2. The County shall pay Rialto, within 60 days of the Effective Date of the Agreement, $50,000 to (a) un-encumber the land within the Combined Treatment Plant Lease Area that is subject to Rialto's agreements with LHR; and (b) satisfy all aesthetic requirements of Rialto and/or LHR (or any subsequent developer) for the Combined Treatment Plant Lease Area.

VIII. Ownership of Combined Remedies Components

A. Ownership of the components of the Regional Board Remedy by Rialto and the County is controlled by the County/Rialto Implementation Agreement.

B. Upon DDW issuance of the amendment to Rialto's DDW Permit required by this Agreement:

1. Rialto shall own (i) the conveyance pipelines connecting the Combined Treatment Plant to the Rialto municipal water supply system; and (ii) that portion of any conveyance pipeline and infrastructure, constructed by Emhart within the jurisdictional boundaries of Rialto, connecting the Rialto and Colton municipal water supply systems. By owning such components, Rialto does not assume any of Emhart's obligations under this Agreement for the costs to operate and maintain such components.

2. Colton shall own that portion of any conveyance pipeline and infrastructure, constructed by Emhart within the jurisdictional boundaries of Colton, connecting the Rialto and Colton municipal water supply systems. By owning such components, Colton does not assume any of Emhart's obligations under this Agreement for the costs to operate and maintain such components.

3. In the event the Parties agree in writing to deliver water to Colton by means other than a connection between the Rialto and Colton municipal water supply systems, that agreement shall control ownership of any pipelines, valves or other components constructed pursuant thereto.

4. All other components of the Combined Remedies installed and/or constructed by Emhart, including but not limited to extraction well EW-1, the conveyance pipeline from EW-1 to the Combined Treatment Plant, and the Combined Treatment Plant expansion components, shall be owned by Emhart.

IX. Indemnification

A. Emhart's Indemnification Obligations

1. Emhart shall indemnify, defend, and hold harmless Rialto, Colton, and the County, and their officials, agents, employees, contractors, subcontractors, and representatives from any and all Claims arising out of any negligent or wrongful acts or omissions of Emhart and its officers, agents, employees, consultants, contractors, subcontractors, and representatives in performing any activities under this Agreement.

2. Emhart shall indemnify, defend, and hold harmless Rialto and its officials, agents, employees, contractors, subcontractors, and representatives,

from any Claims against Rialto, based solely on Rialto's status as an owner of real property or its status as an operator of the Combined Treatment Plant or the Combined Capture System, arising out of the release of a hazardous substance caused by Emhart or its officers, agents, employees, consultants, contractors, subcontractors, and representatives in performing any activities under this Agreement, after the Effective Date of this Agreement, brought under any federal or state environmental law.

3. Emhart shall indemnify, defend, and hold harmless Rialto, Colton, and the County from mechanics' liens and other liens levied against property owned by Rialto, Colton, or the County for any labor or material furnished to Emhart, its agents, or contractors in connection with Emhart's performance of any activities under this Agreement. In the event any such liens are recorded, then upon written demand by Rialto, Colton, or the County, Emhart shall promptly obtain and record releases of any such liens.

4. Emhart shall indemnify, defend, and hold harmless the County, Colton, and Rialto, and their elected officials, employees, and agents, from any Claims arising out of the failure of Emhart, its agents, or contractors to comply with any federal or state prevailing wage law in performing any activities under this Agreement. For purposes of this Paragraph, Colton, Rialto, and the County are not contractors or agents of Emhart.

B. The County's Indemnification Obligations

1. The County shall indemnify, defend, and hold harmless Rialto, Colton, and Emhart, and their officials or officers, agents, employees, contractors, subcontractors, and representatives from any and all Claims arising out of any negligent or wrongful acts or omissions of the County and its officials, agents, employees, consultants, contractors, subcontractors, and representatives in performing any activities under this Agreement.

2. The County shall indemnify, defend, and hold harmless Rialto, Colton, and Emhart from mechanics' liens and other liens levied against property owned by Rialto, Colton, or Emhart for any labor or material furnished to the County, its agents, or contractors in connection with the County's performance of any activities under this Agreement. In the event any such liens are recorded, then upon written demand by Rialto, Colton, or Emhart, the County shall promptly obtain and record releases of any such liens.

3. The County shall indemnify, defend, and hold harmless Colton, Rialto, and Emhart, and their elected officials or officers, employees, and agents, from any Claims arising out of the failure of the County, its agents, or contractors to comply with any federal or state prevailing wage law in performing any activities under this Agreement. For purposes of this Paragraph, Colton, Rialto, and Emhart are not contractors or agents of the County.

4. Paragraph 11 of the County/Rialto Implementation Agreement sets forth existing defense and indemnification obligations of the County to Rialto. Nothing in this Agreement supersedes, abrogates, or modifies those obligations as to activities covered therein.

C. Rialto's Indemnification Obligations

1. Rialto shall indemnify, defend, and hold harmless Colton and Emhart and their officials or officers, agents, employees, contractors, subcontractors, and representatives from any and all Claims arising out of any negligent or wrongful acts or omissions of Rialto and its officers, agents, employees, consultants, contractors, subcontractors, and representatives in performing any activities under this Agreement.

2. Rialto shall indemnify, defend, and hold harmless the County, and its officials, agents, employees, contractors, subcontractors, and representatives, from any and all Claims arising out of any negligent or wrongful acts or omissions of Rialto and its officials, agents, employees, consultants, contractors, subcontractors, and representatives in performing any activities under this Agreement not covered by the defense and indemnity obligations in Paragraph 11 of the County/Rialto Implementation Agreement.

3. Rialto shall indemnify, defend, and hold harmless Colton, the County, and Emhart from mechanics' liens and other liens levied against property owned by Colton, the County, or Emhart for any labor or material furnished to Rialto, its agents, or contractors in connection with the Rialto's performance of any activities under this Agreement. In the event any such liens are recorded, then upon written demand by Colton, the County, or Emhart, Rialto shall promptly obtain and record releases of any such liens.

4. Rialto shall indemnify, defend, and hold harmless Colton, the County, and Emhart and their elected officials or officers, employees, and agents,

from any Claims arising out of the failure of Rialto, its agents, or contractors to comply with any federal or state prevailing wage law in performing any activities under this Agreement. For purposes of this Paragraph, Colton, the County, and Emhart are not contractors or agents of Rialto.

5. Paragraph 11 of the County/Rialto Implementation Agreement sets forth existing indemnification obligations of the County to Rialto. Nothing in this Agreement supersedes, abrogates, or modifies those obligations as to activities covered therein.

D. Colton's Indemnification Obligations

Colton shall indemnify, defend, and hold harmless Rialto, Emhart, and the County, and their officials, agents, employees, contractors, subcontractors, and representatives, from any and all Claims arising out of any negligent or wrongful acts or omissions of Colton and its officials, agents, employees, consultants, contractors, subcontractors, and representatives in performing any activities under this Agreement.

E. Defense of Claims

1. Any Party seeking to enforce any indemnification right or obligation under Paragraph IX (the "Indemnified Party") shall give prompt written notice of the Claim to the Party against which it seeks to enforce such rights (the "Indemnifying Party").

2. Upon receipt of such notice, the Indemnifying Party shall, within 30 days, provide written notice of its acceptance or rejection of the tendered defense. If the Indemnifying Party rejects the tendered defense, it shall provide a detailed explanation for the rejection. If the tendered defense is accepted, the Indemnifying Party shall defend the Claim.

3. The Indemnified Party shall be entitled, at its own expense, to participate in the defense of the Claim.

4. The Indemnifying Party shall obtain written approval from the Indemnified Party prior to entering into any settlement agreement regarding the Claim that imposes any obligation, duty, limitation or restriction of any kind on the Indemnified Party.

5. An Indemnified Party will not admit any liability or agree to settle or compromise any Claim without the written consent of the Indemnifying Party.

6. In the event an Indemnifying Party rejects or fails to act upon a tendered defense as provided for in Paragraph IX, the dispute shall be resolved pursuant to the Dispute Resolution provisions in Paragraph XII without any obligation to comply with any governmental tort claim procedure.

F. Released Claims

The indemnification rights and obligations of the Parties under Paragraph IX do not extend to any Claims released or the subject of a covenant not to sue in the Work Consent Decree or the County Consent Decree.

X. Insurance Requirements

A. Emhart's Insurance Obligations

Emhart shall secure insurance coverage, to the extent comparable insurance is not already in place, as follows:

1. Occurrence-based Commercial General Liability insurance coverage:

a. to be secured no later than 15 days following the Effective Date and maintained until the first anniversary of Emhart's termination of its participation in this Agreement;

b. with limits of $5,000,000 in the aggregate;

c. that includes each other Party as an additional insured (including coverage within the products-completed operations hazard);

d. under which the insurer waives any right to subrogation as to claims against each other Party; and

e. which applies on a primary and non-contributory basis.

2. Occurrence-based Automobile Liability insurance coverage:

a. to be secured no later than 15 days following the Effective Date and maintained until the first anniversary of Emhart's termination of its participation in this Agreement;

b. with a per occurrence combined single limit of $2,000,000;

c. with each other Party included as an additional insured;

d. under which the insurer waives any right to subrogation as to claims against each other Party; and

e. which applies on a primary and non-contributory basis.

3. Worker's Compensation insurance: To be secured and maintained as required by all applicable laws and regulations.

4. Occurrence-Based Contractor's Pollution Liability insurance:

a. to be secured at least 15 days prior to the commencement, by Emhart, of construction, operation, and/or maintenance activities on any portion of the Combined Remedies, and maintained until the completion of such activities; and

b. with a per-occurrence combined single limit of $1,000,000.

5. Professional Liability insurance. In the event Emhart or its agents uses professional engineering or land surveyor services in connection with the design, permitting, construction, and physical modification of the Combined Remedies, Emhart or its agents shall require the providers of such services to secure and maintain professional liability insurance with limits of $1,000,000 per claim covering negligent acts, errors, or omissions in the performance of such services. For a period of three years after the completion of its services, the professional engineering or land surveying contractor shall either maintain coverage or purchase an extended reporting period on the policy required by this Paragraph.

6. First-Party Property insurance:

a. to be secured upon EPA's Certification of Completion of Construction as provided in the Work Consent Decree and maintained until the first anniversary of the Emhart's termination of its participation in this Agreement;

b. covering equipment and facilities owned by Emhart (as set forth in Paragraph VIII) in sufficient amounts to cover replacement value of the property involved.

B. County's Insurance Obligations

The County shall secure insurance coverage, to the extent comparable insurance not already in place, as follows:

1. Occurrence-based Commercial General Liability insurance coverage:

a. to be secured no later than 15 days following the Effective Date and maintained until the first anniversary of the County's termination of its participation in this Agreement

b. with limits of $5,000,000 in the aggregate;

c. that includes each other Party as an additional insured (including coverage within the products-completed operations hazard);

d. under which the insurer waives any right to subrogation as to claims against each other Party; and

e. which applies on a primary and non-contributory basis.

2. Occurrence-based Automobile Liability insurance coverage:

a. to be secured no later than 15 days following the Effective Date and maintained until the first anniversary of the County's termination of its participation in this Agreement;

b. with a per occurrence combined single limit of $2,000,000;

c. with each other Party included as an additional insured;

d. under which the insurer waives any right to subrogation as to claims against each other Party; and

e. which applies on a primary and non-contributory basis.

3. Worker's Compensation insurance:

To be secured and maintained as required by all applicable laws and regulations.

4. Occurrence-Based Contractor's Pollution Liability insurance:

a. to be secured, in the event that the County performs construction, operation, and/or maintenance activities on any portion of the Combined Remedies, at least 15 days prior to the commencement of such activities, and maintained until the completion of such activities; and

b. with a per-occurrence combined single limit of $1,000,000.

5. Professional Liability insurance: In the event the County or its agents uses professional engineering or land surveyor services in connection with the design, permitting, construction, and physical modification of the Combined Remedies, the County or its agents shall require the providers of such services to secure and maintain professional liability insurance with limits of $1,000,000 per claim covering negligent acts, errors, or omissions in the performance of such services. For a period of three years after the completion of its services, the professional engineering or land surveying contractor shall either maintain coverage or purchase an extended reporting period on the policy required by this Paragraph.

6. First-Party Property insurance:

a. to be secured no later than 15 days following the Effective Date and maintained until the first anniversary of the County's termination of its participation in this Agreement;

b. covering equipment and facilities owned by the County (as set forth in Paragraph VIII) in sufficient amounts to cover replacement value of the property involved.

C. Rialto's Insurance Obligations

Rialto shall secure insurance coverage, to the extent comparable insurance is not already in place, as follows:

1. Occurrence-based Commercial General Liability insurance coverage:

a. to be secured, at least 15 days prior to commencement of Rialto's operation of the Combined Treatment Plant and Combined Capture System, and maintained until the first anniversary of Rialto's termination of its participation in this Agreement;

b. with limits of $5,000,000 in the aggregate;

c. that includes each other Party as an additional insured (including coverage within the products-completed operations hazard);

d. under which the insurer waives any right to subrogation as to claims against each other Party; and

e. which applies on a primary and non-contributory basis.

2. Occurrence-based Automobile Liability insurance coverage:

a. to be secured, prior to commencement of Rialto's operation of the Combined Treatment Plant and Combined Capture System, and maintained until the first anniversary of Rialto's termination of its participation in this Agreement;

b. with a per occurrence combined single limit of $2,000,000;

c. with each other Party included as an additional insured;

d. under which the insurer waives any right to subrogation as to claims against each other Party; and

e. which applies on a primary and non-contributory basis.

3. Worker's Compensation insurance: To be secured and maintained as required by all applicable laws and regulations.

4. Occurrence-Based Pollution Liability insurance:

a. to be secured, at least 15 days prior to commencement of Rialto's operation of the Combined Treatment Plant and Combined Capture System and maintained until Rialto's termination of its participation in this Agreement; and

b. with a per-occurrence combined single limit of $1,000,000.

5. Professional Liability insurance. In the event Rialto or its agents uses professional engineering, consulting or land surveyor services in connection with Rialto's operation and maintenance of the Combined Remedies, Rialto or its agents shall require the providers of such services to secure and maintain professional liability insurance with limits of $1,000,000 per claim covering negligent acts, errors, or omissions in the performance of such services. For a period of three years after the completion of its services, the professional engineering or land surveying contractor shall either maintain coverage or purchase an extended reporting period on the policy required by this Paragraph.

6. First-Party Property insurance:

a. to be secured upon EPA's Certification of Completion of Construction as provided in the Work Consent Decree and maintained until the first anniversary of the termination of this Agreement;

b. covering equipment and facilities owned by Rialto (as set forth in Paragraph VIII) in sufficient amounts to cover replacement value of the property involved.

D. Colton's Insurance Obligations

Colton shall secure insurance coverage, to the extent comparable insurance is not already in place, as follows:

1. Professional Liability insurance. In the event Colton or its agents uses professional engineering, or land surveyor services in connection with the design, permitting, construction, and physical modification of the Combined Remedies, Colton or its agents shall require the providers of such services to secure and maintain professional liability insurance with limits of $1,000,000 per

claim covering negligent acts, errors, or omissions in the performance of such services. For a period of three years after the completion of its services, the professional engineering or land surveying contractor shall either maintain coverage or purchase an extended reporting period on the policy required by this Paragraph.

2. First-Party Property insurance:

a. to be secured upon EPA's Certification of Completion of Construction as provided in the Work Consent Decree and maintained until the first anniversary of the termination of this Agreement;

b. covering equipment and facilities owned by Colton (as set forth in Paragraph VIII) in sufficient amounts to cover replacement value of the property involved.

E. General Terms Applicable to Insurance as Required by this Agreement

1. The insurance company or companies with which the Parties contract (either directly or, for governmental entities, indirectly through a joint powers authority) for insurance as required by this Paragraph X shall: (1) be legally authorized to engage in the business of furnishing insurance in the State of California; and (2) have a current A.M. Best Rating not less than "A-VIII" and "BBB" in Standard & Poor's.

2. In the event that a Party concludes the limits or terms of the coverage identified above are no longer adequate or the policies as described herein are no longer available under then-existing market conditions or, for government entities, no longer available through a joint powers insurance authority, that Party shall so notify the other Parties and the Parties shall meet and confer to discuss the need to adjust such insurance coverage requirements. In the event the Parties are unable to agree, the dispute shall be resolved pursuant to the Dispute Resolution provisions of Paragraph XII.

3. Each Party may satisfy its obligations in Paragraph X by demonstrating that any contractor or subcontractor it engages to perform the activities for which it is responsible under this Agreement maintains the appropriate types and amounts of required insurance coverage for those activities including, if required above, additional insured certificates.

4. Upon request, each Party shall provide any other Party with certificates of insurance, or other documentation, necessary to evidence the existence and maintenance of the insurance coverage required in this Agreement. The responding Party shall include information regarding deductibles and self-insurance, if any. If a Party is satisfying an insurance coverage obligation in this Agreement using (1) a self-insured retention ("SIR") of $500,000 or greater or (2) a deductible of $500,000 or greater, any other Party may request documentation that the insured Party has dedicated funds or another financial assurance that demonstrates the ability of such Party to pay such deductible or SIR. Unless agreed to in writing by the other Parties, which agreement shall not be unreasonably withheld, a Party may not satisfy an insurance coverage requirement of this Agreement solely through self-insurance without an excess insurance policy in place over the self-insurance. Disputes arising under this Paragraph shall be subject to the Dispute Resolution provisions of Paragraph XII.

XI. Record Retention

A. Emhart shall reimburse Rialto for costs it incurs for record retention relating to the Work, and the copying or production of such records to EPA as may be required from time to time under the Work Consent Decree. To the extent it incurs such costs, Rialto shall annually submit an invoice for such costs to Emhart. Emhart shall pay such invoices within 30 days of receipt.

XII. Dispute Resolution

A. Except as provided in Paragraph B, below, any dispute arising under this Agreement shall be resolved pursuant to Paragraph 86 of the Work Consent Decree, which provides:

> 86. Dispute Resolution By or Between Settling Work Defendant [Emhart], Rialto, Colton, and or the County of San Bernardino Regarding Implementation Agreements Entered Pursuant to Paragraphs 10 and 12.
>
> a. Informal Dispute Resolution. Any dispute regarding the implementation agreements entered into by and between Rialto, Colton, the County of San Bernardino, and Settling Work Defendant as provided for in Paragraphs 10 and 12 initially shall be the subject

of informal negotiations between the parties to the dispute. The period for informal negotiations shall not exceed twenty (20) Days from the time the dispute arises, unless it is modified by written agreement of the parties to the dispute. The dispute shall be considered to have arisen when one party send the other parties a written Notice of Dispute, a copy of which shall be provided to EPA, Rialto, Colton, the County of San Bernardino, the Settling Federal Agencies, and the Settling Work Defendant.

b. Resolution by this Court. If the parties are unable to resolve their dispute through informal dispute resolution, any party to the dispute may commence a proceeding in this action [the Consolidated Federal Actions] before this Court [the United States District Court for the Central District of California] by motion as provided for in the Local Rules of the Central District of California.

c. Standard for Dispute Resolution. This Court shall resolve any dispute brought before it under this Paragraph under California contract law.

B. As set forth in Paragraph IV.E.4.d, disputes regarding application of Rialto's water quality standards arising under Paragraph IV.E.4.c shall be resolved pursuant to the dispute resolution provisions set forth in Paragraph 10.2 of the County Consent Decree.

XIII. Termination

A. Duration of the Agreement

1. This Agreement will continue in effect until both the County and Emhart have terminated their participation in this Agreement under this Paragraph XIII.

2. If the County believes it has met the requirements for Closure, it shall, at least 60 days prior to seeking Regional Board approval of such Closure, provide written notice to Emhart, Rialto, and Colton of its intention to do so.

Within 30 days after such notice, the Parties shall meet and confer to discuss the steps, following the Regional Board's approval of the County's request for Closure, to be taken to effectuate the County's termination of participation in this Agreement, including, but not limited to, the requirements of Paragraph XIII.B.1 and B.2, and, as necessary, what, if any, provisions of this Agreement should continue in effect to address any ongoing post-Closure requirements (e.g., groundwater monitoring). If the Parties are unable to so agree, the dispute shall be resolved pursuant to the Dispute Resolution provisions of Paragraph XII.

3. If Emhart believes it has met the requirements for Closure, it shall, at least 60 days prior to seeking EPA approval of such Closure, provide written notice to the County, Rialto, and Colton of its intention to do so. Within 30 days after such notice, the Parties shall meet and confer to discuss the steps, following EPA's approval of Emhart's request for Closure, to be taken to effectuate Emhart's termination of participation in this Agreement, including, but not limited to, the requirements of Paragraph XIII.B.1 and B.3. and, as necessary, what, if any, provisions of this Agreement should continue in effect to address any ongoing post-Closure requirements (e.g., groundwater monitoring). If the Parties are unable to so agree, the dispute shall be resolved pursuant to the Dispute Resolution provisions of Paragraph XII.

4. If either the County or Emhart obtains approval for Closure, provided that it has notified the Parties as set forth above, all of its obligations under this Agreement shall terminate 30 days after receipt of such approval, except its obligations set forth in Paragraphs IX (Indemnification), X (Insurance) XIII.A.2. and 3. (ongoing post-closure requirements), XIII.B. (termination by either Emhart or the County), and XIII.C (termination by both Emhart and the County). Unless otherwise agreed, the meet and confer process referenced in Paragraphs XIII.A.2. and 3. shall conclude by this date.

5. Nothing in this Agreement supersedes, modifies, or abrogates the rights and obligations of the County and Emhart to each other set forth in the termination provisions of the County/Emhart Implementation Agreement.

6. As between the County and Rialto, this Paragraph XIII supersedes Paragraph 7.b of County/Rialto Implementation Agreement and Paragraph 11.b of Exhibit K of the County/Rialto Implementation Agreement.

B. Effect of Termination by Either Emhart or the County

1. **Termination by the County or Emhart:** From the date either the County or Emhart terminates its participation in this Agreement as provided in Paragraph XIII.A.3, while the other (the "Non-Terminating Party") continues to participate:

a. The Non-Terminating Party shall have the right to continue to use the Combined Remedies and any distribution piping and infrastructure constructed to allow delivery of water to Colton's municipal water supply system, as necessary; and

b. The Non-Terminating Party shall assume all rights, responsibilities, and obligations under this Agreement associated with the operation and maintenance of the Combined Remedies, including the costs to operate and maintain the Combined Remedies as provided in Paragraph IV.F.

2. **County Termination Before Emhart:** If the County terminates its participation in this Agreement before Emhart terminates its participation:

a. Disposition and/or use of components of the Combined Remedies owned by the County that are located on real property owned by Rialto shall be addressed as follows:

i. Emhart may, at its option, assume ownership of some or all of such components.

ii. To the extent Emhart does not elect to assume ownership of some or all of such components, the County shall have the right to remove such components. If the County so elects, the County shall remove at its expense such components of the Combined Remedies and restore such ground surface to pre-construction conditions.

iii. To the extent that Emhart does not elect to assume such ownership and the County does not elect to remove such components, Rialto, at its option, may elect to assume ownership of such components. Upon transfer of ownership, Rialto shall be responsible for the use, costs, operation, maintenance, and/or subsequent abandonment of all such components for which it has assumed ownership.

iv. To the extent that Emhart and Rialto do not elect to assume such ownership pursuant to Paragraphs XIII.B.2.a.i and XIII.B.2.a.iii, the County shall remove such components at the County's expense, and restore the ground surface to pre-construction conditions.

v. As part of the meet and confer pursuant to Paragraph XIII.A.1, the Parties shall discuss any transfer of ownership provided for in this Paragraph XIII.B.2, and execute any documents necessary to effectuate such transfer. Unless otherwise agreed, any removal of components and restoration shall be completed within one year of the County's termination. In connection with the removal and restoration required by this paragraph, the Parties shall cooperate in good faith to minimize the impact on the Combined Remedies and the components to be left in place.

b. Disposition and/or use of components of the Combined Remedies owned by the County that are located on real property owned by the County shall be addressed as follows:

i. Emhart may, at its option, elect to use some or all of such components. This election shall be made during the meet and confer process provided for in Paragraph XIII.A.1. The County and Emhart shall thereafter negotiate appropriate terms for access to County-owned land to permit Emhart to use such components, including standard terms for security, insurance, maintenance, repair, termination and other reasonable terms. Such access shall be provided without the need for payment of rent or other similar monetary consideration.

ii. If Emhart does not elect to use some or all of such components, the County shall have the right to use, or grant the right to use, such components at its discretion.

c. Emhart shall not succeed to the County's lease of Rialto Water Rights.

3. **Emhart Termination Before County:** If Emhart terminates its participation in this Agreement before the County terminates its participation:

a. The County may, at its option, succeed to Emhart's lease of Colton Water Rights. Such election shall be discussed as part of the meet and confer pursuant to Paragraph XIII.A.2; and

b. The County may, at its option, assume ownership of some or all of the components of the Combined Remedies owned by Emhart. To the extent the County does not elect to assume such ownership, Rialto may, at its option, elect to assume ownership of remaining components of the Combined Remedies previously owned by Emhart, and shall thereafter be responsible for the use, operation, maintenance, and/or subsequent abandonment of such components for which it has assumed ownership. To the extent neither the County nor Rialto elects to assume such ownership, Emhart shall remove such components, at its expense, and restore the ground surface to pre-construction conditions.

c. As part of the meet and confer pursuant to Paragraph XIII.A.2, the Parties shall discuss any transfer of ownership provided for in this Paragraph XIII.B.3., and execute any documents necessary to effectuate such transfer. Unless otherwise agreed, any removal of components and restoration shall be completed within one year of the Emhart's termination. In connection with the removal and restoration required by this paragraph, the Parties shall cooperate in good faith to minimize the impact on the Combined Remedies and the components to be left in place.

C. Ownership/Removal of Infrastructure Upon Termination by Both County and Emhart

1. Once both the County and Emhart have terminated their respective participation in this Agreement, the owner of any portion of the Combined Remedies (i.e., Emhart and/or the County), at its sole expense as provided in the County/Emhart Implementation Agreement and the County/Rialto Implementation Agreement, shall have the right to remove any and all components of the Combined Remedies within one year and to restore the ground surface to pre-construction conditions.

2. To the extent that the County and/or Emhart do not elect to exercise such right to remove any component of the Combined Remedies as provided in Paragraph XIII.C.1, Rialto shall either (a) require Emhart, at Emhart's sole expense, to remove any remaining component of the Combined Remedies and restore the ground surface to pre-construction conditions, or (b) elect to take possession of all such remaining components of the Combined Remedies which shall thereupon become the property of Rialto. Thereafter, Rialto shall be

responsible for the use, operation, maintenance, and/or subsequent abandonment of such components for which it has assumed ownership.

3. In removing components of the Combined Remedies, Emhart and the County shall comply with all applicable provisions of the Rialto Municipal Code.

XIV. Notice

Whenever, under the terms of this Agreement, written notice is required to be given or a document is required to be sent by one Party to another, it shall be directed to the individuals at the addresses specified below, unless those individuals or their successors give notice of a change to the other Parties in writing. All notices and submissions shall be considered effective upon receipt, unless otherwise provided.

XV. Miscellaneous Terms

A. Headings.

All paragraph headings in this Agreement are for convenience of reference only and shall have no effect on the interpretation of any paragraph or provision of this Agreement.

B. Exhibits.

All exhibits to in this Agreement are incorporated as binding parts of this Agreement unless otherwise stated in the exhibit. The documents labeled "example" in Exhibits F, H, and I are for illustration purposes only and are not binding parts of this Agreement. The notes in italic and underline format in the spreadsheets attached as parts of Exhibits H and I are for guidance only and are not intended to be binding parts of this Agreement. To the extent any notes in those spreadsheets conflict with the terms of the body of this Agreement, the terms of the body of this Agreement shall control. The formulas in those spreadsheets are intended to be binding parts of this Agreement.

C. Construction.

This Agreement shall be interpreted and construed as drafted by all Parties with equal participation in its drafting.

D. Force Majeure.

1. For purposes of this Agreement, "Force Majeure" means any event arising from causes beyond the control of a Party or its contractors that delays or prevents the performance of any obligation under this Agreement despite that Party's best efforts to fulfill the obligation or avoid the event. Force Majeure includes, but is not limited to: acts of God; fire, flood, windstorm, or earthquake; explosion, riot, or sabotage; war, terrorism, threat of terrorism, or any resulting security measures; strikes, lockouts, or other concerted work stoppages; injunctions; inability to obtain raw material, supplies, or energy; or unscheduled outages, shutdowns, or other loss of any necessary utility.

2. The Party whose performance is delayed or prevented by Force Majeure shall inform the other Parties: (1) orally as soon as possible but no later than 48 hours of learning of the possible delay; and (2) in writing no more than five working days from the commencement of the Force Majeure.

3. The Party whose performance is delayed or prevented by Force Majeure shall use best efforts to minimize the effect and duration of such Force Majeure.

4. Any delay in or failure to perform any obligation under this Agreement by a Party caused by Force Majeure shall not constitute a breach of this Agreement or give rise to any claim for damages.

E. Assumption of Certain Emhart Obligations by Black & Decker Inc.

Black & Decker Inc. agrees to assume Emhart's obligations set forth in Paragraphs IV.F, IX.A, X.A. and XIII of this Agreement in the event Emhart defaults on those responsibilities or obligations.

F. Good Faith and Fair Dealing.

The Parties shall deal with each other in good faith and fairly in all matters arising under this Agreement. The presence or absence of a specific reference to good faith in any paragraph of this Agreement does not affect the obligation of the Parties to deal with each other in good faith and fairly in all matters arising under this Agreement.

G. Governing Law.

This Agreement should be construed in accordance with the laws of the State of California.

H. Signatories.

Each signatory of this Agreement represents that s/he is authorized to execute this Agreement on behalf of the Party for which s/he executes this Agreement. Each Party represents that it has the legal authority to enter into this Agreement.

I. Multiple Counterparts.

This Agreement may be executed in counterparts, each of which shall be deemed an original.

J. Effect of this Agreement on Other Existing Agreements Among the Parties.

1. Nothing in this Agreement supersedes, abrogates, amends, or modifies the provisions of the County/Rialto Implementation Agreement, the terms of which are preserved, except as expressly set forth herein.

2. As between Rialto and the County, Rialto and the County agree that execution of this Agreement does not implicate Paragraph 10.a.vi of the County/Rialto Implementation Agreement.

3. Rialto and Colton are not parties to, nor are they bound in any way by, the County/Emhart Implementation Agreement.

4. To the extent that this Agreement conflicts with the Rialto/Emhart Cost Agreement dated October 4, 2013, this Agreement shall control.

K. Amendment.

This Agreement may be amended at any time, but only by written agreement executed by all Parties then participating in the Agreement.

Exhibit A

Procedure for Reimbursement of Rialto Consultant Costs Under Paragraph III.C.2.a

The procedure for Rialto to submit requests for reimbursement of Rialto consultant costs as provided for in Paragraph III.C.2.a incurred during the design, permitting, and construction phases of the Work, ("Reimbursement Request") shall be as follows:

1. Peter Fox and West Yost Associates Costs: No more frequently than once per quarter, Rialto shall submit its Reimbursement Request to Emhart for costs of time incurred by Peter Fox or West Yost Associates as reasonably required to provide information, evaluate information provided, or attend meetings, as needed, during the design, permitting, and construction phases of the Work, at the ordinary and customary hourly rates charged by Peter Fox and West Yost Associates to perform other such work for Rialto, and supporting documentation. The Reimbursement Request shall include:

    a. A written summary of the tasks performed, the time and costs associated with each task, and supporting documentation;

    b. Confirmation of Rialto's payment of the invoices described in Paragraph 1, above; and

    c. But, in no event, shall Rialto seek payment for (i) the cost of the first 10 hours of time incurred by Peter Fox or West Yost Associates; (ii) the next $8,057.20 of such costs beyond those addressed in Paragraph 1.c.(i); or (iii) costs resolved by the Agreement for Resolution of Emhart/Rialto Cost Issues entered on October 4, 2013, by Emhart and Rialto.

2. Within 30 days after Emhart's receipt of a Reimbursement Request, Emhart shall pay the appropriate reimbursement amount to Rialto.

Exhibit B

Anticipated Combined Remedies Operation and Maintenance Activities
San Bernardino County, California

I. Introduction

This document describes the anticipated activities for operation and maintenance of the Combined Remedies. This document is for illustration and budgeting purposes only and does not create any legal rights, obligations, responsibilities or duties, contractual or otherwise, among the Parties to the Four Party Implementation Agreement or any third party. To assist in preparation of an Annual O&M Budget for the Combined Remedies, this document will be evaluated annually and updated as necessary.

The design and operation of the Combined Remedies merge the existing Regional Board Remedy with the planned groundwater extraction well and treatment plant expansion. Emhart Industries, Inc. ("Emhart") and the County of San Bernardino (the "County") anticipate that the operation and maintenance of the Combined Remedies will achieve the remedial objectives of: (1) the Work Consent Decree, which Emhart is required to meet; and (2) the Regional Board Order, which the County is required to meet.

The activities to operate and maintain the Combined Remedies as described herein, are: (1) operation and maintenance of the Combined Capture System; (2) operation and maintenance of the Combined Treatment Plant; (3) assisting the Parties in implementation of the Water Management Plan; (4) compliance with Rialto's DDW Permit (including compliance sampling monitoring and compilation and distribution of monthly reports in accordance with the DDW permit); and (5) overall project management and oversight of all of the above.

II. Definitions

A. "Annual O&M Budget" means the budget prepared Rialto (or its third party contractor) and submitted to Emhart and the County by August 1 of each year shall for the work necessary to operate and maintain the Combined Remedies in a cost-effective manner.

B. “Combined Capture System” means the extraction wells and associated conveyance piping connected to the Combined Treatment Plant necessary for operation of the Combined Remedies. There are currently three existing extraction wells (Miro-2, Miro-3, and Rialto-3) and one planned extraction well (EW-1) that will be connected to the Combined Treatment Plant; the locations of these wells and associated piping are shown on Attachment B-1 (Locations of Combined Treatment Plant and Combined Capture System). This definition includes any additional extraction wells and associated piping that may be added in the future, as needed.

C. “Combined Remedies” means the Combined Capture System and the Combined Treatment Plant, but does not include groundwater monitoring wells.

D. “Combined Treatment Plant” means a system of groundwater treatment components, consisting of (1) the County treatment plant at CR-3, in place as of the Effective Date, constructed by the County to comply with the Regional Board Order; (2) the expansion of the County treatment plant constructed by Emhart, after the Effective Date, to comply with the Work Consent Decree (as described in detail in the final design approved by EPA on May 19, 2014); and (3) any future expansion of such treatment plant as necessary or appropriate to comply with the Work Consent Decree or the Regional Board Order.

E. “DDW” means the California State Water Resources Control Board Division of Drinking Water, formerly, the California Department of Public Health Division of Drinking Water.

F. “Parties” means the County, Rialto, Colton, and Emhart.

G. “Rialto-3” means City of Rialto Well No. 3, also referred to as “CR-3.”

H. “Rialto’s DDW Permit” means domestic water supply Permit No. 71-009 issued to Rialto by DDW on January 8, 1971, as amended by Permit Amendment No. 05-13-06PA-005 issued on May 8, 2006, Permit Amendment No. 05-13-09PA-042 issued on January 4, 2010, and as Permit No. 71-009 may be amended in the future.

I. “Water Management Plan” or “WMP” means the water management plan developed by the Parties pursuant to Paragraph VI of the Four Party Implementation Agreement.

III. Background Information

A. Site Setting

The locations of the Combined Remedies facilities are displayed in **Attachment B-1**. A Process Flow Diagram is included as **Attachment B-2**.

B. Combined Treatment Plant Operational Information

As designed, the Combined Remedies will consist of the following equipment:

- Four groundwater extraction well pumps with variable frequency drives (at extraction wells Rialto-3, Miro-2, Miro-3, and EW-1);
- 100,000-gallon steel bolted reservoir (equalization tank);
- Desander unit (for Rialto-3);
- Six bag filter units (for all influent water);
- An ultraviolet (UV) system (for Rialto-3);
- Two booster pumps – 250 horsepower (hp), 150 pounds per square inch (psi) rated at 2,250 gpm each;
- Sulfuric acid injection unit (pH adjustment) – this unit is not operational at this time and there is no requirement to resume its operation;
- Six ion exchange resin (IX) vessels;
- Eight granular activated carbon (GAC) vessels; and
- Hypochlorination injection system.

C. Untreated Groundwater Constituents of Concern

The Combined Treatment Plant is designed to remove the following constituents of concern from extracted groundwater:

- Perchlorate; and

- VOCs, including trichloroethene (TCE)

The influent stream of the Combined Treatment Plant is expected to contain VOCs and perchlorate. The influent from CR-3 may also contain coliform bacteria on an intermittent basis, which if present is treated prior to the water entering the equalization tank to protect the downstream treatment vessels.

IV. Anticipated Operation and Maintenance Activities

A. Combined Capture System

Operation of the Combined Capture System includes, but is not limited to, regulating extraction rates as directed by Emhart and the County to (1) achieve Emhart's and the County's respective remedial requirements; and (2) ensure that the volume of water extracted does not exceed the water rights leased to the County by Rialto and Colton, and to Emhart by Colton. Attachment B-3 identifies routine (daily) and non-routine (periodic) operation, maintenance, and monitoring activities.

B. Combined Treatment Plant

Operation of the Combined Treatment Plant includes, but is not limited to, those routine (daily) and non-routine (periodic) activities identified in Attachment B-3.

C. DDW Permit Compliance

Operation of the Combined Remedies shall, at all times, be in compliance with Rialto's DDW Permit (including compliance sampling monitoring and compilation and distribution of monthly reports in accordance with Rialto's DDW Permit). Compliance with Rialto's DDW Permit is anticipated to include, at a minimum, compliance monitoring and sampling at the following locations:

- The influent stream from operating extraction wells (Attachment B-2);
    - Rialto-3 – Location 1A;
    - Miro-2 – Location 1B;
    - Miro-3 – Location 1C; and

- EW-1 - Location 1D.

- The effluent point of the UV system (Attachment B-2, Location 2);
- The effluent point of each of the two lead perchlorate removal (IX) vessels (Attachment B-2, Location 4) (two sample locations);
- The effluent point of each of the first lag IX vessels (Attachment B-2, Location 5) (two sample locations);
- The effluent point of each of the second lag IX vessels (Attachment B-2, Location 6) (two sample locations);
- The midpoint between each of the four pairs of GAC vessels (Attachment B-2, Location 7) (four sample locations);
- The post-treatment effluent stream (Attachment B-2, Location 9) (two sample locations); and
- Near-field monitoring wells (as identified by Rialto to be sampled by the Operator upon issuance of the amendment to Rialto's DDW Permit).

D. Assisting in Implementation of the Water Management Plan

During operation of the Combined Remedies, the operator will attend meetings to assist in the development and documentation of the WMP as directed by the Parties and to thereafter implement the WMP.

E. Overall Management and Oversight

Operation of the Combined Remedies includes overall management and oversight of the activities described in Paragraphs IV.A through D, above.

F. Excluded Activities

The following activities are excluded from operation and maintenance of the Combined Remedies:

- Determination of extraction well pump rates required for the County and Emhart to meet their respective remedial objectives of the

Regional Board Order (for the County) and the Work Consent Decree (for Emhart) and the corresponding interaction with the Regional Board and USEPA;

- Collection of groundwater monitoring data from County-installed monitoring wells and piezometers pursuant to Paragraph IV.D.3 of the Four Party Implementation Agreement;

- Collection of groundwater monitoring data from Emhart-installed monitoring wells and piezometers that Emhart may, in the future, elect to collect itself as provided for in Paragraph IV.D.3 of the Four Party Implementation Agreement;

- Preparation of quarterly monitoring reports to the Regional Board on behalf of the County;

- Preparation of compliance reporting to USEPA on behalf of Emhart; and

- Major equipment replacement and/or capital improvements.

G. Contractor Qualifications

It is anticipated that the Combined Treatment Plant will be classified as a T3 or T4 treatment facility. The operator must be authorized by law to operate and maintain the Combined Remedies including all operator and shift operator qualification requirements set forth in Rialto's DDW Permit. The operator also must be 40-Hour HAZWOPER-trained, excluding subcontractors, and all operator personnel must possess valid drivers' licenses at the appropriate levels as necessary to perform essential job functions.

V. Attached Support Documents and Reports

The following are attached as referenced herein:

- Attachment B-1 – Locations of Combined Treatment Plant and Combined Capture System

- Attachment B-2 – Process Flow Diagram

- Attachment B-3 Combined Remedies Operation and Maintenance Activities

Exhibit E

Rialto Resolution 5248

RESOLUTION NO. 5248

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RIALTO, CALIFORNIA RECONFIRMING ITS ZERO TOLERANCE POLICY REGARDING PERCHLORATE CONTAMINATION

WHEREAS, perchlorate is a strong oxidizing agent and is used extensively in explosives, fireworks and rocket fuel; and

WHEREAS, perchlorate has been found in the environment as a result of spills, leaks, improper disposal and accidental release to soil followed by infiltration into the ground water drinking supply, food and milk; and

WHEREAS, perchlorate can disrupt the thyroid gland and its production of hormones that regulate metabolism and growth; and

WHEREAS, infants and pregnant women are particularly at risk to the health effects caused by the disruption of thyroid and growth; and

WHEREAS, exposure to perchlorate during key windows of time in the growth and development of babies could lead to health complications and intellectual limitations; and

WHEREAS, perchlorate is a clear threat to public health and the environment; zero exposure is the only strategy that truly protects public health; and perchlorate exposure affects all residents of the City of Rialto and Inland Counties; and

WHEREAS, an independent study conducted by the Press Enterprise found 13 of 18 samples of lettuce grown in Inland Counties contained levels of perchlorate two (2) to three (3) times greater than four (4) to nine (9) parts per billion found in the Colorado River; and

WHEREAS, three hundred sixty-five (365) perchlorate contaminated drinking water wells have been identified in California, eighty-two (82) of which are located in San Bernardino County, and twenty-two (22) wells have been shut down in the cites of Rialto, Fontana, Bloomington and Colton; and

WHEREAS, the chemical perchlorate (a rocket fuel ingredient used in the manufacture of military rockets, pistol flares, fireworks and munitions) has been detected in significant concentrations in the Rialto/Colton Basin; and

WHEREAS, five of the City's twenty-two water wells have been shut down due to perchlorate contamination; and

WHEREAS, The City Council has previously announced a "zero tolerance" policy towards perchlorate; and

WHEREAS, the City of Rialto wishes to follow the Regional Water Quality Control Board's orders issued regarding perchlorate contamination and cleanup;

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF RIALTO DOES HEREBY FIND, DETERMINE AND RESOLVE AS FOLLOWS:

Section 1. The recitals to this resolution are true and correct and are incorporated herein by this reference, and relied upon by the City Council in adopting this resolution.

Section 2. The City Council finds that there is significant disagreement within the scientific community regarding the long term health effects of the regular ingestion of perchlorate. Because of this disagreement, the fact that scientists on both sides appear credible, and the fact that the whole perchlorate phenomenon has come to light only within the last decade, and only as a result of improved testing technologies, the City Council has concluded that until there is substantially greater agreement within the scientific community as to what, if any, levels or amounts of perchlorate are unquestionably safe for regular human ingestion, the City of Rialto will continue with its "zero tolerance" policy for perchlorate. When standard water testing techniques show any detectible levels of perchlorate in City water wells, those wells will be shut down, and no water therefrom is to be put into the Rialto Water System unless and until those wells can be treated back down to "non-detect" levels.

Section 3. The City Council urges its state elected officials to concur in this policy and authorize Regional Water Quality Control Boards throughout this state to issue clean-up and abatement orders and water replacement orders based upon the detection of <u>any</u> perchlorate found in public drinking water supplies.

///

WHEREFORE, this Resolution is passed, approved and adopted by a four-fifth vote this 21st day of June, 2005.

GRACE VARGAS, Mayor

ATTEST:

BARBARA A. McGEE, City Clerk

APPROVED AS TO FORM:

ROBERT A. OWEN, City Attorney

(Original printed on acid-free paper)

STATE OF CALIFORNIA)
COUNTY OF SAN BERNARDINO)ss
CITY OF RIALTO)

I Barbara A. McGee, City Clerk of the City of Rialto, do hereby certify that the foregoing Resolution No. 5248 was duly passed and adopted at a regular meeting of the City Council of the City of Rialto held on the 21st day of June, 2005.

Upon motion of Councilmember Robertson, seconded by Councilmember Scott, the foregoing Resolution No. 5248 was dully passed and adopted.

Vote on the motion:

AYES: Mayor Vargas, Council Members Robertson, Hanson, Sampson & Scott

NOES: None

ABSENT: None

IN WITNESS WHEREOF, I have hereunto set my hand and the Official Seal of the City of Rialto this 20th day of July, 2005.

BARBARA A. McGEE, CITY CLERK

(Original printed on acid-free paper)

Exhibit G

Procedure for Calculating Colton's Baseline Lifting Cost

As set forth in Paragraph V of this Agreement, Colton has leased certain of its water rights in the Basin to Emhart and the County to be utilized to meet the objectives of the Combined Remedies. Colton, Emhart, and the County shall use the following procedure set forth this Exhibit G to calculate the baseline electrical costs that Colton would incur to lift an acre foot of water when operating its extraction wells in the Basin ("Colton's Baseline Lifting Cost").

The Colton Baseline Lifting Cost is used to calculate the amount Colton shall reimburse Emhart and the County for water pumped by Emhart and the County and delivered to the Colton municipal water supply system pursuant to Emhart and the County's respective leases of Colton Water Rights.

1. Within 30 days following DDW issuance of the amendment of Colton and Rialto's DDW Permits necessary for operation of the Combined Remedies, Emhart, the County, and Colton shall meet and confer to calculate Colton's Baseline Lifting Cost using the following formula: Colton's Baseline Lifting Cost = (the total electrical costs ($) incurred to lift water at Colton wells C-15 and C-17 to the surface in the three years immediately prior to the calculation) ÷ (the total volume of water pumped at C-15 and C-17 (AF) in that same three year period). Colton's Baseline Lifting Cost shall be stated in dollars per acre foot of water ($/AF).

2. If: (1) a change in groundwater levels materially impacts lifting costs in the Basin; or (2) a change in electrical energy costs materially impacts lifting costs in the Basin; Colton, the County, and Emhart shall meet and confer to re-assess whether Colton's Baseline Lifting Cost fairly and adequately represents the cost Colton would otherwise incur to lift an acre foot of water at its extraction wells in the Basin.

Exhibit H

Annual Allocation of CR-3/CTP Energy Costs and Reconciliation of Combined Remedies Energy Costs

This Exhibit H sets forth the procedures for annually (1) allocating the energy costs to operate CR-3 and the CTP ("CR-3/CTP Energy Costs"); and (2) allocating and reconciling all energy costs to operate the Combined Remedies.

Attached hereto is a compact disc (CD) containing a Microsoft Excel Workbook titled "Tables H-1 and H-2.XLSX." That file contains monthly spreadsheets for allocation of CR-3/CTP Energy Costs (Table H-1) and an annual reconciliation spreadsheet (Table H-2). To assist in the preparation of the annual allocation of CR-3/CTP Energy Costs and reconciliation of Combined Remedies energy costs, attached are paper copies of Tables H-1 and H-2 with sample inputs and Tables H-1 and H-2 displaying the spreadsheet formulas used in the file.

I. Allocation of CR-3/CTP Energy Costs (Table H-1)

CR-3/CTP Energy Costs include (1) the cost of energy used to operate the Combined Treatment Plant; and (2) the cost of energy used to extract groundwater at CR-3. Southern California Edison ("SCE") bills Rialto for CR-3/CTP Energy Costs. CR-3/CTP Energy Costs shall be allocated annually using the following procedure:

1. As the service customer on the monthly invoices from SCE for CR-3/CTP Energy Costs, Rialto shall pay those invoices, subject to reimbursement as set in Paragraph II, below.

2. To facilitate allocation of CR-3/CTP Energy Costs, the County and Emhart shall annually request that SCE perform the following energy efficiency tests:

    a. A test to determine the energy required to pump an acre foot of groundwater at CR-3 to the 100,000-gallon equalization tank at the Combined Treatment Plant which shall be reported as "EQ Tank kWh/AF";

    b. A test to determine the energy that Rialto would otherwise use, absent the Combined Remedies, to pump an acre foot of

groundwater from the groundwater table to its municipal water supply system which shall be reported as "Rialto Baseline kWh/AF". To perform this test, groundwater shall be pumped from CR-3 to the infiltration pond at the Combined Treatment Plant through conveyance piping which shall be partially closed to simulate the pressure conditions in adjacent pipelines in Rialto's domestic water supply system.

3. Following the end of the Water Year, Rialto shall prepare the initial draft of Table H-1 for each monthly invoice paid by Rialto. Table H-1 is used to allocate CR-3/CTP Energy Costs on each monthly SCE invoice for reimbursement of Rialto by the County and Emhart in accordance with Paragraph IV.F.2.d of the Agreement. Table H-1 contains the following five data entry steps:

STEP 1: Enter the EQ Tank kWh/AF value determined under Paragraph 2.a, above.

STEP 2: Enter the Rialto Baseline kWh/AF value determined under Paragraph 2.b, above.

STEP 3: Enter the metered volume of water pumped from CR-3 during the monthly billing period ("CR-3 AF").

STEP 4: Enter the energy use values from the monthly SCE invoice.

STEP 5: Based on the numbers entered in Steps 1 through 4, Table H-1 automatically calculates the allocation of CR-3/CTP Energy Costs for each monthly SCE invoice.

II. Reconciliation of Paid and Projected Combined Remedies Energy Costs (Table H-2)

1. In conjunction with the annual preparation of Table H-1, Rialto shall collect and input the data necessary to complete Table H-2. Table H-2 is used to reconcile the previous Water Year's payments for energy costs associated with operation and maintenance of the Combined Remedies, on an annual basis and set the projected quarterly payments for the next Water Year, as follows:

STEP 1: Input monthly water production for each well.

STEP 2: Input monthly delivery of water to Rialto and Colton.

STEP 3: Table H-2 automatically calculates the annualized allocation of CR-3/CTP Energy Costs among the Parties based on the data in Table H-1.

STEP 4: Input percent of pumping at CR-3, Miro-2 and Miro-3 pumped for compliance with the Work Consent Decree and delivery to Colton (to be supplied by County/Emhart).

STEP 5: Input Colton's Baseline Lifting Cost ($/AF) as determined pursuant to Exhibit G; Actual Miro-2 and Miro-3 Lifting Costs ($/AF) as provided by County; and Actual EW-1 Lifting Cost ($/AF) as provided by Emhart.

STEP 6: Input allocation between Emhart and County of Regional Board Remedy Driven Incremental Lifting Costs (CR-3)[1] as provided by County and Emhart.

STEP 7: Input Quarterly Payments made for past Water Year (i.e. the year for which energy costs are being reconciled). In the first Water Year, or any portion thereof, during which the Combined Remedies operate, the Parties shall use available information to estimate the projected quarterly payments.

2. Rialto shall circulate the draft Tables H-1 and H-2 to Emhart, County and Colton, along with the monthly energy bills used to generate the tables, for review by the Parties at the next monthly meeting.

3. The Parties shall meet and confer at the monthly meeting following distribution of the draft Tables H-1 and H-2, and review the documents. Once Tables H-1 and H-2 are finalized and agreed to by the Parties , Rialto shall circulate the approved tables to the Parties, and each Party shall use

[1] Regional Board Remedy Driven Incremental Lifting Costs (CR-3) represent the incremental costs that SCE bills Rialto for energy used to extract groundwater at CR-3 for the County to meet the remedial action objectives of the Regional Board Order. Emhart and the County allocate such costs between them pursuant to the County/Emhart Implementation Agreement.

the tables to invoice other Parties for net amounts estimated to be paid during the next Water Year in quarterly payments, as set forth in Table H-2, with the first payment reflecting a “true-up” credit or debit for the prior year per Exhibit H-2.

4. Payments shall be made quarterly on November 1, February 1, May 1, and August 1, or 60 days from receipt of an invoice for the amount due, whichever is later.

kWh for CR-3 pumping (to EQ Tank)	78,844	*EQ Tank kWh/AF (from Step 1) X CR-3 AF (from Step 3)*
CR-3 pumping as percentage of total Metered Energy	61.7%	*kWh for CR-3 pumping/Total kWh for billing period (from Step 4)*
CTP operation as percentage of total Metered Energy (CTP %)	38.3%	*1 minus CR-3 pumping percentage*

EXAMPLE

Principles for allocation of CR-3/CTP Energy Costs (non-peak, peak and kW-based charges)

The formulas in this Table H-1 are based on the following principles. To the extent that these principles conflict with the provisions of Paragraph IV.F.2.d of the Agreement, the langage of the Agreement shall control.

Non-peak kWh Usage Charges (excludes charges above mid-peak rate)		
Principle	***Allocation***	***Notes***
County/Emhart are responsible for the non-peak kWh attributable to the CTP	*CTP% (see step 5)*	*CTP% is percent of electricity used by CTP in that month (as a share of total kWh)*
Rialto is responsible for the kWh attributable to lifting CR3 Water (using the non-peak rates) to pipeline pressure	*Rialto% (see step 5)*	*Represents percent of electricity used that month (as a share of the total kWh) to lift water to the surface at CR3 to pipeline pressure*
County/Emhart are responsible for incremental lifting costs at CR3 at non-peak rates (which due to pumping into a reservoir rather than to pipeline pressure should be a credit)	*Balance (may be negative)*	*The amount of non-peak kWh charges remaining to be paid once CTP% and Rialto% are paid (non-peak charges)*
Peak kWh Usage Charges (charges above mid-peak rates)		
County/Emhart are responsbile for the peak kWh (above mid-peak rates) attributable to the CTP	*CTP% (see step 5)*	*CTP% is percent of electricity used by CTP in that month (as a share of total kWh)*
Rialto not responsible for costs above mid-peak	*Zero percent*	
County/Emhart responsible for incremental lifting costs at CR3 (due to charges above mid-peak)	*Balance of Peak kWh usage charges*	*Peak charges remaining after CTP% is paid represent peak charges of lifting water at CR3*
Charges Based on kW of equipment onsite (size of equipment at site)		
County/Emhart are responsible for electrical delivery charges for the electrical equipment associated with the CTP	*CTP% (see step 5)*	*Percent of power used by CTP is a proxy for delivery charges*
Rialto is responsible for electrical delivery charges for the CR3 pump	*Balance*	*The amount of charges based on kW of equipment onsite remaining to be paid once CTP% is paid*

Table H-2

Reconciliation of Paid and Projected Combined Remedies Energy Costs (Example)

Table H-2
Reconciliation of Paid and Projected Combined Remedies Energy Costs
(Example)

Step 1: Input monthly water production (acre feet) for each well (from Operator/Rialto water flow meter readings)

Production Well	October	November	December	January	February	March	April	May	June	July	August	September	Total (AF)	*$ Per AF*	*Total Cost of Pumping Water (by well)*	*Source of $ per AF value*	*Initial Payee*
CR-3	102	102	102	102	102	101	101	100	100	100	100	100	1212	*$101*	*$122,324*	*Exhibit H*	*Rialto*
Miro 2	0	0	0	0	0	0	0	15	15	15	15	15	75	*$105*	*$7,875*	*From County*	*County*
Miro 3	0	0	0	0	0	0	0	100	100	100	100	100	500	*$105*	*$52,500*	*From County*	*County*
EW-1	220	220	220	220	220	220	220	220	220	220	220	220	2640	*$150*	*$396,000*	*From Emhart*	*Emhart*
Total	322	322	322	322	322	321	321	435	435	435	435	435	4427				

Step 2: Input monthly water delivery (acre feet) to Rialto and Colton (from Operator/Rialto water flow meter readings)

	October	November	December	January	February	March	April	May	June	July	August	September	Total (AF)
Delivery to Rialto	56	56	56	56	56	55	55	240	240	240	240	240	1590
Delivery to Colton	266	266	266	266	266	266	266	195	195	195	195	195	2837
Total	322	322	322	322	322	321	321	435	435	435	435	435	4427

Blue Italic Text means that delivery to Cities does not match output from CTP

Step 3: Monthly allocation of CR-3 Lifting Costs and Combined Treatment Plant Energy Costs (from Exhibit H-1 output)

	October	November	December	January	February	March	April	May	June	July	August	September	Total ($)	Per AF
Rialto base lifting costs (CR-3)	$8,050	$8,050	$8,050	$8,050	$8,050	$8,050	$8,050	$8,050	$8,050	$8,050	$8,050	$8,050	$96,605	$80
Remedy-driven incremental lifting costs (CR-3)	$2,143	$2,143	$2,143	$2,143	$2,143	$2,143	$2,143	$2,143	$2,143	$2,143	$2,143	$2,143	$25,719	$21
CTP energy costs	$6,329	$6,329	$6,329	$6,329	$6,329	$6,329	$6,329	$6,329	$6,329	$6,329	$6,329	$6,329	$75,948	$17

EXAMPLE

Red value for AF cost of Incremental CR-3 means no CR-3 lifting occurred so value should be entered manually.

Step 4: Input Pumping at County Wells Required By EPA Remedy Delivered to Colton (%) (based County/Emhart IA)

CR-3	0%
Miro-2	0%
Miro-3	0%

Step 5: Input Lifing Costs ($/AF)

Lifting Cost		Notes	
Colton's Baseline Lifting Cost	$125	*Exhibit G (should not change too often)*	*This is made up for this example.*
Rialto's Baseline Lifting Cost (CR-3)	$80	*Calculated in Step 3*	*This is made up for this example.*
Actual Miro-2 Lifting Cost	$105	*County to provide annual averages.*	*Not important unless Emhart is using part of Miro wells for its remedy.*
Actual Miro-3 Lifting Cost	$105		
Actual EW-1 Lifting Cost	$150	*Emhart to provide annual averages*	*This is made up for this example.*

Step 6: Input allocation of Regional Board Remedy-Driven Icremental Lifting Costs (CR-3) (from County/Emhart IA)

County Share of Regional Board Remedy CR-3 Pumping	80%
Emhart Share of Regional Board Remedy CR-3 Pumping	20%

EXAMPLE

TABLE 1: ANNUALIZED WATER ALLOCATION										***Notes***
	EW1 (AF)	**CR-3 (AF)**	**Miro 2 (AF)**	**Miro 3 (AF)**	**Total (AF)**	**For Colton (AF)**	**Percent to Colton**	**For Rialto (AF)**	**Percent to Rialto**	
Pumping for Emhart Remedy	2640	0	0	0	2640	2640	100%	0	0%	*Colton gets all water pumped for Emhart remedy on an annual basis*
Pumping for County Remedy	0	1212	75	500	1787	197	11%	1590	89%	*Colton gets from County the delta between water delivered Colton minus what Emhart pumped that water year. Rialto gets all water not delivered to Colton.*
Total	2640	1212	75	500	4427	2837	64%	1590	36%	

TABLE 2: CALCULATION OF LIFTING COST ALLOCATION (excludes electrical from Treatment Plant, addressed separately below)									
Description	**Cash flow**	**AF**	**Base Cost**	**Total Cost**	***Cost note***	**To Rialto**	**To County**	**To Emhart**	**to Colton**
Total Emhart Remedy Pumping (delivered to Colton)	Colton pays Emhart	2640	$125	$330,000	*Colton Base Lifting Costs*			$330,000	($330,000)
Total County Remedy Pumping that was Delivered to Colton	Colton pays County	197	$125	$24,625			$24,625		($24,625)
County Remedy Pumping at CR-3 that was Delivered to Colton	County pays Rialto	134	$80	$10,650	*From Exhibit H -- Rialto Base CR-3 Lifting Costs (annual average)*	$10,650	($10,650)		
Emhart Remedy Pumping at CR-3 that was delievered to Colton	Emhart pays Rialto	0	$101	$0		$0		$0	
County Remedy Pumping at Miro 2 and Miro 3 that was delivered to Rialto	Rialto Pays County	512	$80	$40,779		($40,779)	$40,779		
County share of Regional Board Remedy-driven Incremental Lifting Costs (CR-3)	County pays Rialto	1212	$17	$20,575	*80% of Remedy-driven incremental (per County/Emhart Agreement; Exhibit H)*	$20,575	($20,575)		
Emhart Share of Regional Boad Remedy-driven Incremental Lifting Costs (CR-3)	Emhart pays Rialto	1212	$4	$5,144	*20% of Remedy-driven incremental (per County/Emhart Agreement; Exhibit H)*	$5,144		($5,144)	
Emhart Remedy Pumping at Miro 2 and Miro 3 (delivered to Colton)	Emhart to County	0	$105	$0	*Actual lifting costs at Miro 2/3 (County to provide if needed)*		$0	$0	

EXAMPLE

TABLE 3: ALLOCATION OF TREATMENT PLANT ELECTRICAL COSTS			
	Percent	Annual Amount	*Notes*
County Share of CTP Energy Costs	35%	$26,499	*Per County Emhart Allocation Agreement (County share is 80% of CR-3 flow+ 100% of Miro 2 and Miro 3) (first 2 years)*
Emhart Share of CTP Energy Costs	65%	$49,449	*Per County Emhart Allocation Agreement (Emhart share is 20% of CR-3 flow plus 100% of EW1 Share)(first 2 years)*
Total		$75,948	

TABLE 4: COMBINED REMEDY SHARE OF ELECTRICAL AT CR-3 METER (CR-3 INCREMENTAL PLUS CTP)			
	To Rialto	County Share	Emhart Share
Remedy-drive Incremental lifting at CR-3	$25,719	$20,575	$5,144
CTP energy costs	$75,948	$26,499	$49,449
Total	$101,666	$47,073	$54,593

TABLE 5: END OF YEAR WATER SUMMARY (Annual Total Based on Water and Treatment Plant Use)				
	To Rialto	**To Emhart**	**To County**	***Notes***
County Owes	$57,723	NA	NA	*County pays to Rialto its share of CTP Energy, its share of remedy-driven incremental at CR-3, and for CR-3 water delivered to Colton*
Colton Owes	NA	$330,000	$24,625	*Colton pays its base lifting costs * AF of water received (to Emhart or County)*
Rialto Owes	NA	NA	$40,779	*Rialto pays its lifting costs for water it receives from Miro 2 and Miro 3*
Emhart Owes	$54,593	NA	$0	*Emhart pays to Rialto, its share of CTP Energy, its share of remedy-driven incremental at CR-3, its share of CR-3 pumped for Emhart remedy; Emhart pays to County for Miro 2 and Miro 3 water Emhart delivers to Colton (if any)*

EXAMPLE

Step 7: Annual Energy Cost Reconciliation

	Previous Water Year Payments				Reconciliation and Estimated Next Water Year Payments			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total Previous Water Year Payments	Actual Allocated Cost	Balance Due	Estimated Quarterly Payments for Next Water Year
County to Rialto	$9,500	$9,500	$9,500	$9,500	$38,000	$16,944	($21,056)	$4,236
Colton to Emhart	$84,200	$84,200	$84,200	$84,200	$336,800	$330,000	($6,800)	$82,500
Colton to County	$4,200	$4,200	$4,200	$4,200	$16,800	$24,625	$7,825	$6,156
Emhart to Rialto	$29,000	$29,000	$29,000	$29,000	$116,000	$54,593	($61,407)	$13,648
Emhart to County	$0	$0	$0	$0	$0	$0	$0	$0
Explanatory Notes						*Use this Column to determine Annual Payments for next Water Year*	*Negative value means payee writes a check to payor. Can handle as credit on first quarterly payment*	*Current Year Actual divided by 4*

EXAMPLE

Table H-2

Reconciliation of Paid and Projected Combined Remedies Energy Costs (Excel Spreadsheet Formulas)

Table H-2
Reconciliation of Paid and Projected Combined Remedies Energy Costs
(Excel Spreadsheet Formulas)

Step 1: Input monthly water production (acre feet) for each well (from Operator/Rialto water flow meter readings)

Production Well	October	November	December	January	February	March	April	May	June	July	August	September	Total (AF)	*$ Per AF*	*Total Cost of Pumping Water (by well)*	*Source of $ per AF value*	*Initial Payee*

Water Management Plan
(Example)

EXHIBIT I - COMBINED REMEDIES ANNUAL WATER MANAGEMENT PLAN

Step 1: Input Planned Combined Remedies Output

PLANNED COMBINED REMEDIES OUTPUT									
Month	Emhart Pumping[1 2]			County Pumping[2 3]				Combined Remedies Total	
Winter Months	EW-1 (gpm)	Possible EW-2 (gpm)	Emhart Total (AF)[3]	RIALTO-3 (gpm)	Miro-2 (gpm)	Miro-3 (gpm)	County Total (AF)	(gpm)	(AF)
October	1635		220	800			108	2435	328
November	1635		220	800			108	2435	328
December	1635		220	800			108	2435	328
January	1635		220	800			108	2435	328
February	1635		220	800			108	2435	328
March	1635		220	800			108	2435	328
April	1635		220	800			108	2435	328
Summer Months									
May	1635		220	1540			207	3175	427
June	1635		220	1540			207	3175	427
July	1635		220	1540			207	3175	427
August	1635		220	1540			207	3175	427
September	1635		220	1530			206	3165	426
Annual Total			**2639**				**1788**		**4427**
Annual Average	**1635**		**220**	**1108**			**149**	**2743**	**369**
								Red Box means that treatment plant production exceeds ability to deliver water to Colton	*Red Box means that treatment plant production exceeds available water rights*

EXAMPLE

Notes

1 *Emhart pumping not to exceed "Current Rights Available to Emhart" identified below.*

2 *Emhart pumping may in the future include a portion of other extraction wells, such as Rialto-3. In that instance, table can be modified as appropriate.*

3 *County pumping not to exceed "Current Rights Available to County" identified below.*

4 *County pumping may in the future include other wells. In that instance, table can be modified as appropriate.*

5 *1 gpm = 0.134506281 Acre Feet per Month*

Step 2: Input Available Water Rights

AVAILABLE RIALTO AND COLTON WATER RIGHTS (AF)							
City	Rights per 1961 Decree	Current Required % Reduction per 1961 Decree (cannot be greater than 50%)	Current Rights Per 1961 Decree (AF)	Rialto Rights Unavailable to Rialto due to Standby Agreement	Current Rights Available to Emhart (AF) [Accounting for 200 AF agreement between Colton and County]	Current Rights Available to County (AF)	Combined Remedy Rights Available for Treatment Plant (AF)
Rialto	4366	27%	3187	1600	0	1587	1587
Colton	3900	27%	2847	NA	2647	200	2847
Total	8266		6034		2647	1787	4434

Step 3: Input Colton Monthly Minimum Needs and Maximum Capacity to Accept Water from the Combined Remedies

COLTON WATER BUDGET (AF)			
Month	Minimum Water Needs	Maximum Capacity of Colton to Accept Water	
October	115	300	*Text is red if value exceeds water delivery capacity to Colton*
November	115	300	
December	115	300	
January	115	300	
February	115	300	
March	115	300	
April	115	300	
May	196	400	
June	196	400	
July	196	400	
August	196	400	
September	196	400	
TOTAL*	1785	*Box is red if minimum water needs exceed Colton Water Rights*	

** Not to exceed Colton Water Rights*

Step 4: Input Monthly Maximum Operational Flow Rate for Delivery of Water to Rialto and Colton

	Maximum Operational Flow Rate (gpm)	Maximum Volume of Water Deliverable to Colton (AF)	Upper Limit for Delivery of Water to Colton* (AF)	
Octboer	2040	274	274	*Text is red if maximum volume of water deliverable to Colton is less than Colton minimum water needs*
November	2040	274	274	
December	2040	274	274	
January	2040	274	274	
February	2040	274	274	
March	2040	274	274	
April	2040	274	274	
May	2040	274	274	
June	2040	274	274	
July	2040	274	274	
August	2040	274	274	
September	2040	274	274	
Total	2040	3293		

** Lesser of Maximum Capacity of Colton to Accept Water (Step 3, Column C) and Maximum Volume of Water Deliverable to Colton (Step 4, Column C)*

Maximum Water Deliverable to Rialto Per Month (AF)	(gpm)	(AF)
	4000	538

EXAMPLE

Step 5: Input Rialto Month-by-Month Minimum Needs

RIALTO WATER BUDGET	
Month	**Minimum Water Needs (AF)**
October	75
November	75
December	75
January	75
February	75
March	75
April	75
May	200
June	200
July	200
August	200
September	200
Total*	1525

Box is red if minimum water needs exceed Rialto Water Rights

** Not to exceed Rialto Water Rights*

Step 6: Parties meet and confer to determine if they can agree upon maximum prioritized delivery of water to Colton in winter months (Table 1) or must revert to default water delivery schedule (Table 2)

For Table 1

Calculation of Maximum Monthly Delivery to Colton in Winter (to ensure Colton can receive its minimum needs in the summer)

Colton Water Rights	Minimum Summer Needs (sum of minimum for each summer month)	Water Rights Available in Winter Months (rights minus summer minimum needs)	Maximum Monthly Delivery to Colton in Winter to Preserve Rights for Summer (available winter rights/7)*
2847	980	1867	267

Calculation of Water Pumped for Colton for County Remedy

What County Pumped	Annual Delivery Capacity Available to County for Initial 200 AF	Rialto Water Rights	Amount Rialto can Pump from other wells (before any adjustments)	Water County Pumps for Colton Above 200 AF (per Water Year)
1788	200	1587	0	0

** Purple Box indicates value exceeds capacity tp deliver water to Colton*

Calculation of Water to Colton in the Summer Months

What Emhart Pumped (all for Colton) (AF per water year)	What County Pumped for Colton (AF per water year)	Total to Colton (AF per water year)	Total Water to Colton in Summer Months (AF)	Monthly Total to Colton in Summer Months (AF per month) (assuming Rialto rights utilized as much as possible for County Remedy)	Maximum Potential Water to Colton in Summer (assuming Colton uses all its water rights available after subtracting winter use)
2639	200	2839	1072	214	216
(From production values above)	*(From table above)*	*(Emhart delivery plus County delivery)*	*(Annual total AF to Colton minus water to Colton in winter)*	*If cell is green, delivery to Colton will be limited by delivery capacity*	*Used to calculate potential shift of water to Colton in summer to meet minimum Colton needs (which in turn allows Rialto to produce more from its other wells). Green indicates potential delivery limited by delivery capacity to Colton.*

EXAMPLE

Table 1 - Maximum Prioritized Delivery of Water to Colton in Winter Months						
Month	**Planned Combined Remedies Output (AF)**	**Planned Delivery to Rialto (AF)**	**Remaining Rialto Water Rights (AF)**	**Planned Delivery to Colton (AF)**	**Remaining Colton Water Rights (AF)**	**If Planned Delivery to Colton (Column E) is less than Colton's minimum water needs in a given month, and Colton has additional available water rights, the Parties may manually increase the Planned Delivery to Colton by inputting the amount of Colton Water Rights to be preferentially used by the County (per Paragraph VI. B. 2. a. ix.) (AF)**
Start (Total Water Rights)			1587		2847	
October	328	75	1512	253	2594	0
November	328	75	1437	253	2342	0
December	328	75	1362	253	2089	0
January	328	75	1287	253	1837	0
February	328	75	1212	253	1584	0
March	328	75	1137	253	1332	0
April	328	75	1062	253	1079	0
May	427	213	849	214	865	0
June	427	213	637	214	651	0
July	427	213	424	214	436	0
August	427	213	211	214	222	0
September	426	211	0	214	8	0
Total Water Delivered	**4427**	**1587**		**2839**		
Unused Water Rights for Water Year			**0**		**8**	0
	Box is Red if CTP produces more than capacity to deliver water to Colton.	*Red Box means CTP output does not match water provided to Rialto and Colton. Blue Box means delivery is less than minimum monthly need. Green Box means that production plus other water rights meets minimum monthly needs in summer.*	*Red Box means delivery exceeds water rights.*	*Red Box means CTP output does not match water provided to Rialto and Colton. Blue Box means delivery is less than minimum monthly need. Yellow text means that delivery to Colton limited by delivery capacity to Colton. Purple text means some CTP Output shifted to Colton from Rialto.*	*Red Box means delivery exceeds water rights*	*Red Box Means Value Causes water to Colton to exceed delivery capacity to Colton*

EXAMPLE

Under the "Maximum Prioritized Delivery" schedule:

In each Winter Month:

1 *Colton receives the lesser of (1) a value equal to 1/7th of the Colton Water Rights minus the total summer minimum water needs (2)the monthly treatment plant output minus the lesser of (Rialto minimum monthly needs and the amount pumped for the County*

2 *Rialto receives all water that is not delivered to Colton. The Colton delivery calculation ensures that Rialto receives at least its minimum needs, provided that such volume does not exceed the volume of water pumped by the County in that month*

In each Summer Month:

1 *Colton receives the lesser of (1) a value equal to 1/5th of the total to be pumped for Colton in that water year less the amount pumped in the winter months (2) the monthly maximum capacity to deliver water to Colton and (3) Colton's maximum capacity to accept water*

2 *Rialto receives all water that is not delivered to Colton.*

If remaining water rights are less than zero, County/Emhart will need to evaluate changes to production rates or alternative sources of water.

