisdiction of its residence.

2. The Proposer warrants that the information provided in this Proposal is true, correct, and reliable for purposes of evaluation for contract award.

3. The Proposer, including any person assisting with the creation of this Proposal, has arrived at this Proposal independently and the Proposal has been created without colluding with any other person, company, or parties that have or will submit a proposal under this solicitation; and the Proposal has in all respects been created fairly without any fraud or dishonesty. The Proposer has not directly or indirectly entered into any agreement or arrangement with any person or business in an effort to influence any part of this solicitation or operations of a resulting contract; and the Proposer has not taken any action in restraint of free trade or competitiveness in connection with this solicitation. Additionally, if Proposer has worked with a consultant on the Proposal, the consultant (an individual or a company) has not assisted any other entity that has submitted or will submit a proposal for this solicitation.

4. To the best of its knowledge and belief, and except as otherwise disclosed in the Proposal, there are no relevant facts or circumstances which could give rise to an organizational conflict of interest. An organizational conflict of interest exists when a vendor has an unfair competitive advantage or the vendor's objectivity in performing the contract is, or might be, impaired.

5. The contents of the Proposal have not been communicated by the Proposer or its employees or agents to any person not an employee or legally authorized agent of the Proposer and will not be communicated to any such persons prior to Due Date of this solicitation.

6. If awarded a contract, the Proposer will provide to Sourcewell Participating Entities the equipment, products, and services in accordance with the terms, conditions, and scope of a resulting contract.

7. The Proposer possesses, or will possess before delivering any equipment, products, or services, all applicable licenses or certifications necessary to deliver such equipment, products, or services under any resulting contract.

8. The Proposer agrees to deliver equipment, products, and services through valid contracts, purchase orders, or means that are acceptable to Sourcewell Members. Unless otherwise agreed to, the Proposer must provide only new and first-quality products and related services to Sourcewell Members under an awarded Contract.

9. The Proposer will comply with all applicable provisions of federal, state, and local laws, regulations, rules, and orders.

10. The Proposer understands that Sourcewell will reject RFP proposals that are marked "confidential" (or "nonpublic," etc.), either substantially or in their entirety. Under Minnesota Statutes Section 13.591, subdivision 4, all proposals are considered nonpublic data until the evaluation is complete and a Contract is awarded. At that point, proposals become public data. Minnesota Statutes Section 13.37 permits only certain narrowly defined data to be considered a "trade secret," and thus nonpublic data under Minnesota's Data Practices Act.

11. Proposer its employees, agents, and subcontractors are not:
    1. Included on the "Specially Designated Nationals and Blocked Persons" list maintained by the Office of Foreign Assets Control of the United States Department of the Treasury found at: https://www.treasury.gov/ofac/downloads/sdnlist.pdf;

    2. Included on the government-wide exclusions lists in the United States System for Award Management found at: https://sam.gov/SAM/; or

    3. Presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from programs operated

by the State of Minnesota; the United States federal government or the Canadian government, as applicable; or any Participating Entity. Vendor certifies and warrants that neither it nor its principals have been convicted of a criminal offense related to the subject matter of this solicitation.

☑ By checking this box I acknowledge that I am bound by the terms of the Proposer's Affidavit, have the legal authority to submit this Proposal on behalf of the Proposer, and that this electronic acknowledgment has the same legal effect, validity, and enforceability as if I had hand signed the Proposal. This signature will not be denied such legal effect, validity, or enforceability solely because an electronic signature or electronic record was used in its formation. - Sean Egel, Sales Support Consultant, Caterpillar Inc.

The Proposer declares that there is an actual or potential Conflict of Interest relating to the preparation of its submission, and/or the Proposer foresees an actual or potential Conflict of Interest in performing the contractual obligations contemplated in the bid.

SOURCEWELL TRADEMARK LICENSE ADDENDUM

This Addendum is by and between **SOURCEWELL**, 202 – 12th Street NE, PO Box 219, Staples, Minnesota 56479 ("Sourcewell") and **Caterpillar Inc.**, having its principal place of business at 5212 N. O'Connor Blvd., Suite 1100, Irving, TX 75039, and offices at 100 NE Adams Street, Peoria, Illinois, 61629 ("Caterpillar" or "Vendor"). Sourcewell and Caterpillar may be referred to in this Agreement as a "Party" and collectively as the "Parties."

The Parties maintain a contractual relationship for Vendor to provide equipment, products, or services to Sourcewell's cooperative purchasing contracts as follows:

Sourcewell Contract 011723 – CAT (Solicitation Number: 011723)

Sourcewell and Vendor each own all right, title, and interest in their respective names, trademarks, service marks, related logos, and all other rights in the names, designs, likenesses and visual representations thereof ("Licensed Trademarks"), and desire to grant each other a royalty-free license to use certain Licensed Trademarks owned by the other Party under the terms and conditions set forth herein.

ARTICLE I: GRANT OF LICENSE

A. GRANT OF LICENSE. During the term of the Contract:

1. Sourcewell grants to Vendor a royalty-free, worldwide, non-exclusive right and license to use Sourcewell's Licensed Trademarks provided to Vendor by Sourcewell in advertising and promotional materials for the purpose of marketing Sourcewell's relationship with Vendor.

2. Vendor grants to Sourcewell a royalty-free, worldwide (except for those jurisdictions that are prohibited by applicable Anti-Corruption and International Trade Laws), non-exclusive right and license to use Vendor's Licensed Trademarks provided to Sourcewell by Vendor in advertising and promotional materials for the purpose of marketing Vendor's relationship with Sourcewell.

"Anti-Corruption and International Trade Laws" means all statutes, regulations, rules, executive orders, supervisory requirements, directives, ordinances, circulars, opinions, interpretive letters, and official releases of or by any government, or any authority, department or agency thereof or self-regulatory organization related to bribery, fraud, corruption, or international trade.

3. The Parties agree that each is the owner of all rights, including without limitation common law rights and goodwill, in relation to their respective Licensed Trademarks, and that any goodwill derived from the use of Licensed Trademarks by the other Party shall inure to the owner of the respective Licensed Trademarks.

B. LIMITED RIGHT OF SUBLICENSE. The rights and licenses granted herein includes a limited right of each Party to grant sublicenses to its and their respective distributors, marketing representatives, and agents (collectively "Permitted Sublicensees") in advertising and promotional materials for the purpose of marketing the Contract. Any sublicense granted will be subject to the terms and conditions of this Addendum. Each Party will be responsible for any breach of this Article by any of their respective sublicensees.

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

C. USE; QUALITY CONTROL.

1. Neither Party may alter the other Party's Licensed Trademarks from the form provided by the other Party and must comply with the other Party's removal requests as to specific uses of its Licensed Trademarks.

2. Each Party agrees to use, and to cause its Permitted Sublicensees to use, the other Party's Licensed Trademarks only in good faith and in a dignified manner consistent with such Party's use of the Licensed Trademarks. Upon written notice to the breaching Party, the breaching Party or their Permitted Sublicensees have thirty (30) days of the date of the written notice to cure the breach or the license will be terminated.

3. Beyond what is permitted in this Addendum, neither Party will:

a. attempt to register, or register any trademark, service mark, symbol, logo, get-up or device which is confusingly similar to any of the other Party's Licensed Trademarks in any jurisdiction;

b. represent that it has any rights of any nature in the Licensed Trademarks other than those enjoyed under the terms of this Agreement;

c. use the other Party's trademarks, service marks or copyrights, translations thereof or marks similar thereto, as part of its corporate name, trade name or a d/b/a name, favicons, social media names/handles, email addresses, email extensions, or domain names without prior written approval from the other Party; or

d. use the other Party's trade names, trademarks, or service marks on any collateral business materials (e.g., business cards, letterhead, invoices, pens, notepads, fax cover sheets, etc.), unless otherwise approved in writing by the other Party.

ARTICLE II: TERM, TERMINATION, AND MISCELLANEOUS.

A. EFFECTIVE DATE. This Addendum is effective upon the date of the final signature below.

B. TERMINATION. Unless earlier terminated in accordance with this Article, this Addendum expires immediately upon the expiration or termination of the Contract.

1. *Termination for Convenience*. This Addendum may be terminated by either Party at any time upon ninety (90) days' prior written notice to the other Party.

2. *Termination for Breach*. This Addendum may be terminated by either Party upon a breach of the terms of this Addendum by the other Party, upon written notice of breach to the breaching Party, and only if such breach is not cured within thirty (30) days of the date of the written notice.

3. *Effect of Termination*. Upon the termination of this Addendum for any reason, each Party will have thirty (30) days to, and require its Permitted Sublicensees to, remove all Licensed Trademarks from signage, websites, and the like bearing the other Party's name or logo

DocuSign Envelope ID: 9AA872AA-9802-4A6D-8065-BECD9EB74C88

(excepting Sourcewell's pre-printed catalog of vendors which may be used until the next printing). Vendor must return all marketing and promotional materials, including signage, provided by Sourcewell, or dispose of it according to Sourcewell's written directions.

4. Miscellaneous. The terms and conditions of this Addendum shall have no effect on the terms and conditions of any other trademark licenses signed by the Parties.

All other terms of the Contract remain in full force and effect, unless otherwise terminated.

Aaron Jenkins
CityOf Redlands DOORS ID: 1207
35 Cajon St
Redlands, CA 92373

Dear Aaron Jenkins,

This letter is regarding information reported to the California Air Resources Board (CARB) using DOORS, the online reporting tool for the In-Use Off-Road Diesel-Fueled Fleets Regulation, California Code of Regulations, title 13, sections 2449, 2449.1, and 2449.2 (Off-Road Regulation). Based on the information your fleet reported in DOORS, it appears you have one or more vehicles that will be affected by the upcoming Medium Fleet[1] **Tier 0** phase-out date of **January 1, 2026**, in accordance with the Off-Road Regulation's phase-out provision (Cal. Code Regs., tit. 13, § 2449.1, subd. (c)(2)(A)).

As outlined below, you reported in DOORS the following vehicles with Tier 1 or 1999 or older on-road engines:

Equipment Identification Number (EIN)	Your Vehicle Number (if applicable)	Engine Tier
BX8K38	0832	T0
GG4S78	893	T0
GL8C95	895	T0

The Off-Road Regulation states that fleets shall not operate any vehicle with a phased-out engine in California as of the effective date of the phase-out for the engine tier and corresponding fleet size. You can find information about the engine tier on the engine's emission control label. If the engine tier is not visible, you may use the U.S. EPA engine

[1] A "medium fleet" is a fleet that does not meet the small fleet classification of a total maximum horsepower (hp) less than or equal to 2500 hp, or the large fleet classification of a total maximum hp greater than 5,000 hp. (Cal. Code Regs., tit. 13, §2449 (28)(B)).

family name and CARB's executive order in the Off-Road Certification database[2] to determine the engine tier or contact the equipment dealer.

Options to achieve compliance with this requirement include retiring the vehicle, designating the vehicle as a permanent low-use vehicle, repowering the vehicle with a higher tier engine, or rebuilding the engine to a more stringent emissions configuration (Cal. Code Regs., tit. 13, § 2449, subd. (c)(65)).

The Off-Road Regulation Phase-Out schedule for Medium Fleets is outlined below:

Tier Phase-Out for Medium Fleets	
Engine Tier	**Phase-Out Date**
Tier 0 (or 1994 or older on-road engines)	January 1, 2026
Tier 1 (or 1999 or older on-road engines)	January 1, 2028
Tier 2 (or 2003 or older on-road engines)	January 1, 2030

For questions regarding the Off-Road Regulation, reporting or phase-out requirements, contact the DOORS Hotline by phone at (877) 59DOORS (877-593-6677), or by email at *doors@arb.ca.gov*. For additional information regarding the Off-Road Regulation, please visit our homepage at *www.arb.ca.gov/ordiesel*.

Sincerely,

The California Air Resources Board
Off-Road Implementation

City Council **AGENDA ITEM NO. L7.**

DATE: June 2, 2026

TO: Honorable Mayor and City Council Members

SUBJECT: Consideration of the City Manager's Proposed Two-Year Budget for Fiscal Years 2027 and 2028 and of Resolution No. 8794 (Interim Assistant City Manager Garcia)

MOTION:

If the City Council determines that staff's recommendation is appropriate, the following motions are provided:

1. I move to adopt the City Manager's Proposed Two-Year Budget for Fiscal Years 2027 and 2028 and adopt Resolution No. 8794.

   -OR-

2. I move to continue the consideration of the City Manager's Proposed Two-Year Budget for Fiscal Years 2027 and 2028 to the next regular meeting of the City Council on June 16, 2026.

RECOMMENDATION:

Staff recommends the City Council direct staff accordingly.

DISCUSSION:

The Proposed Biennial Budget for Fiscal Years 2027 and 2028 was developed through a collaborative process involving the City Manager, department directors, management staff, budget preparation staff, the City Council, and the public. Budget planning began with updates to long-range fiscal models and continued through departmental budget submittals, review of projected revenues, evaluation of personnel and operating costs, and analysis of supplemental operating, capital, equipment, and staffing requests.

Departments were directed to limit baseline services and supplies increases to no more than three percent above original Fiscal Year 2026 adopted budgets in order to maintain existing service levels. Supplemental requests were separately identified and evaluated based on critical service demands, deferred maintenance, aging infrastructure and equipment needs, regulatory requirements, operational efficiency, and long-term fiscal capacity. Because not all requested enhancements could be accommodated within available resources, departments worked collaboratively to identify reductions, defer lower-priority items, and re-prioritize existing resources in support of critical operational and capital needs.

Fiscal Year 2026 Estimate

As the current fiscal year draws to a close, the 12-month estimate reflects updated projections for General Fund revenues, expenditures, transfers, and use of prior-year surplus. Compared to the adjusted budget, updated revenue forecasts reflect an increase of approximately $5.2 million, primarily associated with stronger-than-anticipated investment earnings and additional revenue from the Code Enforcement rental property inspection program.

Projected use of reserves and projected expenditures also increased, largely due to the timing and implementation of previously approved, reserve-funded capital projects, including State Street City Hall and Safety Hall. These changes reflect the carryover and implementation of Council-authorized capital projects rather than new cost overruns. Collectively, the updated 12-month estimate improves the General Fund bottom line by approximately $6 million compared to the adjusted budget.

General Fund Overview - Fiscal Years 2027 and 2028

The Proposed Biennial Budget for Fiscal Years 2027 and 2028 was prepared during a period of moderating revenue growth and increasing expenditure pressure. Over the past several fiscal years, the City benefited from unusually strong post-pandemic revenue growth, including sustained growth in sales tax and elevated property tax growth supported by real estate activity and assessed value increases. That period of expansion allowed the City to respond to emerging needs and advance Council priorities; however, many of those investments created ongoing service and operating commitments.

The current budget cycle reflects a different financial environment. Property tax growth has moderated to approximately four percent annually, and sales tax growth has flattened to approximately one to two percent, with modest growth projected over the near term. At the same time, the City continues to absorb rising personnel, operational, infrastructure, construction, insurance, utilities, and contracted service costs. As a result, the budget emphasizes maintaining core services, aligning ongoing expenditures with sustainable revenue levels, and carefully prioritizing new or expanded commitments.

The proposed General Fund budget summary is as follows:

General Fund Budget Summary

	2026 ADJUSTED BUDGET	2026 12-MONTH ESTIMATED	
TOTAL AVAILABLE FINANCIAL SOURCES	$ 145,862,727	$ 165,547,120	19,684,393
FINANCIAL REQUIREMENTS:			
Total Appropriations/New Reserves	134,750,183	134,783,540	33,357
Total Interfund Transfers To Other Funds	24,842,712	38,521,309	13,678,597
TOTAL FINANCIAL REQUIREMENTS	$ 159,592,895	$ 173,304,849	13,711,954
USE OF PRIOR YEAR SURPLUS	$ 13,730,168	$ 7,757,729	(5,972,439)
SOURCES OVER/(UNDER) REQUIREMENTS	-	-	
ENDING FUND BALANCE-UNRESERVED	$ 37,687,706	$ 43,660,145	

The proposed budget anticipates the strategic use of one-time fund balance to support major capital and facility investments while maintaining a healthy unassigned General Fund balance. This approach recognizes that the City is continuing to advance significant long-term priorities while also entering a period in which future financial flexibility may become more constrained.

Major Budget Priorities and Investments

The proposed budget maintains core service levels and continues to advance a number of key City Council priorities. Notable General Fund investments and commitments include:

- Public safety and emergency response investments, including replacement of the existing Medic Squad 264 vehicle, advanced emergency medical equipment modernization, and ballistic protective equipment for Fire Department personnel.
- Police Department operational support enhancements, including modified and enhanced administrative, dispatch, and records management support intended to strengthen oversight, coordination, compliance, and service delivery.
- Continued investment in park and community facilities, including the Texonia Park Revitalization Project, Sylvan Park restroom improvements, and Joslyn Senior Center roof replacement.
- Preservation and maintenance of major civic and historic facilities, including termite remediation and related preservation work at the A.K. Smiley Public Library.
- Continued funding for major long-term facility and infrastructure projects, including Safety Hall, Fire Station No. 264 relocation planning and design, and future replacement of the A.K. Smiley Public Library cooling tower system.
- Continued support for homelessness response and transitional housing services, including the anticipated acquisition of the Good Nite Inn transitional housing facility through a partnership substantially funded by State and County resources.

The budget also acknowledges that not all requested projects and initiatives could be accommodated within available resources. Deferred or unfunded requests include, among others, the proposed Skate Park Pump Track, fencing improvements at Prospect Park near the theater area, and the Food Security Task Force initiative. These decisions reflect the need to balance competing community priorities within a more constrained fiscal environment.

Measure T Spending Overview

Measure T continues to serve as a critical local funding source supporting public safety operations, infrastructure maintenance, capital reinvestment, homelessness response, and community quality-of-life programs. Projected Measure T revenues are $20,629,000 in Fiscal Year 2027 and $21,252,000 in Fiscal Year 2028.

Planned Measure T-supported investments include public safety personnel and operations, police and fire equipment replacement, traffic signal maintenance and repairs, park and facility improvements, streets maintenance equipment, recreation and senior programming, homelessness services, and public safety and facility debt service. Because Measure T funds ongoing services and multi-year capital investments, actual expenditures may occur across fiscal years depending on project timing, delivery schedules, and implementation needs.

Other Major Funds

While the General Fund represents the primary focus of this staff report, the City's enterprise funds also include significant investments necessary to support essential municipal services. The proposed budget includes enterprise fund appropriations totaling approximately $136.3 million in Fiscal Year 2027 and $92.8 million in Fiscal Year 2028.

In the Water Fund, proposed appropriations total approximately $43.3 million in Fiscal Year 2027 and $43.7 million in Fiscal Year 2028, including approximately $12.4 million and $12.1 million, respectively, for capital improvement projects. Planned investments include pipeline replacement, expansion and renovation of the Joint Utilities Laboratory, wellhead perchlorate treatment, fleet and heavy-duty equipment replacements, and a filter press to dewater sludge at the Hinckley Water Treatment Plant.

In the Wastewater Fund, proposed appropriations total approximately $68.5 million in Fiscal Year 2027 and $21.7 million in Fiscal Year 2028. The budget includes approximately $2.5 million in pipeline replacement and the Wastewater Treatment Plant Capital Modifications Phase 2 project, estimated at approximately $45 million. That project is planned to completely rebuild the existing facility and is supported by Clean Water State Revolving Fund financing.

In the Solid Waste Fund, annual appropriations total approximately $27.2 million in Fiscal Year 2027 and $27.4 million in Fiscal Year 2028. Significant capital investments include approximately $7 million for new solid waste collection vehicles, including zero-emission vehicles and related infrastructure required by State mandates, as well as the Phase V cell expansion, estimated at approximately $4 million.

Economic Outlook and Budget Risks

The City's financial position is expected to remain stable during the Fiscal Years 2027 and 2028 biennium; however, the economic environment is less favorable than the unusually strong post-pandemic period. Revenue growth has normalized, while the cost of maintaining existing services, staffing, facilities, infrastructure, and previously expanded programs continues to increase.

The proposed budget is built with resiliency and flexibility in mind, but several risks remain that could materially affect future financial performance. These include ongoing negotiations for successor agreements with the City's nine bargaining units; construction cost escalation and market volatility; the budgeted vacancy factor of approximately seven percent; elevated interest rates and their potential effect on economically sensitive revenues; and the City's exposure to claims, settlements, and litigation costs as a self-insured agency.

For these reasons, continued evaluation of programs, service levels, staffing, capital project timing, and long-term affordability will be necessary in future fiscal years. The proposed budget reflects a deliberate effort to preserve core services, continue critical reinvestment, and maintain the City's strong financial position while recognizing that future budgets may require additional reductions, deferrals, or reprioritization if revenue growth slows further or expenditure growth exceeds current assumptions.

Conclusion

The City Manager's Proposed Biennial Budget for Fiscal Years 2027 and 2028 represents a balanced and deliberate financial plan. It maintains essential municipal services, continues investment in public safety and infrastructure, advances several transformational community projects, and recognizes the need for greater prioritization as revenue growth moderates and ongoing costs increase.

The proposed budget continues to support major community priorities, including Safety Hall, Fire Station No. 264 relocation planning, public safety technology modernization, homelessness response efforts, parks and facility improvements and critical building system replacements. At the same time, the budget acknowledges that there remains more to do than can reasonably be funded at one time. Staff will continue to monitor revenues, expenditures, economic conditions, labor cost assumptions, and project timing throughout the biennium and will return to the City Council with updates and recommended adjustments as necessary.

Staff recommends that the City Council adopt Resolution No. 8794 approving the City Manager's Proposed Biennial Budget for Fiscal Years 2027 and 2028.

For a full discussion of Fiscal Years 2027 and 2028, including specific details on Measure T projects and spending, please see the City Manager's Budget Message.

RESOLUTION NO. 8794

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF REDLANDS ADOPTING THE BIENNIAL BUDGET OF THE CITY OF REDLANDS FOR THE FISCAL YEAR ENDING JUNE 30, 2027 AND ENDING JUNE 30, 2028

WHEREAS, the proposed two-year budget of the City of Redlands for the Fiscal Years beginning July 1, 2026 and ending June 30, 2027, and beginning July 1, 2027 and ending June 30, 2028, consisting of one volume entitled "Proposed Biennial Budget for Fiscal Years 2027 and 2028," has been made available to the public and City Council on May 15, 2026, presented and reviewed at a special City Council meeting on May 18, 2026 and presented for review, consideration, and adoption at the regular City Council meeting of June 2, 2026; and

WHEREAS, the City Council has given careful consideration to the adoption of a budget and financial plan for the use of funds for Fiscal Years 2027 and 2028 as set forth in the entitled "Proposed Biennial Budget for Fiscal Years 2027 and 2028" and including any modifications, revisions, and/or corrections made and approved by the City Council, which are incorporated here by reference as though fully set forth herein, and together constitute the "Adopted Biennial Budget for Fiscal Years 2027 and 2028."

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF REDLANDS AS FOLLOWS:

Section 1. The biennial budget for the City of Redlands for Fiscal Years beginning July 1, 2026 and ending June 30, 2027 and beginning July 1, 2027 and ending June 30, 2028 prepared and submitted to the City Council by the City Manager and on file in the Office of the City Clerk, the A. K. Smiley Public Library and the Redlands Community Center, as modified and amended by the City Council, is hereby adopted as the biennial budget for Fiscal Years 2027 and 2028, on the basis of the totals set forth in each of the budgets contained therein by program, division and/or department.

Section 2. At the conclusion of fiscal year ending June 30, 2026, certain purchase orders will exist as Outstanding Encumbrances representing contractual obligations of previously budgeted funds. In addition, budgeted funds for certain items or projects in various stages of acquisition or development have previously been approved or will be approved or will be approved by the City Council to be carried forward to fiscal year 2027 as Continuing Appropriations. The Outstanding Encumbrances and Continuing Appropriations shall be deemed to be re-budgeted as an addition to the budget amounts previously set forth in this resolution.

Section 3. At the conclusion of fiscal year ending June 30, 2027, certain purchase orders will exist as Outstanding Encumbrances representing contractual obligations of previously budgeted funds. In addition, budgeted funds for certain items or projects in various stages of acquisition or development have previously been approved or will be approved or will be approved by the City Council to be carried forward to fiscal year 2028 as Continuing Appropriations. The Outstanding Encumbrances and Continuing Appropriations shall be deemed to be re-budgeted as an addition to the budget amounts previously set forth in this resolution.

I:\cmo\Resolutions\Resolution No. 8794 FY27-28 Biennial Budget.bm.05.28.2026.docx

Section 4. The approved budgets for individual grants remain as authorized appropriations for the individual grants until the grant is completed or expires. Any unexpended authorized appropriation for each grant and the corresponding revenue budget is automatically carried over from fiscal year to fiscal year until the funds of the individual grant are expended, the grant expires, or the grant is canceled by the City Manager.

Section 5. The City Manager shall have authority to adjust the appropriations within each fund, provided however, that the total appropriations within each fund do not exceed the amounts approved in this budget resolution or future amendments to the budgeted amounts. The City Manager may delegate said authority to the Management Services/Finance Director, Assistant Finance Director, or Finance Manager. Said adjustments of the appropriations for each department or activity shall be made only upon written request to the Management Services Department, the form of which shall be prescribed by the Management Services/Finance Director.

Section 6. This Resolution shall become effective immediately upon its passage.

ADOPTED, SIGNED AND APPROVED this 2nd day of June, 2026.

CITY MANAGER'S BUDGET MESSAGE
FY 2027 & 2028

Mayor and City Council,

This letter transmits the City Manager's Proposed Biennial Budget for Fiscal Years 2027 and 2028. As in previous years, this budget proposal continues the City's strategic investment in core services and its commitment to responsible financial stewardship. This budget advances key initiatives in public safety, infrastructure replacement and improvement, and technology modernization.

Over the past several fiscal years, the City experienced a period of unusually strong revenue growth driven by post-pandemic economic recovery. Sales tax receipts grew at sustained rates of approximately 5 percent annually, while property tax revenues increased in the range of 8 to 9 percent, supported by elevated real estate activity and assessed value growth. This period of expansion provided the City with the financial capacity to respond to emerging community needs and Council priorities. During this same period, the City made deliberate policy decisions to expand service levels and invest in new and enhanced programs. Importantly, many of these investments represent ongoing commitments rather than one-time expenditures.

In contrast, the development of this budget occurs during a period of financial caution, driven by ongoing national and global policy changes. Over the past two fiscal years, revenue growth has begun to normalize. Property tax growth has moderated to approximately 4 percent annually, while sales tax growth has flattened to 1 to 2 percent, with modest growth projected over the near term. This deceleration reflects broader economic conditions, including slower consumer spending and a more stable, but less rapidly appreciating, real estate market.

The City is therefore entering a period where the rate of growth in ongoing revenues is no longer at a rate where it is possible to continue to expand into new expenditure commitments. This dynamic mirrors broader statewide fiscal trends and represents a transition from a period of expansion to one requiring greater structural alignment. Absent adjustments, this imbalance may place pressure on future budgets, limiting flexibility to respond to economic changes or emerging priorities.

Accordingly, the City's financial strategy will increasingly emphasize maintaining structural balance by aligning ongoing expenditures with sustainable revenue levels, prioritizing core services, and carefully evaluating new or expanded commitments within the context of long-term fiscal capacity.

BACKGROUND

The biennial budget is developed through the collaborative efforts of the City Manager, the Management Team, City Departments, budget preparation staff, the City Council and the public. This has its start in the continual evaluation of the enacted budget, through the process of mid-year and mid-biennium examination of revenues and expenditures, mainly focused on the City's General Fund. Planning begins in earnest in January and February as long-range fiscal models are updated to serve as the framework for the development of the biennial budget.

In March, departments prepared budget requests for the upcoming biennium under direction from the City Manager to limit increases in services and supplies to no more than three percent above original FY 2026 adopted budgets to maintain existing service levels. Departments were also asked to separately identify supplemental operating, capital, equipment, and staffing needs that addressed critical service demands, deferred maintenance, aging infrastructure and equipment, regulatory requirements, or operational efficiencies.

In April, the budget team compiled and analyzed departmental requests alongside updated revenue forecasts, projected personnel costs, and City Council-authorized successor MOU cost assumptions. As part of this process, the Facilities and Community Services Department was directed to reduce its budget by approximately $4 million to create capacity for rising personnel and operational obligations within the General Fund.

In May, department heads presented their budget requests and operational priorities to the City Manager. Supplemental requests were evaluated in the context of the City's long-term financial outlook and the availability of ongoing resources. Because many requested enhancements could only be accommodated through reductions or reprioritization elsewhere in departmental budgets, departments worked collaboratively to identify offsetting reductions, defer lower-priority expenditures, and reallocate existing resources in support of critical operational and capital needs. The resulting budget reflects these discussions and balances service delivery priorities, infrastructure investment, labor obligations, and fiscal sustainability considerations.

The following sections summarize and provide further detail on the City Manager's General Fund budgets for FY 2026, 2027, & 2028. Included in these sections is an overview of Measure T spending for FY 2027 & 2028. These sections are followed by a short discussion of other major funds.

FISCAL YEAR 2026 SUMMARY

In FY 2026, the City made significant strides in advancing City Council priorities through targeted investments in public safety, infrastructure upgrades, environmental sustainability, and initiatives aimed at enhancing the community's quality of life. The following are key highlights of this progress.

- **State Street City Hall**: Continued progress on the adaptive reuse of the former Citrus Center into a centralized civic facility featuring upgraded public meeting spaces, improved accessibility, modernized public service counters, and enhanced civic gathering areas. Construction activities commenced in February 2026 with completion anticipated in Spring 2027.
- **Safety Hall**: Advanced the development of a consolidated Police Department headquarters, including favorable bid results and substantial progress on Phase I site preparation activities. The project will centralize police operations currently spread across multiple facilities and support future departmental growth.
- **Animal Shelter, Parks, and Cultural Amenities**: Completed several quality-of-life initiatives, including installation of modular animal shelter kennels, replacement and modernization of the Ford Park restroom facility, expansion of youth sports programming at Coyazo Park, and adoption of the Cultural Arts Master Plan and Parks Master Plan.
- **Redlands Mall Area Planning**: Secured continued public parking access associated with the Redlands Mall property while supporting ongoing site transition and redevelopment activities.
- **Homeless Solutions and Housing Assistance**: Secured approximately $2 million in Proposition 47 grant funding for homelessness outreach, supportive services, and employment assistance programs; contributed to an 8% reduction in the homeless population according to Point-in-Time Count data; and assisted more than 200 individuals and families in obtaining permanent housing.
- **Climate Action and Sustainability Efforts**: Initiated a citywide solar feasibility study for municipal facilities and completed a comprehensive update to the City's Climate Action Plan.
- **Fire Station 263 Improvements**: Completed improvements including generator replacement, restroom reconfiguration, and facility upgrades to support operational reliability and firefighter accommodations.
- **Historical and Cultural Facility Investments**: Continued improvements and maintenance efforts supporting the Redlands Historical Museum Association (RHMA) and the Museum of Redlands (MOR).
- **Public Safety Technology Modernization**: Continued implementation of upgraded public safety technology and equipment, including modernization of hardware systems and deployment of Axon body-worn camera technology.

As the current fiscal year (2026) draws to a close, there are noteworthy differences between the adjusted budget for this period and the 12-Month Estimate. The 12-Month Estimate is prepared for the current fiscal year as it draws to a close and the City begins planning for the next two fiscal years. During the Mid-Year Update in March 2026, the General Fund was thought to require the use of roughly $13.7 million in prior year surplus in order to meet its spending requirements. Before the 12-Month Estimates were prepared by staff, total financial resources for the General Fund were estimated at $145 million and total financial requirements at $159 million.

As of May 2026, updated revenue forecasts project an increase of approximately $5.2 million, primarily driven by stronger-than-anticipated investment earnings and additional revenue from the Code Enforcement rental property inspection program. At the same time, projected use of reserves has increased by approximately $14.5 million due to the timing of Council-authorized, reserve-funded capital

projects, including State Street City Hall and Safety Hall. This increase reflects the carryover of previously approved use of reserves rather than new revenues.