Table 2 - Default Water Delivery Schedule								
Month	**Planned Combined Remedies Output (AF)**	**Colton 200 AF Pumped for County Remedy Delivered to Colton (AF)**	**Planned Delivery to Rialto (AF)**	**Remaining Rialto Water Rights (AF)**	**Planned Delivery to Colton (AF) for Emhart**	**Planned Delivery to Colton (AF) for Combined Remedy**	**Remaining Colton Water Rights (AF)**	**Surplus Available to County to Pump for Colton (AF)**
Start (Total Water Rights)				1587			2847	
October	328	28.6	79	1508	220	248	2599	
November	328	28.6	79	1429	220	248	2350

June	427	0	207	620	220	220	668	8
July	427	0	207	413	220	220	448	8
August	427	0	207	205	220	220	228	8
September	426	0	206	0	220	220	8	8
Total Water Delivered	**4427**	**200**	**1588**		**2639**	**2839**		
Unused Water Rights for Water Year				**0**			**8**	
	Red Box indicates mismatch between CTP output and delivery to cities.	*Delivery is reduced if capacity to deliver water to Colton is not sufficient to deliver 200 AF to Colton.*	*Blue Box means delivery is less than minimum monthly need.*	*Red Box means delivery exceeds water rights.*	*Blue Box means delivery is less than minimum monthly need. Green text means that delivery to Colton limited by delivery capacity.*	*Blue Box means delivery is less than minimum monthly need. Green text means that delivery to Colton limited by delivery capacity.*	*Red Box means delivery exceeds water rights.*	

EXAMPLE

Under the "Default Delivery" schedule:

Rialto receives all water pumped by County (except for 200 AF that the County may pump for Colton and Colton receives all water pumped by Emhart plus the 200 AF that the County may pump for Colton. The Colton 200 AF from the County is divided equally among the Winter Months.

If remaining water rights are less than zero, County/Emhart will need to evaluate changes to production rates or alternative sources of water.

Step 7: Parties shall make any necessary modifications to the WMP as required by the limitations of Paragraph VI.B.2.a of the Four Party Implementation Agreement

Instructions

1. County and Emhart provide data for yellow boxes in rows 9 to 21

2. Rialto and Colton provide anticipated percent reductions for yellow boxes on rows 36 and 37

3. Colton provides its minimum needs and maximum capacity to receive water by month (yellow boxes on rows 44 to 55)

4. Colton and Rialto identify capacity values for yellow cells on rows 61 and 72, 75 (likely no change year to year)

5. Rialto provide its minimum needs by month (rows 82 to 93)

6. County and Emhart adjust anticipated treatment plant output (yellow cells on rows 9 to 21) to ensure minimum needs are met and water rights not exceeded (based on data provided by cities). Check

7. Each month, update yellow cells using actual production and delivery data (rows 9 to 21 and 82 to 93). Adjust future months as appropriate.

8. After trigger measurements reported in June, parties adjust data to reflect deliveries and pumping to date (for that water year) and curtailment. Parties make other adjustments as needed to pumping pattern to ensure pumping does not exceed water rights.

9. If Colton has extra water rights, it can request additional deliveries up to production of treatment plant, provided that Rialto is able to increase its production at other wells to accommodate a reduced

10. After trigger measurement, County can request use of additional Colton water rights (subject to delivery capacity restraints) or Colton can utilize those rights at its other wells.

11. Rialto can produce from its other wells an amount equal to its excess rights, following reporting of the curtailment, if such rights are not needed for the County Remedy.

Some things to Check:

1. Does minimum need of each city fall within its water rights?

2. Is each city getting its minimum needs met?

3. Can an adjustments to seasonal pumping fix a problem with 2?

4. If capacity to deliver water to Colton is limited, can water be wheeled to Colton in another way?

5. If production exceeds water rights, will need to reduce pumping from treatment plant unless Emhart or County can get additional water rights.

129		*Box is Red if CTP produces more than capacity to deliver water to Colton.*	*Red Box means CTP output does not match water provided to Rialto and Colton. Blue Box means delivery is less than minimum monthly need. Green Box means that production plus other water rights meets minimum monthly needs in summer.*	*Red Box means delivery exceeds water rights.*	*Red Box means CTP output does not match water provided to Rialto and Colton. Blue Box means delivery is less than minimum monthly need. Yellow text means that delivery to Colton limited by delivery capacity to Colton. Purple text means some CTP Output shifted to Colton from Rialto.*	*Red Box means delivery exceeds water rights*	*Red Box Means Value Causes water to Colton to exceed delivery capacity to Colton*	
130								
131	*Under the "Maximum Prioritized Delivery" schedule:*							
132	*In each Winter Month:*							
133	*1*	*Colton receives the lesser of (1) a value equal to 1/7th of the Colton Water Rights minus the total summer minimum water needs (2)the monthly treatment plant output minus the lesser of (Rialto minimum monthly needs and the amount pumped for the County*						
134	*2*	*Rialto receives all water that is not delivered to Colton. The Colton delivery calculation ensures that Rialto receives at least its minimum needs, provided that such volume does not exceed the volume of water pumped by the County in that month*						
135	*In each Summer Month:*							
136	*1*	*Colton receives the lesser of (1) a value equal to 1/5th of the total to be pumped for Colton in that water year less the amount pumped in the winter months (2) the monthly maximum capacity to deliver water to Colton and (3) Colton's maximum capacity to accept water*						
137	*2*	*Rialto receives all water that is not delivered to Colton.*						
138	*If remaining water rights are less than zero, County/Emhart will need to evaluate changes to production rates or alternative sources of water.*

157									
158	*Under the "Default Delivery" schedule:*								
159	*Rialto receives all water pumped by County (except for 200 AF that the County may pump for Colton and Colton receives all water pumped by Emhart plus the 200 AF that the County may pump for Colton. The Colton 200 AF from the County is divided equally among the Winter Months.*								
160	*If remaining water rights are*								
161									
162	**Step 7: Parties shall make any necessary modifications to the WMP as required by the limitations of Paragraph VI.B.2.a of the Four Party Implementation Agreement**								

	A	B	C	D	E	F
163						
164	***Instructions***					
165	*1. County and Emhart provide data for yellow boxes in rows 9 to 21*					
166	*2. Rialto and Colton provide anticipated percent reductions for yellow boxes on rows 36 and 37*					
167	*3. Colton provides its minimum needs and maximum capacity to receive water by month (yellow boxes on rows 44 to 55)*					
168	*4. Colton and Rialto identify capacity values for yellow cells on rows 61 and 72, 75 (likely no change year to year)*					
169	*5. Rialto provide its minimum needs by month (rows 82 to 93)*					
170	*6. County and Emhart adjust anticipated treatment plant output (yellow cells on rows 9 to 21) to ensure minimum needs are met and water rights not exceeded (based on data provided by cities). Check red and blue shaded cells for potential issues.*					
171	*7. Each month, update yellow cells using actual production and delivery data (rows 9 to 21 and 82 to 93). Adjust future months as appropriate.*					
172	*8. After trigger measurements reported in June, parties adjust data to reflect deliveries and pumping to date (for that water year) and curtailment. Parties make other adjustments as needed to pumping pattern to ensure pumping does not exceed water rights.*					
173	*9. If Colton has extra water rights, it can request additional deliveries up to production of treatment plant, provided that Rialto is able to increase its production at other wells to accommodate a reduced delivery schedule from the CTP (rows 103 to 114)*					
174	*10. After trigger measurement, County can request use of additional Colton water rights (subject to delivery capacity restraints) or Colton can utilize those rights at its other wells.*					
175	*11. Rialto can produce from its other wells an amount equal to its excess rights, following reporting of the curtailment, if such rights are not needed for the County Remedy.*					
176						
177						
178	***Some things to Check:***					
179	*1. Does minimum need of each city fall within its water rights?*					
180	*2. Is each city getting its minimum needs met?*					
181	*3. Can an adjustments to seasonal pumping fix a problem with 2?*					
182	*4. If capacity to deliver water to Colton is limited, can water be wheeled to Colton in another way?*					
183	*5. If production exceeds water rights, will need to reduce pumping from treatment plant unless Emhart or County can get additional water rights.*					

Exhibit J

Rialto/Emhart Real Property Lease Agreement

1. **PARTIES**:

This Lease is made by and between the City of Rialto ("Rialto") and Emhart Industries, Inc. ("Emhart").

2. PREMISES LEASED:

The premises subject to this Lease ("Premises") are:

a. Combined Treatment Plant Lease Area:

THOSE PORTIONS OF LOTS 19 AND 20 OF THE PALMER SUBDIVISION, IN THE CITY OF RIALTO, COUNTY OF SAN BERNARDINO, STATE OF CALIFORNIA, AS SHOWN ON MAP FILED IN BOOK 18, PAGE 72 OF MAPS, IN THE OFFICE OF THE RECORDER OF SAID COUNTY, WITHIN THE FOLLOWING DESCRIBED BOUNDARIES:

COMMENCING AT A POINT IN THE CENTERLINE OF LINDEN AVENUE, AS SHOWN ON PARCEL MAP NO. 427, FILED IN BOOK 4, PAGE 7, OF PARCEL MAPS, IN THE OFFICE OF THE RECORDER OF SAID COUNTY, DISTANT THEREON
NORTH 00° 02' 00" EAST 430.00 FEET FROM THE INTERSECTION OF MIRO WAY AND LINDEN AVENUE AS SHOWN ON SAID PARCEL MAP NO. 427; THENCE SOUTH 89° 58' 00" EAST 44.00 FEET TO THE NOW EXISTING EASTERLY LINE OF SAID LINDEN AVENUE AND **THE TRUE POINT OF BEGINNING** ; THENCE SOUTH 89° 58' 00" EAST 139.23 FEET; THENCE SOUTH 00° 02' 00" WEST 98.96 FEET; THENCE NORTH 89° 57' 13" EAST 60.77 FEET; THENCE SOUTH 00° 02' 00" WEST 288.83 FEET TO THE NORTHERLY LINE OF MIRO WAY AS DESCRIBED IN RESOLUTION RECORDED DECEMBER 22, 2012 AS DOCUMENT NO. 2014-0488256, OF OFFICIAL RECORDS,
RECORDS OF SAID COUNTY; THENCE SOUTH 89° 57' 49" WEST ALONG SAID NORTHERLY LINE 183.98 FEET TO AN ANGLE POINT THEREON; THENCE CONTINUING ALONG SAID NORTHERLY LINE NORTH 42° 15' 49" WEST 23.80 FEET TO A LINE THAT BEARS NORTH 00° 02' 00" EAST AND PASSES THROUGH THE TRUE POINT OF

BEGINNING; THENCE NORTH 00° 02’ 00” EAST 370.32 FEET TO THE TRUE POINT OF BEGINNING.

The Combined Treatment Plant Lease Area is depicted on Exhibit J 1.

b. EW-1 Lease Area

THAT PORTION OF THE SOUTHEAST QUARTER OF SECTION 34, TOWNSHIP 1 NORTH, RANGE 5 WEST, SAN BERNARDINO BASE AND MERIDIAN, IN THE CITY OF RIALTO, COUNTY OF SAN BERNARDINO, STATE OF CALIFORNIA WITHIN THE FOLLOWING DESCRIBED BOUNDARIES:

COMMENCING AT THE CENTER OF SAID SECTION 34 AS SHOWN ON PARCEL MAP NO. 5020 FILED IN BOOK 47, PAGES 74 THROUGH 76, INCLUSIVE, OF PARCEL MAPS IN THE OFFICE OF THE RECORDER OF SAID COUNTY; THENCE NORTH 89° 55’ 30” EAST ALONG THE NORTHERLY LINE OF SAID SOUTHEAST QUARTER 53.54 FEET; THENCE SOUTH 00° 03’ 40” EAST PARALLEL TO THE EASTERLY BOUNDARY OF SAID PARCEL MAP NO. 5020 A DISTANCE OF 22.60 FEET TO THE **TRUE POINT OF BEGINNING** ; THENCE SOUTH 00° 03’ 40” EAST 49.00 FEET; THENCE SOUTH 89° 56’ 20” WEST 29.50 FEET; THENCE NORTH 01°41’ 32” EAST 49.02 FEET TO A LINE HAVING A BEARING OF NORTH 89° 56’ 20” EAST AND THAT PASSES THROUGH THE TRUE POINT OF BEGINNING; THENCE NORTH 89° 56’ 20” EAST ALONG SAID LINE 28.00 FEET TO THE TRUE POINT OF BEGINNING.

The EW-1 Lease Area is depicted on Exhibit J-2.

c. EW-2 Lease Area

As of the date upon which this Lease was entered, it was unknown whether U.S. EPA would require Emhart to install EW-2 to achieve the remedial objectives set forth in the Work Consent Decree. In the event EW-2 is to be installed on Rialto property, this Lease shall be amended to include a description of the parcel(s) upon written agreement of Rialto and Emhart, in accordance with Paragraph 10.b.1) of the Work Consent Decree and Paragraph VII.B of the Four Party Implementation Agreement.

3. **TERM OF LEASE**: This Lease shall remain in effect until one year after Emhart terminates its participation in the Four Party Implementation Agreement, or after it removes components of the Combined Remedies for which it is responsible (if any) and restores the ground surface as provided for in Paragraph XIII of the Four Party Implementation Agreement, whichever occurs first.

4. **IMPROVEMENTS**: Emhart shall place on the Premises only those improvements required by the Work Consent Decree (which currently include, as described in the Four Party Implementation Agreement, the Combined Treatment Plant; EW-1; and, if required, EW-2). In the event that Rialto and/or Lewis-Hillwood Rialto Company, LLC ("LHR") underground utilities providing services to the Combined Treatment Plant Lease Area, Emhart and the County (as provided in its lease for the Combined Treatment Plant Lease Area) shall, at no cost to Rialto, underground all associated utilities located on or at the Combined Treatment Plant Lease Area.

   Ownership of improvements by Emhart on the Premises and removal of such improvements upon termination of this Lease shall be governed by Paragraphs VIII.B.3. (ownership by Emhart) and XIII B. and C. (removal) of the Four Party Implementation Agreement.

5. **COMPLIANCE WITH APPLICABLE LAWS:** Emhart shall perform all of its activities on the Premises in compliance with applicable federal, state, or local rules, regulations, ordinances, or laws. In the event that Emhart's activities violate applicable federal, state, or local rules, regulations, ordinances, or law, Emhart shall promptly, upon written notice from Rialto, come into compliance with such law, including the removal or modification of any installation to conform with the applicable laws.

6. ENVIRONMENTAL MATTERS:

6.1 Definition of Hazardous Substance. For the purposes of this Lease, the term "Hazardous Substance" shall mean any material or substance which is or becomes (i) defined as a "hazardous waste," "extremely hazardous waste," or "restricted hazardous waste" under Section 25115, 25117 or 25122.7, or listed pursuant to Section 25140 of the California Health and Safety Code, Division 20, Chapter 6.5 (Hazardous Waste Control

Law), (ii) defined as a "hazardous substance" under Section 25316 of the California Health and Safety Code, Division 20, Chapter 6.8 (Carpenter-Presley-Tanner Hazardous Substance Account Act), (iii) defined as a "hazardous material" under Section 25501 of the California Health and Safety Code, Division 20, Chapter 6.95 (Hazardous Materials Release Response Plans and Inventory), (iv) defined as a "hazardous substance" under Section 25281 of the California Health and Safety Code, Division 20, Chapter 6.7 (Underground Storage of Hazardous Substances), (v) petroleum, (vi) friable asbestos, (vii) polychlorinated byphenyls, (viii) defined as a "hazardous substance" pursuant to Section 311 of the Clean Water Act (33 U.S.C. §1321), (ix) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. §6901 et seq. (42 U.S.C. §6903), or (x) defined as a "hazardous substance" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. §9601 et seq. (42 U.S.C § 9601).

6.2 Hazardous Substances on Premises. Emhart shall not permit or authorize at any time the presence, use, manufacture, handling, generation, storage, treatment, discharge, release, burial or disposal of any Hazardous Substance on, under or about the Premises, or authorize the transportation of any Hazardous Substance to or from the Premises, except those Hazardous Substances associated with the construction, operation, maintenance, and/or future modification of the Combined Remedies in accordance with all federal, state, and local environmental laws and regulations with respect to the storage, use, generation, transportation, handling, and disposal of Hazardous Substances on the Premises. In the event Emhart causes a release of any Hazardous Substance on the Premises, Emhart shall assume responsibility for investigation, and cleanup of such substances as provided by law. In such event, Emhart shall promptly notify Rialto of the release and provide copies of any reports or correspondence with government agencies relating thereto.

7. **USE:** Emhart shall use the Premises for installation, construction, operation, and maintenance of the Combined Remedies as set forth in the Four Party Implementation Agreement. Emhart shall maintain the Premises in a neat and orderly condition. During construction of the Combined

Remedies, Emhart shall, as is reasonably feasible, maintain the Premises in a neat and orderly condition.

8. **ASSIGNMENT AND SUBLETTING:** Emhart may not assign or sublease the Premises without the written consent of Rialto, which consent may be withheld in the sole and absolute subjective discretion of Rialto.

9. **THIRD PARTY ACCESS:** Except as required for the installation, construction, operation and maintenance of the Combined Remedies as provided for in the Four Party Implementation Agreement, Emhart shall not allow any third party (excluding the County) access to the Premises, without Rialto's prior written consent.

10. **REPAIRS**: Emhart must repair any damage to the Premises caused by its acts, omissions, negligence, or willful misconduct.

11. **RIALTO'S ACCESS TO PREMISES:** Rialto and its authorized representatives shall have the right to enter the Premises at any time for any purpose.

12. **RETURN OF PREMISES TO PRE-CONSTRUCTION CONDITIONS:** Emhart shall remove components of the Combined Remedies owned by Emhart and return the Premises to pre-construction conditions as provided in Paragraph XIII.C of the Four Party Implementation Agreement.

13. **RENT:** Rialto shall not charge Emhart rent for the Premises.

14. **AMENDMENTS:** This Lease may be amended only by written agreement of Emhart and Rialto.

15. **WARRANTY OF TITLE:** Rialto warrants that there are no encumbrances of record or not of record concerning the Premises that will inhibit Emhart's use of the Premises as provided in this Lease.

16. **CONDITION OF PREMISES:** Prior to execution of this Lease, Emhart has not conducted any investigation of the condition of the Premises and Rialto has provided no representations or warranties, express or implied, regarding the condition of the Premises.

17. **DEFINED TERMS:** Defined terms used in this Lease shall have the meanings provided in the Four Party Implementation Agreement.

18. **INTERPRETATIONS:** This Lease shall be interpreted and construed (1) in accordance with the laws of the State of California; and (2) as drafted by all Parties with equal participation in its drafting.

19. **EXHIBITS:** All exhibits referred to are attached to this Lease and incorporated by reference.

20. **EFFECTIVE DATE OF THIS LEASE:** This lease shall be effective upon _____, 2015.

First Amendment to Four Party Implementation Agreement
(Regarding Costs of Construction, Operation, and Maintenance of Liquid Chlorinator)

This agreement amends the Four Party Implementation Agreement made and entered into effective September 1, 2015, by and between Emhart, Rialto, Colton, and the County ("4-Party IA") to provide terms not addressed in the 4-Party IA regarding the costs of construction, operation, and maintenance of a liquid chlorinator to be used to disinfect extracted groundwater after treatment for perchlorate and VOCs by the Combined Treatment Plant and prior to distribution as domestic water supply via the Rialto municipal water supply system. Terms defined in the 4-Party IA and used in this agreement shall have the meanings set forth in the 4-Party IA.

Recitals

Whereas, Colton's DDW Permit and Rialto's DDW Permit require disinfection of all groundwater extracted from the Basin, regardless of whether it is impacted by perchlorate and/or VOCs.

Whereas, pursuant to Rialto's DDW Permit, Rialto operates and maintains chlorination systems to disinfect all water it extracts pursuant to Rialto Water Rights, including paying all costs of operation and maintenance of its chlorinator located at CR-3.

Whereas, pursuant to Colton's DDW Permit, Colton operates and maintains chlorination systems to disinfect all water it extracts pursuant to Colton Water Rights, including paying all costs of operation and maintenance of its chlorinator located at the Domecq Reservoir Site.

Whereas, to facilitate operation of the Combined Remedies, Colton and Rialto have leased their respective water rights in the Basin to Emhart and the County as described in Paragraph V of the 4-Party IA.

Whereas, as set forth in the 4-Party IA, upon startup, the Combined Remedies will pump water from the Basin, treat that water at the Combined Treatment Plant to remove perchlorate and VOCs, and deliver the treated water to Rialto.

Whereas, as set forth in the 4-Party IA, Rialto will receive all water treated by the Combined Treatment Plant, and deliver to Colton a volume of water equivalent to the Colton Water Rights utilized by the County and Emhart at the Combined Treatment Plant.

Whereas, the Work Consent Decree, 4-Party IA, County/Rialto Implementation Agreement, and County/Colton/Rialto Standby Agreement do not address payment of the costs to operate and maintain the chlorination systems required by DDW for all water extracted from the Basin.

Whereas, the Parties believe that replacing the existing tablet chlorinator at CR-3 with a single liquid (sodium hypochlorite) chlorinator to disinfect all treated water to be generated by the Combined Treatment Plant ("Liquid Chlorinator") would be more efficient and less expensive to operate and maintain.

Agreement

Now, therefore, the Parties agree to amend the 4-Party IA as follows:

1. **Design and Construction of the Liquid Chlorinator**

    a. Emhart has designed the Liquid Chlorinator in accordance with Rialto's requested design parameters and submitted the design to Rialto, Colton, and the County for review and comment. Rialto has approved the design for the Liquid Chlorinator. A copy of the approved Liquid Chlorinator design is attached hereto as Exhibit 1-A.

    b. Emhart shall construct the Liquid Chlorinator consistent with the approved design.

    c. The estimated capital cost of the Liquid Chlorinator is $652,988, which consists of (i) the construction contractor bid price of $499,000; (ii) estimated contingency and contractor integration costs of $25,000; (iii) pre-purchased long-lead chlorinator equipment costs of $78,258; and (iv) design costs of $50,730.

    d. Except as set forth in this paragraph, Rialto, Colton, and Emhart shall share equally (1/3 each) the final total capital cost of the Liquid Chlorinator, including, but not limited to, the costs identified in paragraph 1.c. and any change order amounts necessary to address

issues not anticipated by the design or that otherwise may arise during construction. Notwithstanding any other provision(s) in this paragraph or agreement, Colton's share of the final total capital cost of the Liquid Chlorinator shall not exceed $218,000. The County is not responsible for paying any of the capital or related costs of the Liquid Chlorinator.

e. Emhart shall pay its contractors and subcontractors to construct the Liquid Chlorinator. Within 30 days of completion of construction of the Liquid Chlorinator, Emhart shall submit invoices to Rialto and Colton for their 1/3 shares of the capital cost of the Liquid Chlorinator. Rialto shall pay its 1/3 share in the form of offsets against amounts due to Rialto from Emhart pursuant to Paragraph IV.F. of the 4-Party IA, until the full amount of Rialto's share of the Liquid Chlorinator capital cost has been paid. Colton shall pay its share in equal quarterly installments to be paid along with Colton's payments to Emhart for Colton Baseline Lifting Costs, over a period not to exceed five years.

f. Any dispute regarding an invoice for Liquid Chlorinator capital costs shall be resolved pursuant to Paragraph XII of the 4-Party IA.

2. **Operation and Maintenance of the Liquid Chlorinator**

a. Rialto, as the owner of its municipal water supply system, shall own, operate, and maintain the Liquid Chlorinator.

b. Colton shall reimburse Rialto for the costs of operation and maintenance of the Liquid Chlorinator pursuant to the following formula:

> Colton reimbursement to Rialto = total cost of Liquid Chlorinator O&M x (volume of water delivered to Colton by Rialto/total volume of water delivered to Rialto from Combined Treatment Plant)

c. Rialto shall invoice Colton for its share of Liquid Chlorinator operation and maintenance costs monthly. Upon request by Colton, Rialto shall provide records documenting the volume of water

treated at the Liquid Chlorinator, the operation and maintenance costs of the Liquid Chlorinator and any other documents necessary to determine or verify the amounts invoiced.

d. Colton shall pay the invoiced amount within 30 days of receipt of an invoice from Rialto.

e. Neither the County nor Emhart are responsible for the costs of operation and maintenance of the Liquid Chlorinator.

f. Any dispute regarding an invoice for Liquid Chlorinator operation and maintenance costs shall be resolved pursuant to Paragraph XII of the 4-Party IA.

GENERAL NOTES

1. THE CHLORINATION SYSTEM SHALL BE CONSTRUCTED IN ACCORDANCE WITH THESE PLANS AND SPECIFICATIONS, CURRENT CITY OF RIALTO STANDARDS, AND THE "STANDARD SPECIFICATIONS FOR PUBLIC WORKS CONSTRUCTION" LATEST EDITION. ALL WORK SHALL BE SUBJECT TO THE INSPECTOR'S ACCEPTANCE AS A CONDITION OF COMPLETION OF WORK BY THE CONTRACTOR. IN ADDITION, ALL TRENCH BACKFILL, A.C. PAVING, AND CONCRETE REPLACEMENT SHALL BE SUBJECT TO THE ENGINEER'S ACCEPTANCE AS A CONDITION OF COMPLETION OF WORK BY THE CONTRACTOR.
2. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MAKING HIMSELF FAMILIAR WITH ALL UNDERGROUND UTILITIES, PIPES AND STRUCTURES. THE CONTRACTOR SHALL VERIFY SITE CONDITIONS AND MAKE NECESSARY POT HOLES, AND NOTIFY THE VARIOUS UTILITIES TO MAKE NECESSARY ARRANGEMENTS FOR ANY RELOCATION OF THESE UTILITIES WITH THE OWNER OF THE UTILITY. ANY DELAY OR INCONVENIENCE CAUSED BY THE CONTRACTOR IN THE RELOCATION OF VARIOUS UTILITIES SHALL BE INCIDENTAL TO THE CONTRACT, NO EXTRA COMPENSATION WILL BE ALLOWED. CONTRACTOR SHALL TAKE SOLE RESPONSIBILITY FOR COST INCURRED DUE TO DAMAGE AND REPLACEMENT OF SAID UTILITIES.
3. CONTRACTOR SHALL NOT WILLFULLY PROCEED WITH CONSTRUCTION AS DESIGNED WHEN IT IS OBVIOUS THAT UNKNOWN OBSTRUCTIONS AND/OR DISCREPANCIES EXIST THAT MAY NOT HAVE BEEN KNOWN DURING DESIGN. THE ENGINEER SHALL BE CONSULTED TO MAKE ANY/ALL REQUIRED INTERPRETATIONS OF THE PLANS, HOWEVER, THIS IN NO WAY RELIEVES THE CONTRACTOR OF HIS RESPONSIBILITY FOR CONSTRUCTING THE PROJECT TO ACCOMPLISH THE INTENT OF THE PLANS. THE CONTRACTOR SHALL ASSUME FULL RESPONSIBILITY FOR ALL NECESSARY REVISIONS DUE TO A FAILURE TO GIVE SUCH NOTIFICATION.
4. CONTRACTOR SHALL BE RESPONSIBLE FOR ANY COORDINATION WITH OTHER SUBCONTRACTORS AS REQUIRED TO ACCOMPLISH CONSTRUCTION OPERATIONS.
5. ALL CONTRACTOR AND SUBCONTRACTORS PERFORMING WORK SHOWN ON OR RELATED TO THESE PLANS SHALL CONDUCT THEIR OPERATIONS SO THAT ALL EMPLOYEES ARE PROVIDED A SAFE PLACE TO WORK AND THE PUBLIC IS PROTECTED.
6. ALL CONTRACTOR AND SUBCONTRACTORS SHALL COMPLY WITH THE "OCCUPATIONAL SAFETY AND HEALTH REGULATION" OF THE U.S. DEPARTMENT OF LABOR, AND WITH THE STATE OF CALIFORNIA DEPARTMENT OF INDUSTRIAL RELATIONS' "CONSTRUCTION SAFETY ORDERS."
7. CONTRACTOR SHALL SUBMIT "AS-BUILT" CHLORINATION SYSTEM PLANS TO THE OWNER.
8. THE CONTRACTOR MUST HAVE A VALID CLASS "A" GENERAL CONTRACTORS LICENSE.
9. CONTRACTOR SHALL OBTAIN CONSTRUCTION PERMITS FROM THE CITY OF RIALTO PRIOR TO BEGINNING ANY WORK IN THEIR PUBLIC RIGHT OF WAY.
10. THE CONTRACTOR SHALL NOTIFY RESPECTIVE CITY, PUBLIC WORKS DEPARTMENT FIVE (5) WORKING DAYS PRIOR TO BEGINNING CONSTRUCTION AND AT LEAST TWO (2) WORKING DAYS NOTICE WHEN INSPECTIONS OR ENGINEERING JUDGEMENTS BECOME NECESSARY AS SET FORTH IN THE STANDARDS.
11. ALL PERMIT WORK SHALL CONFORM TO PERMIT REQUIREMENTS AT ALL TIMES. THE PLANS, SPECIFICATIONS AND ALL NECESSARY PERMITS REQUIRED BY THE OWNER AND THE RESPECTED CITY SHALL BE ON THE JOB SITE AT ALL TIMES.
12. ALL WORK WHICH IS NOT IN THE PUBLIC RIGHT OF WAY SHALL BE DONE AT THE LEAST INCONVENIENCE TO THE PROPERTY OWNER, CONTRACTOR SHALL MINIMIZE DAMAGE TO EXISTING LANDSCAPING. ALL PRIVATE OR PUBLIC WALLS, FENCES, SOILS REMOVED FOR THE CONSTRUCTION OF THE CHLORINATION SYSTEM SHALL BE REPLACED TO MATCH EXISTING. CONTRACTOR SHALL FILL ALL TURF & LANDSCAPED AREAS TO ORIGINAL GRADE TO ORIGINAL CONDITION.
13. SHUT DOWN OF EXISTING TRANSMISSION MAINS SHALL BE LIMITED TO TWO (2) HOURS MAXIMUM, UNLESS DIRECTED OTHERWISE BY THE OWNER.
14. CONNECTIONS TO EXISTING WATER LINES SHALL BE DONE ONLY IN THE PRESENCE OF THE WATER COMPANY INSPECTOR OR ITS DESIGNATED PERSONNEL.
15. ALL PRESSURE TESTS SHALL BE APPROVED BY THE OWNER'S INSPECTOR PRIOR TO PLACEMENT OF PERMANENT RESURFACING.
16. DISCHARGE OF MATERIAL OTHER THAN STORM WATER ARE ALLOWED ONLY WHEN NECESSARY FOR PERFORMANCE AND COMPLETION OF CONSTRUCTION PRACTICES AND WHERE THEY DO NOT CAUSE OR CONTRIBUTE TO A VIOLATION OF ANY WATER QUALITY STANDARD; CAUSE OR THREATEN TO CAUSE POLLUTION, CONTAMINATION OR NUISANCE; OR CONTAIN A HAZARDOUS SUBSTANCE IN A QUANTITY REPORTABLE UNDER FEDERAL REGULATIONS 40 CFR, PARTS 117 AND 302.
17. POTENTIAL POLLUTANTS INCLUDE, BUT ARE NOT LIMITED TO: WASTES GENERATED DURING DRILLING ACTIVITIES, SOLID OR LIQUID CHEMICAL SPILLS; WASTES FROM PAINTS, STAINS, SEALANTS, GLUES, LIMES, PESTICIDES, HERBICIDES, WOOD PRESERVATIVES AND SOLVENTS; ASBESTOS FIBERS, PLANT FLAKES OR STUCCO FRAGMENTS; FUELS, OILS, LUBRICANTS AND HYDRAULIC, RADIATOR OR BATTERY FLUIDS; FERTILIZERS, VEHICLE/EQUIPMENT AND CONCRETE WASH WATER; CONCRETE, DETERGENT OR FLOATABLE FROM ANY ENGINE/EQUIPMENT STEAM CLEANING OR CHEMICAL DEGREASING; AND SUPER-CHLORINATED POTABLE WATER LINE FLUSHING.
18. DURING CONSTRUCTION, DISPOSAL OF SUCH MATERIALS SHOULD OCCUR IN A SPECIFIED AND CONTROLLED TEMPORARY AREA ON-SITE, PHYSICALLY SEPARATED FROM POTENTIAL STORM WATER RUN-OFF, WITH ULTIMATE DISPOSAL IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL REQUIREMENTS.
19. CONTRACTOR SHALL NOTIFY ENGINEER TWO WORKING DAYS IN ADVANCE OF ANY DISPOSAL ACTIVITIES.

GENERAL STRUCTURAL NOTES

THESE NOTES SHALL APPLY UNLESS SHOWN/INDICATED OTHERWISE ELSEWHERE ON THE STRUCTURAL DRAWINGS.

GENERAL

1. ALL MATERIALS AND CONSTRUCTION SHALL CONFORM TO THE 2019 CALIFORNIA BUILDING CODE (CBC), BASED UPON THE 2018 EDITION OF THE INTERNATIONAL BUILDING CODE (IBC). WHERE CONFLICTS BETWEEN BUILDING CODES AND SPECIFICATIONS OCCUR, THE MOST STRINGENT REQUIREMENTS SHALL GOVERN. ALL ASTM DESIGNATIONS REFERRED TO ON THESE DRAWINGS SHALL BE THE LATEST ADOPTED OR REVISED SPECIFICATION, AS OF THE DATE OF THESE DRAWINGS.

2. THE STRUCTURAL DRAWINGS ARE TO BE USED IN CONJUNCTION WITH CIVIL AND MECHANICAL DRAWINGS. NO PORTION OF STRUCTURAL RELATED WORK, INCLUDING SHOP DRAWING DEVELOPMENT, SHALL BE PERFORMED WITHOUT CONSIDERING REQUIREMENTS OF CONTRACT DOCUMENTS IN THEIR ENTIRETY.

3. NEITHER THE OWNER NOR THE STRUCTURAL ENGINEER WILL ENFORCE SAFETY MEASURES OR REGULATIONS. THE CONTRACTOR SHALL, AT HIS OWN EXPENSE, DESIGN, CONSTRUCT AND MAINTAIN ALL SAFETY DEVICES, INCLUDING SHORING AND BRACING AND SHALL BE SOLELY RESPONSIBLE FOR CONFORMING TO ALL LOCAL, STATE AND FEDERAL SAFETY AND HEALTH STANDARDS, LAWS AND REGULATIONS. SITE OBSERVATION VISITS BY THE STRUCTURAL ENGINEER SHALL NOT INCLUDE INSPECTION OF THE ABOVE SAFETY ITEMS. IF A LAWSUIT IS FILED BY ONE OF THE CONTRACTOR'S OR SUBCONTRACTOR'S EMPLOYEES, OR ANY ONE ELSE, THE CONTRACTOR WILL INDEMNIFY, DEFEND AND HOLD THE OWNER AND AECOM, THEIR PARENT AND SUBSIDIARY COMPANIES HARMLESS OF ANY AND ALL SUCH CLAIMS.

4. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO ENSURE THAT ALL WALLS, ETC. ARE ADEQUATELY BRACED AND SHORED DURING CONSTRUCTION. ALL BRACING/SHORING SHALL BE DESIGNED BY A REGISTERED ENGINEER HIRED BY THE CONTRACTOR. NO BACKFILL OR LOADING OF CONCRETE WALLS SHALL OCCUR UNTIL CONCRETE HAS REACHED ITS 28-DAY COMPRESSIVE STRENGTH.

5. CONTRACTOR SHALL VERIFY ALL EXISTING CONDITIONS AND DIMENSIONS BEFORE STARTING WORK. SHOULD CONDITIONS EXIST WHICH ARE CONTRARY TO THOSE SHOWN ON PLANS, THE ENGINEER SHALL BE NOTIFIED IN WRITING BEFORE PROCEEDING WITH WORK.

6. UNLESS DETAILED, SPECIFIED, OR INDICATED OTHERWISE, CONSTRUCTION SHALL BE AS INDICATED IN THE APPLICABLE TYPICAL DETAILS AND THESE GENERAL NOTES. TYPICAL DETAILS ARE MEANT TO APPLY EVEN THOUGH NOT REFERENCED AT SPECIFIC LOCATIONS ON DRAWINGS WHERE THEY OCCUR.

7. THE CONTRACT DRAWINGS AND SPECIFICATIONS REPRESENT THE FINISHED STRUCTURE. THEY DO NOT INDICATE THE MEANS AND METHODS TO ACCOMPLISH THE CONSTRUCTION. THE CONTRACTOR SHALL PROVIDE ALL MEASURES NECESSARY TO PROTECT THE STRUCTURE, WORKERS AND PEDESTRIANS DURING CONSTRUCTION. SUCH MEASURES SHALL INCLUDE, BUT NOT BE LIMITED TO BRACING, SHORING FOR LOADS DUE TO CONSTRUCTION EQUIPMENT, TEMPORARY STRUCTURES, AND PARTIALLY COMPLETED WORK, ETC. OBSERVATION VISITS TO THE SITE BY THE ENGINEER SHALL NOT BE CONSIDERED AS INSPECTION OF SUCH ITEMS.

8. DIMENSIONS SHALL TAKE PRECEDENCE OVER SCALES SHOWN ON DRAWINGS.

9. ALL WORK SHALL CONFORM TO THE PLANS AND SPECIFICATIONS IN ALL RESPECTS AND SHALL BE SUBJECT TO APPROVAL BY THE ENGINEER.

10. THE STRUCTURAL DRAWINGS SHOW ONLY THE STRUCTURAL REQUIREMENTS. REFER TO CIVIL AND MECHANICAL DRAWINGS FOR NON-STRUCTURAL ITEMS, SUCH AS:

    A. SIZE AND LOCATION OF ALL OPENINGS.
    B. SIZE AND LOCATION OF ALL CONCRETE CURBS, WALKS, FLOOR DRAINS, ETC.
    C. DIMENSIONS WHICH ARE NOT SHOWN ON STRUCTURAL DRAWINGS.

11. CONSTRUCTION MATERIALS SHALL BE EVENLY DISTRIBUTED IF PLACED ON FRAMED FLOORS OR ROOF. LOAD SHALL NOT EXCEED DESIGN LIVE LOAD FOR EACH PARTICULAR LEVEL. WHEN WEIGHT OF MATERIALS OR EQUIPMENT MAY EXCEED DESIGN LOAD, STRUCTURAL SYSTEMS SHALL BE SHORED.

12. SOIL PROPERTIES, ALLOWABLE DESIGN VALUES, GRADING AND COMPACTION REQUIREMENTS AS PER GEOTECHNICAL EXPLORATION REPORT BY LEIGHTON CONSULTING, INC, PROJECT NO. 11107.001 DATED NOVEMBER 18, 2015. THIS REPORT SHALL BE CONSIDERED A PART OF THESE PLANS AND SHALL BE KEPT AT THE JOB SITE AT ALL TIMES. A COPY OF THIS REPORT IS AVAILABLE FOR REVIEW IN THE ENGINEER'S OFFICE.

13. CONTRACTOR SHALL VERIFY LOCATION OF ALL SITE UTILITIES PRIOR TO STARTING WORK, BOTH ABOVE GROUND AND BELOW GROUND, WHICH MAY BE IMPACTED BY THE WORK SHOWN ON THESE DRAWINGS. ANY CONFLICTS SHALL BE BROUGHT TO THE ATTENTION OF THE ENGINEER.

14. ALL ITEMS SHOWN ON THESE PLANS ARE NEW UNLESS NOTED (E), EXIST. OR EXISTING.

REINFORCING STEEL

1. REINFORCEMENT FOR CONCRETE SHALL BE DEFORMED BARS CONFORMING TO ASTM SPECIFICATION A615 (A706/A706M FOR WELDED REINFORCING). GRADE 60 STEEL SHALL BE USED EXCEPT THAT #3 BARS AND SMALLER MAY BE GRADE 40 STEEL.

2. WIRE MESH SHALL CONFORM TO ASTM A1064. LAP 12" WHERE SPLICED.

3. ALL REINFORCEMENT, ANCHOR BOLTS, AND OTHER ANCHORAGES PLACED IN CONCRETE SHALL BE ACCURATELY PLACED AND POSITIVELY SECURED AND SUPPORTED BY CONCRETE BLOCKS, METAL CHAIRS, SPACERS, OR METAL HANGERS, AND SHALL BE IN POSITION BEFORE CONCRETE PLACING OR GROUTING IS BEGUN. DETAILING AND PLACING OF BARS SHALL CONFORM TO THE ACI MANUAL OF STANDARD PRACTICES.

4. BARS SPECIFIED AS "CONTINUOUS" SHALL EXTEND THE FULL LENGTH OF THE MEMBER CONTAINING THEM AND MAY BE SPLICED (UNLESS NOTED OR SHOWN WITHOUT SPLICES ON THE PLANS). IN CONCRETE, PROVIDE LAPS PER DETAIL 3 ON DRAWING S-6. STAGGER ALL SPLICES.

5. DOWELS SHALL BE PROVIDED AT ALL POUR JOINTS AND SHALL BE THE SAME SIZE AND SPACING AS REINFORCING DIRECTLY BEYOND POUR JOINTS.

6. ALL REINFORCING BAR BENDS SHALL BE MADE COLD, UNLESS OTHERWISE PERMITTED BY THE ENGINEER. REBENDING OF BARS IS NOT PERMITTED.

7. WELDING OF REINFORCING STEEL, METAL INSERTS AND CONNECTIONS IN REINFORCED CONCRETE OR MASONRY CONSTRUCTION SHALL CONFORM TO ANSI/AWS D1.4-11. USE LOW HYDROGEN E-70 SERIES ELECTRODES FOR WELDING OF REINFORCING BARS. CONTINUOUS INSPECTION IS REQUIRED OF ALL FIELD WELDING IN ACCORDANCE WITH CBC CHAPTER 17.

8. THE SPECIFIED DIMENSIONS OF THE VERTICAL LEGS OF "L" DOWELS, WHOSE HORIZONTAL LEGS ARE CAST INTO A FOOTING OR SLAB CAST ON TOP OF EARTH, ARE BASED UPON THE SLAB THICKNESS AS SHOWN ON THE DRAWINGS. IF A SLAB IS POURED THICKER THAN SHOWN ON THE DRAWINGS, SUCH AS FOR THE SUBGRADE OCCURRING AT A LOWER ELEVATION THAN SHOWN, THE VERTICAL LEGS MUST BE FABRICATED TO A LONGER LENGTH OR THE HORIZONTAL TAILS MUST BE SUPPORTED ABOVE SUBGRADE HIGH ENOUGH TO PROVIDE THE SAME AMOUNT OF LAP LENGTH BETWEEN THE DOWEL AND THE WALL VERTICAL REINFORCING.

9. CONDUIT AND PIPING SHALL BE FABRICATED AND INSTALLED SO THAT CUTTING, BENDING, OR DISPLACEMENT OF REINFORCEMENT FROM ITS SPECIFIED LOCATION WILL NOT BE REQUIRED. (REF. ACI 318-14, SECTION 26.8.2).

CONCRETE

1. AGGREGATES FOR CONCRETE SHALL CONFORM TO ASTM C33. CONCRETE f'c AT 28 DAYS SHALL BE AS NOTED BELOW. REQUIRED AVERAGE COMPRESSIVE STRENGTH (f'cr) SHALL BE IN ACCORDANCE WITH ACI 301-16, ARTICLE 4.2.3.

CONCRETE SCHEDULE

ITEMS	28 DAY COMPRESSIVE CYLINDER STRENGTH	
	2500 PSI	4000 PSI
ALL CONCRETE, U.N.O.		X
PIPE BLOCKS AND APPURTENANCES, ELECTRICAL EQUIPMENT PADS, PIPE ENCASEMENTS, DUCT BANKS		X
CURB AND GUTTER, SIDEWALKS, MISC. SITE WORK	X	

2. CEMENT FOR CONCRETE SHALL BE TYPE II PORTLAND CEMENT CONFORMING TO ASTM C150.

3. READY MIXED CONCRETE SHALL CONFORM TO ASTM C94.

4. CONCRETE COVER FOR REINFORCING BARS SHALL BE:
   CAST AGAINST AND PERMANENTLY EXPOSED TO EARTH = 3"
   EXPOSED TO EARTH OR WEATHER: = 2"

5. DRYPACK SHALL BE 1 PART CEMENT AND 3 PARTS SAND (BY VOLUME).

6. NO PIPES OR DUCTS SHALL BE PLACED IN STRUCTURAL CONCRETE UNLESS SPECIFICALLY DETAILED. SEE MECHANICAL AND/OR ELECTRICAL DRAWINGS FOR LOCATION OF SLEEVES THROUGH WALLS AND FLOORS.

7. REFER TO DRAWING DETAILS FOR ALL MOLDS, GROOVES, CLIPS, GROUNDS, ORNAMENTS AND OTHER INSERTS TO BE CAST IN CONCRETE.

8. THE LOCATION OF ALL CONSTRUCTION JOINTS NOT SPECIFICALLY NOTED OR SHOWN SHALL BE APPROVED BY THE STRUCTURAL ENGINEER.

9. "ROUGHENED SURFACES", WHERE SPECIFIED ON THE DRAWINGS, SHALL BE MECHANICALLY ROUGHENED SUCH THAT A 1/4"± AMPLITUDE IS ACHIEVED BETWEEN HIGH AND LOW SPOTS OF THE ROUGHENED SURFACE. THE SURFACE SHALL BE CLEAN AND FREE OF LAITANCE.

10. ALL SLABS SHALL HAVE A TROWEL FINISH EXCEPT AS NOTED ON THE DRAWINGS.

11. PROVIDE 3/4" CHAMFER AT ALL EXPOSED (I.E., NOT BURIED OR CONCEALED FROM VIEW OR ACCESS) CONCRETE EDGES AND CORNERS.

STEEL

1. ALL STRUCTURAL AND MISCELLANEOUS STEEL SHALL BE ASTM A36 UNLESS NOTED OTHERWISE AND SHALL BE FABRICATED IN ACCORDANCE WITH THE AISC SPECIFICATION FOR THE DESIGN, FABRICATION AND ERECTION OF STRUCTURAL STEEL FOR BUILDINGS. SPECIAL INSPECTION SHALL BE PROVIDED FOR ALL STRUCTURAL STEEL UNLESS FABRICATION IS PERFORMED ON THE PREMISES OF A FABRICATOR REGISTERED AND APPROVED TO PERFORM SUCH WORK WITHOUT SPECIAL INSPECTION, IN ACCORDANCE WITH THE PROJECT SPECIFICATIONS AND SECTION 1704.2.5.1 OF THE 2019 CBC. AT THE COMPLETION OF FABRICATION, THE APPROVED FABRICATOR SHALL SUBMIT A CERTIFICATE OF COMPLIANCE TO THE CITY BUILDING OFFICIAL AND TO THE ENGINEER STATING THAT THE WORK WAS PERFORMED IN ACCORDANCE WITH THE CONTRACT DOCUMENTS.

2. ALL WIDE FLANGE SECTIONS (W SHAPES) SHALL CONFORM TO ASTM A992, Fy = 50 KSI.

3. STEEL TUBES SHALL CONFORM TO ASTM A500, GRADE B OR BETTER, UNLESS NOTED OTHERWISE.

4. STEEL PIPES SHALL CONFORM TO ASTM A53, GRADE B.

5. BOLTS SHALL CONFORM TO ASTM A307 OR BETTER, UNLESS NOTED OTHERWISE.

6. HOLES FOR BOLTS IN STEEL SHALL BE OF SAME DIAMETER AS BOLT +1/16" MAXIMUM. CONNECTED MEMBERS SHALL BEAR ONLY UPON UNTHREADED PORTIONS OF BOLTS.

7. ALL WELDING SHALL BE SHIELDED ARC TYPE IN ACCORDANCE WITH THE PROVISIONS OF THE AMERICAN WELDING SOCIETY CODE D1.1, AND SHALL BE PERFORMED BY A CERTIFIED WELDER IN A FABRICATION SHOP REGISTERED AND APPROVED IN ACCORDANCE WITH STEEL NOTE 1 ABOVE. CONTINUOUS INSPECTION IS REQUIRED OF ALL FIELD WELDING IN ACCORDANCE WITH AISC 360, SECTION N5.4.

8. NO STRUCTURAL STEEL MEMBER SHALL BE CUT FOR PIPES, DUCTS, ETC. UNLESS SPECIFICALLY DETAILED AND APPROVED BY THE STRUCTURAL ENGINEER.

9. STAINLESS STEEL SHALL CONFORM TO ASTM A276/AISI 316. STAINLESS STEEL BOLTS AND THREADED RODS SHALL CONFORM TO ASTM F593. STAINLESS STEEL NUTS SHALL CONFORM TO ASTM F594.

10. WELDING OF STAINLESS STEEL SHALL CONFORM TO STRUCTURAL WELDING CODE - STAINLESS STEEL, ANSI/AWS D1.6-07

11. WHERE SPECIFIED, USE OF HIGH-STRENGTH BOLTS SHALL CONFORM TO THE PROVISIONS OF THE "SPECIFICATION FOR STRUCTURAL JOINTS USING ASTM A325 OR A490 BOLTS" APPROVED BY THE RESEARCH COUNCIL ON STRUCTURAL CONNECTIONS OF THE ENGINEERING FOUNDATION (RCSC). SPECIAL INSPECTION OF HIGH-STRENGTH BOLT CONNECTIONS IS REQUIRED.

12. ALL CARBON STEEL EXPOSED TO WEATHER OR DAMP/WET CONDITION SHALL BE HOT DIP GALVANIZED IN ACCORDANCE WITH ASTM A123, A153, A385 AFTER FABRICATION. REPAIR/TOUCHUP OF GALVANIZING SHALL BE IN ACCORDANCE WITH ASTM A780. ALL OTHER CARBON STEEL SHALL RECEIVE TWO COATS OF SHOP APPLIED PRIMER AND BE COATED IN ACCORDANCE WITH THE SPECIFICATIONS.

13. ANCHOR RODS SHALL CONFORM TO ASTM F1154, GRADE 36.

CONTRACTOR PROVIDED STRUCTURAL DESIGNS

CONTRACTOR SHALL PROVIDE DESIGN BY A LICENSED ENGINEER FOR EACH OF THE FOLLOWING:

1. ROOF CANOPY, CANOPY SUPPORT COLUMNS, LATERAL BRACING AND THEIR ANCHORAGES

2. CHEMICAL STORAGE TANKS

3. CHEMICAL STORAGE TANKS AND EQUIPMENT ANCHORAGE (SEE CHEMICAL STORAGE TANKS AND EQUIPMENT ANCHORAGE NOTES BELOW

CHEMICAL STORAGE TANK AND EQUIPMENT ANCHORAGE

1. ANCHORAGE FOR CHEMICAL STORAGE TANKS AND OTHER EQUIPMENT SHALL BE PROVIDED BY THE CONTRACTOR. THE CONTRACTOR SHALL SUBMIT CALCULATIONS AND SHOP DRAWINGS SIGNED AND STAMPED BY A CALIFORNIA LICENSED CIVIL OR STRUCTURAL ENGINEER PRIOR TO FABRICATION.

2. TANK ANCHORS SHALL BE ASTM F1554, GRADE 36 CAST-IN-PLACE ANCHOR BOLTS OR THREADED ROD ADHESIVE ANCHORS UNLESS NOTED OTHERWISE. ANCHORS FOR OTHER EQUIPMENT SHALL BE 316 STAINLESS STEEL CAST-IN-PLACE ANCHOR BOLTS OR THREADED ROD ADHESIVE ANCHORS, UNLESS NOTED OTHERWISE. EXPANSION ANCHORS MAY NOT BE USED FOR THE ANCHORAGE.

3. TANK AND VESSEL ANCHORS SHALL BE DESIGNED IN ACCORDANCE WITH ASCE 7-16 SECTION 15.7.5 AND ACI 318-14 CHAPTER 17. IN SEISMIC DESIGN CATEGORY C, D, E, AND F, THE ANCHOR EMBEDMENT INTO THE CONCRETE SHALL BE DESIGNED TO DEVELOP THE STEEL STRENGTH OF THE ANCHOR IN TENSION DETERMINED IN ACCORDANCE WITH ACI 318, EQ. 17.4.1.2. THE ANCHOR SHALL HAVE A MINIMUM GAUGE LENGTH OF EIGHT DIAMETERS. POST-INSTALLED ANCHORS ARE PERMITTED TO BE USED IN ACCORDANCE WITH ASCE 7-16 SECTION 15.4.9.3 PROVIDED THAT THE ANCHOR EMBEDMENT INTO THE CONCRETE IS DESIGNED TO DEVELOP THE STEEL STRENGTH OF THE ANCHOR IN TENSION. LOAD COMBINATIONS INCLUDING OVERSTRENGTH ARE NOT TO BE USED TO SIZE THE ANCHOR BOLTS FOR TANKS AND HORIZONTAL AND VERTICAL VESSELS.

ADHESIVE ANCHORS (HILTI)

1. ADHESIVE ANCHORS SHALL BE "HILTI HIT-RE 500 V3" ADHESIVE ANCHORS FOR CONCRETE AS MANUFACTURED BY HILTI, INC.

2. ANCHORS SHALL BE INSTALLED IN ACCORDANCE WITH ICC EVALUATION REPORT No. 3814 FOR CONCRETE.

3. SPECIAL INSPECTION PER CHAPTER 1704.13 OF THE CBC SHALL BE PROVIDED DURING ANCHOR INSTALLATION.

4. AN ALTERNATIVE ADHESIVE ANCHOR PRODUCT MAY BE SUBMITTED TO THE ENGINEER FOR APPROVAL, PROVIDED THAT IT HAS A CURRENT ICC EVALUATION REPORT APPROVAL.

5. ALL ABANDONED HOLES SHALL BE FILLED WITH A DRYPACK GROUT WITH A MINIMUM 28-DAY COMPRESSIVE STRENGTH OF 5,000 PSI. THE FILLED HOLE(S) SHALL BE PREPARED AND CLEANED AS REQUIRED BY THE GROUT MANUFACTURER.

6. LOCATE EXISTING REINFORCING USING A NON-DESTRUCTIVE METHOD (PACHOMETER OR OTHER), PRIOR TO DRILLING HOLES FOR ANCHORS. MAINTAIN A MINIMUM CLEARANCE OF 1" BETWEEN THE REINFORCEMENT AND THE ANCHOR.

7. CONCRETE IN WHICH ADHESIVE ANCHORS ARE INSTALLED SHALL HAVE A MINIMUM AGE OF 21 DAYS AT TIME OF ANCHOR INSTALLATION.

8. ADHESIVE ANCHORS IN MASONRY SHALL HAVE A MINIMUM EDGE DISTANCE AND BOLT SPACING OF 4 INCHES.

SPECIAL INSPECTION PROGRAM - APPLIES TO ALL TABLES

THE SPECIAL INSPECTIONS LISTED ARE IN ADDITION TO THE CALLED INSPECTIONS REQUIRED BY CBC 2019 CHAPTER 1 SECTION 110. THE SPECIAL INSPECTIONS IDENTIFIED ON PLANS ARE IN ADDITION TO, AND NOT A SUBSTITUTE FOR, THOSE INSPECTIONS REQUIRED TO BE PERFORMED BY THE GOVERNING JURISDICTION'S BUILDING INSPECTOR. THE GOVERNING JURISDICTION IS DEFINED AS THE CITY, COUNTY, OR GOVERNMENTAL UNIT THAT IS RESPONSIBLE FOR THE INSPECTIONS OF CONSTRUCTION OR WORK AS SPECIFIED IN THE CONTRACT DOCUMENTS.

SPECIAL INSPECTIONS REQUIRED FOR THIS PROJECT SHALL BE PERFORMED IN ACCORDANCE WITH CBC CHAPTER 17. SPECIAL INSPECTIONS SHALL BE PERFORMED BY AN APPROVED INSPECTION AGENCY U.N.O, EMPLOYED BY THE OWNER.

THE SPECIAL INSPECTOR SHALL BE CERTIFIED BY THE INTERNATIONAL CODE COUNCIL (ICC) TO PERFORM INSPECTION FOR THE PARTICULAR TYPE OF CONSTRUCTION OR OPERATION REQUIRING SPECIAL INSPECTION PRIOR TO THE COMPLETION OF THAT PHASE OF THE WORK.

THE SPECIAL INSPECTOR SHALL FURNISH INSPECTION REPORTS TO THE BUILDING OFFICIAL AND/OR THE ENGINEER. ALL DISCREPANCIES SHALL BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE CONTRACTOR FOR CORRECTION, THEN, IF UNCORRECTED, TO THE STRUCTURAL ENGINEER AND TO THE BUILDING OFFICIAL.

THE SPECIAL INSPECTOR SHALL SUBMIT A FINAL SIGNED REPORT STATING WHETHER THE WORK REQUIRING SPECIAL INSPECTION WAS, TO THE BEST OF THE INSPECTOR'S KNOWLEDGE, IN CONFORMANCE WITH THE APPROVED PLANS AND SPECIFICATIONS AND THE APPLICABLE WORKMANSHIP PROVISIONS OF THIS CODE.

IT SHALL BE THE CONTRACTOR'S SOLE RESPONSIBILITY TO PROVIDE AT LEAST 48 HOURS ADVANCE NOTICE TO THE OWNER/OWNER'S REPRESENTATIVE WHEN HIS WORK IS READY FOR ANY REQUIRED SPECIAL INSPECTIONS.

SHOP INSPECTION OF STEEL CONSTRUCTION IS NOT REQUIRED WHEN THE WORK IS DONE ON THE PREMISES OF A FABRICATOR REGISTERED AND APPROVED TO PERFORM SUCH WORK WITHOUT SPECIAL INSPECTION. APPROVAL SHALL BE BASED UPON REVIEW OF THE FABRICATOR'S WRITTEN PROCEDURAL AND QUALITY CONTROL MANUALS AND PERIODIC AUDITING OF FABRICATION PRACTICES BY AN APPROVED SPECIAL INSPECTION AGENCY. AT COMPLETION OF FABRICATION, THE APPROVED FABRICATOR SHALL SUBMIT A CERTIFICATE OF COMPLIANCE TO THE BUILDING OFFICIAL STATING THAT THE WORK WAS PERFORMED IN ACCORDANCE WITH THE APPROVED CONSTRUCTION DOCUMENTS.

CONTRACTOR RESPONSIBILITY

EACH CONTRACTOR RESPONSIBLE FOR THE CONSTRUCTION OF A MAIN WIND- OR SEISMIC-FORCE-RESISTING SYSTEM, DESIGNATED SEISMIC SYSTEM OR A WIND- OR SEISMIC-RESISTING COMPONENT LISTED IN THE STATEMENT OF SPECIAL INSPECTIONS SHALL SUBMIT A WRITTEN STATEMENT OF RESPONSIBILITY TO THE BUILDING OFFICIAL AND THE OWNER PRIOR TO THE COMMENCEMENT OF WORK ON THE SYSTEM OR COMPONENT. THE CONTRACTOR'S STATEMENT OF RESPONSIBILITY SHALL CONTAIN ACKNOWLEDGMENT OF AWARENESS OF THE SPECIAL REQUIREMENTS CONTAINED IN THE STATEMENT OF SPECIAL INSPECTION.

OWNER OR OWNER'S REPRESENTATIVE SHALL BE SYNONYMOUS WITH 'BUILDING OFFICIAL' IN THE FOREGOING IF THE PROJECT IS NOT UNDER THE JURISDICTION OF A BUILDING DEPARTMENT.

SPECIAL INSPECTION SHALL BE PROVIDED FOR THE FOLLOWING TYPES OF WORK PERFORMED IN THE FIELD, OR NOT PERFORMED IN AN APPROVED FABRICATION SHOP AS DEFINED ABOVE, UNLESS NOTED AS "N/A".

CONTINUOUS AND PERIODIC INSPECTIONS:

1. WHERE CONTINUOUS SPECIAL INSPECTION IS REQUIRED, THE SPECIAL INSPECTOR SHALL CONTINUOUSLY PROVIDE FULL-TIME VERIFICATION OF THE WORK.
2. WHERE PERIODIC SPECIAL INSPECTION IS REQUIRED, THE SPECIAL INSPECTOR SHALL PROVIDE VERIFICATION THAT THE PERIODIC INSPECTION WAS PERFORMED.

MAIN WIND- OR SEISMIC-FORCE RESISTING SYSTEMS, DESIGNATED SEISMIC SYSTEMS, AND SEISMIC RESISTING COMPONENTS SUBJECT TO SPECIAL INSPECTIONS:

- FOR ACTIVE MECHANICAL AND ELECTRICAL EQUIPMENT THAT MUST REMAIN OPERABLE FOLLOWING THE DESIGN EARTHQUAKE GROUND MOTION, INSPECTION/VERIFICATION THAT THE LABEL, ANCHORAGE AND MOUNTING CONFORM TO THE CERTIFICATE OF COMPLIANCE
- PERIODIC SPECIAL INSPECTION FOR INSTALLATION OF ELECTRICAL EQUIPMENT ANCHORAGE
- PERIODIC SPECIAL INSPECTION FOR INSTALLATION OF PIPING SYSTEMS AND DUCTWORK DESIGNED TO CARRY HAZARDOUS MATERIALS AND THEIR ASSOCIATED MECHANICAL UNITS

REQUIRED VERIFICATION AND INSPECTION OF SOILS:

		CONTINUOUS INSPECTION	PERIODIC INSPECTION	N/A
1.	VERIFY MATERIALS BELOW SHALLOW FOUNDATIONS ARE ADEQUATE TO ACHIEVE THE DESIGN BEARING CAPACITY.	☐	■	☐
2.	VERIFY EXCAVATIONS ARE EXTENDED TO PROPER DEPTH AND HAVE REACHED PROPER MATERIAL.	☐	■	☐
3.	PERFORM CLASSIFICATION AND TESTING OF COMPACTED FILL MATERIALS	☐	■	☐
4.	VERIFY USE OF PROPER MATERIALS, DENSITIES AND LIFT THICKNESSES DURING PLACEMENT AND COMPACTION OF COMPACTED FILL.	■	☐	☐
5.	PRIOR TO PLACEMENT OF COMPACTED FILL, OBSERVE SUBGRADE AND VERIFY THAT SITE HAS BEEN PREPARED PROPERLY.	☐	■	☐

REQUIRED SPECIAL INSPECTIONS AND TESTS OF CONCRETE CONSTRUCTION:

		CONTINUOUS INSPECTION	PERIODIC INSPECTION	N/A
1.	INSPECTION OF REINFORCING STEEL, INCLUDING PLACEMENT.	☐	■	☐
2.	INSPECTION OF REINFORCING STEEL WELDING IN ACCORDANCE WITH TABLE 1705.3	☐	☐	■
3.	INSPECT ANCHORS CAST IN CONCRETE, PRIOR TO AND DURING PLACEMENT OF CONCRETE	☐	■	☐
4.	INSPECT ANCHORS POST-INSTALLED IN HARDENED CONCRETE MEMBERS.			
	A. ADHESIVE ANCHORS INSTALLED IN HORIZONTALLY OR UPWARDLY INCLINED ORIENTATIONS TO RESIST SUSTAINED TENSION LOADS.	■	☐	☐
	B. MECHANICAL ANCHORS AND ADHESIVE ANCHORS NOT DEFINED IN 4.A.	☐	■	☐
5.	VERIFY USE OF REQUIRED DESIGN MIX.	☐	■	☐
6.	PRIOR TO CONCRETE PLACEMENT, FABRICATE SPECIMENS FOR STRENGTH TESTS, PERFORM SLUMP AND AIR CONTENT TESTS, AND DETERMINE THE TEMPERATURE OF THE CONCRETE	■	☐	☐
7.	INSPECT CONCRETE AND SHOTCRETE PLACEMENT FOR PROPER APPLICATION TECHNIQUES	■	☐	☐
8.	VERIFY MAINTENANCE OF SPECIFIED CURING TEMPERATURE AND TECHNIQUES	☐	■	☐
9.	INSPECT ERECTION OF PRECAST CONCRETE MEMBERS	☐	■	☐
10.	VERIFY OF IN-SITU CONCRETE STRENGTH, PRIOR TO REMOVAL OF SHORES AND FORMS FROM BEAMS AND STRUCTURAL SLABS.	☐	■	☐
11.	INSPECT FORMWORK FOR SHAPE, LOCATION AND DIMENSIONS OF THE CONCRETE MEMBER BEING FORMED.	☐	■	☐

LEVEL C SPECIAL INSPECTION OF MASONRY:

- VERIFY f'_m IN ACCORDANCE WITH ACI 530.1, ARTICLE 1.4B PRIOR TO CONSTRUCTION AND FOR EVERY 5,000 SQ. FT. DURING CONSTRUCTION
- VERIFY PROPORTIONS OF MATERIALS IN PREMIXED OR PREBLENDED MORTAR, AND GROUT OTHER THAN SELF-CONSOLIDATING GROUT, AS DELIVERED TO THE JOB SITE.
- VERIFY SLUMP FLOW AND VISUAL STABILITY INDEX (VSI) AS DELIVERED TO THE JOB SITE IN ACCORDANCE WITH ACI 510.1, ARTICLE 1.5B.1.b.3 FOR SELF-CONSOLIDATING GROUT.