Projected expenditures are also expected to increase by approximately $13.7 million, largely attributable to spending on these same reserve-funded capital projects. This increase reflects the carryover and implementation of previously approved projects rather than cost overruns. Collectively, these changes improve the General Fund bottom line by approximately $6 million between the Adjusted Budget and the 12-Month Estimate.

General Fund Budget Summary

	2026 ADJUSTED BUDGET	2026 12-MONTH ESTIMATED
TOTAL AVAILABLE FINANCIAL SOURCES	$ 145,862,727	$ 165,547,120
FINANCIAL REQUIREMENTS:		
Total Appropriations/New Reserves	134,750,183	134,783,540
Total Interfund Transfers To Other Funds	24,842,712	38,521,309
TOTAL FINANCIAL REQUIREMENTS	$ 159,592,895	$ 173,304,849
USE OF PRIOR YEAR SURPLUS	$ 13,730,168	$ 7,757,729
SOURCES OVER/(UNDER) REQUIREMENTS	-	-
ENDING FUND BALANCE-UNRESERVED	$ 37,687,706	$ 43,660,145

FISCAL YEAR 2027 & 2028 OVERVIEW

The Proposed Biennial Budget for Fiscal Years 2027 and 2028 was developed during a period of moderating revenue growth and increasing expenditure pressures. While General Fund revenues are projected to continue growing over the biennium, growth rates have slowed considerably from the unusually strong post-pandemic recovery period, particularly in economically sensitive revenues such as sales tax. At the same time, the City continues to absorb rising personnel, operational, and infrastructure costs associated with maintaining existing service levels and implementing prior Council priorities. Within this environment, the Proposed Biennial Budget reflects significant prioritization intended to balance ongoing operational needs, long-term infrastructure reinvestment, and organizational financial resiliency.

Key investments include:

- **Paramedic Squad Replacement**: Funding is included for replacement of the existing Medic Squad 264 vehicle, which was originally placed into service in 2018 and is approaching the end of its planned operational life cycle. The paramedic squad serves as a rapid Advanced Life Support (ALS) response

unit staffed by firefighter-paramedics and plays a critical role in emergency medical response and technical rescue operations throughout the community.

- **Advanced Emergency Medical Equipment Modernization**: The budget includes acquisition of a ZOLL AutoPulse NXT mechanical CPR system and ZOLL Zenix monitor/defibrillator platform to replace aging frontline medical equipment nearing the end of its service life. These systems provide advanced cardiac monitoring, automated high-quality CPR support, and improved resuscitation capabilities during emergency response and patient transport, enhancing reliability and operational effectiveness during critical medical incidents.
- **Ballistic Protection Equipment for Fire Personnel**: Funding is included for ballistic protective equipment for Fire Department personnel to support Rescue Task Force and other high-risk emergency response operations involving active threats or violent incidents. The equipment enhances firefighter safety while improving interoperability and coordinated response capabilities between Fire and Police personnel during critical incidents.
- **Police Department Operational Support Enhancements**: The Proposed Biennial Budget includes several modified and enhanced support positions within the Police Department, including an Administrative Manager, Dispatch Manager, and Records Manager. These positions are intended to strengthen administrative oversight, improve operational coordination, and support increasingly complex regulatory and reporting requirements.
- **Texonia Park Revitalization Project**: Continued funding is included for the multi-phase revitalization of Texonia Park, representing a substantial reinvestment in neighborhood park infrastructure and recreational amenities. Planned improvements include construction of a new parking lot, ADA-accessible walking paths, restroom renovations, new picnic areas, an inclusive playground, sports field improvements, shade structures, a fitness challenge course, splash pad amenities, dog park improvements, and basketball court rehabilitation. Many project components are anticipated to qualify for Development Impact Fee (DIF) funding eligibility and are intended to improve accessibility, recreational opportunities, and long-term usability of the facility.
- **Sylvan Park Restroom Improvements**: Funding is included to refurbish an existing restroom facility at Sylvan Park, including plumbing upgrades, fixture replacement, accessibility improvements, and modernization of finishes to improve functionality, reliability, and user experience at the park facility.
- **Joslyn Senior Center Roof Replacement**: The Proposed Biennial Budget includes replacement of the aging roof system at the Joslyn Senior Center, which has exceeded its useful life and requires replacement to protect the facility and maintain continued operations and programming for the Center's patrons.
- **A.K. Smiley Public Library Preservation**: Funding is included for termite remediation and related preservation work at the A.K. Smiley Public Library to protect and maintain one of the City's most significant historic facilities.

The Proposed Biennial Budget also reflects significant long-term reinvestment in public facilities and critical infrastructure intended to address aging facilities, improve operational efficiency, and position the organization for long-term service delivery needs. Major planned and continued investments include:

- **New Public Safety Facility (Safety Hall)**: The Proposed Biennial Budget continues funding for the construction of the new Public Safety facility through debt financing. The project represents a once-in-a-generation investment that will consolidate Police Department operations currently spread

across multiple facilities into a modern, centralized public safety facility designed to improve operational coordination, efficiency, accessibility, and long-term service capacity.

- **Fire Station No. 264 Relocation**: Funding is included for architectural design and related preconstruction activities for the relocation of Fire Station No. 264. The project will replace an aging modular station originally intended as a temporary facility that no longer adequately supports operational, staffing, and service delivery needs.
- **A.K. Smiley Public Library HVAC Cooling Tower Replacement**: As part of set asides for the Facilities Reserve, the Proposed Biennial Budget includes funding for design and replacement of the Library's aging cooling tower system.
- **Good Nite Inn Transitional Housing Acquisition:** The Proposed Biennial Budget anticipates the acquisition of the Good Nite Inn transitional housing facility through a partnership substantially funded by State and County resources. The facility currently serves individuals experiencing homelessness through interim and supportive housing operations, and the proposed acquisition is intended to preserve continuity of these services while stabilizing long-term operations of the site. Following acquisition, the City anticipates continuing to support operation of the facility through a subsidy structure generally consistent with the existing operational model.

These projects are anticipated to be funded through a combination of debt financing and future facilities reserves and are intended to address aging infrastructure, improve operational functionality, and support long-term community service needs.

While the Proposed Biennial Budget advances many City Council priorities, not all requested projects and initiatives could be accommodated within available financial resources. Several projects and initiatives were deferred or remain unfunded at this time, including the proposed Skate Park Pump Track, fencing improvements at Prospect Park near the theater area, and the Food Security Task Force initiative. These decisions reflect the need to balance competing priorities within a more constrained fiscal environment while preserving flexibility to respond to future economic conditions and operational needs. A more comprehensive listing of unfunded requests can be found on page 16 of this budget document.

MEASURE T SPENDING OVERVIEW – FY 2027 & 2028

The Proposed Biennial Budget continues to utilize Measure T revenues to support a wide range of community priorities, including public safety operations, infrastructure maintenance, capital reinvestment, homelessness response, and quality-of-life programs. Consistent with prior years, Measure T funding remains an important component of the City's long-term operational and capital planning strategy.

Fiscal Year 2027
Projected Measure T Sales Tax Revenue $20,629,000

Fiscal Year 2028
Projected Measure T Sales Tax Revenue $21,252,000

Portfolio of Service-Level Investments:

- Public Safety Operations & Staffing
    - Police and Fire personnel, equipment leases, IT systems, and operational support
- Infrastructure & Asset Maintenance
    - Enhanced & ongoing maintenance of streets, trees, facilities, sidewalks, and ADA improvements
- Community Services & Quality of Life
    - Enhanced recreation programming, library services, homelessness response, and community events
- Capital Investment & Equipment Replacement
    - Vehicle and equipment lifecycle replacement, facility improvements, and capital planning
- Strategic Reserves & Major Facilities
    - Set asides and funding toward long-term public safety facilities and infrastructure
- Homeless Solutions and Services
    - Ongoing supportive services, housing assistance programs, and outreach efforts

Examples of Planned Investments (Subject to Timing and Delivery) –

- Fire Apparatus Replacement, Acquisition and Outfitting
- Police Vehicle Lease Replacement Program
- Dispatch Radio Console Modernization
- Axon Body-Worn Camera Replacement Program
- Axon Taser Replacement Program
- Police Specialized IT Hardware and Software Upgrades
- Firefighter Ballistic Protective Equipment
- Traffic Signal Maintenance and Repairs
- Texonia Park Revitalization Project
- Sylvan Park Restroom Renovation
- Ford Park Restroom Replacement
- Citywide Playground Replacement Program
- Citywide Park Furnishing Replacement Program
- Martinez Park Bleacher Improvements
- Freeway Frontage Beautification Improvements
- Joslyn Senior Center HVAC Replacement
- Library Flooring Replacement Project
- Fire Station Bay Door Replacement and Painting
- Fire Station Restroom Tile Replacement
- Electrical Repairs and Infrastructure Improvements for City Parks
- Community Gardens Landscaping and Irrigation Improvements
- Recreation Field Lining and Infield Improvements
- Expanded Recreation and Senior Programming
- Community Special Events and Family Programming
- Streets Maintenance Vehicle Replacement
- Streets Backhoe Loader Replacement
- Public Safety & Facility Debt Service

Because Measure T supports ongoing services and multi-year capital investments, individual projects may be delivered, delayed, or completed across fiscal years; therefore, annual reporting reflects actual timing of expenditures rather than the initial year of budget authorization.

OTHER FUNDS

While emphasis in this message is placed on the capital improvement projects and service level enhancements funded by the City's General Fund, the services delivered to the community and its residents through the City's Enterprise Funds are of significance as well and warrant discussion here.

In addition to a General Fund Budget of $134 and $138 million in fiscal years 2027 & 2028 respectively, the City's budget includes Enterprise Funds totaling approximately $136.3 and $92.8 million for fiscal years 2027 & 2028. In the Water Fund, appropriations for FY 2027 and 2028 total roughly $43.3 and $43.7 million respectively, with about $12.4 million dedicated to capital improvement projects (CIP) in FY 2027 and $12.1 million dedicated in FY 2028. These projects include plans for pipeline replacement, expansion and renovation of the Joint Utilities Laboratory, wellhead perchlorate treatment for two wells, fleet & heavy-duty equipment replacements, and a filter press to dewater sludge at the Hinckley Water Treatment Plant.

In the Wastewater Fund, appropriations total approximately $68.5 and $21.7 million for FY 2027 & 2028 respectively, with $2.5 million in pipeline replacement budgeted to replace a combined total of roughly 4 to 5 miles of sewer pipeline. It is worth noting that the Wastewater Fund's largest planned capital project, the Wastewater Treatment Plant Capital Modifications Phase 2 project (approximately $45 million), is included in the proposed FY 2027 budget. Municipal Utilities and Engineering staff were previously notified that the City had been awarded State Revolving Fund financing for construction of the project, and the funding process has since been completed. Construction plans and specifications were subsequently advertised for bid; however, the bids received significantly exceeded the engineer's estimate and were ultimately rejected. Staff are currently revising the plans and project approach with the intent to rebid the project in late summer or fall 2026. The Clean Water State Revolving Fund is a federal-state partnership that provides low-cost financing to communities for a wide range of water quality infrastructure projects, including municipal wastewater facilities. The project will completely rebuild the existing facility, which was originally constructed in 1962, and was expanded in 1972, 1988 and 2004.

Lastly, in the Solid Waste Fund, annual appropriations total roughly $27.2 and $27.4 million for FY 2027 & 2028. Included in these appropriations is approximately $7 million of capital spending for the purchase of new solid waste collection vehicles, including Zero Emission Vehicles and corresponding infrastructure, per new State mandates for publicly operated heavy-duty fleets. The other significant capital investment in the Solid Waste fund is the Phase V cell expansion, estimated at roughly $4 million.

ECONOMIC OUTLOOK AND RISKS TO THE BUDGET

The City's financial position is expected to remain stable throughout the FY 2027 and FY 2028 biennium; however, the economic environment entering this budget cycle differs meaningfully from the conditions experienced during the immediate post-pandemic recovery period. Much of the unusually strong revenue growth experienced over the last several fiscal years, particularly in economically sensitive revenues such as sales tax, has begun to moderate toward more normalized historical trends. At the same time, the City continues to absorb significant ongoing obligations associated with labor costs, infrastructure maintenance, expanded service expectations, and long-term capital investments.

General Fund Budget Summary

The Proposed Biennial Budget reflects an effort to align ongoing expenditures with sustainable long-term revenue growth while continuing to maintain core public services, invest in critical infrastructure, and preserve organizational resiliency. This balancing effort has become increasingly complex as inflationary pressures continue to affect labor, construction, insurance, materials, utilities, and contracted services at rates that often exceed historical averages.

Statewide and regional economic forecasts generally continue to project economic growth rather than recession; however, many forecasts also point toward slower employment growth, elevated uncertainty, and increased variability in economic performance over the next several years. The City recognizes that broader economic conditions remain susceptible to factors largely outside of local control, including monetary policy decisions, inflation trends, geopolitical instability, and fluctuations in consumer and business confidence.

Against this backdrop, the City anticipates that additional prioritization and ongoing evaluation of expenditures, service levels, staffing needs, and capital project timing will likely be necessary in future fiscal years. Much like the State of California and many local agencies, a growing share of ongoing expenditures now reflects the cost of sustaining and operating previously expanded services, facilities, staffing levels, and infrastructure commitments rather than the addition of entirely new programs or services. As revenue growth moderates, it becomes increasingly important to ensure that ongoing expenditures remain aligned with sustainable long-term funding sources.

No budget summary would be complete without acknowledging the presence of risks to the forecast. The City Manager's Proposed Biennial Budget for Fiscal Years 2027 and 2028 represents a carefully developed financial plan for the coming budget cycle; however, economic conditions, operational needs, and external factors can change over time. While the City's budget is built with resiliency and flexibility in mind to help accommodate fluctuations in revenues and expenditures, several risks remain that could materially impact future financial performance. The following represents a partial list of such risks:

- The collective bargaining agreements with the City's nine (9) bargaining units will expire on June 30, 2026, and negotiations for successor agreements remain ongoing. There is a risk that labor costs ultimately exceed the assumptions incorporated into the Proposed Biennial Budget.
- Construction cost escalation and market volatility may impact the ultimate cost of Fire Station No. 264's relocation and other major capital initiatives.
- The Proposed Biennial Budget assumes a vacancy factor of approximately seven percent across various departments. If vacancies are filled more quickly than anticipated, personnel expenditures may exceed budgeted assumptions.
- Interest rates are expected to remain elevated relative to historical norms, which may continue to slow interest-sensitive economic activity, consumer spending, development activity, and housing markets, potentially impacting economically sensitive City revenues.
- The City is self-insured, and the budget for claims and litigation is based on historical trends and information known at the time the budget is prepared. Actual claims, settlements, or litigation outcomes could exceed budgeted amounts.

While the City is not budgeting for an immediate economic downturn, the Proposed Biennial Budget recognizes that future financial flexibility may become more constrained if economic conditions weaken further or expenditure growth continues to outpace recurring revenue growth. As a result, future budgets may require additional expenditure reductions, service deferrals, delayed capital implementation, or reprioritization of projects and operational enhancements in order to preserve long-term fiscal stability and maintain the City's strong financial position.

CONCLUSION

The City's proposed biennial budget for Fiscal Years 2027 and 2028 reflects a deliberate and balanced approach to maintaining essential public services, investing in community priorities, and positioning the City for long-term sustainability. While the City continues to benefit from a stable financial position and healthy reserves, the economic environment has changed meaningfully from the unusually strong post-pandemic growth experienced during the last budget cycle. Revenue growth has moderated, operational and personnel costs continue to rise, and the City faces increasing long-term obligations associated with infrastructure, facilities, and service delivery expectations.

In response, this budget reflects significant prioritization and strategic decision-making across the organization. Departments worked collaboratively to reprioritize spending, defer lower-priority enhancements, and identify operational reductions in order to preserve core services and fund critical

investments. At the same time, the proposed budget continues to advance several transformational projects for the community, including Safety Hall, the relocation of Fire Station No. 264, public safety technology modernization, homelessness response efforts, and the replacement of critical building systems such as the HVAC infrastructure at the A.K. Smiley Public Library. These investments are intended not only to address current operational needs, but to responsibly reinvest in public facilities and infrastructure that will serve the community for decades to come.

The proposed budget also recognizes that maintaining current service levels has become significantly more expensive due to inflationary pressures, evolving community expectations, aging infrastructure, ongoing collective bargaining negotiations, and the need to recruit and retain a highly qualified workforce in an increasingly competitive labor market. While the City's total compensation structure remains generally competitive, management recognizes the importance of continuing to evaluate employee compensation and organizational sustainability in order to maintain high-quality municipal services over the long term.

Although the City continues to maintain a healthy unassigned General Fund balance, current financial planning anticipates the strategic use of one-time reserves for major capital and facility investments. As a result, management believes it will be increasingly important in future years to carefully evaluate programs, service levels, operational priorities, and long-term affordability as part of the City's upcoming strategic planning efforts. There remains more to do than can reasonably be funded at one time, and continued prioritization will be necessary to balance community expectations, infrastructure needs, employee investment, and long-term fiscal stewardship.

I want to express my sincere appreciation to the department directors, management staff, and employees throughout the organization for their collaborative efforts in developing this proposed budget and continuing to deliver exceptional public services each day. A special note of thanks should also be extended to the Finance Department staff for their diligent work preparing, analyzing, and presenting the substantial amount of financial and operational information necessary to support this budget process. Finally, I would be remiss if I did not recognize the extraordinary efforts of the City's employees, whose professionalism and dedication continue to contribute meaningfully to the quality of life enjoyed by the Redlands community. With the continued leadership of the City Council and support of the community, the City remains well-positioned to responsibly navigate future challenges while continuing to invest in services, infrastructure, and priorities that reflect the values of the community.

Respectfully submitted,

Charles M. Duggan, Jr., City Manager
City of Redlands

Summary of Unfunded Department Needs for FY2027 and 2028		
Department	**Description of Unfunded Needs**	**Expenditure Type**
DSD	Development and Implementation of Economic Development Strategic Plan	Operating
FCS	Enhanced Funding for Citywide Programs and Special Events	Operating
FCS	Construction of the Pump Track at the Skate Park	Capital
FCS	Citywide Playground and Bathroom Renovations at City Parks	Capital
FCS	Community Center Gameroom Renovation Project	Capital
FCS	Prospect Park Sewell Theatre Fencing and Doors	Capital
FCS	Redlands Bowl Security Fencing	Capital
Fire	6 Additional Firefighter Paramedics for a New Paramedic Squad	Personnel
Fire	Fire Department Specialized Incident Support Apparatus	Capital
Fire	Construction and Installation of Fuel Island at Fire Station 263	Capital
Fire	Drone Program for Fire Incident Response	Operating
Fire	On Duty Health Assessment Services for Fire Personnel	Operating
Fire	Consulting Services for Debris Management Plan to Align with FEMA Requirements	Operating
Fire	Live Fire Extinguisher Training for the Public	Operating
Library	Contemporary Club Remodel and Improvements	Capital
Library	Upgrade and Repairs to Library Amenities (carpet, restrooms, basement)	Capital
Library	Bookmobile to Service Communities	Capital
Management Services	Enhancements to Existing Financial Enterprise Resource Planning Software	Capital
Management Services	Upgrade Citywide Information Technology Hardware (Desktops, Laptops, and PD Equipment)	Capital
MUED	Alley Resurfacing Projects	Capital
MUED	Sidewalks and ADA Replacement Projects	Capital
MUED	Traffic and Parking Commission Recommended Projects	Capital
Police	Replace and Upgrade Police Department Communications Equipment	Capital
Multiple Departments	Citywide Roof Replacement Projects (Library, Recreation, Senior Center)	Capital
Multiple Departments	Funding to Enhance Maintenance Levels and Expand Operational Services, Supplies, and Equipment in Order to Improve Operational Efficiency, Maintain Reliable Service Delivery, and Support the Growing Demands of Daily Operations	Operating
Multiple Departments	Additional Administrative and Support Service Personnel	Personnel
Multiple Departments	Replace 65 City Vehicles with Enterprise Leases	Operating

City Clerk

Mission Statement:

The City Clerk's Office fosters transparent, open government by delivering exceptional service to residents, staff, and leadership of the City in a neutral and impartial manner.

Departmental Goals:

- Administrate fair and impartial elections
- Deliver prompt, reliable information to the public, City Council and City departments
- Accurately record and maintain the proceedings, actions, and documentation of all City Council meetings for legal, administrative, financial, and historical reference
- Streamline office administration through automation, while enhancing efficiency and ensuring regulatory compliance

Strategic Plan Goals

E-Filing – Form 700 & Campaign Finance Reporting – E-Filing capability for automation of Campaign Finance Reporting for elected officials and committees and E-Filing for Statement of Economic Interest Forms (Form 700s) for elected officials, appointed commissioners, and designated staff members. Improves office efficiency, streamlines the reporting processes, promotes transparency, and achieves a paperless environment.

Real-time Updates – The City's archiving system, known as Laserfiche, allows the public the ability to browse, search, retrieve, download, and print documents. This enhances citizen awareness and promotes accountability and trust in government.

Strategic Goals – Supports Sustainability by enhancing fiscal and operational practices for maintaining fiscal stability, transparency, and data-driven decisions. Supports Equity and Inclusion by enhancing communication and engagement to ensure all parts of the community have easy access to information

Significant Program Changes:

- Trained one part-time employee
- Attended training sessions hosted by the California Municipal Clerks Association

Budget Narrative FY 2027:

Operating on a lean budget, the City Clerk's office provides essential public access to City Government, fulfilling a critical role in our democratic process.

The City Clerk's FY 2027 proposed budget includes regular programming for:

- Funding for the November 2026 elections: $75,000 – which includes elections of 3 City Council Member seats (Districts 1, 3 and 5).
- Personnel funding provides for 1 City Clerk, 1 Assistant City Clerk, and 1 PT Administrative Assistant
- NetFile platform provides for:
  - E-Filing capability of the conflict-of-interest forms for elected officials, designated staff, and various consultants

    - E-Filing capability of campaign statement reporting for elected officials, candidates, and open campaign committees
    - New Training: E-Filing capability of Fiscal and Financial training as required per SB 827. This is a new training module just recently added ($1,000/yearly)
- Redlands Municipal Code codification services and online website hosting charges
- Funds allocated for legal publications to ensure compliance with government code regarding legal notices, ordinances, resolutions and public hearings

Budget Narrative FY 2028:

The City Clerk's FY 2028 proposed budget includes regular programming for:

- Personnel funding provides for 1 City Clerk, 1 Assistant City Clerk, and 1 PT Administrative Assistant
- NetFile platform provides for:
    - E-Filing capability of the conflict-of-interest forms for elected officials, designated staff, and various consultants
    - E-Filing capability of campaign statement reporting for elected officials, candidates, and open campaign committees
    - New Training: E-Filing capability of Fiscal and Financial training as required per SB 827. This is a new module just recently added ($1,000/yearly)
- Redlands Municipal Code codification services and online website hosting charges
- Funds allocated for legal publications to ensure compliance with government code regarding legal notices, ordinances, resolutions and public hearings

City Council

Mission Statement:

The City Council is dedicated to responding to the changing needs of our community and to ensuring that Redlands remains a distinctive place in which to live and work.

Departmental Goals:

- Hold regular meetings to conduct City business and hear public input on all issues.
- Remain open and responsive to the concerns of the community.
- Formulate policies and goals and, through the City Manager, direct the use of resources for the attainment of these policies and goals.
- Monitor and seek to influence state and federal legislation to better address the concerns of the City of Redlands.
- Encourage community involvement through the appointment of citizens to City-sanctioned commissions, boards, and committees.

Program Description:

The City Council provides direction upon which all City actions, programs, and priorities are based. The Council relies on the input of the City Manager and their staff, as well as recommendations from various commissions and boards. The Council further represents City interests through participation in local and regional organizations.

Program Objectives:

- Conduct regular twice-monthly meetings and special meetings as necessary to effectively complete the City's business.
- Maintain active participation in various local and regional organizations.
- Provide input to appropriate legislators on issues that will affect the City.

City Manager

Mission Statement:

The City Manager's Office is dedicated to managing all City services in the most efficient, effective, and economical manner possible while maintaining excellent customer service through a high degree of professionalism.

Departmental Goals:

- Implement the policy direction of the City Council.
- Provide leadership and direction to all City departments.
- Promote favorable working relationships with the business community, community organizations, and citizens.
- Promote transparency in government.
- Guard the quality of life that residents enjoy through the maintenance of existing programs and service levels.

Sustainability Efforts:

- Continued implementation of paperless processes.
- Purchase and use of recycled paper for copying and printing.
- Ongoing effort to scan and store files electronically.

Program Description:

The City Manager's Office provides centralized direction and leadership for the effective administration and operation of all municipal services for the City of Redlands as directed by the City Council. Operating under the traditional Council-Manager form of government, the City Manager is appointed by the five-member City Council and is responsible for the day-to-day operations of the City. The City Manager's Office leadership team includes two Assistant City Managers and a Public Information Officer. The office provides strategic direction to departments and monitors progress toward achieving the goals and objectives.

The City Manager's Office is committed to developing a culture of innovation by integrating strategic management and best practices into government operations. By doing so, the organization continually improves performance, maximizes efficiencies, and creates value for taxpayer dollars.

Program Objectives:

- Provide leadership, management, and direction to all City departments.
- Compile and distribute agenda packets for all Council meetings.
- Oversee the preparation of the annual budget.
- Guide the City's Strategic Plan and vision.
- Be available to the public as needed.
- Maintain effective working relationships with other cities, counties, state and federal agencies.

Accomplishments for Fiscal Years 2024-25 and 2025-26:

- Provided leadership, management, and direction to all City departments.
- Coordinated and assembled 20 regular City Council Meeting Agenda Packets and 4 City Council Special Meeting Agenda Packets for 2024/25, and 17 regular Meeting Packets with 2 Special Meeting Packets to date for 2025/26.
- Coordinated and processed approximately 170 resident service requests for 2024/25 and 138 to date for 2025/26.
- Reviewed an average of 25 agenda items per City Council meeting for 2024/25, and 22 to date for 2025/26.

Communications and Community Relations

The Communications and Community Relations division of the City Manager's Office oversees the City's communication initiatives, and social media platforms and responds on behalf of the City to inquiries from the media and the public. The division educates and informs residents, visitors, and businesses about City programs, services, and events. Using targeted communication strategies in cooperation with other City departments, the division engages the community in the governmental process, facilitates transparency, enhances tourism, supports local industries, promotes business attraction and retention, and increases participation in City programs and activities to help generate additional revenue and strengthen the quality of life.

Included in the division is Redlands TV (RTV), the City's government access cable TV facilities and operations. RTV televises and records live events, such as City Council and Planning Commission meetings, provides a Community Events Bulletin Board, and creates or contracts original informational videos highlighting City services and programs. RTV programming is streamed on the City's website at www.redlands.gov and on YouTube at https://www.youtube.com/@CityofRedlandsPIO. Programming is also available to cable television subscribers through Spectrum (Channel 3) and Frontier Communications (Channel 35).

Program Objectives:

- Administer the City's community relations and public information programs, including media relations, videos, and other information on Redlands TV, the City's social media platforms, and other communications channels.
- Provide a forum for community events and public service messages relevant to Redlands audiences.
- Continually explore new platforms and outreach avenues, incorporating them into the overall communication and outreach strategy.
- Regularly televise all City Council and Planning Commission meetings with scheduled replays intended to provide access for all residents.
- Use available video technology and media to provide an outlet, informing Redlands residents of available City events and services or specific public service information.

Accomplishments for Fiscal Years 2024-25and 2025-26:

- Supported completion of the 2024 and 2025 National Community Surveys, providing benchmarking data on resident satisfaction, service delivery, and community priorities.
- Implemented a new City Community Calendar, enabling local organizations to post events, improving community engagement and public access to information.

- Enhanced transparency and public communication through live broadcasting and web streaming of City Council and Planning Commission meetings, along with expanded digital content and outreach efforts.
- Issued approximately 300 press releases and provided media relations support, including coordinating interviews and monitoring regional media coverage with regular updates to staff and elected officials.
- Supported City departments with internal and external communications, including review of written materials and messaging.
- Expanded social media reach and engagement across City platforms:
    - Increased Instagram following by 43% (14,000 to 20,000) and total audience to over 32,000 (+26.5%)
    - Achieved 6.7 million impressions (+1,300%) and 244,000+ video views (+4,500%)
    - Increased engagement, shares, and link clicks by over 200%
    - Published over 1,600 posts and launched targeted campaigns tied to City events and initiatives
    - Post reactions (+218%), shares (+233%), link clicks (+339%), and engagement rate (+47.6%) all saw significant year-over-year growth.
- Grew and managed departmental social media accounts (Animal Shelter, Recreation, and Senior Services), achieving:
    - 17,000+ followers (+14.8%) and 1.96 million impressions (+1,400%)
    - Increased engagement through community-focused content, including adoption campaigns and recreation programming
- Expanded video production and digital storytelling, including:
    - Bi-weekly “Pet of the Week” series promoting animal adoptions
    - Recruitment, public safety, and departmental videos
    - Coverage of major City events, community programs, and City Council recaps
- Produced public service announcements and maintained Redlands TV bulletin board content to support community awareness and outreach.

Grants Coordinating Office

The Grants Coordinating Office was established in September 2021 and is a division of the City Manager’s Office. The division is responsible for performing a variety of duties related to grant development, grant writing, and grant monitoring and reporting. Working with departments throughout the City, the Grants Coordinating Office researches grant opportunities to determine applicability, prepares grant applications, compiles proposed project information, and aligns project needs with fund goals. The division monitors grant activity, composes and submits required grant reports on project progress, and is responsible for submitting all final close-out grant materials.

Program Objectives:

- Maintain grant records and files
- Communicate grant projects to the community and solicit feedback for program implementation
- Provide information and assistance to departments in applying for grants
- Provide centralized information regarding grant funding opportunities, Uniform Guidance requirements, and other compliance
- Implement grant projects
- Coordinate grant activities with other departments

Accomplishments for Fiscal Years 2024-25 and 2025-26:

During Fiscal Years 2024-25 and 2025-26, the Grants Coordinating Office advanced major grant-funded initiatives, pursued new funding opportunities, and strengthened coordination and compliance across departments.

- **Museum of Redlands Project:** Finalized title transfer from the Redlands Historical Museum Association (RHMA) to the City and secured approximately $2.0 million in reimbursements from the California Natural Resources Agency (CNRA), including final retention payment; close-out reporting is in progress.
- **Building Forward Library Grant (Lower Level Revive Project):** Continued financial and programmatic reporting with Library staff to ensure compliance, with final close-out underway in 2026.
- **Grocery Gift Card and Utility Assistance Programs:** Executed a Third Amendment with Redlands Ranch Market to expand access; close-out activities, including final disbursements and documentation, are underway in FY 2025–26.
- **Grant-Funded Staffing Support**: Coordinated onboarding and oversight of limited-term staff funded through ARPA and other sources, strengthening cross-departmental implementation and reporting.
- **Encampment Resolution Fund (Round 3):** Supported acceptance and implementation of state funding to expand interim housing, outreach, and services for individuals experiencing homelessness.
- **Energy Efficiency and Conservation Block Grant (EECBG):** Supported acceptance and coordination of federal funding to advance energy efficiency and sustainability initiatives.
- **Homeland Security Grant Program (FY 2023):** Coordinated approvals and compliance with public safety staff to support emergency preparedness.
- **Community Planning and Capacity Building Grant (2025):** Prepared and submitted an application supporting transportation and climate planning.
- **Employment and Training Pathways Program (ETPP) 2025–26:** Coordinated development and submission of a workforce-focused grant application.
- **OVC FY25 Housing Assistance for Victims of Human Trafficking**: Submitted a federal application to expand housing and supportive services.
- **BJA FY25 Body-Worn Camera Program**: Submitted a federal application to support law enforcement technology and policy development.
- **Continuum of Care (CoC) and Youth Homelessness Demonstration Program (YHDP):** Coordinated with regional partners in preparation for upcoming HUD funding opportunities.
- **Proposition 4 and Infrastructure Funding:** Tracked eligibility requirements and timelines for resiliency-focused funding opportunities.
- **Senior Services Grant Research:** Identified funding opportunities supporting housing stability, nutrition, and digital literacy for older adults.
- **Food Assistance Funding Coordination:** Supported the City's Food Task Force by identifying grant opportunities to expand food access programs.
- **Federal Grant Policy Monitoring:** Tracked evolving policies and funding trends to support compliance and inform Citywide strategy.

- **Grant Training and Coordination:** Participated in trainings and coordinated with regional and state partners to strengthen internal capacity and compliance awareness.

Homeless Solutions Office

The Homeless Solutions Office provides leadership, coordination, and administrative oversight for the City's comprehensive response to homelessness. The Office works collaboratively across City departments and with external partners to design, implement, and manage programs that align with the City Council's strategic priorities to reduce and prevent homelessness.
The Office ensures effective deployment of resources, strengthens interagency partnerships, and advances data-driven strategies to improve housing outcomes and system efficiency.

Program Objectives:

- Plan, coordinate, and evaluate the activities of the City to address and reduce homelessness.
- Develop and implement innovative, evidence-based strategies in collaboration with regional partners.
- Procure, negotiate, and manage contracts for housing, shelter, and supportive services.
- Partner with local businesses, nonprofit organizations, and community groups to enhance service delivery.
- Align City policies and initiatives with local, state, and federal homelessness programs.
- Prepare, submit, and manage grant funding to support homeless services programs.
- Conduct community outreach, education, and stakeholder engagement.
- Develop and monitor the annual budget for homeless services and related programs.
- Lead and coordinate the City's annual Point-in-Time Count.
- Collaborate with Code Enforcement to address encampments and neighborhood impacts.
- Prepare and deliver reports and presentations to City Council, commissions, and community stakeholders.

FY 2024–2025 Priorities & Activities

- Continued implementation and oversight of City-funded homeless programs and initiatives.
- Expansion and coordination of multidisciplinary street outreach efforts, including behavioral health services.
- Strengthening regional collaboration through Continuum of Care and County partnerships.
- Ongoing administration and compliance of state and federal grant programs (e.g., HHAP).
- Focus on increasing placements into permanent housing and reducing returns to homelessness.
- Enhanced data tracking through HMIS to improve performance measurement and reporting.

Accomplishments for Fiscal Years 2024-25and 2025-26:

- Secured approximately $2 million in grant funding to support homeless services.

- Successfully placed over 230 individuals into permanent housing across prior fiscal years.
- Provided interim shelter and hotel placements for over 170 individuals.
- Established and expanded multiple street outreach teams, including a dedicated behavioral health team.

City Homeless Solutions

Mission Statement:

The City Homeless Solutions Office is dedicated to providing housing and outreach for all unhoused persons in the City in the most efficient, effective, and economical manner practical to help attain the City Council's goals and the City Departments' program objectives.

Departmental Goals:

- The Homeless Solutions Division is committed to reducing homelessness in the City of Redlands through a coordinated, housing-focused approach that prioritizes efficiency, accountability, and positive outcomes for individuals and families experiencing homelessness.
- The Division aims to expand access to interim and permanent housing options, strengthen street outreach and engagement efforts, and improve connections to behavioral health, substance use treatment, and other supportive services.
- Enhance data collection, performance measurement, and reporting to ensure programs are effective and aligned with City Council priorities.
- Strengthen partnerships with regional agencies, service providers, and community stakeholders to maximize resources and improve system-wide coordination.
- All efforts are guided by a commitment to fiscal responsibility, regulatory compliance, and improving overall health, safety, and quality of life within the community.

Sustainability Efforts:

- Inclusion of sustainable measures in public project contracts and procurement documents.
- Continued progress toward "paperless" processes and operations where possible, practical, and effective.
- Purchase and use of recycled paper for copying and printing, and other available recycled products.
- Ongoing effort to scan and store files electronically.

Program Description:

The City Homeless Solutions Office provides support and administrative oversight of the development and implementation of homeless services, coordinates with outside agencies, and ensures that programs and resources across all departments are aligned with the City's goals to address homelessness.

Program Objectives:

- Increase placements into permanent housing through rapid rehousing and housing navigation programs.
- Expand access to interim shelter and supportive services for individuals experiencing homelessness.
- Strengthen street outreach and engagement efforts to connect unsheltered individuals to housing and services.
- Improve coordination with behavioral health and substance use treatment providers.
- Collaborate with local, regional, state, and federal partners to enhance service delivery and resource alignment.
- Ensure compliance with grant requirements and applicable regulations.
- Maintain accurate and timely data collection, reporting, and performance tracking.
- Monitor contracts and program performance to ensure effective and efficient use of resources.

- Continuously evaluate and improve programs to align with City Council priorities and community needs.

Accomplishments for Fiscal Years 2024–2025 and 2025–2026

- Secured and administered state and federal grant funding, including Homeless Housing, Assistance and Prevention (HHAP), Prop 47, and Encampment Resolution Funding (ERF), to expand local homeless services.
- Increased the number of individuals placed into permanent housing through rapid rehousing and housing navigation efforts.
- Expanded interim shelter capacity and maintained consistent shelter placements to reduce unsheltered homelessness.
- Strengthened multidisciplinary street outreach teams, including behavioral health partnerships, resulting in increased engagement with unsheltered individuals.
- Conducted coordinated encampment resolution efforts, improving public health and safety while connecting individuals to services and shelter.
- Enhanced coordination with regional service providers, nonprofits, and county partners to improve service delivery and system integration.
- Improved data tracking, reporting, and compliance with state and federal requirements, including HMIS and performance metrics.
- Continued administration and oversight of contracts to ensure high-quality service delivery and accountability of funded programs.
- Supported the City Council, City Manager, and departments with regular updates, reports, and strategic planning related to homelessness.

Operational Improvements and Key Projects (FY 2027–2028)

During FY 2027 and FY 2028, the Division will focus on expanding rapid rehousing and housing navigation efforts to increase placements into permanent housing, particularly for individuals with high barriers. The Division will also enhance multidisciplinary outreach efforts, including strengthened coordination with behavioral health providers, to improve engagement, service delivery, and encampment resolution outcomes. Continued improvements to data tracking and performance management systems will support more efficient service delivery and reporting.

Capital Projects (>$50,000)

Planned capital investments include improvements to Permanent Supportive Housing to enhance safety, accessibility, and overall service capacity to Redlands Project Home Key site. Additional investments in technology and data systems will support improved coordination of services, compliance with state and federal requirements, and more effective tracking of program outcomes.

City Attorney

Mission Statement:

The City Attorney's Office is dedicated to professionally providing the highest quality legal services for all City matters in the most efficient, effective, and economical manner practical to help attain the City Council's goals and City Departments' program objectives.

Departmental Goals:

- Proactively provide high-quality, ethical, and timely legal advice to the City Council, City Manager, City Departments, and appointed boards and commissions, to assist the City Council and City Departments' in achieving their goals and objectives.
- Resolve all legal disputes efficiently and cost-effectively while protecting the City's legal interests.

Sustainability Efforts:

- Inclusion of sustainable measures in public project contracts and procurement documents.
- Continued progress toward "paperless" processes and operations where possible, practical, and effective.
- Purchase and use of recycled paper for copying and printing, and other available recycled products.
- Ongoing efforts to scan and store files electronically.

Program Description:

The City Attorney is responsible for providing legal advice and representation to the City Council, City Manager, and City employees, as well as to City Council appointed commissions and boards, as needed. The City Attorney also oversees the prosecution of violations of the City's Municipal Code to ensure compliance with City, state, and federal laws and regulations, and monitors all City legal matters involving the use of special counsel.

Program Objectives:

- Provide the highest quality legal services by drafting and/or providing timely review of all ordinances, resolutions, contracts, and other legal documents in the normal course of City business.
- Ensure services are provided to the City Council and staff as required or permitted by law.
- Ensure cost-effective governmental claims defense and litigation services while assisting, reviewing, and effectively monitoring special counsel services.
- Administer and coordinate the City's administrative citation program to ensure compliance with the City's Code and enhance cost recovery for Code Enforcement efforts.
- Coordinate with all City departments to review and ensure compliance with subpoena requests and requests for documents under the California Public Records Act.

Accomplishments for Fiscal Years 2024-25 and 2025-26:

- The City Attorney supported the City Council, City Manager, and all City departments, boards, commissions, and committees in achieving the City Council's goals while limiting risk and costs to taxpayers.
- Completed 955 public records requests for 2024-25, and 870 for 2025-26 (to date).
- Closed 7 lawsuits in Fiscal Year 2024-25. Closed 10 lawsuits in Fiscal Year 2025-26.
- Brown Act training for the Human Relations Commission (HRC), Cultural Arts Commission, Citrus Preservation Commission and Planning Commission
- Conducted California Public Records Act (CPRA) training.

Human Resources Department

Program Description:

The Human Resources team works collaboratively to develop and administer programs that are designed to increase the effectiveness of staff and the organization. Human Resources provides the full range of services to all City departments, and where applicable, residents and visitors to our community. The primary functions include recruitment and selection, employee benefits administration, wellness, performance management, safety, risk management, training, organizational development, personnel data maintenance, volunteer management, state and federal reporting, MOU (Memorandum of Understanding) administration, employee assistance, and labor and employee relations.

Program Objectives:

- Facilitate the recruitment, selection, retention, and promotion of individuals to ensure a talented, diverse workforce
- Market a comprehensive and economical employee compensation and benefits package to attract and retain the highest caliber employees
- Support employee engagement by providing an effective onboarding process and continued training and professional development opportunities
- Ensure compensation and performance management processes are designed to maximize performance and align with the goals of the organization
- Revise and implement Personnel Rules and Regulations and Administrative Policies that create a consistent, positive, and productive organizational culture
- Utilize technology in all aspects of Human Resources to create a cost-effective and efficient operation
- Build upon the Volunteer & Intern Resources program including enhancing the volunteer and intern program and increasing community awareness and involvement through enhanced outreach

Projects:

- Implementation of NEOGOV Onboarding in support of the City's Strategic Plan Priority D. This platform will support the onboarding program that was established in 2022. It will increase efficiency of processing new hire documents, standardize processes, provide a personalized portal to welcome new employees, and assign internal points of contact to assist new hires with transitioning into the organization. This program will also support sustainability by significantly reducing the use of paper.
- Continued enhancement of the Training and Development Program and Succession Planning. In support of the City's Strategic Plan Priorities C and D, we are procuring additional resources for continued diversity and inclusion training for staff. Additionally, training will be provided to support leadership development to assist current staff in being prepared to move into advanced roles as they become available.

Risk Management Division

Program Description:

The Risk Management Division identifies, assesses, and controls risk to the City and ensures a safe and secure work environment. The division manages the processing of all property and general liability claims filed against the City. The division also establishes the City's insurance needs and works with the City's broker to procure appropriate levels of insurance coverage for property and general liability, workers' compensation, crime, and various other policies.

The City contracts with third-party administrators (TPA) that ensures compliance with all regulations regarding the administration and investigation of all claims. The TPA coordinates with the Risk Management staff, City Attorney, City Manager, and City Council as needed.

Program Objectives:

- Identify potential liability exposures and address them in a proactive, not reactive, manner
- Work closely with the City Attorney and TPA to expedite the disposition of all claims presented to the City
- Ensure maintenance of a database of all claims filed against the City
- Prepare analysis as needed related to the City's need for excess liability insurance
- Act as liaison with the City's insurance broker in the procurement of all property and liability insurance policies maintained by the City
- Assist other departments with insurance-related issues
- Review proposed contractual agreements for appropriate levels of insurance coverage maintained by the other party before the City enters into the agreement
- Review proposed contractual agreements wherein the City must provide coverage, recommend acceptance, or voice concerns and alternative solutions
- Compile and submit the necessary documentation to the City's insurance carriers for reimbursement of losses incurred and for which the City has insurance coverage
- Pursue the City's subrogation rights for property losses caused by others

Workers' Compensation Division

Program Description:

The City of Redlands is self-insured for its Workers' Compensation and contracts with a third-party administrator (TPA) whose focus is to keep abreast of the continually changing Workers' Compensation laws and regulations, assure that the City maintains compliance with these changes, and most importantly facilitates the care needed to return the employee to their pre-injury status. The Workers' Compensation program provides employee treatment through a wide network of healthcare practitioners. To reach the goal of returning an employee to their pre-injury productivity the City, whenever possible, provides modified duty. Modified duty allows the employee to remain an active and productive member of the organization while still recuperating from their injury.

Program Objectives:

- Monitor the performance of the City's TPA for efficiency, service standards, and cost-effectiveness
- Analyze accident data, identify root causes, and coordinate with the department on the implementation of programs to reduce the number of work-related injuries and illnesses
- Implement a wellness-rich environment where employees are provided the tools necessary to realize the healthiest lifestyle possible
- Review status of claims with the TPA adjuster and the City's legal counsel
- Administer the Disability and Industrial Disability Retirement programs in a fiscally responsible manner
- Facilitate a return-to-work (RTW) program for those employees able to work modified duty to reduce time away from work due to injury
- Mitigate potential claims by addressing work/health issues brought forward by employees

Safety Division

Program Description:

Employee safety is an organizational responsibility first and foremost, as well as a personal responsibility. The Safety Division of the Human Resources Department is responsible for providing the tools and information necessary for each City division to function at its optimal safety level. To this end, we facilitate the required training our employees must maintain to continue working in compliance with OSHA and other regulatory agencies.

Program Objectives:

- Provide a safe work environment for City employees
- Inspect job locations to ensure safe working environments and practices
- Decrease the number of on-the-job injuries
- Comply with OSHA mandates for training and reporting
- Review and update the City's Injury and Illness Prevention Program
- Review and update the City's Workplace Violence Prevention Program
- Instill the advantages of safe work behavior in every employee, every day
- Furnish information and resources to departments to develop programs that will help enable them to realize a reduction in the number of preventable injuries
- Coordinate and oversee the City's Safety Committee, develop, and implement goals and objectives

Training Division

Program Description:

The Human Resources Department is responsible for coordination and oversight of citywide employee training. Focus is directed toward employee development that will apply throughout all levels of the organization to meet necessary skills and provide a network of mentoring and leadership training.

Program Objective:

- Provide a comprehensive menu of training programs to educate employees and ensure the fluid transition for the future, including:
  - Supervisory Training
  - Employee Training
  - Employee Orientation
  - Leadership Development
- Continue to enhance and utilize technology-based management of training programs and training records
- Development of a succession-style training program to develop talent in-house
- Creating feeder positions and career paths to increase tenure and engagement
- Continue compliance with State and Federal training mandates
- Provide educational programs to encourage individual professional development and growth

Management Services / Finance Department

Mission Statement:

The mission of the Management Services / Finance Department is to provide effective and timely support services involving a wide range of internal administrative functions to City departments and to play an integral role in enhancing each department's ability to better serve the Redlands community. Towards these efforts, the department focuses on effective management of City finances, sound internal controls, and meaningful financial reporting. The department is also responsible for supporting automation and process efficiencies through technology and works proactively to develop, research, and recommend the best technical solutions to facilitate positive interaction with our City departments, residents, businesses, and visitors.

Departmental Description:

The Management Services / Finance Department is comprised of the following divisions:

- Finance Administration
- Purchasing
- Revenue, Office of the Treasurer
- Utility Billing Customer Service
- Innovation & Technology / GIS

The department is focused on providing exceptional customer service to both its internal customers, as well as the community and public at large. The department reports the financial state of the City and ensures the needs of each division are met to better serve the community at all times.

The Management Services Department was created by merging the former departments of Finance and Innovation & Technology to provide added efficiencies, a transition to a new financial information system, and promote responsiveness in the provision of internal services for City departments.

The department is responsible for providing the following major services to the City and its constituents:

- Annual Budget and Financial Reporting
- City’s procurement function
- Support of Treasury Management and Investment through the City Treasurer
- Business License Registrations and Annual Renewals
- Processing Accounts Payable, Accounts Receivable, and Payroll Administration
- Utility Billing and Customer Service for Water, Wastewater, and Solid Waste customers
- Management of the City’s IT Network Infrastructure and Equipment
- Administration of the City’s Geographic Information Systems database and applications

Finance

Program Description:

This division performs the functions of administration, accounting, budgeting, payroll, accounts payable, and accounts receivable. Other responsibilities of the division include administration of all City-related debts/bonds, preparation of regular financial analysis, responsibility for the annual budget process and spending oversight, the performance of periodic internal audits of City operations, as well as coordination of the City's annual audit and preparation of all related reports as required by law.

Program Objectives:

- Prepare an Annual Comprehensive Financial Report (ACFR) that presents an accurate financial picture of the City to the public, financial institutions, and bond rating agencies.
- Plan and coordinate the Mid-Biennium budget process to incorporate all changes to the Biennial Budget.
- Reconcile budgetary items such as carryovers and encumbrances, grant revenue and grant carryovers
- Prepare and submit required reports to State and Federal Agencies.
- Prepare and distribute monthly financial information to all departments by the 20th of each month.
- Prepare and distribute a monthly General Fund Revenue and Expenditure Summary report to the City Council per the City Council's Strategic Plan.
- Issue required financial reports (Single Audit, CalPERS & IRS audits, Annual AB 1600 Report, AB 2766 Report, the State Controller's City Financial Transactions report, and the State Controller's Local Government Compensation report)
- Implement and ensure continued compliance with new/existing Governmental Accounting Standards Board (GASB) pronouncements. There are 101 GASB accounting standards to date.
- Plan and coordinate the annual audits of the City, Successor Agency to the Former Redevelopment Agency, Gas Tax, and Measure I funds, as well as other grant-related audits as required by federal law.

Accomplishments for Fiscal Year 2024-25:

- Completed continuous enhancements to our new enterprise resource planning system, Tyler Munis, alongside technical support from the Division of Innovation & Technology.
- Supported meetings of the Measure T Oversight Board and produced the Annual Measure T Report for Oversight Board approval for fiscal year 2024.
- Completed the City's Annual Financial Report for the Year Ended June 30, 2025, and submitted the completed document to the GFOA for the Award of Excellence in Financial Reporting, an award that we have received for the last twenty years.
- Completed all financial reports as required by law, including the AB 1600 Report on Development Impact Fees, the Recognized Obligation Payment Schedules as required for the Successor Agency, the State Controller's City Financial Transactions report, and the State Controller's Local Government Compensation report.
- Worked with all city departments to complete the biennial city inventory audit for vehicles and equipment.

- Completed the implementation of Governmental Accounting Standards Board Statement Number 87 (GASB 87 – Accounting for Leases) and 96 (GASB 96 -Accounting for subscription-based information technology arrangements)
- Completed the special annual reporting for AQMD 2766 and paramedic assessment.
- Provided grant monitoring for 58 citywide grants.

Accomplishments for Fiscal Year 2025-26:

- Supported meetings of the Measure T Oversight Board and produced the Annual Measure T Report for Oversight Board approval for fiscal year 2025.
- Monitored and reported on the City's budget throughout the year and worked with the City Manager, Executive Team, and support staff to develop a two-year budget for the fiscal year 2027 and fiscal year 2028.
- Completed all financial reports as required by law, including the AB 1600 Report on Development Impact Fees, the Recognized Obligation Payment Schedules as required for the Successor Agency, the State Controller's City Financial Transactions report, and the State Controller's Local Government Compensation report.
- Provided training to each department on processing budget transfers, reviewing year-to-date-report, and purchase order report.
- Completed the special annual reporting for AQMD 2766 and paramedic assessment.
- Continued to support the MOU negotiations with the City's various bargaining units
- Completed the City's Mid-Biennium Budget update as a part of the biennial budget process.
- Implemented ClearGov budget software Citywide.
- Continued the planning and implementation of Time and Attendance and Contract Management modules in Tyler Munis.

Revenue

Program Description:

The Revenue Division is responsible for the collection, safeguarding, and management of all City revenues in accordance with applicable laws, regulations, and City policies. This includes the receipt and deposit of all City funds into authorized financial institutions; to maintain and balance records of receipts and disbursements; to responsibly invest city funds through secure, approved methods. The Division prepares and submits quarterly investment reports in compliance with the City's adopted Investment Policy and monitors all depository accounts, including the collateralization of public funds by financial institutions. Oversight of the Division's investment activities is provided by the elected City Treasurer.

In addition, the Revenue Division administers the issuance of various licenses and permits, including business licenses, dog licenses, transient occupancy tax (TOT) certificates, yard sale permits, and preferential parking permits. The Division provides front counter and customer service support to the public, processes payments for utility services, invoices, fees, and permits across all City departments, and ensures the accurate receipt and accounting of all related revenues.

Program Objectives:

- Enhance operational efficiency through ongoing staff training, implementation of modern technologies, and regular review and improvement of internal procedures.
- Manage and maintain the City's investment portfolio in compliance with all applicable Federal and State laws and the City's adopted Investment Policy, including the preparation of timely and accurate investment reports.
- Ensure sufficient liquidity within the investment portfolio to meet the City's cash flow needs, including maintaining funds adequate to support at least six months of budgeted expenditures.
- Review and update internal procedures to ensure compliance with changes to the Redlands Municipal Code, particularly as they relate to licensing, permitting, and revenue collection.
- Maintain and strengthen internal controls to safeguard the City's cash, investments, and financial transactions in accordance with established governmental accounting standards.
- Implement the City's Preferential Parking Zone program in accordance with applicable ordinances and policies.
- Oversee the Business License Program in coordination with HdL Companies, ensuring compliance, accuracy, and efficient service delivery.
- Administer the City's Dog Licensing Program in coordination with the Police Department's Animal Services Division.
- Coordinate the payment for permits with various City departments to ensure all requirements are met before accepting payment.
- Manage and monitor all electronic financial transactions, including ACH, wire transfers, and other online banking activities, ensuring accuracy, security, and proper authorization.
- Provide administrative and operational support to the City Treasurer, including assistance with investment activities and reporting requirements.
- Expand and improve accessible, secure, and convenient payment options for residents and customers, including online and electronic payment systems.

Accomplishments for Fiscal Year 2024-25:

- Received the California Municipal Treasurers Association Investment Policy Certification.
- Amended Redlands Municipal Code section pertaining to business license issuance to improve administrative processes and align reporting deadlines.
- Enhanced procedures for monitoring and projecting cash flow and conducting revenue analysis.
- Continued implementation of the business license program through HdL Business License staff, including the addition of an Amnesty and Compliance Program.
- Improved internal business license application processes through an automated workflow system in coordination with HdL.
- Implemented citywide fee increases in accordance with the approved fee schedule.
- Established new investment accounts as directed by the City Treasurer and in accordance with the City's Investment Policy.
- Prepared and delivered the City Treasurer's Quarterly Investment Reports, ensuring transparency and compliance with reporting requirements.
- Updated City investment policies and procedures in coordination with the City Treasurer.
- Coordinated with City departments to enroll delinquent administrative citations and municipal service accounts onto the County's special assessment tax rolls as liens.
- Enhanced the City's Cash Handling Policy to strengthen security measures and align with best practices.

Accomplishments for Fiscal Year 2025-26:

- Increased business license revenue and improved compliance through enhanced enforcement and streamlined processes.
- Completed ordinance update transitioning business license renewals to a calendar-year cycle, improving administrative efficiency and revenue predictability.
- Expanded customer payment options and strengthened PCI compliance, improving security and convenience for taxpayers.
- Successfully implemented a cashiering and utility billing system upgrade, enhancing operational efficiency and reporting capabilities.
- Enhanced procedures for monitoring and projecting cash flow and revenue analysis.
- Prepared and delivered the City Treasurer's Quarterly Investment Reports, ensuring transparency and compliance with reporting requirements.
- Established new investment accounts as directed by the City Treasurer and in accordance with the City's Investment Policy.
- Updated investment policies and procedures in coordination with the City Treasurer to reflect best practices and regulatory standards.
- Collaborated with City departments to place delinquent administrative citations and municipal service accounts on the County tax roll, improving collection rates through lien enforcement.

Purchasing

Program Description:

The Purchasing Division provides strategic leadership and oversight of the City's procurement operations in accordance with Chapter 2.16 of the Municipal Code and all applicable policies and regulations. The division plans, directs, and manages citywide purchasing, warehouse operations, inventory control, and the disposition of surplus, obsolete, and scrap materials to ensure the delivery of cost-effective, high-quality goods and services for all departments.

The division serves as a key partner to City departments, leadership, and external agencies by providing expert guidance on procurement strategies, contract administration, regulatory compliance, and fiscal responsibility. Through the implementation of innovative procurement practices, technology solutions, and continuous process improvements, the division enhances operational efficiency, transparency, and accountability across the organization.

Program Objectives:

- Provide leadership and oversight of all procurement, warehouse, and inventory control operations to ensure efficient and compliant service delivery
- Develop, implement, and continuously improve purchasing policies, procedures, and strategic initiatives
- Plan, coordinate, and evaluate procurement activities, including formal bids, RFPs, and contract administration
- Ensure compliance with all applicable laws, regulations, and professional standards while promoting ethical procurement practices
- Strengthen citywide procurement through training, guidance, and collaboration with departments and stakeholders
- Leverage technology systems such as PlanetBids (eProcurement) and Tyler Munis (ERP) to improve efficiency, reporting, and financial controls
- Oversee the surplus property program to maximize value recovery and ensure proper disposal in accordance with regulations
- Monitor procurement performance metrics to support informed decision-making and cost savings
- Foster vendor relationships and ensure fair, open, and competitive procurement processes
- Identify and implement process improvements that increase productivity, reduce waste, and enhance service levels

Accomplishments for Fiscal Year 2025–26:

- Continued advancement of the City's automated inventory and warehouse management systems
- Expanded implementation and optimization of the eProcurement system to improve vendor engagement and bid transparency
- Ongoing leadership in the development and implementation of the Tyler Munis ERP system
- Recipient of the 2025 Achievement of Excellence in Procurement (AEP) Award from the National Purchasing Institute (NPI), recognizing innovation, professionalism, productivity, and leadership in procurement

- Delivered comprehensive citywide and department-specific purchasing training programs to strengthen compliance and operational knowledge
- Successfully managed surplus asset disposal and sales across all City departments, ensuring regulatory compliance and maximizing return value
- Processed and reviewed purchase requisitions to ensure alignment with risk management, budgetary controls, and procurement regulations
- Enhanced procurement processes through policy updates, workflow improvements, and increased use of technology to drive efficiency and cost savings

Division of Innovation & Technology

Program Description:

The mission of the Division of Innovation and Technology is to strategically align technology, data, and digital services to enhance the City's operational efficiency, service delivery, and long-term organizational resilience. The Division is committed to advancing secure, reliable, and scalable technology solutions that support the needs of residents, businesses, visitors, and City staff.

Core priorities include modernizing enterprise systems and infrastructure, automating and streamlining business processes, expanding online customer self-service capabilities, strengthening cybersecurity and data protection, and promoting data-driven decision-making through integrated and accessible information systems. The Division also supports public safety through advanced technology solutions, including real-time data integration, communications systems, and situational awareness tools.

Division Goals for Fiscal Years 2027 and 2028:

- Advance key software lifecycle initiatives, including:
  - Cityworks Permitting and Land Management System Upgrade
  - Tyler Enterprise Resource Planning (ERP) including new modules to streamline procurement and daily operational processes
- Continue long-range network infrastructure planning for State Street City Hall and the new Police Department safety hall at 1625 West Redlands Boulevard
- Maintain productivity and system reliability through ongoing workstation and laptop refresh cycles
- Deploy an enhanced email security platform to strengthen protection against evolving phishing threats
- Expand the citywide video management system with additional cameras to improve public safety coverage
- Support the Police Department by implementing a modern body worn camera platform with drone integration and real-time intelligence capabilities
- Transition of the City's primary domain from CityofRedlands.org to Redlands.gov to align with federal .gov standards
- Implement a Security Information and Event Management (SIEM) solution for centralized, real-time monitoring of security alerts

Accomplishments for Fiscal Years 2025 and 2026:

Information Technology

- Successfully migrated and upgraded the enQuesta Utility Billing and Customer Account Management System.
- Replaced the legacy Route Management and Roll-Off Scheduling System with the modern Hauler Hero platform.
- Imaged, configured, and deployed 40 Getac ruggedized mobile data computers for Police personnel
- Replaced the Police Department's camera system into a unified platform which can also be integrated with future building access control
- Upgraded more than 150 workstations as part of the ongoing hardware refresh lifecycle

- Provisioned upgraded network infrastructure equipment across city facilities to enhance resilience and performance
- Modernized the City's telephony environment by implementing a cloud-hosted RingCentral system, including all new phone hardware and a next-generation Customer Service contact center
- Deployed a 24/7 managed detection and response service to provide continuous monitoring and threat analysis across all workstations
- Launched a comprehensive annual cybersecurity training program featuring recurring simulated phishing assessments for all staff
- Procured and installed next-generation Internet firewalls to strengthen security visibility and protection citywide
- Upgraded all City facilities with higher speed Internet circuits, improving connectivity across municipal operations
- Implemented a 50GB dark fiber backbone between the City's data center and core network to significantly increase bandwidth and reliability
- Rolled out a new multifactor authentication solution for the Police Department to ensure CJIS-compliant access control
- Migrated the City's website to an updated backend platform aligned with upcoming DOJ WCAG accessibility requirements
- Conducted internal and external cybersecurity assessments with CISA and implemented ongoing improvements to enhance the City's security posture
- Deployed new hypervisor servers with new and expanded storage capacity to support growing virtualization needs.
- Provided new network infrastructure to support relocating the Homeless Solutions Division into modernized office space within the State Street City Hall building

Geographic Information Systems

- Completed a total of 358 tickets requesting GIS-support related tasks, reflecting a growth in impact and demand for GIS services across departments
- GIS Data and Application Management
    - Our production environment currently supports 727 core GIS layers, including parcels, address points, water and sewer infrastructure, streets and centerlines, zoning, building footprints, and streetlights
- Server Migration: This project was a critical initiative to modernize our aging infrastructure and enhance system performance, reliability, and scalability. As part of the migration, we successfully deployed three dedicated servers to support Portal for ArcGIS, Web Adaptor, and the ArcGIS Data Store, and established connectivity with the new SQL Server environment
- Geo-validation Project completion: Geo-validation Project concluded. This project started in 2022 and had as its objective the creation of a highly accurate GIS dataset for use in Next Generation 9-1-1 (NG9-1-1) or Public Safety Answering Point (PSAP) mapping systems.
- Training and Presentations: Throughout 2025, the team delivered a series of training sessions and presentations to support staff in effectively using OneStop (ArcGIS Pro version) and a range of web-based applications. These trainings covered key tools and workflows, including the Homeless Resource App, Building Footprint application, Redlands Bicycle Classic operations apps, Hydrants & Pressure Zones, Stormwater Inspections, Animal Shelter app, Code Enforcement, and Capital Improvement Projects (CIP).

- Utility Network Update: Initiated in 2023, this project focused on cleaning, validating, and updating the utility network to prepare it for migration to the new platform. By December 2025, significant progress had been made to ensure data quality and readiness. Completion of the migration required upgrades to both the enterprise geodatabase (SDE) and the server environment. The updated Utility Network is anticipated to be operational by June 2026, enabling enhanced asset management, advanced analysis capabilities, and improved system performance.
- Address Points Update Workflow: This workflow was developed to support City Planners in the assignment of new addresses through a structured and standardized process. The solution provides a tool for generating and validating address locations, ensuring consistency and accuracy. Additionally, it streamlines updates to the GIS address point layer, improving data quality and supporting critical operations such as planning, permitting, and public safety.

Customer Service

Program Description:

The Customer Service Division provides responsive and high-quality service to City residents and customers through both telephone and in-person interactions. The Division serves as a central point of contact for a wide range of City services, ensuring timely assistance, accurate information, and efficient resolution of customer inquiries.

In addition to its customer-facing responsibilities, the Division manages utility billing for more than 23,900 accounts, encompassing water, wastewater, solid waste, household hazardous waste, and street sweeping services. This equates to approximately 86,000 services billed on a bi-monthly basis. Utility bills are processed and distributed every two months as a cost-effective measure to reduce administrative and mailing expenses.

On an annual basis, the Division assists approximately 30,880 customers at the public counter and 58,480 customers via telephone. Services provided include payment processing for all City revenues, assistance with utility billing inquiries, service connection and disconnection requests, and support related to water usage, water quality, and conservation programs. Additional responsibilities include dog license renewals, coordination of solid waste and roll-off services, handling missed collection requests, and providing information on rebate and assistance programs. These activities resulted in the processing of 64,996 service orders in 2024, reflecting the Division's critical role in supporting daily operations and customer needs.