		CONTINUOUS INSPECTION	PERIODIC INSPECTION	N/A
1.	VERIFY COMPLIANCE WITH THE APPROVED SUBMITTALS	☐	☐	■
2.	VERIFY THAT THE FOLLOWING ARE IN COMPLIANCE:			
	a. PROPORTIONS OF SITE-MIXED MORTAR AND GROUT.	☐	☐	■
	b. GRADE, TYPE, AND SIZE OF REINFORCEMENT AND ANCHOR BOLTS	☐	☐	■
	c. PLACEMENT OF MASONRY UNITS AND CONSTRUCTION OF MORTAR JOINTS	☐	☐	■
	d. PLACEMENT OF REINFORCEMENT AND CONNECTORS	☐	☐	■
	e. GROUT SPACE PRIOR TO GROUTING	☐	☐	■
	f. PLACEMENT OF GROUT	☐	☐	■
	g. SIZE AND LOCATION OF STRUCTURAL ELEMENTS	☐	☐	■
	h. TYPE, SIZE, AND LOCATION OF ANCHORS INCLUDING OTHER DETAILS OF ANCHORAGE OF MASONRY TO STRUCTURAL MEMBERS, FRAMES, OR OTHER CONSTRUCTION	☐	☐	■
	i. WELDING OF REINFORCING BARS	☐	☐	■
	j. PREPARATION, CONSTRUCTION AND PROTECTION OF MASONRY DURING COLD WEATHER (TEMPERATURE BELOW 40°F) OR HOT WEATHER (TEMPERATURE ABOVE 90°F)	☐	☐	■
3.	OBSERVE PREPARATION OF GROUT SPECIMENS, MORTAR SPECIMENS AND/OR PRISMS SHALL BE OBSERVED.	☐	☐	■

STEEL CONSTRUCTION (OTHER THAN STRUCTURAL STEEL)

		CONTINUOUS INSPECTION	PERIODIC INSPECTION	N/A
1.	MATERIAL VERIFICATION OF COLD-FORMED STEEL DECK			
	A. IDENTIFICATION MARKINGS TO CONFORM TO ASTM STANDARDS SPECIFIED IN THE APPROVED CONSTRUCTION DOCUMENTS	☐	■	☐
	B. MANUFACTURER'S CERTIFIED TEST REPORTS	☐	■	☐
2.	INSPECTION OF WELDING IN ACCORDANCE WITH AWS D1.3 AND SDI QA/QC			
	A. COLD-FORMED STEEL DECK			
	• FLOOR AND ROOF DECK WELDS	☐	■	☐

OPEN-WEB STEEL JOISTS AND JOIST GIRDERS:

		CONTINUOUS INSPECTION	PERIODIC INSPECTION	N/A
1.	INSTALLATION OF OPEN-WEB STEEL JOISTS AND JOIST GIRDERS			
	A. END CONNECTIONS - WELDING OR BOLTED	☐	☐	■
	B. BRIDGING - HORIZONTAL OR DIAGONAL			
	• STANDARD BRIDGING	☐	☐	■
	• BRIDGING THAT DIFFERS FROM SJI K OR SJI LH/DLH SPECIFICATIONS	☐	☐	■

STEEL CONSTRUCTION (STRUCTURAL STEEL):

O - OBSERVE THESE ITEMS ON A RANDOM BASIS, OPERATIONS NEED NOT BE DELAYED PENDING THESE INSPECTIONS

P - PERFORM THESE TASKS FOR EVERY LOCATION

		P	O
1.	INSPECTION TASKS PRIOR TO WELDING		
	A. WELDING PROCEDURE SPECIFICATIONS (WPSs) AVAILABLE	■	☐
	B. MANUFACTURERS CERTIFICATIONS FOR WELDING CONSUMABLES AVAILABLE	■	☐
	C. MATERIAL IDENTIFICATION (TYPE/GRADE)	☐	■

	E. K-AREA	■	☐
	• WHEN WELDING OF DOUBLER PLATES, CONTINUITY PLATES OR STIFFENERS HAS BEEN PERFORMED IN THE K-AREA, VISUALLY INSPECT THE WEB K-AREA FOR CRACKS WITHIN 3 IN. (75MM) OF THE WELD		
	F. BACKING REMOVED AND WELD TABS REMOVED (IF REQUIRED)	■	☐
	G. REPAIR ACTIVITIES	■	☐
	H. DOCUMENT ACCEPTANCE OR REJECTION OF WELDED JOINT OR MEMBER	■	☐
4.	INSPECTION TASKS PRIOR TO BOLTING		
	A. MANUFACTURER'S CERTIFICATION AVAILABLE FOR FASTENER MATERIAL	■	☐
	B. FASTENERS MARKED IN ACCORDANCE WITH ASTM REQUIREMENTS	☐	■
	C. PROPER FASTENERS SELECTED FOR THE JOINT DETAIL (GRADE, TYPE, BOLT LENGTH IF THREADS ARE TO BE EXCLUDED FROM SHEAR PLANE)	☐	■
	D. PROPER BOLTING PROCEDURE SELECTED FOR JOINT DETAIL	☐	■
	E. CONNECTING ELEMENTS, INCLUDING THE APPROPRIATE FAYING SURFACE CONDITION AND HOLE PREPARATION, IF SPECIFIED, MEET APPLICABLE REQUIREMENTS	☐	■
	F. PRE-INSTALLATION VERIFICATION TESTING BY INSTALLATION PERSONNEL OBSERVED AND DOCUMENTED FOR FASTENER ASSEMBLIES AND METHODS USED	☐	■
	G. PROPER STORAGE PROVIDED FOR BOLTS, NUTS, WASHERS AND OTHER FASTENER COMPONENTS	☐	■
5.	INSPECTION TASKS DURING BOLTING		
	A. FASTENER ASSEMBLIES, OF SUITABLE CONDITION, PLACED IN ALL HOLES AND WASHERS (IF REQUIRED) ARE POSITIONED AS REQUIRED	☐	■
	B. JOINT BROUGHT TO THE SNUG-TIGHT CONDITION PRIOR TO THE PRETENSIONING OPERATION	☐	■
	C. FASTENER COMPONENT NOT TURNED BY THE WRENCH PREVENTED FROM ROTATING	☐	■
	D. FASTENERS ARE PRETENSIONED IN ACCORDANCE WITH THE RCSC SPECIFICATION, PROGRESSING SYSTEMATICALLY FROM THE MOST RIGID POINT TOWARD THE FREE EDGES	☐	■
6.	INSPECTION TASKS AFTER BOLTING		
	A. DOCUMENT ACCEPTANCE OR REJECTION OF BOLTED CONNECTIONS	■	☐
7.	INSPECTION OF STEEL ELEMENTS OF COMPOSITE CONSTRUCTION PRIOR TO CONCRETE PLACEMENT		
	A. PLACEMENT AND INSTALLATION OF STEEL DECK	■	☐
	B. PLACEMENT AND INSTALLATION OF STEEL HEADED STUD ANCHORS	■	☐
	C. DOCUMENT ACCEPTANCE OR REJECTION OF STEEL ELEMENTS	■	☐

STRUCTURAL OBSERVATION

THE STRUCTURAL ENGINEER, OR ANOTHER ENGINEER DESIGNATED BY THE STRUCTURAL ENGINEER SHALL BE RETAINED BY THE DISTRICT TO PERFORM STRUCTURAL OBSERVATION AS REQUIRED BY CBC CHAPTER 17. STRUCTURAL OBSERVATION SHALL BE PROVIDED DURING THE STAGES OF CONSTRUCTION LISTED BELOW. IT SHALL BE THE SOLE RESPONSIBILITY OF THE CONTRACTOR TO PROVIDE AT LEAST 48 HOURS ADVANCE NOTICE TO THE STRUCTURAL ENGINEER WHEN HIS WORK IS READY FOR STRUCTURAL OBSERVATION FOR EACH OF THESE STAGES.

		SUBMITTALS REQUIRED (■ YES ☐ NO)	N/A
1.	CONCRETE: REINFORCING STEEL AND EMBEDDED STRUCTURAL ANCHORAGES PRIOR TO PLACEMENT OF CONCRETE FOR THE FOLLOWING:		
	A. FOUNDATIONS	■	☐
	B. SLABS-ON-GRADE (EXCEPT SITE PAVING AND FLATWORK)	☐	☐
	C. WALLS	■	☐
	D. STRUCTURAL FLOOR SLABS AND BEAMS NOT SUPPORTED ON-GRADE	☐	☐
	E. ROOF SLABS AND BEAMS	☐	☐
2.	MASONRY:		
	A. REINFORCING STEEL AND EMBEDDED STRUCTURAL ANCHORAGES PRIOR TO GROUTING OF MASONRY WALLS	☐	■
3.	STRUCTURAL STEEL:		
	A. ERECTED COLUMN, BEAMS AND GIRDERS, PRIOR TO INSTALLATION OF ROOF AND FLOOR JOISTS, TRUSSES AND DECKING	■	☐
4.	WOOD FRAMING:		
	A. ROOF, FLOOR AND WALL FRAMING AND MEMBER CONNECTIONS, AND STRUTS AND CHORDS, PRIOR TO INSTALLATION OF SHEATHING OR ANY COVERING THAT WOULD CONCEAL THE STRUCTURAL FRAME	☐	■
	B. PLYWOOD ROOF, FLOOR AND WALL SHEATING PRIOR TO INSTALLATION OR ROOFING AND ANY OTHER BUILDING MATERIALS THAT WOULD CONCEAL THE NAILING	☐	■

DEFERRED SUBMITTALS/CERTIFICATIONS

		SUBMITTALS REQUIRED (■ YES ☐ NO)	N/A
1.	OFF-SITE FABRICATION: FABRICATORS SHALL BE CITY, COUNTY AND/OR CBC APPROVED FABRICATORS. FABRICATORS FOR ALL OFF-SITE FABRICATION OF THE ITEMS LISTED BELOW:		
	A. TRUSSES	☐	■
	B. GLU-LAMINATED MEMBERS	☐	■
	C. PRECAST CONCRETE	☐	■
	D. STRUCTURAL STEEL (MILL REPORTS AND IDENTIFICATION OF STEEL, AFFIDAVIT OF COMPLIANCE)	■	☐
	E. OTHER: _____	☐	☐
2.	DEFERRED SUBMITTALS: SUBMITTAL DOCUMENTS FOR THE DEFERRED SUBMITTAL ITEMS LISTED BELOW SHALL BE DESIGNED BY A PE OR SE LICENSED IN THE STATE OF CALIFORNIA AND SUBMITTED BY THE CONTRACTOR TO THE BUILDING DEPARTMENT/APPROVAL AGENCY AND STRUCTURAL ENGINEER FOR REVIEW AND APPROVAL. THE DEFERRED SUBMITTAL ITEMS SHALL NOT BE INSTALLED UNTIL THEIR DESIGN AND SUBMITTAL DOCUMENTS HAVE BEEN APPROVED BY THE AFOREMENTIONED.		
	A. PREFABRICATED TRUSSES	☐	■
	B. PRECAST VAULTS	☐	■
	C. CONCRETE MIX	■	☐
	D. OTHER: PRE-ENGINEERED METAL CANOPY	■	☐
	E. OTHER: CHEMICAL STORAGE TANK AND EQUIPMENT ANCHORAGE	■	☐

SCREENS SHALL BE SHADE CLOTH WOVEN OF POLYPROPYLENE FOR A SHADING FACTOR OF AT LEAST 85 PERCENT AND A WEIGHT OF NOT LESS THAN 5 OUNCES PER SQUARE FOOT. EACH SCREEN SHALL SPAN OVER THE VERTICAL SPACE BETWEEN THE FENCE POSTS AND BETWEEN THE TOP AND BOTTOM FENCE RAILS. SCREENS SHALL BE COMPLETE WITH GROMMETS, TIE-DOWNS, AND DEVICES FOR ANCHORING TO THE CHAINLINK FENCE. SCREENS SHALL BE 850 SHADE CLOTH AS MANUFACTURED BY THOR TARP, A DIVISION OF ODIN INTERNATIONAL. PRIOR TO FABRICATION, SUBMIT TO THE ENGINEER FOR REVIEW DESCRIPTIVE INFORMATION, CHOICE OF COLOR AND A SAMPLE OF THE SCREEN.
21. PRE-ENGINEERED CANOPY PER SPECIFICATION

Amendment to Four Party Implementation Agreement
(Regarding Contingent Water Supply to Colton)

This Amendment amends the Four Party Implementation Agreement made and entered into effective September 1, 2015, by and between Emhart, Rialto, Colton, and the County ("4-Party IA") to set forth the procedures and process to minimize or eliminate any disruption of distribution of domestic water supply through the Rialto municipal water system to Colton in the event of an interruption of operation of the Combined Remedies.

Recitals

Whereas, terms defined in the 4-Party IA and used in this Amendment shall have the meanings set forth in the 4-Party IA.

Whereas, to facilitate operation of the Combined Remedies, Colton has leased its water rights in the Basin to Emhart and the County, and Rialto has leased certain of its water rights in the Basin to the County, as described in Paragraph V. of the 4-Party IA.

Whereas, as set forth in the 4-Party IA, upon startup, the Combined Remedies will pump water from the Basin, treat that water at the Combined Treatment Plant to remove perchlorate and VOCs, and deliver the treated water to Rialto.

Whereas, Rialto will receive all water treated by the Combined Treatment Plant, and deliver to Colton a volume of water equivalent to the Colton Water Rights utilized by the County and Emhart at the Combined Treatment Plant.

Whereas, Paragraph V.B.1.b. of the 4-Party IA provides that "Colton shall, at Emhart's request, take all reasonable actions to manage its municipal water supply system, including if necessary, curtailing production at other Colton-owned water production wells in the Basin, to ensure that its water rights leased to Emhart as provided in [4-Party IA] Paragraph V can be utilized for the Work."

Whereas Paragraph III.A.2. of the 4-Party IA provides that, subject to the terms of the Work Consent Decree, Emhart is responsible, *inter alia*, for the cost of the design, permitting, installation, and/or construction of the additional piping and infrastructure necessary to deliver water to the Colton municipal water supply system pursuant to Emhart's lease of Colton Water Rights either through the existing Rialto municipal water supply system or by some other means agreed to by the Parties in writing.

Whereas, Colton has leased its Colton Water Rights in the Basin to the County and Emhart as set forth in Paragraph V. of the 4-Party IA, and if Emhart and the County use the maximum amount of those Colton Water Rights for the Combined Remedies, Colton would have to stop pumping water from its Well Nos. 15 and 17, both of which have been impacted by perchlorate and are connected to a resin treatment system (the "Domecq Treatment System") that removes perchlorate prior to distributing the pumped water to Colton's water system.

Whereas, Well Nos. 15 and 17 are among the primary water supply wells for the Western Zone of Colton's water system.

Whereas, in the event of an interruption or disruption to water delivered from Rialto to Colton, unless Colton takes steps, such as using water rights it would otherwise lease to Emhart, to keep the Domecq Treatment System on standby, Colton cannot immediately restart Well Nos. 15 and 17.

Whereas, due to health and safety considerations, Colton does not intend to cease pumping and treatment operations at Well Nos. 15 and 17 unless there is an adequate contingent water supply that can supply the water needs of Colton's Western Zone in the event of an interruption or disruption to the operation of the Combined Treatment Plant or the distribution of water supply from Rialto to Colton.

Whereas, the Parties desire to provide procedures and process for the continued delivery of domestic water supply from Rialto to Colton in the event of an interruption or disruption to the operation of the Combined Remedies.

Amendment

Now, therefore, in consideration of the terms, conditions and mutual covenants contained herein, the sufficiency of which are hereby acknowledged, the Parties agree to amend the 4-Party IA as follows:

1. **Defined Terms.** Terms defined in the 4-Party IA and used in this Amendment shall have the meanings set forth in the 4-Party IA.

2. **Backup Water Supply and Priority.** In the event that an interruption or disruption of the operation of the Combined Remedies threatens to impact Rialto's ability to supply water to Colton on a schedule that will meet Colton's minimum water needs as set forth in the operative Water Management Plan, subject to ongoing adjustment as set forth in Paragraph VI. of the 4-Party IA, the adjustment of which shall not be unreasonably denied, either Rialto, as operator of the Combined Remedies, or Colton shall promptly notify the Parties, and the Parties shall take steps to deliver water to meet Colton's minimum water needs in the following order:

(a) **Emhart and County's Option to Provide Alternative Backup Water.** Depending on the nature of the interruption or disruption to the Combined Remedies operation, the County and Emhart may direct pumping from Rialto-3, Miro-2, Miro-3, or EW-1, using Colton Water Rights, and Rialto shall deliver to Colton a volume of water equivalent to such supplemental pumping volume pursuant to Paragraph VI. of the 4-Party IA.

(b) **Rialto Well No. 5.** To the extent that the County and Emhart do not take the actions pursuant to Paragraphs 2.(a) or the actions taken are not sufficient to meet Colton's minimum water needs, Rialto will continue to deliver water to Colton, as necessary to meet Colton's minimum water needs, via the Randall Connector, and supplement water supply in the Rialto municipal water supply system by pumping an equivalent volume of water

from its well, known as Rialto Well No. 5, located on Etiwanda Avenue, east of Cactus Avenue.

i. Rialto's extraction of water at Rialto Well No. 5 and delivery of water to Colton via the Randall Connector, as required by Paragraph 2.(b), shall be pursuant to Colton Water Rights and any such extraction shall reduce the water rights leased by Colton to Emhart, as set forth in Paragraph V. of the 4-Party IA.

ii. The Parties recognize and acknowledge that Colton Water Rights are subject to the 1961 Decree and the 4-Party IA, and the exercise of Colton's Water Rights by Rialto and Emhart combined shall not exceed the amount of rights available as set forth in Paragraph V. of the 4-Party IA. To the extent the exercise of Colton Water Rights exceeds the amount Colton can pump without any penalties, fines, or assessments under the 1961 Decree, the Party(ies) responsible for the exceedance shall be liable for any penalties, fines, or assessments Colton would otherwise have to pay for exceeding its water rights.

iii. Rialto will deliver to Colton a volume of water equivalent to the volume pumped at Rialto Well No. 5 using Colton Water Rights at cost. Such cost shall be calculated based on Rialto's cost of operating Rialto Well No. 5 and any related lifting and/or chemical cost for treating water delivered to Colton.

iv. If Rialto Well No. 5 is not operable or cannot supply sufficient water to meet Colton's domestic water needs, Rialto shall provide notice to Colton and proceed to deliver water to Colton pursuant to Paragraph 2.(c).

(c) **Baseline Feeder.** If (i) Rialto Well No. 5 is not operable, (ii) Colton notifies Rialto that Rialto cannot utilize Colton Water Rights, or (iii) Rialto Well No. 5 cannot supply sufficient water to meet Colton's minimum water needs, Rialto shall continue to deliver water to Colton via the Randall Connector, as necessary to meet Colton's minimum water needs, and take delivery of an equivalent volume of water from its "Baseline Feeder" connection by utilizing Rialto's water rights in the Bunker Hill Basin. The Baseline Feeder is operated by San Bernardino Valley Municipal Water District and provides fully treated water pumped from two wells in the Bunker Hill Basin.

Rialto will sell the water delivered to Colton pursuant to Paragraph 2.(c) at cost. Such cost shall be calculated based on the amount Rialto would have to pay to utilize the Baseline Feeder for itself and any related lifting or replenishment cost for treating water to facilitate water delivery to Colton. As of 2020, the cost to Rialto for using water from the Baseline Feeder is

approximately $155 per acre-foot, including both cost per acre-foot of water and replenishment costs. This cost may change in the future. In lieu of paying this cost, Colton has the option of transferring its water rights in the Bunker Hill Basin in amount equal to the amount of water delivered to Colton pursuant to this Paragraph 2.(c) and paying any additional lifting costs necessary to pump and deliver Colton's water from the Bunker Hill Basin to Colton's municipal water system.

If the "Baseline Feeder" connection is insufficient to satisfy Colton's water needs, Rialto shall provide notice to Colton and proceed to deliver water to Colton pursuant to Paragraph 2.(d).

(d) **Encanto Connection.** Rialto has a connection at Encanto through the City of San Bernardino's water system. If the sources identified in Paragraphs 2.(a) through (c) above are insufficient to satisfy Colton's minimum water needs, Rialto will continue to deliver water to Colton, as necessary to meet Colton's minimum water needs, via the Randall Connector, and supplement water supply in the Rialto municipal water supply system by utilizing the Encanto connection. Rialto shall deliver such water to Colton at cost, currently estimated to be $227 per acre-foot. This cost may change in the future.

(e) If the sources identified above are insufficient to satisfy Colton minimum water needs, Rialto, Colton, the County, and Emhart shall meet and confer in good faith to assure Colton's water supply. If Rialto supplies the water, it shall do so at cost.

(f) Upon notice from Rialto that the disruption or interruption of the Combined Remedies has been resolved, normal operation pursuant to the operative Water Management Plan shall resume, provided that the Water Management Plan shall be updated to reflect the amount of Colton Water Rights already exercised pursuant to Paragraphs 2.(a) and (b) above.

3. **Colton's Determination of Water Needs.** In determining the amount of water Rialto is to supply to Colton for purposes of backup water pursuant to Paragraph 2. above, Colton shall, within its reasonable discretion, determine whether it can reduce the water needed from Rialto by management of Colton's municipal water supply system. Nothing in this amendment modifies Paragraph V.B.1.b. of the 4-Party IA.

4. **Notice.** Due to urgency concerns related to public health and safety risks caused by an interruption or disruption to water delivery, except as specifically provided otherwise, the notice described in Paragraph 2. above can be provided in writing, verbally, or via electronic mail, phone call, voicemail or any other reasonable means of communication.

5. **Dispute Resolution.** Any dispute regarding this amendment that is not resolved by the good faith negotiation set forth in Paragraph 2.(e) above shall be resolved pursuant to Paragraph XII of the 4-Party IA.

AGREEMENT BETWEEN ORANGE COUNTY WATER DISTRICT AND CITY OF RIVERSIDE CONCERNING WATER RIGHTS

THIS AGREEMENT, dated as of July 24, 2006 is by and between ORANGE COUNTY WATER DISTRICT ("OCWD") and CITY OF RIVERSIDE ("CITY") (collectively, the "Parties").

EXPLANATORY RECITALS

A. In 1969, the Orange County Superior Court entered a stipulated judgment in *Orange County Water District v. City of Chino, et al.*, Orange County Superior Court No. 117628 (the "1969 Judgment") declaring rights in the Santa Ana River Watershed as between the water users located in the area shown on Exhibit A to the 1969 Judgment which lies upstream from Prado Dam (the "Upper Area") and the water users located in the area shown on Exhibit A to the 1969 Judgment which lies downstream from Prado Dam (the "Lower Area")(the areas shown on Exhibit A to the 1969 Judgment constitute the "Watershed"). OCWD and the City were parties in that case and to certain stipulations that led to the 1969 Judgment.

B. Pursuant to the 1969 Judgment and the stipulations leading to it, "water users and other entities in Lower Area have rights, as against all Upper Area claimants, to receive an average annual supply of 42,000 acre feet of Base Flow at Prado, together with the right to all Storm Flow reaching Prado Reservoir. Water users and other entities in Upper Area have rights in the aggregate, as against all Lower Area claimants, to divert, pump, extract, conserve, store and use all surface and ground water supplies originating within Upper Area without interference or restraint by Lower Area claimants, so long as Lower Area receives the water to which it is entitled under this Judgment and there is compliance with all of its provisions."

C. In addition, pursuant to the 1969 Judgment and the stipulations leading to it, "OCWD and the Lower Area Users are enjoined and restrained from pumping, producing and exporting or directly or indirectly causing water to flow from Upper to Lower Area, except as to salvage of evapo-transpiration losses . . . . The acquisition by Upper Districts or other Upper Area entities of Lower Area water rights shall in no way affect or reduce Lower Area's entitlement; and the acquisition of Upper Area water rights by OCWD or other Lower Area entities shall be deemed to be included within the aggregate entitlement of Lower Area and shall not increase said entitlement."

D. Further, pursuant to the 1969 Judgment and the stipulations leading to it, "[i]nsofar as Lower Area claimants are concerned, Upper Area water users and other entities may engage in unlimited water conservation activities, including spreading, impounding and other methods, in the area above Prado Reservoir, so long as Lower Area receives the water to which it is entitled under the Judgment and there is compliance with all of its provisions. Lower Area water users and other entities may make full conservation use of Prado Dam and reservoir, subject only to flood control use."

E. Further pursuant to the Stipulation for Judgment filed concurrently with the 1969 Judgment, "Water quality requirements, objectives and policy are a function of the Santa Ana River Basin Regional Water Quality Control Board and such other governmental agencies now in existence or as may be hereafter created or vested with such regulatory power. The provisions in the Judgment relating to quality are not to be construed or deemed to affect, or in any way detract from the right of any party hereto to urge such Board or other appropriate agency to take action designed to change or enforce water quality requirements, objectives and policy."

"Any of the undersigned defendants who participate directly in the management or control of sewage or other water treatment facilities agree that any water or effluent deposited by them into the Santa Ana River or its stream bed will not be of a lesser quality than will meet the present requirements of Santa Ana River Basin Regional Water Quality Control Board."

F. On September 3, 1999, OCWD petitioned the State Water Resources Control Board ("SWRCB") to modify the Declaration of Fully Appropriated Stream Status to allow the SWRCB to accept a water right application, later numbered Application 31174, that had been submitted previously by OCWD to the SWRCB (the "OCWD Application"). After evidentiary hearings on September 21, 2000, the SWRCB issued Order WR 2000-12, *In the Matter of the Petitions to Revise Declaration of Fully Appropriated Streams to Allow Processing of Specified Applications to Appropriate Water From the Santa Ana River*. That Order amended the Declaration of Fully Appropriated Streams, as adopted by SWRCB Order WR 98-08, to allow for processing of the OCWD Application and other applications. On January 11, 2002, the SWRCB thereupon publicly noticed the OCWD Application. The City protested the OCWD Application, alleging *inter alia* that in the application OCWD sought water rights in contravention of the 1969 Judgment. On August 9, 2002, the SWRCB accepted the City's protest and on October 18, 2002 OCWD responded to the City's protest. OCWD contends and the City disputes that the OCWD Application is consistent with the rights and obligations declared under the 1969 Judgment.

G. In furtherance of the OCWD Application, OCWD drafted an Environmental Impact Report ("OCWD's EIR"), which was circulated for public comment. In response to comments it received, OCWD revised its EIR and on March 30, 2006 recirculated the revised EIR for public comment.

H. The City is currently preparing a Programmatic EIR for its Recycled Water Master Plan ("PEIR"). This Recycled Water Master Plan is described in the City's PEIR. As part of its Recycled Water Master Plan, the City anticipates using treated effluent that is currently discharged into the Santa Ana River in excess of the City's obligation to discharge 15,250 afy into the River. The City represents that the PEIR and the Recycled Water Master Plan recognize and are consistent with the City's obligation to continue discharging 15,250 afy into the River and its other obligations under the 1969 Judgment.

I. The Parties have discussed their claims of right to divert, extract, use, conserve, store, or sell waters, including reclaimed waters. The Parties intend by this Agreement to resolve the City's protest to the OCWD Application.

J. The Parties agree that conjunctive use of water and utilization of reclaimed water to the maximum extent feasible within the SAR Watershed are important measures to maximize beneficial use of the water resources of the People of California.

AGREEMENTS

NOW THEREFORE the Parties agree as follows:

1. AFFIRMATION OF THE 1969 JUDGMENT

The Parties each acknowledge and affirm their respective rights and obligations, and those of the other Party, as set forth in the 1969 Judgment. Nothing in this Agreement is intended to diminish or abridge those rights and obligations.

OCWD also represents that nothing in the OCWD Application is intended to diminish rights of the Upper Area parties as they are set forth in the 1969 Judgment and OCWD agrees that it will not seek to compel City to continue to release flows in excess of those required under the 1969 Judgment. OCWD agrees that it will comply with all applicable provisions of the 1969 Judgment.

The Parties will ask the SWRCB to incorporate the entire 1969 Judgment into any permit/license to divert water resulting from its application.

The City represents that nothing in its Recycled Water Master Plan is intended to diminish rights of the Lower Area entities as they are set forth in the 1969 Judgment. The City agrees that it will comply with all applicable provisions of the 1969 Judgment.

2. DISMISSAL OF CITY'S PROTEST

Within 21 days after the effective date of this Agreement, the City will notify the SWRCB that the City withdraws its protest to the OCWD Application, subject to the request that the SWRCB's final order on the OCWD Application and any permit or license issued pursuant thereto incorporate the 1969 Judgment and this Agreement.

3. PEIR

Without waiving OCWD's rights to protect water quality of the water reaching Prado Dam, as long as the City is in material compliance with this agreement, OCWD will not bring, or join in, or assist in any protest before the SWRCB related to the City's Application No. 31372 to Appropriate Water from the Santa Ana River and/or any Change Petition(s) related to the subject of that Application (i.e., the City's appropriation of its treated effluent) nor will OCWD bring, or join in, or assist in any court or administrative action to challenge the City's PEIR, subject to the express condition that the City will not contend in any forum, now or in the future, that OCWD's

forbearance on the PEIR operates to bar, preclude or otherwise undermine OCWD's position that native water shall not be exported from the Watershed. Nothing herein prevents OCWD from challenging future environmental documentation or future projects. The parties will timely meet and confer in good faith with respect to any such challenges.

4. OCWD'S EIR

As long as OCWD is in material compliance with this Agreement, City will not bring or join in or assist in any court or administrative action to challenge OCWD's recirculated EIR, and the City will not make any other comments on OCWD's EIRs, draft or final, for projects covered by OCWD's Application.

5. NO CHALLENGE TO CITY'S CONSERVATION EFFORTS

Without waiving OCWD's rights to protect water quality of the water reaching Prado Dam, OCWD will not object to or bring, join in, or assist in any court or administrative action to challenge the City on projects to conserve and use recycled water within the Watershed, as long as such projects are consistent with the 1969 Judgment.

6. SPECIFIC ENFORCEMENT

The Parties agree that violation of the provisions of this Agreement cannot be adequately compensable in damages, and that the Parties lack an adequate remedy at law, and therefore agree that in any action to enforce this Agreement, this Agreement may be specifically enforced by any court of competent jurisdiction and any violation or threatened violation thereof may be enjoined.

The undersigned covenant and represent that they are duly and properly authorized to execute this Agreement and thereby bind the Party for whom they sign.

COOPERATIVE WATER PROJECT AGREEMENT

This Agreement is concluded by and between the Parties hereto to provide for the efficient and economical use of Local and Import Water supplies and shall be known as "The Cooperative Water Project Agreement," hereinafter sometimes referred to as "Agreement."

1. RECITALS

The Eligible Entities (as hereinafter defined), other than the San Bernardino Valley Municipal Water District, have water rights, including in certain cases water rights on the Santa Ana River and on Mill Creek, and have, in many cases for over seventy years, exercised those water rights for the purpose of supplying water to the water users of their respective Entities. Such Entities also have existing facilities which they have used for the development, diversion, and transmission of water from their respective sources of supply.

The San Bernardino Valley Water Conservation District has been engaged for many years in conserving and spreading water from the Santa Ana River and Mill Creek for the purpose of groundwater replenishment pursuant to rights which it holds for such purpose.

The San Bernardino Valley Municipal Water District has a contract with the State of California Department of Water Resources pursuant to the State Water Project under which it is importing a water supply into the San Bernardino Valley. Said District is presently engaged in the construction of local distribution facilities to make Import Water available for direct delivery, including groundwater recharge.

Pursuant to engineering studies which indicate that all of the Eligible Entities, as defined herein, will benefit from a cooperative water supply plan, it is the desire of the Parties to provide for the Parties' beneficial use of existing Local Water and of the available Import Water supply on an integrated basis utilizing various exchanges and transfers in order to provide the most economical, efficient, and dependable supply possible at a minimum of expense to water users and the taxpayers and to conserve energy. The studies indicate that the plan is of mutual benefit to all of the Eligible Entities and that

there will be no adverse effects or penalties to any of them or to other Entities not signatory to this Agreement.

2. DEFINITIONS

As used herein, the following terms shall have the meanings set forth below:

a. Entity: An individual, partnership, corporation (including a mutual water company), or public agency.

b. Eligible Entity: Any Entity eligible to become a Party hereto as set forth in Section 3, below.

c. Party: Any Eligible Entity signatory to this Agreement in accordance with its terms and conditions.

d. Management Committee: The committee comprised of one representative from each Party to this Agreement.

e. Project Manager: The San Bernardino Valley Water Conservation District or any other public agency appointed by the Management Committee and approved by the San Bernardino Valley Municipal Water District, acting under the supervision of the Management Committee.

f. Import Water: Water imported by and belonging to San Bernardino Valley Municipal Water District pursuant to its contract with the State of California Department of Water Resources from the State Water Project.

g. Local Water: All water supplies, except Import Water, available to an Entity.

h. Entitlement Water: Local Water to which a Party has an entitlement as described in Exhibit A, which water rights are not necessarily any Party's total claim to water rights in the respective source listed. This definition is solely for purposes of this Agreement and not for the purpose of defining or establishing water rights with respect to any Party.

i. Exchange Water: Local Water or Import Water delivered to a Party in exchange for Entitlement Water. The quantity of Exchange Water delivered to a Party plus Deferred Exchange Water Credits earned by a Party shall be equal to the quantity of that Party's Entitlement Water delivered to and used by the Management Committee.

j. Simultaneous Exchange: Delivery of Exchange Water substantially at the same time the Party's Entitlement Water is being delivered to others. Unless otherwise provided in the rules adopted by the Management Committee, delivery of Simultaneous Exchange Water shall be at the same rate of flow and completed within 24 hours of the delivery of Entitlement Water.

k. Deferred Exchange: Delivery of Entitlement Water to others for a future delivery of Exchange Water. Deferred Exchange shall be made only as provided in Section 5f below.

l. Deferred Exchange Water Credit: A water credit for the quantity of Entitlement Water delivered to others in a Deferred Exchange.

m. Supplemental Water: Any water requested by and delivered to a Party other than said Party's Entitlement Water or Exchange Water.

n. Cooperative Water Project Facilities: Certain facilities constructed or to be constructed and owned and maintained by San Bernardino Valley Municipal Water District which shall be operated by the San Bernardino Valley Municipal Water District in accordance with the Project Manager's instructions to effectuate this Agreement, subject to the provisions of Section 15. These facilities are shown conceptually on Plate I herein.

o. Associated Water Facilities: Water facilities at or near the mouth of Santa Ana Canyon and Mill Creek owned by various Parties to this Agreement which shall be operated by the owners thereof in accordance with the Project Manager's instructions to effectuate this Agreement, as shown generally on Plates 2 and 3 herein.

p. Cooperative Water Project: Those facilities and the operational plan defined herein that permit the substitution of Exchange Water for Entitlement Water.

q. Historical Conditions: Methods and facilities used to take Entitlement Water into the respective distribution systems of the Parties prior to construction of the Cooperative Water Project Facilities.

r. Edison Company: The Southern California Edison Company, a corporation organized under the laws of the State of California.

s. Year: A calendar year unless specified otherwise.

t. State Contract: Contract between the State of California Department of Water Resources and the San Bernardino Valley Municipal Water District for a Water Supply, dated December 30, 1960, and all amendments thereto, heretofore or hereafter concluded.

3. ELIGIBLE ENTITIES

The following Entities shall be eligible to become Parties to this Agreement:

a. Bear Valley Mutual Water Company, a mutual water company, hereinafter referred to as "Bear Valley."

b. City of Redlands, a municipal corporation, hereinafter referred to as "Redlands."

c. Crafton Water Company, a mutual water company, hereinafter referred to as "Crafton."

d. East San Bernardino County Water District, a county water district organized and existing under the County Water District Law, Water Code Sections 30000, et seq, hereinafter referred to as "East San Bernardino." EVWD

e. Lugonia Water Company, a mutual water company, hereinafter referred to as "Lugonia."

f. North Fork Water Company, a mutual water company, hereinafter referred to as "North Fork."

g. Redlands Water Company, a mutual water company, hereinafter referred to as "Redlands Water."

h. San Bernardino Valley Munici al Water District, a municipal water district organized and existing under the Municipal Water District Law of 1911, Water Code Sections 71000, et seq, hereinafter referred to as "Valley District."

i. San Bernardino Valley Water Conservation District, a water conservation district organized and existing under the Water Conservation District Law of 1931, Water Code Sections 74000, et seq, hereinafter referred to as "Conservation District."

j. Yucaipa Valley County Water District, a county water district organized and existing under the County Water District Law, Water Code Sections 30000, et seq, hereinafter referred to as "Yucaipa District."

4. CONSTRUCTION OF COOPERATIVE WATER PROJECT FACILITIES

Subject to availability of funds, to budgetary, supply, and construction restraints, and to obtaining necessary approvals, permits, and agreements, Valley District shall design and construct the Cooperative Water Project Facilities so as to provide for delivery of water at the maximum flow rates and at the delivery points hereinafter specified. Each of the Parties shall have reasonable opportunity to inspect and study the Valley District's plans and specifications for all Cooperative Water Project Facilities during the planning stage and prior to the solicitation of bids for the construction thereof and may make comments and recommendations thereon to Valley District. Valley District shall make all reasonable efforts to commence construction of the first increment of the Cooperative Water Project Facilities, which consist of the facilities listed in Exhibit D, on or before

April 1, 1977, and bring the first increment to completion with reasonable diligence thereafter. Construction of additional increments will be scheduled by Valley District on a basis of need to meet water demands as determined by Valley District in consultation with the Management Committee. The obligations of Valley District hereunder shall be subject to the following specific conditions:

a. Facilities shown on Exhibit D which are required exclusively or primarily to deliver water to an Eligible Entity which does not become a Party to this Agreement by the effective date of this Agreement need not be built as a part of the first increment of the Cooperative Water Project Facilities nor at any subsequent time until the Eligible Entity shall become a Party.

b. The construction of facilities which would be physically, legally, or economically usable only in the event of the conclusion of the agreement with Edison Company provided for in Section 10 hereof shall be contingent upon the satisfactory conclusion of such an agreement.

c. The construction of facilities which are subject to a requirement of obtaining an approval or permit either for the construction of or for the use of such facilities shall be contingent upon obtaining such approval or permit in form satisfactory to Valley District. Valley District shall attempt to obtain all necessary approvals and permits with reasonable diligence.

d. Valley District with the advice of the Management Committee will schedule the construction of the facilities listed in Exhibit D to keep expenditures within the funds available to Valley District for construction of said facilities.

5. DELIVERY PROVISIONS

a. General

Subject to the delivery of Exchange Water by the Management Committee to replace any Entitlement Water delivered pursuant hereto, each of the Parties having Entitlement Water hereby makes available to the Management Committee said Party's supply of Entitlement Water for delivery and use pursuant to the terms of this Agreement.

East San Bernardino hereby makes available to the Management Committee, for exchange, water it is entitled to receive from North Fork by virtue of its ownership of North Fork stock. However, at such time as North Fork becomes a Party to this Agreement, East San Bernardino shall no longer be required to make the water from its stock ownership in North Fork available for exchange.

The Management Committee may cause delivery of water to be made to any Party entitled to and/or requesting said delivery from any source available to the Management Committee. In exercising its discretion hereunder, the Management Committee shall act on the basis of securing the maximum efficiency and economy in the use of the Local and Import Water supplies available to it.

All water deliveries shall be subject to:

(1) Rules and regulations adopted by the Management Committee.

(2) Scheduling requirements of the Management Committee.

(3) Payment of any charge imposed therefor.

(4) Limitations of available water supplies and capacity in the delivery facilities (including Valley District's Foothill Pipeline).

b. Import Water

Valley District hereby makes Import Water available to the Management Committee as scheduled for delivery and use as Exchange Water and Supplemental Water, subject to the availability of Import Water from the State Water Project, the equal rights of others within the boundaries of Valley District to receive Import Water, requirements for water service other than pursuant hereto, all of the requirements imposed by Valley District's contract with the State of California Department of Water Resources, and all applicable laws and regulations of water service.

c. Exchange Water and Supplemental Water

The Management Committee shall cause to be delivered to each of the Parties Exchange Water to replace any Entitlement Water made available by such Party and used by the Management Committee by Simultaneous Exchange, unless otherwise scheduled by the Party concerned and approved by the Management Committee. Exchange Water shall be delivered to each of the Parties at the points and up to the maximum instantaneous rates of flow specified in Exhibit B.

In addition to such deliveries, the Management Committee shall schedule Supplemental Water deliveries to any Party requesting the same.

d. Use of Cooperative Water Project Facilities to Convey Entitlement Water

A Party may request from the Management Committee delivery of any portion of its Entitlement Water through the Cooperative Water Project Facilities subject to availability of capacity in said facilities and to scheduling limitations.

Nothing in this Agreement shall be construed as authorizing the transport of Entitlement Water outside the boundaries of Valley District without prior approval of the Management Committee; however, in the case of a Party whose own boundaries extend beyond the boundaries of Valley District, that Party may transport Entitlement Water anywhere within its own boundaries.

e. Local Water

The Management Committee shall cause to be delivered to Valley District upon request Local Water if made available by a Party or Parties at flow rates, times, and at the delivery points specified by Valley District to the extent possible, using Cooperative Water Project Facilities, subject to Valley District delivering to the Management Committee an equal quantity of Import Water at the flow rates, times, and to delivery points as required to permit the Management Committee to make said delivery of Local Water to Valley District.

f. Deferred Exchange Water

All Parties with Deferred Exchange Water Credits shall be entitled to receive Deferred Exchange Water for such credits upon request. A Party's Deferred Exchange Water Credits shall be utilized by said Party within a two-year period subsequent to the accumulation of Deferred Exchange Water Credits, unless approved otherwise by the Management Committee.

g. Priorities

After provision for deliveries is made to Valley District and the San Gorgonio Pass Water Agency pursuant to Section 15 of this Agreement, then in case of scheduling, water availability, or facility constraints in any portion of the Cooperative Water Project Facilities, water deliveries in such portion shall be scheduled by the Management Committee on the following basis:

(1) First priority shall be given to Simultaneous Exchange Water.

(2) Second priority shall be given to Deferred Exchange Water.

(3) Third priority shall be given to Supplemental Water.

(4) Fourth priority shall be given to Entitlement Water delivered through Cooperative Water Project Facilities.

(5) Fifth priority shall be any use of the Cooperative Water Project Facilities by parties other than Eligible Entities.

h. Instructions

The Project Manager shall issue all instructions as directed by the Management Committee necessary to deliver water under the terms of this Agreement to the Parties using the Cooperative Water Project Facilities and the Associated Water Facilities.

6. MANAGEMENT

a. Management Committee

A Management Committee comprised of one person representing each of the Parties is hereby established.

(1) Duties: The Management Committee shall be responsible for:

(a) Setting operating rules, regulations, and policies not covered herein;

(b) Approving or disapproving requests for scheduling deliveries of water;

(c) Supervising the work of the Project Manager;

(d) Assisting in resolving disputes between Parties; and,

(e) Advising Valley District on pertinent design, construction, operations, and pricing policies.

(2) Appointments and Terms: Each of the members of the Management Committee shall be appointed by the Party he represents and shall serve at the pleasure of the appointing Party for a period of four (4) years and/or until appointment of a replacement. Notice of appointments shall be filed with the Project Manager. Members shall receive no compensation for their services; provided that in each case the appointing Party may provide such compensation as it deems appropriate.

(3) Quorum and Vote Required for Action: A majority of the members of the Management Committee not in default of this Agreement shall constitute a quorum for the transaction of business, and the vote of a majority of all of the members of the Committee shall be required to take any action.

(4) Officers: At its first meeting in each Year, the Management Committee shall select a chairman and such other officers as it may require. The Management Committee shall select a secretary who may be, but need not be, a member of the Management Committee. Said secretary shall keep an accurate record of all of its proceedings.

(5) Meetings and Notices: The Management Committee shall hold regular meetings at places and times to be specified in the rules to be adopted by the Management Committee. Notice of the scheduled or regular meetings and of any changes in time or place thereof shall be mailed to all persons who shall have filed a request therefor in writing with the Management Committee.

(a) Special meetings may be called at any time by the chairman or by any three (3) members of the Management Committee and shall be noticed as required by Government Code Section 54956.

(b) All meetings of the Management Committee shall be held in conformance with the requirements of Government Code Sections 54950, et. seq.

(6) Incurring of Expenses: Except as herein specifically provided, the Management Committee shall not be authorized to incur any expense on behalf of any or all of the Parties without the written consent of such Party or Parties.

b. Project Manager

Subject to the supervision of the Management Committee, the administration and management of the Cooperative Water Project Facilities shall be the responsibility of the Project Manager, which shall act as the executive arm of the Management Committee with the duty and responsibility to implement Management Committee rules, regulations, and policies and to direct the rate, time, place, and source of all water deliveries from the Cooperative Water Project Facilities and the Associated Water Facilities in accordance with the Management Committee's instructions.

c. Administrative Expenses

Expenses of the Project Manager and expenses of the Management Committee, except compensation for the services of the Management Committee members, shall be paid by Valley District. Valley District's payments for these expenses shall not exceed the budgeted amount set forth in an annual agreement between Valley District, the Project Manager, and the Management Committee without the consent of Valley District. Said agreement shall include terms and conditions of payment and rates of compensation for all services to be provided under said agreement.

7. OWNERSHIP AND OPERATION OF FACILITIES

Each of the Parties hereto shall retain the ownership of its own facilities together with full responsibility for their operation, maintenance, and replacement. The Associated

Water Facilities shall be operated in accordance with the Management Committee's instructions. The Cooperative Water Project Facilities shall be operated in accordance with the Project Manager's instructions to effectuate this Agreement, subject to the provisions of Section 15.

8. WATER QUALITY

All water delivered pursuant to this Agreement will be untreated and shall be of a quality suitable for its intended use, it being understood that suitability is to be determined by a rational method which includes consideration of the quality of the local water used prior to the adoption and implementation of this Agreement. This Agreement is adopted with the understanding that the present quality of Local, Exchange, Entitlement, Supplemental, and Import Water appears to be suitable for the intended uses. Each of the Parties agrees to operate its facilities so that the quality of the water is not impaired or degraded during diversion, transportation, or delivery.

If any Party is in violation of any water quality standards imposed on said Party by any governmental agency or unit because the quality of Exchange Water being delivered to said Party is lower than the quality of said Party's Entitlement Water, then said Party shall be entitled to revert to its Historical Conditions until the Exchange Water quality allows reasonable compliance with such standards.

9. RECORDS

Each Party hereto shall maintain such records and shall file such reports as may be reasonably required by the Management Committee and as may be required by law to protect any water rights affected hereby. In the event any of the Parties shall fail to maintain such records, the Management Committee may direct the Project Manager to estimate and maintain such records for such Party, and such Party shall be charged with the cost thereof.

The Project Manager shall be responsible for maintaining records on all water delivered pursuant to this Agreement.

The Management Committee shall have the right to measure flows of water as needed to satisfy the provisions of this Agreement; necessary access for said measurements will be provided without charge to the Management Committee by the Parties to this Agreement.

10. EDISON COMPANY AGREEMENTS

There are existing agreements between certain Parties to this Agreement and the Edison Company, including, but not limited to, a Grant Deed from Edison Company to Crafton dated February 27, 1929, and a Grant Deed from Crafton to Edison Company dated December 18, 1931. Valley District shall undertake with reasonable diligence to make the new arrangements and agreements with the Edison Company, Crafton and Bear Valley necessitated by the Cooperative Water Project Agreement and to use its best efforts therefor, provided that any such agreement which may in any way alter, modify, change, or affect the rights of any Party hereto under any existing agreements shall not be effective without the consent of such Party.

11. SHORTAGE OF SUPPLY OR TEMPORARY REDUCTION OR CESSATION OF DELIVERIES

a. Scheduled Shutdowns

Each of the Parties shall notify the Project Manager of a scheduled shutdown of any facility that would cause interruption of the Cooperative Water Project.

b. Interruption of Service

In the event of interruption of service in any portion of either the Cooperative Water Project Facilities or the Associated Water Facilities, the Project Manager may, to the extent possible, continue limited operations, and Parties whose delivery of Exchange Water has been interrupted will accrue Deferred Exchange Water Credit for such Exchange Water not delivered during the interruption of service, and such Deferred Exchange Water Credit shall not be subject to the two-year limitation stated in Section 5f but shall maintain its validity until used.

c. Temporary Discontinuance

If the Project Manager is unable to deliver quantities and qualities of water as provided for in this Agreement, it will immediately notify all the affected Parties that the Exchange Program is going to be temporarily discontinued until delivery schedules can be met or until the cause of the interruption is remedied.

After receiving notice of the temporary discontinuance of the Cooperative Water Project, each Party may revert to its Historical Condition.

When the Project Manager is again able to deliver the quantities and qualities of water as scheduled, it shall immediately notify the Parties and resume deliveries.

d. Continuity of Service

When it is necessary to interrupt service, the Project Manager and the Parties shall cooperate to minimize the down time and to restore service to all Parties as soon as possible.

12. BREACH

a. Right to Revert to Historical Conditions

In addition to any other remedies provided by law, in the event the terms and conditions of this Agreement are not complied with and there are no reasonable alternatives, any Party adversely affected by such breach and which is not itself in default may withhold delivery of its Entitlement Water and revert to its Historical Conditions until such breach is remedied.

b. Preliminary Determination of Serious Breach

A preliminary determination that such a breach has occurred may be made (1) by the Party concerned, with the concurrence of the Project Manager, or (2) without the concurrence of the Project Manager, in the manner hereinafter specified. In the event a Party claims such a breach has occurred and the Project Manager disagrees, the Party claiming breach has occurred shall poll other members of the Management Committee and, if any other two (2) members agree that such a breach has occurred, those members shall so certify to the Project Manager a breach has occurred. Immediately upon any preliminary determination that such breach has occurred, the Project Manager shall cause the Party claiming the breach to receive its Entitlement Water under Historical Conditions.

c. Rights to Judicial Relief Unaffected by Preliminary Determination

Nothing herein shall prevent any Party from seeking judicial relief either before or after any preliminary determination, and no preliminary determination shall be binding upon or affect the rights of any Party in connection with such a judicial proceeding.

13. WITHDRAWAL FROM THE COOPERATIVE WATER PROJECT AGREEMENT

No Party shall be entitled to withdraw from this Agreement without the written consent of all other Parties.

14. PROVISIONS WITH RESPECT TO PRESERVATION, TRANSFER, CONDEMNATION, AND DEFENSE OF WATER RIGHTS

With respect to the water rights to produce and use the Entitlement Water set forth in Exhibit A, it is agreed between the Parties hereto that the following shall apply:

a. Non-Use of Water

No Party hereto will lose any such water right by non-use, by use by another Party, by exchange, or by prescription.

b. Transfer

Each Party hereto may sell, mortgage, transfer, or otherwise alienate any such rights, provided that in the event of any such sale, transfer, foreclosure, or alienation of such rights, the transferee shall take such rights subject to the terms and conditions of this Agreement and shall be bound thereby. Prior to the consummation of any such sale, transfer, foreclosure, or alienation, the prospective transferee shall execute an instrument expressly assuming all of the obligations of the transferor under this Agreement with respect to such rights and deliver said instrument to the Management Committee. Until such instrument is so executed and delivered, such transaction shall be void.

c. Rights

The execution of this Agreement by the Parties hereto shall not be construed as constituting any alteration in the respective priorities or terms of any of the rights held by any of the Parties or any admission with respect to any of the rights or claims set forth herein. Between the Parties hereto the Management Committee shall consider that each Party has the rights claimed until otherwise instructed by the Party claiming such right or by the determination of the court with jurisdiction so to do.

d. Condemnation

Each of the Parties hereto, to the extent allowed by law, undertakes not to condemn or take, without consent of the owner thereof, any water rights, sources of water supply, water diversion, production or transmission facilities, or corporate stock owned by any Party hereto, which is subject to the terms of this Agreement, so long as the owner thereof is not in default hereunder.

e. Defense

Each of the Parties hereto shall be responsible for the defense of any rights claimed or asserted by it to produce and use the Entitlement Water set forth in Exhibit A hereto. As against anyone not a Party to this Agreement, Valley District shall defend this Cooperative Water Project Agreement and all rights arising from it.

f. Covenant and Lien

The provisions of this Agreement are hereby declared to be for the benefit of the water rights of the Parties hereto to produce and use the Entitlement Water set forth in Exhibit A. Said provisions are hereby made a covenant binding upon the owners of each such water right and their successors, heirs, transferees, and assigns for the benefit of the owners of each such other water right and their successors, heirs, transferees and assigns. The benefits and burdens of said covenant shall run with said water rights of the Parties hereto.

Each of the Parties hereto hereby grants a lien upon the said water rights to the other Parties hereto to secure its obligations hereunder, which lien shall be appurtenant to the said water rights of the other Parties hereto.

g. Successors and Assigns

Each and all of the terms, conditions, and provisions hereof shall inure to the benefit of and be binding upon the Parties hereto and their respective successors, heirs, transferees, and assigns.

h. None of the provisions of this Section 14 shall apply to or preclude Bear Valley from voluntarily or involuntarily transferring to Big Bear Municipal Water District, free and clear of any obligations of Bear Valley under this Agreement, all of the rights of Bear Valley to impound the natural water supply of Bear Valley behind Bear Valley Dam and later release such water which would otherwise flow in the Santa Ana River.

15. USE OF COOPERATIVE WATER PROJECT FACILITIES FOR DELIVERY OF WATER BY VALLEY DISTRICT

a. Use of Facilities

The Cooperative Water Project Facilities shall be available to Valley District for use as part of its water transmission facilities and may be used by it for the delivery of water to any Entity, whether a Party hereto or not.

b. San Gorgonio Pass Water Agency

Valley District has a contract with the San Gorgonio Pass Water Agency (Pass Agency) dated July 16, 1970, under which the Pass Agency has the option to obtain capacity in certain water transmission facilities constructed by Valley District and to receive deliveries of water or the right to operate the facilities, all upon the terms specified therein. The Cooperative Water Project Facilities to be constructed by Valley District constitute a portion of the water transmission facilities subject to the said contract, and in the event the Pass Agency exercises its option with respect thereto shall be constructed, maintained, and operated in compliance with the terms of the said contract.

SECTION 1611 of the CIVIL CODE

Ascertainment of Consideration:

When a contract does not determine the amount of the consideration nor the method by which it is to be ascertained or when it leaves the amount thereof to the discretion of an interested party, the consideration must be so much money as the object of the contract is reasonably worth.

16. WATER CHARGES AND PAYMENT PROVISIONS

Charges for water deliveries made under this Agreement and provisions for payment shall be as listed below.

Said charges shall be reasonable and shall conform to the applicable provisions of Section 1611 of the Civil Code, State of California.

a. Charge for Supplemental Water

The charges to be made by the Project Manager to any Party to this Agreement for Supplemental Water per acre-foot shall be computed by the following formula:

$$\text{Supplemental Water Charge per Acre-Foot} = E - S + C \quad \underline{\text{or}} \quad E - S + P + L$$

whichever is greater

where:

E = The variable operation, maintenance, power, and replacement component of the Department of Water Resources Transportation Charge per acre-foot* incurred by Valley District.

S = Direct water spreading costs per acre-foot spread by the Conservation District,. not to exceed $3.00 per acre-foot.

C = Dollar amount equal to power generation credit per acre-foot from Devil Canyon power generation plant.

P = Cost of energy incurred by Valley District to convey Supplemental or Entitlement Water to said Party per acre-foot.

L = Power loss charges incurred by Valley District in conveying Supplemental or Entitlement Water to said Party per acre-foot.**

As defined in Section 26 of the State Contract.

***Power loss charges are defined as those charges resulting from the loss of electric power generation from existing hydroelectric plants on Mill Creek and Santa Ana River.*

1986

If Valley District sets any charges upon a basis which, if applied, would result in a lower charge than is provided for above, then charges computed on said basis shall be substituted for the charges provided for above as long as said basis is in effect.

The charges for Supplemental Water provided for in this Agreement shall be in effect for a period beginning with the effective date of this Agreement and ending ten (10) years thereafter; beginning ten (10) years after the effective date of this Agreement the charges to Parties to this Agreement shall be as set by Valley District.

b. Simultaneous Exchange Water Charge

There are to be no charges made by the Project Manager to any Party for Simultaneous Exchange Water under the terms and conditions of this Agreement.

c. Deferred Exchange Water Charge

The charge to be made by the Project Manager to any Party to this Agreement for Deferred Exchange Water shall be the amount of all additional costs required to deliver water on the Deferred Exchange basis over and above the amount of the costs for making said deliveries on a Simultaneous Exchange basis.

d. Charges for Conveyance of Entitlement Water through Cooperative Water Project Facilities

Charges to be made by the Project Manager for the use of the Cooperative Water Project Facilities by Parties to this Agreement for conveyance of Entitlement Water shall be as follows: During the period beginning with the effective date of this Agreement and ending ten (10) years thereafter, $2.50 per acre-foot + P + L as P and L are defined above. Beginning ten (10) years after the effective date of this Agreement, these charges shall be as set by Valley District, except that they shall not exceed the following: The amount of all costs for making such deliveries including, but not limited to, operations, maintenance, energy, repair, replacement, overhead, and capital costs.

In the event the Management Committee with the approval of Valley District decides to convey all or any portion of the 9 cfs presently going from the forebay of Santa Ana Powerhouse No. 3 to the Boullioun Box through the Cooperative Water Project Facilities, that portion shall be exempt from any conveyance charge.

e. Provisions of Payment

Provisions for payment to the Project Manager by the Parties to this Agreement for water charges are as follows:

(1) The Project Manager shall provide monthly invoices to each Party of monies due the Project Manager.

(2) The Parties to this Agreement shall make payment to the Project Manager within thirty (30) days after receipt of said invoices.

(3) The Project Manager shall remit to Valley District all payments received under this Section within five (5) days of receipt.

17. ADDITIONAL PARTIES

After the effective date of this Agreement, additional Entities may become Parties hereto upon application to and approval by the Management Committee and written consent of all of the Parties not in default of this Agreement.

18. AMENDMENTS

This Agreement may be amended at any time by written agreement signed by all of the Parties.

19. OPINIONS AND DETERMINATIONS

Where the terms of this Agreement provide for action to be based upon the opinion, judgment, approval, review, or determination of any Party hereto, such terms are not intended to be and shall never be construed as permitting such opinion, judgment, approval, review, or determination to be arbitrary, capricious, or unreasonable.

20. NOTICE

Any notice pursuant hereto shall be deemed to have been properly given if delivered personally or if enclosed in a properly addressed envelope and deposited in the United States mail for delivery First Class, postage prepaid.

Unless and until formally notified otherwise, notice may be given to each of the Parties addressed as follows:

Bear Valley Mutual Water Company

21. APPROVALS REQUIRED, EFFECTIVE DATE, AND MECHANICS OF EXECUTION

This Agreement shall become effective among the Parties executing the same sixty (60) days after it shall have been executed by the Conservation District, Valley District, Bear Valley, Crafton, Redlands, and Redlands Water.

This Agreement may be executed in counterparts so that the same copy need not be signed by each of the Parties hereto. Upon execution of each counterpart, said counterpart shall be delivered to the Conservation District and, when the required number of counterparts has been received, the Conservation District shall give notice to each of the Eligible Entities hereunder stating the date of execution of the last required counterpart and the date 60 days thereafter upon which the Agreement shall become effective. Upon such effective date, this Agreement shall become effective among all of the Eligible Entities which have executed said Agreement by said effective date, and the Conservation District shall attach all of the signature pages from the counterparts to one copy of the Agreement and shall mail a copy of the conformed Agreement to each of the Parties executing the same. From and after the effective date, any non-signatory Entity shall be eligible to become a Party hereto only in the manner provided in Section 17.

IN WITNESS WHEREOF, the parties do execute this Agreement herein by act of their duly authorized representatives undersigned.

EXHIBIT A

ENTITLEMENTS TO WATER

Santa Ana River

The general features for conveying Santa Ana River water are shown on Plate 2 herein.

Edison Company diverts water from the Santa Ana River at the confluence of Bear Creek and the Santa Ana River. This use of water is based on an agreement with Bear Valley and a license issued to the Edison Company by the Federal Power Commission.

Water so diverted is conveyed by the Edison Company through a series of tunnels, flumes, and canals through Santa Ana Powerhouse No. 1 and Santa Ana Powerhouse No. 2 to the forebay of Santa Ana Powerhouse No. 3.

At the forebay to Powerhouse No. 3 Bear Valley takes delivery of up to nine (9) cfs, which is conveyed through the Bear Valley High Line (capacity controlled by Crafton Heights Pipeline Company).

The remaining water in the Edison Company facility is dropped through Powerhouse No. 3. At the tailrace of Powerhouse No. 3 certain quantities of water are delivered into the facilities of North Fork and certain quantities are delivered into the Redlands Canal of Bear Valley.

There is an agreement between North Fork and Bear Valley which sets forth the entitlements to water of the respective parties. Said agreement is recorded in the official records of San Bernardino County, State of California, Agreement File E, pages 178 - 187, dated July 3, 1885.

There is an agreement between Bear Valley and Lugonia (South Fork). This agreement sets forth the entitlement to water of the respective parties.

It is the intention of this Cooperative Water Project Agreement that the Management Committee and/or Parties to this Agreement will not do anything which will in any way diminish or interfere with the quantities of water each of the Parties referred to in the two agreements above is entitled to receive as its respective proportionate share of the available supply.

The Conservation District diverts storm flows and waters in excess of the needs of the aforementioned companies at the mouth of Santa Ana Canyon for the purpose

EXHIBIT A
Continued

of spreading and percolating to replenish the groundwater supply. The diversion by the Conservation District is covered by Licenses Nos. 2831 and 2832 issued by the State of California.

Redlands Water diverts water from a tunnel at the mouth of Santa Ana Canyon. Water is conveyed from the tunnel to the Redlands Aqueduct via a pipeline located on the west side of Greenspot Road.

Mill Creek

The general features of conveying Mill Creek water are shown on Plate 3 herein.

Edison Company diverts water from Mill Creek near Forest Home in Mill Creek Canyon. This use of water is based on agreements with certain water purveyors and a license issued to the Edison Company by the Federal Power Commission.

Water is conveyed through Edison Company facilities, including Mill Creek Powerhouses Nos. 3, 2, and 1.

After passing through Mill Creek Powerhouse No. 1, water is conveyed across Mill Creek to a point where it is divided; some going to Redlands, some to Crafton, and that portion above the needs of the two parties being returned to the channel of Mill Creek for spreading.

The amount of water each of the two Entities receives is based upon the ownership of "Zanja hours" per certain deeds and other factors as determined between Redlands and Crafton.

It is the intent of this Cooperative Water Project Agreement that the Management Committee and/or the Parties to this Agreement will not do anything which will in any way diminish or interfere with the quantities of water each of the Parties is entitled to receive as its respective proportionate share of the available supply.

The Conservation District has historically diverted stormflows and water in excess of the needs of Redlands and Crafton for the purpose of spreading and percolating to replenish the groundwater supply.

EXHIBIT B

ENTITLEMENT WATER

MAXIMUM INSTANTANEOUS RATES OF FLOW AND DELIVERY POINTS

(See Plates 2 and 3 attached hereto.)

Maximum Instantaneous Rates of Flow

Redlands
Crafton

32 cfs together.

Bear Valley
Lugonia
North Fork

88 cfs together.

Conservation District

The maximum instantaneous rate of flow that would be available if there was no Cooperative Water Project and all Parties were operating under Historical Conditions.

Delivery Points

Redlands - Mill Creek

Into the influent pipeline into Redlands' Henry Tate Filter Plant at a point within the Plant site located south of Mill Creek Road in the Northeast Quarter of Section 22, T. 1 S., R. 2 W., SBB&M.

Crafton - Mill Creek

Into the Zanja near the Boullioun Box and into the influent pipeline into the Redlands' Henry Tate Filter Plant.

Conservation District - Santa Ana and Mill Creek

a. Mill Creek - In the channel of Mill Creek above the existing intake structure located on the south bank of Mill Creek in the Northeast Quarter of Section 21, T. 1 S., R. 2 W., SBB&M.

EXHIBIT B
Continued

b. Santa Ana - The existing main canal of the Conservation District located on the south side of Greenspot Road in the Northeast Quarter of Section 7, T. 1 S., R. 2 W., SBB&M.

North Fork and Bear Valley - Santa Ana

At the existing North Fork Box located on the north side of the Conservation District main canal in the Southwest Quarter of the Southwest Quarter, Section 4, T. 1 S., R. 2 W., SBB&M, and up to 3 cfs at the East Highlands Company weir.

Bear Valley and Lugonia - Santa Ana

Into the Redlands Aqueduct above the Mentone Reservoir.

Redlands Water - Santa Ana

Into the Redlands Aqueduct above the Mentone Reservoir.

East San Bernardino - Santa Ana

Into the North Fork Canal at or above elevation 1720 feet.

DETERMINATION AND MEASUREMENT OF EXCHANGEABLE WATER

Santa Ana

The quantity of water in the Santa Ana River available for exchange shall be determined as follows:

The quantity of water measured at the USGS gage on the Edison Company canal located below the tailrace of Santa Ana Powerhouse No. 2.

The amount of Santa Ana River water available for exchange shall not exceed 88 cfs.

The quantity of water in the tunnel belonging to Redlands Water available for exchange shall be as measured at the tunnel outlet located on the west side of Greenspot Road at the mouth of Santa Ana Canyon.

Mill Creek

The quantity of water in Mill Creek available for exchange shall be determined as follows:

The quantity of water that would go through Edison Company's Mill Creek No. 1 hydro-plant if there were no upstream diversion.

The total amount of Mill Creek water available for exchange shall not exceed 32 cfs.

SAN BERNARDINO BASIN GROUNDWATER COUNCIL FRAMEWORK AGREEMENT

This SAN BERNARDINO BASIN **GROUNDWATER COUNCIL FRAMEWORK AGREEMENT** ("**Agreement**") is entered into and effective this ___ day of _____, 2018 by and among the City of Colton ("**Colton**"), the City of Redlands ("**Redlands**"), the City of Rialto ("**Rialto**"), the City of San Bernardino Municipal Water Department ("**SBMWD**"), City of Loma Linda ("**Loma Linda**"), East Valley Water District ("**East Valley**"), San Bernardino Valley Municipal Water District ("**Valley District**"), San Bernardino Valley Water Conservation District ("**Conservation District**"), Fontana Water Company ("**FWC**"), West Valley Water District ("**WVWD**"), Yucaipa Valley Water District ("**Yucaipa**"), Bear Valley Mutual Water Company ("**BVMWC**"), and Loma Linda University ("**LLU**") each of which is referred to as a "**Party**," for the purpose of coordinating the development and implementation of groundwater management activities that individually or cumulatively address groundwater management in the Bunker Hill Sub-basin of the Upper Santa Ana Valley Basin ("**Basin**"), and achieving groundwater sustainability throughout the Basin.

RECITALS

WHEREAS, the Parties to this Agreement all overlie, produce water from, or are otherwise interested in the management and long-term sustainability of the groundwater basin identified as the San Bernardino Basin Area; and

WHEREAS, California Department of Water Resources' ("**DWR**") Bulletin 118 defines the Upper Santa Ana Valley Bunker Hill Sub-basin (No. 8-002.06), the boundaries of which, as defined therein and as may be amended in the future, constitute the limits of the Basin covered hereunder. A map depicting that Basin is attached hereto as Exhibit A. DWR Bulletin 118 presently classifies the Bunker Hill Basin as high priority.

WHEREAS, surface water and groundwater supplies in large portions of the Basin are governed by a number of judicial decrees and contracts, including but not limited to the *Orange County Water District v. City of Chino et al.* (Orange County Superior Court, Case No. 117628, April 17, 1969) *Western Municipal Water District of Riverside County v. East San Bernardino County Water District et al.* (Riverside County Superior Court Case No. 78426, April 17, 1969); *Big Bear Municipal Water District v. North Fork Water Company*, San Bernardino Superior Court Case No. SCV 165493, and *City of San Bernardino v. Fontana Water Company*, San Bernardino Superior Court Case No.17030 (January 28, 1924).

WHEREAS, Water Code § 10720.8(a) identifies the San Bernardino Basin Area as an adjudicated area. As such, this area is exempt from the Sustainable Groundwater Management Act (SGMA) passed by the California Legislature in September 2014, other than providing certain kinds of data to DWR per Water Code § 10720.8(f).

WHEREAS, notwithstanding that the Basin is not required to comply with SGMA, the Parties to this Agreement wish to collaborate their efforts to identify their respective access to and application of imported water supplies, and to harmonize use of such supplies with available groundwater in the Basin. The goal is to ensure that the water imported into the Basin, and the

facilities used to apply both imported and native water supplies to productive beneficial use, will all be maintained and managed in a manner that will be sustainable over the long-term. The Parties recognize that the key to success in this effort will be coordination of amounts and areas of recharge in different parts of the Basin, by acting in conjunction with other groundwater management entities active in portions of the Basin.

WHEREAS, the purpose of ensuring water supply reliability and long-term effectiveness and viability of recharge facilities has become even more important as a result of recently experienced low groundwater storage levels and the reduction of imported water supplies, due to environmental and other restrictions. One purpose of this Agreement is to facilitate the cooperation of the Parties to ensure a reliable and conjunctively utilized water supply of replenishment water that can prevent overdraft or other negative impacts from occurring during an extended drought, and for the foreseeable future.

WHEREAS, the Parties, individually and collectively, have the goal of cost effective cooperative groundwater management that considers the interests and concerns of all of the communities and parties that rely upon the Basin for their water supply.

WHEREAS, the Parties hereby enter into this Agreement to establish the San Bernardino Basin Groundwater Council ("**GC**") to undertake the preliminary steps necessary to prepare for and coordinate the management of groundwater supply resources throughout the Basin, and to coordinate maintenance of conveyance and recharge facilities to expedite such management. The GC will coordinate with existing groundwater management agencies in the Basin as well as the individual Ex Oficio participants, as defined below, and will be responsible for ensuring overall coordination and sustainable management of the Basin.

WHEREAS, the Parties have agreed that the preliminary steps of GC formation will include preparation of formation documents and procedures, the possible hiring of needed experts, and the development of a budget for this GC as memorialized in this Agreement.

AGREEMENT

NOW THEREFORE, in consideration of the matters recited and the mutual promises, covenants, and conditions set forth in this Agreement, the Parties hereby agree as follows:

1. DEFINITIONS

1.1 Definitions. In addition to the terms that may be defined elsewhere in this Agreement, the following terms when used in this Agreement shall be defined as follows:

1.1.1 "***Agreement***" means this Groundwater Council Agreement.

1.1.2 "***Plaintiff***" means any of the following entities: City of Riverside, Riverside Highlands Water Company, Meeks and Daley Water Company, Regents of University of California, or Western Municipal Water District as named in the 1969 Judgment in Case Number 78426, *Western Municipal Water District of Riverside County et al. vs. East San Bernardino County Water District et al.*"

1.1.3 ***"Annual Basin Groundwater Report"*** shall mean the annual report prepared by the Groundwater Council, to cover topics including but not limited to the following: annual production, recharge, environmental issues, exchanges, and all other actions and topics material to groundwater conditions in the Basin. In preparing such report, the Groundwater Council may consult with, and draw from, data and information provided by the Watermaster and Conservation District and other reliable sources regarding annual groundwater conditions. The Annual Basin Groundwater Report is not intended to supplement or supplant the annual reports of the various Watermasters operating within the Basin that are filed with the Superior Court or any Watermasters' required reporting under the Sustainable Groundwater Management Act (SGMA).

1.1.4 ***"Basin"*** shall mean the Upper Santa Ana Valley Bunker Hill Groundwater Basin, Sub-basin 8-002.06, as designated in DWR's Bulletin No. 118, and as its boundaries may be modified from time to time through the procedures described in California Water Code § 10722.2.