The Customer Service Division is budgeted as a single program within an Internal Service Fund and is supported by the Water, Wastewater, and Solid Waste operating funds.

Program Objectives:

- Provide high-quality, responsive customer service to all residents and customers of Redlands, assisting with water, wastewater, solid waste, and other City-related payment services.
- Ensure utility customers receive clear, accurate, consistent, and equitable billing for municipal services.
- Continuously evaluate and improve internal processes to streamline operations, increase efficiency, and minimize operating costs.
- Expand customer awareness and utilization of convenient payment options, including self-service and automated solutions such as payment kiosks, recurring payment programs, and multi-channel digital payment platforms, to improve accessibility and reduce in-person service demand.
- Promote and increase adoption of online account management tools, including Redconnect, to provide customers with secure 24/7 access to account information, billing history, water usage data, and paperless billing options, while supporting sustainability initiatives.
- Educate customers on mandatory water conservation requirements by providing clear guidance and directing them to the City's website and available resources, including referrals to the Water Conservation Coordinator for water audits and conservation rebate programs.
- Promote customer awareness of solid waste and recycling requirements by offering accurate information and directing customers to the City's website, as well as coordinating referrals to the Solid Waste Division and Recycling Coordinator for additional support and program participation.

Accomplishments for Fiscal Year 2024-2025:

- Expanded utility payment options through InvoiceCloud to include multiple payment options with no service fees and implemented point-of-sale devices to enhance customer convenience and payment accessibility.
- Administered the Utility Assistance Program, providing financial support to eligible residents and ensuring timely and accurate application of assistance to customer utility accounts.
- Implemented structured payment plans for utility customers, including necessary system modifications to support program requirements and improve account management flexibility.
- Developed and administered new policies in compliance with California Senate Bill 3, ensuring regulatory adherence related to water service discontinuation practices.
- Initiated the upgrade to EnQuesta Version 6 Utility Billing and Customer Account Management System, enhancing utility billing operations and improving the customer-facing online access portal.
- Began implementation of Hauler Hero for commercial solid waste route management and roll-off billing, improving operational efficiency and service tracking.
- Launched a paperless billing campaign through InvoiceCloud to increase e-billing adoption, reduce paper usage, and lower mailing costs.
- Expanded the utility bill collections process with Selectron to streamline and improve customer communications.

Accomplishments for Fiscal Year 2025-26:

- Completed the upgrade of EnQuesta, including enhancements to the RedConnect customer portal and cloud migration, improving system flexibility, reliability, and the ability to meet evolving customer service expectations.
- In coordination with other City departments, implemented new processes and supporting system modifications to comply with organic waste management requirements, improving program administration and regulatory compliance.
- Administered the Utility Assistance Program, delivering financial support to eligible residents while ensuring timely and accurate application of assistance to utility accounts.
- Implemented required system updates to support automated cart integration and solid waste route adjustments, improving operational efficiency and service accuracy.
- Updated special hauling processes and introduced system enhancements, including new work order functionality, to improve service tracking and responsiveness.
- Increased customer awareness of available payment options through targeted outreach efforts, including bill inserts, social media, and messaging on utility bills, promoting greater use of convenient payment methods.
- Supported and monitored billing system configuration for the City-wide meter exchange program, including installation of AMR/AMI meters, to ensure accurate billing and integration with advanced metering technology.
- Collaborated with the Solid Waste Division to streamline internal scheduling processes, improving service coordination and maximizing efficiency in customer service delivery.
- Successfully completed the transition to RingCentral, in collaboration with the Information Technology Division, a new phone service provider and Customer Service call center system, enhancing communication capabilities, reporting tools, and overall service quality.

Police Department

Mission Statement:

The Redlands Police Department is dedicated to enhancing public safety through trust, innovation, community partnership, and excellence in service.

Departmental Goals:

- Continue to provide outstanding service to internal and external customers.
- Develop leaders and succession planning strategies.
- Implement evidence-based measures to improve service, create efficiencies, and prevent and reduce crime.
- Improve recruitment and retention efforts to maintain a high-performing organization.
- Continue to strengthen the organizational culture.
- Develop a departmental strategic plan.
- Leverage available resources through volunteers, analysts, technology, and data-driven solutions to create greater efficiencies.

Sustainability Efforts:

- Continue using a new vehicle profile for professional staff employees to reduce fuel usage and reduce carbon emissions.
- The department desires to create paperless systems when possible.

Performance Measures:

- Maintain crime clearance rates above the national average in 2026-2028.
- Identify emerging crime trends quickly and develop and implement targeted, evidence-based strategies to address them.

Police
Patrol Services Bureau

Program Description:

The Patrol Services Bureau is one of the most visible units in the department as it provides twenty-four hours a day service to the residents of our community. Patrol officers respond to a wide variety of emergency and non-emergency calls for service. The Patrol Services Bureau is comprised of several sub-units, namely:

- Patrol: The Patrol teams are comprised of nine officers including corporals and one sergeant. Five patrol teams rotate schedules supplemented by civilian community service officers.
- Field Training and Evaluation Program (FTO): The Field Training and Evaluation Program is responsible for the development of recruits into competent solo police officers. Field training officers coordinate and deliver nearly six (6) months of training to new officers to prepare them to operate as solo police officers.
- Community Service Officers (CSOs): CSOs respond to non-emergency calls for service or crimes that have been committed with no suspect information or leads. The CSOs also respond to non-injury traffic collisions. Their presence significantly reduces the call load for patrol officers, allowing the officers to be available for emergency calls for service.
- Explorers: The Redlands Police Department's Law Enforcement Explorer Post began in 1968 and has been the starting point for many future law enforcement officers. Young men and women interested in joining the program must be at least 15 years of age and no older than 21 years. The program is for youth interested in learning about the field of law enforcement.
- Custody: The department contracts with Allied Universal to provide custody officers who are responsible for the processing, booking, and transportation of prisoners.

Program Objectives:

- Respond to calls for service promptly and render appropriate assistance upon arrival.
- Conduct criminal investigations and prepare required documentation to be forwarded to detectives, the District Attorney, and/or other agencies.
- Maintenance of a temporary custodial processing facility that complies with applicable state and federal law.
- Development of recruits into competent police officers.
- Maintain an atmosphere of positive and professional contact between all officers and members of our community.

Significant Program Changes:

- Between 2024-2026, fifteen (15) sworn police officers were hired.
- In 2026, an additional CSO will be hired, increasing the total number of CSOs assigned to the Patrol Services Bureau to seven (7).
- In 2025, the Patrol Services Bureau received eighteen (18) new Tahoes and in 2026 received eight (8) new Explorers.

The Patrol Services Bureau will be transitioning to a new body-worn camera platform. The new AXON cameras bring the organization in line with industry standards and expands capabilities by assisting with translation and report writing, utilizing technology as a force multiplier in responding to in-progress crime. Along with the new AXON cameras, Patrol will be deploying a new Drone as First Responder (DFR) program, aligning us with many agencies in our region.

Police
Communications Unit

Program Description:

The Communications Unit serves as the operational hub connecting the community with public safety personnel. Communications personnel are often the first point of contact for individuals requesting assistance, whether during emergencies or routine calls for service. Communications personnel assess incoming information, determine the appropriate response and coordinate resources to ensure the safety of officers and the public.

The Dispatch Center manages a high volume of communications through multiple platforms including 911 emergency lines, non-emergency business lines, alternate emergency lines, text-to-911, emails to 911, and online reporting. Dispatchers utilize advanced technology such as a Computer-Aided Dispatch (CAD) system, radio communications, and a citywide camera system to support field personnel and ensure timely, accurate responses to calls for service. Dispatchers monitor numerous radio channels used by police officers, the fire department and other law enforcement agencies while simultaneously managing calls for service and providing critical information to officers in the field.

Through professionalism, critical decision-making and advanced training, the Communications Unit plays a vital role in maintaining public safety and ensuring efficient coordination between the community and law enforcement services.

Program Objectives:

- Provide prompt, professional service when answering emergency and non-emergency lines, ensuring calls are prioritized appropriately and routed to the proper agency or entered into the CAD system for police response.
- Dispatch calls for service to police officers while maintaining accurate and timely communication with officers and allied agencies.
- Monitor radio channels and maintain constant communication with police personnel to support officer safety and operational effectiveness.
- Utilize the citywide camera system and other technological resources to assist officers during calls for service and support situational awareness.
- Process requests from officers in the field including additional resources, database inquiries and coordination with outside agencies.
- Maintain effective communication between the public, police personnel, city departments and allied public safety partners to ensure efficient service delivery.

Significant Program Changes:

- Implemented standby duty coverage protocols to maintain minimum staffing levels amid staffing shortages and ensure coverage during call-offs.
- Requisitions for the Lateral Police Dispatcher position were posted multiple times.
- At the close of 2025, the Communications Unit consisted of 2 Dispatch Supervisors and 11 dispatchers. The unit currently has 3 dispatcher vacancies and one Dispatch Supervisor vacancy.

Accomplishments:

- The unit welcomed a lateral dispatcher with over six years of experience from another agency. She successfully completed the training program in approximately two months and quickly became a valued and much needed member of the dispatch team.
- Dispatchers were active in the community attending various department events, such as: Coffee with a Cop, Thanksgiving Tuesday, Thanksgiving Luncheon at the Joslyn Senior Center and Heroes and Helpers.
- Dispatchers completed numerous training opportunities to strengthen operational effectiveness and leadership development. Trainings included: Tactical Dispatch Training, Emotional Intelligence Training, Complacency and Critical Decision-Making Training, Communications Training Officer CTO) Course, POST Basic Dispatch Academy, Peer Support Training.
- Two dispatchers now serve on the department's Peer Support Team, expanding wellness support for department personnel.
- Two female dispatch supervisors attended the Women in Leadership in Law Enforcement Symposium further developing their leadership skills and strengthening professional growth within the unit.
- The dispatch supervisors attended the California CLETS Users Group Annual Conference enhancing system knowledge and operational readiness related to state and federal law enforcement databases.
- One dispatcher and two Dispatch Supervisors received Commitment to Excellence Awards for their critical role in supporting a large-scale multi-agency retail theft operation.
- The Communications Unit played a key role in the successful implementation of a new camera system and a new phone system. These projects required extensive planning, coordination, vendor meetings, system demonstrations and operational testing. Dispatch Supervisors and dispatchers actively participated in the process to ensure the systems met operational needs and were successfully integrated into daily operations.
- Supervisors continued conducting regular Phone Call Quality Assurance and Review Programs to evaluate dispatcher performance and ensure interactions with the public meet departmental service standards, policies and communication expectations.
- Dispatch personnel maintained ongoing oversight of requests submitted through CitySourced, the City's resident reporting platform, ensuring appropriate calls for service are created and therefore addressed efficiently.
- Dispatchers utilized city cameras 168 times on calls for service; answered 51 texts to 911 and answered 35,795 emergency (911) calls; and answered 92,924 business and alternate emergency lines.
- Dispatch entered 46,224 calls for service.
- Despite high call volumes and staffing limitations, the center maintained excellent performance metrics: 98.82% of 911 calls were answered within 15 seconds and 99.46% were answered within 20 seconds.

Police
Support Services Bureau

Program Description:

The Support Services Bureau is comprised of diverse responsibilities that affect all operations of the department. The goal of the Support Services Bureau is to supply the necessary equipment, provisions, and support personnel to facilitate the delivery of efficient and courteous public safety services to residents of Redlands. The Support Services Bureau is comprised of the following units: Office of the Chief of Police, Operations Manager, Records, and Fleet.

The Office of the Chief of Police is comprised of the Chief, two (2) Deputy Chiefs, one (1) Executive Assistant, one (1) Management Analyst, one (1) Operations Coordinator, one (1) Administrative Assistant, one (1) Administrative Services Commander, one (1) Personnel & Training Sergeant, and one (1) Sergeant assigned to Professional Standards. The Deputy Chiefs oversee the day-to-day operations of the department. The Chief's Executive Assistant is the community's primary point of contact for the Office, handling complex and confidential executive-level administrative and secretarial duties for the management staff. The Executive Assistant also coordinates special projects and events and maintains the department's personnel files.

The Management Analyst oversees the financial operations for the department. Their responsibilities include ensuring the department's needs are being met through budget development and monitoring, purchase requisitions, grant coordination, and payroll processing. The Operations Coordinator's responsibilities include the coordination of new hire background investigations for all staff and volunteer positions. Backgrounds conducted also include applicants for massage therapists and solicitor permits. The Operations Coordinator also oversees and maintains all training files and ensures that the entire department's training requirements through POST, legislative, and department mandates are met. The Administrative Services Commander oversees both the Professional Standards Sergeant and the Personnel and Training Sergeant. The Professional Standards sergeant oversees internal investigations and personnel issues and is the point of contact for the community for any inquiries and complaints. The Personnel and Training Sergeant oversees the development and deployment of internal training, as well as recruitment and wellness efforts.

The Operations Manager oversees the Records Unit, Communications Unit, building maintenance, and fleet operations. The Operations Manager also performs other specialized duties and works daily with other City staff to ensure a timely response to inquiries from the Police Department.

The Records Unit is comprised of one Supervisor and eight full-time Records Specialists responsible for the management, security, and processing of all criminal justice records generated by the department. Unit personnel process police reports, citations, traffic collision reports, pre-employment background checks, subpoenas, discovery requests, and other official documentation produced across all divisions.

Records Specialists serve as a primary point of contact for the public and are responsible for coordinating and cross-reporting with allied agencies and criminal justice partners, including the District Attorney's Office, courts, Department of Children and Family Services, Department of Motor Vehicles, Parole, Probation, and the Department of Justice. The Unit functions as the Department's court liaison, ensuring the timely delivery of reports and evidentiary materials such as audio recordings, 9-1-1 calls, photographs, and video evidence. Additional responsibilities include maintaining and updating registrant information in the California Sex and Arson Registry (CSAR) for individuals residing within the City of Redlands.

The Records Supervisor serves as the Department's Custodian of Records and is responsible for overseeing California Public Records Act (CPRA) requests, Freedom of Information Act requests, petitions to seal records, DOJ/CJIS audits, monthly validations, and reporting National Incident-Based Reporting System (NIBRS) compliant data through the California Incident-Based Reporting System (CIBRS). The Supervisor also serves as the Agency CLETS Coordinator (ACC), ensuring compliance with DOJ and FBI regulations, as well as overseeing CLETS training and certification.

Program Objectives:

- Providing timely and accurate records services to the public, courts, and allied agencies.
- Maintaining compliance with statutory and regulatory requirements, including CPRA, CLETS, CJIS, and CIBRS reporting standards.
- Supporting investigations and prosecutions through efficient processing of subpoenas, discovery requests, and evidentiary materials.
- Ensuring the integrity, confidentiality, and accessibility of all records.
- Delivering professional and responsive customer service despite high workload demands.
- Supporting Department operations through reliable records management and interagency coordination.

Significant Program Changes:

In 2025, the Records Unit experienced substantial operational impacts due to critical staffing shortages. While the authorized staffing level includes eight Records Specialists and one Records Supervisor, the Unit operated with only five Records Specialists and one Acting Supervisor for the majority of the year. This resulted in four vacancies and an approximately fifty percent reduction in staffing. To maintain compliance with legally mandated functions, the Unit implemented the following service-level adjustments:

- Reduction of front counter/public window hours to two days per week.
- Limitation of Penal Code §290 registrant processing to one day per week.
- Restriction of phone services to designated hours.

These measures were necessary to prioritize essential and legally required functions, including discovery processing, subpoenas, arrests, report processing, and CPRA requests. Despite these adjustments, workload demands continued to exceed available capacity, requiring the Unit to operate in a continuous backlog management environment. In August 2025, the Unit implemented the NextRequest system to manage CPRA requests, resulting in improved tracking, organization, and transparency of public records requests.

Accomplishments:

- Maintained full operations and legal compliance despite fifty percent staffing shortage.
- Handled high workload across reports, subpoenas, discovery, and public requests.
- Staff took on multiple roles, with specialized tasks concentrated among few employees.
- Maintained accuracy, professionalism, and completed extensive required training.
- Demonstrated strong resilience and adaptability, but staffing shortages risk burnout and long-term sustainability.
- The Training Unit is committed to performing comprehensive background investigations to ensure the department's standards and commitment to excellence are met with each new

hire. In 2024 and 2025, 28 background investigations were completed, and 29 applicants were hired and onboarded.

- Subject matter experts were brought in to update staff on areas related to leadership, conflict resolution, data analysis, employee wellness, and new human resource regulations.
- The Training Unit established a Peer Support Team which includes current and retired members of the Police Department.
- The Training Unit developed a comprehensive Employee Wellness Program to benefit all members of the department and includes wellness checks for staff.
- Total requisitions for 2024 and 2025: 23
- Number of background investigations conducted on sworn and professional staff applicants for 2024 and 2025:
    - Total Conducted: 31
    - Total Completed: 28
        - Total Sworn: 23
        - Total Non-Sworn: 5
- Total applicants hired and onboarded in 2024 and 2025: **29**

Police
Community Services Bureau

Program Description:

The Community Services Bureau works closely with residents and business owners to prevent crime, solve problems, and enhance the quality of life of Redlands' residents. The Community Services Bureau comprises several sub-units, including:

- Traffic Unit: A sergeant, a motorcycle officer and two community services officers make up the Traffic Unit. The two community service officers function as parking control officers (PCOs). They are responsible for compliance with parking regulations by patrolling assigned areas, investigating parking complaints, issuing citations, and managing abandoned vehicles. The motorcycle officer patrols the city for traffic violations, ensures pedestrian safety, investigates injury traffic collisions, and responds to traffic complaints. The sergeant is responsible for coordinating the efforts of the motorcycle officer and two parking control officers. The sergeant also manages all the Office of Traffic Safety (OTS) grants which encompass sobriety checkpoints, Click-It or Ticket operations, additional traffic enforcement, and DUI saturation patrols during special events and holidays.
- Special Event Unit: A sergeant and one officer make up the special events unit. The sergeant plans and manages the department's response to all of the special events in town such as the Christmas Parade, Redlands Bicycle Classic, Run Through Redlands, Lincoln Pilgrimage Parade, high school graduation ceremonies, several triathlon/5-10 K runs, and approximately thirty additional special events that are held on weekends and require police assistance. The sergeant also supervises the Citizen Volunteer Unit, the Community Policing Unit, and the three school resource officers. The officer assists with all special events and works with other city departments to provide outreach and resources to the unhoused population. This officer is also the handler for the department's police dog, "Jake". Together, the K9 team assists other units with apprehending dangerous suspects and detecting explosives.
- Community Engagement Team: A sergeant, a corporal, three officers and one San Bernardino County Probation Officer are assigned to the Community Engagement Team (CET). The CET officers are committed to addressing ongoing crime problems and promoting long-term interactions with community members and local businesses. The CET assists other department units with homeless camp clean ups, serving search warrants, apprehending suspects and responding to in-progress crimes. The CET also works closely with the community and faith-based organizations to strengthen community relationships while working towards common goals of public safety and well-being. They spearhead department youth programs and assist in special events.
- School Resource Officers: Three officers are assigned to work as School Resource Officers (SROs). The SROs work with the Redlands Unified School District to improve the safety of students and staff and to reduce crime committed by juveniles and young adults. Moreover, the SROs establish trust and a channel of communication with students, parents, and teachers. The SROs serve as positive role models to instill students with high moral standards, good judgment and discretion, respect for other students, and a sincere concern for the school community. Currently, there is one officer assigned to Redlands High School, one assigned to Citrus Valley High School and one officer assigned to the three middle schools (Clement, Moore, and Cope). All three positions are funded by the Redlands Unified School District.
- Triage, Engagement, and Support Teams (TEST): One San Bernardino County Department of Behavioral Health TEST team member is assigned to work in the Redlands Police Department to assist both community policing officers and patrol officers in providing services to residents. Triage teams specialize in crisis intervention, continuum of care, and intensive case management for individuals experiencing an urgent psychiatric health condition with up to 59 days of individualized linkage and follow-up services. The goal of the TEST program is

to improve resident experience by expanding access to mental health services with local staff and rapid response times, thereby allowing the residents to possibly stay within their community by strengthening their opportunity for recovery and wellness. TEST also strives to reduce the residents' involvement with the criminal justice system and decrease the frequency of emergency room visits and/or unnecessary hospitalization. While a valuable resource, there has been a high degree of turnover of TEST staff since its inception.

- Citizen Volunteers: The Department also has a Citizen Volunteer Unit consisting of hardworking men and women who have chosen to give back to their community. After a person completes the application process to join the Citizen Volunteer Unit, they complete a preparation academy. This intensive training gives them an understanding of the various components of the department and the expectations of the community. After their initial training, the citizen volunteers patrol the city in specially marked patrol units and serve as the "eyes and ears" of the department. They provide a lookout for illegal activities, carry a police radio, and are in constant contact with Dispatch and the officers on duty.

Program Objectives:

- Support the department's community policing and problem-solving efforts through active participation and input on issues.
- Conduct proactive patrols and take appropriate enforcement action.
- Reduce the number of traffic collisions by enforcing traffic laws and educating the public.
- Reduce the number of traffic collisions caused by DUI drivers by conducting DUI checkpoints.
- Work with the Redlands Unified School District to improve the safety of students and staff at the selected schools and to reduce crime committed by juveniles and young adults.
- Work with the Department of Behavioral Health to improve resident experience.
- Maintain a strong, viable volunteer program that assists department members in their efforts to provide a safe and sustainable community.
- Continue to foster strong relationships with local businesses and focus on the changing needs of our local business districts.

Accomplishments:

- The Special Events Unit assisted with traffic control and in providing public safety services at several special events in town such as the Redlands Bicycle Classic, Redlands Bowl Summer Music Festival, the Run thru Redlands, commencement and graduation ceremonies, and other outdoor events. The Special Events Unit continues to foster positive police-community relationships by coordinating and participating in numerous community policing events and youth leadership activities and programs. Many of these community events are sponsored by the Redlands Police Community Foundation (RPCF), a non-profit organization dedicated to providing additional support to the Redlands Police Department, including the "Coptober Community Fair," the serving of community Thanksgiving meals, Blue Christmas, Heroes and Helpers, and other youth leadership events throughout the year.
- The Traffic Unit continued its regular enforcement duties, and the department was awarded the Office of Traffic Safety Selective Traffic Enforcement Program grant for 2025/2026 in the amount of $120,000. The grant provides funding to conduct fifteen (15) traffic enforcement operations, ten (10) DUI saturation patrols, six (6) DUI checkpoints, six (6) traffic and DUI education programs, as well as providing new equipment for the unit. Thus far, the Traffic Unit has investigated a total of five (5) traffic fatalities during the fiscal year.
- Members of the Citizen Volunteer Unit donated over 2,000 hours in the current fiscal year. Volunteers are a vital part of the department's strategy to meet the public safety needs of the

community. The operational expenses of the Citizen Volunteer Unit are funded through the RPCF.

- The School Resource Officers responded to over 1,000 calls for service this fiscal year. They continue to have ongoing police presence and positive interactions with Redlands Unified School District students and staff.
- The Community Engagement Team continues to impact retail crime in the city. They have worked with local businesses to plan and implement multiple large-scale operations at our local shopping centers. CET has also established a strong working relationship with the City's Homeless Solutions Team, San Bernardino County Probation, and other allied agencies.

Police
Special Services Bureau

Program Description:

The Redlands Police Department's Investigations Unit is responsible for conducting criminal investigations and unresolved field investigations. Following up on the initial efforts of Patrol and Community Service Officers, the Investigation Unit's mission is to identify and apprehend those responsible for the commission of various crimes, such as homicides, sexual assaults, robberies, burglaries, thefts, aggravated assaults, and to facilitate the recovery of stolen property. The Investigations Unit is also responsible for protecting the innocent and wrongfully accused. Criminal investigations include gathering information, interviewing parties, and collecting evidence. The arrests of offenders and recovery of stolen property are accomplished through the evaluation of crime trends and patterns, the identification and location of past and probable offenders, and the utilization of modern police technology and forensic sciences. By developing and maintaining active relationships with the RPD, other law enforcement agencies, social service organizations, local citizen groups, and the District Attorney's Office, the investigators successfully bring criminal cases to prosecution and conviction.

The Investigations Unit is comprised of the following:

- Violent Crimes: Responsible for homicides, rapes, assaults, robberies, hate crimes, and other acts of violence.
- Special Victims: Responsible for crimes against children, the disabled, and the elderly.
- Property Crime: Responsible for burglaries, fraud, identity theft, vehicle theft, and other theft-related crimes.
- Internet Crime Against Children (ICAC): Associated with the Los Angeles Police Department's ICAC Task Force and is responsible for investigating internet crimes against children. Reports are generated through the National Center for Missing and Exploited Children (NCMEC). NCMEC receives reports from electronic service providers and people who report directly on its website.
- Crime Analysis: Responsible for analyzing crime trends, series, and patterns to increase the department's ability to investigate and apprehend criminals, as well as control crime.
- Forensics Unit: Works closely with the Special Services and Patrol Services Bureaus, handling various types of calls, including sexual assault, homicide, and property crimes.
- Property and Evidence: Responsible for retaining and maintaining all property and evidence. They are also responsible for transporting evidence items for additional processing to the San Bernardino County Sheriff's Crime Lab.

Program Objectives:

- Investigate crimes to disposition, including arrest, prosecution, and conviction.
- Develop and implement strategies to address crime trends, patterns, and series.
- Train and educate patrol officers in specialized criminal investigations and procedures.

Significant Program Changes:

- A Sergeant position was reassigned from the department's Multiple Enforcement Team to the Investigations Unit to supervise within the Investigations Unit, ensuring better span of control.

Accomplishments:

- In January of 2024, a suspect had been stealing items from small businesses in the downtown area. In February, officers responded to a theft report at a downtown business and obtained video of the suspect. The suspect was located, arrested, and admitted to committing the thefts to a detective. The suspect wrote an apology letter to the businesses, and several items were recovered and returned.
- In June of 2024, a suspect entered the Redlands Ulta Beauty store and stole approximately $1,991.00 worth of beauty products. Detectives located the suspect in the City of Moreno Valley and took her into custody with the assistance of the CET team. It was also found that the suspect was responsible for various thefts at Ulta Beauty locations throughout Southern California, totaling 11 thefts with over $20,000 in loss.
- In July of 2024, officers responded to the home of the victim. The interior video surveillance showed a former in-home care provider walking around the interior of the victim's bedroom as she slept. The suspect searched through the drawers in the victim's bedroom. The suspect was identified, and within a few days, a search warrant was issued and served at her home, resulting in the collection of evidence. Officers located and arrested the suspect. As the investigation continued, information was developed that led to the discovery of another victim in the City of Upland.
- In August of 2024, officers responded to a missing person's report after a concerned neighbor located their missing neighbor's vehicle parked approximately half a mile away from their home. The circumstances regarding their disappearance were suspicious, and detectives became involved in the investigation. During an intensive canvass and search of the trailer park, a suspect called his family and admitted to killing his neighbors. An extended barricaded situation occurred at the location, and eventually, the suspect was arrested. Over the following several days, detectives, forensics, and the San Bernardino County Sheriff's Coroner's Office executed a search warrant at the residence and recovered the bodies of both victims. The District Attorney's Office personnel were also on scene and working closely with detectives to ensure a prosecutable case.
- In March of 2025, a search warrant was served in the City of Yucaipa involving a suspect who was downloading multiple Child Sexual Abuse Material (CSAM) files. While executing the search warrant, the suspect actively attempted to destroy the evidence; he was arrested and sent to jail. An analysis was conducted on a computer seized in the suspect's room, and evidence of CSAM was located.
- In March of 2025, eight storage units were burglarized. One suspect was linked to the crime through license plate data and surveillance in Winchester, CA. After tracking his vehicle and conducting physical surveillance, detectives arrested him for the crimes. A subsequent search of the suspect's residence uncovered identifying clothing and stolen property related to several Redlands cases. The investigation involved collaboration among multiple agencies.
- In April of 2025, a suspect punched the victim, causing a broken jaw during an altercation that occurred in a bar located downtown. A second suspect was also involved in the assault. Detectives located and arrested both suspects (in Banning and Beaumont) and obtained full confessions.
- In May of 2025, personnel from the Redlands Police Department set up a computer network system to investigate individuals distributing and soliciting CSAM on Peer 2 Peer (P2P) networks. In July 2025, the Investigations Unit, with the help of SWAT, MET, and several other outside agencies, executed a search warrant at a suspect's residence in Loma Linda. The suspect admitted to possessing and distributing CSAM in the P2P network and was booked into jail. His devices were seized pursuant to the warrant and analyzed. Over 1,000 images of CSAM were discovered on his devices.
- In May of 2025, several masked suspects forced entry through the rear door of the victim's residence. One suspect was armed with a handgun. One victim fell and was injured during the confrontation, and when the husband confronted them, the suspects fled. Through further investigation, several vehicles of interest and suspects were identified and arrested. The DA's

office filed multiple charges against the suspects, and they were discovered to have been part of a coordinated burglary crew targeting expensive homes in Southern California.

- In August of 2025, officers responded to a shooting at Union Ave. and Orange St. The victim was a 16-year-old student. Witnesses came forward and assisted with the identification of the shooter. A search warrant was executed in Fontana by RPD SWAT, resulting in the suspect's arrest.
- In September of 2025, detectives assisted the Traffic Unit with identifying and locating the suspect involved in a fatal vehicle crash. The Investigations Unit was engaged in surveillance and eventually developed information that the suspect vehicle was in the high desert. The Investigations Unit and CET members responded to Victorville, where the suspect vehicle was located in a driveway with damage consistent with the collision. The suspect was eventually located in the area and led detectives and SBSD deputies on a vehicle pursuit. He eventually stopped and was arrested without incident.
- In December 2025, officers responded to a report of a shooting in the 90 block of Kansas Street. Upon arrival, officers located a deceased male victim lying in his bed with apparent gunshot wounds. Family members and evidence located at the scene indicated the suspect was the victim's relative. Detectives carried out the investigation and, within four hours, located the suspect at an address in Calimesa. He was arrested for murder, and the case is pending.
- In December of 2025, a family had just arrived home when a vehicle drove past their residence, an occupant yelled an antisemitic slur and fired several shots at their Hanukkah decorations with an airsoft gun. Detectives took over the investigation and, through multiple investigative leads, identified and arrested the suspect during a search warrant in Yucaipa.

IRNET (Inland Regional Narcotics Enforcement Team):

Illegal narcotics and firearms seized:

- **Cocaine**
  2024 – 1,219 kilos
  2025 – 1,452.5 kilos
- **Fentanyl**
  2024 – 105 lbs.
  2025 – 103 lbs.
- **Methamphetamine**
  2024 – 7,341 lbs.
  2025 – 8,586 lbs.
- **Firearms**
  2024 – 176
  2025 – 103

Property and Evidence:

- Items logged into evidence: Approximately 3,000.
- Items sent to SBSD crime lab: Approximately 800.
- Items destroyed: Approximately 4,000.

Crime Analysis Unit

- Hosted, facilitated, and presented at the 2025 Crime Analysis Mapping Workshop in May of 2025.
- Completed and distributed approximately 120 flyers for Investigations Unit.
- Worked on 15 property case series involving outside agencies: Energy drink thefts, Home Depot thefts, Levi's thefts from various businesses, Stater Bros. thefts, Lego thefts, Golf Galaxy thefts, etc.
- Completed 75 case workups.
- Assisted with monitoring the various protests and demonstrations in our city.

- Coordinated with Lexis Nexis and the Training Unit to ensure in-person training was provided to personnel on the new Accurint Virtual Crime Center (AVCC).
- Hosted/planned the 2025 CCIAA State Conference in Palm Springs.
- Presented for various community events/organizations/and training events on crime trends or crime analysis: Rotary, ESRI Conference, PEACE Academy, CVP Meeting, Redlands High School Career Day, Citrus Valley Career Day, Organized Retail Crime Association; Florida, CA Crime and Intelligence Association 2026 Conference, and presented on behalf of the City of Redlands for representatives from Japan's Ministry of Land, Infrastructure, Transport and Tourism on how the police department is using geospatial technology.
- Recipient of the prestigious Steve Gottlieb Award at the 2025 California Crime and Intelligence Association state conference.

Forensics Unit

- Forensics assisted detectives with a 2021, child molestation investigation. During the investigation, forensic specialists located trace DNA on the victim's clothing which was later linked to the suspect. Additionally, shoe impressions recovered from the crime scene were analyzed and ultimately matched to the shoes worn by the suspect at the time of his arrest. The forensic evidence played a critical role in supporting the investigation and prosecution of the case. The trial concluded in January 2026, resulting in a verdict of life in prison without the possibility of parole.
- Forensics assisted detectives with a double homicide investigation. Forensic Specialists remained on scene alongside investigators for five days, assisting with the recovery and documentation of human remains and other critical evidence. During the processing of the scene DNA evidence was located on several objects within the crime scene. The forensic examination and subsequent laboratory results were instrumental in linking this evidence directly to the victims and supporting the investigation.
- Forensics assisted with a call involving the discovery of suspected human remains in a vacant lot at Tennessee Street and Lugonia Avenue. Forensic Specialists responded to the scene to document and process the evidence and worked in coordination with the San Bernardino County Sheriff's Coroner's Office. Through this collaboration, the remains were confirmed to be human.
- Forensics assisted detectives with a homicide investigation that occurred on Kansas Street during the week of Christmas in 2025. Forensic Specialists responded to the scene to document and process evidence, ensuring all items were properly photographed, collected, and preserved for further analysis. In addition, forensic personnel attended the autopsy to assist with documentation and the collection of additional evidentiary items in support of the ongoing investigation.

Digital Forensics Unit:

- Total devices worked (March 2024 – March 2026): 229.
- Types and quantity of devices: 99 cellphones, 28 external storage devices, 24 tablet devices, 20 USB devices, 20 DVR systems, 17 laptop computers, 12 desktop computers, 1 gaming console, and 8 miscellaneous electronic devices.
- 83 devices for Crimes Against Persons, 92 devices for Internet Crimes Against Children (ICAC), 13 devices for Special Victims Unit (SVU), 20 devices for Property Crimes, 12 devices for Patrol Services, 3 devices for Community Enforcement Team (CET), and 6 devices for Assist Other Department (AOD).
- Total cases worked: 70.
- Total amount of data extracted, previewed, or analyzed: 40.65 Terabytes.

Police
Asset Forfeiture and Grants

Program Description:

The Redlands Police Department receives a portion of the value of assets seized during drug-related arrests. These funds are used to enhance personnel, equipment, and vehicles, in full compliance with the U.S. Department of Justice's Guide to Equitable Sharing of Federally Forfeited Property for State and Local Law Enforcement Agencies.

The department also actively pursues grants to support programs and initiatives, helping maintain and expand services that directly benefit the Redlands community.

Program Objectives:

Asset forfeiture supplements a variety of community drug and violence resistance programs.

Grants awarded and/or funded through the 2026-2027 fiscal year include, but not limited to:

- Bulletproof Vest Partnership Program
- San Manuel Grant to support Redlands Emergency Services Academy (RESA)
- OTS Selective Traffic Enforcement Grant
- Supplemental Law Enforcement Services Fund (SLESF) supplements part-time camera operators as well as purchasing specialized equipment and software for the department.
- Asset Forfeiture Fund supplements specialized equipment and software including ballistic armor, drones, and ammunition.
- Department of Alcoholic Beverage Control (ABC) – Alcohol Policing Partnerships (APP) Grant

Fire

Mission Statement:

The Redlands Fire Department envisions itself as a forward-thinking organization that sets the standard for public safety in the community. Our services will be synonymous with excellence, recognized as embodying "The Redlands Way."

Our mission is to deliver a secure, proficient, and respectful team dedicated to surpassing the expectations of both our community and our organization. Guided by our credo Protect, Perfect, Persevere, we are committed to safeguarding lives and property, continuously improving our operations, and remaining resilient in the face of evolving challenges.

This mission necessitates our members to be part of a skilled, proactive, all-encompassing fire department committed to "Preserving the Past and Protecting the Future" of those under our care. Upholding the core values of honor, loyalty, pride, and courage, we will strive toward the principles of compassion, respect, efficiency, and innovation. We will also leverage emerging technologies and strategic partnerships to enhance service delivery, improve situational awareness, and remain at the forefront of modern fire service practices.

Departmental Goals:

- Secure funding for design, engineering, and construction for the relocation of Fire Station 264.
- Leverage technology and partnerships to drive innovation in emergency response and service delivery, including the use of drones, real-time information systems, and centralized data gathering to support both internal operations and external stakeholders.
- Provide adequate staffing levels to meet and sustain service standards for both city services and public safety.
- Expand and enhance the department’s fuels reduction program by continuing to implement and grow multiple projects aimed at reducing wildfire risk, improving defensible space, and strengthening community resilience through strategic planning and partnerships.
- Continue allocating funds for the development of emergency response and mitigation plans, while also expanding community outreach and education efforts focused on emergency preparedness.

Fire
Administrative Services

Division Description:

Fire Administration provides general department oversight, monitors effectiveness of current programs, determines future needs of the department, and develops plans of action to achieve departmental goals. Fire Administration provides support to all Fire Department divisions, as well as four separate fire stations throughout the city. This Division consists of the Fire Chief, Deputy Fire Chief of Operations, an Administrative Battalion Chief, a Management Analyst, two Senior Administrative Assistants, and Administrative Assistant II.

Division Objectives:

- Maintain fiscal discipline, monitor the budget, and uphold a high level of service for Redlands residents.
- Restructure office staff functions, responsibilities, and procedures to enhance efficiency and productivity.
- Develop, administer, and manage personnel policies and procedures for department personnel.
- Oversee department contracts, agreements for programs and services, and partnerships with other fire agencies.
- Process, administer, and track mutual aid reimbursements from CalOES, the Department of U.S. Forestry, and CalFire.
- Administer grants agreements, projects, reimbursements, and grant closeouts; actively seek grant opportunities to supplement departmental expenditures.
- Monitor Opioid settlement funding for the Fire Department's initiatives to address the Opioid epidemic in the Redlands community.

Fire Suppression Division

Program Overview:

The Fire Suppression Division, under the leadership of the Deputy Chief, is supported by the Administrative Battalion Chief. With 57 dedicated personnel responsible for frontline operational duties, the department operates four 3-person engines, a 4-person ladder truck, a 2-person paramedic squad, and one Battalion Chief per 24-hour shift. In 2025, the Fire Suppression Division responded to approximately 11,669 individual emergencies.

Redlands Fire Suppression personnel manage the following programs:

- *Arson Program*: Implements education, investigation, and community engagement to prevent and combat arson. Through outreach, enforcement, data analysis, and partnerships, it aims to raise awareness, prosecute perpetrators, and enhance fire safety measures, fostering a safer environment for all community members.
- *California Incident Command Certification System (CICCS)*: The California Incident Command Certification System is a cooperative effort between the State Fire Marshal's Office and the Governor's Office of Emergency Services. This program standardizes training for wildland firefighting and certifies that individuals have been trained and hold a minimum level of competency (Cal-Fire, OES, County Fire Chiefs, NWCG FireScope).
- *Ladder Testing & Maintenance*: Testing, repair, and ongoing maintenance of ground ladders used by firefighters (NFPA 1932, OSHA).
- *Redlands Emergency Services Academy (RESA)*: A mutual partnership between Redlands Fire and Police Departments, Crafton Hills College, Redlands Unified School District, and COMPACT to offer new graduates of Redlands high schools the opportunity to experience first-hand the duties of police officers and firefighters (Crafton Hills Community College).
- *Rope/Technical Rescue Training*: This is a multifaceted program that deals with the use of rope to rescue civilians as well as firefighters. A rope is a versatile tool that can aid search teams in locating victims, provide egress in self-rescue, and raise/lower teams to provide rescue from precarious locations. The main areas of focus for this program are LARRO (Low Angle Rope Rescue Operational), Aerial Ladder rescue, Personal escape device (self-rescue rope), and Vertical rescue (CSFM, CAL-OSHA).
- *CONFIRE Operations Committee*: This is a multi-agency committee tasked with identifying and addressing needs and issues, reviewing new products for departments and the region, resource deployments, move-ups, resource availability, response times, response plans, computer-aided dispatch, and other logistical and communications issues.
- *CONFIRE Support Committee*: The CONFIRE Support Committee provides technical expertise and knowledge. They evaluate, vet, and coordinate with the Operations Committee on new product implementation and provide technical input to challenges or issues with communications and CAD equipment.
- *Personal Protective Equipment Program (PPE)*: The PPE program is responsible for the supply cache inventory, specifications, and warranties of purchased PPEs, and tracking of issued equipment.
- *National Fire Incident Reporting System*: The National Fire Incident Reporting System (NFIRS) is a reporting standard that fire departments use to uniformly report on the full range of their activities, from fire to Emergency Medical Services (EMS) to severe weather and natural disasters.

- *Explorer Program/ Explorer Post 261*: In conjunction with the Boy Scouts of America, this program is designed to assist those between the ages of 15 and 21 in preparing for careers in the fire service. Additionally, Explorers are utilized in many support functions within the department. Active members of Post 261 participate in group physical fitness, receive classroom and hands-on training, and are involved in community events and projects. Fire Explorers learn firefighting skills, hose lays, ladders, basic first aid and patient care, wildland firefighting, vehicle extrication, and the use of firefighting tools and equipment.
- *Fit Testing/ N95/ P100 Tuberculosis Mask Fit Program*: This is an OSHA-required program that requires all personnel who wear Respiratory Equipment to be fit-tested annually. This ensures proper fit and seal and limits exposure to toxic atmospheres. Title 8 annual fit testing of N-95 mask users is done to maintain compliance with the California Code of Regulations (OSHA 1910.134, California CCR Title 8, CCR).
- *Fleet Management*: The coordination of maintenance and repair of apparatus and equipment.
- *Hazardous Materials Program*: Manages hazardous material incidents through training, response coordination, and risk assessment. Collaborates to enhance preparedness and safeguard lives, property, and the environment from chemical threats, ensuring community safety and effective response to hazardous material-related incidents.
- *Hose Testing and Repair*: All fire hose within the department is tested annually. This program oversees over 60,000 feet of various-sized diameter hoses and ensures an adequate inventory is kept meeting the needs of our department.
- *Safe Surrender*: As set forth under the Safely Surrendered Baby Law of 2006, this program allows mothers to drop off babies under 72 hours old at a Fire Station without any question. This very important program helps deter abandoning newborns (CFCA).
- *Standard Operating Procedures (Lexipol)*: Management of this crucial program provides for the continuous updating and development of SOPs related to the operations of the department.
- *Swiftwater Rescue*: Personnel assigned to this program have all been trained to the technician level, can train others, and are responsible for maintaining equipment inventories and serviceability.
- *Health and Wellness Program*: This program is a joint management and employee association program based on the International Association of Fire Chiefs and International Association of Firefighters Wellness-Fitness Initiative (WFI) to improve the health and fitness of firefighters. Adopted in 2004, it helps reduce the risk of injury and illness and maintains a healthy and fit workforce (IAFC, IAFF).
- *Respiratory/SCBA Program*: Personnel assigned to this program ensure that all regulations, maintenance, and upgrading of fixed, mobile, and self-contained breathing systems are met. There are numerous federal, state, and local requirements and regulations that guide this program (NIOSH, NFPA, OSHA, CAL_OSHA, ANSI).
- *Pump Testing*: National Fire Protection Association Standard 1911 mandates fire apparatus pumps must be tested on an annual basis (NFPA 1911, Insurance Services Organization).

Program Objectives:

- Suppress structural, wildland, urban interface, vehicle, and other fires as necessary to ensure the health and safety of the community.
- Provide emergency medical services to the ill and injured.
- Conduct technical search, rescue, and recovery activities within the City of Redlands or as requested on a mutual aid basis.
- Respond to, contain, and oversee mitigation of hazardous materials incidents.
- Conduct in-service training in support of the knowledge, skills, and abilities required to respond in a safe and proficient manner.
- Support logistical and administrative functions as required to ensure the proper equipping, training, operations, and safety of the members of the Redlands Fire Department.

Accomplishments for Fiscal Years 2025-2026:

- Completed the comprehensive remodel of Fire Station 262, delivering a modern facility that supports emergency operations and strengthens service reliability, firefighter preparedness, and long-term public safety infrastructure.
- Expanded wildland fire suppression capabilities through the acquisition of a new water tender and brush engine, significantly increasing suppression effectiveness and enhancing community protection.
- Installed high-speed folding doors on fire station apparatus bays, improving facility security and enabling rapid deployment for emergency response.
- Finalized and integrated specialized command build-outs into frontline Battalion Chief vehicles, equipping Chief Officers with advanced technology to strengthen leadership and optimize incident management during complex events.
- Modernized communications infrastructure by transitioning to NFPA-compliant 800 MHz portable radios, replacing outdated equipment and significantly improving firefighter safety and interoperability with partner agencies.
- Initiated architectural design and planning for Fire Station 263 improvements, including critical restroom renovations and replacement of an outdated generator with a modern unit to ensure continued operations during power interruptions.

Fire
Community Risk Reduction Division

Program Description:

This division operates under the direction of the Fire Chief and consists of the Fire Marshal, one Deputy Fire Marshal, two Fire Prevention Inspectors, and one Administrative Assistant II. Operating under the guidelines of the California Fire Code (CFC) as adopted by the State of California and the City of Redlands, the Community Risk Reduction Division provides an all-hazards approach to life and fire safety, safeguarding the community from fire and other hazards through education, engineering, enforcement, evaluation, and analysis.

Redlands Community Risk Reduction Division manages the following programs:

- Code management and policy development relating to life and fire safety
- Construction document reviews for all new and improved buildings and structures throughout the City
- New construction inspection and acceptance testing of fire protection
- State-mandated annual and routine fire inspections of existing multi-family apartment buildings, hotels & motels, educational facilities, commercial and industrial buildings, and facilities as well as the systems, processes, and uses within these buildings
- Code enforcement activities involving imminent life and fire safety hazards and vegetation management
- Public education and information
- Community risk reduction initiatives

Program Objectives:

- Provide a review of development projects related to the model construction codes and standards
- Conduct and enforce the California Fire Code and related safety regulations, as adopted by the City of Redlands
- Authorize issuance of operational permits related to systems, processes, and uses as defined in the California Fire Code
- Conduct routine life and fire safety inspections
- Direct the Vegetation Management Program that protects life and property through defensible space and fire-wise strategies
- Provide logistical support for major emergencies through disaster and emergency incident management
- Oversee special events to ensure proper safety (assemblies, fireworks, etc.)
- Organize community risk reduction initiatives for the identified hazards in the City of Redlands
- Serve as fire safety subject matter experts for City Council and City Commissions.
- Represent the City of Redlands regionally and nationally through public safety professional development and industry advisory opportunities.

Significant Program Changes:

- Adopted the updated 2025 California Fire Code and California Wildland-Urban Interface Code with City of Redlands local amendments.
- Adopted the California Department of Forestry & Fire Protection/State Fire Marshal Fire Hazard Severity Zone 2025 Maps Updates.
- Revised guidelines to align with 2025 Code Updates to assist project stakeholders effectively navigate the new development and Fire plan review process.
- Established online scheduling for fire inspections improving customer access and convenience.

Accomplishments for Fiscal Years 2025-2026:

- Completed State mandated fire inspections for all hotels, motels, and schools.
- Completed 2,232 construction document plan reviews.
- Completed 5,014 new construction inspections.
- Performed 620 routine fire inspections.
- Conducted 1,492 vegetation management inspections.
- Created City's Community Fire Protection Plan to enhance wildfire preparedness and mitigation programs.
- Coordinated installation of a new AlertCalifornia Wildfire Detection Camera unit for the Live Oak Canyon area.
- Established agreement with CAL FIRE to bolster wildfire fuels management program.
- Hosted inaugural Business Emergency Resilience Training (BERT) workshops on topics including wildfire preparedness, fire protection system & utility safety, as well as disaster resiliency.
- Attended professional development opportunities hosted by regional Fire Prevention Officer Associations and at the National Fire Academy.

Goals for Fiscal Years 2027-2028:

- Establish an online construction permit application and intake portal to improve customer experience for contractors and community members.
- Prepare and deliver proactive community risk reduction initiatives to help reduce identified risks for the business and residential communities.
- Support Firewise and similar community-led safety designations to maximize return on investment strategies.
- Maintain and expand intergovernmental and public sector safety partnerships with stakeholders including Southern California Edison, California Department of Transportation, Redlands Conservancy, Union Pacific Railroad, and regional Water Districts.
- Revise the routine fire inspection and operational permitting program to align with industry standards based on life, property, and environmental risks assessments reflected in NFPA 1730.
- Maintain and expand Community Risk Reduction staff specialized certifications for their positions from California State Fire Marshal, International Code Council, and related recognized professional organizations. Ensure all certifications remain current with the Continuing Education requirements.

Redlands Fire Department
Training Program

Program Description:

This division operates under the direction of the Deputy Chief and consists of one Shift Battalion Chief and is supported by three Shift Captains. This team is responsible for all aspects of developing, implementing, and documenting training strategies and exercises while meeting local, state, and federal requirements. This Division provides training and proficiency drills in various areas such as fire suppression, emergency medical care, infection control, hazardous materials response, technical rescue, water rescue operations, and wildland-urban interface fire suppression. The Training Division is also responsible for identifying individual and department level training needs to ensure we meet the challenges and needs of the community we serve.

The Training Division manages the following programs:

- *California Firefighter Joint Apprenticeship Program:* An apprenticeship program which parallels the State Board of Fire Service and the National Fire Protection Association Standards (California Firefighter Joint Apprenticeship Committee – CAL-JAC).
- *Engineer/Captain Certification:* Engineer and Captain Certification programs provide an in house, on-duty approach to developing personnel in the skills and experience necessary to become an Engineer and Captain.
- *Recruit Firefighter Testing Program:* Development, implementation, and delivery of entry level tests.
- *Crafton Hills College Reimbursement Program ISA:* Registration of fire department personnel, tracking and documentation of approved training hours, and participation in annual site visits by program administrator.
- *SBCTOA:* Maintain participation in the San Bernardino County Training Officers Association (SBCTOA). Ensuring that departmental training is collaborative and interoperable within our area of operation and response.

Program Objectives:

- Administer and ensure all minimum mandated training is provided for all members of the Fire Department.
- Ensure that each Company/Individual completes an average of 20 hours training per person per month.
- Compile and maintain training records for all field operational personnel.
- Conduct regularly scheduled performance standard drills to enhance individual skills. This includes Fire Company functions and multi-company coordination for emergency application, including technical training, team training, officer training programs, and specialized equipment training.
- Schedule and conduct mandated Hazardous Materials First Responder training.
- Schedule and conduct mandated Wildland Fire Training.
- Submit Monthly CFFJAC (California Fire Fighter Joint Apprenticeship Committee) reports.
- Submit semester training hours, training documentation, department student rosters, and coordinate site visits with Crafton Hills Community College.
- Conduct Pre-Fire Planning and Industrial Facility Tours for personnel.
- Conduct single and multi-company training with Fire Departments throughout the region.
- Ensure succession training needs are met for all positions within the department.
- Schedule additional training as mandated by federal and state requirements.
- Coordinate recruitment and promotional manipulative examinations.

- Manage training materials at Fire Stations (i.e., training manuals, new textbooks & videos, accident/investigation reports from Firefighter injury or Fatality incidents, etc.)

Accomplishments for Fiscal Years 2025-2026:

- 19,031 Total Training Hours: Achieved full compliance with State and Federal mandates through the delivery of 19,031 total training hours. This represents a significant commitment to professional development, with personnel averaging 317 training hours during 2025.
- Infection Control Training: Executed specialized training in infection control, bloodborne pathogens, and disease prevention. This proactive approach underscores the Department's commitment to mitigating occupational health risks and ensuring personnel safety.
- Firefighter Rescue & Survival: Conducted comprehensive, multi-company drills focused on high-stakes rescue operations. Training emphasized Rapid Intervention Crew (RIC) proficiency and the strategic command of Mayday events, utilizing the K-Mart facility and Crafton Hills College for realistic operational environments.
- Confined Space Rescue Awareness: Delivered departmental training on confined space operations, emphasizing OSHA regulatory compliance and technical rescue competencies. The curriculum focused on critical incident command roles necessary for managing these high-risk scenarios.
- Technical Rope Rescue: Integrated specialized rope rescue training with the deployment of new technical equipment. These sessions focused on maintaining the manipulative skills required for high-risk, low-frequency rescue operations.
- Wildland Firefighter Training: Completed wildland fire training in accordance with CICCS requirements. To address the complexities of wildland interface operations, training was conducted through a collaborative framework involving Cal Fire, Crafton Hills College, and the SBCTOA.
- Tractor Drawn Aerial (TDA): Continued training on the TDA to enhance skillsets, with the new curriculum now fully integrated into the annual training cycle.
- Officer Certification & Succession Planning: Continued to enhance the Engineer and Captain Candidate Certification programs to provide structured, on-duty professional development. These initiatives create a sustainable internal succession path, preparing personnel for future leadership roles within the Department.
- Promotional Examinations: Prepared and administered promotional exams. The process utilizes industry-validated benchmarks to identify and rank candidates, ensuring the Department's leadership tier remains high-performing and mission-ready.
- Regional Collaboration & External Testing: Strengthened regional partnerships by deploying Battalion Chiefs, Captains, and Engineers to serve as proctors for neighboring agencies' promotional exams. These efforts facilitate inter-agency networking and the exchange of critical operational intelligence.

Training Courses Attended for Fiscal Years 2025-2026:

- Rio Hondo Regional Truck Academy: Completed a rigorous, two-week residency specializing in advanced truck company operations. The curriculum provided mastery in high-stakes disciplines, including Rapid Intervention Crew (RIC) tactics, firefighter survival, and complex high-rise fire operations.
- Advanced Swiftwater Rescue: Facilitated participation in a 40-hour technical rescue program in Northern California. This intensive course utilized high-velocity waterways and lifelike scenarios to develop advanced proficiency in hydraulic rescue strategies and specialized equipment deployment.
- State Fire Instructor Certification: Continued to meet CSFM requirements for personnel to become certified State Fire Instructors. This investment establishes a sustainable internal framework to validate departmental training against state-recognized benchmarks.

- Peer Support & Behavioral Health: Enhanced the Department's Peer Support cadre through advanced clinical coursework. These sessions prepared members to provide critical intervention and support for personnel navigating occupational mental health challenges and trauma.
- Fire Arson & Origin/Cause Investigation: Continued CSFM-aligned investigator certification pathways. Training emphasized scientific methodologies for origin and cause determination, fostering improved forensic collaboration with the Redlands Police Department (RPD).
- Advanced Auto Extrication Practicum: Completed a specialized three-day intensive course in Corona focused on complex vehicle stabilization. Personnel gained technical mastery in utilizing hydraulic systems to manage multi-vehicle collisions and unconventional extrication scenarios, significantly enhancing field operational capabilities.

Training Goals for Fiscal Year 2027-2028:

- Professional Development & Operational Readiness: Prioritize personnel attendance in advanced training programs that align with departmental objectives. This strategic focus ensures continuous enhancement of emergency response capabilities, career progression, and the cultivation of a robust instructor cadre.
- Strategic Succession Planning: Continue the systematic development of personnel for leadership advancement. A primary objective is the implementation of a Professional Development Guide, designed to provide members with a clear roadmap for career aspirations while ensuring the Department maintains elite service delivery through proactive preparation.
- Fiscal Optimization & Reimbursement: Sustain active participation in training reimbursement frameworks, including the Instructional Service Agreement (ISA) with Crafton Hills College and Cal-JAC. These programs are essential for capturing external revenue, effectively offsetting training expenditures for both the City and the Department.
- Internal Instructional Capacity: Advance the initiative to meet CSFM State Fire Instructor requirements for department personnel. Internalizing this certification capability will allow the Department to issue state-recognized credentials locally, significantly reducing long-term training costs and providing a formal mechanism for curriculum validation.
- Integrated Tactical Response: Maintain and expand strategic partnerships with the Redlands Police Department (RPD) and Redlands Unified School District (RUSD) for unified active shooter and hostile event training. These joint exercises are critical for synchronizing inter-agency roles and ensuring a cohesive response to high-threat incidents.
- Regional Interoperability: Preserve strong engagement with neighboring fire agencies through consistent regional training. This commitment ensures seamless technical interoperability and a unified command structure during large-scale mutual aid responses.
- Strategic Facility Partnerships: Formalize an agreement with Crafton Hills College (CHC) for the utilization of their training tower. While the Department pursues a long-term municipal solution, this partnership provides an immediate, mutually beneficial environment for essential manipulative skills training.
- Fire Training Facility Development: Initiate foundational research and master planning for a dedicated Redlands Fire Department Training Facility. Establishing a permanent site is a critical requirement for meeting National and State training mandates, including Live Fire operations—that currently cannot be accommodated within the city's existing infrastructure.

Fire
Emergency Preparedness

Program Description:

The Emergency Management and Preparedness Program is overseen by the Administrative Battalion Chief and Emergency Operations Coordinator. The program has the task of planning and preparing all City departments, residents, and businesses for man-made and natural emergencies. The Emergency Operations division utilizes planning, training, and exercises to continually develop and sustain the City's mitigation, preparedness, response, and recovery capabilities. These capabilities minimize the loss of life and property and protect the environment from emergencies and significant disruptions. The Emergency Operations Division works with the city departments, other local municipalities, and an array of community-based organizations to ensure that the city and its residents have the resources and information they need to prepare, respond and recover from emergencies, disasters, and significant events.

Program Objectives:

- Update and maintain the City's Emergency Operations Plan and Local Hazard Mitigation Plan, Continual maintenance of the plan is required for the City to receive grant funding opportunities, as well as disaster recovery monies after an emergency, from the State of California and the Federal Government.
- Develop and coordinate with the American Red Cross, Redlands Unified School District, and the County of San Bernardino Office of Emergency Services on the mass care and sheltering needs of the city, as well as evacuation processes of the citizens within the city and their animals. The sheltering and evacuation needs will include the Access and Functional Needs community.
- Maintain and operate a viable Emergency Operations Center to ensure the readiness of the city.
- Coordinate with appropriate federal, state, and other local agencies, as well as applicable segments of private sector entities and volunteer agencies.
- Provide maintenance, updates to the system, and community outreach on the City's Emergency Notification System.
- Coordinate with local, county, and state agencies and organizations through mutual aid and mitigation agreements for disaster training.
- Standardized Emergency Management Systems (SEMS) and the National Incident Management System (NIMS).
- Develop NIMS compliance training program for all City employees.
- Develop an exercise program to include Tabletop, functional and full-scale training for all EOC responders.
- Develop and implement a community outreach program to include CERT, BERTT, Teen CERT, and citizen corps.
- Develop a communication partnership with the Redlands Emergency Communication Group to assist with mass care and shelter needs.
- Develop a partnership with the Faith-Based Community for donation management needs.

Accomplishments for Calendar Year 2025 and 2026:

- Upgraded EOC with Activu visibility software and large monitors.
- Completed Emergency Operations training with city staff through JGA.
- Purchased new disaster supplies including Starlink Satellite Internet Systems, five community water filtration systems, and two 106 gallon portable fuel tanks.
    - 4 Disaster Council Meetings.
- Upgraded training and incident response trailers.
- Taught 3 CERT Classes
    - 2 English Classes
    - 1st Spanish Class.
- Prepared CERT volunteers
    - Continued with training every other month.
    - Issued Medical bags for them to be ready to deploy.
- Provided Emergency Management Support to the following Incidents:
    - Worked with GIS to monitor the 4th of July reporting.
    - Continued to train the Evacuation Coordinators.
    - Maintain continuity of operations.
    - Exercises with other city agencies; 2 tabletops.
- Continue to participate in events throughout the city to promote:
    - New Alert system
    - Disaster preparedness
    - CERT Classes
    - 15 events total in the City.
- Managed the Emergency Management Program Grant
    - $22,159 FY2025
- Working on upgrading plans
    - Working on updated EOP with anticipated completion of 10/26.
    - Added both an airport and animal shelter annex for the EOP

Fire
Emergency Medical Services

Program Description:

Overseen by the Administrative Battalion Chief and consists of an Emergency Medical Service Coordinator. The EMS Coordinator ensures compliance with federal, state, and county procedures and protocol as well as keeps pace with increased demands for service.

This program is responsible for ensuring the delivery of high-level advanced life support pre-hospital care by well-trained personnel, as well as meeting the education and delivery standards required by the State of California to ensure this level of service. The highly trained Paramedics functions as an extension of the emergency room doctor and with his/her regulatory control can administer the necessary medical treatment to stabilize the patient before transport to the hospital. Paramedics presently respond from all fire stations.

This program includes a QA/QI program which is required and monitored by Inland Counties Emergency Medical Agency (ICEMA). The QA/QI program is overseen by the EMS Coordinator and provides oversight to training and certification as well as protocol implementation for both EMTs and Paramedics.

Emergency Medical Services division operates and manages the following programs:

- Emergency Medical Technician (EMT Program)

The certification of Emergency Medical Technician is considered the basic level of prehospital emergency care in the modern-day Fire/Emergency Medical Service. This level of certification is the minimum standard for all Redlands Fire Department Suppression personnel. The responsibilities and scope of practice for the EMT are outlined in Title 22, Division 9 of the California Code of Regulations, which includes the following:

- Evaluate the ill and injured
- Render basic life support, rescue, and emergency care to patients
- Obtain diagnostic signs to include, but not be limited to, temperature, blood pressure, pulse, and respiration rates, pulse oximetry, level of consciousness, and pupil status
- Perform cardiopulmonary resuscitation (CPR), including the use of mechanical adjuncts to basic cardiopulmonary resuscitation
- Administer oxygen
- Use the following adjunctive airway and breathing aids:
  - Oropharyngeal airway
  - Nasopharyngeal airway
  - Suction devices
  - Basic oxygen delivery devices for supplemental oxygen therapy including, but not limited to, humidifiers, partial rebreathers, venture masks, and manual and mechanical ventilating devices designed for prehospital use including continuous positive airway pressure

- Use various types of stretchers and spinal immobilization devices
- Provide initial prehospital emergency care of trauma, including, but not limited to:
  - Bleeding control through the application of tourniquets
  - Use of hemostatic dressings
  - Spinal immobilization
  - Seated spinal immobilization
  - Extremity splinting
  - Traction splinting
- Administer over the counter medication when approved by the medical director of the LEMSA, including, but not limited to:
  - Oral glucose or sugar solutions
  - Aspirin
- Extricate entrapped persons
- Perform field triage
- Mechanical patient restraint
- Set up for Advance Life Support (ALS) procedures, under the direction of a Paramedic
- Perform automated external defibrillation
- Assist patients with the administration of physician-prescribed devices including, but not limited to patient-operated medication pumps, sublingual nitroglycerine, and self-administered emergency medications including epinephrine devices

- Paramedic Program:

The Redlands Fire Department deploys at least one Paramedic on every emergency response vehicle, who is the primary patient caregiver on all emergency medical responses within the city. The Paramedic's scope of practice includes basic and advanced skills focused on the acute management and transportation of patients. This also includes invasive and pharmacological interventions to reduce the morbidity and mortality associated with acute out-of-hospital medical and traumatic emergencies.