1.1.5 ***"Groundwater Council"*** or ***"GC"*** or shall mean the Upper Santa Ana Valley Bunker Hill Basin Groundwater Council, the oversight body coordinating the management, replenishment, and preservation of groundwater supply and quality of the Basin. The GC shall be composed of representatives of each Party and should they decide to participate, a representative of any other groundwater management authority over any portion of the Basin, as further provided herein. The GC's duties shall include the integration and coordination of the use of imported water supplies for replenishment of the Basin, facilitation of implementation of GC policies and initiatives through the legal authorities of its members, management of budgeting and funding for the maintenance, development, and management of regional groundwater infrastructure, and dispute resolution that may occur within or between the Parties or Ex Oficio members of the GC.

1.1.6 ***"BTAC"*** shall mean the Basin Technical Advisory Committee, as originally created under the auspices of the Upper Santa Ana River Watershed Integrated Regional Water Management Plan, as such Committee may be modified from time to allow for the additional participation of one or more Parties to this Agreement. The BTAC may be tasked to undertake specified actions in support of the GC.

1.1.7 ***"Effective Date"*** shall mean the date that a majority of the Parties approve of and enter into the Agreement.

1.1.8 ***"Equitable Allocation"*** shall mean the manner of determining the facilities' operations and maintenance ("O&M") costs, and supplemental water cost, for each Party based on the annual approved budget. This allocation will be performed pursuant to the formulas and procedures described in Exhibit B of this Agreement. The allocation shall determine the portion of equitable O&M cost, and the portion of equitable water cost, to be apportioned to each Party or other participant for the applicable GC budget year. These allocations shall also be used to determine the voting weight afforded to each voting member of the GC, under this Agreement and further procedural processes as may be developed by the GC.

1.1.9 **"Ex Oficio participant"** shall mean those entities that participate in the GC by virtue of their status as plaintiffs or successors in interest to plaintiffs in *Western Municipal Water District of Riverside County v. East San Bernardino County Water District et al.* (Riverside County Superior Court Case No. 78426, April 17, 1969), but which shall not be a considered Parties to this Agreement.

1.1.10 ***"Cost Share"*** shall mean that portion of the overall annual operating costs of the GC, assigned to a Party pursuant to the Equitable Allocation, as determined in the annual budget of the GC.

2. TERM

2.1 This Agreement shall become operative on the Effective Date. If an eligible Party has not executed this Agreement by june 30, 2018, such party may join this GC Agreement only as an additional member of the GC, pursuant to Section 3.5, below.

2.2 This Agreement shall remain in effect for a period of five (5) years following the Effective Date, unless earlier terminated by the unanimous written consent of all then-active Parties, provided, however, that this Agreement shall remain in effect during the term of any contractual obligation or indebtedness of the GC that was previously approved by the GC.

2.3 Any Party shall have the ability to withdraw from this Agreement upon serving written notice of its intention to withdraw on all other Parties at least twelve (12) months before that Party's withdrawal becomes effective. Such notice shall be served on the GC at a regularly scheduled meeting and on each of the Parties to this Agreement separately. The withdrawing Party may withdraw upon eighty percent (80%) approval of the voting members of the GC.

2.4 Any Ex Oficio participant in the GC shall have the ability to withdraw from participation in the GC upon thirty (30) days written notice to the Parties.

3. COUNCIL CREATION AND PURPOSE

3.1 Creation of the GC. There is hereby created the Upper Santa Ana Valley Bunker Hill Basin Groundwater Council. The GC shall be, to the extent permitted by law, the forum within which the Parties shall coordinate the access to and utilization of imported water supplies for application to the recharge and replenishment of the Basin, and for the maintenance, and repair of recharge and conveyance facilities for both native and imported supplies to replenish the Basin, consistent with applicable law and judicial decrees.

3.2 Purpose of the Agreement. The purpose of this Agreement, and the creation of the GC, is to provide for the funding, integration, and coordination of the management of imported water and associated groundwater replenishment facilities of the Basin. The purpose is also the facilitation of implementation of policies and initiatives through the legal authorities of one or more Parties, for the purpose of cooperatively managing certain aspects of the Basin, including but not limited to accessing and applying imported water supplies to augment and complement native water supplies, toward the goal of maintaining the long-term yield of the Basin and ensuring that overdraft or other negative impacts are prevented in the

future and eliminated over time; and undertaking imported water replenishment activities that are approved by the GC and included in the annual approved budget.

3.3 Membership of the GC. The GC shall consist of a representative from each Party. One party may serve in multiple representative roles, and this will be accounted for in the Equitable Allocation. GC Members shall be appointed in the manner set forth in Section 3.4 of this Agreement.

3.4 Appointment of Members to the GC. Each Party or other entity entitled to membership on the GC shall appoint one representative member of the GC, who shall be the senior executive management level employee of the Party, or a senior executive management-level employee of other recognized groundwater management entity. Each eligible member may determine its own process for appointing its representative member. Members of the GC shall serve throughout the term of this agreement, provided that such members may be subject to removal and replacement by the appointing Party in the event the representative is no longer in the employ of the appointing Party.

3.5 Additional Members. The GC may permit admission of additional members upon an eighty percent (80%)vote of the Equitable Allocation weighted votes among all then-existing Parties, upon such terms and conditions as the GC in its discretion may impose. Such conditions may include requiring contributions to any GC initiatives for securing imported water supplies, or maintenance and operations expenses of groundwater replenishment facilities, to assure equitable distribution of the costs of such initiatives or facilities to those benefitting from them.

3.6 Ex Oficio Participants. The GC shall include the plaintiff parties or the successors in interest to the plaintiff parties in *Western Municipal Water District of Riverside County v. East San Bernardino County Water District et al.* (Riverside County Superior Court Case No. 78426, April 17, 1969) as "Ex Oficio" participants, unless any Ex-Oficio participant withdraws from the GC pursuant to Section 2.4, above. Such Ex-Oficio participants shall not have the ability to vote on any matters before the GC, but shall be permitted to provide input and other support for GC efforts. Notwithstanding any other provision of this Agreement, and except as otherwise provided in other agreements, judgments or settlements, Ex Oficio participants shall not be liable for any costs or fees associated with the GC or its activities related to importing groundwater into the Basin and shall not be considered "members" of the GC as that term is used in this Agreement. Ex Oficio participants may jointly execute a separate agreement with the Conservation District that will provide for the annual payment of no more than 27.95% of costs associated with the recharge of native waters.

4. COUNCIL MEETINGS AND ACTIONS

4.1 Initial Meeting. The initial meeting of the GC shall be held at a location overlying the Basin within forty-five days (45) days of the Effective Date of this Agreement. At the initial meeting the GC shall select a President to chair its meetings, a Vice President to serve if the President is unavailable, a Secretary to record GC proceedings and actions, and any other officers it deems appropriate to the successful and efficient conduct of its business.

4.2 Regular Meeting Schedule and Rules of Proceeding. The GC shall establish a regular meeting time and place at its initial meeting. The GC may vote to change the regular meeting time and place, provided that the new location remains at a place overlying the Basin. The GC may adopt, promulgate, repeal, or revise further rules of debate, presentation of motions, voting and proxies, process, or proceedings, as it may deem appropriate.

4.3 Quorum. A quorum of the GC shall consist of majority of the total Equitable Allocation weighted votes among all voting members. In the absence of a quorum, no business may be transacted beyond the adjournment of a meeting by the remaining members. For efficiency, business may be discussed and action recommended for the consent calendar ratification at the next regular meeting. A member shall be deemed present for the determination of a quorum if the member is present at the meeting in person, or if they participate in the meeting telephonically upon such rules and procedures as the GC may promulgate.

4.4 GC Voting Rights. Each voting member of the GC shall have its Equitable Allocation weighted vote, as such may be revised from time to time either (a) pursuant to pre-negotiated mechanisms for the adjustment of the Equitable Allocation, due to fluctuations in the groundwater production or other criteria on which the initial Equitable Allocation is based, or (b) by an eighty percent (80%) vote of the total Equitable Allocation voting weight held by all voting members. Exhibit B indicates the voting rights of each party, and shall be modified periodically as specified in the procedures included in Exhibit B.

4.4.1 Fiscal items, including but not limited to, approval of the annual budget of the GC and any expenditures, shall require an affirmative vote by a supermajority constituting eighty percent (80%) of all Equitable Allocation voting weight. To the extent the GC may form groups which contain less than all members for projects where not all members are participants, such committees will have an additional committee agreement identifying the requirements of committee members, and voting requirements attending fiscal obligations of such committees.

4.4.2 Any change in annual contributions necessary to support the work of the GC shall require an affirmative vote by a supermajority constituting eighty percent (80%) of all of all Equitable Allocation voting weight.

4.5 Minutes. The GC shall cause minutes to be kept of all meetings of the GC and any appointed Standing Committees. The GC shall further cause a copy of draft minutes to be forwarded to each member of the GC and to each Party and Ex Oficio member, which may be done electronically, or by way of posting to a commonly available website or digital portal.

4.6 Annual Budgeting and Expenditure Approval.

4.6.1 The fiscal year of the GC shall be July 1 through June 30. The GC shall develop, circulate, and approve an annual budget for the funding of bringing imported water supply to the Basin, and for the maintenance and repair of groundwater recharge or water conveyance facilities serving replenishment of the Basin. The Budget shall be prepared by a Budget Committee, which shall consist of three (3) member Parties of the GC appointed by a qualifying vote of at least 80% of the weighted Equitable Allocation, no later than January 31 of the fiscal year prior to the one for which the budget is to operate. The Budget Committee shall coordinate with BTAC and Valley District as the State Water Project Contractor, to determine the likely allocation of available State Water Project imported water supplies, and other available non-native sources of imported water, the likely unit cost of such imported water, and the recharge needs of the Basin, in terms of quantities of water, locations where Basin conditions would most benefit from imported recharge, condition and availability of facilities to accomplish such recharge, and cost. From these sources, the Budget Committee shall prepare a budget that recommends all of the following:

(a) the amount of imported water supplies proposed to be bought or otherwise acquired by GC members in the coming year;

(b) the recommended application or distribution of such imported water supplies to various parts of the Basin;

(c) the estimated cost of all ongoing maintenance, repair, and operation costs for then-existing groundwater recharge and conveyance facilities serving to replenish the Basin;

(d) any administrative costs of the GC; and

(e) proposed allocation of all expenditures in the Budget among GC members as their portion of the Cost Share based upon the Equitable Allocation Model.

4.6.2 No later than March 1 prior to the beginning of the year for which the budget is to operate, the Budget Committee shall present and circulate to all GC members the proposed Budget, for review and analysis. The circulated budget shall include the underlying presumptions and worksheets upon which it is based. The Budget Committee, or its designee, shall make itself reasonably available to respond promptly to any inquiries or information requests regarding the proposed budget.

4.6.3 No later than sixty (60) days after presentation of the budget by the Budget Committee, the GC shall meet to deliberate and pass upon the budget. The GC may accept, reject, or modify in any way the budget as proposed by the Budget Committee. Adoption of the budget shall require an eighty percent (80%) vote of the weighted Equitable Allocation, provided, however, that if a segregable portion or portions of the budget can be identified which prevent the overall budget from obtaining an eighty percent (80%) approval vote, the GC shall pass those portions of the budget upon which an eighty percent (80%) majority can be achieved, and shall refer those portions upon which approval cannot be obtained back to the Budget Committee for further recommendation on how such portions might be eliminated, reduced in

scope or cost, or otherwise modified, and represented to the GC for eighty percent (80%) approval. No portion of the GC budget imposing any expenditures on any Party shall be approved or adopted on less than an eighty percent (80%) vote of the Equitable Allocation weighted voting, but the inability to secure an eighty percent (80%) vote on segregable portions of the budget shall not prevent the GC from implementing, and proceeding with, those portions of the budget which secured the required eighty percent (80%) approval.

4.7 The Valley District shall perform the accounting and revenue collection functions of the GC in tracking and securing the funding from the GC members pursuant to the approved annual budget, and consistent with the approved cost allocations among the GC members therein, for all imported water supplies. The Conservation District shall perform the accounting and revenue collection functions of the GC in tracking and securing the funding from the GC members pursuant to the approved annual budget, and consistent with the approved cost allocations among the GC members therein, for all facilities costs. The Conservation District shall credit each Party or Ex Oficio participant otherwise subject to the Conservation District's groundwater charge, in the amounts such Party contributes to the GC budget for facilities costs that would be encompassed in that groundwater charge, in order to prevent double collection of such costs with the Conservation District's groundwater charges. Groundwater charges payable by the Ex Oficio Participants may be suspended as part of the separate funding agreement outlined in Section 4.8. In the event of any delinquency, either Valley District or the Conservation District may request the GC to appoint it, or any other GC member or group of members, to represent the GC in securing collection of unpaid and owing amounts from any delinquent member or members. The reasonably incurred costs of such collection efforts may be reimbursed to the agent the GC authorizes to go forward with them, and may be added as an administrative cost to other members, or as a credit against future amounts owing to the GC from such authorized agent.

4.8 Ex Oficio participants will not be subject to the Conservation District's groundwater charges as long as a separate funding agreement as outlined in this Section 4.8 is in effect. Ex Oficio participants may jointly negotiate and execute a separate agreement with the Conservation District and/or Valley District that will provide for the annual payment of up to 27.95% of costs associated with the recharge of native waters. As of the Effective Date of this Agreement, Ex Oficio participants understood the estimated annual costs associated with water recharge, both native and imported, to be $800,000 for Conservation District activities and $200,000 for activities that may occur in recharge basins outside of the Conservation District's control. Ex Oficio participants, via the separate funding agreement, may agree to collectively pay no more than 27.95% of the cost for recharge of native waters. In any such agreement, in the event that imported water is recharged and the costs for such activity are comingled with the cost for recharge of native water, the Conservation District and/or Valley District will pro-rate the costs associated with recharge to separate the costs for native and imported water recharge. Ex Oficio participants are not intended to be charged for the costs of recharge of imported water or associated capital, the operations and maintenance for imported supplies, or any other costs not expressly agreed to in the separate funding agreement.

4.9 No later than six (6) months into the budget year for which any budget is adopted by the GC, the Budget Committee shall prepare a year-in-process budget review, to assess the validity and accuracy of the presumptions upon which the budget was based, identify

any budget savings or additional expenditures, assess any additional opportunities for groundwater replenishment that may have come available since the passing of the budget, and otherwise assess and recommend to the GC any potential amendment to the existing year budget, or suggestions for the following year's budget, as changing conditions may warrant. *(This section may not be needed based upon finalization of the Equitable Allocation formula.)*

5. COUNCIL POWERS AND DUTIES

5.1 The GC shall exercise the following powers:

5.1.1 To adopt rules, regulations, policies, bylaws and procedures governing the operation of the GC.

5.1.2 To produce an Annual Basin Groundwater Report, using as may be appropriate data regarding groundwater conditions available from the Watermaster, the Conservation District, or other sources.

5.1.3 To monitor groundwater production and extractions in coordination with BTAC and pertinent local groundwater management agencies.

5.1.4 To make, after consultation with BTAC, annual recommendations for the amount of additional artificial recharge for the Basin from imported sources as a complement to native sources, and to plan for the development and application of such additional sources of recharge.

5.1.5 To establish as-needed Ad Hoc and Standing advisory committees for the purpose of making recommendations to the GC. Committees shall exist for the term specified in the action creating the committee, and the GC may dissolve a committee at any time through an eighty percent (80%) majority vote of Equitable Allocation voting weight.

5.1.6 To contract for the services of engineers, attorneys, planners, financial consultants, and separate and apart therefrom, to appoint agents and representatives to employ such other staff persons as necessary. The BTAC will provide technical support for the GC, upon such terms as the GC and BTAC shall agree in writing. Ex Oficio members shall not be responsible for BTAC costs.

5.2 In addition to the above-referenced powers, the GC may, by an eighty percent (80%) vote of the Equitable Allocation, decide to activate and exercise any or all of the following additional powers:

5.2.1 To collect and monitor all data related and beneficial to the development, adoption and implementation of appropriate groundwater level management for the Basin.

5.2.2 To collect charges from GC members as authorized in the approved budget.

5.2.3 To cooperate, act in conjunction, and contract with the United States, the State of California, or any agency thereof, counties, municipalities, public and private corporations of any kind (including without limitation, investor-owned utilities), and individuals, or any of them, for any and all purposes necessary or convenient for the purposes of this Agreement.

5.2.4 To accumulate operating and reserve funds and invest the same as allowed by law for the purposes of the GC.

5.2.5 As may be permitted by law, to apply for and accept grants, contributions, donations and loans, including under any federal, state or local programs for assistance in developing or implementing any of its projects or programs in connection with any project untaken in the GC's name.

5.2.6 To acquire lease, purchase, construct, hold, manage, maintain, operate and dispose of any buildings, property, water rights, works or improvements within and without the respective boundaries of the Parties necessary to accomplish the purposes described herein, or to assist any Party in doing so.

5.2.7 To implement the Cost Share in a manner that qualifies as a pass through charge under the Constitutional requirements of Proposition 218 and similar revenue-raising requirements.

5.2.8 To exercise any power necessary or incidental to the foregoing powers in the manner and according to the procedures provided for under the law applicable to the Parties to this Agreement.

5.2.9 In addition to the above, and to the extent not directly represented on the GC, the GC shall coordinate its efforts with the agencies that are charged with implementing all applicable judicial decrees governing the Basin.

6. FUNDING GC ACTIVITIES

Funding for GC activities shall be provided pursuant to an expense sharing mechanism described in more detail in Exhibit B hereto. This mechanism is based in part on a regional sharing of Operation and Maintenance costs for San Bernardino Basin Area recharge activities, as those Operation and Maintenance costs shall be determined by the GC in its annual budgeting, in conjunction with BTAC. All Parties shall share in the Operation and Maintenance cost components. Ex Oficio participants shall not share in any costs which are attributable to bringing imported water to the Basin nor its recharge, but all other Parties shall participate in such costs, pursuant to the Equitable Allocation attached as Exhibit B hereto. Ex Officio participants intend to, through separate agreement(s) with the Conservation District and/or Valley District, cooperate in the payment of up to a maximum of 27.95% of costs associated with the recharge of water that results from natural precipitation and run-off in the basin (native water). Each Party shall be contractually responsible hereunder for the annual payment of fees for their assigned portion of the budgeted expenses of the GC, based on that Party's allocation, as determined by the aforementioned allocation formula and the approved GC budget.

7. DISPUTE RESOLUTION

The Parties recognize that there may be disputes regarding the obligations of the Parties or the interpretation of this Agreement. The Parties agree that they may attempt to resolve disputes as follows:

7.1 Statement Describing Alleged Violation of Agreement. A Party or Parties alleging a violation of this Agreement (the "**Initiating Party(ies)**") shall provide a written statement describing all facts that it believes constitute a violation of this Agreement to the Party(ies) alleged to have violated the terms of this Agreement (the "**Responding Party(ies)**").

7.2 Response to Statement of Alleged Violation. The Responding Party(ies) shall have sixty (60) days from the date of the written statement to prepare a written response to the allegation of a violation of this Agreement and serve that response on the Initiating Party(ies) or to cure the alleged violation to the reasonable satisfaction of the Initiating Party(ies). The Initiating Party(ies) and the Responding Party(ies) shall then meet within thirty (30) days of the date of the response to attempt to resolve the dispute amicably.

7.3 Mediation of Dispute. If the Initiating Party(ies) and the Responding Party(ies) cannot resolve the dispute within ninety (90) days of the date of the written response, they shall engage a mediator, experienced in water-related disputes, to attempt to resolve the dispute. Each Party shall ensure that it is represented at the mediation by a Director or Trustee or other representative with authority to settle. These representatives of the Initiating Party(ies) and the Responding Party(ies) may consult with staff and/or technical consultants during the mediation and such staff and/or technical consultants may be present during the mediation. The costs of the mediator shall be divided evenly between the Initiating Party(ies) and the Responding Party(ies). The decision of the mediator shall be non-binding.

7.4 Reservation of Rights. Subject to the above requirements, in the event that mediation fails, each Party retains and may exercise all legal and equitable rights and remedies it may have to enforce the terms of this Agreement; provided, that prior to commencing litigation, a Party shall provide at least five (5) calendar days' written notice of its intent to sue to all Parties.

8. RELATIONSHIP TO WATER RIGHTS AND PRIOR AGREEMENTS

8.1 Water Rights and Existing Agreements. Nothing in this Agreement is intended to modify the water rights of the Parties or the Ex Oficio participants, whether existing under a judgment, proceedings of the State Water Resources Control Board, or the common law. Nothing in this Agreement is intended to modify any existing agreements between and among the Parties, unless expressly stated herein.

8.2 Agreements Among Water Users. Nothing in this Agreement is intended to modify the rights of the signatories of this Agreement among themselves.

8.3 Judgments. Nothing in this Agreement is intended to modify the rights of the Parties under the terms of the judgments in *Orange County Water District v. City of Chino et al.* (Orange County Superior Court, Case No. 117628, April 17, 1969) and *Western Municipal*

Water District of Riverside County v. East San Bernardino County Water District et al. (Riverside County Superior Court Case No. 78426, April 17, 1969); *Chino Basin Water District v. City of Chino,* San Bernardino Superior Court Case No. 164327; *Big Bear Municipal Water District v. North Fork Water Company,* San Bernardino Superior Court Case No. SCV 165493; or *City of San Bernardino v. Fontana Water Company*, San Bernardino Superior Court Case No.17030 (January 28, 1924). It is the intention of the Parties in forming the GC to apply, administer, and conform to the requirements and provisions of each of these judgments. In the event of any conflict between the actions of the GC, and the requirements and provisions of such judgments, the latter shall control.

8.4 No Admissions. Nothing in this Agreement shall be construed as an admission by any Party regarding any subject matter of this Agreement, including but not limited to the water rights or priorities of same of the Parties.

8.5 Preservation of Rights. The Parties agree that this Agreement, to the extent allowed by law, preserves all rights of the Parties as they may exist as of the Effective Date of this Agreement. Nothing in this Agreement is to be construed as altering the priorities or entitlements of water right holders among themselves to water from the Santa Ana River or the Basin.

9. MISCELLANEOUS

9.1 Authority. Each signatory of this Agreement represents that s/he is authorized to execute this Agreement on behalf of the Party for which s/he signs. Each Party represents that it has legal authority to enter into this Agreement and to perform all obligations under this Agreement, and that by doing so, such Party is not in breach or violation of any other agreement or contract.

9.2 Amendment. Except as to fluctuations in the Equitable Allocation as otherwise provided for herein, this Agreement may be amended or modified only by a written instrument approved by an eighty (80)%) vote of the Equitable Allocation

9.3 Jurisdiction and Venue. This Agreement shall be governed by and construed in accordance with the laws of the State of California, except for its conflicts of law rules. Any suit, action, or proceeding brought under the scope of this Agreement shall be brought and maintained to the extent allowed by law in the County of San Bernardino, California.

9.4 Headings. The paragraph headings used in this Agreement are intended for convenience only and shall not be used in interpreting this Agreement or in determining any of the rights or obligations of the Parties to this Agreement.

9.5 Construction and Interpretation. This Agreement has been arrived at through negotiations, and each Party has had a full and fair opportunity to revise the terms of this Agreement. As a result, the normal rule of construction that any ambiguities are to be resolved against the drafting Party shall not apply in the construction or interpretation of this Agreement.

9.6 Entire Agreement. This Agreement constitutes the entire agreement of the Parties with respect to its subject matter, and supersedes any prior oral or written agreement, understanding, or representation relating to the subject matter of this Agreement.

9.7 Partial Invalidity. If, after the date of execution of this Agreement, any provision of this Agreement is held to be illegal, invalid, or unenforceable under present or future laws or adjudicatory decisions effective during the term of this Agreement, such provision shall be fully severable. However, in lieu thereof; there shall be added a provision as similar in terms to such illegal, invalid or unenforceable provision as may be possible and be legal, valid and enforceable.

9.8 Successors and Assigns. To the extent authorized by law, this Agreement shall be binding on and inure to the benefit of the successors and assigns of the respective Parties to this Agreement. No Party may assign its interests in or obligations under this Agreement without the written consent of the other Parties, which consent shall not be unreasonably withheld or delayed.

9.9 Waivers. Waiver of any breach or default hereunder shall not constitute a continuing waiver or a waiver of any subsequent breach either of the same or of another provision of this Agreement, and forbearance to enforce one or more of the remedies provided in this Agreement shall not be deemed to be a waiver of that remedy.

9.10 Attorneys' Fees and Costs. The prevailing Party in any litigation or other action to enforce or interpret this Agreement shall be entitled to reasonable attorneys' fees, expert witnesses' fees, costs of suit, and other and necessary disbursements, in addition to any other relief deemed appropriate by a court of competent jurisdiction.

9.11 Necessary Actions. Each Party agrees to execute and deliver additional documents and instruments and to take any additional actions as may be reasonably required to carry out the purposes of this Agreement.

9.12 Compliance with Law. In performing their respective obligations under this Agreement, the Parties shall comply with and conform to all applicable laws, rules, regulations and ordinances.

9.13 Third Party Beneficiaries. This Agreement shall not create any right or interest in any non-Party or in any member of the public as a third party beneficiary.

9.14 Notices. All notices, requests, demands or other communications required or permitted under this Agreement shall be in writing unless provided otherwise in this Agreement and shall be deemed to have been duly given and received on: (i) the date of service if served personally or served by facsimile transmission on the Party by delivery to the person(s) at the address(es) designated below, which designation may be changed from time to time by a Party in writing; (ii) on the first day after mailing, if mailed by Federal Express, U.S. Express Mail, or other similar overnight courier service, postage prepaid, and addressed as provided below, or (iii) on the third day after mailing if mailed to the Party to whom notice is to be given by first class mail, registered or certified, postage prepaid, addressed as follows:

Total:	**$ 4,197,009**	**100%**

Exhibit B

EQUITABLE ALLOCATION METHOD

The Parties to this agreement have agreed to equitably share costs and establish the voting weight for each Party using the following method, which shall be performed annually after the annual submittal of the Western-San Bernardino Watermaster Report to the Court. The details for this method are included in a Microsoft Excel Spreadsheet titled *BTAC Equitable Allocation Method SBBA 1.18.18.xlsx*, as amended by the GC from time to time, which is incorporated here by reference. Copies of that file have been made available to all parties.

I. Calculation of the Equitable Operations and Maintenance (O&M) Cost.

The equitable distribution of the O&M Costs amongst the Parties shall be calculated from the approved budget, as follows:

$$Equitable\ O\&M\ Cost_{\ Plaintiffs} = 0.2795 \times O\&M\ Costs$$

$$Equitable\ O\&M\ Cost_{\ Non\ Plaintiffs} = Proportion\ of\ Total\ Pumping \times 0.7205 \times O\&M\ Costs$$

where,

O&M Costs = annual budgeted or actual costs to operate and maintain the facilities needed to recharge supplemental water into the SBBA that have been reviewed and approved by the Council

$$\text{Proportion of Total Pumping (\%)} = \frac{\text{Party's total SBBA pumping}}{\text{Non-Plaintiff Total SBBA Pumping}}$$

where,

Party's total SBBA pumping (acre-feet) = the Party's total amount pumped from the SBBA for the previous complete calendar year, as published by the Western-San Bernardino Watermaster, and adjusted for any water pumped by one Party and received by another Party, to coordinate with non-parties still paying the groundwater charge, Parties may be requested to report production to the SBVWCD, as needed.

Non-Plaintiff Total SBBA Pumping (acre-feet) = total Non-Plaintiff pumping of the parties for the previous complete calendar year, as recorded by the Western-San Bernardino Watermaster.

II. Calculation of the Equitable Water Cost.

The equitable distribution of the water cost for sustainability will only be paid by the Non-Plaintiff parties and shall be calculated, as follows:

$$Equitable\ Water\ Cost = Party\ Gap + Sustainability$$

where,

$$\underline{\text{Party Gap (\$)}} = \frac{\left(Gap_{1959-63} + Gap_{Last\ 5\ Years}\right)}{2} * SWP\ Cost$$

where,

$\frac{\left(Gap_{1959-63} + Gap_{Last\ 5\ Years}\right)}{2} < 0$, else Party Gap ($) = $0

Gap $_{1959-63}$ (acre-feet) = $GWSY_{1959-63}$ + $SW_{1959-63}$ - Demand $_{Previous\ Year}$

Gap $_{Last\ 5\ Years}$ (acre-feet) = $GWSY_{Last\ 5\ Years}$ + $SW_{Last\ 5\ Years}$ - Demand $_{Previous\ Year}$ + Net New Recycled $_{Previous\ Year}$

where,

$GWSY_{1959-63}$ = local groundwater supplies available to a Party as a portion of their base period safe yield.

The **base period safe yield** for the SBBA has been proportioned amongst the Parties as described below:

where,

$GWSY_{1959-63}$ = Safe $Yield_{1959-63}$ – $SW_{1959-63}$

$SW_{1959-63}$ = average surface water usage by a party from 1953-1963

Demand $_{Previous\ Year}$ = total water demand calculated for the Party for the previous year using published data, as approved by the Council.

$GWSY_{Last\ 5\ Years}$ = local groundwater supplies available to a Party as a portion of their current Safe Yield.

The **safe yield of the last 5 years** for the SBBA will be proportioned amongst the Parties as described below.

where,

$GWSY_{Last\ 5\ Years}$ = Safe $Yield_{Last\ 5\ Years}$ – $SW_{Last\ 5\ Years}$

$SW_{Last\ 5\ Years}$ = average surface water usage by a party within the last 5 years.

Net New Recycled $_{Previous\ Year}$ = The amount of recycled water from the previous year minus Recycled $_{1959-63}$

where,

Recycled$_{1959-63}$ is the amount of recycled water used in the base period

Sustainability ($) = Water Use x (Total Equitable Water Cost – Total Gap ($))

where,

$$\text{Water Use (\%)} = \frac{\text{Party Water Use (acre-feet)}}{\text{Total Water Use (acre-feet)}}$$

where,

Party Water Use (acre-feet) = the Party's total average water use over the past, complete, 5 year period (surface water, groundwater, recycled water, imported water, etc.)

Total Water Use (acre-feet) = Summation of each individual Party Water Use

Total Equitable Water Cost = Sustainable Amount x SWP Cost

where,

Sustainable Amount (acre-feet) = The amount of SWP water, in acre-feet, needed to achieve long-term sustainability which shall be obtained from the latest edition of the San Bernardino Valley Regional Urban Water Management Plan, Average Scenario for the latest planning year plus the published reliability factor, currently 10%

SWP cost ($/acre-foot) = The cost for recharged SWP water as published in the San Bernardino Valley Municipal Water District Resolution 888, as amended

Total Gap ($) = Summation of each individual Party Gap ($) for all Parties

Proportioning Safe Yield.

The Western-San Bernardino Judgment does not apportion the safe yield by water agency. The Parties agree that, for purposes of this agreement, the Safe Yield will be apportioned, as follows:

Safe Yield$_{1959\text{-}63}$: The safe yield during the Base Period was proportioned as follows:

Agency	Safe Yield$_{1959\text{-}63}$
Bear Valley Mutual Water Company	12,996
City of Colton	3,150
City of Loma Linda	1,855
City of Redlands	26,598
City of Rialto	1,890
City of San Bernardino	19,425
East Valley Water District	13,599
Fontana Union Water Company	14,221
Loma Linda University	1,016
Mountain View Power Co.	1,040
Muscoy Mutual Water Company No. 1	1,767
San Bernardino County - Facility Management	1,532
San Bernardino Valley M.W.D.	-
Terrace Water Company	984
West Valley Water District	11,752
Yucaipa Valley Water District	-

Other Non-Plaintiff Extractions	55,412
Non-Plaintiff Total:	**167,238**

Safe $Yield_{Last\ 5\ years}$: The safe yield for the previous 5, complete, calendar years shall be proportioned based upon the total water use for each Party, as follows:

$Safe\ Yield_{Last\ 5\ Years} = Water\ Use\ X\ Safe\ Yield_{Non\ Plaintiffs}$

Where,

Water Use is a percentage (%) and is defined above

$Safe\ Yield_{Non\ Plaintiffs}$ = defined by the Western-San Bernardino Watermaster from time to time, currently 172,745 acre-feet

Credit for Water. A party can provide a new regional supply for basin benefit and receive monetary credit towards their Equitable water cost.

Credit for Water ($) = water provided for basin benefit x SWP Cost

where,

Water provided for basin benefit = local surface water available to an agency that is controlled by that agency and intentionally delivered for groundwater recharge into the SBBA or new recycled water an agency is using to offset potable water use or is recharging into the SBBA above the amount of recycled water that agency was utilizing during the base period

SWP Cost = defined above

III. Formula for Voting Weight. The voting weight for each Party will be calculated, as follows:

$$Voting\ Weight = \frac{Total\ Party\ Cost}{Total\ Costs}$$

Where,

Total Party Cost = Equitable O&M $Cost_{Non\ Plaintiffs}$ + Equitable Water Cost

Total Costs = 0.7205 x O&M Costs + Total Sustainable Water Cost

The total sum of all of the individual Voting Weight values shall be equal to 1.0.

Planning Memorandum of Understanding
by and between the San Bernardino County Flood Control District and
San Bernardino Valley Water Conservation District

RECITALS

WHEREAS, the San Bernardino County Flood Control District (FCD) was created by the San Bernardino County Flood Control Act of 1939, California Water Code Appendix section 43-1 *et seq.* (Flood Control Act). The Flood Control Act specifies that the FCD's primary purpose is to provide for the control of flood and storm waters and, secondarily, to conserve such flood and storm waters, and other waters, for beneficial uses in FCD's district area by spreading, storing, retaining, and through percolation.

WHEREAS, in 1910, the Water Conservation Association (WCA) was organized to conserve the water of the Santa Ana River by storing it in the groundwater basin for future use. In 1931, local citizens voted to create the **San Bernardino Valley Water Conservation District** (SBVWCD) as a public agency to protect against the excessive export of the local surface water by downstream agencies. WCA was dissolved in the early 1940s, and all land and water property were transferred to SBVWCD.

WHEREAS, SBVWCD is now constituted as a water conservation district, duly formed and existing under the authority of California Water Code sections 74000 et. seq. SBVWCD has as its primary purpose the capture, spread, and recharge of water, both native and imported, over groundwater recharge facilities it owns, operates, and leases, and the stewardship of lands for compatible water supply and quality, mineral production, and the preservation of sensitive habitats.

WHEREAS, FCD owns and operates a number of flood control facilities within SBVWCD's boundaries.

WHEREAS, SBVWCD has identified FCD's facilities into which storm water flows may be diverted for water recharge purposes, provided such use will not impair the primary purpose and function of FCD facilities, which is and is to remain to maintain adequate flood protection for the safety and protection of the public.

WHEREAS, the potential for such recharge use is at this time conceptual, and requires additional study, including the identification of eligible facilities, the amount and quality of storm water flows potentially available for recharge, the location and capacity of facilities to accommodate such flows, the secondary impacts such recharge might have on groundwater levels, migration of contaminant plumes, sand and gravel extraction or other land uses in the vicinity, subsidence protection, endangered and sensitive species habitat preservation, and related concerns.

WHEREAS, SBVWCD has preliminarily identified FCD facilities for future study of potential recharge, which facilities are more specifically depicted in Exhibit 1 hereto ("Initial Facilities").

WHEREAS, FCD and SBVWCD wish to enter into this Planning Memorandum of Understanding (MOU) to describe, in general terms, their interests in coordinating their efforts to plan and evaluate the practical, environmental, and financial feasibility of such combined use of FCD's facilities.

WHEREAS, as provided herein, this MOU is for undertaking investigations and feasibility studies in contemplation of possible future use of FCD facilities, and at this juncture does not commit either party to any project or future agreement. Any specific agreed-upon use of FCD facilities for recharge will be set forth in a separate water spreading agreement between the parties, for which the requisite California Environmental Quality Act (CEQA) analysis shall be conducted prior to entering into future agreements to approve or implement any specific project.

NOW, THEREFORE, it is mutually agreed as follows:

1. **Recitals**.

The recitals set forth above are true and correct and incorporated herein.

2. **Term.**

This MOU shall have a term of 10 years from the date on which the last party executes this MOU unless earlier terminated as set forth herein. This MOU may be extended by the parties for up to two (2) subsequent 10-year periods, pursuant to written amendment signed by both parties. Either party may terminate this MOU by providing the other party with ninety (90) written notice, provided, however, that termination of this MOU shall not terminate any water spreading agreements the Parties may have entered into as of the date this MOU itself is terminated, and any such water spreading agreements shall be governed by their own termination provisions, if any.

3. **General Planning Efforts.**

3.1 Preliminary Report. In order to evaluate the Initial Facilities (see Exhibit 1) for the use of storm water recharge, SBVWCD shall prepare and submit to FCD a preliminary report, in a form to mutually agreed upon by the parties, identifying the particular FCD facility, the anticipated amount of storm water to be captured and diverted to that facility, and any SBVWCD improvements anticipated to be required for use of the FCD facility for storm water diversion, storage, or recharge. Parties agree to hold one or more scoping meetings where FCD will provide information relating to its operational, engineering, and environmental constraints and SBVWCD will provide concepts to address those constraints while meeting the need and purposes each of the projects. FCD will provide access to the Initial Facilities to SBVWCD, without charge, to conduct field investigations and surveys necessary to finalize the concept designs. Such investigations and field studies by SBVWCD may include, but are not limited to, surveys, soil borings or tests, geologic sampling, plant or animal habitat counts or surveys, or water quality, quantity, or flow measurements or sampling, so long as such

investigations and field studies do not materially impact FCD's maintenance of use of the Initial Facilities. SBVWCD will prepare and submit the Preliminary Report for sites individually or as groups to address such constraints, impacts of the project(s) as an initial step in the permitting process.

3.2 Assessment of Preliminary Report and Planning. Once the preliminary report is submitted by SBVWCD for the specific use of a particular FCD facility, the parties shall allocate sufficient staff time and resources to evaluate the joint use/operation of that existing FCD facility for continued effective use for adequate flood control purposes, in conjunction with proposed storm water recharge. During this evaluation process, SBVWCD shall provide to FCD all of the details associated with the proposed use for each FCD facility including, but not limited to, concept-level construction plans and specifications for any proposed improvements or modifications to the FCD facility (including a statement as to which entity will own the improvements after a project specific agreement terminates), a permit plan identifying any permits or clearances required from any agency or regulatory authority other than FCD or SBVWCD, and a proposed operational plan for each FCD facility. To the extent access rights are indicated as necessary or appropriate for storm water recharge in a FCD facility, the parties shall meet and confer to delineate the scope and extent of such access rights. This information will also include the amount of estimated storm water recharge for each facility, and expected quality of such water.

3.3 Assessment of Secondary Effects of Recharge. SBVWCD's Preliminary Report shall also consider the potential secondary effects of storm water recharge to the environment, including, but not limited to, an evaluation of whether such activities will introduce water quality pollutants or mobilize existing groundwater contamination, or will cause land subsidence, liquefaction, or seepage to low lying lands in any basin to be impacted by the replenishment activities of SBVWCD. The parties acknowledge that SBVWCD will be the agency leading this evaluation as it has the appropriate expertise concerning storm water recharge and the water quality. FCD will independently review SBVWCD's evaluation.

3.4 Considering the statutory purposes of the FCD and the goals of SBVWCD, both parties agree that they will determine, on a case by case basis, which agency will be in charge of seeking permits for projects and which agency will be the "Lead Agency" for purposes of complying with CEQA. The responsibility for CEQA compliance and permits shall be specified in a water spreading agreement.

3.5 SBVWCD will work cooperatively with FCD towards SBVWCD's goal of maximizing the quantity of storm water recharge from the existing FCD's facilities, while maintaining or improving the protection of the public from the dangers of flooding.

4. **Primacy of FCD Use.**

4.1 The parties obligations set forth hereunder shall be subject to the primary purpose of FCD and FCD facilities pursuant to the Flood Control Act to protect property and the public from flood waters. The use of FCD facilities for flood control purposes shall be paramount.

4.2 In determining whether to enter into a water spreading agreement, for joint use of an FCD facility for water recharge, FCD shall have the sole discretionary authority to determine what constitutes "adequate flood protection" for the operation of its facilities and to determine whether a proposed recharge activity is consistent with and compatible with its uses of a facility.

4.3 FCD shall have the sole discretionary authority to determine which of its facilities are available for use in re-charge activities proposed by the SBVWCD. Any prospective use of any FCD facility shall be subject to the parties' approval of a water spreading agreement.

5. No Implied Covenants.

Based on the FCD priorities set forth in the Flood Control Act and FCD's discretion provided in this MOU, as well as the general planning nature of this MOU, FCD and SBVWCD acknowledge and agree that no implied covenants attach to this MOU, including, but not limited to, the implied covenant of good faith and fair dealing. Nothing set forth herein shall be deemed to bind FCD's Board of Supervisors to approve a water spreading agreement. Notwithstanding anything to the contrary herein, FCD and its Board of Supervisors retain the sole discretion to authorize the use of FCD facilities for storm water recharge.

6. Assignment.

This MOU may not be assigned by either party without the written consent of the other party.

7. Indemnification and Insurance.

7.1 FCD agrees to indemnify, defend (with counsel approved by SBVWCD) and hold harmless SBVWCD, its employees, officers, agents, and volunteers from any and all claims, actions, losses, damages, and/or liability resulting from FCD's negligent acts or omissions which arise from FCD's performance of its obligations under this MOU.

7.2 SBVWCD agrees to indemnify, defend (with counsel approved by FCD) and hold harmless the FCD, its employees, officers, agents, and volunteers from any and all claims, actions, losses, damages, and/or liability resulting from the SBVWCD's

negligent acts or omissions which arise from the SBVWCD's performance of its obligations under this MOU.

7.3 In the event FCD and/or SBVWCD is found to be comparatively at fault for any claim, action, loss or damage which results from their respective obligations under this MOU, FCD and/or SBVWCD shall indemnify the other to the extent of its comparative fault.

7.4 FCD and SBVWCD shall maintain throughout the term of this MOU such policies of insurance or legally sufficient self-insurance for Automobile Liability, Comprehensive General Liability, and Workers' Compensation that are adequate to protect against all liabilities and indemnification responsibilities arising out of the performance of the terms, conditions or obligations of this MOU.

8. **Jurisdiction**. This MOU shall be governed by the laws of the State of California. If a court of competent jurisdiction declares any portion of this MOU invalid, illegal, or otherwise unenforceable, the remaining provisions shall continue in full force and effect, unless the purposes of this MOU are frustrated. Any dispute or action to enforce any obligation under this MOU shall be filed and resolved in a Superior Court in San Bernardino County, California. In the event of litigation arising from this MOU, each party to the MOU shall bear its own costs, including attorneys' fees.

9. **Signatures.** This MOU may be signed in counterparts, each of which shall constitute an original, and such counterparts shall together constitute one and the same agreement. The parties shall be entitled to sign and transmit an electronic signature of this MOU (whether by facsimile, PDF or other email transmission), which signature shall be binding on the party whose name is contained therein. Each party providing an electronic signature agrees to promptly execute and deliver to the other party an original signed MOU upon request.

10. **Flood Control District Clause.**
All of the FCD's revenues as defined below, have been pledged to secure the payment of the principal and interest on certain bonds and refunding bonds ("Bonds") issued by the FCD in May 2007. The pledge constitutes a first lien on the revenues for the payment of the Bonds. Any payments under this MOU are subject to the prior pledge of revenues described above. FCD payments pursuant to this MOU will be made to the extent there are sufficient funds available after payment of the Bonds. For purposes of this paragraph, "revenues" shall mean all income and revenue received by the FCD from the operation or ownership of the flood and storm water control and conservation facilities ("Flood Control System") of the FCD (including but not limited to, all real and personal property, or any interest therein, and all additions, improvements, betterments and extensions thereto), determined in accordance with Generally Accepted Accounting Principles, including all ad valorem property taxes received by the FCD pursuant to Article XIIIA of the Constitution of the State of California and Section 95 et seq. of the California Revenue and Taxation Code, all rents, royalties and license and permit fees and charges received by the FCD, investment income and all other money howsoever derived by the FCD from the operation or

ownership of the Flood Control System or arising from the Flood Control System, but excluding (a) ad valorem property taxes levied to pay any voter approved general obligation indebtedness of the FCD, (b) assessments levied pursuant to Section 43-7 or Section 43-26.9 of the San Bernardino County Flood Control Act (Cal. Water Code App. Sect. 43-1 et seq.), and (c) grants, advances or contributions in aid of construction, except to the extent such grants are unrestricted and available for any expenditure of the FCD.

11. **Amendments; Entire Agreement**. Any amendments to this MOU, including but not limited to, the addition of FCD facilities, shall be set forth in a writing signed by both parties. This MOU contains the entire agreement of the parties with respect to the subject matter hereof, and supersedes all other prior negotiations, understandings or contracts.

IN WITNESS WHEREOF, the parties have caused this MOU to be executed by their duly authorized officers or representatives as of the last day and year appearing below.

San Bernardino Valley Water Conservation District
Helping Nature Store Our Water

Quick Guide to Fontana Settlement Agreement Amendments

This document summarizes the changes made to the Settlement Agreement dated September 12, 2018 between Plaintiffs and Cross-Defendants San Bernardino Valley Municipal Water District ("Valley District"), Defendants and Cross-Complainants Fontana Union Water Company, San Gabriel Valley Water Company, and Fontana Water Company (collectively, "Fontana"), and Intervenor-Defendant Cucamonga Valley Water District, as amended by subsequent settlement agreements with Plaintiffs and Cross-Defendants West Valley Water District ("West Valley"), the City of Colton ("Colton"), and the City of Rialto ("Rialto").

Recitals

CHANGE	EXPLANATION
Terminology ¶ C	West Valley, Colton, and Rialto are no longer "Non-Settling Plaintiffs," but simply "Parties."
Operative Complaint ¶ D	As for West Valley, Colton, and Rialto, the current operative complaint is the Third Amended Complaint (Nov. 2, 2018). As for Valley District, the current operative complaint is still the Second Amended Complaint (Nov. 24, 2014).
Operative Cross-Complaint ¶ J	As to West Valley, Colton, and Rialto, the current operative cross-complaint is the Second Amended Verified Cross-Complaint (Nov. 14, 2018), which added the 11th cause of action: Breach of Contract – Violation of 1961 Rialto Decree by Colton, Rialto, and West Valley Water District. As for Valley District though, the current operative cross-complaint is still the First Amended Verified Cross-Complaint (Mar. 27, 2015).

Dismissal

CHANGE	EXPLANATION
Payments	In full settlement of all of West Valley's, Colton's, and Rialto's claims in the Litigation, Fontana will cause their insurer Arch Insurance Co. to pay $3M to each party, within 30 days after full execution of the Amendments, and will provide a federal W-2 tax form to each party. But in the event that Arch and Fontana Parties reach an agreement with Rialto, before trial, for more than $3M, then Arch shall pay to each West Valley and Colton the difference.
Releases ¶ 5	The releases include all claims contained in Plaintiff's Third Amended Complaint and Fontana Parties' Second Amended Verified Cross-Complaint. The releases on behalf of West Valley, Colton, and Rialto are unconditional, severable from the other provisions of the Settlement Agreement, and shall remain enforceable even if other provisions of the Settlement Agreement are deemed unenforceable or invalid, so long as West Valley, Colton, and Rialto each receive their $3M.
Stipulation for Dismissal ¶ 10	The Fontana's counsel will prepare and send to Valley District, West Valley, Colton, and Rialto's counsel a stipulation for dismissal, with prejudice, of the claims and cross-claims asserted by the parties. All parties shall promptly execute and Fontana shall promptly file the stipulation with a request for the court to retain jurisdiction.
Retention of Jurisdiction ¶ 10	The stipulation for dismissal will request that the Court retain jurisdiction over the Parties to enforce the settlement agreement, as amended, pursuant to CCP § 664.6. All Parties shall promptly execute and Fontana shall promptly file the request.

Other Agreements

CHANGE	EXPLANATION
Preliminary Injunction former ¶ 3(f), now ¶ 3.1	All extractions by the Fontana Parties within the boundaries of the 1961 Decree area shall be subject to the terms of the preliminary injunction issued by San Bernardino County Superior Court on March 20, 2015, and any subsequent court orders (as in the original Settlement Agreement), until the parties agree otherwise.
Groundwater Council	Within one year of the execution of the Amendment, all parties to the Settlement Agreement will jointly establish a Groundwater Council for the Rialto-Colton Basin. Within 5 years, the Council will conduct studies, modeling runs, and other analyses necessary to develop a plan for sustainable management. It will have the authority to require the parties (except for Valley District) to contribute their fair share towards development of the plan and beneficial projects.
Groundwater Management Plan ¶ 3 (l)	The parties will develop, adopt and implement a Rialto-Colton Basin sustainable groundwater management plan including – if the Parties and other public water suppliers extracting water from the Basin agree – an operating safe yield, a new index well regime, and/or other management tools (e.g. ability to overproduce in any year, subject to replenishment), which may be included in an amended Decree.
Replenishment Accounts ¶ 2(h)-(j)	Valley District will set up and maintain five separate accounts, one each for: (1) Defendants, (2) West Valley, (3) Colton, (4) Rialto, and (5) a general replenishment account. Valley District will disburse limited amounts of money to fund projects that benefit groundwater management in the Rialto Basin. If any party settles with Fontana, they have the option of a replenishment credit account funded either at $6M for Rialto, $4M for Colton, or $3M for West Valley or Defendants OR funded at 37.5% of that amount to be paid within 90 days of the execution of the amendment (provided they request it within 60 days).
Penalties for Overpumping	If a party exceeds its pumping allocation for the water year, it shall pay Valley District to acquire replacement water according to section 3(j) of the settlement agreement. If a party exceeds its pumping allocation by 10% and fails to abide by 3(j), then the party must pay $10,000 per acre-foot for water over the 110% of the allocation to the general replenishment account.

Notice

¶ 11(q)

In addition to the contacts listed in the Settlement Agreement, the following parties shall receive all notices, requests, demands or other communications required or permitted under the Settlement Agreement:

SETTLEMENT AGREEMENT

This Settlement Agreement ("**Agreement**") is entered into and effective this 12th day of September, 2018 by and among Plaintiffs and Cross-Defendants San Bernardino Valley Municipal Water District ("**Valley District**") and Defendants and Cross-Complainants Fontana Union Water Company ("**Fontana Union**"), San Gabriel Valley Water Company, a California Corporation ("**San Gabriel**"), and Fontana Water Company, a division of San Gabriel (collectively, "**Fontana Parties**"), and Intervenor-Defendant Cucamonga Valley Water District ("**Cucamonga**"). Each of the Parties to this Agreement is sometimes referred to as a "**Party**" and are collectively sometimes referred to as the "**Parties.**"

Recitals

A. The Parties are all committed to sustainable groundwater management principles. In furtherance of those important principles, the Parties will implement the specific sustainable groundwater practices and principles expressly set forth in this Agreement. In addition, the Parties are committed to cooperating and collaborating with other water producers, including but not limited to the Non-Settling Plaintiffs as defined below, on additional groundwater sustainability measures, including replenishing the Lytle Creek, Rialto-Colton, and Rialto Basins, as well as the San Bernardino Basin Area, and establishing one or more groundwater sustainability councils to promote reliable water supplies for the beneficial use of the customers they serve.

B. The Parties have been engaged in litigation involving groundwater rights, groundwater management, and related matters entitled *San Bernardino Valley Municipal Water District et al., v. San Gabriel Valley Water Company et al.*, Case No. CIVDS 1311085, San Bernardino Superior Court (the "**Litigation**" as used in this Agreement includes all claims that were or could have been alleged therein.).

C. Valley District together with Plaintiffs West Valley Water District ("West Valley"), City of Colton ("**Colton**") and City of Rialto ("**Rialto**") (West Valley, Colton and Rialto are collectively the "**Non-Settling Plaintiffs**") filed a complaint in the Superior Court of California for the County of San Bernardino on September 12, 2013 against the Fontana Parties.

D. The currently operative complaint is the Second Amended Complaint filed on November 24, 2014. In the Second Amended Complaint, Valley District asserts six constitutional, equitable and statutory claims concerning the Fontana Parties' groundwater rights and extractions from the Rialto-Colton Basin, including claims arising out of the court decree dated December 22, 1961 (the "**1961 Decree**") in the case *The Lytle Creek Water and Improvement Company v. Fontana Ranchos Water Company*, et al., San Bernardino County Superior Court, Case No. 81264. The 1961 Decree governs groundwater pumping from a portion of the Rialto-Colton Basin, which is defined therein as the "**Rialto Basin.**" The claims also concern the Fontana Parties' pumping from a portion of the Rialto-Colton Basin that is outside the Rialto Basin as defined by the 1961 Decree, referred to as the "**Paper Gap**" in the Second Amended Complaint, and referred to herein as "**No Man's Land.**"

E. Valley District also asserts claims concerning the Fontana Parties' pumping from the Lytle Creek region of the San Bernardino Basin Area.

F. The Non-Settling Plaintiffs separately asserted six claims alleging breach of contract and other claims arising from the 1961 Decree.

G. The San Bernardino Basin Area and most but not all of the Rialto-Colton Basin are located within the service area of Valley District. A map of the groundwater basins at issue in the Litigation is attached to the Agreement as Exhibit A.

H. On December 30, 2014, Cucamonga served a Complaint in Intervention as a Defendant-Intervenor in the action.

I. On December 8, 2014, the Fontana Parties filed a Verified Cross-Complaint against Valley District and the other Plaintiffs.

J. The currently operative cross-complaint is the First Amended Verified Cross-Complaint filed on March 27, 2015. The Fontana Parties assert the First, Third, Fourth, Fifth and Sixth Causes of Action against Valley District and the other Plaintiffs for legal, declaratory, and equitable relief concerning their water rights and pumping from the Rialto-Colton Basin, from "No Man's Land," and from the San Bernardino Basin Area. The Fontana Parties also assert claims directly against only Rialto and Valley District for breach of contract and other legal, equitable, and statutory grounds, alleging wrongful activities related to Cross-Defendants' groundwater pumping and sales.

K. The Parties hereto deny and dispute each and all of the claims and cross-claims against them.

L. The Parties now wish to settle and resolve all claims arising out of the Litigation and to promote sustainable management of groundwater in the Rialto and Rialto-Colton Basins and in the San Bernardino Basin Area, including the Lytle Creek Basin, by means of this Agreement, as follows:

Agreements

In consideration of the promises, agreements and releases contained herein and for good and valuable consideration, the Parties agree as follows:

1. *Incorporation of Recitals*

The foregoing Recitals are incorporated herein by reference as though fully set forth.

2. *Replenishment and Sustainability Assessment*

a. Upon execution of this Agreement, the Fontana Parties may apply to become members of the Groundwater Council for the San Bernardino Basin Area. If the Fontana Parties choose to seek to join the Groundwater Council, Valley District will promptly support that request in writing. The Parties also agree that, if there

are other management groups where the Fontana Parties have not been included due, in part, to the Litigation, they may apply to join those groups and Valley District will support their participation in those groups.

b. No later than each February 1, the Fontana Parties will pay Valley District an annual Replenishment and Sustainability Assessment on water that the Fontana Parties produced in the prior calendar year from the Lytle Creek region of the San Bernardino Basin Area commencing upon the effective date of this Agreement. The Replenishment and Sustainability Assessment will start at $127.90 per acre-foot and will be indexed to percentage increases in Metropolitan Water District of Southern California's Tier I Untreated Water rate, or the equivalent.

c. Valley District shall use the proceeds of the Replenishment and Sustainability Assessment, save for an amount needed to satisfy the Fontana Parties' pro rata share of the groundwater sustainability charge for the San Bernardino Basin Area pursuant to the San Bernardino Basin Groundwater Council Framework Agreement, dated February 23, 2018 or any successor agreement, to obtain replenishment water for delivery to the Rialto Basin in an amount of 61,000 acre-feet, which fulfills all of the Parties' requirements for the replenishment of the Rialto Basin as determined by Valley District. Valley District shall apply these funds to cover all of its direct costs incurred in obtaining and delivering such replenishment water, including, without limitation, acquisition and transportation costs, facility costs (capital and operation/maintenance), and any similar direct costs incurred as part of the actions (but not including staff time, overhead or salaries/benefits) needed to accomplish the replenishment. Valley District may accomplish the replenishment by means of exchanges, in-lieu recharge of the Rialto Basin, direct recharge of that Basin, direct deliveries to the Fontana Parties, or other means reasonably acceptable to the Parties. By agreeing to the Replenishment and Sustainability Assessments in this Agreement, the Fontana Parties do not admit that they are legally obligated to replenish the Rialto Basin.

d. Valley District agrees that it will use its best efforts to obtain such replenishment water in a timely basis at the lowest cost, recognizing that the timing of the purchase of water will be at the reasonable discretion of Valley District. At no time shall Valley District purchase water at a rate greater than the then-current Metropolitan Water District of Southern California's Tier II Untreated Water rate or equivalent. Within 30 days after each such purchase of replenishment water, Valley District will account to the Fontana Parties in a statement specifying the seller, the amount of water purchased, the price and other anticipated direct costs of purchase and replenishment. The Parties will cooperate, together with the Non-Settling Plaintiffs, regarding such purchases and regarding the timing, location, and manner in which the purchased water will be replenished to the Basin.

e. Valley District shall provide notice to the other Parties during the calendar year in which Valley District anticipates that it will complete the replenishment as provided in this Agreement of 61,000 acre-feet into the Rialto Basin and shall convene a meeting to determine whether or not to modify the Replenishment and

Sustainability Assessment rate for water extracted by the Fontana Parties from the Lytle Creek region of the San Bernardino Basin Area.

f. Upon achieving the replenishment described in subparagraph [c] above, Valley District agrees to dedicate the proceeds of the Replenishment and Sustainability Assessment on a regional basis to fund water supply projects that benefit the Rialto Basin and/or the Lytle Creek region of the San Bernardino Basin Area. Such regional projects may include, but are not limited to, the importation of water, the development of spreading basins and other facilities to capture local stormwater runoff, and other projects that Valley District, acting in cooperation and in conjunction with other agencies, may deem appropriate to enhance water supply reliability for all public water suppliers in the Rialto Basin and/or the Lytle Creek region of the San Bernardino Basin Area.

g. The Parties shall rely on the following principles in determining whether or not, and if so, how to modify the rate charged for water extracted by the Fontana Parties from the Lytle Creek region of the San Bernardino Basin Area, provided that the rate shall not exceed the then-current indexed rate identified in paragraph 2(b) above:

i. Valley District, acting in cooperation and in conjunction with other agencies that extract water from the Rialto Basin, will seek to purchase water at the lowest possible cost for recharge in the Lytle Creek region of the San Bernardino Basin Area and the Rialto Basin and to support the long-term sustainability, reliability, and reasonable and beneficial use of groundwater extractions from the Lytle Creek region of the San Bernardino Basin Area and the Rialto Basin.

ii. Valley District, acting in cooperation with other agencies that extract water from the Rialto Basin and the Lytle Creek region of the San Bernardino Basin Area, will develop, permit, fund and construct such facilities (or improvements to existing facilities) that may be necessary or useful to ensure that the Parties and other agencies that extract water from the Lytle Creek region of the San Bernardino Basin Area and the Rialto Basin have a reliable and sustainable water supply for their respective customers.

iii. The Parties agree that the long-term sustainable management of the San Bernardino Basin Area (including but not limited to the Lytle Creek Basin) and the Rialto Basin shall not cause stranded assets and shall attempt to maximize the water supplies available to all parties extracting water from those Basins.

3. *Cooperative and Sustainable Groundwater Management of the Rialto-Colton Basin*

The Parties agree to the following principles for enhanced and sustainable groundwater management of the Rialto-Colton Basin, consistent with the constitutional requirement to put all water to reasonable and beneficial use. The Parties will undertake to work

cooperatively with, and will encourage, other public water suppliers in that Basin to adopt these principles as the basis for a long-term cooperative, enhanced, and sustainable groundwater management agreement to be included in an amended 1961 Decree that will promote and assure sustainable groundwater supplies.

a. Sustainable groundwater management of the Rialto-Colton Basin shall not cause stranded assets and shall attempt to maximize the water supplies available to all public water suppliers extracting water from the Basin.

b. The Parties agree that they will respect the boundary between Valley District and the Metropolitan Water District of Southern California and will work cooperatively together to ensure that all water for which there is a legal obligation to pay when it moves across that boundary is charged at the rate applicable to such water.

c. The Parties agree to develop accounting principles to ensure that all Parties' use and movement of water fully complies with the terms of this Agreement.

d. For all of the Parties' pumping pursuant to the 1961 Decree and from No Man's Land, any pumping curtailment for a given year will take effect in the month following the notice of the measurement of the spring high index well levels and remain in effect until modified by the notice of the measurement of the following year's spring high index well levels.

e. The Fontana Parties may, without objection from Valley District, extract 5,014 acre-feet/year from wells located in No Man's Land (as shown on the map attached hereto as Exhibit A). Such extraction allocation may be combined with and also may be utilized together with the Fontana Parties' pumping allocation from wells within the Rialto Basin that was established pursuant to the 1961 Decree. The Parties agree to work with the Non-Settling Parties to develop a management plan that would evaluate and address the extractions from wells outside the Rialto Basin by Non-Settling Parties that may significantly affect the Rialto Basin. All wells and extractions discussed in this subsection shall be subject to and governed by the provisions of the 1961 Decree, including without limitation by paragraph 7 of the 1961 Decree.

f. All extractions by the Fontana Parties within the boundaries of the 1961 Decree area shall be subject to the terms of the Preliminary Injunction issued by the San Bernardino County Superior Court on March 20, 2015, and any subsequent court orders.

g. Valley District, using funds from the Fontana Parties and other public water suppliers from the Rialto Basin, shall seek to purchase water for importation into the Rialto Basin that will enable all public water suppliers using the Rialto Basin to extract the water needed by their customers in their respective service areas each year on a sustainable basis, *provided that* Valley District shall select projects or replenishment locations to reflect the Parties' respective payments towards such replenishment.

h. To facilitate such long-term sustainable and reliable use of the Rialto Basin, the Parties intend to create a water market so that any public water supplier that does not need to use its entire allocation from the Rialto Basin in a given year may lease the unused allocation to another public water supplier, under terms and conditions established by those parties, *provided that* all such arrangements must be consistent with this Agreement and all water provided directly or indirectly by Valley District that is delivered outside of Valley District's service area shall be replaced at the appropriate full-cost rate of either the Metropolitan Water District of Southern California or Valley District, which cost shall be solely borne by the party receiving the water.

i. The Parties support and encourage the importation of water to serve multiple purposes, specifically:

   i. Replenishing the Rialto Basin in an amount of 61,000 acre-feet for the reasons and in the manner described in paragraph [2] above.

   ii. To allow all parties that extract water from the Rialto Basin to meet the reasonable and beneficial demands of their respective customers.

   iii. Providing replenishment of the Rialto Basin to ensure the sustainability of water extractions from the Rialto Basin, which includes the importation of water to moderate the hydrologic cycle on both an intra-annual and a long-term basis.

j. Any party to the 1961 Decree may lease or purchase unused water rights from any other party to the 1961 Decree on terms mutually acceptable to those parties, *provided that* any such lease or purchase shall be consistent with the terms of this Settlement Agreement. If any party to the 1961 Decree extracts in the future more water than it is entitled to extract (such entitlement shall include any future water rights acquired by lease or purchase) in any given year, then that party shall pay Valley District within 12 months thereafter to acquire replacement water. Valley District will acquire such replacement water in a manner and at a time that minimizes its cost; provided, however, that the quantity of such additional extractions and replacement water by all parties to the 1961 Decree in any given year shall not be greater than ten percent (10%) of Valley District's annual Rialto Basin recharge capacity for that year unless a greater amount is authorized by or under the authority of Valley District's General Manager.

k. The Parties will jointly seek concurrence from the parties to the 1961 Decree to modify that Decree to utilize a calendar year rather than an October 1 through September 30 water year.

l. The Parties are willing to develop, adopt and implement a Rialto-Colton Basin sustainable groundwater management plan including, if the Parties and other public water suppliers extracting water from the Rialto-Colton Basin agree, an operating safe yield, a new index well regime, and/or other groundwater

management tools (including the ability to overproduce in any year subject to replenishment), which may be included in an amended Decree.

4. *Valley District Sales of Water to San Gabriel*

a. Upon placement of an order per Resolution 888, Valley District will deliver State Water Project water which San Gabriel prepaid and pre-purchased from Valley District from January 2003 through June 2006.

b. Upon placement of an order per Resolution 888, Valley District will fulfill its duties pursuant to the Mutual Assistance Letter agreement dated August 4, 2008 between Valley District, Metropolitan Water District of Southern California, and Inland Empire Utilities Agency (**IEUA**) for delivery of State Water Project water to San Gabriel through IEUA's CB19 connection.

c. Upon placement of an order per Resolution 888, Valley District and San Gabriel will promptly activate their existing physical connection to enable San Gabriel to take delivery of State Water Project water for delivery through San Gabriel's system to its customers (1) in Valley District's territory at Valley District's in-district rate, and (2) in IEUA's territory with IEUA's and Metropolitan Water District of Southern California's concurrence and at IEUA's Tier 1 water rate.

5. *Release*

The Parties, and each of them, on behalf of themselves, and each of their respective past and present subsidiaries, parents, successors and predecessors, affiliates, related entities and divisions, partners, members, principals, associates, directors, managing or other agents, management personnel, officers, directors, shareholders, administrators, servants, employees, staff, attorneys, consultants, advisors, accountants, insurers, representatives, heirs and assigns and on behalf of any person or entity who may claim by or through them (all collectively, "**Associated Parties**"), hereby release, discharge, and agree not to sue each other and each other's Associated Parties, from any and all liabilities, claims, causes of action, obligations, demands, losses, damages, costs or expenses of any kind or nature whatsoever, past or present, ascertained or unascertained, known or unknown, suspected or unsuspected, claimed or unclaimed, which they have, or have ever had, by virtue of any act, omission, reason, cause or thing arising from or related to the Litigation, i.e., the claims contained in the Plaintiffs' Second Amended Complaint and the Fontana Parties' First Amended Cross-Complaint.

In addition, Valley District hereby releases the Fontana Parties from all future claims that Valley District may make: (1) based on any provision of either the Orange County Judgment or the Western Judgment that imposes limits or restrictions on the Fontana Parties' Lytle Creek water rights, and (2) for alleged damages caused by the Fontana Parties' export of Lytle Creek water from the SBBA. These releases of future claims are expressly conditioned on the Fontana Parties' diversions, extractions, and deliveries pursuant to such water rights being consistent with the terms of this Agreement, including but not limited to the Replenishment and Sustainability Assessment provisions of Section 2 of this Agreement.

None of the foregoing releases shall be construed to release a Party's future claim that another party has violated the terms of this Agreement or to preclude any party's future enforcement of the terms of this Agreement.

6. *Use of the Term Assessment*

The Parties' use herein of the term "assessment" to describe payments made under this Agreement is not intended by the Parties to bring such payments within the scope of Article XIII C of the California Constitution, the Municipal Water District Law (California Water Code sections 71000 *et seq.*) nor any other legal requirement associated with "assessments."

7. *Agreement re Use of Recalibrated Model*

The Parties agree to limit use of the 2018 Recalibrated Rialto-Colton Basin Groundwater Model, which was developed by Geoscience and other parties and consultants (the "Model"), as follows:

a. The Model may not be used in any litigation or administrative proceedings in a manner adverse to any Party hereto. The Parties hereto reserve and do not waive any of their claims of privilege or other objections to the use of the Model in the Litigation by any Non-Settling Plaintiffs. Notwithstanding the April 6, 2016 Agreement to Protect Confidentiality of Communications in Settlement Negotiations, the Parties hereto may use any version of the Model in litigation or administrative proceedings against other parties, or for other purposes, so long as it is not used against any of the Parties hereto.

b. Specifically, the Parties agree not to object to use of the Model as follows: (a) in connection with efforts by the United States Environmental Protection Agency and other parties to remediate groundwater contamination in any groundwater basin, (b) in support of Valley District's development of the Santa Ana River Watershed Integrated Model, and (c) in connection with any Party's groundwater recharge and other groundwater management plans and projects. Nothing herein is intended to preclude any use of the Santa Ana River Watershed Integrated Model.

8. No Admissions

The Parties agree that California Evidence Code sections 1152 and 1154, and Federal Rule of Evidence 408, render this Agreement inadmissible as evidence against any of the Parties in any adjudicative or quasi-adjudicative proceeding, except that either Party may offer this Agreement as evidence in an action that seeks to compel the other Party to perform its obligations under this Agreement. This Agreement may also be admitted to prove that the Fontana Parties have agreed to adequate replenishment of the Rialto Basin. Nothing in this Settlement Agreement admits or shall be construed as admitting any wrongdoing by any Party. In particular, and without limiting the generality of the preceding sentence, the Fontana Parties do not admit that they violated the 1961 Decree.

9. *Costs and Fees*

Each Party shall bear its own fees and costs, including attorneys' and experts' fees, associated with the Litigation and this Agreement, including any dispute or other proceeding regarding this Agreement that may arise in the future.

10. *Dismissal of the Action*

Within five (5) business days of execution by all Parties, Valley District's counsel shall prepare and send to the Fontana Parties' counsel a Stipulation for Dismissal, with prejudice, of the claims and cross-claims asserted by Valley District and the Fontana Parties against each other. Within five (5) business days of receiving Fontana Parties' counsel's signature (or permission to use an e-signature), Valley District's counsel shall file the Stipulation for Dismissal with the Court. The Parties agree to seek judicial approval of this Agreement.

11. *General Provisions*

a. *Authority*. Each signatory of this Agreement represents that s/he is authorized to execute this Agreement on behalf of the Party for which s/he signs. Each Party represents that it has legal authority to enter into this Agreement and to perform all obligations under this Agreement.

b. *Amendment*. This Agreement may be amended or modified only by a written instrument executed by each of the Parties to this Agreement.

c. *Civil Code Section 1542 Waiver*. The Parties expressly waive the rights provided under California Civil Code Section 1542, which states that:

A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH DEBTOR.