Under Title 22, Division 9 of the California Code of Regulations, the following are the minimum psychomotor skills of the Paramedic (including all skills within the EMT level):

- Utilize electrocardiographic devices and monitor electrocardiograms, including 12-lead electrocardiograms (ECG)
- Perform defibrillation, synchronized cardioversion, and external cardiac pacing
- Visualize the airway by use of the manual or video laryngoscope and remove the foreign body with Magill forceps
- Perform pulmonary ventilation by use of lower airway multi-lumen adjuncts, the esophageal airway, perilaryngeal airways, stomal intubation, and adult oral endotracheal intubation
- Utilize mechanical ventilation devices for continuous positive airway pressure (CPAP)/bi-level positive airway pressure (BPAP) and positive end-expiratory pressure (PEEP) in the spontaneously breathing patient
- Use airway adjuncts to assist in maintaining adequate ventilation with the use of capnography devices, intrathoracic threshold devices, and HEPA-filters
- Institute intravenous (IV) catheters, saline locks, needles, or other cannula (IV lines), in peripheral veins and monitor and administer medications through pre-existing vascular access
- Institute interosseous (IO) needles or catheters
- Administer IV or IO glucose solutions or isotonic balanced salt solutions, including Ringer's lactate solution
- Obtain venous blood samples

- Use laboratory devices, including point of care testing, for pre-hospital screening, used to measure lab values including, but not limited to, glucose, capnometry, capnography, and carbon monoxide when appropriate authorization is obtained from State and Federal agencies, including from the Centers for Medicare and Medicaid Services according to the Clinical Laboratory Improvement Amendments (CLIA)
- Utilize Valsalva maneuver
- Perform percutaneous needle cricothyroidotomy
- Perform needle thoracotomy
- Perform nasogastric and orogastric tube insertion and suction
- Monitor thoracotomy tubes
- Monitor and adjust IV solutions containing potassium, equal to or less than 40 mEq/L
- Administer approved medications by the following routes: IV, IO, intramuscular, subcutaneous, inhalation, transcutaneous, rectal, sublingual, endotracheal, intranasal, oral, or topical
- Administer, using prepackaged products when available, the following medications:
  - 10% dextrose, adenosine, aerosolized or nebulized beta-2 specific bronchodilators, aspirin, atropine sulfate, calcium chloride, diphenhydramine hydrochloride, epinephrine, fentanyl, glucagon, ipratropium bromide, ketamine, lidocaine hydrochloride, magnesium sulfate, midazolam, naloxone hydrochloride, nitroglycerine preparations, ondansetron, tranexamic acid, and sodium bicarbonate.

RFD Paramedics are held to a higher standard in terms of minimum certifications/qualifications. In addition to the state and local mandates for recertification, RFD requires all Paramedics to maintain a valid Handtevy Pediatric certification card. Once the minimum standards are met, the Emergency Medical Services Authority will issue a valid license, at the state level. In addition to state licensure, Paramedics must also hold a valid license under the Local Emergency Medical Services Authority (LEMSA). The LEMSA for the RFD is the Inland Counties Emergency Medical Agency (ICEMA), located in San Bernardino.

- Advanced Cardiac Life Support (ACLS) Recertification Program*:*

The Inland Counties Emergency Medical Agency (ICEMA), which is the Local Emergency Medical Services Authority (LEMSA), mandates that all Paramedics within its region maintain a valid Advanced Cardiac Life Support (ACLS) certification. The American Heart Association is the organization that prints the curriculum and conducts the research and development to ensure Paramedics are providing the most up-to-date care about cardiac events. An ACLS certification is valid for two years. ACLS certification requires:

- Basic life support skills, including effective chest compressions, use of a bag-mask device, and use of an AED
- Recognition and early management of respiratory and cardiac arrest
- Recognition and early management of peri-arrest conditions such as symptomatic bradycardia
- Airway management
- Related pharmacology
- Management of ACS and stroke
- Effective communication as a member and leader of a resuscitation team.

RFD currently has seven (7) certified ACLS instructors to provide this mandated training. This training requires the use of skills mannequins, airway training tools, EKG rhythm generators, and current edition instructor manuals with DVD instruction. RFD currently offers a minimum of six (6) recertification classes every two years, to cover all current RFD Paramedics.

- Handtevy Pediatric Recertification Program:

The Handtevy Pediatric certification is a course created by Dr. Antevy. Although possession of this certification is not a state or local mandate, to maintain Paramedic licensure, the Redlands Fire Department requires all Paramedics to maintain this certification as a commitment to excellence. The RFD recognizes that pediatric medical emergencies present different and complex challenges in the management of prehospital care. Handtevy certification requires:

  - High-quality Child CPR AED and Infant CPR
  - Recognition of patients who do and do not require immediate intervention
  - Recognition of cardiopulmonary arrest early and application of CPR within 10 seconds
  - Apply team dynamics
  - Differentiation between respiratory distress and failure
  - Early interventions for respiratory distress and failure
  - Differentiation between compensated and decompensated (hypotensive) shock
  - Early interventions for the treatment of shock
  - Differentiation between unstable and stable patients with arrhythmias
  - Clinical characteristics of instability in patients with arrhythmias
  - Post–cardiac arrest management

This certification is valid for two years. RFD currently has seven (7) certified Handtevy instructors to provide this training. This training requires the use of pediatric/child skills mannequins, pediatric/child airway training tools, EKG rhythm generators, and current edition instructor manuals with DVD instruction. RFD currently offers a minimum of six (6) recertification classes every two years, to cover all current RFD Paramedics.

- Event Medic: Provides public safety and event medics to large events within the city. The medics provide Advanced Life Support EMS care to citizens and participants at events including the Redlands Bicycle Classic, Hangar 24 Air Show, Believe Walk, and A Run through Redlands (ICEMA).

- Cardiopulmonary Resuscitation-Internal Program: Each employee is required to maintain CPR certification, allowing CPR training to be taught in-house (AHA).

- Infectious Control: Responsible for the administration of the Infection Prevention and Control Program, which includes the identification, investigation, reporting, prevention, and control of nosocomial infections for personnel. Responsible for coordinating in-service programs related to infection prevention and control. The program is mandated by the Ryan White Act (CFR, Cal-OSHA, CDC, OSHA 1910, 130).

- Emergency Medical Services Quality Improvement Program: The quality improvement program maintains the regulatory requirement of quality assurance/improvement for all personnel who perform emergency medical care to the sick and injured. The program is closely monitored as required by the Inland Counties Emergency Medical Services Agency, State Emergency Medical Authority, and California Code of Regulations, Title 22 (EMSA, ICEMA).

- ePCR: Management of the continued education of updates of the ICEMA mandated Electronic Patient Care Record System (ICEMA) RFD personnel are heavily involved in the ePCR working group and assist in updates, maintenance, and training of the program.

- Vaccination Administration Program: The Redlands Fire Department recently received local optional scope vaccination program approval through ICEMA to support EMT and EMT-P COVID-19 Intramuscular vaccination efforts in collaboration with the Redlands Community Hospital.

Program Objectives:

- Promote the highest standards of rapid response, patient evaluation, and emergency care possible.
- Provide ongoing training, recertification, and paramedic licensure oversight to ensure uninterrupted program delivery.
- Function as liaison for the City with County and State health care agencies.
- Provide strategic and tactical judgments regarding Citywide EMS resource coordination and delivery.
- Monitor and coordinate Safety Employee Bloodborne Pathogen/Exposure/Infection Control program. Operations Fire Captain Rob Sandberg and Engineer Brad Byers serve as Infection Control Officers as Ancillary Duties to assist the EMS Coordinator.
- Continue to conduct, monitor, and evaluate emergency medical technician training and operations as set forth by policy, procedure, and mandated protocol.
- Provide staff recommendations concerning EMS and related incident management functions.
- Coordinate City EMS functions with Department Medical Director.
- Evaluate, monitor, and coordinate the Fire Department Paramedic program.
- Complete T/B mask fitting for personnel per OSHA regulations.
- Maintain OSHA vaccination records and provide access to obtain titers and vaccinations as needed or requested.
- Continue to monitor and evaluate Citywide Automatic External Defibrillator Program.
- Administer, monitor, and oversee Paramedic Quality Improvement Program.
- Coordinate specific medical training with local ambulance providers.
- Continue to provide advanced life support to the community in the most feasible economical way.
- Continue to provide input at the County level with regional changes affecting EMS.
- Continue to advance medical equipment to maintain optimal functionality to provide the best and most efficient care to our communities.
- Continue to monitor the UCapIt vending machines at all fire stations for restocking purposes to improve inventory tracking and decrease unnecessary budgetary replacement costs.
- Continue to monitor the PS Trax controlled substance tracking software to improve the system in line with DEA requirements.
- Continue to advance training equipment and programs to align with current AHA and resuscitation academy recommendations for feedback and simulation devices to simulate real-life training scenarios.
- Continue to align with the RUSD to provide Stop the Bleed Training to all RUSD staff and students (post-COVID).

Significant Program Changes:

- The EMS Coordinator has conducted post-incident quality assurance review and training for paramedic and emergency medical technician personnel. The QA/QI program has identified residents who are frequent users of our emergency medical services and now assist them in accessing resources specific to their needs and condition. This lowers the demand for emergency services and keeps resources available for more pressing emergencies. Implementation of electronic patient care record-keeping systems in coordination with Inland Counties Emergency Medical Agency is continuing. Through CONFIRE, the Fire Department is now a party to an agreement with the Inland Counties Emergency Medical Agency and San Bernardino County Information Services Department that allows for more efficient centralization of response records.
- In-house paramedics have been certified to instruct both Advanced Cardiac Life Support and Pediatric Life Support to Paramedics, saving the City money.
- The Event Medic program has expanded to include Fireline Paramedics and EMTs who serve our community as well as other communities when called upon in time of disaster or fire.
- Continue to improve the City's infectious disease control plan to include specific procedures in the event of an outbreak in our city.

Accomplishments for Fiscal Years 2025-2026:

- The department has moved closer to becoming a certified Heart safe Community by adding public access AED's located in three city parks.
- The department added a Substance Use Navigator position paid for through Opioid Settlement funds.
- The Redlands Fire Department continues to rank well above the national average with its ROSC (return of spontaneous circulation) rates for CPR patients.
- Continued implementation of robust QI/QA program monitoring all cardiac arrests (to include CARES registry/Utstein parameters), strokes, STEMIs, TXA administrations, Narcan administrations, advanced procedures/medications, AMAs, controlled substance administrations, aspirin not administered in cardiac cases, epinephrine administrations, intubations, and capnography utilizations, pediatric incidents, trauma incidents, submersion incidents, incidents with low (less than 100%) validity.
- Advancement of the High-performance CPR program with the addition of the ZOLL impedance threshold device.
- Monitoring and re-training of Handtevy program. Trained seven (7) personnel in Handtevy Instructor course for updated pediatric advanced training for the department.
- Re-education of PS Trax software for controlled substance tracking.
- Movement of backup (line-medic) gear for inventory and budget tracking.
- Update Exposure Control Plan and Exposure Packets.
- Update Infectious Disease Plan and Protocols.
- Updated ACLS instructor training.
- Updated AHA and Handtevy training material and equipment.
- Continued implementation of EMS training program with outside, peer, and EMS Coordinator instruction.
- Continued implementation of Firefighter Rehab program overseen by EMS Coordinator – procurement of rehab equipment, nutrition, and hydration.
- Development of paramedic equipment replacement program (for outdated, damaged equipment)
- Continued monitoring of waste disposal program.

- Assist in the implementation of the Emergency Community Nurse System at the dispatch center.
- Development and implementation of the Naloxone Leave Behind Program.
- Participation in the statewide Pediatric Emergency Care Coordination Program.
- Implementation and submission for AHA: Mission Lifeline Recognition.
- Development and implementation of new hire and probational program.
- Submission of personnel recognition through Handtevy Challenge Coins and EMSA EMS Awards.

Fire
Household Hazardous Waste

Program Description:

The Household Hazardous Waste Program, administered by the San Bernardino County Fire Protection District under contract with the City, provides for the safe and proper disposal of hazardous materials that might otherwise enter landfills or wastewater treatment systems. The program is staffed by trained personnel equipped to evaluate, accept, document, and facilitate the recycling or disposal of household hazardous waste in compliance with applicable regulations. Through this program, the City continues its commitment to environmental stewardship by ensuring hazardous substances and electronic waste are managed responsibly. The San Bernardino County Fire Protection District also oversees the operation and maintenance of the facility. In 2025, the program served approximately 4,471 participants, demonstrating its continued effectiveness and community value.

The San Bernardino County Fire Protection District operates and manages the following programs:

- *E-Waste Recycling:* This program runs in conjunction with the Household Hazardous Waste Program and is operated by the SBCFPD.
- *Household Hazardous Waste Disposal Program:* Redlands was the first city within San Bernardino County to begin offering this service and has been operating for approximately thirty years in conjunction with San Bernardino County. Funds collected through this program pay for disposal, training, and operational needs within the department as it relates to hazardous materials (SARA, OSHA, RCRCA, TSCA, DOT, California Health and Safety Code). As of March 2020, the City ceded the program to SBCFPD by way of an amendment to the original contract set to expire June 30, 2027. SBCFPD now operates the Redlands HHW location on behalf of the City.

Program Objectives:

- Continue operation and maintenance of the Household Hazardous Waste Collection site each Saturday, from 9:00 a.m. to 2:00 p.m., for the citizens of Redlands
- Continue the safe collection, categorization, lab packaging, and storage of household hazardous waste collection for proper disposal
- Continue to collaborate with San Bernardino County Household Hazardous Waste to provide outreach and public education regarding the proper disposal of hazardous materials used in the home
- Seek State and/or Federal grants to help fund programs
- Continue site inventory control and monitoring
- Coordination of inter-agency waste disposal programs
- Maintain State and County mandated certification and program elements

Accomplishments for Calendar Year 2025:

- Approximately 4,471 countywide residents used the program in 2025 including 3,592 Redlands residents.
- Collection and proper disposal of 219,912 (pounds) of Household Hazardous Waste including used motor oil and oil products.
- Collected 59,376.24 pounds of electronic waste.
- Collection and disposal of:
    - 43,542.58 lbs. of Latex Paint
    - 20,231.90 lbs. of Oil Base Paints
    - 11,875.25 lbs. of Flammable Liquids/ Solids
    - 2,858.86 lbs. of Bulked Flammable Liquids
    - 3,298.68 lbs. of Poison
    - 1,539.38 lbs. of Corrosive Acids
    - 439.82 lbs. of Corrosive bases
    - 879.65 lbs. of Oxidizers
    - 2,638.94 lbs. of Aerosols
    - 1,495.40 lbs. of Home Generated Sharps
    - 4,838.06 lbs. of Antifreeze
    - 6,245.50 lbs. of Lead/ Acid Batteries
    - 4,618.15 lbs. of Household Batteries
    - 1,759.30 lbs. of NiCad Batteries
    - 14,382.24 lbs. of Motor Oil/ Oil products
    - 769.69 lbs. of Oil Filters
    - 21,331.49 lbs. of Covered Electronic Waste
    - 59,376.24 lbs. of Electronic Devices
    - 1,979.21 lbs. of Fluorescent Tubes
    - 879.65 lbs. of Compressed Gas Cylinders
    - 2,199.12 lbs. of Cooking Oil
    - 3,078.77 lbs. of Pharmaceuticals
    - 5,717.71 lbs. of Waste Exchanged Materials
    - 3,936.42 lbs. of other Hazardous Materials

A. K. Smiley Public Library

Mission Statement:

The mission of the A. K. Smiley Public Library is to inspire lifelong learning by providing free and open access to information, thereby enhancing the community of Redlands. We accomplish this mission by providing access to:

- Current and classic books, periodicals, and audiovisual material for circulation to adults, teens, and children
- E-books, audiobooks, films, and electronic reference databases
- A diverse range of informational, educational and entertainment programming including in our Assembly Room and Contemporary Club facility
- Free usage of computers and high-speed Internet
- The Lincoln Memorial Shrine, a museum/library dedicated to Abraham Lincoln and the American Civil War
- The Museum of Redlands, which in the Fall of 2026 will open as a museum dedicated to preserving the history and culture of our community
- The Adult Literacy Program, which assists those who seek to improve their reading, writing and conversational skills
- Smiley Heritage Tours, which provides cultural bus tours of Redlands to all fourth graders in the Redlands Unified School District area

Current Projects:

- Designing and installing exhibits at the Museum of Redlands towards the goal of opening the facility in the fall of 2026 (City Strategic Plan CSP priority A and C)
- Expanding our programming, building on the success of such events as Smiley LIVE! Library Days, Family Day and our Dia de los Muertos celebration (CSP priority A and C)
- Evaluating future library space needs as directed in the five-year library strategic plan adopted by the Library Board of Trustees (CSP priority A and C)
- Addressing several major infrastructure and accessibility issues at both the Library and the Contemporary Club (CSP priority A and C)
- Collaborating with the Watchorn Lincoln Memorial Association on commemorating the semiquincentennial of the Declaration of Independence

Major Completed Projects:

- Collaborated with FCS on installation of a new elevator and fire suppression door in the library's lower level utilizing a California State Library grant (CSP priority C)
- Collaborated with the Redlands Historical Museum Association to transfer the completed Museum of Redlands building to the City to be administered by the Library
- Collaborated with the First Baptist Church to develop a new partnership to hold adult literacy meetings and events at their facility (CSP priority A and C)

AK Smiley Public Library – Special Collections Division

Mission Statement:

As a research center and museum exhibition program, the Special Collections Division seeks to deepen the understanding of the history of Redlands, San Bernardino County, and Southern California, as well as President Abraham Lincoln and the American Civil War, through education, interaction, exhibition, and research.

Programs:

The Special Collections Division includes three major programs:

- The Heritage Room research center
- The Lincoln Memorial Shrine
- Museum of Redlands

Current Projects:

- Exhibitions and Programs – Develop and present relevant exhibits that are engaging, offer new perspectives, and help achieve deeper understanding to inspire vibrant communities, especially with regard to Museum of Redlands and the Lincoln Memorial Shrine.
- Build the capacity to design, develop, staff, and fund appropriate educational programming to be the prime resource to the community for information on the history of the greater Redlands area and Southern California, Abraham Lincoln, the American Civil War, and enslavement of people of African origin and their descendants.
- Increase visibility and raise public awareness of Special Collections' programs, such as The Lincoln Memorial Shrine and Museum of Redlands, through marketing and communication, branding, visibility and recognition, partnering with Watchorn Lincoln Memorial Association and Redlands Historical Museum Association
- Ensuring responsible management of the collections through appropriate acquisitions, accessibility, and by review of the Collections Development Plan, to confirm it supports collections stewardship goals and revising the plan as needed

Major Completed Projects in 2025/26:

- Volunteer Docent Program - Created and implemented inaugural docent training program cohort for Museum of Redlands
- Consolidated object collections from three separate locations into a single storage facility at Museum of Redlands
- Completed Special Collections Institutional Plan 2025-2029
- Continued the "Southern California in Film" series
- Presented "Redlands History," a 6-week class for the public, conducted fall 2025 and spring 2026
- Recruited and trained new volunteers working with historical materials
- Welcomed 8,018 visitors to the Lincoln Memorial Shrine 7/1/2025-3/31/2026
- Served 409 research visits in the Heritage Room 7/1/2025-3/31/2026

Development Services Department

Mission Statement:

The Development Services Department provides quality service to customers through professionalism, integrity, and the efficient use of resources. The Department responds to the changing needs of the community by promoting and implementing policies, goals, procedures, and actions that address community issues related to the physical environment and to strengthen and diversify the economic base of the City. The Department endeavors to enhance and protect the urban and natural environment of the City of Redlands, ensuring that the City remains an ideal place to live and work.

The Development Services Department is responsible for the administration and oversight of the following divisions and functions:

- Building and Safety Division: Building inspections, plan review, and building permit processing
- Community Development Block Grant (CDBG) Program: Capital improvement project and public service agency sub-recipient awards administration
- Economic Development Division: Business attraction and retention, business assistance, workforce development, and tourism promotion
- Engineering: Review and inspection of development proposals for compliance with State and City codes, standards, and other governmental requirements relating to land subdivisions, grading, drainage, and improvements within the City rights-of-way
- Planning Division: Land development application review, general plan, specific plan and development code maintenance and updates, long range planning, and historic preservation

Departmental Goals:

- Provide for the short- and long-term physical development within the City consistent with the policies and goals established in the General Plan
- Provide professional, accurate, timely, and courteous service to the public
- Provide opportunities that will improve and preserve housing for all income levels
- Provide for managed development that will preserve, enhance, and maintain the special quality of life valued by this community
- Allow for development within the City of Redlands which occurs in a way that promotes the optimum social and economic well-being of the entire community
- Provide a high standard of technical expertise by department staff through regular training and awareness of new legislation, innovative construction techniques, and architectural/planning design techniques
- Provide continued review, update and implementation of the City's General Plan, Specific Plans and zoning ordinances in response to the changing needs of the community
- Monitor historic resources of the community and encourage their preservation

Performance Measures:

- All telephone calls received before noon to be returned the same day
- 90% of Plan Checks processed in 3 weeks for first review
- 90% of "LEED" Plan Checks processed in 4 weeks for second review
- 100% of Inspections completed next business day if requested by 4:00 pm of the previous day

Development Services Department
Economic Development Division

Program Description:

The Economic Development Division administers a variety of economic development programs and services that support businesses and residents in the City of Redlands. Division staff are actively involved in business attraction and retention activities, embracing and growing the relationship between the City and the Redlands Chamber of Commerce and the local business community, as well as participating in regional conferences and collaborating with other economic development agencies in California. Division staff are actively involved in business networking, marketing, workforce development, tourism, and project support.

Program Objectives:

- Implementation of the City Council-approved Strategic Plan Economic Development initiatives.
- Liaison to the business community of Redlands and the Redlands Chamber of Commerce relating to questions, concerns and suggestions about governmental affairs.
- Growth of collaborative partnerships with Redlands Chamber of Commerce, Redlands Visitor Center and other local entities to continue the promotion of tourism in Redlands.
- Support of new developments in Redlands by providing guidance and assistance through the development process.
- Establishment and administration of business retention and attraction programs.
- Development of strategic and effective marking campaigns for Redlands.
- Collaboration with other local, county and state economic development agencies to continue to promote the Inland Empire as a region.
- Attendance at national and regional trade shows to increase Redlands' visibility in the marketplace.
- Continue to enhance resource and business information pages on City's website.
- Identification and implementation of parking solutions for the Downtown Redlands area.
- Spearhead the development of funding applications through elected officials for City infrastructure projects supporting economic development.

Significant Program Changes for Fiscal Year 2026-27 and 2027-28:

- Development of an Economic Development Strategic Plan to identify development opportunities and challenges in Redlands.
- Development of a Business Outreach program to identify ways the City can better serve the business community.
- Expansion of the digital communication system with Downtown Redlands businesses for upcoming special events, announcements and significant developments via the City's email and text communication platforms.
- Adoption of the use of digital technology (Placer AI) to aid business attraction and retention efforts, as well as identify trends in the Redlands marketplace.
- Growth of leveraging of collaboration with economic development agencies like Team California to continue the promotion of Redlands.
- Coordination with other City departments to begin the exploration of a Wayfinding sign program to direct the public to attractions in the City.

Accomplishments for Fiscal Year 2024-25 and 2025-26:

- Implemented a digital communication system with Downtown Redlands businesses to bring awareness to special events, announcements and significant developments in the Downtown area that may impact their business.
- Completed a feasibility study to determine the viability and costs associated with the demolition of the existing Redlands City Hall site and replacement with a surface level parking lot and second level.
- Completed a feasibility study to determine the viability and costs associated with the demolition of the existing Redlands City Hall site and replacement with a multi-level parking structure with retail space on Citrus Avenue or Cajon Street.
- Negotiated a lease agreement with the property owner of the Redlands Mall to ensure public parking remains available while the Redlands Mall is demolished and site begins redevelopment.
- Negotiated an interim lease agreement with San Bernardino County Transportation Authority (SBCTA) for the use of a vacant lot between 7th & 9th street for a public parking lot, while concurrently negotiating potential acquisition of the property.
- Coordinated and collaborated with other City divisions and Southern California Edison on finding an energy solution for development projects in northwest Redlands.
- Signed a contract with Placer AI, a location intelligence company, to gain greater insight into the locations, brands and enterprises that are successful in Redlands.
- Led successful efforts in receiving funding through the Community Project Funding program through Congressman Aguilar's and Obernolte's offices for New Safety Hall and Texonia Park Modernization and Renovations projects.
- Represented Redlands at numerous economic development conferences including the International Council of Shopping Centers (ICSC), ICSC Western and the State of the County.
- Expansion of the relationship with Redlands Chamber of Commerce through spearheading partnership with their Leadership Redlands program and monthly presentations at the Chamber's Government Review Committee.
- Growth of the City's advertising efforts via Inland Empire Magazine, Audacy, and other digital avenues.

Development Services Department
Building and Safety Division

Program Description:

This program provides for the administration of California codes and City ordinances to safeguard life, health, property, and public welfare by regulating the design, construction, accessibility, quality of materials, flood protection, use, occupancy, location, and maintenance of all buildings and structures within the community of Redlands. This includes plan review of proposed buildings and structures, on-site inspections to assure compliance, complaint investigation and enforcement, disaster emergency response, maintenance, storage and retrieval of building records, and coordination with other government agencies.

Program Objectives:

- Maintain and promote excellent customer service standards at the One Stop Permit Center and in the field.
- Perform requested onsite building inspections in a timely and courteous manner.
- Perform final occupancy inspections on building projects, as required, to ensure compliance with conditions of approval and development code standards.
- Perform effective and efficient plan review within acceptable timeframes for compliance with the California Code of Regulations Title 24 parts 1 through 12, Federal Emergency Management Agency (FEMA) regulations, California Senate and Assembly bills, and locally adopted municipal codes.
- Provide staff support to the Development Review Committee, Minor Exception Permit Committee, Historic and Scenic Preservation Commission, Disaster Council, Fire Department, Code Enforcement, Municipal Utilities and Engineering Department, and local chapters of the International Code Council.
- Review and implement Assembly Bill 717 and Senate Bill 1608, to meet the continuing education and accessibility requirements that applies to the Building Division.
- Continue to upgrade department storage methods of building plans to comply with state laws by digitizing plans.
- Evaluate and investigate existing structures within the City for compliance with various municipal codes and state regulations.
- Prepare for disaster response by training and certification in emergency services.
- Maintain and improve accessibility throughout the City by employing a Certified Access Specialist (CASp).

Significant Program Changes for Fiscal Year 2026-27:

- Continue with the digital scanning of all paper records for properties within the City. This will reduce the printing costs of the department, reduce PRA department record response times, and allow public access to records for viewing by using a Laserfiche web link on the City website at all hours of the day.
- Launch the Online Public Portal for building trade permits with the ability to pay electronically.

Significant Program Changes for Fiscal Year 2027-28:

- Continue with the digital scanning of all paper records for properties within the City. This will reduce the printing costs of the department, reduce PRA department record response times, and allow public access to records for viewing by using a Laserfiche web link on the City website at all hours of the day.
- Rework Cityworks building permit case types and workflows to streamline and simplify processing of permits and backend fee calculations.
- Make available to the public the option to submit plans electronically for electronic plan review through Project Dox.

Accomplishments for Fiscal Year 2025-26:

- Issued over 2,981 permits for building, electrical, mechanical, plumbing, or combinations thereof ensuring compliance with current city-adopted building and municipal codes.
- Performed 1,877 plan reviews for construction permit submittals, with a 10 day average delivery to applicants.
- Performed 17,753 construction permit inspections by next business day after inspection request, improving community/department relations.
- Provided staff support for the improvement of City Works computer permitting software program.
- Provided community building activity reports to the county, state, and federal levels of government.
- Enforced the 2022 editions of the California Building Standards Codes, resulting in improved citywide construction safety and improved energy efficiency reducing CO2 emissions by 152,858 metric tons per year compared to the 2019 Energy Code, the equivalent of taking 32,051 gas cars off the road each year.
- Enforced the City's Local Agency Management Plan (LAMP) to review plans and field inspect the installation and abandonment of Onsite Wastewater Treatment Systems for properties within the City's jurisdiction.
- Updated the Municipal Code for the new FEMA Flood Insurance Rate Maps effective October 20, 2025.
- Updated the Municipal Code with the adoption of the 2025 California Building Code updates effective January 1, 2026.

Development Services Department
Land Use Engineering

Program Description:

Land Use Engineering is a division within the Development Services Department. This division is intended to work hand-in-hand with developers and staff in the Planning Division to achieve excellence in design and construction of development projects in the City.

Program Objectives:

- Manage One-Stop Permit Center for public records and information related to properties and development. The One-Stop Permit Center is designed to guide developers through multi-Departmental requirements, the Redlands Municipal Code, Measure U, and State regulations.
- Review of improvement plans, maps, and building permits.
- Process encroachment permits and street closures.
- Issue grading permits, truck route permits and wide load permits.
- Perform National Pollutant Discharge Elimination System (NPDES) investigations and plan reviews.
- Coordinate with Planning Division and other City Departments for entitlements, including conditional use permits, Planning Commission Review and Approval, lot line adjustments, and other land use activities.
- Work with Planning Division on initial planning phases needed for development of the University Village plan.
- Coordinate with Facilities and Community Services and outside consultants for annexations into Community Facilities District 2004-1.
- Prepare annual reports for Street Lighting District No. 1 and Landscape Maintenance District No. 1.
- Assess Development Impact Fees on development and redevelopment projects that are then used by other departments to mitigate the impact of those projects on the infrastructure of the City.
- Provide customer assistance regarding city policies and procedures related to land development issues, grading, street improvements, and utility connections.
- Perform plan reviews for building, grading, streets design, erosion control, water quality management, sewer, water, irrigation, street trees, storm drainage, storm water pollution prevention, street lights, hydrology, lot line adjustment, parcel map, and tract maps.
- Process applications for sewer and water service in the Mentone area as mandated by Measure ”U”.
- Create and maintain an organizational ethos amongst all OSPC staff that customer service is of the utmost importance. Respond to telephone, e-mail, and public counter inquiries for customer assistance at the One Stop Permit Center.
- Provide engineering related assistance to other City departments, such as the City Manager, City Attorney, Municipal Utilities & Engineering Department, and Code Enforcement Division.

Significant Program Changes for Fiscal Year 2026-27:

- Continued participation in the implementation of an Electronic Plan Review process across all divisions of the One-Stop Permit Center with the objective of creating an integrated, and simplified, method for intake, review, and return of all types of development plans submitted to the City for review.
- Transfer of operations to the new State Street City Hall facility.
- Assist developers with implementation of SB 9 lot splits for creation of additional housing opportunities

Significant Program Changes for Fiscal Year 2027-28:

- Finalize implementation of operational procedures for the new One Stop Permit Center at the new State Street City Hall facility.
- Assist University of Redlands with progress on their University Village development plans

Accomplishments for Fiscal Year 2025-26:

- Issued over 1000 encroachment permits for work within the public right-of-way.
- Prepared conditions of approval for all entitlement cases presented to the Planning Commission.
- Performed more than 175 engineering plan reviews.
- Assessed development impact fees in excess of $5M on new development projects.

Development Services Department
Planning Division

Program Description:

The Planning Division plays a key role in achieving the City's goals and objectives in terms of physical development and growth management. Three general categories of Planning activities include: Current Planning (development review); Long-Range Planning; and Historic Preservation. Current Planning functions include: processing of land development applications; responding to land use inquiries from residents, business owners, and development professionals; project management for special projects; administering contracts with consultants hired to perform environmental and planning services; and annexation requests. Long-Range Planning functions include: maintenance and updates of the General Plan, Housing Element, Climate Action Plan, various Specific Plans, and the zoning code (RMC Title 18); inter-agency coordination and strategic planning; and grant administration for State planning grants. Planning administers the City's historic preservation program including related permits and policy documents. Planning Division staff also regularly provide technical and professional support to the City Council, Planning Commission, Historic & Scenic Preservation Commission, Preliminary/Development Review Committee, and the Minor Exception Permit Committee.

Program Objectives:

- Respond to telephone, e-mail, and public counter inquiries for customer assistance at the One Stop Permit Center and the Planning Division office.
- Support business assistance and economic development activities including review of Business License applications, special event applications, commercial property searches, zoning research, etc.
- Accept, process, and prepare staff reports for land use applications and permits.
- Provide staff support to the Planning Commission and the Historic & Scenic Preservation Commission, in the form of agendas, legal advertising and notices, staff reports, presentations, and recording meeting minutes.
- Provide staff support to the Minor Exception Committee, in the form of agendas, legal advertising and notices, project reviews, and meeting minutes.
- Provide staff support to the Preliminary/Development Review Committee, in the form of agendas, project review, and conducting meetings.
- Process General Plan amendments, Zoning Map and Zoning Code amendments, and Specific Plan amendments.
- Prepare and submit an annual Housing Element Progress Report and General Plan Progress Report as required by the State of California.
- Maintain and expand the Historic Preservation program, including advising property owners, issuing permits, maintaining restoration/rehabilitation agreements (Mills Act Contracts) with private property owners, implementing the Historic Architectural Design Guidelines, and public outreach/information.
- Process annexation applications for surrounding unincorporated areas to accommodate proposed development projects.
- Process Pre-Annexation Agreement applications for developments in surrounding unincorporated areas to connect to City water and/or sewer services.
- Review final grading, building, and landscaping plans prior to issuance of building permits to ensure compliance with code requirements and any applicable conditions of approval.
- Perform final occupancy inspections on building projects as required to ensure compliance with conditions of approval and municipal code standards.

- Provide Planning-related assistance to other City departments, such as the City Manager, City Attorney, Municipal Utilties & Engineering Department, and Code Enforcement Division.
- Continue to evaluate Planning procedures for efficiency and effectiveness, and implement improvements or changes to department procedures and zoning code regulations.
- Seek and apply for State or regional grant funding in support of Planning work programs and activities.
- Coordinate Planning activities with other agencies, such as the County of San Bernardino, the San Bernardino County Transportation Authority (SBCTA), Southern California Association of Governments (SCAG), Caltrans, and Omnitrans.

Significant Program Changes for Fiscal Years 26-27 and 27-28:

- Facilitate redevelopment of the Redlands Mall site with a new mixed-use development project, in cooperation with the property's new ownership.
- Continue implementation of the adopted 2021-2029 Housing Element and completing the relevant remaining tasks contained in the work program.
- Administer new inclusionary housing program including in-lieu fees for affordable housing projects.
- Implement and provide pre-approved ADU Standard Plans to residents and property owners.
- Facilitate the long-term expansion of the Kaiser medical facility complex on California Street with new medical office building(s).
- Assist with implementation of policies and programs in the Climate Action Plan.
- Complete a citywide historical reconnaissance survey for the historical preservation program.

Accomplishments for Fiscal Years 24-25 and 25-26:

- Completed several significant work program items listed in the 2021-2029 Housing Element including:
  - Adopted Ordinance No. 2983 to complete the required rezoning actions to accommodate the Regional Housing Needs Allocation (RHNA).
  - Adopted Ordinance No. 2985 updating housing definitions, various housing regulaions in the Zoning Regulations (RMC Title 18), and adoped new development standards for Single-Room Occupancy homes as well as Agricultural Worker housing.
  - Adopted Ordinance No. 2959 creating an Inclusionary Housing program and new chapter in the Zoning Regulaitons (RMC Title 18).
  - Prepared draft ordinance to update Accesssory Dwelling Units (ADU) development standards.
  - Hired architectural consultant to prepare pre-approved ADU Standard Plans with four different architectural styles for use by residents and property owners (available to the public at no cost).
- Adopted Ordinance No. 2961 to permit agri-tourim land uses in the Agricultural (A-1) District and related development standards and performance criteria.
- Completed a comprehensive update to the adopted Climate Action Plan.
- Completed a comprehensive update to the City's Truck Route Map (per AB 98 requirements) contained in the 2035 General Plan's "Connected City" chapter.
- Preparation and noticing responsibilities for Planning Commission agendas, Historic & Scenic Preservation Commission agendas, Development Review Committee agendas, and Minor Exception Permit Committee agendas.
- Developer completed construction of the Liberty Lane Apartments project with 80 apartments affordable to lower-income housholds located at the southwest corner of Texas St. and Lugonia Ave.

- Prepare staff reports for matters scheduled before the City Council, Planning Commission, and Historic & Scenic Preservation Commission.
- Developer completing the build-out of the Bergamot Specific Plan (SP No. 64) with 434 new single-family homes plus a new 12-acre public park (now dedicated to the City) located to the north and west of Citrus Valley High School.
- Entitled the long-term expansion of the Kaiser medical center property on California Street.
- Entitled a new mixed use project in the downtown within the Transit Villages Specific Plan.
- New hotel under construction on West Colton Ave. near downtown Redlands (Tru Hotel by Hilton).
- Several applications currently under review for new retail, commercial, and shopping center developments.
- Prepared required annual progress reports for the 2035 General Plan as well as the Housing Element.
- Provided administrative oversight, including contract administration, for Surface Mining and Reclamation Act (SMARA) compliance for six quarries and two reclamation plants operated by CEMEX Materials and Robertson's Ready Mix in the Santa Ana River Wash.
- Participated in inter-agency coordination for regional Planning efforts, including those of the San Bernardino Council of Governments (SBCOG) and other studies by the San Bernardino County Transportation Authority (SBCTA), including seeking and receiving grant funds.

Development Services Department
Grants Program

Program Description:

The Grants Program within the Development Services Department consists of the administration of the City's Community Development Block Grant (CDBG) program as well as researching, applying, securing, and administering other county, state, or federal grant opportunities that benefit advance planning and community development needs.

As a Participating Jurisdiction (PJ) in the County of San Bernardino's Urban County Program, the City receives an annual award from the U.S. Department of Housing and Urban Development (HUD). The County of San Bernardino administers the award on behalf of the City and retains 20% of the annual award for administrative expenses.

CDBG Program Objectives:

- Development of a viable urban community by providing decent housing, suitable living environment, and expanded economic opportunity for City residents, particularly those earning low and moderate incomes.
- Aid in the prevention or elimination of slums or blight.
- Aid in activities designed to meet other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community where other financial resources are not available to meet such needs.

Other Grants Program Objectives:

- To secure funding opportunities that encourage and support advanced planning activities that help plan for future growth and development.

Significant Program Changes for Fiscal Year 2026-27 and 2027-28:

- Identify and fund new rehabilitation projects with CDBG funds that benefit low to moderate income residents with CDBG funds.
- Implement new public service programs that benefit low-to-moderate income residents with CDBG funds.
- Fund emergency generator projects at the designated cooling centers.

Accomplishments for Fiscal Year 2024-2026:

- Completed the Joslyn Senior Center Rehabilitation Project Phase I.
- Provided contract administration for the Joslyn Senior Center Rehabilitation Project Phase II.
- Provided contract administration to five CDBG funded public services programs that benefited low to moderate income residents.
- Provided contract administration for Flores Senior Center Rehabilitation Project.
- Provided contract administration for the ECBG HVAC replacement at the Joslyn Senior Center.

Development Services Department
Inclusionary Housing Program

Program Description:

The Inclusionary Housing Program, adopted by the City Council on December 19, 2023, is an integral part of the City's implementation programs contained in the 2021-2029 Housing Element. The Inclusionary Housing Program requires that a percentage of housing units in new residential developments be provided at an affordable cost to low- and moderate-income households, or an in-lieu fee be paid, in all new residential developments with ten (10) or more residential units.

The in-lieu fees collected under this program must be utilized for the provision of housing affordable to Very Low-income, Low-income, and Moderate-income households in the City, and administration and compliance monitoring of the Inclusionary Housing Program.

Inclusionary Housing Program Objectives:

- Promote the development of affordable housing throughout the City.
- Increase the supply of housing affordable to very low-, low- and moderate-income families through the assistance and cooperation of private residential developers.

Significant Program Changes for Fiscal Year 2026-27 and 2027-28:

- This was a new program and budget added for this fiscal year.
- Received In-Lieu revenue in the amount of $1.86 million in 2025-2026 for future projects.

Facilities and Community Services

Program Description:

The mission of the Facilities and Community Services Department is to promote and develop policies and practices that minimize impact to the environment, improve response experience to reports and service requests, provide quality service to city residents, businesses, and visitors, and improve the quality of life for present and future generations.

Program Objectives:

- Administration: Providing customer service and support to residents, businesses, and visitors of the city for requests for service and information.
- Animal Services: Overseeing animal welfare and services.
- Building Maintenance Division: Maintaining city facilities and projects.
- Citrus Groves and Preservation Division: Focusing on the preservation and management of the City's citrus groves.
- Code Enforcement Division: Ensuring compliance with state and local laws and codes.
- Downtown Division: Managing the City's Certified Farmers Markets and other downtown events, promoting tourism, and serving the downtown business community.
- Equipment Maintenance Division: Maintaining the city fleet, operating the natural gas fuel station, and maintenance of the Corporate Yard.
- Hillside Memorial Park: Management and operation of the city-owned cemetery.
- Parks Division: Maintaining parks, Landscape Maintenance Districts, and Community Facility Districts.
- Recreation and Senior Services Divisions: Managing Community and Senior Centers and their programs.
- Redlands Municipal Airport: Management and operation of the city-owned airport.
- State Street Building (Future City Hall): Management and operation of the new city hall facility.
- Street Tree Division: Providing tree trimming and emergency tree services.
- Street Maintenance and Electrical: Maintaining the city streets, street lighting and public right of way areas.
- Solid Waste and Landfill Division: Collection of residential and commercial green waste, refuse, recyclables, operating the California Street Landfill, and developmental and implementation of the city's recycling programs.

Accomplishments Fiscal Year 2024-2026:

- Issued 371 special events permits.
- Processed 2607 work orders.
- Completed 14 Capital Improvement Projects.

Fiscal Year 2026-2028 Goals:

- Issuance of 420 special events permits.
- Process 2900 work orders.
- Complete 21 Capital Improvement Projects.

Facilities and Community Services
Building Maintenance Division

Program Description:

The Building Maintenance Division performs routine maintenance and emergency services for all City-owned facilities, and oversees all capital improvement projects. This division provides maintenance services to all City facilities totaling approximately 583,000 square feet, including the Citrus Center, Civic Center, three parking structures, A.K. Smiley Library, Lincoln Shrine, Contemporary Club, four Fire stations, Police Annex, Joslyn Senior Center, Community and Senior Center, Corporate Yard, Redlands Airport, Landfill, Hillside Memorial Park and 1625 Redlands Blvd. In 2026, the State Street building at 300 E. State Street and the Museum of Redlands was added to the City facility list as well.

This Division is utilized for a wide range of building maintenance functions including carpentry, plumbing, electrical, HVAC, painting, furniture assembly and relocation, general cleaning services, and special projects including office construction, remodeling, janitorial issues, and environmental testing.

City staff prepares scope of services, solicits bids, and administers contracts for various vendors to provide ongoing and specialized maintenance services. Among the contracted services are janitorial, pest control, HVAC maintenance, elevator servicing, and security alarm systems.

Program Objectives:

- Provide quality service when responding to calls from various departments regarding maintenance and repair of City-owned facilities.
- Reduce response time for maintenance and service calls.
- Work synergistically with other divisions for various department and city-wide projects.
- Manage CIP and other facility related projects.

Accomplishments for Fiscal Year 2024-2026:

- HVAC replacement at Joslyn Senior Center.
- Managed Animal Shelter Kennel Expansion.
- Managed Citrus Avenue Parking Structure Improvement Plan.
- Managed Ford Park Restroom Placement Project.
- Managed the Library Modernization Project.
- Worked alongside Tilden-Coil on State Street building Renovation Project.
- Completed Fire Station 2 remodel project.
- Completed 860 work orders.

Goals for Fiscal Year 2026-2028:

- Complete Citrus Center Remodel and move city staff into new offices.
- Manage CIP projects for Roof and HVAC replacements at several City Facilities.
- Complete 265 preventative maintenance requests.
- Complete 680 work orders.

Facilities and Community Service
Streets and Electrical Division

Program Description:

The Street Division provides for the general maintenance and repair of 314 miles of streets, and 90 miles of storm drains within the city. Crews respond to approximately 1,000 annual calls for routine street maintenance services.

The division also provides routine street cleaning and sweeping services on public roadways within the city. Cleaning actions include mechanical sweeping, debris removal, storm cleanup, and other related services. Streets are swept on a bi-monthly basis totaling 510 curb-miles swept during each sweeping rotation, equating to 1,020 curb-miles cleaned per month.

The division is also charged with providing the maintenance and repair of 72 city-owned traffic signals and approximately 5,000 city-owned streetlights.

Program Objectives:

- Patch and repair asphalt surfaces, including potholes, utility trenches, and cracks.
- Repair and ramping of sidewalks damaged by tree roots.
- General maintenance and repair to the storm drain system, including clearing of vegetation, repairs to open and rock channels, debris removal, clearing of blockages, and general inspections.
- Operation of a weed abatement program to include shoulder grading and mowing, spraying, and removal to comply with Fire Department abatement requirements.
- Provide support to public safety departments for barricades, signs, and human resources in response to emergencies.
- Install, replace, repair, and maintain all traffic signage within the public right-of-way.
- Install, restore, and maintain all roadway markings and striping, including painted curbs, street legends, crosswalks, centerline and lane-line stripes, and parking lot lines.
- The field service coordinator is responsible for oversight of the City's contracted street sweeping and traffic signal infrastructure.
- Service, repair, and maintain streetlights.

Accomplishments for Fiscal Year 2024-2026:

- Maintained over 300 miles of streets, including potholing and skin patching, and sidewalk ramping, using 10 tons of asphalt in 457 locations.
- Provide street sweeping for 12,000 curb miles throughout the City.
- Completed approximately 7,800 underground service alert tickets. These are USA dig alerts that the streets / electrical to have to locate underground utilities
- Serviced and/or repaired 1,560 street lights.
- Completed annual cleaning of all storm drain inlets and channels.
- Fabricated, replaced, or serviced 870 street signs.
- Replaced 27 streetlights/traffic signals knocked down in traffic accidents.
- Provided 400 labor hours, eradicating illegal dumps.
- Roughly 12 lane miles of curbs to sweep added to stripe

Projects Completed:

- Worked with SBCTA on light rail traffic signal integration.
- Replaced 4 power pedestals that were knocked down in traffic accidents.
- Cleared canyon roads during heavy winter rain events.
- Retro fitted intersection traffic signal power feed Redlands Blvd. and Orange St.
- Installation of approx. 2,900 linear ft of guardrail from Ford St to Palm Ave.
- Worked alongside Parks and Building Maintenance staff to complete various downtown projects including Christmas holiday decorations and lighting and community service day.
- Completed city wide speed limit sign replacement estimated 70 signs.

Accomplishments for Fiscal Year 2024-2026:

- 586 Field Responses.
- 463 Signs created and replaced.
- 8,000 underground service alerts.

Goals for Fiscal Year 2026-2028:

- 430 field responses.
- 454 signs create and replace.
- 8,200 Underground service alerts.

Facilities and Community Services
Parks Division

Program Description:

The Parks Division is responsible for the maintenance and upkeep of approximately 800 acres consisting of 27 established parks, over 60 water well and reservoir sites, parking lots, 14.5 acres of median strips and traffic islands throughout the City, the downtown area, and the improved I-10 Gateway. The division is comprised of 20 full-time employees who provide maintenance to the City's Park and open space system. The division also has a dedicated staff member to handle graffiti abatement within the city. City parks and medians. Parks Division staff also help facilitate special events along with maintaining all the downtown areas within the City's purview.

Program Objectives:

- Provide clean, safe, and attractive open space and parkland areas.
- Maintain irrigation systems and facility plumbing systems in all areas of responsibility.
- Maintain playgrounds and other facilities in a safe and clean manner.
- Maintain city owned medians, trails and open space.
- Oversee, coordinate, and assist with various park volunteer efforts and other programs.
- Support the annual Day of Service volunteer event.

Accomplishments for Fiscal Year 2024-2026:

- Annual Dog Park renovation and seeding.
- Ford Park and Sylvan Park annual Day of Service events.
- Texonia Park Renovation design work completed and awarded grant funds.
- BMX pump track design work completed.
- Parks Master Plan completed.
- Acceptance of Coyazo Park.
- Closed out 685 graffiti abatement work orders.

Goals for Fiscal Year 2026-2028:

- Texonia Park renovations, construction phase.
- Sylvan restroom renovation.
- Playground and restroom replacements.
- Replacement of bleachers in various parks.
- Coyazo Park Crow's nest building completion.
- Park maintenance increased to 840 acres.
- 5 park renovations completed.

Facilities and Community Services
Trees

Program Description:

The City's urban forest is a recognized asset and landmark of the City of Redlands, valued at approximately $151,929,920.00. The Facilities and Community Services Street Tree Division staff oversee the maintenance of approximately 56,520 tree sites located within the City's right-of-way, City-owned facilities, parking lots, trails, and parks. Of these sites, approximately 43,720 are home to living trees. This count includes approximately 6,675 trees within the City's park system, and the remaining 37,045 trees in parkway areas, easement areas, and City-owned properties. Palm trees continue to be the single most prominent genus of trees within the City's inventory, which numbers approximately 8,875. A close second is the Crape Myrtle tree which numbers approximately 6,872. Both of these tree species are iconic Redlands trees. In partnership with the Redlands Street Tree Committee, the Street Tree Division is dedicated to the continued enhancement, maintenance, and care of this living asset.

Program Objectives:

- Provide trimming (based on safety, tree health, and aesthetics) and maintenance of City trees with a primary focus on individual specimens within the city right-of-way.
- Provide safe and efficient removals of dead, diseased, and hazardous trees, either on a pre-approved or emergency basis.
- Provide an active response to mitigate and resolve emergency tree concerns.
- Work cooperatively with various volunteer groups, special interest organizations, and city departments to promote urban forest health and preservation.
- Provide continual updates to maintain accurate records and reports.

Significant Program Changes and Process Improvements:

The Street Tree Division advanced a focused tree replacement initiative in partnership with a contractor, establishing a target for removal and planting to meet a 1:1 ratio. Through coordinated planning and execution, the program exceeded expectations, resulting in 480 newly planted trees. This effort not only addressed immediate canopy loss but also strengthened the long-term sustainability and resilience for the City's tree canopy.

Accomplishments for Fiscal Year 2024-2026:

- 476 trees were removed
- 12,430 trees were pruned
- 540 trees were planted

Goals for Fiscal Year 2026-2028:

- Tree replacement and removal is a 1:1 ratio.
- Continued to fulfill tree trimming service that meets the needs of the community for safety and welfare.
- 50 new trees will be planted with volunteer work
- Estimated 800 (400 per year) trees will be removed.
- Estimated 13,000 (6,500 per year) trees will be trimmed.
- Estimated 600 (300 per year) new trees will be planted.

Facilities and Community Services
Code Enforcement Division

Program Description:

The Code Enforcement Division is responsible for improving the quality of life of residents, protecting property values, and ensuring the health and safety of our community by fair and consistent enforcement of the Redlands Municipal Code. Such enforcement activities include, but are not limited to, enforcement of codes related to property maintenance, graffiti, inoperative vehicles, unsafe conditions, unsafe buildings, unpermitted (unsafe) construction, and the eradication of neighborhood blight. This division consists of one full-time senior code officer, three full-time code officers, and one full-time administrative technician. The Code Enforcement Division provides a balance of providing customer service to residents concerned with municipal code violations while working to educate and gain voluntary compliance, increasing the quality of life and serving the entire community.

Program Objectives:

- Provide excellent customer service to the residents and businesses of the City of Redlands.
- Increase the quality of life in the City of Redlands by improving the visual appearance of our neighborhoods through the fair and consistent enforcement of the property maintenance ordinance.
- Respond to citizen concerns pertaining to Municipal Code violations.
- Educate property owners and responsible parties of code requirements and work with stakeholders to resolve issues raised by residents and businesses through voluntary compliance.
- When voluntary compliance is not gained through education, enforcement action is initiated to gain compliance to provide the appropriate customer service to the overall community.

Accomplishments for Fiscal Years 2024-26:

- Open 1805 cases.
- Closed 1,508 cases.
- 1,840 Requests for service.
- 4,658 code inspections completed.

The Code Enforcement Division participates in a monthly meeting with the City's Police Department, Building and Safety Department, and Fire Department to discuss current public safety issues, code cases, and municipal code violations. This partnership assists in improving interdepartmental communications, the successful closing of cases, and providing health and safety to the community.

Goals for Fiscal Year 2026-2028:

- Open 1,800 cases.
- Close 1,950 cases.
- 1,840 requests for service.
- Complete 4,000 code inspections.
- 1000 cases brought into compliance.

Facilities and Community Services
Recreation and Senior Services

Program Description:

The City of Redlands Recreation and Senior Services Division is a customer-driven service that is responsive to the needs of the public. Recreation and Senior programs promote wellness and human development through leisure pursuits. The Division operates the Joe R. Gonzales Community Center, Eddie and Gloria Flores Senior Center, and Joslyn Senior Center, which are open to the community for a variety of educational and leisure activities. The centers feature a gymnasium, computer labs, classrooms, reading lounges, multi-purpose rooms, and kitchen facilities. In addition to manning the centers, the Division also facilitates the rentals of indoor and outdoor recreation sites as well as the Morning Market within the downtown area.

The Senior Services programs focus on community support and partnerships, nutrition and healthy eating, and active living. The Senior Information and Referral Services Offices are in the Community Center at 111 W. Lugonia Avenue, and offers assistance to seniors seeking housing, medical, and financial information. Numerous programs are offered, including the Meals on Wheels program and the Family Service Association Nutrition Program, ensuring the availability of hot meals to seniors for a reasonable price.

Program Objectives:

- Strengthen community image and sense of place.
- Provide and support recreation and leisure services offered throughout the community.
- Promote health and wellness.
- Foster human development
- Increase cultural unity.
- Provide programs and activities to stimulate and strengthen senior lives, including health and fitness, education and instruction, referral and support, and social activities and events.

Significant Improvements Related to Operations:

The Joe R. Gonzalez Community Center has recently undergone targeted enhancements to better service the needs of its patrons:

- Renovation of the Joe R. Gonzalez Community Center back lobby, including a new service counter, updated flooring, paint, and lighting.
- Renovation of small classroom at the Joe R. Gonzalez Community Center, including new paint, flooring, and lighting, along with the addition of a mounted projector screen and speakers to support audiovisual programming.
- Gymnasium enhancements and maintenance, including replacement of four backyard winches used to raise and lower basketball hoops, and the addition of a backboard lowering device to better accommodate younger participants and expand introductory your basketball programming.
- Installation of new volleyball nets, poles, and a referee stand to support expanded volleyball programming.

- Replacement of a 20-year-old scoreboard with a modern, wireless-operated system, improving ease of use and overall service delivery.

Accomplishments for Fiscal Year 2024-2026:

- 12 Community events held.
- 170 City programs offered for kids, youths, and seniors.
- 155,000 registered participants across all programs.
- 80% of community satisfaction level reports for services provided.

Goals for Fiscal Year 2026-2028:

- On-going collaboration with independent contractors for program activities.
- Continue to provide special events for community engagement and demand.
- Continue to provide cooling centers for the community.
- Continue to provide senior services and recreational programming to meet the community needs.

Facilities and Community Services
City Hall 300 E. State Street

Program Description:

The City acquired the new facility at 300 E. State Street on October 1, 2021, for the purpose of a future City Hall location. The building was built in 1981 and includes approximately 80,000 square feet comprised of six floors. The new facility is located at 300 E. State Street in the heart of the City's historic downtown area. The building is an iconic feature of the typical international style or corporate architecture and is the tallest building in the city. The facility will house the administrative offices and public facilities such as the Council Chambers and various customer service departments.

Program Objective:

- To locate all administrative public services within one facility for customer service accessibility and engagement with the residents and business community.
- Accommodate growth and expansion of City facilities and services necessary for future stability.

Accomplishments for Fiscal Year 2024-2026:

- The space planning and necessary retrofitting design is underway with City departments anticipated to move in throughout 2026.
- The City Manager's and City Council offices have been occupied on the 6th floor and were completed by the end of the year 2023.

Strategic Plan:

Conversion of this facility into a future City Hall supports the Strategic Plan Priority D – Sustainability Strategic Objective 2 – Infrastructure.

Facilities and Community Services
Animal Services

Program Description:

The Animal Services Division provides a variety of services to meet the needs of the community and ensure the welfare of animals. The division enforces state and federal animal laws and city municipal codes. The animal control officers are responsible for handling stray animals on city streets, animal disturbance calls, reports of injured or aggressive animals, and animals receiving fatal injuries. The Animal Service Division also quarantines animals after reported animal bites, investigates reports of animal abuse, and temporarily provides shelter to neglected livestock and injured wildlife.

Program Objectives:

- Provide humane care for all animals housed within the shelter.
- Promote the adoption and placement of animals through adoption and rescue efforts.
- Increase participation in the spay and neuter program to reduce animal overpopulation.
- Deliver professional and responsive customer service to the community.
- Strengthen community partnerships to enhance animal welfare outcomes.
- Educate the public on responsible pet ownership, including licensing, vaccinations, and wildlife awareness.
- Improve operational efficiency through increased information in the field by moving towards paperless systems.
- Provide at least two low-cost microchip events annually to help reduce lost pets entering the shelter system. Develop and implement community engagement events, such as “Take a Shelter Dog Out for a Day,” to increase public interaction with the shelter and promote adoptions.

Accomplishments – Prior Fiscal year 2024-2026:

- Completed the remodel of the cattery to provide adequate space, updated kennels with privacy areas, and improved cleanability.
- Participated in more than a dozen community events promoting the Animal Services Division and highlighting adoptable animals currently in the shelter.
- Worked with Best Friends Animal Society to provide additional staff training, develop updated policies and procedures for shelter operations, and coordinated with additional rescue groups to find positive outcomes for shelter animals.
- Developed master plan for expansion and renovation of the facility to meet the current and future needs of the community.
- Increased participation in our volunteer program, providing much needed interaction and activity time for shelter animals.
- Added additional shelter staff to ensure operation is adequately staffed to provide required services 365 days per year.
- Upgraded computer software system to provide mobile field access via phones and tablets.
- Facilitated 506 animal adoptions.
- Oversaw the intake process for 707 stray animals, maintaining detailed records.

Goals for Fiscal Year 2026-2028:

- Identify funding for the construction of the facility expansion. Complete the design phase and prepare for construction phase.
- Expanded the Animal Services Center's kennel capacity by approximately 86% through the addition of new modular kennels (Accomplished)
- Explore various partnerships, both public and private, to expand services and adoption opportunities.
- Complete renovation of the isolation room to provide adequate space and separation of animals under care.
- Evaluate and implement additional staffing positions to effectively maintain the approximately 86% increase in kennel capacity, ensuring continued high standards of animal care, facility maintenance, and public service.
- Evaluate and establish a partnership with a pet licensing platform (e.g., DocuPet) to improve licensing compliance, enhance return-to-owner rates, and reduce shelter intake of stray animals.
- Establish lead positions for Animal Control Officers, Kennel Attendants, and a Shelter Coordinator to improve operational oversight, distribute workload more effectively, enhance accountability, and reduce staff burnout.
- Design and construct a holding area consisting of approximately 10–12 kennels to support intake operations, improve animal flow, and reduce the risk of disease transmission within the shelter.
- Convert the existing small dog room into a dedicated isolation area for sick or high-risk animals to improve disease control, enhance recovery outcomes, and prevent cross-contamination with healthy animal populations.
- Facilitate 730 adoptions.

Facilities and Community Services
Downtown Redlands

Program Description:

The Downtown Redlands Division is dedicated to ensuring the downtown area is the cornerstone of the community; offering an enhanced experience of shopping and dining that makes Redlands a true destination. The division concentrates efforts on the promotion of events, enhanced maintenance efforts, and customer service outreach for the downtown businesses. Promotional events include our Certified Farmers Market, Christmas tree lighting, annual Holiday Décor, and Entertainment Program, along with other various popular downtown events.

Program Objectives:

- Preserve the integrity of historic downtown and cultivate prosperity for the local businesses.
- Help stimulate downtown's economic vitality.
- Provide information to and address service requests from the local business community and patrons.
- Enrich the downtown area with activities that are conducive to family participation.
- Enrich the downtown area with enhanced streetscape, furnishings, and decorations.

Priority Focus Area:

- In support of the City's Strategic Plan Focus Area B – Economic Development, during the Fiscal Year 2026-2028, the Downtown Division will provide support to the local downtown businesses. This will include managing the weekly Certified Farmers Market as part of the Morning Market Event which provides essential produce to the community and includes annual celebrations such as the Tree Lighting Ceremony and holiday decorations. In addition, the City supports several non-profit events within the downtown area for economic prosperity. These non-profit events include the Redlands Bicycle Classic, the New's Year's Eve celebration, Redlands' Firefighters' Car show, the Believe Walk, various art events, and the Christmas Parade.

  Ongoing maintenance is further performed to ensure downtown is aesthetically inviting and maintains its historic and unique character. This includes items such as the quarterly replacement of the umbrellas within the Orange Street Alley, maintaining the State Street audio system for use with various events and daily ambient music, the downtown tree lights for enhanced aesthetic in the evening hours, and the ongoing upkeep of existing infrastructure.

Facilities and Community Services
Community Facility, Land Maintenance, and Street Lighting Division

Program Description:

The City established Landscape District No. 1 and Street Lighting District No. 1 in accordance with the "Landscaping and Lighting Act of 1972."

The San Bernardino County Assessor's Office collects annual assessments from affected district property owners to provide for the district's management, administration, maintenance, and operational expenses. Maintenance costs associated with Landscape District No. 1 include water and labor costs, materials, equipment to maintain or replace trees, bushes, groundcover and turf, and repairs for irrigation lines and irrigation control systems. Maintenance costs associated with the Street Lighting District include the cost of power to illuminate the streetlights and the labor, materials, and equipment to replace burnt-out or broken street light infrastructure within these districts.

The revenues collected through the assessments in both districts have not been adequate to cover the cost of providing high levels of maintenance. As a result, General Fund revenues have been used to subsidize the cost of providing these services. The intent of a maintenance district is to provide adequate funding to support all necessary maintenance services within its boundaries. Services provided will be minimized to a level supported by the annual assessments to reduce the burden on the General Fund. Additionally, Landscape Maintenance District reductions will include reduced irrigation periods, cutbacks to the frequency of the landscape maintenance activities, and minor repair work. Landscaping and irrigation will be systematically removed and replaced with drought-tolerant plant material and drip irrigation that will require fewer maintenance hours. Furthermore, staff review, and inspections and general City administrative overhead will not be included in the cost of service for these Districts.

Program Objectives:

- Comply with the requirements of the "Landscaping and Lighting Act of 1972".
- Implement adjustments to services to ensure there is adequate cost recovery.
- Provide satisfactory landscape maintenance to meet the City's desire for well-maintained attractive, and aesthetically landscaped areas.
- Provide appropriate street light maintenance to provide well lighted and safe pedestrian and vehicular travel ways.

Significant Program Changes and Process Improvements:

- The City accepted Coyazo Park, which is partially funded by the CFD.

Community Facility Districts

Program Description:

The City established Community Facility District No. 2004-1 in July of 2004 under the "Mello-Roos Community Facilities Act of 1982."

In 1978, Proposition 13 was enacted by Californians, which limited the ability of many public agencies to finance new projects. In 1982, Senator Henry Mello and Assemblyman Mike Roos affected the passage of the "Mello-Roos Community Facilities Act of 1982" (the Act) authorizing local governments and developers to create Community Facilities Districts (CFDs) for the purpose of selling tax-exempt bonds to fund public improvements. The Act allows any county, city, special district, school district, or joint powers of authority to establish a CFD, which provides for the financing of public services and facilities. The Act allows communities to raise funds for improvements to infrastructure (streets, sewers, and storm drain) even though Proposition 13 limits their ability to tax property. The revenues collected through the assessments are used to support the maintenance of parks, parkways, and open spaces as well as flood and storm protection services, including, but not limited to, the operation and maintenance of storm drainage systems and on-site retention basins. The city currently facilitates the maintenance of 21 CFD areas.

Program Objectives:

- Comply with the requirements of the "Mello-Roos Community Facilities Act of 1982".
- Provide satisfactory maintenance to CFD common areas, park areas, open spaces, and retention basins.
- Provide landscape maintenance to meet the City's desire for well-maintained, attractive, and aesthetically landscaped areas to improve community quality of life.

Facilities and Community Services
Solid Waste

Program Description:

The Solid Waste Division operates automated refuse, recycling, and green waste collection for approximately 20,300 single-family residential units. Commercial bin service is provided for one to six days per week to 989 customers, and commercial recycling service is provided to about 614 businesses. New commercial organic waste recycling is provided to 35 customers. Businesses have recently received notification of compliance for AB 1826 (Mandatory Commercial Recycling). Roll-off bin service is provided using 171 roll-off bins, which customers rent weekly. An un-staffed recycling drop-off center is provided at the City Yard for residents and businesses that don't otherwise have an opportunity to recycle. As a community service, the Solid Waste Division provides cleanup of illegal dumping, educational activities with schools, and other solid waste education, including recycling and waste reduction for Redlands residents and businesses.