The Parties understand the significance and consequences of this California Civil Code Section 1542 waiver, they assume the risk of any unknown facts and claims released by this Agreement, and they hereby assume full responsibility for any damages or losses covered by this waiver.

Initials: MWB _____ _____ _____ _____

d. *Jurisdiction and Venue*. This Agreement shall be governed by and construed in accordance with the laws of the State of California. Any suit, action, or proceeding brought under the scope of this Agreement shall be brought and maintained to the extent allowed by law in the County of San Bernardino, California.

9. *Costs and Fees*

Each Party shall bear its own fees and costs, including attorneys' and experts' fees, associated with the Litigation and this Agreement, including any dispute or other proceeding regarding this Agreement that may arise in the future.

10. *Dismissal of the Action*

Within five (5) business days of execution by all Parties, Valley District's counsel shall prepare and send to the Fontana Parties' counsel a Stipulation for Dismissal, with prejudice, of the claims and cross-claims asserted by Valley District and the Fontana Parties against each other. Within five (5) business days of receiving Fontana Parties' counsel's signature (or permission to use an e-signature), Valley District's counsel shall file the Stipulation for Dismissal with the Court. The Parties agree to seek judicial approval of this Agreement.

11. *General Provisions*

a. *Authority.* Each signatory of this Agreement represents that s/he is authorized to execute this Agreement on behalf of the Party for which s/he signs. Each Party represents that it has legal authority to enter into this Agreement and to perform all obligations under this Agreement.

b. *Amendment.* This Agreement may be amended or modified only by a written instrument executed by each of the Parties to this Agreement.

c. *Civil Code Section 1542 Waiver.* The Parties expressly waive the rights provided under California Civil Code Section 1542, which states that:

A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH DEBTOR.

The Parties understand the significance and consequences of this California Civil Code Section 1542 waiver, they assume the risk of any unknown facts and claims released by this Agreement, and they hereby assume full responsibility for any damages or losses covered by this waiver.

Initials: _____ _____ _____ _____

d. *Jurisdiction and Venue.* This Agreement shall be governed by and construed in accordance with the laws of the State of California. Any suit, action, or proceeding brought under the scope of this Agreement shall be brought and maintained to the extent allowed by law in the County of San Bernardino, California.

9. *Costs and Fees*

Each Party shall bear its own fees and costs, including attorneys' and experts' fees, associated with the Litigation and this Agreement, including any dispute or other proceeding regarding this Agreement that may arise in the future.

10. *Dismissal of the Action*

Within five (5) business days of execution by all Parties, Valley District's counsel shall prepare and send to the Fontana Parties' counsel a Stipulation for Dismissal, with prejudice, of the claims and cross-claims asserted by Valley District and the Fontana Parties against each other. Within five (5) business days of receiving Fontana Parties' counsel's signature (or permission to use an e-signature), Valley District's counsel shall file the Stipulation for Dismissal with the Court. The Parties agree to seek judicial approval of this Agreement.

11. *General Provisions*

a. *Authority.* Each signatory of this Agreement represents that s/he is authorized to execute this Agreement on behalf of the Party for which s/he signs. Each Party represents that it has legal authority to enter into this Agreement and to perform all obligations under this Agreement.

b. *Amendment.* This Agreement may be amended or modified only by a written instrument executed by each of the Parties to this Agreement.

c. *Civil Code Section 1542 Waiver.* The Parties expressly waive the rights provided under California Civil Code Section 1542, which states that:

A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE, WHICH IF KNOWN BY HIM OR HER MUST HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH DEBTOR.

The Parties understand the significance and consequences of this California Civil Code Section 1542 waiver, they assume the risk of any unknown facts and claims released by this Agreement, and they hereby assume full responsibility for any damages or losses covered by this waiver.

Initials: _____ _____ _____ _____

d. *Jurisdiction and Venue.* This Agreement shall be governed by and construed in accordance with the laws of the State of California. Any suit, action, or proceeding brought under the scope of this Agreement shall be brought and maintained to the extent allowed by law in the County of San Bernardino, California.

e. *Headings*. The paragraph headings used in this Agreement are intended for convenience only and shall not be used in interpreting this Agreement or in determining any of the rights or obligations of the Parties to this Agreement.

f. *Construction and Interpretation*. This Agreement has been arrived at through negotiations and each Party has had a full and fair opportunity to revise the terms of this Agreement. As a result, the normal rule of construction that any ambiguities are to be resolved against the drafting Party shall not apply in the construction or interpretation of this Agreement.

g. *Entire Agreement*. This Agreement constitutes the entire and final agreement of the Parties with respect to the subject matter of this Agreement and supersedes any prior oral or written agreement, understanding, or representation relating to the subject matter of this Agreement.

h. *Successors and Assigns*. This Agreement shall be binding on and inure to the benefit of the successors and assigns of the respective Parties to this Agreement. No Party may assign its interests in or obligations under this Agreement without the written consent of the other Parties, which consent shall not be unreasonably withheld or delayed.

i. *Waivers*. Waiver of any breach or default hereunder shall not constitute a continuing waiver or a waiver of any subsequent breach either of the same or of another provision of this Agreement. Oral waivers shall not be permitted or valid.

j. *Warranty*. Each Party hereto warrants and represents that it has the power and authority to settle and release claims as set forth herein, and that its signatory is duly authorized and empowered to sign this Agreement on its behalf. Each party further warrants that it has been represented by legal counsel in the negotiation and drafting of this Agreement. This Agreement is the result of a negotiated compromise and was jointly drafted by the Parties.

k. *Necessary Actions*. Each Party agrees to execute and deliver additional documents and instruments and to take any additional actions as may be reasonably required to carry out the purposes of this Agreement. The Parties further agree to take no action that would frustrate the purposes of this Agreement.

l. *Compliance with Law*. In performing their respective obligations under this Agreement, the Parties shall comply with and conform to all applicable laws, rules, regulations and ordinances.

m. *Third Party Beneficiaries*. This Agreement shall not create any right or interest in any non-Party or in any member of the public as a third party beneficiary.

n. *Counterparts*. This Agreement may be executed in one or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute but one and the same instrument.

o. *Non-Reliance.* The Parties represent, warrant, agree, and shall be forever estopped to deny each of the following:

i. That no adverse party or attorney has made, nor have the Parties relied upon, any promise, representation or warranty whatsoever, express or implied, which is not contained herein, to induce them to execute this Agreement;

ii. That they have read and understand this Agreement;

iii. That the Parties are the sole owners of all claims and causes of action that they have asserted in this lawsuit, and that they have never assigned or transferred any of said claims or causes of action to any other party;

iv. That the Parties and their attorneys have made such investigation as they deem necessary of the facts and law pertaining to this Agreement and the value of the consideration and the claims being released hereby; and

v. That if they subsequently discover that any fact relied upon by them in entering into this Agreement was untrue, that any facts were concealed from them, or that their understanding of the facts or law or the terms of this Agreement was in any way incorrect, they shall still not be entitled to set aside this Agreement and the above releases.

p. *Cooperation.* The Parties will cooperate and coordinate all public announcements relating to this Agreement.

q. *Notices.* All notices, requests, demands or other communications required or permitted under this Agreement shall be in writing unless provided otherwise in this Agreement and shall be deemed to have been duly given and received on: (i) the date of service if served personally or served by electronic mail or facsimile transmission on the Party to whom notice is to be given at the address(es) provided below, (ii) on the first day after mailing, if mailed by Federal Express, U.S. Express Mail, or other similar overnight courier service, postage prepaid, and addressed as provided below, or (iii) on the third day after mailing if mailed to the Party to whom notice is to be given by first class mail, registered or certified, postage prepaid, addressed as follows:

COLTON AMENDMENT TO SETTLEMENT AGREEMENT

This First Amendment to the Settlement Agreement dated September 12, 2018 ("**Settlement Agreement**") is entered into and effective this ___ day of February, 2019 by and among Plaintiffs and Cross-Defendants San Bernardino Valley Municipal Water District ("**Valley District**") and City of Colton ("**Colton**") and Defendants and Cross-Complainants Fontana Union Water Company ("**Fontana Union**"), San Gabriel Valley Water Company, a California Corporation ("**San Gabriel**"), and Fontana Water Company, a division of San Gabriel (collectively, "**Fontana Parties**"), and Intervenor-Defendant Cucamonga Valley Water District ("**Cucamonga**"). Each of the Parties to this Agreement is sometimes referred to as a "**Party**" and are collectively sometimes referred to as the "**Parties.**"

Recitals

A. On September 12, 2018, Valley District, the Fontana Parties, and Cucamonga entered into a Settlement Agreement.

B. Colton now wishes to join that Settlement Agreement as a Party, to settle and resolve all of its claims and cross-claims in the Litigation, and to promote the sustainable groundwater management principles set forth therein.

Agreements

In consideration of the promises, agreements and releases contained herein and for good and valuable consideration, the Parties agree as follows:

1. *Acceptance and Incorporation of Settlement Agreement*

   Colton accepts and agrees to the Recitals, definitions, principles, and Agreements set forth in the Settlement Agreement, which are incorporated herein by reference, except for those delineations and amendments set forth in this Amendment.

2. *Amended Definitions and Recitals.*

   Recital C of the Settlement Agreement is hereby amended to include Colton among the "Parties" and exclude it from the "Non-Settling Plaintiffs."

   Recital D of the Settlement Agreement is hereby amended to add at the end: "As for Colton, the current operative complaint is the Third Amended Complaint filed on or about November 2, 2018.

   Recital F is hereby amended to state: "Colton and the Non-Settling Plaintiffs separately asserted six claims alleging breach of contract and other claims arising from the 1961 Decree."

   Recital J is hereby amended to add at the end: "As for Colton, the current operative cross-complaint is the Second Amended Verified Cross-Complaint which was filed on or about November 14, 2018, which added the 11th Cause of Action, entitled Breach of Contract – Violation of 1961 Rialto Decree by Colton, Rialto and West Valley Water District."

3. *Payment to Colton.*

a. In full settlement of all of Colton's claims in the Litigation, the Fontana Parties' will cause their insurer Arch Insurance Company to pay Colton the total sum of $3 million within 30 days after full execution of this Amendment and Colton providing a federal W-9 tax form for its designated payee.

b. In the event that Arch and the Fontana Parties reach an agreement with Rialto, before trial, that results in a payment by Arch to Rialto that exceeds $3 million, then Arch shall pay Colton the difference between the amount paid to Rialto and the $3 million.

4. *Preliminary Injunction*

Section 3(f) of the Settlement Agreement shall be deleted and replaced with a new Section 3.1 stating:
"All extractions by the Fontana Parties within the boundaries of the 1961 Decree area shall be subject to the terms of the Preliminary Injunction issued by the San Bernardino County Superior Court on March 20, 2015, and any subsequent court orders, until the Parties agree otherwise."

5. *Release*

Section 5 of the Settlement Agreement is amended by adding the following sentence to the end of its first paragraph:
"This release on behalf of Colton is unconditional and severable from the other provisions of the Settlement Agreement as amended herein, and this release shall remain enforceable even if other provisions of the Settlement Agreement are deemed unenforceable or invalid, so long as Colton receives the $3 million settlement payment required above."

6. *Request for Dismissal of the Action.*

Section 10 of the Settlement Agreement is replaced with the following:
"Within five (5) business days of full execution of this Amendment, the Fontana Parties' counsel shall prepare and send to counsel for Colton and Valley District a stipulation for dismissal with prejudice of the claims and cross-claims asserted by Colton and the Fontana Parties against each other. Pursuant to CCP §664.6, the stipulation for dismissal shall also request that the Court retain jurisdiction over the Parties to enforce the Settlement Agreement, as amended, until performance in full of its terms, notwithstanding the above dismissals. All Parties shall promptly execute and the Fontana Parties shall promptly file with the Court the stipulation for dismissal and retention of jurisdiction."

7. *Notices.*

Section 11(q) of the Settlement Agreement is amended to add the following notice recipients for Colton:

David X. Kolk, Ph.D.
Utilities and Public Works Director
650 N. La Cadena Ave

Colton, CA 92324
and
Utilities Director
650 N. La Cadena Ave
Colton, CA 92324

With a copy to:
Geralyn Skapik, Esq.
5861 Pine Ave., suite A-1
Chino Hills, CA 91709

8. *Groundwater Management Plan.*

Section 3(l) of the Settlement Agreement is replaced with the following: "The Parties will develop, adopt and implement a Rialto-Colton Basin sustainable groundwater management plan including, if the Parties and other public water suppliers extracting water from the Rialto-Colton Basin agree, an operating safe yield, a new index well regime, and/or other groundwater management tools (including the ability to overproduce in any year subject to replenishment), which may be included in an amended Decree."

9. *Penalties for Overpumping.*

a. In the event that any party exceeds its pumping allocation for the water year, that party shall abide by the provisions of section 3(j) of the Settlement Agreement by paying Valley District to acquire replacement water.

b. If the amount pumped in excess is greater than 10% of the party's allocation (including any future water rights acquired by lease or purchase) and the party fails to abide by the provisions of section 3(j) of the Settlement Agreement, then the party shall pay a penalty of $10,000/acre-foot for the amount over 110% of the allocation. Such penalties shall be paid into the general replenishment account managed by the Groundwater Council that is described below ("Groundwater Council").

10. *Replenishment Credit Accounts.*

Section 2 of the Settlement Agreement is modified by adding the following provisions:

h. Valley District shall establish and administer the following segregated accounts: one for the Defendants, one for the City of Colton, one each for West Valley and Rialto if either party settles with the Fontana Parties, and one general replenishment account.

i. Each beneficiary of these segregated accounts for the Defendants, Colton, West Valley, and Rialto who settles with the Fontana Parties shall have the option of a replenishment credit account that will be funded either: (i) in the following amounts to be paid upon the completion of the 61,000 acre-feet of replenishment per §2(c) of the Settlement Agreement: Rialto $6 million, Colton $4 million, West Valley $3 million, Defendants $3 million; or (ii) in the amount of 37.5% of the above amounts to be paid within 90 days of the execution of this

Amendment, if requested by the beneficiary within 60 days of the execution of this Amendment.

j. All of these accounts shall be administered by Valley District and shall be limited in their disbursements to projects that benefit groundwater management in the Rialto Basin, as determined by the Groundwater Council.

11. *Groundwater Council.*

Within one year of the execution of this Amendment, all parties to the Settlement Agreement will jointly establish a Groundwater Council for the Rialto-Colton Basin modeled on the Groundwater Council that has been established for the San Bernardino Basin Area and whose voting members shall be the four parties to the 1961 Decree. The Groundwater Council shall:

a. Within five years of its establishment, conduct the studies, modeling runs and other analyses that may be necessary to develop a plan for the sustainable management of the Rialto-Colton Basin; provided that such plan is not inconsistent with Valley District's obligations under the Orange County Judgment (*Orange County Water District v. City of Chino et al.*, Superior Court of Orange County, Case No. 117628) and the Western Judgment (*Western Municipal Water District of Riverside County v. East San Bernardino County Water District*, Superior Court of Riverside County, Case No. 78426); and

b. Have the authority to require the parties (excluding Valley District) to contribute their fair share (including by applying amounts deposited in replenishment accounts described above) towards development of the plan and any projects benefiting the Rialto-Colton Basin.

12. *General Provisions.*

a. By signing this Amendment, Colton will become a party to the Settlement Agreement. Except as modified herein, all provisions of the Settlement Agreement are hereby accepted and incorporated into this Amendment.

b. Each Plaintiff may settle separately with the Fontana Parties and Cucamonga.

RIALTO AMENDMENT TO SETTLEMENT AGREEMENT

This Amendment to the Settlement Agreement dated September 12, 2018 ("**Amendment**") is entered into and effective this 12th day of February, 2019 by and among Plaintiffs and Cross-Defendants San Bernardino Valley Municipal Water District ("**Valley District**") and City of Rialto ("**Rialto**") and Defendants and Cross-Complainants Fontana Union Water Company ("**Fontana Union**"), San Gabriel Valley Water Company, a California Corporation ("**San Gabriel**"), and Fontana Water Company, a division of San Gabriel (collectively, "**Fontana Parties**" or "**Defendants**"), and Intervenor-Defendant Cucamonga Valley Water District ("**Cucamonga**"). Each of the Parties to this Agreement is sometimes referred to as a "**Party**" and are collectively sometimes referred to as the "**Parties.**"

Recitals

A. On September 12, 2018, Valley District, the Fontana Parties, and Cucamonga entered into a Settlement Agreement in the litigation styled *San Bernardino Valley Municipal Water District et al v. San Gabriel Water Company et al.*, Case No. CIVDS 1311085, San Bernardino County Superior Court ("Litigation") ("Settlement Agreement"). A copy of that Settlement Agreement is attached hereto as Exhibit A and incorporated herein by reference as is set forth in full.

B. Rialto now wishes to join that Settlement Agreement as a Party, to settle and resolve all of its claims and cross-claims in the Litigation, and to promote the sustainable groundwater management principles set forth therein. As such, the Parties have negotiated modifications to the Settlement Agreement as set forth below.

Agreements

In consideration of the promises, agreements and releases contained herein and for good and valuable consideration, the Parties agree as follows:

1. *Acceptance and Incorporation of Settlement Agreement*

   The Parties accept and agree to the Recitals, Definitions, principles, and Agreements set forth in the Settlement Agreement, which are incorporated herein by reference, except for those delineations and amendments set forth in this Amendment.

2. *Amended Definitions and Recitals*.

   Recital C of the Settlement Agreement is hereby amended to include Rialto among the "Parties" and exclude it from the "Non-Settling Plaintiffs."

   Recital D of the Settlement Agreement is hereby amended to add at the end: "As for Rialto, the current operative complaint is the Third Amended Complaint filed on or about November 2, 2018.

   Recital F is hereby amended to state: "Rialto and the Non-Settling Plaintiffs separately asserted six claims alleging breach of contract and other claims arising from the 1961 Decree."

Recital J is hereby amended to add at the end: "As for Rialto, the current operative cross-complaint is the Second Amended Verified Cross-Complaint which was filed on or about November 14, 2018, which added the 11th Cause of Action, entitled Breach of Contract – Violation of 1961 Rialto Decree by Colton, Rialto and West Valley Water District."

3. *Payment to Rialto.*

In full settlement of all of Rialto's claims in the Litigation, the Fontana Parties' will cause their insurer Arch Insurance Company to pay Rialto the total sum of $3 million within 30 days after full execution of this Amendment and Rialto providing a federal W-9 tax form for its designated payee.

4. *Preliminary Injunction*

Section 3(f) of the Settlement Agreement shall be deleted and replaced with a new Section 3.1 stating:
"All extractions by the Fontana Parties within the boundaries of the 1961 Decree area shall be subject to the terms of the Preliminary Injunction issued by the San Bernardino County Superior Court on March 20, 2015, and any subsequent court orders, unless and until the Parties agree otherwise."

5. *Release*

Section 5 of the Settlement Agreement is amended by adding the following sentence to the end of its first paragraph:
"Such releases also include all claims contained in Plaintiffs' Third Amended Complaint and Fontana Parties' Second Amended Verified Cross-Complaint. This release on behalf of Rialto is unconditional and severable from the other provisions of the Settlement Agreement as amended herein, and this release shall remain enforceable even if other provisions of the Settlement Agreement are deemed unenforceable or invalid, so long as Rialto receives the $3 million settlement payment required above."

6. *Request for Dismissal of the Action.*

Section 10 of the Settlement Agreement is replaced with the following:
"Within five (5) business days of full execution of this Amendment, the Fontana Parties' counsel shall prepare and send to counsel for Rialto and Valley District a stipulation for dismissal with prejudice of the claims and cross-claims asserted by Rialto and the Fontana Parties against each other. Pursuant to CCP §664.6, the stipulation for dismissal shall also request that the Court retain jurisdiction over the Parties to enforce the Settlement Agreement, as amended, until performance in full of its terms, notwithstanding the above dismissals. All Parties shall promptly execute and the Fontana Parties shall promptly file with the Court the stipulation for dismissal and retention of jurisdiction."

7. *Notices.*

Section 11(q) of the Settlement Agreement is amended to add the following notice recipient for Rialto:

City Administrator
City of Rialto
150 So. Palm Ave.
Rialto, CA 92376

8. *Groundwater Management Plan.*

Section 3(l) of the Settlement Agreement is replaced with the following: "The Parties will develop, adopt and implement a Rialto-Colton Basin sustainable groundwater management plan including, if the Parties and other public water suppliers extracting water from the Rialto-Colton Basin agree, an operating safe yield, a new index well regime, and/or other groundwater management tools (including the ability to overproduce in any year subject to replenishment), which may be included in an amended Decree."

9. *Penalties for Overpumping.*

a. In the event that any party exceeds its pumping allocation for the water year, that party shall abide by the provisions of section 3(j) of the Settlement Agreement by paying Valley District to acquire replacement water.

b. If the amount pumped in excess is greater than 10% of the party's allocation (including any future water rights acquired by lease or purchase) and the party fails to abide by the provisions of section 3(j) of the Settlement Agreement, then the party shall pay a penalty of $10,000/acre-foot for the amount over 110% of the allocation. Such penalties shall be paid into the general replenishment account managed by the Groundwater Council that is described below ("Groundwater Council").

10. *Replenishment Credit Accounts.*

Section 2 of the Settlement Agreement is modified by adding the following provisions:

h. Valley District shall establish and administer the following segregated accounts: one for the Defendants, one for Rialto, and one each for Colton and West Valley if either party settles with the Fontana Parties, and one general replenishment account.

i. Each beneficiary of these segregated accounts for the Defendants and for Colton, West Valley, and Rialto, if either party settles with the Fontana Parties, shall have the option of a replenishment credit account that will be funded either: (i) in the following amounts to be paid upon the completion of the 61,000 acre-feet of replenishment per §2(c) of the Settlement Agreement: Rialto $6 million, Colton $4 million, West Valley $3 million, Defendants $3 million; or (ii) in the amount of 37.5% of the above amounts to be paid within 90 days of the execution of this Amendment, if requested by the beneficiary within 60 days of the execution of this Amendment.

j. All of the accounts described in paragraphs h and i shall be administered by Valley District and shall be limited in their disbursements to projects that benefit

groundwater management in the Rialto Basin, as determined by the Groundwater Council.

11. *Groundwater Council.*

Within one year of the execution of this Amendment, all parties to the Settlement Agreement will jointly establish a Groundwater Council for the Rialto-Colton Basin modeled on the Groundwater Council that has been established for the San Bernardino Basin Area and whose voting members shall be the four parties to the 1961 Decree, with each member having one vote. The Groundwater Council shall:

a. Within five years of its establishment, conduct the studies, modeling runs and other analyses that may be necessary to develop a plan for the sustainable management of the Rialto-Colton Basin; provided that such plan is not inconsistent with Valley District's obligations under the Orange County Judgment (*Orange County Water District v. City of Chino et al.*, Superior Court of Orange County, Case No. 117628) and the Western Judgment (*Western Municipal Water District of Riverside County v. East San Bernardino County Water District*, Superior Court of Riverside County, Case No. 78426); and

b. Have the authority to require the parties (excluding Valley District) to contribute their fair share (including by applying amounts deposited in replenishment accounts described above) towards development of the plan and any projects benefiting the Rialto-Colton Basin, as defined in the basin map attached to the Settlement Agreement as Attachment A.

12. *General Provisions.*

a. By signing this Amendment, Rialto will become a party to the Settlement Agreement. Except as modified herein, all provisions of the Settlement Agreement are hereby accepted and incorporated into this Amendment including, but not limited to the Civil Code section 1542 Waiver, which states:

> A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS WHICH THE CREDITOR OR RELEASING PARTY DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE AND THAT, IF KNOWN BY HIM OR HER, WOULD HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR OR RELEASED PARTY.

b. Each Plaintiff may settle separately with the Fontana Parties and Cucamonga.

c. This Amendment may be signed in counterparts.

WEST VALLEY AMENDMENT TO SETTLEMENT AGREEMENT

This Amendment to the Settlement Agreement dated September 12, 2018 ("**Settlement Agreement**") is entered into and effective this 7th day of February, 2019 by and among Plaintiffs and Cross-Defendants San Bernardino Valley Municipal Water District ("**Valley District**") and West Valley Water District ("**West Valley**") and Defendants and Cross-Complainants Fontana Union Water Company ("**Fontana Union**"), San Gabriel Valley Water Company, a California Corporation ("**San Gabriel**"), and Fontana Water Company, a division of San Gabriel (collectively, "**Fontana Parties**" or "**Defendants**"), and Intervenor-Defendant Cucamonga Valley Water District ("**Cucamonga**"). Each of the Parties to this Agreement is sometimes referred to as a "**Party**" and are collectively sometimes referred to as the "**Parties**."

Recitals

A. On September 12, 2018, Valley District, the Fontana Parties, and Cucamonga entered into a Settlement Agreement.

B. West Valley now wishes to join that Settlement Agreement as a Party, to settle and resolve all of its claims and cross-claims in the Litigation, and to promote the sustainable groundwater management principles set forth therein.

Agreements

In consideration of the promises, agreements and releases contained herein and for good and valuable consideration, the Parties agree as follows:

1. *Acceptance and Incorporation of Settlement Agreement*

   West Valley accepts and agrees to the Recitals, definitions, principles, and Agreements set forth in the Settlement Agreement, which are incorporated herein by reference, except for those delineations and amendments set forth in this Amendment.

2. *Amended Definitions and Recitals.*

   Recital C of the Settlement Agreement is hereby amended to include West Valley among the "Parties" and exclude it from the "Non-Settling Plaintiffs."

   Recital D of the Settlement Agreement is hereby amended to add at the end: "As for West Valley, the current operative complaint is the Third Amended Complaint filed on or about November 2, 2018.

   Recital F is hereby amended to state: "West Valley and the Non-Settling Plaintiffs separately asserted six claims alleging breach of contract and other claims arising from the 1961 Decree."

   Recital J is hereby amended to add at the end: "As for West Valley, the current operative cross-complaint is the Second Amended Verified Cross-Complaint which was filed on or about November 14, 2018, which added the 11th Cause of Action, entitled Breach of Contract – Violation of 1961 Rialto Decree by Colton, Rialto and West Valley Water District."

3. *Payment to West Valley.*

a. In full settlement of all of West Valley's claims in the Litigation, the Fontana Parties' will cause their insurer Arch Insurance Company to pay West Valley the total sum of $3 million within 30 days after full execution of this Amendment and West Valley providing a federal W-9 tax form for its designated payee.

b. In the event that Arch and the Fontana Parties reach an agreement with Rialto, before trial, that results in a payment by Arch to Rialto that exceeds $3 million, then Arch shall pay West Valley the difference between the amount paid to Rialto and the $3 million.

4. *Preliminary Injunction*

Section 3(f) of the Settlement Agreement shall be deleted and replaced with a new Section 3.1 stating:
"All extractions by the Fontana Parties within the boundaries of the 1961 Decree area shall be subject to the terms of the Preliminary Injunction issued by the San Bernardino County Superior Court on March 20, 2015, and any subsequent court orders, until the Parties agree otherwise."

5. *Release*

Section 5 of the Settlement Agreement is amended by adding the following sentence to the end of its first paragraph:
"This release on behalf of West Valley is unconditional and severable from the other provisions of the Settlement Agreement as amended herein, and this release shall remain enforceable even if other provisions of the Settlement Agreement are deemed unenforceable or invalid, so long as West Valley receives the $3 million settlement payment required above."

6. *Request for Dismissal of the Action.*

Section 10 of the Settlement Agreement is replaced with the following:
"Within five (5) business days of full execution of this Amendment, the Fontana Parties' counsel shall prepare and send to counsel for West Valley and Valley District a stipulation for dismissal with prejudice of the claims and cross-claims asserted by West Valley and the Fontana Parties against each other. Pursuant to CCP §664.6, the stipulation for dismissal shall also request that the Court retain jurisdiction over the Parties to enforce the Settlement Agreement, as amended, until performance in full of its terms, notwithstanding the above dismissals. All Parties shall promptly execute and the Fontana Parties shall promptly file with the Court the stipulation for dismissal and retention of jurisdiction."

7. *Notices.*

Section 11(q) of the Settlement Agreement is amended to add the following notice recipients for West Valley:

Clarence Mansell
General Manager
West Valley Water District
855 W. Base Line Road
Rialto, CA 92376

With a copy to:
Robert Tafoya, Esq.
Tafoya & Garcia
316 West 2d Street, Suite 1000
Los Angeles, CA 90012

8. *Groundwater Management Plan.*

Section 3(l) of the Settlement Agreement is replaced with the following: "The Parties will develop, adopt and implement a Rialto-Colton Basin sustainable groundwater management plan including, if the Parties and other public water suppliers extracting water from the Rialto-Colton Basin agree, an operating safe yield, a new index well regime, and/or other groundwater management tools (including the ability to overproduce in any year subject to replenishment), which may be included in an amended Decree."

9. *Penalties for Overpumping.*

a. In the event that any party exceeds its pumping allocation for the water year, that party shall abide by the provisions of section 3(j) of the Settlement Agreement by paying Valley District to acquire replacement water.

b. If the amount pumped in excess is greater than 10% of the party's allocation (including any future water rights acquired by lease or purchase) and the party fails to abide by the provisions of section 3(j) of the Settlement Agreement, then the party shall pay a penalty of $10,000/acre-foot for the amount over 110% of the allocation. Such penalties shall be paid into the general replenishment account managed by the Groundwater Council that is described below ("Groundwater Council").

10. *Replenishment Credit Accounts.*

Section 2 of the Settlement Agreement is modified by adding the following provisions:

h. Valley District shall establish and administer the following segregated accounts: one for the Defendants, one for West Valley, and one each for Colton and Rialto if either party settles with the Fontana Parties, and one general replenishment account.

i. Each beneficiary of these segregated accounts for the Defendants and for Colton, West Valley, and Rialto, if each settles with the Fontana Parties, shall have the option of a replenishment credit account that will be funded either: (i) in the following amounts to be paid upon the completion of the 61,000 acre-feet of replenishment per §2(c) of the Settlement Agreement: Rialto $6 million, Colton $4 million, West Valley $3 million, Defendants $3 million; or (ii) in the amount of 37.5% of the above amounts to be paid within 90 days of the

execution of this Amendment, if requested by the beneficiary within 60 days of the execution of this Amendment.

j. All of these accounts shall be administered by Valley District and shall be limited in their disbursements to projects that benefit groundwater management in the Rialto Basin, as determined by the Groundwater Council.

11. *Groundwater Council.*

Within one year of the execution of this Amendment, all parties to the Settlement Agreement will jointly establish a Groundwater Council for the Rialto-Colton Basin modeled on the Groundwater Council that has been established for the San Bernardino Basin Area and whose voting members shall be the four parties to the 1961 Decree. The Groundwater Council shall:

a. Within five years of its establishment, conduct the studies, modeling runs and other analyses that may be necessary to develop a plan for the sustainable management of the Rialto-Colton Basin; provided that such plan is not inconsistent with Valley District's obligations under the Orange County Judgment (*Orange County Water District v. City of Chino et al.*, Superior Court of Orange County, Case No. 117628) and the Western Judgment (*Western Municipal Water District of Riverside County v. East San Bernardino County Water District*, Superior Court of Riverside County, Case No. 78426); and

b. Have the authority to require the parties (excluding Valley District) to contribute their fair share (including by applying amounts deposited in replenishment accounts described above) towards development of the plan and any projects benefiting the Rialto-Colton Basin.

12. *General Provisions.*

a. By signing this Amendment, West Valley will become a party to the Settlement Agreement. Except as modified herein, all provisions of the Settlement Agreement are hereby accepted and incorporated into this Amendment.

b. Each Plaintiff may settle separately with the Fontana Parties and Cucamonga.

AGREEMENT
RELATING TO THE DIVERSION OF WATER
FROM THE SANTA ANA RIVER SYSTEM
AMONG
WESTERN MUNICIPAL WATER DISTRICT OF RIVERSIDE COUNTY,
SAN BERNARDINO VALLEY MUNICPAL WATER DISTRICT
AND
CITY OF RIVERSIDE

1. **PARTIES:** This Agreement relating to the diversion of water from the Santa Ana River System ("Agreement") is entered into and effective this 20th day of March, 2007 by and among the City of Riverside ("Riverside"), San Bernardino Valley Municipal Water District ("Muni") and Western Municipal Water District of Riverside County ("Western"). Muni and Western are collectively referred to as "Muni/Western." Each party to this Agreement is referred to as a "Party" and the parties collectively are referred to as the "Parties."

2. **RECITALS:**

2.1 The Parties are interested in the efficient management of the water resources, both local and imported, available to them and desire to work cooperatively to ensure that the demands, both current and future, of all users within the Parties' respective service areas are satisfied by maximizing the yield of the local water supplies and utilizing the available imported water supplies as necessary.

2.2 The Parties were all parties to the litigation that resulted in the judgment in *Orange County Water District v. City of Chino et al.* (Orange County Superior Court No. 117628, April 17, 1969) (the "*Orange County* Judgment"). Under the terms of that judgment, each of the Parties has "full freedom to engage in any activity for water conservation or storage of storm flows above Prado Reservoir" as long as Western and the Inland Empire Utilities Agency deliver certain quantities of base flow to Orange County Water District.

2.3 The Parties are all parties to the judgment in *Western Municipal Water District et al. v. East San Bernardino County Water District et al.* (Riverside County Superior Court No. 78426, April 17, 1969) (the "*Western* Judgment"). Under the terms of that judgment,

Riverside is entitled to extract a total of 49,542 afy from the San Bernardino Basin Area ("SBBA") for export outside San Bernardino County. The *Western* Judgment also addresses Riverside's extractions in the Colton, Riverside North and Riverside South groundwater basins. Collectively, the SBBA, Colton, Riverside North and Riverside South groundwater basins are referred to as the "Groundwater Basins."

2.4 Riverside has developed groundwater resources from the Groundwater Basins and has invested significant resources to produce, treat, transport, and deliver such water. The *Western* Judgment also provides certain safeguards to ensure that all groundwater producers may, in fact, exercise the rights referenced in the immediately preceding Section, most notably a requirement that Muni and Western each replenish certain groundwater basins under certain conditions in order to maintain the safe yield of the Groundwater Basins.

2.5 The construction of the Seven Oaks Dam ("SOD") by the US Army Corps of Engineers provides the opportunity to increase the yield of the Groundwater Basins through the development of additional Santa Ana River ("SAR") water that was historically not utilized by the Parties. The *Western* Judgment defines "New Conservation" as "any increase in replenishment from natural precipitation which results from operation of works and facilities not now in existence" and contemplates that the Parties will develop additional water supplies from the implementation of water conservation efforts under the terms of the *Orange County* Judgment ("New Conservation"). The *Western* Judgment further contemplates that Western, Riverside and other so-called Plaintiff Parties under the *Western* Judgment shall have their adjusted extraction rights increased to include a proportionate share of any New Conservation, provided that each Plaintiff Party pays its proportionate share of the costs of such New Conservation.

2.6 Muni/Western have filed two water right applications with the State Water Resources Control Board that, when approved, are intended to allow the development of New Conservation from the diversion of the waters of the Santa Ana River that would

otherwise flow out of the area without being put to beneficial use. If granted in their entirety, these applications would permit the conservation of up to 200,000 afy of native (local) water from the Santa Ana River. Muni/Western have prepared an Environmental Impact Report (the "Muni/Western EIR") that analyzes the potential effects on the environment of the water rights applications and the facilities needed to place water diverted from the Santa Ana River to reasonable and beneficial use (the "Project"). Riverside provided comments to the draft version of the Muni/Western EIR.

2.7 The Parties agree that the Project, as identified in the EIR, has the potential to: a) increase water supply reliability by reducing dependence on imported water; b) develop and deliver a new, local, high quality, long-term water supply that is needed to meet a portion of the anticipated future demands in their service areas; c) expand operational flexibility by adding infrastructure and varying sources of water, thereby providing the Parties greater capability to meet future water demands; and d) reduce the threat of liquefaction induced damages caused by a combination of high groundwater and earthquake activity.

2.8 Further, the Parties recognize that Muni/Western's proposed diversion of water to satisfy the Project's objectives listed above may have adverse effects on Riverside's water resources in the Groundwater Basins.

2.9 Muni/Western desire to mitigate impacts that may be caused by the Project to Riverside's water resources while also allowing for the maximum diversion of water by Muni/Western from the SAR and avoiding conditions of high groundwater that create a risk of liquefaction in the Pressure Zone of the SBBA groundwater basin and other groundwater basins. This will be accomplished through the development and implementation of a cooperative program as a part of the Integrated Regional Groundwater Management Plan for the Upper Santa Ana River Watershed, which plan is currently being renamed to reference water management generally and will hereinafter be referred to as the Integrated Regional Water Management Plan for the Upper Santa Ana River Watershed ("IRWMP").

2.10 Riverside has submitted an application and a petition to the State Water Resources Control Board to change the point of discharge, place of use, and purpose of use for its treated wastewater effluent from the SAR. Riverside has prepared a Program EIR (PEIR) for a Recycled Water Program.

2.11 The Parties wish to memorialize their understandings by means of this Agreement.

3. **AGREEMENT:** The Parties agree as follows:

3.1 State Water Resources Control Board ("SWRCB") Process.

3.1.1 Riverside will support Muni/Western's applications before the SWRCB, the California Department of Fish and Game ("DFG"), the U.S. Fish and Wildlife Service ("USFWS"), the U.S. Army Corps of Engineers, the Santa Ana Regional Water Quality Control Board, the "Local Sponsors" (San Bernardino County Flood Control District, Riverside County Flood Control and Water Conservation District and Orange County Flood Control District), and the U.S. Forest Service ("USFS").

3.1.2 Muni/Western will support Riverside's application and petition before the SWRCB, DFG, USFWS, USFS and the Santa Ana Regional Water Quality Control Board.

3.1.3 Each Party shall cooperate with the other Parties to the extent consistent with its own interests in connection with securing the water rights sought by the other Parties through the SAR water right hearing(s). Except as agreed in writing by the Authorized Representatives, or as provided by any existing cost sharing arrangements between the Parties, each Party shall bear its own costs related to such cooperation.

3.2 California Environmental Quality Act (CEQA) Process.

3.2.1 Muni/Western will not challenge Riverside's PEIR for its recycled water project.

3.2.2 Riverside will not challenge the Muni/Western EIR for diversions from the Santa Ana River.

3.3 Seven Oaks Dam Water Diversions Engineering and Operations Committee. The Parties hereby establish the Seven Oaks Dam Water Diversions Engineering and Operations Committee ("EOC"), which committee shall initially be comprised of the Authorized Representatives and shall be responsible for implementing this Agreement and shall operate on a consensus basis in all matters. The EOC shall develop and implement procedures intended to (i) maintain groundwater levels at the wells specified in Exhibit A at relatively constant levels, in spite of fluctuations due to hydrologic variation, (ii) minimize such fluctuations (reduce the highs and lows in groundwater levels), (iii) provide replacement water to Riverside when water diversions from the SAR by Muni/Western reduce, or are deemed under this agreement to reduce, recharge into the SBBA and Riverside North Basin, as provided pursuant to Sections 3.8.4 and 3.9, and (iv) develop recommendations to the *Western* Judgment Watermaster regarding the classification of the diverted SAR water as either New Conservation or existing safe yield of the SBBA.

3.4 EOC Procedures. The Authorized Representatives shall meet no later than six (6) months subsequent to approval of Muni/Western SAR water right applications by SWRCB to develop the initial EOC procedures in accordance with the provisions of this Agreement. The Authorized Representatives shall initiate a review of the procedures referred to in Section 3.3 of this Agreement no later than October 1 of each year during the term of this Agreement and, as may be necessary, shall revise such procedures by the following January 31. The EOC may hold such additional meetings during each water year (October 1 to September 30) as may be necessary to update the procedures to reflect changing conditions.

3.5 Real-Time Implementation of Agreement Objectives. The EOC shall meet on a regular basis, as needed, to effectively operate, on a real-time basis, a program to achieve the objectives of Section 3.3.

3.6 Accumulated Basin Replenishment Credits. Unless otherwise agreed by the Authorized Representatives, Muni/Western shall not use basin replenishment credits

accumulated under the *Western* Judgment to meet its recharge obligations under this Agreement.

3.7 Remedies. In the event that the Parties disagree regarding the implementation of Sections 3.3 through 3.9 of this Agreement, the decision shall be made by a registered professional engineer acceptable to all Parties using, to the extent practicable, the procedures set forth in Section 10 below, provided that the fact of such disagreement shall not limit Muni/Western's ability to divert water from the SAR or to implement the terms of any arrangement for the banking or exchange of SAR water, nor limit any Parties' ability to concurrently use the dispute resolution process of Section 10 for such disagreement.

3.8 Thresholds of Groundwater Levels of Significance and Mitigation Measures for SBBA. The following thresholds of groundwater levels of significance and mitigation measures in the SBBA shall be monitored and maintained as provided by EOC procedures:

3.8.1 *Outside the Pressure Zone* – A reduction in groundwater levels outside the Pressure Zone is significant if the analysis in the Muni/Western EIR, using the integrated surface water and groundwater model developed by Muni/Western (the USGS/Geoscience/Secor model of the Bunker Hill Groundwater Basin) and annual field verifications, predicts that the Project would reduce static groundwater levels at one or more index wells listed in Exhibit A, on average, by more than 10.0 feet during a repetition of the 39-year base hydrology (1962-2000), as compared to static water levels in the absence of the Project. "Annual field verifications" shall mean a comparison of actual groundwater levels to computer model generated predictions. To avoid a significant effect on the groundwater levels at one or more index wells located outside the pressure zone, Muni/Western shall commence spreading water from its SAR water made available pursuant to a SWRCB permit or license or from the Reserve Account defined in Section 3.8.4 within one (1) calendar year and shall spread either such SAR water or Reserve Account water sufficient to maintain static groundwater levels at the affected index wells to

reduce this project impact to less-than-significant level by no later than the end of the following calendar year, unless otherwise agreed to by the Authorized Representatives.

3.8.2 *Within the Pressure Zone* – If the average of the 12-month rolling averages of the static groundwater level measurements for the USGS/MUNI Backyard Wells D4, D5, and D6 (SWNs 1S/4W-22D4,5,6 USGS Station Numbers 340439117173904,5,6) is 50 feet below ground surface (bgs) or greater, then Muni/Western shall spread water from its SAR water made available under a SWRCB permit or license or from the Reserve Account defined in Section 3.8.4, until such averages are less than 50 feet bgs. When required, Muni/Western shall commence spreading its SAR water made available under a SWRCB permit or license or from Reserve Account water within one (1) calendar year and shall complete such spreading no later than the end of the following calendar year, unless otherwise agreed to by the Authorized Representatives.

3.8.3 *Index Well Change* - It is the understanding of the Parties that the wells used to determine whether Muni/Western shall spread water may be changed by written agreement of the Authorized Representatives. It is further understood by the Parties that the IRWMP process may conclude that it would be beneficial for Muni/Western to spread, or not spread, water based on other factors in addition to the water levels in Index Wells identified in this Agreement and that the Authorized Representatives shall take such conclusions into consideration when determining if a well change is appropriate.

3.8.4 *Reserve Account* – The Reserve Account identified in Sections 3.8.1 and 3.8.2 shall be established as 38% of the total volume of water diverted by Muni/Western from the SAR pursuant to a SWRCB permit or license. Such SAR water diverted by Muni/Western and recharged in the SBBA, either directly or through an exchange, shall be subtracted from the Reserve Account balance. SAR water directly delivered may be similarly credited, if such credit is deemed appropriate by the EOC. Any credits established through the recharge of more than 38% of the water diverted by Muni/Western shall expire

from the Reserve Account after five years if not used. This method of calculating the Reserve Account water, 38% of total volume diverted by Muni/Western, will remain in effect for 12 months after the first diversion of SAR water is made by Muni/Western, unless the Parties mutually agree to an extension. During this time, the EOC defined in Section 3.3 will evaluate the available hydrology and recharge data for the SAR and SBBA to determine if a modification to the 38% recharge factor is appropriate.

3.8.5 *Water Quality* - The Muni/Western water diversions and recharge activities in the Groundwater Basins shall be consistent with the basin water quality objectives as adopted by the Santa Ana Regional Water Quality Control Board outlined in the most recent version of the Water Quality Control Plan, or any cooperative agreement among the Santa Ana Regional Water Quality Control Board and agencies recharging water in the Santa Ana River Watershed.

3.9 Potential Reduced Recharge and Mitigation Measures for Riverside North Basin. The Parties agree that, under certain circumstances, water diversions from the SAR could cause reduced recharge from surface water or groundwater, or both, into the Riverside North Basin.

3.9.1 *Replacement Water Volume Calculation* - To alleviate this impact, Muni/Western agree to provide replacement water to Riverside, in the Riverside North Basin using daily flow data from the USGS E Street Gage 11059300 and by visual inspection at the following bridges over the Santa Ana River: E Street Bridge and Mt. Vernon Bridge.

3.9.1.1 The daily amount of reduced recharge shall be calculated using the following table:

Is there visible flow in the SAR at E Street Bridge (using the USGS Gage > 0)?	**Is there "Bank to Bank" Flow in the SAR at Mt. Vernon Bridge?**	**Muni/Western Diversion Amount, cfs**	**Reduced Recharge Amount, cfs**
No	No	Less than 37 cfs	None

No	No	Greater than 37 cfs	6% of Muni/Western diversion less 37 cfs
Yes	No	Greater than zero	6% of total Muni/Western diversion
Yes	Yes	Greater than zero	None

3.9.1.2 The Muni/Western replacement obligation (total amount of reduced recharge) shall be equal to the summation of all of the daily calculations of reduced recharge for the diversion season.

3.9.1.3 A new calculation method for the Muni/Western recharge obligation in the Riverside North Basin may be developed and used in the future by agreement of the Authorized Representatives.

3.9.1.4 The Muni/Western replacement obligation shall be recorded in a "Riverside North Basin Recharge Account." Said account shall be administered by the Authorized Representatives in accord with the terms of this Agreement.

3.9.1.5 The Authorized Representatives may reduce the Muni/Western replacement obligation based on high groundwater or other special conditions within the Riverside North Basin.

3.9.1.6 The calculation of reduced recharge to the Riverside North Basin shall be made by Muni/Western at the end of the "diversion season", (September 30th) of each year.

3.9.2 *Replacement Water Delivery Timeline* - The Muni/Western replacement obligation shall be delivered within five years of the Muni/Western diversions which incurred the obligation. However, Muni/Western will use reasonable efforts to satisfy the Muni/Western replacement obligation within one (1) year of incurring the obligation.

3.9.3 *Recharge Locations* - Muni/Western will determine the most cost effective means of meeting their replacement obligation under this Agreement and will consult with groundwater producers in the Riverside North Basin and look for opportunities

to cooperate with others to develop multiple-use recharge facilities. Any Muni/Western recharge obligation under this Agreement is anticipated to be satisfied using one or both of the alternatives in Section 3.9.3.1 and 3.9.3.2. However, the choice of such alternative is contingent upon the parties complying with all environmental laws arising out of or in connection with such recharge. The term "environmental laws" shall include, without limitation, the California Environmental Quality Act and all other applicable state and federal environmental laws. The parties also acknowledge that other alternatives may be identified and considered, and that by entering into the Agreement no selection has been made of any alternative:

3.9.3.1 In-stream recharge in the SAR bed between Riverside's Meeks #1 Well and Flume #6 Well at no cost to Riverside.

3.9.3.2 Off-stream recharge in available properties on either side of the SAR in between Riverside's Meeks #1 Well and Flume #6 Well. The Parties may jointly pursue the development of the diversion and recharge facilities on an agreed upon cost allocation based on benefits from the project. Unless otherwise agreed by the Parties, Riverside's portion of the funding will include any land they own which is used for the project. Riverside shall retain ownership of the land and be given ownership of any project improvements on the land. Riverside will also operate and maintain the project. Any storm water captured by any joint project shall be credited toward the Muni/Western recharge obligation under the Riverside North Basin Recharge Account. Riverside has no obligation, but will make reasonable efforts, to develop and/or fund such recharge facilities. Muni/Western agree to fully cooperate with any application to or before the SWRCB made by Riverside, Muni and/or Western for diversion of water to such recharge facilities.

3.9.4 *In Lieu Delivery* - If Muni/Western cannot deliver the total volume of replacement water required per Section 3.9.1 due to water supply shortages or other circumstances, Muni/Western shall satisfy and discharge that obligation by means of the

direct delivery of a quantity of water to Riverside equal to and in lieu of recharging additional water in the Riverside North Basin. Said in lieu delivery shall not exceed 71.51% of the Muni/Western replacement obligation for any given year and shall be delivered by one, or more, of the following options. Such option shall be exercised at the sole discretion of Riverside. Muni/Western shall make such in lieu deliveries to Riverside in a manner that is acceptable to all Parties, which may include the following:

3.9.4.1 A recommendation by Muni/Western to the *Western* Watermaster that Riverside be allowed to increase its extractions from the Bunker Hill Basin to an amount greater than Riverside's export rights under the *Western* Judgment for the subsequent water year, provided that such additional extractions do not create an additional replenishment obligation, as defined in the *Western* Judgment, on the part of Muni. This option shall only satisfy and discharge Muni/Western's replacement water obligation if the *Western* Watermaster and, if appropriate, the Superior Court of Riverside County, determine that such additional extractions are permitted under the terms of the *Western* Judgment.

3.9.4.2 The delivery of treated, potable water to Riverside at the Metropolitan Water District's ("MWD") Henry J. Mills Water Treatment Plant with Riverside paying Muni/Western an amount equal to the sum of: (i) the MWD Treated Water Surcharge, as set forth in MWD's then-current rate schedules, and (ii) Riverside's avoided pumping costs. The avoided pumping costs will be equal to Riverside's average cost to produce water from the Riverside North Basin wells identified on Exhibit B for the previous twenty-four (24) month period.

3.9.4.3 The delivery of water by Muni/Western to the Rice-Thorne pipeline from the Baseline Feeder South Pipeline at no cost to Riverside.

3.9.4.4 The remaining 28.49 % must be recharged in Riverside North Basin by Muni/Western as soon as practicable.

3.9.4.5 If Muni/Western delivers in lieu water to Riverside as provided for in this Section 3.9.4 during a given year, Riverside's maximum entitlement to pump from the Riverside North Basin during such year shall be reduced by an amount equal to the amount actually pumped in excess of Riverside's Bunker Hill Basin export rights under the *Western* Judgment or otherwise delivered to Riverside.

3.10 *CEQA Compliance.* The Parties agree that they intend to implement the provisions of Sections 3.3 to 3.10 of this Agreement through either: (i) the use of existing water rights and water extraction, conveyance, storage and distribution facilities, within the existing physical, legal and institutional limits pertaining to such rights and facilities; or (ii) the use of the water rights and physical facilities that comprise the Project, which are described in the Muni/Western EIR, within the limits identified in the Muni/Western EIR. If the Parties determine that additional water rights, institutional arrangements, banking or exchange agreements, or physical facilities are necessary to implement this Agreement, the Parties will undertake such subsequent environmental review and analysis as may be required for such discretionary actions by the terms of CEQA.

4. **BANKING AND EXCHANGES:**

4.1 The Parties understand and acknowledge that they intend to bank and/or exchange substantial quantities of SAR water for water imported from the State Water Project, or other sources of imported or native water. Such banking and/or exchanges shall be conducted pursuant to a comprehensive program for water banking and/or exchanges in the San Bernardino Valley and elsewhere in Southern California that includes, but is not limited to:

4.1.1 The groundwater spreading plan described in the July 21, 2004 Settlement Agreement Relating to the Diversion of Water from the Santa Ana River System ("Seven Oaks Accord");

4.1.2 The Projects described in the Muni/Western EIR; and

4.1.3 Any exchange or banking of water that may occur pursuant to the Coordinated Operating Agreement Between The Metropolitan Water District of Southern California and San Bernardino Valley Municipal Water District, dated July 10, 2000, as amended, as attached hereto as Exhibit C (the "Coordinated Operating Agreement") and incorporated herein by this reference, including but not limited to projects undertaken pursuant to the agreement referred to as "Attachment 6" in the Coordinated Operating Agreement, incorporated herein by this reference.

4.2 Riverside agrees that it will not oppose any such banking or exchange project(s); provided, that (i) such project is implemented in a manner not inconsistent with the terms of this Agreement; (ii) such project shall not result in an unmitigated adverse impact on Riverside's sources of groundwater supply in the Groundwater Basins or Riverside's costs related to the extraction of such groundwater; and (iii) in the implementation of the Coordinated Operating Agreement, Muni shall not deliver Riverside's portion of any New Conservation, as such term is defined in the *Western* Judgment, to Western without the prior written consent of Riverside's Authorized Representative. Riverside agrees that any water delivered to Riverside, directly or in lieu, by means of such banking or exchanges projects shall be used in accordance with the SWRCB water rights permit or license obtained by Muni/Western.

5. **RIVERSIDE'S RECYCLED MUNICIPAL WASTEWATER:** Nothing in this Agreement shall be construed to regulate Riverside's use of its recycled municipal wastewater.

6. ***WESTERN* JUDGMENT PRODUCTION LIMITS:** Nothing in this Agreement should be construed to increase or diminish the groundwater production limits contained in the *Western* Judgment.

7. **WATERMASTER ACCOUNTING:** The Parties agree to use their best efforts to implement an accounting methodology under the *Western* Judgment, including any

amendments thereto, that will allow the Plaintiffs therein to utilize their full entitlement in the SBBA. Specifically, to the extent that the extractions by any Plaintiff to the *Western* Judgment are less than the limits set forth therein, such Plaintiff party shall be allowed to use such unused extractions as a credit in following years, meaning that any extractions in excess of the limits imposed by the *Western* Judgment, in future years, may be offset by such credits and the Plaintiff party shall not be deemed to be in violation of the extraction limits for the *Western* Judgment.

8. **RELATIONSHIP TO OTHER AGREEMENTS AND JUDGMENTS:** There are a number of existing judgments and agreements that impose conditions on the Parties that may have an effect on the implementation of this Agreement. The EOC procedures outlined in this Agreement shall be developed and implemented in a manner consistent with each Party's rights and obligations under existing judgments and agreements and nothing in this Agreement is intended to modify the rights or obligations of the Parties under the terms of such judgments or agreements.

9. **LIST OF EXHIBITS:** This Agreement includes and incorporates by reference the following exhibits:

9.1 Exhibit A: List and Figure of Index Wells

9.2 Exhibit B: List of Riverside North Basin Wells

9.3 Exhibit C: Coordinated Operating Agreement for Conveyance Facilities and State Water Project Between Metropolitan Water District of Southern California And San Bernardino Valley Municipal Water District, including Attachments 1-6.

9.4 Exhibit D: Sections 12 and 13 of ICSA Settlement

10. **REMEDIES.** In the event that one Party believes that another Party, for reasons other than the lack of funding or other resources, has failed to comply with its obligations under this Agreement, or to dispute a matter referred to or a decision rendered under Section 3.7 hereto, the Parties shall use the dispute resolution provisions set forth in Sections 12 and 13 of the Agreement to Develop and Adopt an Institutional Controls Groundwater Management

Program, dated January 1, 2005 (the "ICSA Settlement"), which Sections are set forth as Exhibit D and incorporated herein by reference. The Parties agree, however, that any challenge to a decision of an arbitrator as described in Section 13 of the ICSA Settlement shall be brought in the Superior Court of Riverside County, not in the United States Court for the Central District of California. The Parties also agree that the arbitrator need not have experience in groundwater contamination or environmental clean-up, as described in Section 12 of the ICSA Settlement.

11. **AUTHORIZED REPRESENTATIVES:** Each Party shall designate by written notice to the other Parties a representative who is authorized to act on its behalf in the implementation of this Agreement and with respect to those matters contained herein which are the functions and responsibilities of such Authorized Representative. Each Party may at any time change the designation of their Authorized Representative by written notice to the other Party. Such Authorized Representative shall have the authority to act for their respective Parties in all matters relating to performance of this Agreement, including any amendment of the Exhibits hereto. However, except as otherwise provided, they shall not have the authority to amend or modify any provision of this Agreement.

12. **GENERAL PROVISIONS:**

12.1 Effective Date and Term. This Agreement shall be effective on the date first written above and shall then continue until terminated by mutual consent of all Parties hereto. Sections 3.3 through 3.10 of this Agreement shall not take effect until the SWRCB issues a permit for the Western/Muni Applications.

12.2 Choice of Law. This Agreement and any dispute hereunder shall be governed by and construed in accordance with the laws, except for laws pertaining to the choice of laws, of the State of California.

12.3 No Waiver. No failure or delay in exercising any right, power or privilege hereunder shall operate as a waiver thereof, nor shall any single or partial exercise thereof

preclude any other or further exercise thereof or the exercise of any right, power or privilege hereunder.

12.4 Entire Agreement. This Agreement shall not be construed to amend or modify any other agreement between any of the Parties or between any Party and a non-Party, which shall remain in all respects in full force and effect. This Agreement represents the entire agreement of the Parties in connection with the subject matter hereof and may be modified only in writing agreed to by all Parties. Further, this Agreement may be executed in counterparts.

12.5 Construction and Interpretation. This Agreement has been arrived at through negotiations and each Party has had a full and fair opportunity to revise the terms of this Agreement. As a result, the normal rule of construction that any ambiguities are to be resolved against the drafting Party shall not apply in the construction or interpretation of this Agreement.

12.6 Partial Invalidity. If, after the date of execution of this Agreement, any provision of this Agreement is held to be illegal, invalid, or unenforceable under present or future laws effective during the term of this Agreement, such provision shall be fully severable. However, in lieu thereof, there shall be added a provision as similar in terms to such illegal, invalid or unenforceable provision as may be possible and be legal, valid and enforceable.

12.7 Necessary Actions. Each Party agrees to execute and deliver additional documents and instruments and to take any additional actions as may be reasonably required to carry out the purposes of this Agreement.

12.8 Third Party Beneficiaries. This Agreement shall not create any right or interest in any non-Party or in any member of the public as a third party beneficiary.

12.9 Authority of Signatories. The signatories hereto represent and warrant that they have been duly authorized to enter into this Agreement by the Party on whose behalf it is indicated that the person is signing and, by such signature, to bind such Party to the

Agreement.

12.10 Jurisdiction and Venue. Any action at law or in equity brought by any of the Parties hereto for the purpose of enforcing a right or rights provided for by this Agreement shall be tried in a court of competent jurisdiction in the County of Riverside, State of California, and the Parties hereby waive all provisions of law providing for a change of venue in such proceedings to any other county.

12.11 Notices. Any notices required to be given, hereunder shall be in writing and shall be personally served or given by mail. Any notice given by mail shall be deemed given when deposited in the United States Mail, certified and postage prepaid, addressed to each Party to be served as follows:

CONSERVED WATER AGREEMENT
BETWEEN
SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT
AND
WESTERN MUNICIPAL WATER DISTRICT OF RIVERSIDE COUNTY

Agreement made this 23rd day of MARCH, 2005, between San Bernardino Valley Municipal Water District ("Valley District") and Western Municipal Water District of Riverside County ("Western").

RECITALS

1. Valley District and Western have jointly filed two water rights applications with the State Water Resources Control Board. If granted in their entirety, these applications would permit the two districts to conserve up to 200,000 afy of native (local) water from the Santa Ana River ("Conserved Water").

2. Conserved water under this joint application is shared 72.05% to Valley District and 27.95% to Western for use within its boundaries.

3. The parties hereto anticipate that in wet years some portion of the conserved water may be delivered to The Metropolitan Water District of Southern California ("Metropolitan") in exchange for the subsequent delivery by Metropolitan of an equal quantity of water, less reasonable Metropolitan system losses, ("Exchange Water"), for use within the respective service areas of the parties. To that end, Valley District has entered into an agreement with Metropolitan entitled "Attachment 6" to the Coordinated Operating Agreement between Metropolitan and Valley District, dated July 10, 2000.

4. Such exchanges pursuant to the terms of Attachment 6 are anticipated to improve the water supply reliability and quality of water delivered by Metropolitan to its member agencies, and the use of local water for local needs within the respective service areas of the parties hereto.

TERMS

In consideration of the foregoing facts, it is hereby agreed as follows:

5. Western accepts the provisions of Attachment 6, subject to the terms of this Agreement.

6. In the implementation of Attachment 6, Valley District shall not deliver Western's share of Conserved Water to Metropolitan without Western's prior consent.

7. In the implementation of Attachment 6, Valley District's approval of the delivery by Metropolitan of Western's share of Exchange Water, and the time, place and manner of such delivery (including any in-lieu deliveries) shall be subject to Western's prior consent.

8. Western is an intended beneficiary of Attachment 6 as to its share of Conserved and Exchange Water, and shall be considered as a third party beneficiary of Attachment 6, and entitled to enforce all legal rights arising from such status.

ORIGINAL

9. The term of this Agreement shall be coincident with the term of Attachment 6, or any extension thereof, and is effective as of the date inserted above.

ATTACHMENT 6

COORDINATED EXCHANGE AGREEMENT
BETWEEN
THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA
AND
SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT

Objective

The objective of this Attachment 6 to the Coordinated Operating Agreement for Conveyance Facilities and State Water Project Supplies between The Metropolitan Water District of Southern California ("**Metropolitan**") and San Bernardino Valley Municipal Water District ("**Valley District**") dated July 10, 2000 (the "**Coordinated Operating Agreement**") is to provide an institutional arrangement for the residents of Southern California to obtain the maximum benefits from water conserved as a result of the construction and operation of Seven Oaks Dam and Reservoir. Valley District and Metropolitan are each sometimes referred to below as a "**Party**" and are sometimes collectively referred to below as the "**Parties.**"

Recitals

A. Valley District, in conjunction with Western Municipal Water District of Riverside County ("**Western**"), has filed two water right applications with the State Water Resources Control Board. If granted in their entirety, these applications would permit Valley District and Western to conserve up to 200,000 afy of native (local) water from the Santa Ana River.

B. Valley District anticipates that, in wet years, it will deliver some portion of the water that is conserved from the Santa Ana River pursuant to the water right applications to Metropolitan in exchange for the subsequent delivery to Valley District of an equal quantity of water by Metropolitan, less reasonable Metropolitan system losses.

C. Such an exchange of conserved native Santa Ana River water for water from the State Water Project or other sources available to Metropolitan is anticipated to improve water supply reliability and the quality of water delivered to Metropolitan and its member agencies and is

anticipated to improve water supply reliability and the use of local water for local needs within Valley District's service area.

D. Valley District intends to work cooperatively with the Watermaster Committee to determine the quantities of Conserved Water and Exchange Water, as defined below, delivered by or to Valley District pursuant to this Attachment 6. Valley District intends that the Watermaster Committee confirm, on an annual basis, that such quantities of Conserved Water and Exchange Water constitute "new conservation" as that term is defined in the Judgment pursuant to County of Riverside Superior Court Case 78426.

Terms

a. *Term.*

This Attachment 6 shall have a term identical to the Coordinated Operating Agreement.

2. *Exchange of Water.* Pursuant to paragraphs 1 and 3 of the Coordinated Operating Agreement and paragraph 10.2 of Attachment 2 to the Coordinated Operating Agreement, Metropolitan and Valley District agree to take the following actions:

a. If the water conserved from the Santa Ana River pursuant to the foregoing water right applications ("**Conserved Water**") exceeds the immediate demand for such water within Valley District's service area for direct delivery or groundwater recharge and there is capacity available in Metropolitan's facilities to accept all or a portion of the Conserved Water directly, on an in-lieu basis, or via an exchange, for delivery to Metropolitan, Valley District may request that Metropolitan accept into Metropolitan's facilities all or a portion of the Conserved Water on mutually agreeable terms, conditions and locations. Absent other agreement of the Parties, Conserved Water will be delivered to Metropolitan at the Inland Feeder. Valley District shall consult with Metropolitan regarding the delivery of the Conserved Water on a real-time basis and, each October 1 shall prepare an operations plan for the delivery of Conserved Water, which plan shall be updated each April 1 to reflect precipitation, runoff and other relevant factors. The operations plan shall

be subject to approval by Metropolitan, however, Metropolitan agrees to exercise its best efforts to accept the Conserved Water into its facilities to the extent that Metropolitan, in its sole discretion, determines that (1) sufficient capacity is available within Metropolitan's facilities to accept the Conserved Water and (2) that the Conserved Water is of adequate quality for Metropolitan's purposes. The Conserved Water will be delivered to Metropolitan for beneficial uses within Metropolitan's service area in quantities that will not exceed 200,000 afy.

b. Metropolitan shall, after consultation with Valley District, deliver to Valley a substitute quantity of water obtained by Metropolitan from the State Water Project ("**Exchange Water**") equal in quantity to the Conserved Water delivered to Metropolitan pursuant to paragraph 2(a) above, less reasonable Metropolitan system losses as determined by Metropolitan. Exchange Water shall be delivered to Valley District as promptly as practicable at times, locations and in manners mutually agreeable to Valley District and Metropolitan. Absent other agreement of the Parties, Exchange Water will be delivered by Metropolitan to Valley District at the Devil Canyon Afterbay. Exchange Water will be delivered to Valley District for beneficial uses in quantities that will not exceed 200,000 afy.

c. The Parties agree that they may benefit from this Attachment 6 by virtue of increased water supply reliability and improved water quality. Accordingly, neither Party shall pay the other for services provided under this Attachment 6.

3. *Disputes.* The Parties recognize that there may be disputes regarding the obligations of the Parties or the interpretation of this Attachment 6. The Parties agree that they will attempt to resolve disputes in an amicable fashion without the need for litigation.

4. *General Provisions.*

a. *Authority.* Each signatory of this Attachment 6 represents that s/he is authorized to execute this Attachment 6 on behalf of the Party for which s/he signs. Each

Party represents that it has legal authority to enter into this Attachment 6 and to perform all obligations under this Attachment 6.

b. *Amendment.* This Attachment 6 may be amended or modified only by a written instrument executed by each of the Parties to this Attachment 6.

c. *Partial Invalidity.* If, after the date of execution of this Attachment 6, any provision of this Attachment 6 is held to be illegal, invalid, or unenforceable under present or future laws effective during the term of this Attachment 6, such provision shall be fully severable. However, in lieu thereof, there shall be added a provision as similar in terms to such illegal, invalid or unenforceable provision as may be possible and be legal, valid and enforceable.

d. *Incorporation by Reference.* The provisions of paragraph 15 of Attachment 2 are hereby incorporated herein by reference as if set forth in full and shall apply to the Parties' performance of the terms of this Attachment 6.

Dated: December 21 2004.

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

Ronald R. Gastelum
Chief Executive Officer

SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT

Robert L. Reiter
General Manager and Chief Engineer

ATTACHMENT 5 TO THE
COORDINATED OPERATING AGREEMENT

AGREEMENT BETWEEN
THE METROPOLITAN WATER DISTRICT
OF SOUTHERN CALIFORNIA
AND
SAN BERNARDINO VALLEY MUNCIPAL WATER DISTRICT
REGARDING FOOTHILL PUMP STATION

THIS CONTRACT, hereinafter referred to as "Agreement" is entered into as of this 21st day of December, 2004, between The Metropolitan Water District of Southern California, a public agency of the State of California (hereinafter referred to as "Metropolitan") and the San Bernardino Valley Municipal Water District, a public agency of the State of California (hereinafter referred to as "Valley District").

EXPLANATORY RECITALS

A. Metropolitan is a public agency of the State of California engaged in transporting, storing, treating and distributing water at wholesale in portions of the counties of Los Angeles, San Bernardino, Orange, Riverside, San Diego and Ventura, within the State of California.

B. Valley District is a public agency of the State of California engaged in developing, transporting, storing, treating and wholesale delivery of water in portions of the counties of San Bernardino and Riverside within the State of California.

C. The parties have previously entered into a Coordinated Operating Agreement and several subsequent attachments thereto, Attachments 1 through 4.

D. Valley District, as a State Water Project (hereinafter "SWP") contractor takes delivery of SWP water from the Devil Canyon First Afterbay by way of its Foothill Pipeline, which has a capacity of 290 cubic feet per second (hereinafter "cfs"), and extends east from the Devil Canyon Afterbay approximately 17 miles. The Foothill Pipeline connects to other

facilities of the East Branch Extension of the State Water Project, which delivers water to the San Gorgonio Pass area of Riverside County.

E. Metropolitan, also an SWP contractor, is constructing a water conveyance system known as the Inland Feeder, which will take water from the Devil Canyon Second afterbay and deliver it into Metropolitan's service territory. The 144-inch inside diameter Inland Feeder has been fully constructed to a point just north of the Santa Ana River, where it is in close proximity to Valley District's Foothill Pipeline. The remainder of Metropolitan's Inland Feeder, to the north and west is still under construction.

F. In accordance with previous understandings reached between the parties, Metropolitan constructed a 78-inch inside diameter intertie pipeline to connect the Foothill Pipeline with the Inland Feeder, known as the Cone Camp Intertie.

G. Since December 2003, Metropolitan has taken water from the Foothill Pipeline through the Cone Camp Intertie and delivered it into the Inland Feeder at flows up to 240 cfs, as capacity was available. Valley District was compensated for the water delivered to Metropolitan from Valley District's Table A amounts at the rate provided for in Attachment 2 to the Coordinated Operating Agreement.

H. Currently, when more than 80 cfs is diverted from the Foothill Pipeline to the Cone Camp Intertie, there is insufficient head in the Foothill Pipeline to meet the minimum hydraulic gradient requirements at Greenspot Pump Station (easterly of the Foothill Pump Station) and therefore, insufficient head to meet Valley District demands downstream of the Greenspot Pump Station.

I. Pursuant to previous understandings reached between the parties, the Foothill Pump Station has been designed and constructed adjacent to the Foothill Pipeline and Cone

Camp Intertie to increase the hydraulic grade line at the Greenspot Pump Station to enable Valley District to meet demands downstream in the Foothill Pipeline when water is being delivered into the Cone Camp Intertie. The Foothill Pump Station includes eight 300-horsepower horizontal pumps with adjustable (variable) frequency drives. Use of the Foothill Pump Station is only needed to meet downstream demands if and when Metropolitan is taking water through the Cone Camp Intertie.