Program Objectives:

- Comply with all local, state, and federal regulatory requirements such as AB939, AB341, AB1826, SB1383, SCAQMD 1150.1 Clean Air Acts, and landfill operating requirements.
- Provide cost-effective, high-quality service to all solid waste customers.
- Operate the City's landfill in an efficient and fiscally responsible manner to ensure regulatory compliance.
- Ensure landfill regulatory requirements and compliance are met or exceeded.
- Ensure continued compliance with increasing state diversion/recycling requirements.

Significant Projects and Improvements:

- The California Street Landfill began construction of the installation of 13 vertical gas extraction wells on Phases 2 and 3. The project was completed on March 2, 2024.
- Staff continue to provide customer outreach for SB1383. These new regulations require the recycling of organic/food waste material by businesses and residents.
- To address mandatory recycling requirements of AB341, SB1383, and AB1826, the City's Solid Waste Division is continuing the recycling outreach programs and has developed an organics collection route to provide service to approximately 87 commercial customers. April 1, 2024, the Solid Waste Division began servicing curbside organic waste material for city residents.
- The Solid Waste Division continues to offer a Bulky Item Collection program to residential customers. The program allows customers to request a collection of bulky items retrieved from their curbside.
- The Solid Waste Division continues participating in a no-cost mattress recycling program offered through the State of California. This program allows staff to recycle mattresses collected through the City's bulky item program. This program enables Landfill staff to extract mattresses from the waste stream and recycle them. Staff is also working with CalRecycle on the possibility of implementing a used carpet recycling program.
- February 21, 2024, the California Street Landfill received a draft permit from the South Coast Air Quality Management District (SCAQMD) for a permit to construct one Enclosed Flare to accommodate the future needs and growth of the city. The Flare was purchased in March 2026 and is currently in the process of production.

- Two new front-end loading, and one automated side loader collection truck was delivered to the Solid Waste Division in November of 2023.
- Implementation of Senate Bill 1383 (SB 1383) residential curbside organics collection. Implementation included “Talking Trash” educational videos, updates to the city website, and free kitchen pails to residential and multi-family households.
- Staff worked collaboratively to determine commercial businesses that were out of compliance with AB 341 (Mandatory Commercial Recycling) and brought over 326 commercial businesses into compliance.
- Implementation of a new Recycling program to help staff determine compliance for Mandatory Commercial Recycling (AB 341), Mandatory Commercial Organics Recycling (AB 1826), and Short-Lived Climate Pollutant Reduction Strategy (SB 1383).

Accomplishments for Fiscal Year 2024-2026:

- Solid Waste collected approximately 1,000,175 tons of refuse, and 26,500 total tons of organic material was diverted from the landfill through green waste and food waste collection.
- 87% of successful residential pick-ups.
- 100% efficiency of collection routes.
- CalRecycle certified that the City of Redlands meets the requirements of AB939, AB1826, AB341, and SB1383 and has adequately implemented a diversion program
- Staff began outreach meetings and public speaking engagements to inform residents and business owners of the new assembly bills and recycling requirements of AB1826, AB341, and SB1383.
- The Landfill began the importation of compost material for erosion control and to remain in compliance with SB 1383.

Goals for Fiscal Year 2026-2028:

- Landfill will purchase a new landfill scraper in the amount of $1.2 million to support the ongoing operations and maintain regulatory compliance.
- The Landfill Division has purchased a new gas flare for $900,000 and will advertise a Request for Bids (RFB) for installation upon completion of fabrication.
- The Landfill Phase 5 Expansion Project will receive contractor bids and is anticipated to break ground in 2026 to ensure continued disposal capacity.
- The Solid Waste Division will place an order for three new solid waste collection trucks to support service reliability and fleet replacement needs.
- Residential pick-up success will be at 92%.
- 675,000 total tons will be collected.
- Efficiency: 100% sustained.
- Organic diversion: 15,600 tons.

Facilities and Community Services
Citrus Groves

Program Description:

The City currently farms 22 separate citrus groves totaling approximately 184 acres. Several citrus varieties, including Navel orange, Valencia orange, Ruby Star grapefruit, and Rio grapefruit, are farmed within these groves. The department staff provides onsite repairs and maintenance as well as oversight of various contractors.

The Citrus Preservation Commission has been appointed by the City Council to advise staff and the City Council on both technical and business matters related to citrus grove management. Seventy acres of the city-owned groves are designated as Citrus Heritage Groves to be protected for future generations. The groves were primarily purchased with funds from Measure "O" and Park Acquisition Funds.

The Citrus Grove budget is presented in twenty-one separate job ledgers/programs as an Enterprise Fund, to be supported by revenue received from the sale of citrus products from these groves. The groves currently owned and maintained by the city are known as:

1. California
2. Palmetto1, Palmetto 2
3. Dearborn & Pioneer
4. Fifth
5. Granite
6. Jacinto Memorial
7. Judson
8. Lugonia
9. Mountain View
10. Mullin
11. Olive
12. Judson East
13. Judson West
14. Prospect
15. Riverview
16. Texas
17. University
18. Gateway
19. West Riverview
20. Sessums
21. Wabash
22. San Bernardino
23. England

Program Objectives:

- Staff support for the Citrus Preservation Commission on matters of acquisition, improvement, preservation, operation, and retention of citrus properties within the City.
- Efficiently, effectively, and economically manage the day-to-day operation of the groves, and market the crops to recover all costs of operation.
- Preserve acreage in citrus production consistent with the City's historical and cultural heritage as a citrus growing community while providing an economic basis for supporting private citrus development and processing facilities.

Significant Program Changes and Process Improvements:

- Staff continues to monitor the impact of the Asian citrus psyllid on the California citrus industry and implementing prevention methods.

Accomplishments for Fiscal Year 2024-2026:

- Accepted possession of England Grove.
- Farmed 184 acres.
- 93,058 cartons of fruit were harvested.

Goals for Fiscal Year 2026-2028:

- Farm 190 acres.
- Harvest 110,000 cartons of fruit.

Facilities and Community Services
Cemetery Division

Program Description:

Hillside Memorial Park is a historic cemetery consisting of more than fifty acres of land. There are 11.75 acres of undeveloped land reserved for future developments. The cemetery has performed and recorded over 33,400 interments since it was established in 1886. Hillside Memorial Park provides a place of reflection and remembrance for those that visit. Families that select Hillside Memorial Park as a final resting place are presented with an array of products to choose from, which span from ground burials to mausoleum entombments. There are also multiple options for families that prefer cremation services. Hillside staff works diligently with public and private organizations to provide the best possible service to families. The cemetery conducts an average of 200 interments per year.

The cemetery is an Enterprise Fund organized to produce revenue to offset expenditure. Portions of the cemetery revenues are placed into the Cemetery Perpetual Care Fund to help offset the expenses associated with future maintenance and upkeep of the cemetery grounds as well as to fund capital improvement projects.

Program Objectives:

- Provide excellent customer service to residents and the community by offering an array of services and products.
- Continue to modernize record-keeping systems to include digital information storage and retrieval.
- Digitize archived records in an electronic format for efficient and accurate research.
- Implement capital improvement projects that will allow the cemetery to remain modern and competitive.

Significant Projects and Improvements:

- Management of property inventory database to track available inventory spaces more effectively.
- Maintained permanent records for 33,548 recorded interments.
- Sold 129 plots.
- Performed 189 new interments, 43.39% of which were cremation related services.
- Sunset Lawn Phase II was developed and will add an additional 220 casket burial spaces and 350 cremation spaces. (This area is classified as a Basic product option.)
- Garden of Hope was developed and will add an additional 500 casket burial spaces and 300 cremation spaces. (This area is classified as a Traditional product option.)
- Garden of Peace was developed and will add 350 casket spaces and 220 cremation spaces. (This area is classified as a Premium product option.)
- Cemetery staff have started an ongoing property inventory verification project to identify usable spaces located on the historic north end of the cemetery. An additional 10 usable cremation spaces were identified and added to the property inventory by staff.

Fiscal Year 2026-2028 Goals:

- Complete 185 burials.
- Sell 200 plots.
- Additional surveying for lot 12.
- GIS location project with online customer information completed.

Facilities and Community Services
Redlands Municipal Airport
(Aviation Division)

Program Description:

The Aviation Division manages all airfield operations, airport land leases, tie-downs, and city airfield facilities and equipment. The Division ensures compliance with the Federal Aviation Administration and the California Department of Transportation Aeronautics Division requirements for General Aviation airport facilities. The airport budget is an Enterprise Fund to sustain the program through airport revenue. The City Council has appointed the Airport Advisory Board to advise the City Council on airport management matters. Oversight is provided by department staff that coordinate airport maintenance activities, grant acquisition, and administration through various department divisions.

The airport encompasses 177 acres, with 197 hangars, 25 offices, 210 tie-downs, and approximately 200 based aircraft. There are currently 14 businesses based at the airport.

Program Objectives:

- Maintain a safe aviation environment.
- Operate the airport as a self-sustaining Enterprise Fund.
- Provide regular education, inspections of airport facilities and equipment along with recurring maintenance.
- Leverage FAA and Caltrans entitlements to maximize capital improvements through FAA and Caltrans grant programs.
- Administer the city-owned west ramp tie-downs.
- Administer Fixed Base Operators (FBO's) with land leases.
- Administer, advise, coordinate, and communicate land use and airspace compatibility.
- Provide staff liaison to the Airport Advisory Board.

Accomplishments for Fiscal Year 2024-2026:

- Hosted the annual Halloween Plane-or-Treat event bringing over 3500 participants to the airfield to learn about aviation activities and the Redlands Airport.
- $750,000 in FAA Grants awarded.
- Processed for approval FAA Entitlement Planning Grants and State of California Matching Grants for runway and taxiway resurfacing, Wildlife Hazardous Management Plan, design for a new airfield security fence, and associated environmental documents.
- Continued agreement with Civil Air Patrol to base a youth squadron at Redlands Municipal Airport, which teaches youth participants about aviation careers and activities and provides support to airport events and operations.
- Completed the FAA funded runway resurfacing project.
- Complied with FAA Hangar Policy and San Bernardino Possessory Tax requirements through hangar inspection program.
- Sustained maintenance of Storm Water Pollution Prevention Program, achieving recognition and approval to limit sampling one time per year for staying within compliance standards.

- Secured on-call service agreement with design, planning, and engineering consultants to provide all FAA required documents and information for grant funded projects.
- Conducted outreach/engagement with FAA, San Bernardino International Airport, and Redlands Pilot community relating to a new flight pattern transecting through Redlands Municipal Airport airspace.
- Remediated v-ditch between Taxiway-Alpha and the West Ramp.
- 47,000 runway operations.

Goals for Fiscal Year 2026-2028:

- Secure $563,000 in FAA grants to continue to support improvements.
- Host the annual Halloween Plane-or-Treat event bringing over 3500 participants to the airfield in the second year to learn about aviation activities and Redlands Airport.
- Develop and release an RFP to provide additional fuel service at the airport, including Jet-A fuel utilized by growing number of helicopters at KREI.
- Restore the beacon tower as a showcase to aviation history in Redlands and the Inland Empire.
- Continue to enhance the Airport with landscaping and clearing of the Runway Safety Areas.
- Grow to 49,000 runway operations.

Facilities and Community Services
Equipment Maintenance Division

Program Description:

The Equipment Maintenance Division provides maintenance and repair services as well as safety inspections for the City's vehicles and equipment. Emphasis is placed on safety, preventive maintenance, and compliance with air quality and other State regulations. Equipment Maintenance staff provide the support necessary to maintain over 600 units of vehicles, heavy equipment, generators, and compressors, as well as operation of the City's L/CNG fuel station. The Equipment Maintenance Division is an Internal Service Fund.

Program Objectives:

- Provide maintenance and repair services to City departments to maintain an in-service rate of 93% or higher.
- Continue to receive an annual award of tax rebates through consistent and timely L/CNG tax reporting.
- Maintain and provide timely reporting for programs required by the State of California and other regulatory agencies.
- Maintain continuous training for mechanics to ensure up-to-date skills and knowledge of computer and electronic technology on the newer model electric, and alternative fuel vehicles.

Accomplishments for Fiscal Year 2024-2026:

- 2 Vehicle charging stations were developed.
- Percentage of city facilities with chargers is 6%.
- 1% of fleet vehicles were transitioned to Zero Emission Vehicles.
- 18 fleet vehicles are alternative fuel.

Goals for Fiscal Year 2026-2028:

- The average fleet age will be 15 years old. 5-Years Old by end of 2028
- Percentage of city facilities with chargers 24%.
- 8 vehicle charging stations will be developed.
- 10% of fleet will transition to zero emission vehicles.
- 16% of fleet will meet CARB Zero Emission Vehicle Standards.
- 34 vehicles in fleet will be alternative fuel vehicles.

Strategic Plan

The Equipment Maintenance Division supports the Strategic Plan Priority D – Sustainability through continued evaluation of the City's medium and light-duty vehicles under the vehicle lease and maintenance program with Enterprise Fleet Management. Through this program, 290 City vehicles have been replaced, resulting in an increase in safety and a reduction in maintenance costs associated with older vehicles.

Municipal Utilities and Engineering Department

Mission:

The mission of the Municipal Utilities & Engineering Department (MUED) is to provide reliable service to the community with professionalism, integrity, accountability, quality, transparency, and innovation. MUED plans, designs, constructs, operates, and maintains Redlands' physical infrastructure for the residents and businesses in the City; making our community a desirable place to live, work, and visit.

MUED is responsible for delivering the following services to the City's residents and businesses:

- Utility Operations:
  - Water production and distribution
  - Non-potable and recycled water distribution
  - Wastewater collection, treatment, and disposal
- Engineering review and inspection of development proposals for compliance with State and City codes, standards, and other governmental requirements relating to land subdivisions, grading, drainage, and improvements within the City rights-of-way.
- Management, rehabilitation, and replacement of infrastructures such as water mains, sewer mains, storm drains, streets, and traffic signals to provide reliable service to the community.
- Development and construction of new public facilities to protect and enhance Redlands' livability.

MUED is organized into three (3) divisions, including Engineering (Development Review, Capital Improvement Program and Construction Management), Water Utility Operations (Potable and Non-Potable), and Wastewater Utility Operations. In total, MUED employs 94 full-time, and one (1) part-time, professionals.

Departmental Goals:

- Preserve City Assets
  - Provide responsible leadership and management to preserve the City's physical assets and resources.
  - Optimize City's physical assets to ensure reliability and exceed anticipated service life.
  - Maximize sustainable practices and ensure City infrastructure improvements support the City's mission to limit its environmental footprint.
  - Provide fiscally responsible water, non-potable (including recycled) water, and wastewater services.
  - Provide a safe, well-maintained, and efficient transportation system.
  - Ensure regulatory compliance by mandating MUED and vendor practices are consistent with all related codes and regulations; and
  - Develop and implement effective emergency management strategies to ensure continuity of services during and after significant events.

- Provide Quality Customer Service
  - Promptly deliver requested services with the highest quality of workmanship.
  - Develop and train staff to effectively communicate with customers.
  - Expand online self-service opportunities.

- Ensure Employee Effectiveness and Satisfaction
  - Recruit and retain high-performing employees.
  - Provide resources necessary for employees to perform work tasks safely and efficiently.
  - Create and maintain a diverse work environment that encourages staff engagement, teamwork, high-performance, and professional satisfaction.
  - Encourage professional development to prepare City employees for promotion opportunities.
  - Emphasize the importance of employee leadership and accountability at all levels.

- Establish Effective and Long-term Partnerships
  - Promote productive working relationships with other departments, City stakeholders, other municipalities, and regional partners.
  - Expand collaboration with education and industry partners on technology projects.

- Utilize Innovation
  - Leverage new ideas and technology to solve problems and accomplish the City's mission.
  - Create and sustain an organizational culture that encourages and supports innovation.
  - Optimize the use of emerging technologies.
  - Improve data collection and promote data-driven decision-making.

- Stimulate the Redlands Economy
  - Provide a One-Stop Permit Center for the prompt processing of development permits in the City.
  - Provide a One-Stop Permit Center to guide developers through Departmental requirements, the Redlands Municipal Code, Measure U, and State regulations.
  - Enhance Redlands' economic curb appeal.

- Encourage Environmental Protection
  - Collaborate with State, Regional, and Local agencies to promote environmentally sound policies and procedures.
  - Continually assess Redlands water sources (Santa Ana River, Mill Creek, and Bunker Hill Basin) to monitor the health of each source.
  - Implement the City's National Pollutant Discharge Elimination System (NPDES) to ensure stormwater discharges comply with the Municipal Separate Storm Sewer Systems (MS4) permits for Capital Improvement Projects, Water Utility Operations, and Wastewater Utility Operations.

- Social Responsibility
  - Collaborate with local Universities and Colleges to encourage students to consider a career in municipal government.
  - Establish an apprenticeship program to mentor young professionals.
  - Promote Departmental programs through community outreach at local events (Market Night, Redlands Bicycle Classic, etc.).

Municipal Utilities and Engineering Department
Engineering Division

Program Description:

The City of Redlands Engineering Division provides quality engineering services for the citizens of Redlands and the private development community. Engineering reviews capital improvement projects and manages the construction of City infrastructure improvement projects, such as street rehabilitation, water, and sewer main replacement, and storm drain construction.

Program Objectives:

- Efficiently deliver Capital Improvement Projects.
- Capitalize on opportunities to improve the effectiveness of services provided to community.
- Leverage State and Federal grant funds to implement major capital improvement projects.
- Extend and maintain the useful lifespan of public infrastructure in a fiscally responsible and sustainable manner.
- Maintain a CIP noticing program to educate and inform the general public.

Sustainability Efforts:

- Rehabilitate well and booster pumps with energy-efficient units.
- Capitalize on building energy consumption and efficiency improvement opportunities.
- Reduce pollutants and greenhouse gases by reducing traffic congestion.
- Support sustainable transportation such as biking and walking.
- Identify grant opportunities and emerging technologies.
- Promote the use of LED streetlights and identify opportunities to replace existing HPS streetlights.

Significant Programs:

PARIS

In 2012, the City completed the Pavement Accelerated Repair Implementation Strategy (PARIS), a funding strategy for pavement condition assessment and a pavement management platform that strategically prioritizes investment in road improvements. PARIS resurfaced approximately 440 lane miles of public streets (2/3 of all City streets) from 2013 to 2021 and increased the Redlands Street network pavement condition index from 53 to 82. PARIS was completed in FY 2020-21. The remaining 210 lane miles of City streets will be rehabilitated, and streets rehabilitated through PARIS will be maintained through a new Pavement Management Program (PMP 2020), which was adopted by City Council in April 2020.

MEASURE I & SB1
Measure I is the half-cent countywide sales tax levy approved by the voters to fund local transportation improvements. The City's annual Measure I allocation was used in its entirety to fund the PARIS program and is expected to be used in the same manner for the PMP. Additionally, the Road Maintenance and Rehabilitation Account established through Senate Bill 1 (SB1) provides funding to Redlands for not only PMP improvements, but also other local transportation improvements.

DEVELOPMENT IMPACT FEES
Development Impact Fees (DIF) are collected for the construction, expansion, and improvement of arterial streets, freeway interchanges, traffic signals, public facilities, public parks, storm drain facilities, wastewater facilities, solid waste facilities, and water facilities. DIF provides partial funding for the construction of master-planned facilities to accommodate the impacts of new development projects.

WATER CONSERVATION
In 2012-13, Redlands adopted a Water Conservation Rebate Program to incentivize customers to reduce water consumption and contribute to the City's effort to meet the 2009 Water Conservation Act goals, which required a twenty percent (20%) reduction in water consumption by 2020. The rebate program and successful implementation of additional programs, such as irrigation controller scheduling assistance, a water waste investigation program, have resulted in a citywide residential water consumption rate reduction of approximately 50 gallons per capita per day over the last five years.

Accomplishments in Fiscal Year 2025-26:

- Construction of the PMP 2024 and PMP 2025, completing approximately sixty-eight (68) lane miles of streets out of the remaining 1/3 of the City's streets (210 lane miles out of 650) after completing the PARIS program.
- Replacement of ten (10) miles of water pipeline.
- Rehabilitation of four (4) miles of sewer pipeline by replacing and slip lining.
- Replacement of thirty-one (31) sewer manholes.
- Replacement of four (4) miles of sidewalks.
- Replacement of thirty-two (32) ADA curb ramps.
- Awarded approximately $150,000 in Water Efficiency Rebates.
- Design and bidding of WWTP Phase 2 (overall rehabilitation of the plant) is completed.
- Construction of the Joint Utilities Laboratory expansion has begun.
- Engineering review of land development activities and permit applications.
- Construction inspection for capital projects and land development activities.

Municipal Utilities and Engineering Department
Water Utility Division

Potable Water Utility Program Description:

The water utility produces and distributes water through approximately 23,500 water service lines to approximately 77,800 customers within its service area. Generally, the service area includes the City of Redlands, a small portion of the City of Loma Linda, and unincorporated areas of the County (Mentone and Crafton areas), as well as the San Bernardino County Donut Hole area. The City's average daily water consumption is 20 million gallons per day (mgd), peaking at 35 mgd in the summer. The average consumption per capita is approximately 170 gallons per day. The water utility operates and maintains approximately 384 miles of potable pipelines, within seven pressure zones and two sub-zones, and provides a maximum storage capacity of 54.5 million gallons. Water division employees operate approximately 3,500 fire hydrants, eighteen (18) reservoirs, two surface water treatment plants, four engineered blending sites, twenty-two (22) active potable groundwater production wells, and fourteen (14) booster station facilities. The City also has two interconnections established with Loma Linda and Western Heights, which allow for supplemental water delivery when needed.

The water budget includes all expenses required to operate and maintain the entire system, including production, treatment, and distribution; laboratory operations; regulatory compliance; utility billing services; and water conservation.

Program Objectives:

- Provide a safe, reliable drinking water supply that meets or exceeds all water quality requirements.
- Deliver water in a fiscally responsible manner.
- Publish an annual Consumer Confidence Report to educate the public about drinking water quality and water sources.
- Promote water conservation awareness and practices.

Accomplishments in Fiscal Year 2025-26:

- Replaced approximately nine (9) miles of aging water distribution mainlines.
- Received the 2023 and 2024 Climate Impact Award and $104,756 of incentive rebates for participation in the energy demand response program.
- Rehabilitated five (5) potable wells & four (4) booster pumps.

Municipal Utilities and Engineering Department
Wastewater Division

Program Description:

The wastewater utility collects municipal wastewater from approximately 18,000 customers within the service area. Generally, the service area includes the City of Redlands, unincorporated areas of the county (Mentone and Crafton areas), and the San Bernardino County Donut Hole area. The wastewater utility includes the operation and maintenance of approximately 250 miles of sewer mainline, one sewer lift station, and a wastewater treatment plant capable of treating approximately 9.5 million gallons per day (mgd) of influent raw water. The wastewater treatment plant, originally constructed in 1962, includes a water quality laboratory where routine regulatory compliance tests are performed. In 2004, the plant became the largest membrane bioreactor facility in the West Coast of the United States, producing an average of 4.0 million gallons per day (mgd) of high-quality tertiary effluent (reclaimed water). Today, the plant continues to process secondary wastewater, directing it to percolation ponds to recharge Bunker Hill Basin B, and treats tertiary wastewater for recycling purposes, particularly for irrigation and cooling tower water for a local generation plant.

The wastewater budget includes all expenses required to operate and maintain the entire system, including system maintenance, wastewater treatment and disposal, recycled water system operation and maintenance, laboratory operations, and wastewater regulatory compliance.

Program Objectives:

- Provide reliable wastewater collection and treatment services in a fiscally responsible manner.
- Proactively inspect collection system facilities to identify and plan wastewater system rehabilitation and replacement capital projects.
- Clean and maintain the entire wastewater collection system mainlines every three (3) years.
- Maintain a 24/7 Emergency Response Team to reduce the potential for Sanitary Sewer System Overflows.
- Educate residents and businesses about problems associated with fats, oils, and grease (FOG) discharges into the wastewater collection and treatment system and implement a FOG reduction program.
- Establish a regulatory compliance program and pretreatment program for significant industrial dischargers.
- Meet or exceed wastewater treatment and discharge requirements, and recycled water service regulatory requirements.

Municipal Utilities and Engineering Department

Accomplishments in Fiscal Year 2025-26

Wastewater Treatment Plant:

- Replaced eight (8) variable frequency drives (VFD) throughout WWTP.
- Completed the WWTP Enhancement Project including:
  - Refurbishment of the four (4) Primary clarifiers
  - Refurbishment Secondary clarifier #2
  - Replacement of the biological HACH Real Time Control System (RTC)
  - SCADA System Upgrade
  - Degas pond cleanup
- LF/WWTP shared waste gas flare improvement project

Wastewater Collections:

- Root Control Program – 5.00 miles of sewer pipe were treated for root prevention.
- Roach Control Program - 2,434 sewer manholes were treated with Latex-Insecticidal Coating.
- Fifty-five (55) sewer main spot repairs were made to the Collection System because of sewer inspections.
- Adjusted sixty-five (65) sewer manhole frames and covers.
- Addition of one (1) Wastewater Collection System Worker.
- Cleaned over 184.5 miles of sewer pipe.
- Inspected over sixty (58) miles of sewer pipe.

Joint Utilities Laboratory

- Completed amendment to the laboratory's accreditation in accordance with the Method Update Rules 2021.
- Successfully passed all annual proficiency testing for water pollutants and water quality (Wastewater and Drinking Water).
- Successfully completed the transition into TNI (The NELAC Institute) standards implementation mandated by the state.
- Acquired additional laboratory equipment to add additional analytes to the laboratory's accreditation, reducing dependency on third-party laboratories.
- Successfully completed the preliminary design for the Laboratory Expansion Project.
- Successfully initiated construction of Phase 1 of the Laboratory Expansion Project.
- Updated and finalized the Lab Quality Manual.
- Met and successfully completed all external audit requirements for 2024.

Municipal Utilities and Engineering Department
Non-Potable Water Division

Program Description:

The non-potable water utility produces and distributes water to an increasing number of customers to preserve precious water resources. The City encourages the use of non-potable (including recycled) water and requires that new developments install non-potable (including recycled) water facilities where non-potable water is or will become available. The City operates six non-potable water systems, one of which is supplemented with a blend of recycled water and includes twelve (12) non-potable groundwater production wells. MUED currently serves approximately 130 non-potable customers and operates and maintains fifteen (15) non-potable fire hydrants and approximately 38 miles of non-potable pipelines.

Program Objectives:

- Provide non-potable and recycled water that meets or exceeds customer needs and all water quality requirements.
- Deliver non-potable and recycled water in a fiscally responsible manner.
- Expand non-potable system infrastructure as necessary to meet increasing demands.
- Increase public water conservation awareness.

Accomplishments in Fiscal Year 2025-26:

- Rehabilitated four (4) Non-Potable Groundwater wells and one (1) booster pump station

CAPITAL IMPROVEMENT PLAN - FY 2027 THROUGH FY 2032

CAPITAL IMROVEMENT PLAN

The City of Redlands' Capital Improvement Plan (CIP) guides the City's long term, strategic decisions regarding the construction, repair and replacement of the City's assets including streets, public buildings, water and sewer pipeline, and parks. The CIP covers a six-year planning horizon, or three biennial budget cycles. It serves as a financial tool, identifying funds for the wide variety of mid- and longer-term capital projects, as well as a planning tool to ensure capital projects are consistent with the City's General Plan. It is a projection of the City's needed capital investments over a six-year period, both funded and unfunded. The CIP will be updated with each new biennial budget and will be adjusted periodically to maintain its relevance. The City Budget will incorporate the first two years of the CIP into a Capital Budget.

Development of the CIP is an intensive process and involves a comprehensive review of the goals and direction of the City's future infrastructure needs. Before capital projects become official CIP projects, they undergo a prioritization process, where City staff identify assets for repair, replacement, or purchase in the next two-year budget cycle. When the City Council adopts the biennial budget, projects included in those fiscal years become part of the Capital Budget.

Capital projects included in the CIP are projects specifically designed for large-scale, long-term investment that builds, replaces, or improves an asset (for example, buildings, parks, storm drains, water pipeline, roads, etc.). Capital projects should have a design life of at least ten years and a minimum cost of approximately $50,000. Additionally, capital items not meeting the criteria of "capital projects" as mentioned above are referred to as "Capital Outlay". These items include vehicles, equipment, and other capital expenses that do not meet criteria for a project.

It is important to note that capital projects differ from maintenance projects, which are not within the CIP. Maintenance projects are typically smaller in scale and cost and refer to more short-term repairs or preventative measures to ensure vital public infrastructure remains operational.

Capital Project

- Create or exand upon existing assets
- Provide a link between long-range strategic plans and current resources/needs
- May be funded through cash or debt financing
- Extend the useful life of an asset and/or increase its value/capacity

Maintenance Project

- Repair relatively minor damage to an asset
- Preserve the original state of a capital asset through preventative or curative measures
- Mostly routine
- Conserve the operational abilities of City property

The CIP includes two years' worth of budgeted projects and a four-year plan for projects intended to meet the City's current or anticipated capital needs, the funding sources (if available), and some highlighted projects with details and descriptions.

General Fund and Safety/City Hall Replacement Fund CIP
Significant CIP projects planned within the General Fund and Safety/City Hall Replacement Fund include the following:

- **New Public Safety Facility (Safety Hall)**: Funding is included for the construction of the new Public Safety facility through debt financing. The project represents a once-in-a-generation investment that will consolidate Police Department operations currently spread across multiple facilities into a modern, centralized public safety facility designed to improve operational coordination, efficiency, accessibility, and long-term service capacity. Debt service for the financing of this project will be funded by the General Fund.
- **Fire Station No. 264 Relocation:** Funding is included for architectural design and related preconstruction activities of Fire Station No. 264. This portion of the project will be funded by the General Fund and Public Facilities Fund. The project will replace an aging modular station originally intended as a temporary facility that no longer adequately supports operational, staffing, and service delivery needs. The construction phase of this project will be funded through debt financing. Debt service for the financing of this project will be funded by the General Fund.
- **A.K. Smiley Public Library HVAC Cooling Tower Replacement:** The Proposed CIP Budget includes funding for design and replacement of the Library's aging cooling tower system. This project will be funded through debt financing. Debt service for the financing of this project will be funded by the General Fund.
- **Joslyn Senior Center Roof Replacement:** Funding is included for replacing the roof of the Joslyn Senior Center as the current roof is beyond its useful life. This project will be funded by the General Fund.

Water Fund CIP
In the Water Fund, appropriations for FY 2027 and FY 2028 total roughly $42.7 and $43.2 million, respectively, with about $12 million dedicated to CIP in FY 2027 and $11.7 million dedicated in FY 2028. These projects include approximately $9 million in pipeline replacement, expansion and renovation of the Joint Utilities Laboratory, wellhead perchlorate treatment for two wells, and a filter press to dewater sludge at the Hinckley Water Treatment Plant.

Wastewater Fund CIP
In the Wastewater Fund, appropriations total approximately $65.4 and $21.4 million for FY 2027 and FY 2028, respectively, with $2.5 million in pipeline replacement to replace a combined total of roughly 4 to 5 miles of sewer pipeline. It is worth noting that the Wastewater Fund's largest planned capital project, the Wastewater Treatment Plant Capital Modifications Phase 2 project (approximately $45 million), is included in the CIP. The City has been awarded State Revolving Fund (SRF) financing for construction of this project. Debt service for the SFR loan will be funded by the Wastewater Fund.

Solid Waste Fund CIP
In the Solid Waste Fund, annual appropriations total roughly $27.3 and $27.4 million for FY 2027 and FY 2028, respectively. Included in these appropriations is approximately $4.25 million in CIP projects, including $4 million for the Phase V Landfill Cell Expansion and $250,000 for remodeling Solid Waste facilities.

Other Fund CIP

The City has also invested in capital projects for other funds, including the Paris Fund, Traffic Signals Fund, and Arterial Street Construction Fund. Capital investments for these other funds include the following: $7.5 million in FY 2027 and FY 2028 for the Paris Fund for street resurfacing; $1.9 million in FY 2027 and FY 2028 for the Traffic Signals Fund for traffic signal improvements at three intersections; and $4.9 million in FY 2027 and FY 2028 for the Arterial Street Construction Fund for street widening projects.

The CIP is divided into sections according to fund. Each fund contains a list of projects included in the six-year planning horizon, a brief description of each project, and an estimated dollar amount for each project.