J. The purpose of this Attachment 5 is to provide for the parties' respective responsibilities regarding: (1) the right-of-way for the Foothill Pump Station, (2) the obligation to deliver water to the Cone Camp Intertie, and (3) payment provisions for Foothill Pump Station power costs, and water delivered to Metropolitan through the Cone Camp Intertie.

TERMS OF AGREEMENT

1. Foothill Pump Station Right-of-Way. For good and valuable consideration, the receipt of which is hereby acknowledged, Metropolitan hereby grants to Valley District an exclusive license ("License") to the use of a portion of the parcel of land owned by Metropolitan on which the Foothill Pump Station has been constructed (the "Property") for the operation, maintenance, repair and replacement of the Foothill Pump Station and related facilities located on the Property, which right shall include, without limitation, the right to construct, maintain, repair and replace a fence around the perimeter of the Property and to control all ingress and egress to and from the Property. The Property is more fully described in Exhibits A and B, which are attached hereto and incorporated herein by this reference.

a. The License shall be irrevocable and non-terminable for a term of ten (10) years commencing on January 1, 2005 and terminating on December 31, 2014. The License shall thereafter automatically be renewed on an annual basis, unless, at least 11 months before the

expiration date for the License, as the same may be extended as provided herein, either Valley District or Metropolitan notifies the other in writing of its decision not to renew the License. Valley District shall not be required to pay to Metropolitan any additional consideration for the License.

b. Valley District and Metropolitan agree to allow reasonable access to the other's staff, employees, contractors and/or agents across the lands subject to the License and/or adjacent rights of way upon reasonable notice.

c. Valley District shall be responsible, at its own cost and expense, for the operation, maintenance, repair, rehabilitation and replacement, as necessary, of the Foothill Pump Station (including, without limitation, the repair of any damage to the Foothill Pump Station due to natural disasters such as earthquake, fire or flood) and shall also be responsible for environmental compliance associated with or relating to the operation, maintenance, repair, rehabilitation and replacement of the Foothill Pump Station.

d. Metropolitan hereby grants to Valley District the right to purchase the Property in the event of the expiration or termination of the License, at a purchase price equal to the then current fair market value (as defined under California law) for the real property (excluding improvements thereon) as determined as provided in this paragraph. In order to exercise this right to purchase, Valley District must give written notice of Valley District's intent to exercise the purchase right ("Valley District's Exercise Notice") within 30 days after the date of expiration or termination of the License. Metropolitan and Valley District shall, within 30 business days after receipt of Valley District's Exercise Notice, mutually determine the fair market value of the Property or a process for making that determination using their good faith judgment. In the event that Metropolitan and Valley District cannot agree upon the fair market

value of the Property or such a process within said 30 day period, either party shall have the right to submit the determination of the fair market value of the Property to neutral binding arbitration: (i) administered by the American Arbitration Association under its commercial arbitration rules, or (ii) conducted according to such other arbitration procedures as may be mutually agreed upon in writing by Valley District and Metropolitan. The License shall remain in full force and effect until the purchase is completed. Metropolitan and Valley District agree to execute any additional instructions and documents as are normal and usual for the sale of real property.

2. Water Deliveries to Cone Camp Intertie. During the term of this Agreement, Valley District agrees, upon Metropolitan's request, to deliver water using any unused capacity in the Foothill Pipeline into Metropolitan's Cone Camp Intertie. Unused capacity is defined as the design capacity (approximately 290 cfs) for the Foothill Pipeline less; (i) demand within Valley District's existing service area, and (ii) the demand in San Gorgonio Pass Water Agency's service area, not to exceed San Gorgonio Pass Water Agency's SWP contract capacity, or 32 cfs. For purposes of this Agreement, the term "demand" includes both the direct delivery of water by Valley District to other water purveyors for immediate use within Valley District's service area and the delivery of water to various facilities for the recharge of groundwater basins within Valley District's service area.

3. Payment for Water and Foothill Pump Station Power Costs. Metropolitan shall pay Valley District for water purchased by Metropolitan from Valley District and for power costs at the Foothill Pump Station associated with the delivery of water to Metropolitan's Cone Camp Intertie as follows:

a. Metropolitan shall, as it has in the past, pay to Valley District the rate as provided by Attachment 2 to the Coordinated Operating Agreement for all water purchased from the

Valley District and delivered through the Foothill Pipeline into Metropolitan's Cone Camp Intertie. Costs for water purchased shall be invoiced to Metropolitan no more frequently than monthly. Payment shall be due to Valley District within 60 days of receipt of invoice.

b. Metropolitan shall pay to Valley District all additional power costs for the Foothill Pump Station required to deliver water through the unused capacity in the Foothill Pipeline to Metropolitan's Cone Camp Intertie. The additional power costs for which Metropolitan is responsible shall be calculated by multiplying the power rate in dollars per acre foot at Foothill Pump Station when the water was delivered to Metropolitan times either; (i) the capacity of the Foothill Pipeline less Valley District demands upstream of the Foothill Pump Station and the flow through the Foothill Pump Station, or (ii) flow through the Foothill Pump Station, whichever is less, times the actual power rate at the Foothill Pump Station when the water was delivered to Metropolitan. For purposes of this paragraph the power rate shall be based upon a the monthly power consumption at the Foothill Pump Station divided by the acre feet of water pumped by the Foothill Pump Station during that month. When water is not delivered to Metropolitan, Metropolitan shall not pay for any power costs associated with the Foothill Pump Station. Costs for power shall be invoiced to Metropolitan no more frequently than monthly. Payment shall be due to Valley District within 60 days of receipt of invoice.

4. Term.

a. This Agreement shall be non-terminable for 10 years from the date hereinabove first written and after 10 years, the term of this Agreement shall be coincidental with the term of the Coordinated Operating Agreement and any attachments thereto.

b. Paragraph 5 of the Coordinated Operating Agreement shall be modified to read as follows:

"5. This Agreement shall remain in force for a period ending December 31, 2014, with the expectation that a definitive agreement with a minimum term of twenty years will be entered into by the parties."

5. Notices. Any notice or communication given under this Agreement shall be effective when deposited, postage prepaid, with the United State Postal Service and addressed to the contracting parties as follows:

If to Metropolitan:

The Metropolitan Water District of Southern California
P. O. Box 54153
Los Angeles, CA 90054-0153
Attention: Ms. Debra Man

If to Valley District:

San Bernardino Valley Municipal Water District
P.O. Box 5906
San Bernardino CA 92412-5906
Attention: Mr. Robert Reiter

Either party may change the address to which notice or communication is to be sent by providing written notice to the other party.

6. Indemnification. Valley District agrees that it is solely responsible for the operation, maintenance, repair, rehabilitation and replacement of the Foothill Pump Station and hereby indemnifies and holds harmless Metropolitan and Metropolitan's directors, officers, employees and agents from any and all liabilities, injuries and/or damages, whether to the Foothill Pump Station, its employees, or to third parties, arising from Valley District's use of the Foothill Pump Station and/or the property (Exhibits A and B) subject to the License provided for by this Agreement. Said indemnification shall include all costs and attorney's fees to defend Metropolitan from any such claim or lawsuit for injury or damages. Metropolitan hereby

indemnifies and holds harmless Valley District and Valley District's directors, officers, employees and agents from any and all liabilities, injuries and/or damages, whether to the Inland Feeder or other facilities, its employees, or to third parties, arising from Metropolitan's activities. Said indemnification shall include all costs and attorney's fees to defend Valley District from any such claim or lawsuit for injury or damages.

7. Jurisdiction and Venue. This Agreement shall be deemed a contract under the jurisdiction and venue of the State of California and for all purposes shall be interpreted in accordance with such laws.

8. Alteration. It is mutually understood and agreed that this Agreement represents the complete understanding of the parties and that no oral understanding or agreement not incorporated herein shall be binding on either party. Except as provided herein, this Agreement may not be modified or altered without formal amendment in writing, signed by both parties thereto.

9. Coordinating Operating Agreement. Except to the extent required by the terms of this Agreement, both parties hereby acknowledge that they remain obligated under the terms of the Coordinating Operating Agreement and Attachments 1 through 4, thereto.

AGREEMENT
RELATING TO THE DIVERSION OF WATER
FROM THE SANTA ANA RIVER SYSTEM
AMONG
WESTERN MUNICIPAL WATER DISTRICT OF RIVERSIDE COUNTY
SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT
AND
CITY OF RIVERSIDE

Exhibit D

[Sections 12 and 13 of the ICSA Settlement]

in recitals I.D through I.K inclusive as they may exist as of the effective date of this Agreement. Further nothing in this Agreement is intended to modify or affect in any way the judgments initially referred to in recitals I.D, I.F and I.G above. This Agreement shall not be used as evidence in any water rights claim or cause of action.

12. In the event of the failure of the Parties to this Agreement to reach agreement on the ICGMP or if such an agreement has not yet been reached and there is no approved extension of the term of this Agreement, the matter shall be resolved by limited scope mediation and arbitration. The mediation and arbitration shall be conducted by JAMS (sometimes referred to as the mediation service provider), and shall be administered, to the extent practical in the San Bernardino office, or the JAMS office closest to San Bernardino. In the event, for whatever reason, JAMS is not available or lacks the necessary expertise, the parties shall first attempt to use the services of another judicially oriented service, such as IVAMS, and use the American Arbitration Association only after all other judicially based mediation and arbitration services have refused to undertake the mediation and arbitration of the dispute.

The Parties shall promptly initiate the process when they have reached an impasse with regard to any issues preventing complete agreement on the ICGMP. The process shall require the mediation of all disputes as a condition to the initiation of the arbitration process. The mediator shall be selected by mutual agreement of all of the affected Parties, and the cost of the mediator shall be borne on an equal basis by all of the Parties to this Agreement. In the event the Parties are unable to agree on a mediator, the mediation service provider shall select a mediator with civil judicial experience. The Parties shall meet and confer prior to the mediation and provide to the mediator an agreed list of matters to be resolved by the mediation. Unless all of the Parties to the mediation agree otherwise, the only matters to be discussed at the mediation are those matters

submitted to the mediator following the meet and confer meeting of the Parties. Time shall be of the essence during the process and all Parties shall cooperate to promptly complete the process.

In the event the Parties are unsuccessful in resolving any or all of the issues presented to the mediator, a limited scope arbitration shall be conducted promptly following the completion of the mediation. The mediation service provider shall provide to the arbitrating parties a list of available arbitrators. The Parties shall first attempt to agree on an arbitrator having some background or expertise in water law, groundwater contamination or environmental clean-up matters, and failing to do such the mediation service provider shall select an arbitrator with complex civil judicial experience. The scope of the arbitration shall be limited to the issues presented to the arbitrator by the parties to the arbitration. The Parties shall meet and confer prior to the arbitration and provide to the arbitrator an agreed list of issues to be resolved. The arbitrator shall be instructed that the only issues for decision are those issues presented by the arbitrating parties, and that the arbitrator shall comply with California law, unless the subject matter specifically relates to a federal issue. It is specifically agreed that any decision of an arbitrator subjecting any of the Parties directly or indirectly to the Institutional Controls Ordinance is outside the scope and authority of the arbitrator and shall be unenforceable and void. The arbitrator shall have no authority to award costs or attorneys' fees. Each Party agrees that the costs of arbitration shall be shared equally by the Parties and that each Party shall bear their own attorneys fees and preparation costs. Time shall be of the essence during the arbitration process.

The decision of the arbitrator shall be binding as to those matters presented for determination. Any matters included in the decision of the arbitrator outside the issues presented for determination, including without limitation awards of costs and attorneys fees, shall be unenforceable and not binding on the parties. In the event an arbitrator attempts to include matters

or issues outside the scope of the arbitration or any party fails to abide by the terms of this Agreement limiting the scope of the arbitration, any other party shall have the right to file an action for declaratory relief in United States Court for the Central District of California in the consolidated cases, seeking enforcement of the provisions of this Agreement limiting the scope of arbitration.

13. Defined terms that are used in this Agreement and that are also used in the Consent Decree shall have the meaning set forth in the Consent Decree. In the event that there is any inconsistency between the definition of a term in this Agreement and a definition of the same term in the Consent Decree, the definition of the term in the Consent Decree shall control.

14. Each Party shall have access to and the right to examine any of the other Party's pertinent books, documents, papers or other records (including, without limitation, records contained on electronic media) relating to the performance of that Party's obligations pursuant to this Agreement. The Parties shall each retain all such books, documents, papers or other records to facilitate such review. Access to each Party's books, documents, papers and other records shall be during normal business hours only. Nothing in this paragraph shall be construed to operate as a waiver of any applicable privileges.

15. Each signatory of this Agreement represents that s/he is authorized to execute this Agreement on behalf of the Party for which s/he signs. Each Party represents that it has legal authority to enter into this Agreement and to perform all obligations under this Agreement.

16. This Agreement has been arrived at through negotiations and each Party has had a full and fair opportunity to revise the terms of this Agreement. As a result, the normal rule of construction that any ambiguities are to be resolved against the drafting Party shall not apply in the construction or interpretation of this Agreement.

COOPERATIVE AGREEMENT TO PROTECT WATER QUALITY AND ENCOURAGE THE CONJUNCTIVE USES OF IMPORTED WATER IN THE SANTA ANA RIVER BASIN

This Cooperative Agreement to Protect Water Quality and Encourage the Conjunctive Uses of Imported Water in the Santa Ana River Basin ("**Agreement**") is entered into and effective this 18 day of January, ~~2007~~ 2008 by and among the California Regional Water Quality Control Board, Santa Ana Region (the "**Regional Board**") and the entities listed in paragraph 11(n) below. The Regional Board and each of the entities listed in paragraph 11(n) below are individually referred to as a "**Party**" and are collectively referred to as the "**Parties.**"

Recitals

A. Water imported to the Santa Ana River Region, as defined in Water Code section 13200(e) (the "**Region**"), from the State Water Project, the Colorado River and other sources, and to groundwater basins within the Region from other groundwater basins within the Region, is vital to meet present and future demands for water within the Region. Such water is directly used; injected or percolated within groundwater basins; stored in a groundwater basin for later use; may be combined with or used in addition to the native groundwater supplies in a basin; may be exported/imported from one basin to another; and after consumptive use may form a portion of the wastewater that is treated, recharged and reused within the Region. Such conjunctive uses of surface water and groundwater within the Region have been contemplated by the State of California at least since the issuance of the original California Water Plan in 1957 and the adoption by the State Water Quality Control Board of Resolution No. 64-1.

B. The Regional Board is charged by statute with adopting such water quality objectives as may be required to protect the beneficial uses of water within the Region. In particular, the long-term conjunctive use of groundwater in the Region requires that the quality of water in groundwater basins in the Region be managed to meet the water quality objectives for nitrogen and total dissolved solids (collectively, the "**Salinity Objectives**") adopted by the Regional Board in the 1995 Water Quality Control Plan for the Santa Ana River Basin, as amended in 2004 by R8 2004-0001 (the "**Basin Plan**").

C. The Salinity Objectives presently included in the Basin Plan are the result of a multi-year, multi-million dollar cooperative effort among many of the Parties. The Salinity Objectives are a product of the best scientific and technical information available.

D. The Legislature has declared that the facilitation of voluntary transfers of water and water rights is the established policy of the State. The Legislature has further declared that voluntary water transfers between water users can result in a more efficient use of water and can allow more intensive use of developed water resources so as to conserve all available water resources. The Legislature has directed the Regional Board to encourage voluntary transfers of water and water rights.

811058 3

SBVMWD LEGAL
DOCUMENT 2181

E. The Parties disagree whether the Regional Board may regulate the conjunctive uses of imported water in the Region by means of general waste discharge requirements. Some of the Parties believe the Regional Board lacks authority to regulate the conjunctive uses of water in the Region because, they contend, such water does not constitute "waste" as defined in Water Code section 13050(d); the Regional Board and other Parties believe the Regional Board has such authority.

F. To avoid costly and time-consuming litigation brought to resolve the scope of the Regional Board's authority to regulate imported water and without prejudice to the Parties' competing views on this question, the Parties wish to act cooperatively with the goal of achieving compliance with the Salinity Objectives without the necessity of general waste discharge requirements.

G. The Parties wish to memorialize the terms of their cooperative effort by means of this Agreement.

Agreements

1. *Purpose of Agreement*

This Agreement is intended to allow the Parties to monitor and improve water quality within the Santa Ana River Region in a manner that is consistent both with adopted water quality objectives and with the needs of the inhabitants of the Region for a reliable supply of water. This Agreement is limited in scope to compliance with and implementation of the Salinity Objectives.

2. *Parties*

The Regional Board or any public agency or non-profit mutual water company that imports water to the Region, exports/imports water between basins within the Region, recharges such imported water within the Region, delivers such imported water for potable use within the Region, or treats and/or recharges wastewater within the Region that includes imported water may become a Party to this Agreement.

3. *Term of Agreement*

This Agreement will have an initial term of 10 years and shall automatically renew for subsequent 10-year periods, *provided* that any Party may withdraw at any time by providing one year's written notice of withdrawal to all other Parties.

4. *Preparation of Triennial Water Quality Report*

The Parties that intentionally recharge imported water within the Santa Ana Region (the "**Recharging Parties**") agree voluntarily to collect, compile and analyze the N/TDS water quality data necessary to determine whether the intentional recharge of imported water in the Region may have a significant adverse impact on compliance with the Salinity Objectives within

the Region. To that end, the Recharging Parties will collect, compile and analyze such N/TDS water quality data and prepare, within eighteen months from the effective date of this Agreement and every three years thereafter, a report containing the following information:

a. A summary of the then-current ambient water quality in each groundwater management zone and a comparison of that ambient water quality with the Salinity Objectives. The Recharging Parties shall calculate ambient water quality for each groundwater management zone in a manner that allows for a technically valid comparison with the Salinity Objectives.

b. A summary of the amount and quality of imported water recharged in each groundwater management zone during the previous three-year period.

c. The initial report and each report prepared at six-year intervals thereafter will include a projection of ambient water quality in each groundwater management zone for the subsequent 20 years.

(1) The projection of ambient water quality for each groundwater management zone will be based upon professionally accepted modeling techniques, will reasonably account for surface fluxes of salt input, will reflect the effects of all existing and reasonably foreseeable recharge projects for which there is a certified environmental document and will compare baseline ambient water quality with the Salinity Objectives.

(2) The projections for different groundwater management zones may be based on different modeling techniques.

(3) Each report that includes a 20-year projection of ambient water quality will also present a comparison of then-current water quality in each groundwater management zone with the ambient water quality projection made six years earlier, together with an evaluation of the reason(s) for any differences.

The Recharging Parties will agree among themselves regarding the manner in which they will prepare the report and the manner in which they will share the cost of preparing the report. The Recharging Parties will circulate a draft version of each report to all other Parties for review and written comments for at least a 45-day period. The Recharging Parties shall consider written comments received on the draft report in preparing the final report. Upon completion of the final report, the Recharging Parties shall promptly lodge the final report with the Regional Board.

5. *CEQA Review of Proposed Projects*

Each Recharging Party agrees that, when it serves as a lead agency under the California Environmental Quality Act ("**CEQA**") for a proposed project involving the recharge of imported water within the Region, it will analyze that project as follows:

a. The environmental document will include the water quality data compiled in the most recent triennial report to the Regional Board (see paragraph 4 above) in the analysis of the potential impacts of the proposed project.

b. The environmental document will incorporate professionally acceptable modeling techniques. The Parties agree that the following models meet this standard:

(1) The Wildermuth models used to establish maximum benefit objectives.

(2) The Orange County Basin Groundwater Model.

(3) The USGS/Geoscience/Secor model of the Bunker Hill Groundwater Basin.

(4) The Chino Basin Watermaster/Inland Empire Utilities Agency model.

(5) The Beaumont-Cherry Valley model for the Beaumont management zone

(6) Eastern Municipal Water District's San Jacinto Groundwater Model.

(7) Elsinore Valley Municipal Water District's Elsinore Basin Groundwater Model.

(8) The USGS model of the Beaumont Basin (with MT3D package or equivalent added).

Updates/refinements of these models are presumed to be professionally acceptable.

c. A Recharging Party may base its environmental analysis on a model other than those described above if that model has been presented to the Regional Board at least 180 days prior to the release of the draft environmental document and there has been a determination by the Regional Board or its staff that the alternative model is acceptable.

(1) The Regional Board agrees that an alternative model is acceptable for purposes of this Agreement if the proponent of that model can demonstrate with reasonable certainty that the relative error of the model's calibration for the groundwater management zones in question for a reasonable base period is ± 10% or less when compared with existing groundwater data.

(2) The provisions of the immediately preceding paragraph are not to be construed to preclude other means or methodologies for an alternative model's proponent to demonstrate to the Regional Board that an alternative model is acceptable for purposes of this Agreement.

(3) If an alternative model has not been deemed acceptable by the Regional Board or its staff and a lead agency wishes to include results from that model in the environmental document, the lead agency shall include results from both the alternative model and one of the pre-approved models in the environmental document.

d. The environmental document will include the following analyses:

(1) A summary of the condition of the groundwater management zones, as reflected in the most recent triennial report to the Regional Board, that might be affected by the project.

(2) A 20-year projection of water quality in the groundwater management zone with the proposed project and a comparison of that water quality with conditions expected without the project.

(3) A comparison of the 20-year water quality projection for conditions with the proposed project with the Salinity Objectives for the groundwater management zone.

(4) A description and evaluation of any measures proposed to mitigate the potential effects of the proposed project.

e. The draft environmental document will be circulated to all Parties.

f. Each Recharging Party agrees to adopt the operative guidelines contained in this paragraph 5 as part of its CEQA implementing procedures pursuant to section 15022 of the CEQA Guidelines.

g. The environmental document shall include, if required under CEQA, an effective mitigation monitoring and reporting plan that enables the lead agency to demonstrate compliance with applicable regulatory standards and any performance standards adopted in the environmental document.

6. *Basin Planning Updates*

The Regional Board will review and, if appropriate, revise water quality objectives for the purpose of facilitating the recharge of imported water in groundwater management zones within the Region. The Parties agree to cooperate in such efforts and agree to work cooperatively to develop a program that addresses the use and allocation of assimilative capacity as part of overall Basin planning and management.

7. *Enforcement*

If the Recharging Parties fail timely to prepare the triennial report described in paragraph 4 above or if a Recharging Party fails to include the analyses described in paragraph 5 above in an environmental document prepared in connection with a proposed project involving the recharge of imported water, then any other Party may enforce the terms of this Agreement as

follows.

If the dispute relates to the triennial report on water quality, the Regional Board will hold a hearing asking the Recharging Parties to provide an explanation for the delay or failure to prepare the report. Such a hearing will precede an action for specific performance of the terms of this Agreement by the Regional Board. In the event that the dispute relates to the failure of a Party to provide the appropriate analysis in an environmental document, that dispute will be addressed by the Party(ies) using the remedies available under CEQA.

The Parties recognize that nothing in this Agreement can or is intended to divest the Regional Board of its authority under the Porter-Cologne Water Quality Control Act. Furthermore, nothing in this Agreement shall be construed as a waiver by any Party of any remedies it may have against a non-Party for interference with the implementation of this Agreement.

8. *Books and Records*

Each Party shall have access to and the right to examine any of the other Parties' pertinent books, documents, papers or other records (including, without limitation, records contained on electronic media) relating to the performance of that Party's obligations pursuant to this Agreement. The Parties shall each retain all such books, documents, papers or other records for at least four years after the termination of this Agreement to facilitate such review. Access to each Party's books and records shall be during normal business hours only. Nothing in this paragraph shall be construed to operate as a waiver of any applicable privileges.

9. *No Admissions*

Nothing in this Agreement shall be construed as an admission by any Party regarding any subject matter of this Agreement, including but not limited to the authority of the Regional Board to regulate the importation of water to the Region. The Parties agree that Evidence Code sections 1152 and 1154 render this Agreement inadmissible as evidence against any of the Parties in any adjudicative proceeding, except a proceeding to enforce or interpret the terms or conditions of this Agreement.

10. *Preservation of Rights*

The Parties agree that this Agreement is in settlement of a dispute and preserves all rights of the Parties as they may exist as of the effective date of this Agreement.

11. *General Provisions*

a. *Authority.* Each signatory of this Agreement represents that s/he is authorized to execute this Agreement on behalf of the Party for which s/he signs. Each Party represents that it has legal authority to enter into this Agreement and to perform all obligations under this Agreement.

b. *Amendments.* This Agreement may only be amended with the approval of all Parties.

c. *Jurisdiction and Venue.* This Agreement shall be governed by and construed in accordance with the laws of the State of California, except for its conflicts of law rules. Any suit, action, or proceeding brought under the scope of this Agreement shall be brought and maintained to the extent allowed by law in the County of Riverside, California.

d. *Representations and Warranties.* Each representation and warranty contained herein or made pursuant hereto shall be deemed to be material and to have been relied upon and shall survive the execution, delivery and termination of this Agreement.

e. *Entire Agreement.* This Agreement constitutes the entire agreement of the Parties with respect to the subject matter of this Agreement and supersedes any prior oral or written agreement, understanding, or representation relating to the subject matter of this Agreement.

f. *Successors and Assigns.* This Agreement shall be binding on and inure to the benefit of the successors and assigns of the respective Parties to this Agreement. No Party may assign its interests in or obligations under this Agreement without the written consent of the other Parties, which consent shall not be unreasonably withheld or delayed.

g. *Advice of Counsel; Drafting by Negotiations.* This Agreement has been arrived at through negotiations and each Party has had a full and fair opportunity to revise the terms of this Agreement. As a result, the normal rule of construction that any ambiguities are to be resolved against the drafting Party shall not apply in the construction or interpretation of this Agreement. Each Party represents that it has sought and obtained any legal advice it deems necessary from its own separate counsel before entering into this Agreement.

h. *Waiver.* No waiver of any violation or breach of this Agreement shall be considered to be a waiver of any other violation or breach of this Agreement, and forbearance to enforce one or more of the remedies provided in this Agreement shall not be deemed to be a waiver of that remedy.

i. *Severability.* If, after the date of execution of this Agreement, any provision of this Agreement is held to be illegal, invalid, or unenforceable under present or future laws effective during the term of this Agreement, such provision shall be fully severable. However, in lieu thereof, there shall be added a provision as similar in terms to such illegal, invalid or unenforceable provision as may be possible and be legal, valid and enforceable.

j. *Compliance with Laws.* In performing their respective obligations under this Agreement, the Parties shall comply with and conform to all applicable laws, rules, regulations and ordinances.

k. *No Third-Party Beneficiaries.* This Agreement shall not create any right or interest in any non-Party or in any member of the public as a third party beneficiary.

l. *Necessary Actions.* Each Party agrees to execute and deliver additional documents and instruments and to take any additional actions as may be reasonably required to carry out the purposes of this Agreement.

m. *Counterparts.* This Agreement may be executed in one or more counterparts, which may be executed and delivered via facsimile transmission, each of which shall be deemed to be an original, but all of which together shall constitute but one and the same instrument.

n. *Notices.* All notices, requests, demands or other communications required or permitted under this Agreement shall be in writing unless provided otherwise in this Agreement and shall be deemed to have been duly given and received on: (i) the date of service if served personally or served by facsimile transmission on the Party to whom notice is to be given at the address(es) provided below, (ii) on the first day after mailing, if mailed by Federal Express, U.S. Express Mail, or other similar overnight courier service, postage prepaid, and addressed as provided below, or (iii) on the third day after mailing if mailed to the Party to whom notice is to be given by first class mail, registered or certified, postage prepaid, addressed as follows:

R73058.1

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD,
SANTA ANA REGION

RESOLUTION NO. R8-2006-0019

Authorizing the Executive Officer to Sign and Execute the Cooperative Agreement
To Protect Water Quality and Encourage the Conjunctive Use
Of Imported Water in the Santa Ana River Basin

WHEREAS:

1. In Resolution No. R8-2004-0001, the Regional Board revised the Basin Plan to adopt new water quality objectives for N/TDS based upon the recommendations of a stakeholder process;

2. The N/TDS Task Force, as the stakeholder effort has become known, is a model for the cooperative and collaborative development of water policy initiatives;

3. At its May 19, 2006 meeting, the Regional Board considered draft Resolution No. R8-2006-0042 and draft Order No. R8-2006-0005, which would have adopted general waste discharge requirements for the injection/percolation of imported State Project Water, Colorado River Water or imported well water to recharge groundwater management zones within the Santa Ana Region;

4. At the close of the May 19, 2006 meeting, the Regional Board directed staff to work with appropriate stakeholders – largely the same stakeholders that had participated in the development of the new water quality objectives for N/TDS through the N/TDS Task Force – to investigate the feasibility of a cooperative program to manage salinity within the Region that would serve as an alternative approach to achieve the objectives of draft Resolution R8-2006-0042 and draft Order No. R8-2006-0005;

5. The stakeholder group has met regularly with Regional Board staff and has negotiated a proposed Cooperative Agreement to Protect Water Quality and Encourage the Conjunctive Uses of Imported Water in the Santa Ana River Basin (Attachment A);

6. The City of Corona, the City of Riverside, the City of San Bernardino Municipal Water Department, Eastern Municipal Water District, Elsinore Valley Municipal Water District, Orange County Water District, San Bernardino Valley Municipal Water District, San Gorgonio Pass Water Agency, and Western Municipal Water District of Riverside County have all executed the proposed cooperative agreement and, in doing so, have voluntarily agreed to an enhanced program to manage salinity within the Region;

7. Most water supply agencies in the State, including Metropolitan Water District of Southern California (MWDSC), are already required to collect and report routine chemical analyses to the California Department of Public Health (CDPH). In order to avoid redundant monitoring programs, MWDSC has offered to provide a copy of its annual water quality report, characterizing State Project Water, to the Regional Board. MWDSC's report to CDPH provides substantially the same

information that was originally specified in Table 1 of draft Order No. R8-2006-0005 (see Attachment B) and is a reasonable alternative approach;

8 The Regional Board wishes to obtain increased understanding of so-called "emerging contaminants" that may be present in imported water being used within the Region, however, there is significant uncertainty regarding the methods used to study emerging contaminants, including analytic methods and protocols;

9. The many issues associated with emerging contaminants are presently the subject of a number of studies, including a major study being undertaken by the National Water Research Institute (NWRI), the Metropolitan Water District of Southern California (MWDSC), and the Orange County Water District (OCWD) (NWRI/MWDSC/OCWD Study), estimated to be completed in 2009;

10. Regional Board staff believes that the NWRI/MWDSC/OCWD Study will provide data to satisfy the need for information concerning emerging contaminants for the calendar years 2008 and 2009;

11. For calendar years following 2008 and 2009, until a watershed-specific monitoring plan is developed and approved by the Regional Board, the Santa Ana River Dischargers Association (SARDA) has voluntarily agreed to provide an annual analysis of State Project Water imported to the Region for the suite of parameters sampled as part of the NWRI/MWDSC/OCWD Study;

12. The Cooperative Agreement signatories have agreed to develop a watershed-specific alternative list of emerging contaminants to be submitted for Regional Board consideration as an alternative to the parameters to be monitored during the NWRI/MWDSC/OCWD Study.

13. The Regional Board wishes to encourage voluntary programs to manage salinity and to better understand issues relating to emerging contaminants by partnering with stakeholders in a manner similar to the N/TDS Task Force. The results of the NWRI/MWDSC/OCWD study and other available data will be used in the stakeholder process to inform a program of study and investigation that includes an adaptively managed monitoring program.

14. The Cooperative Agreement and the monitoring program being developed by the stakeholder agencies within the Region obviates the need to bring back to the Board for consideration draft Resolution No. R8-2006-0042 and draft Order No. R8-2006-0005.

NOW, BE IT RESOLVED:

1. In lieu of the adoption of draft Resolution No. R8-2006-0042 and draft Order No. R8-2006-0005, the Regional Board hereby approves the proposed Cooperative Agreement to Protect Water Quality and Encourage the Conjunctive Uses of Imported Water in the

Santa Ana River Basin ("Agreement") and authorizes the Executive Officer to execute the Agreement on behalf of the Regional Board.

2. The Regional Board's execution of the Cooperative Agreement is contingent on the understanding that the other Cooperative Agreement signatories (the "Water Agencies") will, at their own expense, develop and implement a voluntary study program intended to better characterize the presence, extent, distribution and persistence of certain unregulated constituents in imported water used in the Santa Ana Region. The Regional Board supports this voluntary effort to manage water resources so as to avoid the need for future regulatory programs.

   a. The study program will be based on the best available science. Additional data may be collected, as appropriate, as part of the annual plans for investigation described below.

   b. The Water Agencies will, no later than December 31, 2008, prepare a report that provides a preliminary characterization of the presence, extent, distribution and persistence of unregulated constituents (also known as "emerging contaminants") that are indicators of the broader spectrum of constituents of water imported to the Santa Ana Region that may, in the future, be determined by appropriate regulatory agencies (e.g. USEPA or CDPH) to pose concerns for human health ("Imported Water Constituents"). This initial report will use data collected by the Department of Water Resources, the United States Geological Survey, the MWDSC/OCWD/NWRI study and other sources, as may be appropriate, that are developed consistent with generally accepted scientific data analysis protocols. The report shall be distributed to all signatories to this Agreement.

   c. The Water Agencies will, no later than December 31, 2009, and annually thereafter, prepare a plan for investigation (including a summary of the results of all prior monitoring efforts) that addresses at least the following questions for the Imported Water Constituents:

      i. Are there reliable and scientifically accepted protocols to test water for the presence and concentrations of these constituents?

      ii. What is known about the presence, extent, distribution and persistence of these constituents?

      iii. What is known about the toxicity, if any, of these constituents in terms of potential impacts on human health?

      iv. Should additional data be collected on any of these constituents, and, if so, under what sampling and analytical protocols?

   d. The annual plans for investigation described immediately above are not intended to substitute for the process used by USEPA and CDPH to develop MCLs or other water quality standards.

e. It is understood that the constituents that are the subject of the annual plans for investigation will, in all likelihood, change over time as their relative importance or unimportance to human health becomes better known. The Water Agencies will select constituents that they believe will best assist in understanding the potential impacts of imported water on human health.

f. The Regional Board may participate in the development of the report prepared pursuant to paragraph 2(b) above or the annual plans for investigation described in paragraph 2(c) above; however, such participation is not a prerequisite or condition for the development of such plan or reports.

g. The Water Agencies will promptly prepare a status update on the progress of either the report prepared pursuant to paragraph 2(b) above or the current annual plan for investigation prepared pursuant to paragraph 2(c) above upon request by the Regional Board.

h. The Water Agencies will promptly provide a copy of the report prepared pursuant to paragraph 2(b) above, the annual plans for investigation prepared pursuant to paragraph 2(c) above, and the results of analyses conducted pursuant to the Cooperative Agreement and this Resolution to all signatories to this Agreement, including the Regional Board.

I, Gerard J. Thibeault, Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of a resolution adopted by the California Regional Water Quality Control Board, Santa Ana Region, on January 18, 2008.

Gerard J. Thibeault
Executive Officer

Phase-II Report

of the

Emerging Constituents Workgroup

A Proposed Work Plan to Characterize Select EC Concentrations in Surface Waters, Imported Waters & Recycled Waters Recharging Groundwaters of the Santa Ana River Watershed.

Proposed Work Plan for Santa Ana Watershed Project Authority's Emerging Constituents Workgroup in 2010-2011

1.0 Introduction

Water quality is routinely sampled at tens of thousands of locations across the U.S. Samples are collected from rain water, storm water runoff, freshwater streams, lakes and reservoirs, groundwater wells and tap water to characterize the quality of various supply sources. Additional samples from the sewage systems are analyzed to ensure pollution prevention programs and wastewater treatment plants are meeting all federal and state water quality standards.

Most sampling programs focus on a few hundred of the most common chemical constituents to assess overall water quality. These chemicals were selected from the larger universe of known chemicals because there is sufficient scientific evidence to indicate they may pose an increased risk to humans, plants or animals (including aquatic organisms) when they occur at elevated concentrations.

Several different regulatory agencies share responsibility for determining the acceptable concentration of potential pollutants. This is a formidable task as there are tens of thousands of chemical compounds in common use. Consequently, state and federal authorities rely on sales/usage information and monitoring data to establish appropriate research priorities for setting new water quality standards through a sophisticated and thorough regulatory review process.[1]

Improvements in analytical technology over the last decade have dramatically increased the number of chemicals we can detect and greatly decreased the concentration at which we can detect them.[2] Today, we are able to identify and quantify some potential pollutants in the range of one part-per-trillion (ppt) or less.[3] For perspective, 1 ppt is approximately equal to a plot of land the size of a postage stamp in an area the size of Orange County.

This new ability to detect infinitesimally small chemical concentrations has fundamentally altered our understanding of what's in the water. Trace levels (approx. 1-100 ppt) of many different man-made chemicals, particularly pesticides, pharmaceuticals and personal care products, have been found in waters across the United States. Collectively, these compounds are referred to as "Emerging Constituents" (ECs) because their presence is just starting to be revealed by rapid advances in analytical technology.[4]

---

1 See, for example, U.S. EPA's process for identifying Candidate Contaminant List (CCL).

3 Vanderford, B.J. and Shane Snyder. "Analysis of Pharmaceuticals in Water by Isotope Dilution Liquid Chromatography/Tandem Mass Spectrometry." Environmental Science and Technology. 2006 (p. 7312-7320).

4 Emerging Constituents is one of several similar phrases used to describe the same phenomena. Synonyms include: emerging contaminants of concern, chemicals of emerging concern (CEC), micro-constituents, micro-pollutants, trace organics, etc. Such phrases may mistakenly imply that it is the concern that is emerging rather than the knowledge that certain chemicals may be present in a water sample. Similarly, referring to such compounds as Emerging Pollutants or Emerging Contaminants may mistakenly imply that the levels detected

Once new chemicals are detected, the question naturally arises as to what effect, if any, these compounds have on the municipal drinking water supplies. As part of the Recycled Water Policy adopted in early 2009, the California State Water Resources Control Board ("State Board") recently convened a Blue Ribbon Panel of Experts to address this concern.[5] The Panel's mission is to recommend appropriate water quality monitoring strategies for ECs based on the best available pharmacological and toxicological information taking into consideration the fate and transport of such chemicals through advanced treatments systems and the natural environment. The Panel is expected to publish its final recommendations in mid-2010.

2.0 Regulatory Context

In general, chemical compounds can be divided into two categories: regulated and unregulated. Regulated chemicals include those where a formal water quality standard or a state notification level has been established.[6] State and federal authorities may issue orders governing the release of such compounds into the environment. These regulations may range from relatively simple monitoring and reporting requirements to strict discharge prohibitions.

Unregulated chemicals are those for which no water quality standard or state notification level have been established. By definition, ECs are usually considered unregulated chemicals. However, that status may change as new information is developed. To that end, additional data are needed to characterize the presence and persistence of ECs throughout the water supply system. This information, along with epidemiological and toxicological data, may be used to set priorities for developing new water quality criteria, Maximum Contaminant Levels (MCLs), state notification levels and future water quality monitoring requirements.

Because the analytical techniques used to support EC characterization studies are still in the earliest stages of development, great care must be exercised when using the results of those studies. The data generated from the non-standard methods employed during the preliminary characterization studies are not sufficiently accurate for regulatory purposes such as: 303(d) listing decisions, antidegradation analyses, or translating narrative criteria into numeric effluent limits. These legal determinations depend on detailed risk assessments that are not yet available. However, the data from such studies is useful for determining which ECs, if any, should be prioritized for additional method development in order to determine whether more formal regulatory assessments may be needed in the future.

---

pose a known hazard to people or the environment. The Emerging Constituents Workgroup in the Santa Ana region has chosen to use the phrase "emerging constituents" to describe a large group of chemicals that may or may not pose a risk to human health and the environment. The California Office of Environmental Health Hazard Assessment and U.S. EPA have primary legal responsibility for making the necessary risk assessments and publishing appropriate water quality standards for all chemicals including Emerging Constituents.

5 SWRCB. Recycled Water Policy. Resolution No. 2009-0011 (adopted 2/3/09). A summary of the Blue Ribbon Panel's work-in-progress is available at www.sccwrp.org

6 Concentrations of concern may be expressed as Maximum Contaminant Levels (MCLs), Public Health Goals (PHGs), State Notification Levels, 304(a) Criteria, Basin Plan objectives, TMDL targets, wasteload allocations, or receiving water limitations. Some of these also serve as formal regulatory thresholds.

Pending development of additional water quality standards, the California Department of Public Health ("DPH") previously suggested that periodic monitoring for trace organic chemicals may serve as a useful indicator of groundwater quality downgradient of recycled water projects.[7] Such data may also be used to corroborate the effectiveness of soil-aquifer treatment and the multi-barrier approach to preventing pathogen pollution. Therefore, as part of the proposed Groundwater Recharge Reuse Regulations, DPH prepared a draft list of ECs to guide planning and permitting efforts for recycled water projects.[8]

Acting on DPH's draft recommendations, Regional Boards began adding EC monitoring requirements to the permits for recycled water projects. As the use of recycled water has increased, so have the number of permits containing such provisions.[9] By 2006, some form of EC monitoring, often based on DPH's preliminary suggestions, was rapidly becoming a permit condition for all direct and indirect recharge of recycled water.[10]

Recognizing that the draft monitoring list for ECs was being misunderstood, DPH subsequently revised the draft Groundwater Recharge Reuse Regulation to clarify its original intent. DPH eliminated the list of specific chemicals and instead proposed that recycled water projects analyze for representative compounds within broad chemical categories (hormones, pharmaceuticals, personal care products, industrial chemicals, pesticides, etc.). The specific choice of chemical would be left to the project proponent and the permitting authorities.[11]

The SWRCB adopted the Recycled Water Policy and convened the aforementioned Blue Ribbon Panel of Experts to review the available science and make appropriate recommendations for future EC monitoring. California's Blue Ribbon Panel is only one of many different groups undertaking similar efforts. Recent news articles and a number of scientific papers and technical reports increased public awareness of the issue and provided impetus for additional EC investigations around the country.[12]

---

7 DPH serves several different regulatory roles with respect to groundwater recharge projects. DPH is responsible, under statute, for establishing water quality criteria for groundwater recharge projects. DPH also acts as a consultant to the Regional Boards on the permit requirements for specific groundwater recharge projects. And, DPH has a co-equal role with the Regional Boards in establishing permit requirements for groundwater recharge projects that rely on direct injection rather than surface percolation.

8 http://www.cdph.ca.gov/certlic/drinkingwater/Documents/Recharge/DraftRechargeReg2008.pdf (see Endnote 5). See also http://www.cdph.ca.gov/certlic/drinkingwater/Pages/EmerginContaminants.aspx

9 See, for example, Monitoring and Reporting Program for Regional Board Order No. R8-2005-0033 for Phase I of the Chino Basin Recycled Water Groundwater Recharge Project.

10 See, for example, the NPDES permit issued to Donald C. Tillman Water Reclamation Plant (NPDES No. CA0056227) and the proposed draft NPDES Permit for the Henry N. Wochholz Regional Water Recycling Facility operated by the Yucaipa Valley Water District (NPDES No. CA0105619). Attachment K: List of Unregulated Chemicals: Endocrine Disrupting Chemicals & Pharmaceuticals and Other Chemicals (2007).

11 A more detailed discussion of the history of EC monitoring as it relates to NPDES permitting requirements in California is provided in the Phase-I Report of the Emerging Constituents Task Force. Santa Ana Watershed Project Authority. April, 2009. Available for download at: http://www.sawpa.org

12 Jeff Donn, Martha Mendoza and Justin Pritchard, Associated Press. "AP Probe Finds Drugs in Drinking Water." March 10, 2008.

3.0 Current Studies to Characterize Emerging Constituents

Recently, several large-scale water quality characterization studies began testing for select ECs. The U.S. Geological Survey's National Ambient Water Quality Assessment (NAWQA) and Groundwater Ambient Monitoring Assessment (GAMA) are probably the largest and best known of these research efforts. Results from samples collected throughout the nation indicate that ECs have been detected at trace levels in some surface and groundwater samples.

Subsequent investigations have detected the presence of similar chemicals in both source waters and tap waters.[13] And, follow-on studies found trace amounts of some ECs in highly treated recycled waters.[14] The concentration of trace organic compounds fluctuates greatly from location to location and from day to day. New research is underway to determine if additional treatment can reduce or eliminate ECs cost-effectively.[15]

Given these findings, and the significant role recycled water plays in Southern California, a coordinated effort to characterize the presence of ECs in the Santa Ana River watershed was recently initiated. In 2007-8, the USGS collected and analyzed local groundwater samples as part of the GAMA program. Results of this effort were published in November, 2009 and the EC data are summarized in Table 1.

TABLE 1: EC Characterization for Select Ground Waters in the Santa Ana Region

Compound	Use	# Detections	Detection %	LRL*
Acetaminophen	Analgesic	3 of 89 wells	3%	25 ng/L
Caffeine	Stimulant	3 of 89 wells	3%	15 ng/L
Carbamazepine	Anti-convulsant	5 of 89 wells	6%	30 ng/L
Sulfamethoxazole	Antibiotic	0 of 89 wells	0%	10 ng/L

*LRL = Laboratory Reporting Level

Other pharmaceutical compounds evaluated included: Codeine (narcotic), Continine (nicotine metabolite), Dehydronifedipine (anti-angina metabolite), Diltiaem (anti-angina), Diphenhydramine (antihistamine), Salbutamol (bronchodilator), Thiabendazole (anthelmintic), Trimethoprim (antibacterial), Warfarin (anti-coagulant).

---

13 Benotti, M.J., R.A. Trenholm, B.J. Vanderford, J.C. Holady, B.D. Stanford and S. A. Snyder. "Pharmaceuticals and endocrine disrupting compounds in U.S. drinking water." Environmental Science and Technology. 2009

14 Snyder, Shane. Southern Nevada Water Authority Applied R&D Center. Testimony before the Senate Subcommittee on Transportation Safety, Infrastructure Security and Water Quality on Pharmaceuticals in the Nation's Water: Assessing Potential Risks and Actions to Address the Issue. April 15, 2008.

15 See, for example, Dickenson, E.R., J.E. Drewes, D.L. Sedlak, E.C. Wert and S.A. Snyder. "Applying surrogates and indicators to assess removal efficiency of trace organic chemicals during chemical oxidation of wastewaters." Environmental Science and Technology. 2009.

The GAMA study also analyzed for nine other pharmaceutical compounds (listed above). None of these other chemicals were detected in any of the groundwater samples. USGS concluded that:

> *"No pharmaceutical compound was detected in more than five wells, and all of the concentrations were low. Health-based thresholds do not exist for concentrations of pharmaceuticals in drinking water. However, to reach concentrations of the two detected medications (acetaminophen and carbamazepine) equal to dosages typically recommended or prescribed would, in all cases, require consuming more than one million liters of the sampled water. The sampled concentrations of caffeine were, in all cases, less than one-millionth of the concentration of caffeine in regular coffee."*[16] *(pg. 13)*

In addition, three water agencies undertook a focused sampling program to characterize EC concentrations in surface waters including water imported to the region from the State Water Project and the Colorado River. The agencies also evaluated samples collected from the Santa Ana River, its tributaries, and select wastewater discharges to these streams.[17] Consistent with previous studies performed elsewhere, preliminary data from the Santa Ana investigation detected the presence of some ECs in surface waters throughout the region (see Table 2).

TABLE 2: Partial EC Characterization for Surface Waters in Santa Ana River (n=32)[18]

Compound	Use	Minimum	Median	Maximum
Caffeine	Stimulant	9 ng/L	47 ng/L	1620 ng/L
Carbamazepine	Anti-convulsant	49 ng/L	135 ng/L	267 ng/L
Gemfibrozil	Anti-cholesterol	<5 ng/L	48 ng/L	590 ng/L
Primidone	Anti-convulsant	41 ng/L	90 ng/L	146 ng/L
Sulfamethoxazole	Antibiotic	4 ng/L	160 ng/L	721 ng/L

This finding is not surprising considering that recycled water often comprises more than 90% of the flow in the Santa Ana River and trace levels of some ECs were also detected in the treated municipal wastewater discharged to the river (see Table 3).

Seattle, WA (Research co-sponsored by Metropolitan Water District of Southern California, Orange County Water District, and National Water Research Institute).

18 Eight stream sites were each sampled four times between April, 2008 and April, 2009.

TABLE 3: Partial EC Characterization for Municipal Effluents (n=16)[19]

Compound	Use	Minimum	Median	Maximum
Caffeine	Stimulant	<5 ng/L	14 ng/L	1883 ng/L
Carbamazepine	Anti-convulsant	123 ng/L	208 ng/L	331 ng/L
Gemfibrozil	Anti-cholesterol	<5 ng/L	22 ng/L	1178 ng/L
Primidone	Anti-convulsant	84 ng/L	146 ng/L	171 ng/L
Sulfamethoxazole	Antibiotic	4 ng/L	417 ng/L	1593 ng/L

Finally, trace concentrations of some ECs were identified in water imported to the Santa Ana Region from the State Project (see Table 4) and the Colorado River (see Table 5).

TABLE 4: Partial EC Characterization for State Project Water (n=8)[20]

Compound	Use	Minimum	Median	Maximum
Caffeine	Stimulant	<5 ng/L	7 ng/L	37 ng/L
Carbamazepine	Anti-convulsant	<1 ng/L	2 ng/L	4 ng/L
Gemfibrozil	Anti-cholesterol	<5 ng/L	<5 ng/L	5 ng/L
Primidone	Anti-convulsant	< 2 ng/L	2 ng/L	10 ng/L
Sulfamethoxazole	Antibiotic	5 ng/L	10 ng/L	11 ng/L

TABLE 5: Partial EC Characterization for Colorado River Water (n=4)[21]

Compound	Use	Minimum	Median	Maximum
Caffeine	Stimulant	<5 ng/L	<5 ng/L	<5 ng/L
Carbamazepine	Anti-convulsant	<1 ng/L	<1 ng/L	2 ng/L
Gemfibrozil	Anti-cholesterol	<5 ng/L	<5 ng/L	<5 ng/L
Primidone	Anti-convulsant	<2 ng/L	2 ng/L	3 ng/L
Sulfamethoxazole	Antibiotic	<1 ng/L	<1 ng/L	1 ng/L

[19] Four wastewater treatment plans were each sampled four times between April, 2008 and April, 2009. The four plants include three that discharge to the Santa Ana river system and one that discharges to the Colorado River in Nevada.

[20] Two samples locations, representing the east and west branches of the State Project Water in Southern California, were sampled four times each between April, 2008 and April, 2009.

[21] Four samples were collected from Lake Mathews, the terminal reservoir for Colorado River imported to Southern California, between April 2008 and April 2009.

After confirming that ECs were present, water and wastewater agencies throughout the Santa Ana region elected to continue their characterization studies and to coordinate those efforts with one another. This voluntary program is intended to supplement the existing knowledge base pending recommendations from the Blue Ribbon Panel of Experts and potential new policy guidance from DPH and/or the State Board. At this time, it is not known what those recommendations will be or what actions DPH and the State Board will take based on those recommendations.

4.0 Purpose

The water and wastewater agencies serving the Santa Ana region are committed to develop an EC investigation program that addresses the public's desire to know more about what chemicals may be in their water supplies. Such efforts are essential to increase public acceptance and encourage greater use of recycled water.

The rationale for this voluntary program was recently described in a report entitled: "Managing Contaminants of Emerging Concern in California." The report summarizes results and recommendations from a forum of regulatory and scientific experts convened to assist the State Board in developing a scope-of-work for the Blue Ribbon Panel. Workshop participants found that more data characterizing the presence and persistence of ECs will: 1) establish a baseline to evaluate fate and transport mechanisms and potential trends in water quality which is essential to develop a risk-based approach to understanding and managing exposure to ECs; 2) aid federal and state authorities as they set priorities for and determine whether to develop new water quality criteria; and 3) be useful for evaluating the effectiveness of pollution prevention and source control programs.

The report also identified three steps that should be taken as agencies collaborate to characterize and understand the effects of ECs on public health and the environment. The first step will be filling data gaps through investigative monitoring and targeted research. The second step will be identifying, developing and testing accurate and reliable methods for detecting ECs at very low levels. The third step will be to incorporate the measurement of ECs into on-going water quality studies, such as those that have been undertaken by Inland Empire Utilities Agency, the Metropolitan Water District of Southern California, National Water Research Institute and Orange County Water District. The workshop participants stressed that:

"In lieu of regulations or compliance monitoring...investigative chemical monitoring should be used as the first step towards development of a management strategy in California." [A key element] *"of this process will be our ability to adapt the strategy as new information becomes available. Since relatively little is known about CECs at this time, new information and technology will undoubtedly affect our ability to monitor and establish thresholds for CECs. Preliminary CEC monitoring lists will be subject to trial and error."*[22]

As noted earlier, the draft DPH Groundwater Recharge and Reuse regulations do not identify the specific ECs that must be monitored. Rather, DPH states that this determination must be made on a project-by-project basis and will vary based on a number of considerations including the source of the recharge water, the type of treatments applied to the recycled water and the nature of soil conditions in the area and other factors that may affect the fate, transport and degradation of ECs in the environment. DPH also acknowledges that, for some projects, other chemicals (such as the relative amounts of inorganic tracers or total organic carbon) may provide a better indication of the sources influencing groundwater quality than the specific concentration of various trace organic compounds. It is the responsibility of the project proponents to recommend and justify an appropriate monitoring strategy to the state permitting authorities.

Because analytical technology is constantly improving and our knowledge of which chemicals may pose an unacceptable risk to people and the environment is always growing, it is agreed that any EC investigation program must be updated regularly. Therefore, it is likely that the list of chemicals recommended for future characterization studies will change over time. The water and wastewater agencies proposing to undertake this investigation are committed to a process of adaptive management to ensure the EC characterization program fulfills its stated purpose using the best available science.

To facilitate early implementation of these recommendations, stakeholders in the Santa Ana region propose to undertake a water quality characterization study in 2010-11 to fill some of the aforementioned data gaps. Samples collected from select surface water streams, imported water sources and wastewater treatment plants will be analyzed for a representative group of ECs using the best analytical technology presently available.

The EC Workgroup will prepare a written Sampling and Analysis Plan (SAP) describing the specific data quality objectives, sampling locations, sampling protocols, sampling frequency, analytical methods, QA/QC procedures, database management and reporting requirements. The plan will also discuss the appropriate and inappropriate uses of the data given the various method limitations. The SAP will be submitted to the Regional Board staff by March 15, 2010 for review and comment. The general specifications for the 2010-2011 EC Characterization Study are described in Section 5.

[22] "Managing Contaminants of Emerging Concern in California." California CEC Workshop. Co-sponsored by the Southern California Coastal Water Research Project (SCCWRP), California Ocean Protection Council, California Ocean Science Trust, National Water Research Institute, San Francisco Estuary Institute and the Urban Water Research Center at the University of California-Irvine. Held: April 28-29, 2009. Report published in Sept., 2009 and is available at: ftp://ftp.sccwrp.org/pub/download/DOCUMENTS/TechnicalReports/600_CEC_wkshp2009.pdf

5) 2010-11 Characterization Study

A) Proposed Analytes

Table 6 identifies the trace organic compounds that the stakeholders propose to assess during the 2010 characterization period. The list may be revised for the 2011 characterization period based on recommendations from the Blue Ribbon Panel of Experts or new guidance from the State Board.

Table 6: ECs to be Analyzed

Chemical	Category	Common Use	Notes
Acetaminophen (aka "Tylenol")	Pharmaceutical	Over-the Counter Analgesic	3,4,5,8
Bisphenol-A (BPA)	Industrial	Plastic Manufacturing	7
Caffeine (coffee, tea, soft drinks)	Food Additive	Non-Prescription Stimulant	3,5,6,8
Carbamazepine	Pharmaceutical	Prescription Anti-Convulsant	1,2,3,4, 5,6,8
DEET (aka "Off")	Pesticide	Household Insect Repellent	1,2,6
Diuron	Herbicide	Weed Control	6
Ethynylestradiol/Ethinylestradiol	Hormone	Prescription	1,2,4,6
Gemfibrozil	Pharmaceutical	Prescription Anti-Cholesterol	1,2,3,4,5,6
Ibuprofen (aka "Advil")	Pharmaceutical	Over-the-Counter Analgesic	3,4,5
Sulfamethoxazole	Pharmaceutical	Prescription Antibiotic	1,2,3,5,6,8
TCEP	Industrial	Flame Retardant	1,2,3,6

Selection Criteria Notes:

1) Commonly detected in national studies of water supply sources.
2) Commonly detected in national studies of finished drinking water.
3) Detected in SAR surface waters and/or effluents in MWDSC/NWRI/OCWD study.
4) Detected in Inland Empire Utility Agency's existing EC monitoring program.
5) Detected in previous USGS studies of the Tualatin River system in Oregon.
6) Recommended by expert panel assembled to review an advanced reclamation project proposed for the West Basin.
7) Recently added to U.S. EPA's Candidate Contaminant List (CCL)
8) Detected by the USGS GAMA program in Santa Ana groundwater samples.

B) Proposed Sampling

Table 7: Sampling Locations, Frequency, Type & Responsibilities

Sampling Site	Sampling Frequency	Sample Type	Responsible Agency[23]
Final Effluent from All Wastewater Treatment Plants[24]	Annually	24-hour Composite	Permitted Operator
State Project Water @ Devil Canyon	Annually	Representative Grab	MWDSC
Colorado River @ San Jacinto West Portal	Annually	Representative Grab	MWDSC
Santa Ana River near MWD Crossing	2x/year	Representative Grab	OCWD
Santa Ana River near Prado Dam	2x/year	Representative Grab	OCWD

Water samples will be collected by June of each year. Second samples, when needed, will be collected by September of each year. Due to the time required to analyze samples, review QA/QC and summarize results, data from the summer collection period will be included in the next year's report.[25]

C) Proposed Methods

At present, there are no standardized or certified methods for analyzing most ECs.[26] Until EPA approves such methods, the EC Workgroup is committed to using the best analytical technology commercially available: LC-MS-MS with isotope dilution. In general, this technique is capable of detecting select ECs in de-ionized laboratory water at concentrations of 1 to 10 ng/L. However, the specific reporting detection level (RDL) will vary over time and between laboratories in more complex water matrices. Therefore, more detailed data quality objectives and QA/QC requirements will be specified in the Sampling and Analysis Plan submitted to the Regional Board.

---

[23] Pending approval and funding authorization from each agency.

[24] Includes all wastewater treatment plants operating under a valid NPDES permit or Waste Discharge Requirement (WDR) issued by the California Regional Water Quality Control Board – Santa Ana Region and/or U.S. EPA regardless of whether the discharge is to waters of the U.S. or waters of the state.

[25] Therefore, the report submitted in November, 2010 will include only the results for samples collected in May, 2010. The report submitted in November, 2011 will include the results for samples collected in August, 2010 and May, 2011.

[26] U.S. EPA approves analytical methods pursuant to 40 CFR Part 136.

D) Proposed Reporting

Participating stakeholders will submit copies of all sampling documents (field notes and chain of custody forms) and laboratory reports to the Santa Ana Watershed Project Authority (SAWPA). SAWPA will input the data to the SAWDMS database and prepare an annual report summarizing results of the EC characterization program. A draft copy of the EC report will be distributed for review and comment and SAWPA will convene a stakeholder meeting shortly thereafter to discuss suggested revisions to the draft document. The final report will be submitted to the Regional Board, on behalf of the stakeholders, by December 31st of each year.

The annual report will include a detailed description of the chemical analytes, sampling locations, sampling dates and protocols, analytical methods, QA/QC procedures and relevant results. Where appropriate, the report will also include any recommended changes to future EC sampling efforts (including revised analytes or sampling locations).

Finally, to facilitate public understanding of the new information, the report will describe the toxicological relevance of the measured EC concentrations. The purpose of this discussion is to provide, where possible, a scientific context for evaluating the relative health risks of these trace organic compounds.[27]

E) Proposed Schedule for 2010-11 Study Period

Task	Description	Deadline
1	Prepare and Submit EC Sampling and Analysis Plan	Mar. 15, 2010
2	Collect and Analyze Initial Samples from All Locations in Table 7	June 30, 2010
3	Submit Initial Sample Results and Related Documentation to SAWPA	July 31, 2010
4	ECW Meeting to Review and Discuss Initial Sample Results	Aug. 31, 2010
5	Collect and Analyze Second Surface Water Samples	Sept. 30, 2010
6	Distribute Draft Annual Report to Emerging Constituents Workgroup	Oct. 31, 2010
7	ECW Meeting to Review and Finalize Annual Report	Nov. 30, 2010
8	Submit First Annual Report to Regional Board	Dec. 31, 2010
9	Submit Second Surface Water Sample Results from 2010 to SAWPA	Jan. 31, 2011

[27] See, for example, "Toxicological Relevance of Endocrine Disrupting Chemicals and Pharmaceuticals in Water" American Water Works Association Research Foundation Report No. 3085/WRF 04-003.

E) Emerging Constituents Workgroup

SAWPA will periodically coordinate meetings of the Emerging Constituents Workgroup (ECW) to organize the next phase of the EC characterization study. This includes reviewing new water quality data, preparing the annual EC report, and integrating new EC policies enacted by the State Board and DPH.

During 2010, and after reviewing the final published results from the GAMA study and the MWDSC/NWRI/OCWD study, the ECW will determine whether it is useful and appropriate to expand the investigation effort to include storm water samples and select groundwater locations in 2011.

SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT

CRESTLINE-LAKE ARROWHEAD WATER AGENCY

DEMONSTRATION PROJECT

WATER EXCHANGE AGREEMENT

RECITALS

A. San Bernardino Valley Municipal Water District ("VALLEY") is a public agency organized pursuant to the California Municipal Water District Law of 1911 (Water Code §§ 71000 et seq.) with broad powers to acquire and sell water. VALLEY has a Water Supply Contract with the California Department of Water Resources ("DWR") that provides VALLEY with a Table A Amount of up to 102,600 acre-feet per annum of water ("AFA") from the State Water Project ("SWP").

B. Crestline-Lake Arrowhead Water Agency ("AGENCY") is a public agency organized in accordance with Crestline-Lake Arrowhead Water Agency Law (Water Code Appendix §§ 104-1 et seq.) with broad powers to acquire and sell water. AGENCY has a Water Supply Contract with DWR that provides it with a Table A Amount of 5,800 AFA.

C. VALLEY and AGENCY intend by this Agreement to implement a Demonstration Project to exchange water for an initial period of one year to determine the long-term feasibility, including evaluation of benefits, costs, and beneficial distribution of supplemental water to VALLEY and AGENCY.

D. VALLEY and AGENCY desire to enter into this Water Exchange Agreement whereby VALLEY will acquire up to 1,000 AF of SWP water from AGENCY ("INITIAL DELIVERY") in exchange for delivery of a like amount of water from VALLEY to AGENCY ("EXCHANGE WATER") within three years of the INITIAL DELIVERY ("RETURN PERIOD").

E. VALLEY has a need for the INITIAL DELIVERY before December 31, 2008, to improve reliability of supply to existing water users within VALLEY.

F. AGENCY has up to 1,000 AF of SWP water available from its 2008 allocation of SWP water for the INITIAL DELIVERY provided it can receive the EXCHANGE WATER from VALLEY within three years to enable it to meet anticipated demands for water within its service area.

SBVMWD LEGAL
DOCUMENT **2206**

IN CONSIDERATION OF THE MUTUAL PROMISES of the Parties as set forth herein, it is agreed as follows:

1. **Description of the Exchange and Procedures.**

On or before December 1, 2008, AGENCY will in writing request the California Department of Water Resources ("DWR") to deliver up to 1,000 AF of the AGENCY's SWP Table A Amount to VALLEY ("INITIAL DELIVERY") at its designated point of delivery. A copy of such written request shall be delivered to VALLEY. After written confirmation to AGENCY from VALLEY of such INITIAL DELIVERY, at the written request of AGENCY, VALLEY shall deliver a like amount of SWP water or water of equal or better quality ("EXCHANGE WATER") to AGENCY, in whole or in part as specified in such request. AGENCY shall not make such request any earlier than January, 2010. VALLEY and AGENCY shall meet and confer in advance of such delivery date to schedule the delivery of the EXCHANGE WATER over the Return Period. VALLEY shall complete delivery of the EXCHANGE WATER no later than December, 2011. VALLEY's obligation to deliver EXCHANGE WATER shall be from any source provided it is equal to or better than the water quality standards established by DWR for the State Water Project. If AGENCY requests delivery of EXCHANGE WATER in a year which DWR has declared to be critically dry, VALLEY and AGENCY agree to confer in good faith to adjust the quantity of EXCHANGE WATER to be delivered in that year so as to minimize adverse impacts on the ability of both parties to satisfy the needs of their respective customers. AGENCY'S obligation for the INITIAL DELIVERY shall be subject to the availability of water from the SWP.

2. **Points of Delivery and Measurement.**

a. VALLEY. The point of delivery and measurement of the Initial Water from AGENCY shall be from DWR at Silverwood Lake.

b. AGENCY. The point of delivery and measurement of the Exchange Water from VALLEY to AGENCY shall be from VALLEY at Silverwood Lake.

3. **Charges.**

a. Neither VALLEY nor AGENCY shall charge any costs to the other for use of either agency's facilities to the point of delivery.

b. VALLEY shall be responsible for all costs of, and entitled to all power credits generated by, the INITIAL DELIVERY downstream

from the point of delivery. AGENCY shall be responsible for all delivery costs of the EXCHANGE WATER.

4. **Conditions Precedent and Covenants.**

4.1 **DWR Approval.** No provisions of this Agreement requiring DWR approval shall become operative until DWR approves of those provisions. VALLEY and AGENCY shall use their best efforts to promptly obtain such approvals.

4.2 **State Water Contractors.** VALLEY and AGENCY agree they will each with due diligence and in good faith seek to obtain the support and approval of this Agreement by the State Water Contractors and request DWR approve the exchange of water as set forth herein.

5. **Future Banking and Conjunctive Use Projects.**

VALLEY and AGENCY believe that water exchange agreements and coordinated deliveries could lead to improved reliability and more efficient utilization of their respective supplies to meet the needs of their respective water users. In that regard, VALLEY and AGENCY agree to work together in good faith and with due diligence to determine the technical and financial feasibility and implementation of such arrangements subject to compliance with applicable laws, including California Environmental Quality Act.

6. **Notices.**

All written notices required to be given pursuant to the terms of this Agreement shall be either (i) personally delivered, (ii) deposited in the United States express mail or first class mail, (iii) delivered by overnight courier service, or (iv) delivered by facsimile transmission, provided that the original of such notice is sent by certified United States mail, postage prepaid, no later than one (l) business day following such facsimile transmission. All such notices shall be deemed delivered upon actual receipt (or upon first attempt at delivery pursuant to the methods specified in clauses (i), (ii) or (iii) above if the intended recipient refuses to accept delivery). All such notices shall be delivered to the following addresses or to such other address as the receiving party may from time to time specify by written notice to the other party:

VALLEY:

San Bernardino Valley Municipal Water District
380 East Vanderbilt Way
P.O. Box 5906
San Bernardino, CA 92412-5906

Attention: General Manager
Telephone: (909) 387-9211
Facsimile: (909) 387-9247

AGENCY:

Crestline-Lake Arrowhead Water Agency
24116 Crest Forest Drive
P.O. Box 3880
Crestline, CA 92325-3880

Attention: General Manager
Telephone: (909) 338-1779
Fax: (909) 338-3686

7. **Miscellaneous.**

7.1 **No Assignment.** No party shall assign or otherwise transfer its rights or obligations under this Agreement without the prior written consent of the other party.

7.2 **Successors and Permitted Assigns.** All covenants and agreements contained in this Agreement by or on behalf of any of the parties shall bind and inure to the benefit of their respective successors and permitted assigns, wither so expressed or not.

7.3 **No Modification of Existing Contracts.** This Agreement shall not be interpreted to modify the terms or conditions of the water supply contracts between the DWR and AGENCY and between DWR and VALLEY, or to modify the terms or conditions of any other water purchase or exchange agreements between AGENCY and VALLEY.

7.4 **Governing Law/Venue.** This Agreement shall be construed and enforced in accordance with the laws of the State of California. Venue for any actions brought regarding this Agreement shall be in the County of San Bernardino, provided that, in accordance with the provisions of the

Code of Civil Procedure Section 394, a disinterested judge from a neutral county is assigned to hear such action and all proceedings in connection therewith.

7.5 **Ministerial Actions.** Due to increasing State-wide demands for water, water exchanges, water storage, banking and recovery, and various water quality issues throughout the State, the Parties agree that this Project is unique and cannot be duplicated and there is not a plain, speedy, and adequate remedy at law for VALLEY or AGENCY should either refuse or fail to perform their respective obligations as set forth in this Agreement. Consequently, VALLEY and AGENCY agree that the terms of this Agreement are enforceable by writ of mandate and specific performance.

7.6 **Counterparts.** This Agreement may be executed in counterparts, each of which shall be deemed an original, and all of which, taken together, shall constitute one and the same instrument. Signatures sent by facsimile shall be deemed originals and treated in all respects as originals.

7.7 **Further Action.** The parties agree to and shall take such further action and execute such additional documents as may be reasonably required to effectuate the terms and conditions of this Agreement and to the extent consistent with terms thereof.

7.8 **Interpretation.** This Agreement has been jointly negotiated and drafted. The language of this Agreement shall be construed as whole according to its fair meaning and without regard to or aid of Civil Code Section 1654 or similar judicial rules of construction. Each party acknowledges that it has had the opportunity to seek the advice of experts and legal counsel prior to executing this Agreement and that it is fully aware of and understands all of its terms and the legal consequences thereof. The headings used in this Agreement are for reference only and shall not affect the construction of this Agreement.

San Bernardino, CA 92412-5906
Phone: (909) 387-9211

Project Title: The Project entails the approval of a Water Exchange Agreement, which allows for the exchange of 1,000 acre-feet ("AF") of State Water Project ("SWP") water from Crestline-Lake Arrowhead Water Agency ("Agency") to San Bernardino Valley Municipal Water District ("Valley") and vice versa.

Project Location: Within the service areas of Crestline-Lake Arrowhead Watery Agency, see Map attached as Exhibit "1," and San Bernardino Valley Municipal Water District, see Map attached as Exhibit "2," in the County of San Bernardino.

Description of Nature, Purpose, and Beneficiaries of Project: On November 5, 2008, the Board of Directors of Valley approved the execution of the Water Exchange Agreement ("Agreement") with Agency. This Agreement authorizes Valley to acquire up to 1,000 AF of SWP water from Agency, and requires Agency to submit a written request to the California Department of Water Resources on or before December 1, 2008, to deliver up to 1,000 AF of Agency's share of SWP Table A water to Valley. In exchange for delivery of that water, Valley will deliver a like amount of water of equal or better quality to Agency within three years of the initial delivery of water to Valley. This same Agreement was approved by Agency on November 6, 2008.

Name of Public Agency Approving Project: San Bernardino Valley Municipal Water District

Exempt Status (check one):

___ Ministerial Action.
___ Declared Emergency
___ Emergency Project
_X_ Categorical Exemption (State CEQA Guidelines § 15301 [Existing Facilities]; State CEQA Guidelines §15304 [Minor Alterations to Land, Water, or Vegetation].)
_X_ Statutory Exemption (State CEQA Guidelines § 15282(u) [Temporary Transfer or Exchange of Water or Water Rights].)
_X_ Other The Project is also exempt under State CEQA Guidelines section 15061(b)(3) because it can be seen with certainty that there is no possibility the Project may have a significant impact on the environment. The Project is merely an exchange of water. No physical facilities will be constructed to produce or transport water because all such required facilities already exist. In addition, no new water production or transportation capacity is created by the Project.

Reasons why project is exempt: The water exchange approved by Valley will entail no change in type of use or expansion of use, but consist merely of the continued operation of existing facilities and the use of those facilities to temporarily transport water to a different location. State CEQA Guidelines section 15301 provides that environmental review is not required for "the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that existing at the time of the lead agency's determination." In addition, the exchange of water is a minor, temporary alteration to the condition of water that does not require the removal of any trees and thus is also exempt pursuant to State CEQA Guidelines section 15304 as "minor public or private alterations in the condition of land, water, and/or vegetation which do not involve removal of healthy, mature, scenic trees." The Project's proposed exchange of water is temporary and thus is also exempt pursuant to the State CEQA Guidelines, section 15282(u) exemption for the temporary transfer of water or water rights. Because the water exchange will merely temporarily change the location in which water is used and will be delivered via existing facilities, there is no possibility the Project may have a significant impact on the environment. Accordingly, the Agreement and the water exchange that it authorizes are exempt from environmental review under CEQA. Moreover, the water transfer does not involve cumulative impacts, potentially significant impacts, unusually sensitive environments, or any other unique or unusual environmental impacts that might merit environmental review.

This Letter Agreement is in response to Crestline-Lake Arrowhead Water Agency's (CLAWA) letter requesting the Department of Water Resources (DWR) approval for the exchange of up to 1,000 acre-feet of State Water Project (SWP) Table A water between San Bernardino Valley Municipal Water District (SBVMWD) and CLAWA. SBVMWD will take delivery of, and store within its groundwater basin, up to 1,000 acre-feet of CLAWA's 2008 Table A water by December 31, 2008. SBVMWD will return a portion of its allocation of Table A water by December 31, 2011 to CLAWA as a 1 acre-foot for 1 acre-foot exchange. There will be no monetary payments between CLAWA and SBVMWD for this exchange of Table A water.

DWR will file a Notice of Exemption based on California Environmental Quality Act Guidelines Section 15301 with the following description of this exchange of water: the proposed project is a water management operation using only existing facilities for the exchange of water from one SWP Contractor to another SWP Contractor, the limited term transfer will not support new development or a change in land use, and the transfer is wholly within the SWP place of use. DWR is willing to approve the delivery of up to 1,000 acre-feet of CLAWA's 2008 SWP Table A water to SBVMWD in exchange for the return of a portion of SBVMWD's Table A water subject to the following terms and conditions:

GENERAL PROVISIONS

1. DWR's approval under this Agreement is unique and shall not be considered a precedent for future agreements.

2. This Agreement shall become effective on the date of execution by all the parties and shall provide for the delivery of water to SBVMWD as of December 31, 2008. This Agreement shall terminate upon the delivery of all return water to CLAWA under this Agreement or by December 31, 2011, whichever comes first.

3. The delivery and return of water pursuant to this Agreement shall be contingent on, and subject to, any necessary approvals and shall be governed by the terms and conditions of such approval(s) and any other applicable regulations. CLAWA and SBVMWD shall be responsible for complying with all applicable laws and regulations and for securing any required consent, permit, or order. CLAWA and SBVMWD shall furnish to DWR copies of all approvals and agreements required for the delivery of water under this Agreement.

4. DWR will maintain records documenting the conveyance of up to 1,000 acre-feet of CLAWA's 2008 SWP Table A water to SBVMWD and the return delivery of water to CLAWA. CLAWA and SBVMWD shall certify to the State Water Project Analysis Office (Attention: Chief, Water Contracts Branch, Fax (916) 653-9628) the amount of CLAWA's approved 2008 Table A water delivered to SBVMWD and the return delivery of water from SBVMWD to CLAWA under this Agreement by January 31st of the year following the actual delivery.

WATER DELIVERY FROM CLAWA TO SBVMWD

5. The water delivered to SBVMWD shall be from CLAWA's allocation of 2008 approved Table A water.

6. The delivery of a portion of CLAWA's 2008 Table A water to SBVMWD shall be in accordance with a schedule reviewed and approved by DWR. DWR's approval is dependent upon the times and amounts of the delivery and the overall delivery capability of the SWP. DWR shall not be obligated to deliver the water at times when such delivery would adversely impact SWP operations, facilities, and other SWP contractors.

7. Pursuant to Paragraph 6, CLAWA shall obtain SBVMWD's approval for the water delivery schedule before submitting a schedule to DWR. All water delivery schedules and revisions shall be in accordance with Article 12 of CLAWA's and SBVMWD's respective long-term Water Supply contracts with DWR.

8. Pursuant to Paragraphs 5, 6, and 7, DWR will deliver up to 1,000 acre-feet of CLAWA's 2008 Table A water to SBVMWD's service area, Reach 26A of the California Aqueduct by December 31, 2008.

9. CLAWA and SBVMWD shall submit to the State Water Project Analysis Office for approval (Attention: Chief, Water Deliveries Section, FAX (916) 653-9628) a revised 2008 water delivery schedule and shall reference this Agreement, SWPAO #08063.

10. CLAWA and SBVMWD shall submit a weekly schedule to the Southern Field Division (Attention: Chief, Water Operations Section, FAX (661) 294-3651) showing the deliveries to SBVMWD. The schedules shall be submitted by 10:00 a.m. Wednesday for the following two weeks ahead (Monday through Sunday) and shall be concurrently faxed to the following at the State Water Project Operations Control Office:

    Chief, Pre-Scheduling Section at (916) 574-2782
    Chief, Operations Scheduling at (916) 574-2785

RETURN WATER DELIVERED FROM SBVMWD TO CLAWA

11. SBVMWD shall return all water to CLAWA by December 31, 2011. The return water delivered to CLAWA shall be Table A water allocated to SBVMWD in the year water is returned. In the event that all water is not returned to CLAWA by August 31, 2011, DWR, in coordination with CLAWA and SBVMWD, shall expedite the return of water to CLAWA by so scheduling SBVMWD's Table A by December 31, 2011.

12. The return of water under this Agreement by SBVMWD to CLAWA shall be in accordance with a schedule reviewed and approved by DWR. DWR's approval is dependent upon the times and amounts of the delivery and the overall delivery capability of the SWP. DWR shall not be obligated to deliver the water at times when such delivery would adversely impact SWP operations, facilities, or other SWP Contractors.

13. Pursuant to Paragraph 11, SBVMWD shall obtain CLAWA's approval for the proposed delivery schedule, before submitting a schedule to DWR. All water delivery schedules and revisions shall be in accordance with Article 12 of CLAWA's and SBVMWD's long-term Water Supply contracts with DWR.

14. Pursuant to Paragraphs 11 and 12, DWR will deliver a portion of SBVMWD's Table A water scheduled for delivery to SBVMWD's service area to CLAWA's service area in Reach 24 of the California Aqueduct.

NO IMPACT

15. This Agreement shall not be administered or interpreted in any way that would cause adverse impacts of SWP approved Table A water or of any other SWP approved water allocations, water deliveries, and SWP/CVP operations and facilities. CLAWA and SBVMWD shall be responsible for any adverse impacts that may result from the exchange of water as determined by DWR.

SWP ALLOCATION

16. Water returned to CLAWA pursuant to this Agreement shall not be considered by DWR in the determination of approved annual Table A deliveries to or allocation of other SWP water to CLAWA under Article 18 of CLAWA's long-term Water Supply contract with DWR.

CHARGES

17. CLAWA and SBVMWD shall pay the following charges, including all future adjustments, which shall be calculated in the same manner as charges are calculated for SWP Table A deliveries and shall be in accordance with the provisions of CLAWA's and SBVMWD's long-term Water Supply contracts with DWR. Charges shall be determined for the year the water is delivered, and the year the water is returned.
    a. When a portion of CLAWA's approved 2008 Table A water is delivered to SBVMWD, SBVMWD shall pay to DWR the charges associated with the delivery of the water from the Delta to the point of delivery at SBVMWD's turnouts on the California Aqueduct, Reach 26A. The charges associated with such delivery will be the 2008 Variable Operation, Maintenance, Power, and Replacement components of the Transportation Charge and the 2008 Off-Aqueduct Power Facilities Cost for each acre-foot of water delivered.

    b. In any year that a portion of SBVMWD's future Table A water is returned to CLAWA pursuant to this Agreement, CLAWA shall pay to DWR the charges associated with the delivery of the return water from the Delta to CLAWA's turnouts in Reach 24 of the California Aqueduct. The charges associated with the return water will be the Variable Operation, Maintenance, Power and Replacement components of the Transportation charges and the Off-Aqueduct Power Facilities Cost for each acre-foot of water delivered in effect for the year in which the water is returned to CLAWA.

18. In addition to the charges identified above, CLAWA and SBVMWD agree to pay to DWR any additional identified demonstrable increase in costs that would otherwise be borne by the SWP contractors not signatory to this Agreement or by DWR, as a result of activities pursuant to this Agreement.

19. Payment terms shall be in accordance with CLAWA's and SBVMWD's long-term Water Supply contracts with DWR.

LIABILITY

20. Responsibility for water delivered pursuant to this Agreement shall be governed by Article 13 of CLAWA's and SBVMWD's long-term Water Supply contracts, with responsibilities under the terms of that article shifting from DWR to CLAWA and SBVMWD when the water passes through their respective turnouts.

21. In the event of a claim of liability against DWR or its Directors, officers, or employees, jointly or severally, that arises as a result of this Letter Agreement, CLAWA and SBVMWD shall defend, indemnify, and hold DWR and any of its Directors, officers, employees harmless from any such claim, except to the extent that such claim arises from the sole negligence or willful misconduct of DWR.

EXECUTION

22. This Letter Agreement may be executed in counterpart. The parties agree to accept facsimile signatures as original signatures. The Agreement shall take effect as soon as all parties have signed.

23. Immediately after execution, SBVMWD and CLAWA shall transmit a copy of the executed Letter Agreement by facsimile to Robert Cooke, Chief, State Water Project Analysis Office at (916) 653-9628 and to each other at.
    CLAWA: (909) 338-3686
    SBVMWD: (909) 387-9247

If CLAWA or SBVMWD needs a Board of Directors' approval of this Letter Agreement, that party shall send a facsimile of the board approval to the other two parties. If you have any questions or need additional information, please contact me at (916) 653-4313 and refer to SWPAO #08063.

Sincerely,

Robert B Cooke

CRESTLINE-LAKE ARROWHEAD WATER AGENCY

WATER EXCHANGE AGREEMENT AND AMENDMENT OF DEMONSTRATION PROJECT

RECITALS

A. On November 7, 2008, San Bernardino Valley Municipal Water District ("Valley") and Crestline-Lake Arrowhead Water Agency ("Agency") entered into an agreement titled "Demonstration Project Water Exchange Agreement" (the "2008 Exchange Agreement"). Pursuant to the terms of the 2008 Exchange Agreement, the Agency arranged for the delivery of 1,000 acre-feet of water from the Agency's State Water Project Table A allocation in exchange for Valley's agreement to allow the Agency to take back a total of 1,000 acre-feet of water from Valley's State Water Project Table A allocations in 2010 and/or 2011 (the "2008 Exchange Arrangement").

B. The Agency and Valley wish to amend the 2008 Exchange Agreement to allow the Agency to take back a total of 1,000 acre-feet of water from Valley's State Water Project Table A allocations in any year or years between 2010 and 2018, inclusive, subject to such reductions in the quantity of water to be returned to the Agency due to high groundwater conditions within Valley's service area as are hereinafter provided.

C. In addition, the Agency and Valley wish to provide for the delivery to Valley of 1,000 acre-feet of water from the Agency's State Water Project Table A allocation in 2009, in exchange for Valley's agreement to allow the Agency to take back a total of 650 acre-feet of water from Valley's State Water Project allocations in any year or years between 2010 and 2018, inclusive, subject to such reductions in the quantity of water to be returned to the Agency due to high groundwater conditions within Valley's service area as are hereinafter provided (the "2009 Exchange Arrangement").

D. The purpose of this Agreement is to amend the terms of the 2008 Exchange Agreement and to set forth the terms of the 2009 Exchange Arrangement.

IN CONSIDERATION OF THE MUTUAL PROMISES set forth herein, the Agency and Valley agree as follows:

1. **Amendment of 2008 Exchange Agreement.**

(a) Return of Exchange Water. The sixth sentence of Section 1 of the 2008 Exchange Agreement, titled "Description of the Exchange and Procedures" is hereby amended to provide as follows:

"VALLEY shall complete delivery of the EXCHANGE WATER no later than December 2018."

In addition, within Paragraphs D and F of the Recitals in the 2008 Exchange Agreement, the term "three years" is hereby amended to read "ten years."

(b) Quantity of Exchange Water. The 2008 Exchange Agreement is further amended to provide that the quantity of "Exchange Water" (as defined therein) to be returned to the Agency during the "Return Period" (as also defined therein) shall be subject to the same reductions as may be applied to the return of water under the 2009 Exchange Arrangement, due to high groundwater conditions within Valley's service area, as provided in Section 2(c) of this Agreement.

2. **2009 Exchange Arrangement.**

(a) Initial Delivery to Valley. Prior to December 1, 2009, Agency will, in writing, request the California Department of Water Resources ("DWR") to deliver 1,000 acre-feet of the Agency's 2009 State Water Project Table A allocation to Valley, at Silverwood Lake. A copy of such written request shall be delivered to Valley.

(b) Return of Exchange Water. After written confirmation that 1,000 acre-feet of water from the Agency's State Water Project Table A allocation in 2009 has been delivered to Valley, Valley shall thereafter deliver to the Agency, at Silverwood Lake, up to a total of 650 acre-feet of water when requested by the Agency, between the years 2010 and 2018, inclusive (the "Exchange Water"). The Exchange Water shall be State Water Project water or water of equal or better quality. If the Agency requests delivery of Exchange Water in a year which DWR has declared to be critically dry, the Agency and Valley agree to confer in good faith to adjust the quantity of Exchange Water to be delivered in that year so as to minimize adverse impacts on the ability of both parties to satisfy the needs of their respective customers.

(c) Quantity of Exchange Water To Be Returned. As of the date of this Agreement, the total quantity of 2008 Exchange Water and 2009 Exchange Water to be returned to the Agency pursuant to the 2008

Exchange Agreement and the 2009 Exchange Arrangement is 1,650 acre-feet. Because water within the San Bernardino Valley Groundwater Basin is lost from the Basin during high groundwater conditions resulting from high precipitation, the Agency and Valley agree that during any year from 2010 to 2018, inclusive, that the Basin Technical Advisory Committee ("BTAC") makes a determination that high groundwater conditions exist in the San Bernardino Basin Area, the balance of the 2008 Exchange Water and the 2009 Exchange Water which has not been returned to the Agency prior to that year shall each be reduced by an amount equal to 10% of the then existing quantity of 2008 Exchange Water and the 2009 Exchange Water not yet returned, for each such year that a declaration of high groundwater conditions is made, and the parties shall jointly advise DWR in writing of such reduction. The declaration of high groundwater conditions shall be made pursuant to the protocol attached hereto as Exhibit "A" as amended by Valley from time to time.

(d) Charges. The Agency shall be responsible for all costs of delivering 1,000 acre-feet of State Water Project to Valley at Silverwood Lake in 2009. Valley shall be responsible for all costs of delivering up to 650 acre-feet of Exchange Water to the Agency at Silverwood Lake, in the year that such water is delivered, pursuant to the terms of this Agreement. The charges for the Agency's delivery of water to Valley, and Valley's delivery of Exchange Water back to the Agency, pursuant to the 2008 Exchange Arrangement shall be as set forth in the 2008 Exchange Agreement. For purposes of this paragraph, Exchange Water returned to the Agency shall be credited first to the exchange obligations set forth in the 2008 Exchange Agreement, until such Exchange Water is fully depleted, and then shall be credited to the exchange obligations created by the 2009 Exchange Arrangement.

3. **Conditions Precedent and Covenants.**

(a) DWR Approval. No provisions of this Agreement requiring DWR approval shall become operative until DWR approves of those provisions. The Agency and Valley shall use their best efforts to promptly obtain such approvals.

(b) State Water Contractors. The Agency and Valley agree that they will each with due diligence and good faith seek to obtain the support and approval of this Agreement by the State Water Contractors.

4. **Notices.**

All written notices required to be given pursuant to the terms of this Agreement shall be (i) personally delivered, (ii) deposited in the United States express mail or first-class mail, (iii) delivered by overnight courier service or (iv) delivered by facsimile transmission, provided that the

original of such notice is sent by certified United States mail, postage prepaid, no later than one business day following such facsimile transmission. All such notices shall be deemed delivered upon actual receipt or upon first attempt at delivery pursuant to the methods specified herein if the intended recipient refuses to accept delivery. All such notices shall be delivered to the following addresses or to such other address as the receiving party may from time to time specify by written notice to the other party:

5. **Miscellaneous.**

(a) No Assignment. No party shall assign or otherwise transfer its rights or obligations under this Agreement without the prior written consent of the other party.

(b) Successors and Permitted Assigns. All covenants and agreements contained in this Agreement by or on behalf of any of the parties shall bind and inure to the benefit of their respective successors and permitted assigns, whether so expressed or not.

(c) No Modification of Existing Contracts. This Agreement shall not be interpreted to modify the terms or conditions of the water supply contracts between the DWR and the Agency, and between DWR and Valley.

(d) Governing Law/Venue. This Agreement shall be construed and enforced in accordance with the laws of the State of California. Venue for any actions brought regarding this Agreement shall be in the County of San Bernardino, provided that, in accordance with the provisions of the Code of Civil Procedure Section 394, a disinterested judge from a neutral county is assigned to hear such action and all such proceedings in connection therewith.

(e) Ministerial Actions. Due to increasing State-wide demands for water, water exchanges, water storage, banking and recovery, and various water quality issues throughout the State, the parties agree that this project is unique and cannot be duplicated and there is not a plain, speedy, and adequate remedy at law for the Agency or Valley should either refuse or fail to perform their respective obligations as set forth in this Agreement. Consequently, the Agency and Valley agree that the terms of this Agreement are enforceable by a writ of mandate and specific performance.

(f) Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, and all of which, taken together, shall constitute one and the same instrument. Signatures sent by facsimile shall be deemed originals and treated in all respects as originals.

(g) Further Action. The parties agree to and shall take such further action and execute such additional documents as may be reasonably required to effectuate the terms and conditions of this Agreement and to the extent consistent with the terms thereof.

(h) Interpretation. This Agreement has been jointly negotiated and drafted. The language of this Agreement shall be construed as a whole according to its fair meaning and without regard to or aid of Civil Code Section 1654 or similar judicial rules of construction. Each party acknowledges that it has had the opportunity to seek the advice of experts and legal counsel prior to executing this Agreement and that it is fully aware of and understands all of the terms and the legal consequences thereof. The headings used in this Agreement are for reference only and shall not affect the construction of this Agreement.

EXHIBIT A

In December 2007, fourteen agencies adopted the *Upper Santa Ana Watershed Integrated Regional Water Management Plan* (Integrated Plan). One of the primary water resources identified in the Integrated Plan is groundwater. The largest groundwater basin in the study area is the San Bernardino Basin Area (SBBA). When the SBBA is too full, high groundwater levels can occur in an area known as the Pressure Zone. Some of the reasons high groundwater levels are undesirable is that they can cause water to flow out of the SBBA and can also prevent water from recharging (rejected recharge).

The Integrated Plan charges the Basin Technical Advisory Committee with monitoring and assessing water levels in the pressure zone and presenting their findings in the annual *Regional Water Management Plan*. The general methodology used each year to assess whether high groundwater conditions exist is as follows:

1. In October of each year, the Basin Technical Advisory Committee collects water level data for a series of wells in the Pressure Zone.
2. Water levels in the Pressure Zone are considered to be "high" if they are shallower than 50 feet below ground surface.
3. The BTAC presents their findings on high groundwater conditions in the annual *Regional Water Management Plan.*
4. In November of each year, the annual *Regional Water Management Plan* is reviewed and approved by the Boards of Directors of the San Bernardino Valley Municipal Water District and Western Municipal Water District.

Re: 2009 Exchange Agreement with San Bernardino Valley Municipal Water District

Dear Roxanne:

Enclosed is the duplicate original of the 2009 Exchange Agreement with San Bernardino Valley Municipal Water District, signed by Randy Van Gelder on behalf of that District. You should sign this yourself and then keep it in your file so that you have a fully executed duplicate original.

By copy of this letter to Randy Van Gelder, I am also sending to him the duplicate original of the same agreement, signed by you, so that he may do likewise.

DWR is preparing the necessary agreement that it will need to have you and Randy sign as well. That should be ready soon. In addition, in our office we are preparing the Notice of Exemption which should be signed and filed by both the Agency and the District. It is filed with the County of San Bernardino and also with the State Clearinghouse. I will be providing that to both of you, along with some more detailed instructions.

Thanks very much. Please let me know if you have any questions,

Sincerely yours,

Mike

Water District
380 East Vanderbilt Way
San Bernardino, CA 92408
Phone: (909) 387-9200

Project Title: The Project entails the approval of a Water Exchange Agreement, which allows for the delivery of 1,000 acre-feet ("AF") of State Water Project ("SWP") water from Crestline-Lake Arrowhead Water Agency ("Agency") to San Bernardino Valley Municipal Water District ("Valley") in 2009, in exchange for the return of 650 AF of SWP water by Valley to Agency no later than the end of 2018. The Water Exchange Agreement also amends a similar agreement between the same two parties in 2008 by extending the term for the return of 1,000 AF of SWP water from Valley to Agency, from 2011 to 2018.

Project Location: Within the service areas of Crestline-Lake Arrowhead Watery Agency, see Map attached as Exhibit "1," and San Bernardino Valley Municipal Water District, see Map attached as Exhibit "2," in the County of San Bernardino.

Description of Nature, Purpose, and Beneficiaries of Project: On October 1, 2009, the Board of Directors of Agency approved the execution of the Water Exchange Agreement ("Agreement") with Valley. This Agreement provides for the delivery of 1,000 AF of SWP water from Agency to Valley in 2009, and requires Agency submit a written request to the California Department of Water Resources on or before December 1, 2009, to deliver 1,000 AF of Agency's share of SWP Table A water to Valley. In exchange for delivery of that water, Valley will deliver 650 AF of water of equal or better quality to Agency by the end of 2018. This same Agreement was approved by Valley and then executed by Valley on October 22, 2009.

Name of Public Agency Approving Project: Crestline-Lake Arrowhead Water Agency

Exempt Status (check one):

____ Ministerial Action.
____ Declared Emergency
____ Emergency Project
_X_ Categorical Exemption (State CEQA Guidelines § 15301 [Existing Facilities]; State CEQA Guidelines §15304 [Minor Alterations to Land, Water, or Vegetation].)
_X_ Statutory Exemption (State CEQA Guidelines § 15282(u) [Temporary Transfer or Exchange of Water or Water Rights].)
_X_ Other The Project is also exempt under State CEQA Guidelines section 15061(b)(3) because it can be seen with certainty that there is no possibility the Project may have a significant impact on the environment. The Project is merely an exchange of water. No physical facilities will be constructed to produce or transport water

DATE FILED & POSTED

because all such required facilities already exist. In addition, no new water production or transportation capacity is created by the Project.

Reasons why project is exempt: The water exchange will entail no change in type of use or expansion of use, but consist merely of the continued operation of existing facilities and the use of those facilities to temporarily transport water to a different location. State CEQA Guidelines section 15301 provides that environmental review is not required for "the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that existing at the time of the lead agency's determination." In addition, the exchange of water is a minor, temporary alteration to the condition of water that does not require the removal of any trees and thus is also exempt pursuant to State CEQA Guidelines section 15304 as "minor public or private alterations in the condition of land, water, and/or vegetation which do not involve removal of healthy, mature, scenic trees." The Project's proposed exchange of water is temporary and thus is also exempt pursuant to the State CEQA Guidelines, section 15282(u) exemption for the temporary transfer of water or water rights. Because the water exchange will merely temporarily change the location in which water is used and will be delivered via existing facilities, there is no possibility the Project may have a significant impact on the environment. Accordingly, the Agreement and the water exchange that it authorizes are exempt from environmental review under CEQA. Moreover, the water transfer does not involve cumulative impacts, potentially significant impacts, unusually sensitive environments, or any other unique or unusual environmental impacts that might merit environmental review.

Crestline, California 92325

Mr. Randy Van Gelder, General Manager
San Bernardino Valley Municipal Water District
Post Office Box 5906
San Bernardino, California 94212-5906

This Letter Agreement is in response to Crestline-Lake Arrowhead Water Agency's (CLAWA) letter requesting the Department of Water Resources' (DWR) approval for the exchange of up to 1,000 acre-feet of State Water Project (SWP) Table A water between San Bernardino Valley Municipal Water District (SBVMWD) and CLAWA. SBVMWD will take delivery of, and store within its groundwater basin, up to 1,000 acre-feet of CLAWA's 2009 Table A water by December 31, 2009. In exchange CLAWA may take back from SBVMWD's future Table A water allocations 650 acre-feet of water at CLAWA's option, no later than December 31, 2018 as an unequal exchange. However, to remain a bona fide exchange, at least one half of the water delivered to SBVMWD under this Agreement must be returned to CLAWA by December 18, 2019. There will be no monetary payments between CLAWA and SBVMWD for this exchange of Table A water. The point of exchange shall be Silverwood Lake.

In the event that the SBVMWD Basin Technical Advisory Committee makes a determination in any year that high groundwater conditions exist in the San Bernardino Basin, resulting in the flow of water out of the that basin, the quantity of water not yet returned to CLAWA will be reduced by 10 percent. In the event that such conditions do occur in any year, however, SBVMWD and CLAWA would advise DWR of the reduction in the quantity of water remaining to be returned to CLAWA pursuant to this Agreement.

DWR will file a Notice of Exemption based on California Environmental Quality Act Guidelines Section 15301 with the following description of this exchange of water: the proposed project is a water management operation using only existing facilities for the exchange of water from one SWP contractor to another SWP contractor, the limited term transfer will not support new development or a change in land use, and the transfer is wholly within the SWP place of use. DWR is willing to approve the delivery of up to 1,000 acre-feet of CLAWA's 2009 SWP Table A water to SBVMWD in exchange for the return of up to 650 acre-feet of SBVMWD's Table A water subject to the following terms and conditions:

GENERAL PROVISIONS

1. DWR's approval under this Agreement is unique and shall not be considered a precedent for future agreements.

2. This Agreement shall become effective on the date of execution by all the parties and shall provide for the delivery of water to SBVMWD as of December 31, 2009. This Agreement shall terminate upon the delivery of all return water to CLAWA under this Agreement or by December 31, 2018, whichever comes first.

3. The delivery and return of water pursuant to this Agreement shall be contingent on, and subject to, any necessary approvals and shall be governed by the terms and conditions of such approval(s) and any other applicable regulations. CLAWA and SBVMWD shall be responsible for complying with all applicable laws and regulations and for securing any required consent, permit, or order. CLAWA and SBVMWD shall furnish to DWR copies of all approvals and agreements required for the delivery of water under this Agreement.

4. DWR will maintain records documenting the conveyance of up to 1,000 acre-feet of CLAWA's 2009 SWP Table A water to SBVMWD and the return delivery of water to CLAWA. CLAWA and SBVMWD shall certify to the State Water Project Analysis Office (Attention: Chief, Water Contracts Branch, Fax (916) 653-9628) the amount of CLAWA's approved 2009 Table A water delivered to SBVMWD and the return delivery of water from SBVMWD to CLAWA under this Agreement by January 31st of the year following the actual delivery.

WATER DELIVERY FROM CLAWA TO SBVMWD

5. The water delivered to SBVMWD shall be from CLAWA's allocation of 2009 approved Table A water.

6. The delivery of a portion of CLAWA's 2009 Table A water to SBVMWD shall be in accordance with a schedule reviewed and approved by DWR. DWR's approval is dependent upon the times and amounts of the delivery and the overall delivery capability of the SWP. DWR shall not be obligated to deliver the water at times when such delivery would adversely impact SWP operations, facilities, or other SWP contractors.

7. Pursuant to Paragraph 6, CLAWA shall obtain SBVMWD's approval for the water delivery schedule before submitting a schedule to DWR. All water delivery schedules and revisions shall be in accordance with Article 12 of CLAWA's and SBVMWD's respective long-term Water Supply contracts with DWR.

8. Pursuant to Paragraphs 5, 6, and 7, DWR will deliver up to 1,000 acre-feet of CLAWA's 2009 Table A water to SBVMWD's service area, Reach 26A of the California Aqueduct by December 31, 2009.

9. CLAWA and SBVMWD shall submit revised monthly water delivery schedules for approval to the State Water Project Analysis Office, Water Deliveries Section, indicating timing and point of delivery requested pursuant to this Agreement with reference to SWPAO #09079. Revised schedules shall be sent by electronic mail to SWPDeliveries@water.ca.gov or by FAX to (916) 653-9628, Attention: Chief, Water Deliveries Section.

10. CLAWA and SBVMWD shall submit weekly water schedules for the delivery of water pursuant to this Agreement to the Southern Field Division, Water Operations Section, indicating timing and point of delivery requested with reference to SWPAO #09079. Schedules shall be sent by electronic mail to SFDwaterschedule@water.ca.gov or by FAX to (661) 294-3651, Attention: Chief, Water Operations Section.

RETURN WATER DELIVERED FROM SBVMWD TO CLAWA

11. SBVMWD shall return at least half of the quantity of water advanced by CLAWA by December 31, 2018. The return water delivered to CLAWA shall be Table A water allocated to SBVMWD in the year water is returned. In the event that at least half of the water advanced is not returned to CLAWA by August 31, 2018, DWR, in coordination with CLAWA and SBVMWD, shall expedite the return of water to CLAWA by so scheduling SBVMWD's Table A by December 31, 2018.

12. The return of water under this Agreement by SBVMWD to CLAWA shall be in accordance with a schedule reviewed and approved by DWR. DWR's approval is dependent upon the times and amounts of the delivery and the overall delivery capability of the SWP. DWR shall not be obligated to deliver the water at times when such delivery would adversely impact SWP operations, facilities, or other SWP contractors.

13. Pursuant to Paragraph 11, SBVMWD shall obtain CLAWA's approval for the proposed delivery schedule, before submitting a schedule to DWR. All water delivery schedules and revisions shall be in accordance with Article 12 of CLAWA's and SBVMWD's long-term Water Supply contracts with DWR.

14. Pursuant to Paragraphs 11 and 12, DWR will deliver a portion of SBVMWD's Table A water scheduled for delivery to SBVMWD's service area to CLAWA's service area in Reach 24 of the California Aqueduct.

NO IMPACT

15. This Agreement shall not be administered or interpreted in any way that would cause adverse impacts to SWP approved Table A water or to any other SWP approved water allocations, water deliveries, or SWP/CVP operations and facilities. CLAWA and SBVMWD shall be responsible for any adverse impacts that may result from the exchange of water as determined by DWR.

SWP ALLOCATION

16. Water returned to CLAWA pursuant to this Agreement shall not be considered by DWR in the determination of approved annual Table A deliveries to or allocation of other SWP water to CLAWA under Article 18 of CLAWA's long-term Water Supply contract with DWR.

CHARGES

17. CLAWA and SBVMWD shall pay the following charges, including all future adjustments, which shall be calculated in the same manner as charges are calculated for SWP Table A deliveries and shall be in accordance with the provisions of CLAWA's and SBVMWD's long-term Water Supply contracts with DWR. Charges shall be determined for the year the water is delivered, and the year the water is returned.

    a. When a portion of CLAWA's approved 2009 Table A water is made available to SBVMWD at Reach 24, CLAWA shall pay to DWR the charges associated with the delivery of the water from the Delta to the point of delivery at Silverwood Lake, Reach 24. The charges associated with such delivery will be the 2009 Variable Operation, Maintenance, Power, and Replacement components of the Transportation Charge and the 2009 Off-Aqueduct Power Facilities Cost for each acre-foot of water delivered.

    b. DWR will deliver water made available by CLAWA at Silverwood Lake, Reach 24 to SBVMWD turnouts at Reach 26A. The charges associated with such delivery will be the 2009 Variable Operation, Maintenance, Power, and Replacement components of the Transportation Charge and the 2009 Off-Aqueduct Power Facilities Cost for each acre-foot of water delivered. SBVMWD will be charged at the Variable rate calculated from Reach 24 to Reach 26A.

c. In any year that a portion of SBVMWD's future Table A water is returned to CLAWA pursuant to this Agreement, SBVMWD shall pay to DWR the charges associated with the delivery of the return water from the Delta to CLAWA's turnouts in Reach 24 of the California Aqueduct. The charges associated with the return water will be the Variable Operation, Maintenance, Power, and Replacement components of the Transportation charges and the Off-Aqueduct Power Facilities Cost for each acre-foot of water delivered in effect for the year in which the water is returned to CLAWA.

18. In addition to the charges identified above, CLAWA and SBVMWD agree to pay to DWR any additional identified demonstrable increase in costs that would otherwise be borne by the SWP contractors not signatory to this Agreement or by DWR, as a result of activities pursuant to this Agreement.

19. Payment terms shall be in accordance with CLAWA's and SBVMWD's long-term Water Supply contracts with DWR.

LIABILITY

20. Responsibility for water delivered pursuant to this Agreement shall be governed by Article 13 of CLAWA's and SBVMWD's long-term Water Supply contracts, with responsibilities under the terms of that article shifting from DWR to CLAWA and SBVMWD when the water passes through their respective turnouts.

21. In the event of a claim of liability against DWR or its Directors, officers, or employees, jointly or severally, that arises as a result of this Letter Agreement, CLAWA and SBVMWD shall defend, indemnify, and hold DWR and any of its Directors, officers, and employees harmless from any such claim, except to the extent that such claim arises from the sole negligence or willful misconduct of DWR.

EXECUTION

22. This Letter Agreement may be executed in counterpart. The parties agree to accept facsimile or electronically scanned signatures as original signatures. The Agreement shall take effect as soon as all parties have signed.

23. Immediately after execution, SBVMWD and CLAWA shall transmit a copy of the executed Letter Agreement by facsimile or electronically to Robert Cooke, Chief, State Water Project Analysis Office at (916) 653-9628 or cooke@water.ca.gov and to each other at.

CLAWA: (909) 338-3686 or Michael.riddell@bbklaw.com
SBVMWD: (909) 387-9247 or dough@sbvmwd.com

If CLAWA or SBVMWD needs a Board of Directors' approval of this Letter Agreement, that party shall send a facsimile or electronically scanned copy of the board approval to the other two parties. If you have any questions or need additional information, please contact me at (916) 653-4313 and refer to SWPAO #09079.

Sincerely,

Robert B Cooke

RE: 2009 Water Exchange Agreement

Dear Randy:

The purpose of this letter is to address an issue that has been raised by the Department of Water Resources regarding the Water Exchange Agreement which we both executed on October 22, 2009. As you know, that agreement provides that of the 2,000 acre-feet of water which has been and will be delivered to the District from the Agency's 2008 and 2009 allocations, the Agency will have until the end of 2018 to take back 1,650 acre-feet of exchange water from the District's future allocations. The agreement further provides that in any year in which the District experiences high groundwater conditions, resulting in the loss of water from the Basin, the quantity of water not yet returned to the Agency by way of exchange will be reduced by 10%. That 10% reduction will apply in each year that such high groundwater conditions may occur.

Craig Trombly at DWR has pointed out that exchange agreements such as this must provide for the return of no less than 50% of the water delivered to the exchange partner. Although it is extremely unlikely that we would experience multiple years of heavy precipitation between now and the end of 2018, DWR is nonetheless concerned that the 10% reduction provision theoretically could result in the return of less than half of the 2,000 acre-feet of water delivered to the District pursuant to the 2008 and 2009 Water Exchange Agreements.

In order to eliminate that possibility, we have agreed that if the 10% reduction provision is applied in multiple years, the last year of which would result in a cumulative loss of 650 acre-feet of water or more, in that year the Agency will take back all of the

remainder of the exchange water not yet returned to the Agency so that no more than a cumulative total of 649 acre-feet of water is lost due to the application of that 10% reduction provision. This agreement between us is consistent with the Water Exchange Agreements already executed and thus does not require an amendment of either the 2008 or the 2009 Water Exchange Agreement.

If this letter correctly states the agreement that we have reached regarding the timing of the return of exchange water to the Agency, please sign and return one of the two duplicate originals of this letter, both of which I have already signed. Upon receipt of the duplicate original bearing your signature, I will send a copy to Craig Trombly as written assurance that the exchange arrangement between the Agency and the District will in fact comply with the approved policy which DWR is applying uniformly to all such exchange arrangements.

Yours very truly.

Roxanne M. Holmes,
General Manager

This letter correctly and accurately reflects the agreement between the Agency and the District.

Ms. Roxanne Holmes, General Manager
Crestline-Lake Arrowhead Water Agency
Post Office Box 3880
Crestline, California 92325

Mr. Douglas Headrick, General Manager
San Bernardino Valley Municipal Water District
Post Office Box 5906
San Bernardino, California 94212-5906

This is in response to your letter dated October 6, 2009 in which you requested that we amend the Letter Agreement SWPAO #08063, dated December 17, 2008, among the Department of Water Resources (DWR), Crestline-Lake Arrowhead Water Agency (CLAWA), and San Bernardino Valley Municipal Water District (SBVMWD) to exchange up to 1,000 acre-feet of CLAWA's 2008 State Water Project (SWP) Table A water with SBVMWD.

As described in the original Agreement's introductory paragraph, the quantity of Table A water to be exchanged is up to 1,000 acre-feet and to be returned as a 1 acre-foot for 1 acre-foot exchange. CLAWA and SBVMWD have agreed the returned Table A exchange water will now be subject to high groundwater conditions which could reduce the amount of water available for return to CLAWA. However, to remain a bona fide exchange, at least half the water delivered to SBVMWD must ultimately be returned to CLAWA by December 3, 2018. Paragraph 11 of the original Agreement #08063 provides for the return of all exchange water to CLAWA by December 31, 2011 and water to be scheduled by August 31, 2011 if all water has not been returned prior to that date. CLAWA and SBVMWD have agreed to extend the water return time to December 31, 2018 and schedule it by August 31, 2018. The details of this request are noted in the "Water Exchange Agreement and Amendment of Demonstration Project" signed by CLAWA and SBVMWD on October 22, 2009.

Accordingly, the original agreement is amended as follows:

Provision 2 shall now read:

2. This Agreement shall become effective on the date of execution by all the parties and shall provide for the delivery of water to SBVMWD as of December 31, 2008. This Agreement shall terminate upon the delivery of all return water to CLAWA under this Agreement or by December 31, 2018, whichever comes first.

Provision 11 shall now read:

11. SBVMWD shall return at least half of the water advanced to CLAWA by December 31, 2018. The return water delivered to CLAWA shall be Table A water allocated to SBVMWD in the year water is returned. In the event that at least half of the water advance is not returned to CLAWA by August 31, 2018, DWR, in coordination with CLAWA and SBVMWD, shall expedite the return of water to CLAWA by so scheduling SBVMWD's Table A by December 31, 2018.

A new term is added to the original Agreement to read:

In the event that SBVMWD's Basin Technical Advisory Committee makes a determination in any year that high groundwater conditions exist in the San Bernardino Basin, resulting in the flow of water out of that basin, the quantity of

water not yet returned to CLAWA will be reduced by 10 percent. In the event that such conditions do occur in any year, SBVMWD and CLAWA will advise DWR of the reduction in the quantity of water remaining to be returned to CLAWA pursuant to this Agreement.

If you agree to the terms and conditions of this Amendment, please sign and date all four originals. After signing, forward all four originals to SBVMWD for their signature and request that they return two executed originals to Robert Cooke, Chief, State Water Project Analysis Office, Department of Water Resources, Post Office Box 942836, Sacramento, California 94236-0001. SBVMWD will retain one executed original and return one executed original to CLAWA for their respective records. Please send a copy of the Board of Directors approval of this amendment, if such approval is required. This Amendment will not take effect until signed by both CLAWA and SBVMWD.

If you have any questions or need additional information, you may contact Craig Trombly, of my staff at (916) 653-6250, and refer to SWPAO #08063-A.

Sincerely,

Robert B Cooke

San Bernardino Valley Municipal Water District
P.O. Box 5906
San Bernardino, CA 92412-5906

Dear Messrs. Araiza, Van Gelder:

This will confirm the understanding reached today, September 16, 2009, regarding the contributions to replenishment to be made by West Valley Water District in conjunction with deliveries through the Baseline Feeder of water from the Bunker Hill Basin by the City of San Bernardino Municipal Water Department (San Bernardino).

As all parties are aware, for several years, San Bernardino has been producing treated water for delivery to the Baseline Feeder. San Bernardino Valley Municipal Water District (Valley District) pays San Bernardino for all direct costs related to the delivery and then bills West Valley Water District and the city of Rialto, based on allocated deliveries. Deliveries have been made pursuant to periodic negotiations and a purchase order between San Bernardino and Valley District. Last year, it is San Bernardino's understanding, West Valley Water District (WVWD) and Rialto asked Valley District for assurances that San Bernardino's deliveries would continue, at least for a short term. San Bernardino and Valley District began negotiating the terms of a three-year contract for delivery of water to the Baseline Feeder.

It was San Bernardino's position that the costs of the delivered water should include some amount for replenishment of the Bunker Hill Basin. Meanwhile, invoicing for fiscal year 2009/2010 has been delayed, pending resolution of the replenishment issue.

300 North "D" Street, San Bernardino, California 92418 P.O. Box 710, 92402 Phone: (909) 384-5141

Corporate Yards: (909) 384-5260 Water Reclamation Plant: (909) 384-5258

SBVMWD LEGAL
DOCUMENT 2255

The following represents our agreement:

1. For fiscal year 2009/2010, there will be **no** amount added for replenishment. This is because WVWD has already committed to pay $72,000 for approximately 1200 acre-feet of replenishment for water year 2009/2010; and

2. For the three-year contract period, in each of the contract years, WVWD agrees to pay Valley District for State Project Water to be delivered to Sweetwater, Devil Canyon and Waterman basins (at San Bernardino's choice) in an amount equal to the cost of one-quarter (1/4) of the amount of water delivered to the Baseline Feeder for WVWD's benefit.

An example: WVWD receives 3000 acre-feet delivered to it in Year 1 of the contract. WVWD pays Valley District (or allows Valley District to draw down from WVWD's account) the amount of money necessary to pay for 750 acre-feet of water. The possibility exists that Valley District will discount that water, thereby providing more water for the money

Thank you for your courtesy and cooperation in resolving this issue.

Very truly yours,

City of San Bernardino
Municipal Water Department

September 30, 2013

Mr. Douglas Headrick, P.E.
General Manager
San Bernardino Valley Municipal Water District
380 East Vanderbilt Way
San Bernardino, CA 92408

Dear Mr. Headrick:

The purpose of this letter is to extend the understanding reached on September 16, 2009, regarding the contributions to replenishment to be made by West Valley Water District (WVWD) and the City of Rialto in conjunction with deliveries through the Baseline Feeder of water from the Bunker Hill Basin by the City of San Bernardino Municipal Water Department (San Bernardino) via the Encanto Booster Station.

As all parties are aware, for several years, San Bernardino has been producing treated water for delivery to the Baseline Feeder. San Bernardino Valley Municipal Water District (Valley District) pays San Bernardino for all direct costs related to the delivery and then bills WVWD and the city of Rialto, based on allocated deliveries. Deliveries have been made pursuant to periodic negotiations and a purchase order between San Bernardino and Valley District. In 2012, Valley District and WVWD placed two (2) new wells online that make deliveries to the Baseline Feeder. This has reduced San Bernardino's deliveries to the Baseline Feeder significantly, especially during winter and spring months. However, San Bernardino continues to make periodic deliveries during the summer months through the Encanto Booster Station.

It continues to be San Bernardino's position that the costs of the delivered water should include a 25 percent replenishment obligation of the Bunker Hill Basin.

The following represents our agreement:

1. The term of this agreement will be for five (5) years.

2. For the five-year contract period, in each of the contract years, Valley District agrees to invoice the West Valley Water District and the City of Rialto for State Project Water to be delivered to the Waterman basin in an amount equal to the cost of one-quarter (1/4) of the amount of water delivered to the Baseline Feeder for WVWD's/Rialto's benefit through the Encanto Booster Station.

Thank you for your courtesy and cooperation.

Very truly yours,

City of San Bernardino
Municipal Water Department

STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

PERMIT FOR DIVERSION AND USE OF WATER

PERMIT 21264

Application **31165** of **San Bernardino Valley Municipal Water District and Western Municipal Water District of Riverside County**
P.O. Box 5906
San Bernardino, CA 92412-5906

filed on **March 21, 2001**, has been approved by the State Water Resources Control Board (State Water Board or Board) SUBJECT TO PRIOR RIGHTS and to the limitations and conditions of this permit.

Permittee is hereby authorized to divert and use water as follows:

1. Source of water

Source:	Tributary to:
Santa Ana River (1, 3, 6, 9, 10)	**Pacific Ocean**
Bear Creek (2)	**Santa Ana River thence Pacific Ocean**
Breakneck Creek (4)	**Santa Ana River thence Pacific Ocean**
Keller Creek (5)	**Santa Ana River thence Pacific Ocean**
Alder Creek (7)	**Santa Ana River thence Pacific Ocean**

within the County of **San Bernardino.**

3. Purpose of use	4. Place of use	Section	Township	Range	Base and Meridian	Acres
Municipal, Industrial, Irrigation, Heat Control, Frost Protection and Recreational uses	**San Bernardino Valley Municipal Water District and Western Municipal Water District of Riverside County's Service Areas***					

*The place of use is shown on maps dated June 7, 2010 and filed with the State Water Board.

5a. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed **400** cubic feet per second (cfs) by direct diversion and **100,000** acre-feet per annum (afa) by underground and/or surface storage to be diverted from **January 1** to **December 31** of each year. The amount of surface storage at Seven Oaks Dam shall not exceed 50,000 afa. The maximum rate of diversion to underground storage shall not exceed 400 cfs. The total amount of water to be taken from the sources shall not exceed 100,000 acre-feet (af) per water-year of October 1 to September 30. The total rate for water to be taken from the sources for either direct use and/or underground storage shall not exceed 800 cfs.

(0000005E)

5b. The total quantity of water to be taken from the sources under both Application 31165 and Application 31370 shall not exceed 198,317 af per water-year of October 1 to September 30. The total amount of water diverted to storage at Seven Oaks Dam under both Applications 31165 and 31370 shall not exceed 50,000 af per water-year of October 1 to September 30. The total combined rate for water to be taken from the sources under Applications 31165 and 31370 for either direct use, underground storage, and/or offstream surface storage shall not exceed an instantaneous rate of 1,250 cfs.

(0000005L)

6. The amount authorized for appropriation may be reduced in the license if investigation warrants.

(0000006)

7. Construction work and the application of water to beneficial use shall be prosecuted with reasonable diligence. Actual construction shall begin no later than June 30, 2010 and be completed by October 1, 2020. Water shall be put to full beneficial use by December 31, 2059.

(0000009)

8. Progress reports shall be submitted promptly by Permittee when requested by the State Water Board until a license is issued.

(0000010)

9. Permittee shall allow representatives of the State Water Board and other parties, as may be authorized from time to time by said State Water Board, reasonable access to project works to determine compliance with the terms of this permit.

(0000011)

10. Pursuant to California Water Code sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of State Water Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the State Water Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of Permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against

reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the State Water Board also may be exercised by imposing further limitations on the diversion and use of water by the Permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

(0000012)

11. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Board if, after notice to the Permittee and an opportunity for hearing, the State Water Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the State Water Board finds that: (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(0000013)

12. This permit does not authorize any act that results in the taking of a threatened or endangered species or any act that is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish & G. Code, §§ 2050-2097) or the federal Endangered Species Act (16 U.S.C.A. §§ 1531-1544). If a "take" will result from any act authorized under this water right, the Permittee shall obtain authorization for an incidental take prior to construction or operation of the project. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

(0000014)

13. Permittee shall maintain records of the amount of water diverted and used to enable State Water Board to determine the amount of water that has been applied to beneficial use pursuant to Water Code section 1605.

(0000015)

14. This permit shall not be construed as conferring upon the Permittee right of access to the point of diversion.

(0000022)

15. Permittee shall consult with the Division of Water Rights (Division) and, within one year from the date of this permit, shall submit to the State Water Board its Urban Water Management Plan as prepared and adopted in conformance with section 10610, et seq. of the California Water Code, supplemented by any additional information that may be required by the Board.

All cost effective measures identified in the Urban Water Management Plan and any supplements thereto shall be implemented in accordance with the schedule for implementation found therein.

(0000029A)

16. If it is determined after permit issuance that the as-built conditions of the project are not correctly represented by the map(s) prepared to accompany the application, Permittee shall, at his expense have the subject map(s) updated or replaced with equivalent as-built map(s).

Said revision(s) or new map(s) shall be prepared by a civil engineer or land surveyor registered or licensed in the State of California and shall meet the requirements prescribed in section 715 and sections 717 through 723 of the California Code of Regulations, Title 23. Said revision(s) or map(s) shall be furnished upon request of the Chief of the Division of Water Rights[1].

(0000030)

17. No work shall commence and no water shall be diverted, stored or used under this permit until a copy of a stream or lake alteration agreement between the State Department of Fish and Game and the Permittee (DFG) is filed with the Division. Compliance with the terms and conditions of the agreement is the responsibility of the Permittee. If a stream or lake alteration agreement is not necessary for this permitted project, the Permittee shall provide the Division a copy of a waiver signed by DFG.

(0000063)

18. In order to prevent degradation of the quality of water during and after construction of the project, prior to commencement of construction undertaken after issuance of the permit, Permittee shall file a report pursuant to Water Code Section 13260 and shall comply with all waste discharge requirements imposed by the California Regional Water Quality Control Board, Santa Ana Region, or by the State Water Board.

(0000100)

19. Prior to diversion of water under this permit, Permittee shall: (1) install devices to measure the instantaneous rate of diversion and the quantities of water placed into underground storage and (2) install devices to measure or provide documentation of the method to be used to determine the quantity of water recovered from underground storage and placed to beneficial use. All measuring devices and the method of determining the quantity of water placed into and recovered from underground storage shall be approved by the State Water Board prior to diversion of water under this permit. All measuring devices shall be properly maintained. The diversion data shall be posted on Permittee's websites on a weekly basis.

(0080117)

20. The Permittee shall obtain all necessary state and local agency permits required by other agencies prior to construction and diversion of water. Copies of such permits and approvals shall be forwarded to the Deputy Director for Water Rights (Deputy Director).

(0000203)

21. No debris, soil, silt, cement that has not set, oil, or other such foreign substance will be allowed to enter into or be placed where it may be washed by rainfall runoff into the waters of the State. When operations are completed, any excess materials or debris shall be removed from the work area.

(0000208)

22. The State Water Board adopts and incorporates by reference into this permit the mitigation measures and monitoring and reporting requirements applicable to the impacts of the Project on biological and cultural resources, geology, hazardous material and groundwater contamination, groundwater and surface water hydrology, water quality and public services, utilities and transportation identified in the Final EIR, specifically mitigation measures MM BIO-1, MM BIO-2 and MM BIO-6 through MM BIO-10, MM CR 1 through MM CR 4, MM HAZ 1 through MM HAZ 5, MM GEO-1 through MM GEO-8, MM GW-1, MM SW-2 and MM PS-12. (See attached Table 1.) Permittee must implement the measures to mitigate significant impacts and conduct the required

[1] The Chief of the Division of Water Rights is hereafter referred by the State Water Board as the Deputy Director for Water Rights.

reporting and monitoring of those measures as provided in the Mitigation Monitoring and Reporting Plan adopted on March 21, 2007 by the respective Boards of Directors of San Bernardino Valley Municipal Water District and Western Municipal Water District of Riverside County. In addition, Permittee shall submit an annual report to the Deputy Director that includes the results of the Mitigation Monitoring and Reporting Program. The State Water Board reserves jurisdiction to require any reasonable amendments to these measures and requirements to ensure that they will accomplish the stated goal.

(0400500)

23. The State Water Board adopts and incorporates by reference into this permit the mitigation measures and monitoring and reporting requirements applicable to the cumulative impacts of the Project on biological and cultural resources, geology, hazardous material and groundwater contamination, groundwater and surface water hydrology and water quality, and public services, utilities and transportation identified in the EIR, specifically mitigation measures MM Cumulative BIO-1, MM Cumulative CR-1, MM Cumulative CR-2, MM Cumulative HAZ-1, MM Cumulative SW-1 and MM Cumulative GW-1. (See attached Table 2.) Permittee must implement the measures to mitigate cumulative impacts and conduct the required reporting and monitoring of those measures as provided in the Mitigation Monitoring and Reporting Plan adopted by the respective Boards of Directors of San Bernardino Valley Municipal Water District and Western Municipal Water District of Riverside County on March 21, 2007. In addition, Permttee shall submit to the Deputy Director an annual report that includes the results of the Mitigation Monitoring and Reporting Program. The State Water Board reserves jurisdiction to require any reasonable amendments to these measures and requirements to ensure that they will accomplish the stated goal.

(0400500)

24. This permit shall not be construed as conferring upon Permittee right of access to facilities of the U.S. Army Corps of Engineers and the Santa Ana River Mainstem Local Sponsors.

(0000022)

25. This permit is specifically subject to the prior rights of Bear Valley Mutual Water Company, City of Redlands, East Valley Water District, Lugonia Water Company, North Fork Water Company and Redlands Water Company to divert the first 88 cfs of the natural flow of the Santa Ana River pursuant to pre-1914 appropriative rights, to the extent that such rights may exist.

(0400500)

26. This permit is specifically subject to the prior rights of San Bernardino Valley Water Conservation District under Licenses 2831 and 2832 issued pursuant to Applications 2217 and 4807, and any valid pre-1914 appropriative right confirmed by the Court.

(0400500)

27. Nothing in this permit shall be construed as authorizing any diversions contrary to the provisions of the December 19, 2002 Biological Opinion issued by United States Fish and Wildlife Service for operation of Seven Oaks Dam, as may be revised in the future, including flow releases for downstream over-bank inundation to preserve State and federally listed threatened and endangered species and their habitat.

(0600500)

28. Permittee shall only divert water at points of diversion 5 though 10 in compliance with the terms and conditions of Federal Energy Regulatory Commission (FERC) license Project No. 1933 and 401 water quality certification as well as any future FERC licenses and 401 water quality certifications.

(0560900)

29. Permittee shall not, without the prior written consent of Southern California Edison (SCE), construct, operate or maintain diversion works at points of diversion located upstream of the flood inundation pool of Seven Oaks Dam in a manner that interferes with the operation and maintenance of the hydroelectric works licensed to SCE by the Federal Energy Regulatory Commission (FERC) license for Project No. 1933. Permittee's diversion of water at such points of diversion shall not interfere with SCE's diversion of water for hydroelectric purposes, again as described in the FERC license for Project No. 1933. Nothing in this permit shall be construed to limit Permittee's diversion of water from such points of diversion at times when the quantity of water available for diversion at such points of diversion exceeds the demand of SCE's facilities to divert water from the Santa Ana River system.

(0430999)

30. This permit shall not be construed as conferring upon Permittee the right of access to Seven Oaks Dam, the points of diversion, the lands necessary for related facilities, or the lands necessary for inundation for water storage. Access to, construction upon, or inundation of National Forest Service lands shall not commence prior to authorization by the Forest Service, in accordance with applicable laws and regulations. Such authorization will require compliance with all applicable federal laws and regulations. Permittee specifically recognizes that completion of the applicable legal process does not guarantee such authorization will be granted, the issuance of this water right permit notwithstanding.

(0000022)

31. This permit shall not be construed as conferring upon Permittee the right of access to Seven Oaks Dam, the points of diversion, and lands necessary for related facilities, or the lands necessary for inundation for water storage. Permittee shall not commence construction and operation of water diversion facilities at Seven Oaks Dam without a written access agreement from the Santa Ana River Mainstem Project Local Sponsors.

(0000022)

32. Flow in the Santa Ana River is highly variable from year to year. Because the face value of this permit is based on a rare storm event, this permit shall not be construed as giving any assurance that such an event will occur. The actual amount of water available for appropriation may be much less.

(0000999)

33. Permittee is required to follow guidance from existing state and federally mandated projects regarding groundwater contaminant plumes within and outside the San Bernardino Basin Area. This includes coordination with appropriate oversight agencies and compliance with policies regarding the remediation of the groundwater contaminant plumes.

(0400800)

34. Permittee shall not use the Cactus Spreading and Flood Control Basins under this permit.

(0400800)

35a. In order to prevent degradation of the quality of water released to the Santa Ana River from storage at Seven Oaks Dam, the State Water Board may modify this permit to set conditions that apply water quality objectives to any release from storage.

35b. No water shall be released from storage of Seven Oaks Dam for purposes of rediversion by Permittee until Permittee has consulted with the Chief Deputy Director for Water Quality or his or her delegee and the Chief Deputy Director has determined that the releases will be consistent with applicable water quality objectives. The releases shall be consistent with any conditions the Chief Deputy Director determines are necessary to ensure compliance with applicable water quality objectives.

(0400800)

36. In order to prevent degradation of water quality during and after construction of the project, prior to commencement of any construction undertaken after issuance of the permit, Permittee shall file a report pursuant to Water Code Section 13260 and shall comply will all waste discharge requirements imposed by the California Regional Water Quality Control Board, Santa Ana Region, or by the State Water Board.

(0290800)

This permit is issued and Permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every Permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any Permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any Permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

STATE WATER RESOURCES CONTROL BOARD

for James W. Kassel
Victoria A. Whitney
Deputy Director for Water Rights

Dated: JUN 29 2010

Attachments

Table 1: Mitigation Measures

MM BIO-1	Muni/Western will minimize disturbance to native habitats and listed and non-listed sensitive species by the implementation of the following measures at construction sites prior to and during construction. Where ground disturbance is required, the Muni/Western program will include the following: (1) Clearly marking and delineating the limits of the staging areas as well as the construction corridors/zones in the field and graphically on all final construction drawings and blueprints. Personnel and equipment will be prohibited in native habitats outside the construction limits. (2) Biologically sensitive areas, including individuals or colonies of listed and non-listed sensitive plant species and wildlife species, will be identified and delineated in the field prior to ground disturbance (see MM BIO-3) and will be clearly marked graphically on all final construction plans or blueprints so they will be avoided to maximum extent feasible. (3) Use methods to minimize the construction corridor width to the maximum extent feasible in sensitive habitats, such as transporting and stockpiling excavated materials in disturbed area of the right-of-way (ROW), or into other parts of the ROW by truck or conveyor belt. **Employee Training** Implementation of an employee training program. Muni/Western's program will include an initial meeting with all personnel presented by a qualified biologist familiar will all affected species, habitats, and permit conditions. The employee training program will include a discussion of each species, all applicable laws, the permit conditions, and the potential penalties for violating permit conditions. The employee training program will be conducted before construction activities begin. Regular updates will occur during weekly tailgate meetings with construction personnel, and newly hired personnel will be informed of the permit conditions as well as the habitat and species issues before working on the Project site. **On-Site Monitoring** Biological monitoring of habitat clearing activities and removal of sedentary animals, both common and sensitive, within the ROW prior to clearing. This will require a qualified biologist to be at the location of habitat removal before clearing to attempt to remove animals where visible and, during removal activities, to ensure that no inadvertent impacts to adjacent habitats occur. Weekly inspections of the ROW perimeter near work areas will also reduce the potential for inadvertent impacts to adjacent habitat. **Best Management Practices (BMPs)** Dust control. All areas of mechanical ground disturbance, including dirt access roadways, will be consistently moistened to reduce the creation of dust clouds. The frequency of watering will be consistent with the desired goal and in accordance with regional standards and BMPs. Erosion control. Devices such as straw bales and "v" ditches will be installed in areas where construction activities may directly or indirectly cause erosion or sediment deposition on adjacent habitats. Routine removal of trash from construction areas. All refuse, including non-construction materials such as paper and miscellaneous food packaging materials, will be removed from the ROW to prevent littering of the adjacent habitat areas outside of the ROW. At a minimum, site clean-ups should occur weekly. **Listed Species Protection Measures** In areas where the San Bernardino Kangaroo Rat (SBKR) is present, either within or adjacent to the ROW, Muni/Western will install exclusionary fencing where appropriate to reduce the potential for SBKR entering the ROW.

MM BIO-1 (continued)	Specification for the fencing will be particular to the goal of the SBKR exclusion and will be approved by the United States Fish and Wildlife Service (USFWS). Muni/Western may not install fencing in certain areas such as boulder-strewn washes where fence construction may cause substantial habitat disturbance. Following the installation of fencing, the animals within the ROW will be trapped and released within adjacent suitable habitat outside the ROW. These methods will be approved by the USFWS. In areas where the SBKR is present, either within or adjacent to the ROW, Muni/Western will limit construction activities to daylight hours (approximately 7:00 A.M. to 6:00 P.M.). During night hours, no activities that would unnaturally increase the light or noise within adjacent occupied habitat will occur. In areas where the SBKR, coastal California gnatcatcher CAGN, least Bell's vireo, or southwestern willow flycatcher are present either within or adjacent to the ROW, Muni/Western will avoid or reduce construction activities in the vicinity of occupied habitat during the breeding season. Avoidance will take place from March 1 through June 30. In certain areas, avoidance of southwestern willow flycatcher will continue through July 31. Where complete avoidance is not possible, construction activities will be conducted in a manner that attempts to minimize disturbance during early morning hours and avoids the most sensitive breeding months of April and May. In areas where preconstruction sensitive species surveys and other seasonally limited activities such as seed collection and plant propagation are needed, Muni/Western will prepare a calendar of when such activities need to be accomplished and incorporate this into design and construction schedules to ensure that the surveys can be conducted in the appropriate season without causing delays. (Draft EIR page 3.3-37 through 3.3-39; Final EIR Section 2.4.)
MM BIO-2	Muni/Western will develop a Habitat Revegetation, Restoration, and Monitoring Program (Program), obtaining input from CDFG, and USFWS, for implementation in all habitat areas directly affected by construction activities. The Program will include the following measures: **Invasive Species Control** Where appropriate and feasible, the area to be treated will be treated to kill invasive exotics species and limit their seed production before initiating any earthmoving activity with the objectives of: (1) preventing invasive species from spreading from the disturbance area, and (2) removing weed sources from the salvaged topsoil. Herbicides will be used only by a licensed herbicide applicator and may require notification to property owners or resource agencies. The treatment will be completed before earthmoving in order for this mitigation to have its intended effect (e.g., the treatment would need to occur before target species set seed). **Topsoil Salvage and Replacement** In areas where vegetation and soil are to be removed, the topsoil will be salvaged and replaced, where practicable. This may be accomplished using two lifts, the first to salvage the seed bank, and the second to salvage soil along with soil biota in the root zone. Soil will be stockpiled in two areas near the Project site, with the seed bank labeled to identify it. Topsoil will be replaced in the proper layers after final reconfiguration of disturbed areas. Where presence of extensive deposits of boulders and cobbles limit the opportunity to salvage topsoil and make the above-mentioned procedure infeasible, Muni/Western will salvage available surface material and stockpile it for replacement on the surface of the restored area. Stockpiles will be covered if the soil is to be left for an extended period to prevent losses due to erosion and invasion of weeds. **Habitat Rehabilitation and Revegetation** Muni/Western will develop and implement plans and specifications for replanting areas disturbed by the Project. Replanting will be with native species propagated from locally collected seed or cuttings, and, if applicable, will include seed or sensitive species that would be impacted during construction activities.

MM BIO-2 (continued)	Monitoring procedures and performance criteria will be developed by Muni/Western to address revegetation and erosion control. The performance criteria will consider the level of disturbance and the condition of adjacent habitats. Monitoring will continue for three-to-five years, or until performance criteria have been met. Appropriate remedial measures, such as replanting, erosion control or weed control, will be identified and implemented if it is determined that performance criteria are not being met. (Draft EIR page 3.3-39 through 3.3-40; Final EIR Section 2.4.)
MM BIO-6	Prior to ground disturbance or other activities, qualified botanists will survey all proposed construction, staging, stockpile, and access areas for presence of non-listed sensitive plant species. Preconstruction surveys will occur during appropriate season and in accordance with established protocols (if required). These surveys will be conducted in all construction areas that occur in native habitats. In the event that non-listed sensitive plant species are observed in the impact area during pre-Project surveys, Muni/Western will implement the following measures: (a) Colonies will be clearly marked, mapped, and recorded along with the numbers of individuals in each colony and their respective condition. To the extent feasible, construction areas and access roads will be configured to avoid or minimize loss of individual plants and damage to occupied habitats. (b) Where impacts to non-listed sensitive plant species are unavoidable, Muni/Western will develop and implement a salvage, propagation, replanting, and monitoring program that will use both seed and salvaged plants constituting an ample and representative sample of each colony. (Draft EIR page 3.3-42.)
MM BIO-7	To reduce impacts on biological resources, Muni/Western will realign pipelines to avoid sensitive resources and habitat to the maximum extent feasible. Specifically, Muni/Western will realign Phase II of the Plunge Pool Pipeline northward and place it adjacent to Greenspot Road. (See Draft EIR Figure 3.3-7). This will put the project-related disturbance at the edge of the habitat and avoid bisecting the intermediate to mature RAFSS habitat along the western portion of the alignment. If it is infeasible to implement MM BIO-7, then the residual impact could be compensated by implementation of MM BIO-8, which is intended to compensate for permanent or long-term losses of sensitive RAFSS habitat as a result of installation of permanent facilities or long-term construction impacts that cannot be fully mitigated by MM BIO-1, MM BIO-2, and MM BIO-7. (Draft EIR page 3.3-44.)
MM BIO-8	To compensate for permanent long-term and temporal losses of RAFSS habitat value, Muni/Western will acquire, for every 1 acre impacted, a minimum of 1 acre of good quality habitat of similar or greater habitat value than the RAFSS area impacted by the Plunge Pool pipeline and dedicate it in perpetuity as a habitat conservation easement area, or other appropriate designation, and provide funding for its future management as native habitat in perpetuity. The acquired RAFSS habitat area would ideally be contiguous with existing habitat already set aside in the WSPA or other dedicated RAFSS habitat. If good quality habitat in such a locality is not available for purchase, availability of other RAFSS habitat will be investigated, with the objective of obtaining good quality habitat near the Project area. Implementation of this mitigation measure will be subject to the requirement that such long-term mitigation and reporting plans for such acquisitions are to be approved by the Deputy Director for Water Rights of the State Water Board prior to construction of the Plunge Pool Pipeline. (Draft EIR page 3.3-44; Final EIR Section 2.4.)
MM BIO-9	Muni/Western will monitor and remove invasive non-native species establishing in the channel and adjacent RAFSS habitats between Seven Oaks Dam and Mill Creek. Target species include species of tamarisk or salt cedar (*Tamarix* spp.), fountain grass (*Pennisetum setaceum*), and giant reed (*Arundo donax*). These species establish in

MM BIO-9 (continued)	habitats suitable to SBKR and Santa Ana River woolly-star and have the potential to spread further into adjacent suitable habitat areas. Initial control will be established using a combination of physical removal and herbicidal treatment using appropriate environmental safeguards. Herbicides will be used pursuant to manufacturer's instructions, and standard measures will be taken to avoid impacts to water quality. Two to several follow-up treatments would be anticipated during the first year with follow-up monitoring and treatments at least once annually in the ensuing years. (Draft EIR page 3.3-61; Final EIR Section 2.4.)
MM BIO-10	Muni/Western will develop a program, in coordination with MSHCP agency participants, to selectively restore SBKR and Santa Ana River woolly-star habitat by using habitat manipulation, either by mechanical means or high pressure water, to remove vegetation and leave freshly deposited sand and silt, simulating the habitat-renewing aftermath of natural flooding. This will be done using an adaptive management approach with input from Multispecies Habitat Conservation Plan (MSHCP) stakeholders. If the high pressure water method is used, water will be piped. A high-pressure nozzle will be directed at localized areas of habitat determined to be suitable for SBKR and Santa Ana River woolly-star after renewal. The nozzle will be hand operated or operated from a light vehicle. Treatments will be accomplished in a randomized block design to allow experimental testing of variables such as duration and intensity of spray, addition of clean stand, season of disturbance, application of seed vs. allowing natural dispersal, etc. A rigorous monitoring program funded by Muni/Western will be established to enable the differences among experimental treatments to be determined. The primary indicator of success will be related to development of habitat characteristics identified with pioneer to intermediate RAFSS habitat within the SBKR and Santa Ana River woolly-star populations that have been documented. These characteristics are documented in the literature and will be specified as part of the Muni/Western Program. The program will be adjusted appropriately as results from earlier efforts become available. The design and implementation of the ongoing effort will be funded by Muni/Western and conducted by representatives of Muni/Western with input from the USFWS and CDFG. A complete description of this method is also included in Appendix E7 of the Draft EIR, Section 2.0. Muni/Western commit to achieving a mitigation performance of restoring 10 acres of intermediate- to late-stage RAFSS habitat to the early or intermediate stage RAFSS habitat during the first 20 years of Project implementation. (Draft EIR pages 3.3-61 and 3.3-62; Final EIR Section 2.4.)
MM CR-1	In the event of an unanticipated archaeological or paleontological resource discovery during construction, all ground disturbances within 150 feet of the discovery will be halted or redirected to other areas until the discovery has been documented by a qualified archaeologist or paleontologist, and its potential significance evaluated consistent with CEQA. Resources considered significant will be avoided by Project design. If avoidance is not feasible, the resource will be subject to a data recovery mitigation program, as appropriate. If human remains are discovered the County Coroner will be contacted, and all procedures required by the California Health and Safety Code Section 7050.5, State CEQA Guidelines Section 15064.5(e) and PRC Section 5097.98 will be followed. (Draft EIR page 3.9-19.)
MM-CR-2	Proposed construction of the Plunge Pool Pipeline will avoid physical impacts to the Francis Cuttle Weir Dam to the extent feasible. In the event that any portion of the Francis Cuttle Weir Dam would be modified or demolished, a qualified architectural historian will prepare a historic recordation of the Francis Cuttle Weir Dam, in the context of the Conservation District's groundwater spreading system. The recordation will conform to the standards of either the Historic American Buildings Survey (HABS) or the Historic American Engineering Record (HAER). (Draft EIR page 3.9-20.)

MM CR-3	Prior to construction activities along the segment of the Plunge Pool Pipeline, Phase I, align north of Greenspot Road, the location of the North Fork Canal will be precisely mapped on engineering design plans to identify where the canal falls within the construction corridor. Temporary fencing will be placed 5 feet south of the canal along the portion of the canal that falls within the construction corridor to provide a small buffer area, and no heavy construction equipment or vehicles will be allowed north of the fencing. (Draft EIR page 3.9-21.)
MM CR-4	If it is necessary to install the Morton Canyon Connector II Pipeline through the "Hole in the Wall" within the retaining wall of Greenspot Bridge, construction activities will be confined to previously disturbed sections only and the wall will be restored to pre-Project conditions. Prior to construction, a qualified architectural historian will review the final construction designs of the Morton Canyon Connector II Pipeline to verify avoidance of significant impacts to any Greenspot Bridge feature. (Draft EIR page 3.9-24.)
MM HAZ-1	Muni/Western will direct the contractor to wash out concrete trucks in a designated area where the material cannot run off into a stream or percolate into the groundwater. This area will be specified on all applicable construction plans and be in place before any concrete is poured. Muni/Western will direct the contractor to construction vehicles in a manner that contains fluids, such as lubricants, within an impervious area to avoid spill-related water quality impacts. (Draft EIR page 3.12-12.)
MM HAZ-2	Muni/Western will direct the contractor to inspect and, as necessary, service all equipment before it enters the construction site and regularly thereafter, and before working immediately adjacent to the Santa Ana River or any other drainage or creek to avoid equipment leak-related water quality impacts. Muni/Western will direct the contractor to repair any leaks or hoses/fittings in poor condition before the equipment begins work. (Draft EIR page 3.12-12.)
MM HAZ-3	Muni/Western will direct the contractor to prepare a spill prevention and contamination plan prior to equipment use on the site. Muni/Western will direct the contractor to follow the spill prevention plan during Project construction to prevent spill-related water quality impacts. This plan will include, but not necessarily be limited to: a. Specific bermed equipment maintenance and refueling areas. b. Bermed and lined hazardous material storage areas on site that are covered during the rainy season. c. Hazardous material spill cleanup equipment on site (e.g.,absorbent pads, shovels, and bags to contain contaminated soil). d. Workers trained in the location and use of cleanup equipment. (Draft EIR page 3.12-12.)
MM HAZ-4	Using available data, in conjunction with the integrated surface and groundwater models, Muni/Western will identify groundwater trends, including plume movement and isolate changes attributable to implementation of the Project. To the extent feasible given existing infrastructure, and consistent with meeting other basin management objectives, Muni/Western will direct Project water spreading to limit adverse plume movements. (Draft EIR page 3.12-14.)
MM-HAZ-5	Muni/Western will make an alternative water supply available to parties affected by contaminated wells, or provide treatment for affected wells, at Muni/Western's discretion. The alternative supply or treatment for affected wells will be made available for all times when pertinent water quality standards are exceeded as a result of the Project. (Final EIR section 2.3.2.)

MM GEO-1	Before beginning construction, a sedimentation and erosion control plan will be prepared by Muni/Western and submitted to the Santa Ana Regional Water Quality Control Board (SARWQCB) for approval. In addition, a Storm Water Pollution Prevention Plan (SWPPP) will be prepared by Muni/Western and submitted to the SARWQCB for approval prior to construction. Where possible, erosion control measures will be implemented by Muni/Western before beginning work in the rainy season. To minimize short-term impacts associated with erosion and off-site siltation of the SAR, standard erosion and sediment control features will be used during and immediately after grading and excavations.
MM GEO-2	Muni/Western will direct the contractor to install, prior to de-watering activities, energy dissipation devices at discharge points to prevent erosion. Sedimentation basins (such as straw bales lined with filter fabric) will be used at dewatering discharge points to prevent excess downstream sedimentation. These basins will be constructed during dewatering and regularly maintained during construction, including after storm events, to keep them in good working order.
MM GEO-3	Muni/Western will implement recommendations established in a site-specific geotechnical report, prepared by a qualified engineer or engineering geologist. The report recommendations will be based on comprehensive evaluation of slope stability, seismic, and soil conditions that may affect construction of the pipelines and related facilities. Recommendations will be consistent with provisions of California Code of Regulations, Title 8, Construction and Safety Orders. Project grading and excavations will be observed by a geotechnical engineer, engineering geologist, or other qualified representative, to verify compliance with recommendations of the geotechnical report. The geotechnical investigation will be completed in accordance with: (1) CDMG Special Publication 117, *Guidelines for Evaluating and Mitigating Seismic Hazards in California* (CDMG 1997). (2) Southern California Earthquake Center, Recommended Procedures for Implementation of DMG Special Publication 117 Guidelines for Analyzing and Mitigating Liquifaction in California (SCEC1999).
MM GEO-4	Muni/Western will implement seismic-related recommendations contained in a site-specific geotechnical report, as discussed in MM GEO-3, to minimize seismically induced damage to the pipeline.
MM GEO-5	A water flow shut-off mechanism will be installed by Muni/Western at the Plunge Pool Pipeline Intake Structure to terminate flow immediately following a large earthquake in the vicinity of the site.
MM GEO-6	Muni/Western will complete emergency repairs to the pipeline and/or related facilities, in the event of seismically induced damage. MM GEO-1 and MMGEO-2 will be applied to reduce erosion related impacts associated with soil disturbance during emergency repairs.
MM GEO-7	Muni/Western will implement a groundwater level monitoring program using data from Index Wells (see Figure 3.4-5). This information will be used in conjunction with forecasts of groundwater levels derived from Muni/Western integrated surface and groundwater models to identify trends in groundwater levels and identify changes attributable to the Project. To the extent feasible given existing infrastructure, and consistent with meeting other basin management objectives, Muni/Western will direct Project water spreading to limit high groundwater conditions in the vicinity of Devil Canyon, Lytle Creek, Mill Creek, and areas in the forebay and intermediate area of the SBBA.

MM GEO-8	Muni/Western will implement a groundwater level monitoring program using data from Index Wells. This information will be used in conjunction with forecasts of groundwater levels derived from Muni/Western integrated surface and groundwater models to identify trends in groundwater levels and isolate changes attributable to the Project. To the extent feasible given existing infrastructure, and consistent with meeting other basin management objectives, Muni/Western will direct Project water spreading to limit potential for subsidence in the Pressure Zone area of the SBBA.
MM GW-1	Using available reliable data, Muni/Western will, on an annual basis, evaluate impacts of the Project on TDS and nitrate concentrations in the SBBA. To the extent feasible given existing infrastructure, and consistent with meeting other basin management objectives, Muni/Western will direct Project water spreading to reduce significant TDS and nitrate impacts.
MM SW-2	An energy dissipation structure, a device to slow fast moving flows so as to prevent erosion, will be placed at the terminus of the pipeline delivering water to Lytle Basins channel to ensure that water from the Project does not scour or erode the channel.
MM PS-12	Per the requirements of the Seven Oaks Accord, to avoid a significant effect on groundwater levels at one or more index wells located outside the Pressure Zone, Muni/Western will spread sufficient water to maintain static groundwater levels at the affected index wells. To implement this mitigation measure, Muni/Western will use a groundwater monitoring program based on information derived from the index wells. This information will be used in conjunction with forecasts of groundwater levels derived from Muni/Western integrated surface and groundwater models to identify trends in groundwater levels and isolate the share of change attributable to the Project. Remedial action will be implemented prior to an actual 10-foot reduction being reached, to avoid the significant impact.

Table 2: Cumulative Mitigation Measures

MM Cumulative BIO-1	The San Bernardino General Plan continues a number of policies in the Natural Resources Element designed to require review of biological impacts for each development project in coordination with the development and enforcement of Habitat Conservation Plans, and development of monitoring programs. The Riverside County General Plan Draft Program EIR identifies policies form the Multipurpose Open Space Element of the County of Riverside General Plan as well as additional measures to reduce impacts to biological resources associated with growth. Policies are designed to require review of biological impacts for each development project, avoidance of habitat fragmentation, and use of constructed wetlands to treat water before it enters the natural stream system. Residual impacts: despite General Plan policies, significant unavoidable cumulative biological impacts would still occur in San Bernardino and Riverside Counties.
MM Cumulative CR-1	Individual review of each of the related projects under CEQA would likely result in the identification of any significant cultural resource impacts and provide mitigation to reduce or avoid impacts. It is not certain that all significant cumulative impacts could be successfully mitigated, given the potentially large amount of ground disturbance involved with the Project and related projects. Residual impacts: potential cumulative impacts on cultural resources would remain significant.
MM Cumulative CR-2	The Natural Resources Element of the San Bernardino County General Plan contains a number of policies to mitigate impacts to cultural resources. Generally, these policies require cultural resource field surveys with all project submittals; the preparation of cultural resource overlays for all existing Planning Areas not covered by an overlay map; preliminary cultural resource reviews by the Archaeological Information Center; the cataloging of artifacts discovered as a result of a cultural resource investigation; and notification of the Native American Heritage Commission if projects require the excavation of Native American archaeological sites. The Multipurpose Open Space Element of the Riverside County General Plan also contains relevant policies that would mitigate impacts to cultural resources. The Riverside County General Plan Draft Program EIR identifies additional mitigation measures including compliance with State Health and Safety Code Section 7050.5 that requires disturbance of an area to cease where human remains have been encountered until the Riverside County Coroner has made a determination of the origin and disposition; avoidance of

MM Cumulative CR-2 (Continued)	cultural resources where possible, where avoidance of cultural resources is not possible, the planting of deterrent plant species such as prickly pear cactus shall be completed to minimize public availability to the site; and additional measures if avoidance and/or preservation of cultural resources is not possible, such as having a participant-observer present from the appropriate Indian Band or Tribe during archaeological testing or excavation of a project site. Residual impacts: significant cumulative impacts to cultural resources could still occur given the potentially large amount of ground disturbance related to growth and development.
MM Cumulative HAZ-1	The San Bernardino County General Plan includes policies to reduce impacts related to hazardous materials. Specifically, the Hazardous Waste/Materials section of the Man-made Hazards Element includes policies HW-1 through HW-26. In general, these measures establish an effective and expeditious permitting process for siting hazardous waste facilities that includes extensive public participation; ensures the protection of public health and safety when siting needed hazardous waste facilities; develops uniform set of criteria for the siting of hazardous waste facilities in the County, including a requirement that facilitates the siting only in areas with a zoning overlay of Specified Hazardous Waste Facility; and ensures coordination among agencies and County departments in the review of all hazardous waste applications within the County.
MM Cumulative SW-1	The San Bernardino General Plan contains a number of policies in the Water section of the Natural Resources Element designed to coordinate and manage water resources throughout the County. However, with regard to water resources in San Bernardino County, significant unavoidable impacts would still occur. The Riverside County General Plan addresses localized flooding risks in the Safety Element of the proposed Riverside County General Plan. Additionally, the proposed Riverside County General Plan Draft Program EIR contains measures to further mitigate flooding impacts including use of FEMA documents to minimize flood hazards, prohibition by the County of the alteration of floodways and channelization where possible, and the requirement that the 10–year flood flows be contained within the tops of curbs and the 100-year flood flows within the street rights-of-way. These policies would mitigate impacts related to surface water in Riverside County. Residual impacts: significant cumulative impacts to surface water resources related to water demand and generation of urban contaminants could still occur in San Bernardino County.

MM Cumulative GW-1	The San Bernardino County General Plan contains a number of policies in the Water section of the Natural Resources Element designed to coordinate and manage water resources throughout the County. The Riverside County General Plan contains a number of policies in the multipurpose Open Space Element and Land Use Element designed to avoid overdraft and groundwater contamination. Residual impacts: significant unavoidable cumulative groundwater impacts would still occur in San Bernardino County.

STATE OF CALIFORNIA
CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

PERMIT FOR DIVERSION AND USE OF WATER

PERMIT 21265

Application **31370** of

San Bernardino Valley Municipal Water District and Western Municipal Water District of Riverside County
P.O. Box 5906
San Bernardino, CA 92412-5906

filed on **November 4, 2002**, has been approved by the State Water Resources Control Board (State Water Board or Board) SUBJECT TO PRIOR RIGHTS and to the limitations and conditions of this permit.

Permittee is hereby authorized to divert and use water as follows:

1. Source of water

Source:	Tributary to:
Santa Ana River (1, 3, 6, 9, 10, 11,12)	**Pacific Ocean**
Bear Creek (2)	**Santa Ana River thence Pacific Ocean**
Breakneck Creek (4)	**Santa Ana River thence Pacific Ocean**
Keller Creek (5)	**Santa Ana River thence Pacific Ocean**
Alder Creek (7)	**Santa Ana River thence Pacific Ocean**

within the County of **San Bernardino.**

2. Location of points of diversion (POD) and points of rediversion (POR)

By California Coordinate System of 1983, Zone **5**	40-acre subdivision of public land survey or projection thereof	Section	Township	Range	Base and Meridian
POD & POR #1: Seven Oaks Dam North 1,866,500 ft. and East 6,835,000 ft.	**NE¼ of NW¼**	**4**	**01S**	**02W**	**SB**
POD #2: North 1,882,500 ft. and East 6,859,600 ft.	**SE¼ of NE¼**	**19**	**01N**	**01W**	**SB**
POD #3: North 1,882,400 ft. and East 6,859,700 ft.	**SE¼ of NE¼**	**19**	**01N**	**01W**	**SB**
POD #4: North 1,880,900 ft. and East 6,858,100 ft.	**NW¼ of SE¼**	**19**	**01N**	**01W**	**SB**
POD #5: North 1,877,700 ft. and East 6,846,200 ft.	**NW¼ of NE¼**	**26**	**01N**	**02W**	**SB**
POD #6: North 1,876,700 ft. and East 6,846,700 ft.	**SW¼ of NE¼**	**26**	**01N**	**02W**	**SB**

3. Purpose of use	4. Place of use	Section (Projected)*	Township	Range	Base and Meridian	Acres
Municipal, Industrial, Irrigation, Heat Control, Frost Protection and Recreational uses	**San Bernardino Valley Municipal Water District and Western Municipal Water District of Riverside County's Service Areas***					

*The place of use is shown on maps dated June 7, 2010 and June 14, 2010 and filed with the State Water Board.

5a. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed **1,100** cubic feet per second (cfs) by direct diversion and **100,000** acre-feet per annum (afa) by underground and/or surface storage to be diverted from **January 1** to **December 31** of each year. The amount of surface storage at Seven Oaks Dam shall not exceed 50,000 afa. The maximum rate of diversion to offstream storage shall not exceed 1,250 cfs. The maximum rate of diversion to underground storage shall not exceed 400 cfs. The total amount of water to be taken from the sources shall not exceed 100,000 acre-feet (af) per water-year from October 1 to September 30. The total rate for water to be taken from the sources for either direct use, underground storage, and/or offstream surface storage shall not exceed 1,250 cfs.

(0000005E)

5b. The total quantity of water to be taken from the sources under both Application 31165 and Application 31370 shall not exceed 198,317 af per water-year from October 1 to September 30. The total amount of water diverted to storage at Seven Oaks Dam under both Applications 31165 and 31370 shall not exceed 50,000 af per water-year from October 1 to September 30. The total combined rate for water to be taken from the sources under Applications 31165 and 31370 for either direct use, underground storage, and/or offstream surface storage shall not exceed an instantaneous rate of 1,250 cfs.

(0000005L)

6. The amount authorized for appropriation may be reduced in the license if investigation warrants.

(0000006)

7. Construction work and the application of water to beneficial use shall be prosecuted with reasonable diligence. Actual construction shall begin no later than June 30, 2010 and be completed by October 1, 2020. Water shall be put to full beneficial use by December 31, 2059.

(0000009)

8. Progress reports shall be submitted promptly by Permittee when requested by the State Water Board until a license is issued.

(0000010)

9. Permittee shall allow representatives of the State Water Board and other parties, as may be authorized from time to time by said State Water Board, reasonable access to project works to determine compliance with the terms of this permit.

(0000011)

10. Pursuant to California Water Code sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of State Water Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the State Water Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of Permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the State Water Board also may be exercised by imposing further limitations on the diversion and use of water by the Permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the State Water Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

(0000012)

11. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Board if, after notice to the Permittee and an opportunity for hearing, the State Water Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken

pursuant to this paragraph unless the State Water Board finds that: (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

(0000013)

12. This permit does not authorize any act that results in the taking of a threatened or endangered species or any act that is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish & G. Code, §§ 2050-2097) or the federal Endangered Species Act (16 U.S.C.A. §§ 1531-1544). If a "take" will result from any act authorized under this water right, the Permittee shall obtain authorization for an incidental take prior to construction or operation of the project. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.

(0000014)

13. Permittee shall maintain records of the amount of water diverted and used to enable State Water Board to determine the amount of water that has been applied to beneficial use pursuant to Water Code section 1605.

(0000015)

14. This permit shall not be construed as conferring upon the Permittee right of access to the point of diversion.

(0000022)

15. Permittee shall consult with the Division of Water Rights (Division) and, within one year from the date of this permit, shall submit to the State Water Board its Urban Water Management Plan as prepared and adopted in conformance with section 10610, et seq. of the California Water Code, supplemented by any additional information that may be required by the Board.

All cost effective measures identified in the Urban Water Management Plan and any supplements thereto shall be implemented in accordance with the schedule for implementation found therein.

(0000029A)

16. If it is determined after permit issuance that the as-built conditions of the project are not correctly represented by the map(s) prepared to accompany the application, Permittee shall, at his expense have the subject map(s) updated or replaced with equivalent as-built map(s). Said revision(s) or new map(s) shall be prepared by a civil engineer or land surveyor registered or licensed in the State of California and shall meet the requirements prescribed in section 715 and sections 717 through 723 of the California Code of Regulations, Title 23.. Said revision(s) or map(s) shall be furnished upon request of the Chief of the Division of Water Rights[1].

(0000030)

17. No work shall commence and no water shall be diverted, stored or used under this permit until a copy of a stream or lake alteration agreement between the State Department of Fish and Game (DFG) and the Permittee is filed with the Division. Compliance with the terms and conditions of the agreement is the responsibility of the Permittee. If a stream or lake alteration agreement is not necessary for this permitted project, the Permittee shall provide the Division a copy of a waiver signed by DFG.

(0000063)

---

[1] The Chief of the Division of Water Rights is hereafter referred by the State Water Board as the Deputy Director for Water Rights.

18. In order to prevent degradation of the quality of water during and after construction of the project, prior to commencement of construction undertaken after issuance of the permit, Permittee shall file a report pursuant to Water Code Section 13260 and shall comply with all waste discharge requirements imposed by the California Regional Water Quality Control Board, Santa Ana Region, or by the State Water Board.

(0000100)

19. Prior to diversion of water under this permit, Permittee shall: (1) install devices to measure the instantaneous rate of diversion and the quantities of water placed into underground storage, and (2) install devices to measure or provide documentation of the method to be used to determine the quantity of water recovered from underground storage and placed to beneficial use. All measuring devices and the method of determining the quantity of water placed into and recovered from underground storage shall be approved by the State Water Board prior to diversion of water under this permit. All measuring devices shall be properly maintained. The diversion data shall be posted on Permittee's websites on a weekly basis.

(0080117)

20. The Permittee shall obtain all necessary state and local agency permits required by other agencies prior to construction and diversion of water. Copies of such permits and approvals shall be forwarded to the Deputy Director for Water Rights (Deputy Director).

(0000203)

21. No debris, soil, silt, cement that has not set, oil, or other such foreign substance will be allowed to enter into or be placed where it may be washed by rainfall runoff into the waters of the State. When operations are completed, any excess materials or debris shall be removed from the work area.

(0000208)

22. The State Water Board adopts and incorporates by reference into this permit the mitigation measures and monitoring and reporting requirements applicable to the impacts of the Project on biological and cultural resources, geology, hazardous material and groundwater contamination, groundwater and surface water hydrology, water quality and public services, utilities and transportation identified in the Final EIR, specifically mitigation measures MM BIO-1, MM BIO-2 and MM BIO-6 through MM BIO-10, MM CR 1 through MM CR 4, MM HAZ 1 through MM HAZ 5, MM GEO-1 through MM GEO-8, MM GW-1, MM SW-2 and MM PS-12. (See attached Table 1.) Permittee must implement the measures to mitigate significant impacts and conduct the required reporting and monitoring of those measures as provided in the Mitigation Monitoring and Reporting Plan adopted on March 21, 2007 by the respective Boards of Directors of San Bernardino Valley Municipal Water District and Western Municipal Water District of Riverside County. In addition, Permittee shall submit an annual report to the Deputy Director that includes the results of the Mitigation Monitoring and Reporting Program. The State Water Board reserves jurisdiction to require any reasonable amendments to these measures and requirements to ensure that they will accomplish the stated goal.

(0400500)

23. The State Water Board adopts and incorporates by reference into this permit the mitigation measures and monitoring and reporting requirements applicable to the cumulative impacts of the Project on biological and cultural resources, geology, hazardous material and groundwater contamination, groundwater and surface water hydrology and water quality, and public services, utilities and transportation identified in the EIR, specifically mitigation measures MM Cumulative BIO-1, MM Cumulative CR-1, MM Cumulative CR-2, MM Cumulative HAZ-1, MM Cumulative SW-1 and MM Cumulative GW-1. (See attached Table 2.) Permittee must implement the measures to mitigate cumulative impacts and conduct the required reporting and monitoring of those measures as provided in the Mitigation Monitoring and Reporting Plan adopted by the respective Boards of Directors of San Bernardino Valley Municipal Water District and Western

Municipal Water District of Riverside County on March 21, 2007. In addition, Permttee shall submit to the Deputy Director an annual report that includes the results of the Mitigation Monitoring and Reporting Program. The State Water Board reserves jurisdiction to require any reasonable amendments to these measures and requirements to ensure that they will accomplish the stated goal.

(0400500)

24. This permit shall not be construed as conferring upon Permittee right of access to facilities of the U.S. Army Corps of Engineers and the Santa Ana River Mainstem Local Sponsors.

(0000022)

25. This permit is specifically subject to the prior rights of Bear Valley Mutual Water Company, City of Redlands, East Valley Water District, Lugonia Water Company, North Fork Water Company and Redlands Water Company to divert the first 88 cfs of the natural flow of the Santa Ana River pursuant to pre-1914 appropriative rights, to the extent that such rights may exist.

(0400500)

26. This permit is specifically subject to the prior rights of San Bernardino Valley Water Conservation District under Licenses 2831 and 2832 issued pursuant to Applications 2217 and 4807, and any valid pre-1914 appropriative right confirmed by the Court.

(0400500)

27. Nothing in this permit shall be construed as authorizing any diversions contrary to the provisions of the December 19, 2002 Biological Opinion issued by United States Fish and Wildlife Service for operation of Seven Oaks Dam, as may be revised in the future, including flow releases for downstream over-bank inundation to preserve State and federally listed threatened and endangered species and their habitat.

(0600500)

28. Permittee shall only divert water at points of diversion 5 though 10 in compliance with the terms and conditions of Federal Energy Regulatory Commission (FERC) license Project No. 1933 and 401 water quality certification as well as any future FERC licenses and 401 water quality certifications.

(0560900)

29. Permittee shall not, without the prior written consent of Southern California Edison (SCE), construct, operate or maintain diversion works at points of diversion located upstream of the flood inundation pool of Seven Oaks Dam in a manner that interferes with the operation and maintenance of the hydroelectric works licensed to SCE by the Federal Energy Regulatory Commission (FERC) license for Project No. 1933. Permittee's diversion of water at such points of diversion shall not interfere with SCE's diversion of water for hydroelectric purposes, again as described in the FERC license for Project No. 1933. Nothing in this permit shall be construed to limit Permittee's diversion of water from such points of diversion at times when the quantity of water available for diversion at such points of diversion exceeds the demand of SCE's facilities to divert water from the Santa Ana River system.

(0430999)

30. This permit shall not be construed as conferring upon Permittee the right of access to Seven Oaks Dam, the points of diversion, the lands necessary for related facilities, or the lands necessary for inundation for water storage. Access to, construction upon, or inundation of National Forest Service lands shall not commence prior to authorization by the Forest Service, in accordance with applicable laws and regulations. Such authorization will require compliance with all applicable federal laws and regulations. Permittee specifically recognizes that completion of

the applicable legal process does not guarantee such authorization will be granted, the issuance of this water right permit notwithstanding.

(0000022)

31. This permit shall not be construed as conferring upon Permittee the right of access to Seven Oaks Dam, the points of diversion, and lands necessary for related facilities, or the lands necessary for inundation for water storage. Permittee shall not commence construction and operation of water diversion facilities at Seven Oaks Dam without a written access agreement from the Santa Ana River Mainstem Project Local Sponsors.

(0000022)

32. Flow in the Santa Ana River is highly variable from year to year. Because the face value of this permit is based on a rare storm event, this permit shall not be construed as giving any assurance that such an event will occur. The actual amount of water available for appropriation may be much less.

(0000999)

33. Permittee is required to follow guidance from existing state and federally mandated projects regarding groundwater contaminant plumes within and outside the San Bernardino Basin Area. This includes coordination with appropriate oversight agencies and compliance with policies regarding the remediation of the groundwater contaminant plumes.

(0400800)

34. Permittee shall not use the Cactus Spreading and Flood Control Basins under this permit.

(0400800)

35a. In order to prevent degradation of the quality of water released to the Santa Ana River from storage at Seven Oaks Dam, the State Water Board may modify this permit to set conditions that apply water quality objectives to any release from storage.

35b. No water shall be released from storage of Seven Oaks Dam for purposes of rediversion by Permittee until Permittee has consulted with the Chief Deputy Director for Water Quality or his or her delegee and the Chief Deputy Director has determined that the releases will be consistent with applicable water quality objectives. The releases shall be consistent with any conditions the Chief Deputy Director determines are necessary to ensure compliance with applicable water quality objectives.

(0400800)

36. In order to prevent degradation of water quality during and after construction of the project, prior to commencement of any construction undertaken after issuance of the permit, Permittee shall file a report pursuant to Water Code Section 13260 and shall comply will all waste discharge requirements imposed by the California Regional Water Quality Control Board, Santa Ana Region, or by the State Water Board.

(0400800)

This permit is issued and Permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every Permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefore shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any Permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any Permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

STATE WATER RESOURCES CONTROL BOARD

James W. Kassel
for *Victoria A. Whitney*
Deputy Director for Water Rights

Dated: JUN 29 2010

Attachments

Table 1: Mitigation Measures

MM BIO-1	Muni/Western will minimize disturbance to native habitats and listed and non-listed sensitive species by the implementation of the following measures at construction sites prior to and during construction. Where ground disturbance is required, the Muni/Western program will include the following: (1) Clearly marking and delineating the limits of the staging areas as well as the construction corridors/zones in the field and graphically on all final construction drawings and blueprints. Personnel and equipment will be prohibited in native habitats outside the construction limits. (2) Biologically sensitive areas, including individuals or colonies of listed and non-listed sensitive plant species and wildlife species, will be identified and delineated in the field prior to ground disturbance (see MM BIO-3) and will be clearly marked graphically on all final construction plans or blueprints so they will be avoided to maximum extent feasible. (3) Use methods to minimize the construction corridor width to the maximum extent feasible in sensitive habitats, such as transporting and stockpiling excavated materials in disturbed area of the right-of-way (ROW), or into other parts of the ROW by truck or conveyor belt. **Employee Training** Implementation of an employee training program. Muni/Western's program will include an initial meeting with all personnel presented by a qualified biologist familiar with all affected species, habitats, and permit conditions. The employee training program will include a discussion of each species, all applicable laws, the permit conditions, and the potential penalties for violating permit conditions. The employee training program will be conducted before construction activities begin. Regular updates will occur during weekly tailgate meetings with construction personnel, and newly hired personnel will be informed of the permit conditions as well as the habitat and species issues before working on the Project site. **On-Site Monitoring** Biological monitoring of habitat clearing activities and removal of sedentary animals, both common and sensitive, within the ROW prior to clearing. This will require a qualified biologist to be at the location of habitat removal before clearing to attempt to remove animals where visible and, during removal activities, to ensure that no inadvertent impacts to adjacent habitats occur. Weekly inspections of the ROW perimeter near work areas will also reduce the potential for inadvertent impacts to adjacent habitat. **Best Management Practices (BMPs)** Dust control. All areas of mechanical ground disturbance, including dirt access roadways, will be consistently moistened to reduce the creation of dust clouds. The frequency of watering will be consistent with the desired goal and in accordance with regional standards and BMPs. Erosion control. Devices such as straw bales and "v" ditches will be installed in areas where construction activities may directly or indirectly cause erosion or sediment deposition on adjacent habitats. Routine removal of trash from construction areas. All refuse, including non-construction materials such as paper and miscellaneous food packaging materials, will be removed from the ROW to prevent littering of the adjacent habitat areas outside of the ROW. At a minimum, site clean-ups should occur weekly. **Listed Species Protection Measures** In areas where the San Bernardino Kangaroo Rat (SBKR) is present, either within or adjacent to the ROW, Muni/Western will install exclusionary fencing where appropriate to reduce the potential for SBKR entering the ROW.

MM BIO-1 (Continued)	Specification for the fencing will be particular to the goal of the SBKR exclusion and will be approved by the United States Fish and Wildlife Service (USFWS). Muni/Western may not install fencing in certain areas such as boulder-strewn washes where fence construction may cause substantial habitat disturbance. Following the installation of fencing, the animals within the ROW will be trapped and released within adjacent suitable habitat outside the ROW. These methods will be approved by the USFWS. In areas where the SBKR is present, either within or adjacent to the ROW, Muni/Western will limit construction activities to daylight hours (approximately 7:00 A.M. to 6:00 P.M.) During night hours, no activities that would unnaturally increase the light or noise within adjacent occupied habitat will occur. In areas where the SBKR, coastal California gnatcatcher CAGN, least Bell's vireo, or southwestern willow flycatcher are present either within or adjacent to the ROW, Muni/Western will avoid or reduce construction activities in the vicinity of occupied habitat during the breeding season. Avoidance will take place from March 1 through June 30. In certain areas, avoidance of southwestern willow flycatcher will continue through July 31. Where complete avoidance is not possible, construction activities will be conducted in a manner that attempts to minimize disturbance during early morning hours and avoids the most sensitive breeding months of April and May. In areas where preconstruction sensitive species surveys and other seasonally limited activities such as seed collection and plant propagation are needed, Muni/Western will prepare a calendar of when such activities need to be accomplished and incorporate this into design and construction schedules to ensure that the surveys can be conducted in the appropriate season without causing delays. (Draft EIR page 3.3-37 through 3.3-39; Final EIR Section 2.4.)
MM BIO-2	Muni/Western will develop a Habitat Revegetation, Restoration, and Monitoring Program (Program), obtaining input from CDFG, and USFWS, for implementation in all habitat areas directly affected by construction activities. The Program will include the following measures: **Invasive Species Control** Where appropriate and feasible, the area to be treated will be treated to kill invasive exotics species and limit their seed production before initiating any earthmoving activity with the objectives of: (1) preventing invasive species from spreading from the disturbance area, and (2) removing weed sources from the salvaged topsoil. Herbicides will be used only by a licensed herbicide applicator and may require notification to property owners or resource agencies. The treatment will be completed before earthmoving in order for this mitigation to have its intended effect (e.g., the treatment would need to occur before target species set seed). **Topsoil Salvage and Replacement** In areas where vegetation and soil are to be removed, the topsoil will be salvaged and replaced, where practicable. This may be accomplished using two lifts, the first to salvage the seed bank, and the second to salvage soil along with soil biota in the root zone. Soil will be stockpiled in two areas near the Project site, with the seed bank labeled to identify it. Topsoil will be replaced in the proper layers after final reconfiguration of disturbed areas. Where presence of extensive deposits of boulders and cobbles limit the opportunity to salvage topsoil and make the above-mentioned procedure infeasible, Muni/Western will salvage available surface material and stockpile it for replacement on the surface of the restored area. Stockpiles will be covered if the soil is to be left for an extended period to prevent losses due to erosion and invasion of weeds. **Habitat Rehabilitation and Revegetation** Muni/Western will develop and implement plans and specifications for replanting areas disturbed by the Project. Replanting will be with native species propagated from locally collected seed or cuttings, and, if applicable, will include seed or sensitive species that would be impacted during construction activities. Monitoring procedures and performance criteria will be developed by Muni/Western to

MM BIO-2 (Continued)	address revegetation and erosion control. The performance criteria will consider the level of disturbance and the condition of adjacent habitats. Monitoring will continue for three-to-five years, or until performance criteria have been met. Appropriate remedial measures, such as replanting, erosion control or weed control, will be identified and implemented if it is determined that performance criteria are not being met. (Draft EIR page 3.3-39 through 3.3-40; Final EIR Section 2.4.)
MM BIO-6	Prior to ground disturbance or other activities, qualified botanists will survey all proposed construction, staging, stockpile, and access areas for presence of non-listed sensitive plant species. Preconstruction surveys will occur during appropriate season and in accordance with established protocols (if required). These surveys will be conducted in all construction areas that occur in native habitats. In the event that non-listed sensitive plant species are observed in the impact area during pre-Project surveys, Muni/Western will implement the following measures: (a) Colonies will be clearly marked, mapped, and recorded along with the numbers of individuals in each colony and their respective condition. To the extent feasible, construction areas and access roads will be configured to avoid or minimize loss of individual plants and damage to occupied habitats. (b) Where impacts to non-listed sensitive plant species are unavoidable, Muni/Western will develop and implement a salvage, propagation, replanting, and monitoring program that will use both seed and salvaged plants constituting an ample and representative sample of each colony. (Draft EIR page 3.3-42.)
MM BIO-7	To reduce impacts on biological resources, Muni/Western will realign pipelines to avoid sensitive resources and habitat to the maximum extent feasible. Specifically, Muni/Western will realign Phase II of the Plunge Pool Pipeline northward and place it adjacent to Greenspot Road. (See Draft EIR Figure 3.3-7). This will put the project-related disturbance at the edge of the habitat and avoid bisecting the intermediate to mature RAFSS habitat along the western portion of the alignment. If it is infeasible to implement MM BIO-7, then the residual impact could be compensated by implementation of MM BIO-8, which is intended to compensate for permanent or long-term losses of sensitive RAFSS habitat as a result of installation of permanent facilities or long-term construction impacts that cannot be fully mitigated by MM BIO-1, MM BIO-2, and MM BIO-7. (Draft EIR page 3.3-44.)
MM BIO-8	To compensate for permanent long-term and temporal losses of RAFSS habitat value, Muni/Western will acquire, for every 1 acre impacted, a minimum of 1 acre of good quality habitat of similar or greater habitat value than the RAFSS area impacted by the Plunge Pool pipeline, and dedicate it in perpetuity as a habitat conservation easement area, or other appropriate designation, and provide funding for its future management as native habitat in perpetuity. The acquired RAFSS habitat area would ideally be contiguous with existing habitat already set aside in the WSPA or other dedicated RAFSS habitat. If good quality habitat in such a locality is not available for purchase, availability of other RAFSS habitat will be investigated, with the objective of obtaining good quality habitat near the Project area. Implementation of this mitigation measure will be subject to the requirement that such long-term mitigation and reporting plans for such acquisitions are to be approved by the Deputy Director for Water Rights of the State Water Resources Control Board prior to construction of the Plunge Pool Pipeline. (Draft EIR page 3.3-44; Final EIR Section 2.4.)
MM BIO-9	Muni/Western will monitor and remove invasive non-native species establishing in the channel and adjacent RAFSS habitats between Seven Oaks Dam and Mill Creek. Target species include species of tamarisk or salt cedar (*Tamarix* spp.), fountain grass (*Pennisetum setaceum*), and giant reed (*Arundo donax*). These species establish in habitats suitable to SBKR and Santa Ana River woolly-star and have the potential to

MM BIO-9 (Continued)	spread further into adjacent suitable habitat areas. Initial control will be established using a combination of physical removal and herbicidal treatment using appropriate environmental safeguards. Herbicides will be used pursuant to manufacturer's instructions, and standard measures will be taken to avoid impacts to water quality. Two to several follow-up treatments would be anticipated during the first year with follow-up monitoring and treatments at least once annually in the ensuing years. (Draft EIR page 3.3-61; Final EIR Section 2.4.)
MM BIO-10	Muni/Western will develop a program, in coordination with MSHCP agency participants, to selectively restore SBKR and Santa Ana River woolly-star habitat by using habitat manipulation, either by mechanical means or high pressure water, to remove vegetation and leave freshly deposited sand and silt, simulating the habitat-renewing aftermath of natural flooding. This will be done using an adaptive management approach with input from Multispecies Habitat Conservation Plan (MSHCP) stakeholders. If the high-pressure water method is used, water will be piped. A high-pressure nozzle will be directed at localized areas of habitat determined to be suitable for SBKR and Santa Ana River woolly-star after renewal. The nozzle will be hand-operated or operated from a light vehicle. Treatments will be accomplished in a randomized block design to allow experimental testing of variables such as duration and intensity of spray, addition of clean stand, season of disturbance, application of seed vs. allowing natural dispersal, etc. A rigorous monitoring program funded by Muni/Western will be established to enable the differences among experimental treatments to be determined. The primary indicator of success will be related to development of habitat characteristics identified with pioneer to intermediate RAFSS habitat within the SBKR and Santa Ana River woolly-star populations that have been documented. These characteristics are documented in the literature and will be specified as part of the Muni/Western Program. The program will be adjusted appropriately as results from earlier efforts become available. The design and implementation of the ongoing effort will be funded by Muni/Western and conducted by representatives of Muni/Western with input from the USFWS and CDFG. A complete description of this method is also included in Appendix E7 of the Draft EIR, Section 2.0. Muni/Western commit to achieving a mitigation performance of restoring 10 acres of intermediate- to late-stage RAFSS habitat to the early or intermediate stage RAFSS habitat during the first 20 years of Project implementation (Draft EIR pages 3.3-61 and 3.3-62; Final EIR Section 2.4.)
MM CR-1	In the event of an unanticipated archaeological or paleontological resource discovery during construction, all ground disturbances within 150 feet of the discovery will be halted or redirected to other areas until the discovery has been documented by a qualified archaeologist or paleontologist, and its potential significance evaluated consistent with CEQA. Resources considered significant will be avoided by Project design. If avoidance is not feasible, the resource will be subject to a data recovery mitigation program, as appropriate. If human remains are discovered the County Coroner will be contacted, and all procedures required by the California Health and Safety Code Section 7050.5, State CEQA Guidelines Section 15064.5(e) and PRC Section 5097.98 will be followed. (Draft EIR page 3.9-19.)
MM-CR-2	Proposed construction of the Plunge Pool Pipeline will avoid physical impacts to the Francis Cuttle Weir Dam to the extent feasible. In the event that any portion of the Francis Cuttle Weir Dam would be modified or demolished, a qualified architectural historian will prepare a historic recordation of the Francis Cuttle Weir Dam, in the context of the Conservation District's groundwater spreading system. The recordation will conform to the standards of either the Historic American Buildings Survey (HABS) or the Historic American Engineering Record (HAER). (Draft EIR page 3.9-20.)

MM CR-3	Prior to construction activities along the segment of the Plunge Pool Pipeline, Phase I, align north of Greenspot Road, the location of the North Fork Canal will be precisely mapped on engineering design plans to identify where the canal falls within the construction corridor. Temporary fencing will be placed 5 feet south of the canal along the portion of the canal that falls within the construction corridor to provide a small buffer area, and no heavy construction equipment or vehicles will be allowed north of the fencing. (Draft EIR page 3.9-21.)
MM CR-4	If it is necessary to install the Morton Canyon Connector II Pipeline through the "Hole in the Wall" within the retaining wall of Greenspot Bridge, construction activities will be confined to previously disturbed sections only and the wall will be restored to pre-Project conditions. Prior to construction, a qualified architectural historian will review the final construction designs of the Morton Canyon Connector II Pipeline to verify avoidance of significant impacts to any Greenspot Bridge feature. (Draft EIR page 3.9-24.)
MM HAZ-1	Muni/Western will direct the contractor to wash out concrete trucks in a designated area where the material cannot run off into a stream or percolate into the groundwater. This area will be specified on all applicable construction plans and be in place before any concrete is poured. Muni/Western will direct the contractor to construction vehicles in a manner that contains fluids, such as lubricants, within an impervious area to avoid spill-related water quality impacts. (Draft EIR page 3.12-12.)
MM HAZ-2	Muni/Western will direct the contractor to inspect and, as necessary, service all equipment before it enters the construction site and regularly thereafter, and before working immediately adjacent to the Santa Ana River or any other drainage or creek to avoid equipment leak-related water quality impacts. Muni/Western will direct the contractor to repair any leaks or hoses/fittings in poor condition before the equipment begins work. (Draft EIR page 3.12-12.)
MM HAZ-3	Muni/Western will direct the contractor to prepare a spill prevention and contamination plan prior to equipment use on the site. Muni/Western will direct the contractor to follow the spill prevention plan during Project construction to prevent spill-related water quality impacts. This plan will include, but not necessarily be limited to: a. Specific bermed equipment maintenance and refueling areas. b. Bermed and lined hazardous material storage areas on site that are covered during the rainy season. c. Hazardous material spill cleanup equipment on site (e.g.,absorbent pads, shovels, and bags to contain contaminated soil). d. Workers trained in the location and use of cleanup equipment. (Draft EIR page 3.12-12.)
MM HAZ-4	Using available data, in conjunction with the integrated surface and groundwater models, Muni/Western will identify groundwater trends, including plume movement and isolate changes attributable to implementation of the Project. To the extent feasible given existing infrastructure, and consistent with meeting other basin management objectives, Muni/Western will direct Project water spreading to limit adverse plume movements. (Draft EIR page 3.12-14.)
MM-HAZ-5	Muni/Western will make an alternative water supply available to parties affected by contaminated wells, or provide treatment for affected wells, at Muni/Western's discretion. The alternative supply or treatment for affected wells will be made available for all times when pertinent water quality standards are exceeded as a result of the Project. (Final EIR section 2.3.2.)
MM GEO-1	Before beginning construction, a sedimentation and erosion control plan will be prepared by Muni/Western and submitted to the Santa Ana Regional Water Quality Control Board

MM GEO-1 (Continued)	(SARWQCB) for approval. In addition, a Storm Water Pollution Prevention Plan (SWPPP) will be prepared by Muni/Western and submitted to the SARWQCB for approval prior to construction. Where possible, erosion control measures will be implemented by Muni/Western before beginning work in the rainy season. To minimize short-term impacts associated with erosion and off-site siltation of the SAR, standard erosion and sediment control features will be used during and immediately after grading and excavations.
MM GEO-2	Muni/Western will direct the contractor to install, prior to de-watering activities, energy dissipation devices at discharge points to prevent erosion. Sedimentation basins (such as straw bales lined with filter fabric) will be used at dewatering discharge points to prevent excess downstream sedimentation. These basins will be constructed during dewatering and regularly maintained during construction, including after storm events, to keep them in good working order.
MM GEO-3	Muni/Western will implement recommendations established in a site-specific geotechnical report, prepared by a qualified engineer or engineering geologist. The report recommendations will be based on comprehensive evaluation of slope stability, seismic, and soil conditions that may affect construction of the pipelines and related facilities. Recommendations will be consistent with provisions of California Code of Regulations, Title 8, Construction and Safety Orders. Project grading and excavations will be observed by a geotechnical engineer, engineering geologist, or other qualified representative, to verify compliance with recommendations of the geotechnical report. The geotechnical investigation will be completed in accordance with: (1) CDMG Special Publication 117, *Guidelines for Evaluating and Mitigating Seismic Hazards in California* (CDMG 1997). (2) Southern California Earthquake Center, Recommended Procedures for Implementation of DMG Special Publication 117 Guidelines for Analyzing and Mitigating Liquifaction in California (SCEC1999).
MM GEO-4	Muni/Western will implement seismic-related recommendations contained in a site-specific geotechnical report, as discussed in MM GEO-3, to minimize seismically induced damage to the pipeline.
MM GEO-5	A water flow shut-off mechanism will be installed by Muni/Western at the Plunge Pool Pipeline Intake Structure to terminate flow immediately following a large earthquake in the vicinity of the site.
MM GEO-6	Muni/Western will complete emergency repairs to the pipeline and/or related facilities, in the event of seismically induced damage. MM GEO-1 and MMGEO-2 will be applied to reduce erosion related impacts associated with soil disturbance during emergency repairs.
MM GEO-7	Muni/Western will implement a groundwater level monitoring program using data from Index Wells (see Figure 3.4-5). This information will be used in conjunction with forecasts of groundwater levels derived from Muni/Western integrated surface and groundwater models to identify trends in groundwater levels and identify changes attributable to the Project. To the extent feasible given existing infrastructure, and consistent with meeting other basin management objectives, Muni/Western will direct Project water spreading to limit high groundwater conditions in the vicinity of Devil Canyon, Lytle Creek, Mill Creek, and areas in the forebay and intermediate area of the SBBA.

MM GEO-8	Muni/Western will implement a groundwater level monitoring program using data from Index Wells. This information will be used in conjunction with forecasts of groundwater levels derived from Muni/Western integrated surface and groundwater models to identify trends in groundwater levels and isolate changes attributable to the Project. To the extent feasible given existing infrastructure, and consistent with meeting other basin management objectives, Muni/Western will direct Project water spreading to limit potential for subsidence in the Pressure Zone area of the SBBA.
MM GW-1	Using available reliable data, Muni/Western will, on an annual basis, evaluate impacts of the Project on TDS and nitrate concentrations in the SBBA. To the extent feasible given existing infrastructure, and consistent with meeting other basin management objectives, Muni/Western will direct Project water spreading to reduce significant TDS and nitrate impacts.
MM SW-2	An energy dissipation structure, a device to slow fast moving flows so as to prevent erosion, will be placed at the terminus of the pipeline delivering water to Lytle Basins channel to ensure that water from the Project does not scour or erode the channel.
MM PS-12	Per the requirements of the Seven Oaks Accord, to avoid a significant effect on groundwater levels at one or more index wells located outside the Pressure Zone, Muni/Western will spread sufficient water to maintain static groundwater levels at the affected index wells. To implement this mitigation measure, Muni/Western will use a groundwater monitoring program based on information derived from the index wells. This information will be used in conjunction with forecasts of groundwater levels derived from Muni/Western integrated surface and groundwater models to identify trends in groundwater levels and isolate the share of change attributable to the Project. Remedial action will be implemented prior to an actual 10-foot reduction being reached, to avoid the significant impact.

Table 2: Cumulative Mitigation Measures

MM Cumulative BIO-1	The San Bernardino General Plan continues a number of policies in the Natural Resources Element designed to require review of biological impacts for each development project in coordination with the development and enforcement of Habitat Conservation Plans, and development of monitoring programs. The Riverside County General Plan Draft Program EIR identifies policies form the Multipurpose Open Space Element of the County of Riverside General Plan as well as additional measures to reduce impacts to biological resources associated with growth. Policies are designed to require review of biological impacts for each development project, avoidance of habitat fragmentation, and use of constructed wetlands to treat water before it enters the natural stream system. Residual impacts: despite General Plan policies, significant unavoidable cumulative biological impacts would still occur in San Bernardino and Riverside Counties.
MM Cumulative CR-1	Individual review of each of the related projects under CEQA would likely result in the identification of any significant cultural resource impacts and provide mitigation to reduce or avoid impacts. It is not certain that all significant cumulative impacts could be successfully mitigated, given the potentially large amount of ground disturbance involved with the Project and related projects. Residual impacts: potential cumulative impacts on cultural resources would remain significant.
MM Cumulative CR-2	The Natural Resources Element of the San Bernardino County General Plan contains a number of policies to mitigate impacts to cultural resources. Generally, these policies require cultural resource field surveys with all project submittals; the preparation of cultural resource overlays for all existing Planning Areas not covered by an overlay map; preliminary cultural resource reviews by the Archaeological Information Center; the cataloging of artifacts discovered as a result of a cultural resource investigation; and notification of the Native American Heritage Commission if projects require the excavation of Native American archaeological sites. The Multipurpose Open Space Element of the Riverside County General Plan also contains relevant policies that would mitigate impacts to cultural resources. The Riverside County General Plan Draft Program EIR identifies additional mitigation measures including compliance with State Health and Safety Code Section 7050.5 that requires disturbance of an area to cease where human remains have been encountered until the Riverside County Coroner has made a determination of the origin and disposition; avoidance of

	cultural resources where possible, where avoidance of cultural resources is not possible, the planting of deterrent plant species such as prickly pear cactus shall be completed to minimize public availability to the site; and additional measures if avoidance and/or preservation of cultural resources is not possible, such as having a participant-observer present from the appropriate Indian Band or Tribe during archaeological testing or excavation of a project site. Residual impacts: significant cumulative impacts to cultural resources could still occur given the potentially large amount of ground disturbance related to growth and development.
MM Cumulative HAZ-1	The San Bernardino County General Plan includes policies to reduce impacts related to hazardous materials. Specifically, the Hazardous Waste/Materials section of the Man-made Hazards Element includes policies HW-1 through HW-26. In general, these measures establish an effective and expeditious permitting process for siting hazardous waste facilities that includes extensive public participation; ensures the protection of public health and safety when siting needed hazardous waste facilities; develops uniform set of criteria for the siting of hazardous waste facilities in the County, including a requirement that facilitates the siting only in areas with a zoning overlay of Specified Hazardous Waste Facility; and ensures coordination among agencies and County departments in the review of all hazardous waste applications within the County.
MM Cumulative SW-1	The San Bernardino General Plan contains a number of policies in the Water section of the Natural Resources Element designed to coordinate and manage water resources throughout the County. However, with regard to water resources in San Bernardino County, significant unavoidable impacts would still occur. The Riverside County General Plan addresses localized flooding risks in the Safety Element of the proposed Riverside County General Plan. Additionally, the proposed Riverside County General Plan Draft Program EIR contains measures to further mitigate flooding impacts including use of FEMA documents to minimize flood hazards, prohibition by the County of the alteration of floodways and channelization where possible, and the requirement that the 10–year flood flows be contained within the tops of curbs and the 100-year flood flows within the street rights-of-way. These policies would mitigate impacts related to surface water in Riverside County. Residual impacts: significant cumulative impacts to surface water resources related to water demand and generation of urban contaminants could still occur in San Bernardino County.

MM Cumulative GW-1	The San Bernardino County General Plan contains a number of policies in the Water section of the Natural Resources Element designed to coordinate and manage water resources throughout the County. The Riverside County General Plan contains a number of policies in the multipurpose Open Space Element and Land Use Element designed to avoid overdraft and groundwater contamination. Residual impacts: significant unavoidable cumulative groundwater impacts would still occur in San Bernardino County.

Project Title: Water Banking and Water Supply Reliability Program with Kern Delta Water District

Location -- Specific: Counties of Kern and San Bernardino, within service areas of Kern Delta Water District and San Bernardino Valley Municipal Water District

Description of Nature, Purpose, and Beneficiaries of Project: San Bernardino Valley Municipal Water District (hereinafter, "Valley District") proposes to bank State Water Project water in banking facilities operated by the Kern Delta Water District (hereinafter, "Kern Delta") for later withdrawal and use within Valley District. Under the program, the Valley District will bank up to 30,000 acre-feet of the water it would otherwise be allocated during the 2011-2012 water year pursuant to Table "A" of its State Water Project contract in existing water banking facilities operated by the Kern Delta. Diversions to the water banking facilities will be made through existing water conveyance facilities and will occur during the period between October 2011 and February 2012. Under the proposal, Kern Delta will, at Valley District's request, return up to 5,000 acre-feet per year to Valley District through existing conveyance facilities during or after the 2011-12 water year.

The proposal is consistent with and included within the scope of Kern Delta's 2002 Final Environmental Impact Report ("FEIR") for its Groundwater Banking And In-Lieu Water Supply Project (State Clearinghouse # 2001011103), which addressed the environmental impacts of the use of Kern Delta's facilities for the banking of up to 213,000 acre-feet by other water agencies, such as Valley District. Because Valley District's proposal involves making use of presently-unused capacity of the California Aqueduct, other State Water Project facilities, and Kern Delta's conveyance and banking facilities, all of which were indentified in Kern Delta's FEIR as facilities that would be used to bank water, the project represents the use of existing facilities within the limits established by applicable legal requirements. Moreover, the environmental effects, if any, of the project were fully analyzed in Kern Delta's FEIR, and the project does not alter the conclusions of the 2002 FEIR.

SBVMWD LEGAL
DOCUMENT 2327

Name of Public Agency Approving or Carrying Out Activity: San Bernardino Valley Municipal Water District

Finding of Exempt Status:

☒ Categorical Exemption. CEQA Guidelines § 15301 (Existing Facilities)

Reasons why activity is exempt:

The project is exempt from CEQA review pursuant to 14 Cal. Code Regs. § 15301 (Existing Facilities) because the proposal is for the banking and recovery of up to 30,000 acre feet of water delivered pursuant to an existing long term State Water Project contract through existing water conveyance facilities to and from existing water banking facilities. The overall program for water banking by Kern Delta (of which this banking project is a small part) was previously analyzed under CEQA and any significant effects on the environment were fully mitigated.

AGREEMENT BETWEEN KERN DELTA WATER DISTRICT AND THE SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT FOR A WATER MANAGEMENT PROGRAM

THIS AGREEMENT ("**Agreement**"), dated as of Oct 26, 2011, is entered into by and between the **KERN DELTA WATER DISTRICT** ("**Kern Delta**"), and **THE SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT** ("**Valley**"). Valley and Kern Delta may be referred to individually as Party or collectively as Parties.

PREAMBLE

This Agreement is in furtherance of development of a water management program ("Regulation Program") that is being implemented by Kern Delta and Valley for the purpose of enhancing the water supply available to both entities. It is intended that nothing in this Agreement or the Regulation Program is to (1) materially impair the integrity of existing and ongoing Kern Delta operations; (2) adversely impact either physically, operationally or economically the Kern Delta or its landowners; or (3) result in a net decrease in water supplies available for beneficial use within Kern Delta's boundaries specifically and the southern San Joaquin Valley generally. It is the intention of the Parties that, through provisions of this Agreement, actual or prospective adverse impacts of the Regulation Program will be avoided. The Regulation Program is intended to be operated in a manner to optimize available water supplies. It will utilize Kern Delta Facilities, as well as the Cross Valley Canal and the Intertie

Canal of the Arvin-Edison Transportation Facilities.

RECITALS

A. Kern Delta includes approximately 129,000 acres within its boundaries. Attached Exhibit B includes maps setting forth the boundaries (service area) of Kern Delta (Exhibit B-1); the Regulation Program Facilities (Exhibits B-2 and B-3). Approximately 87,000 acres have existing service connections to the Kern Delta distribution system (2,000 acres of which lie outside Kern Delta's boundaries), and the landowners within said surface water service area are in large part dependent on Kern Delta for a water supply. Additionally, Kern Delta's operations enhance groundwater conditions for the remaining approximately 34,000 acres within the District. To meet landowner demand, Kern Delta has, among other things, (i) contracted for a water supply with the Kern County Water Agency ("KCWA") providing for delivery to Kern Delta of 25,500 acre-feet of Table A Water from the California State Water Project ("Table A Water"); (2) entered into agreements with Buena Vista Water Storage District ("Buena Vista") providing for the exchange of Kern Delta's Table A Water for a like amount of Buena Vista's Kern River water; (3) acquired various Kern River water rights historically utilized to serve lands within and without Kern Delta's boundaries ("Kern River Entitlement"); and (4) entered into agreements with The Metropolitan Water District of Southern California ("Metropolitan") providing for the regulation of Metropolitan's water in the groundwater basin underlying Kern Delta. At times, Kern Delta has water available from its Table A Water, its Kern River Entitlement, or other sources, which could be better regulated through additional facilities constructed within Kern Delta and, in consideration of the benefits to be derived through this Agreement, Kern Delta is willing to regulate for Valley other water provided by Valley.

B. Valley is a public agency formed under the Municipal Water District Act of 1911. Valley provides imported supplies for water agencies to supplement local municipal water supplies within service area located in San Bernardino and Riverside Counties. Valley obtains its water supplies from the State Water Project, and other sources. Valley seeks to augment its dry year water supplies by arranging for delivery to and banking of water within Kern Delta and the extraction and delivery of banked water to Valley during periods of insufficient supply from available sources.

C. Valley and Kern Delta find that it will be mutually advantageous to enter into the Regulation Program as provided in this Agreement, whereby Kern Delta will regulate water on Valley's behalf and deliver that water to Valley upon request. The regulated water generally will be banked in the Kern Delta Basin and, upon demand of Valley; such water will be delivered to Valley through either an existing intertie into the California Aqueduct or through an exchange for water in the California Aqueduct, or both.

D. The Regulation Program will provide for usage by Valley of existing Kern Delta Facilities and construction and operation, for Valley usage, of Kern Delta Regulation Program Facilities, as well as Valley's usage of certain of Arvin-Edison Transportation Facilities and Cross Valley Canal. This Regulation Program is intended to provide a minimum recharge and return capability of 5,000 acre-feet annually.

E. This Agreement, through regulation and conservation of water supplies, is intended to (1) provide Valley with additional supplies of water and (ii) consistent with providing benefit to Valley also provide Kern Delta with access to new facilities, improved reliability of supplies and improve Kern Delta's ability to enhance groundwater conditions.

F. Consistent with the California Environmental Quality Act ("CEQA"), Kern Delta,

acting as lead agency, has completed an Environmental Impact Report concerning the Regulation Program. Kern Delta's Board of Directors, on November 12, 2002, considered, approved and certified the Final Environmental Impact Report ("FEIR"), as being in compliance with CEQA, and Valley's Board of Directors, acting as a responsible agency, on October 4, 2011,considered and approved a Notice of Exemption for the activities contemplated under this Agreement. A Notice of Determination to proceed with the Regulation Program was adopted by Kern Delta on November 12, 2002. In August 2011 Kern Delta prepared an addendum to the aforementioned EIR; this action is consistent with Kern Delta's 2002 Environmental Impact Report, which addresses the use of Kern Delta's existing and new recharge and conveyance facilities to enhance Kern Delta surface and groundwater supplies, (Exhibit E, Addendum to the FEIR).

G. The parties have relied upon various studies to make the following assumption upon which this Agreement is based; that, with existing facilities and wells along with the new facilities contemplated under this Agreement for the operation of the Regulation Program, it will be possible to regulate sufficient water in, and return sufficient water from, the groundwater basin for both Kern Delta's Normal and Customary Uses and Regulation Program purposes.

ARTICLE 1. DEFINITIONS

As used in this Agreement, each of the following terms shall have the respective meaning given to it in this Article 1 unless expressly stated to the contrary where such term is used.

1.1 "Account" means an account maintained by Kern Delta for the benefit of Valley pursuant to this Agreement in which Regulated Water, which is Delivered Water less losses deducted in accordance with Article 3 (Operational Losses), is credited upon delivery to the Point of Delivery to Kern Delta and is debited upon delivery to the Point of Delivery to Valley.

1.2 **"Account Balance"** means the difference between the credits and debits in the Account.

1.3 **"Agreement"** means, as of any particular time, this Agreement for a Water Management Program, as amended or supplemented by the Parties through that time.

1.4 **"Arvin-Edison Intake Canal"** means the Arvin-Edison Intake Canal owned and operated by the Arvin-Edison Water Storage District to the full extent of the capacity rights provided for in the Arvin-Edison MOU.

1.5 **"Arvin-Edison MOU"** means the agreement among Kern Delta with Arvin-Edison Water Storage District to use all or a portion of Arvin-Edison Transportation Facilities.

1.6 **"Arvin-Edison Transportation Facilities"** means Arvin-Edison Intake Canal, Forest Frick Pumping Plant, and all appurtenant facilities and structures as specified in the Arvin-Edison MOU.

1.7 **"Cross Valley Canal"** means the Cross Valley Canal owned and operated by the Kern County Water Agency to the full extent of Kern Delta's designated capacity (i.e., not including unused capacity of other participants) in the enlarged Cross Valley Canal as provided in the Cross Valley Canal Participation Agreement.

1.8 **"Cross Valley Canal Participation Agreement"** has the meaning provided for in this agreement, Recitals Section D.

1.9 **"Delivered Water"** means water which Valley makes available to Kern Delta at the Point of Delivery to Kern Delta pursuant to this Agreement.

1.10 **"Delivery Canal"** means (i) the Cross Valley Canal; and (ii) all interconnecting facilities from the Cross Valley Canal used to transport water to Kern Delta's service areas.

1.11 **"DWR"** means the Department of Water Resources of the State of California.

1.12 **"Effective Date"** means the date set forth on the first line of this Agreement

1.13 **"Execution Date"** means the date set forth on the first line of this Agreement.

1.14 **"Financial Account"** means the Account provided for in Section 5.1 (Put Payments).

1.15 **"KCWA"** means the Kern County Water Agency.

1.16 **"Kern Delta Basin"** means that portion of the southern San Joaquin Valley groundwater basin underlying the lands within the boundaries of Kern Delta.

1.17 **"Kern Delta Facilities"** means Kern Delta Regulation Program Facilities.

1.18 **"Kern Delta Regulation Program Facilities"** means Kern Delta Regulation Program Facilities.

1.19 **"Normal and Customary Uses"** means (i) deliveries to meet historic demands, as existing prior to Execution Date, of water users within Kern Delta's surface water service areas as provided at Subsection 4.2.2 of Section 4.2 (Conditions On Return of Regulated Water), (ii) historic transfers (including exchanges) and transfers similar to the type historically existing prior to Execution Date, entered into by Kern Delta with other entities, and (iii) operational conditions and criteria which would exist and/or be employed with or without the Regulation Program (for example spreading programs, energy load management, aquatic pest control and the like).

1.20 **"Participation Payment"** means the amount of money paid by Valley to Kern Delta for Delivered Water as full compensation for regulation program implementation costs (i.e., design, construction, inspection, administration and right of way) which amount is $40.00 per acre foot.

1.21 "Point of Delivery to Kern Delta" means the California Aqueduct turnout to the Cross Valley Canal; or other turnout mutually agreed upon by the parties such as the Arvin-Edison Transportation Facilities.

1.22 "Point of Delivery to Valley" means the California Aqueduct at/or between Reaches 12E and 14A, or any other point of delivery mutually agreed upon by the parties.

1.23 "Put Payment" means the Participation Payment and operation, maintenance and replacement costs determined on a per acre-foot basis, and energy cost in accordanee with Section 5.1 (Put Payments) hereof.

1.24 "Regulatcd Water" means Delivered Water less losses deducted in accordance with Article 3 (Operational Losses), credited pursuant to Section 2.5 (Regulation of Water).

1.25 "Regulation Program" means the water management program provided for in this Agreement.

1.26 "Take Payment" means the amount of money paid by Valley to Kern Delta for each acre foot of Regulated Water returned to Valley pursuant to this Agreement, which amount is specified in Section 5.2 (Take Payments) hereof.

1.27 "Year" means a calendar year commencing on January 1 and ending on December 31.

ARTICLE 2. REGULATION OF WATER

2.1 Source of Water. Valley shall provide Delivered Water at the Point of Delivery to Kern Delta for regulation under this Agreement. All such Delivered Water (exclusive of losses) shall be credited to Valley's Account as Regulated Water. Delivered Water shall be of at least as good water quality as otherwise available from the California Aqueduct or as Kern Delta

would otherwise be able to accept for its own use.

2.2 Program Level. If requested by Valley, Kern Delta shall accept from Valley at the Point of Delivery to Kern Delta such a quantity of Delivered Water as will result in crediting to the Account 26,700 acre-feet (after losses determined pursuant to Article 3) of Regulated Water.

2.3 Priorities and Schedule For Regulation.

2.3.1 Kern Delta shall have first priority to utilize Kern Delta Facilities for the purpose of meeting Normal and Customary Uses. Regulation for Valley shall be second priority to the first priority.

2.3.2 Regulation program operations shall not cause a net decrease in supplies available to Kern Delta for its own purposes.

2.4 Scheduling of Delivered Water. Valley shall submit a schedule to Kern Delta for delivery of Delivered Water. Kern Delta, in conformity with Valley's schedule, shall be responsible for scheduling delivery of Delivered Water with KCWA and shall coordinate with KCWA on its resulting request to DWR for scheduling of Delivered Water. Valley shall provide written notice to Kern Delta of its intent to provide water for regulation pursuant to Section 2.6 (Deliveries).

2.5 Regulation of Water.

2.5.1 Kern Delta shall take control and possession of Delivered Water at the Point of Delivery to Kern Delta and shall credit the Account in an amount equal to the water so delivered less the deduction for losses provided for in Article 3 (Operational Losses) with respect to such water.

2.5.2 At the time Kern Delta credits the Account, pursuant to Subsection 2.5.1

of this Section 2.5 (Regulation of Water), legal title to such water, together with the right to withdraw from the Kern Delta Basin an amount sufficient to return to Valley the Regulated Water, shall vest in Kern Delta. Upon crediting Valley's Account, Kern Delta shall convey and cause to be regulated the water so credited. Kern Delta shall thereafter hold and return the Regulated Water as provided in Article 4 (Return of Water) of this Agreement.

2.5.3 Kern Delta shall accurately maintain the Account and prepare and maintain adequate supporting records. All records shall be subject to audit, review and approval by Valley at Valley's exercise upon reasonable notification to Kern Delta.

2.5.4 Valley acknowledges that Regulated Water may be commingled with other water. At all times during the term of this Agreement, there shall be in the Kern Delta Basin an amount at least equal to the amount of the Account Balance, which shall be deemed to be Regulated Water. Kern Delta shall be deemed to remove Regulated Water from storage only as and when requested by Valley pursuant to the terms of this Agreement, and any other removal of water by Kern Delta from the Kern Delta Basin shall be deemed to be the removal of water that is not Regulated Water.

2.6 Deliveries. Valley shall not be obligated to provide Delivered Water; but shall nevertheless use reasonable efforts to provide quantities of Delivered Water which, after losses pursuant to Article 3 (Operational Losses), shall result in Kern Delta crediting the minimum amounts of Regulated Water specified in Section 5.1 (Put Payments).

ARTICLE 3. OPERATIONAL LOSSES

Transportation losses, evaporation, metering discrepancies and any other losses of water, for purposes of this Agreement are collectively fixed to be eleven percent (11%) of the amount

of Delivered Water provided for the Regulation Program as measured at the Point of Delivery to Kern Delta. These losses are subject to modification in the future with the concurrence of both Parties. Any modifications shall only apply to deliveries made after the date of the modification and Account Balance shall not be adjusted as to previous Delivered Water and Regulated Water.

ARTICLE 4. RETURN OF WATER

4.1 Methods of Return of Regulated Water.

4.1.1 Kern Delta shall only be obligated to return Regulated Water so long as the return does not cause the Account Balance to be less than zero.

4.1.2 Upon request by Valley, Kern Delta shall deliver Regulated Water to Valley at the Point of Delivery to Valley by any one or more of the following methods: (i) an exchange of Regulated Water for SWP water in the California Aqueduct; (ii) an exchange of Regulated Water for other surface supplies, or with Valley's consent, groundwater deliverable to and into the California Aqueduct; (iii) the recovery of Regulated Water and delivery thereof to and into the California Aqueduct via existing or new Kern Delta facilities; or (iv) any other means mutually acceptable to the Parties.

4.1.3 In utilizing the methods specified in Subsection 4.1.2(ii) and (iv) of Section 4.1 (Methods of Return of Regulated Water), Kern Delta may propose to exchange Valley's Regulated Water for an equal amount of water from other sources which Kern Delta elects to make available in the California Aqueduct. Kern Delta will be deemed to have affected such an exchange by delivering such water to Valley at the Point of Delivery to Valley.

4.1.4 Kern Delta, upon request of Valley, and subject to the conditions at Sections 4.2 (Conditions On Return of Regulated Water) through 4.4 (Water Quality), shall

return up to 5,000 acre-feet of Regulated Water per year, subject to Section 4.2.3.

4.2 Conditions on Return of Regulated Water. The return of Regulated Water by Kern Delta to Valley shall be subject to the following terms and conditions:

4.2.1 Except as otherwise provided for in Section 8.1 (Regulation Program), for each acre-foot of Regulated Water held by Kern Delta for Valley, Kern Delta shall ultimately return one acre-foot of water to Valley.

4.2.2 Return of Regulated Water by Kern Delta shall not interfere with Normal and Customary Uses by Kern Delta of its available water supplies. Kern Delta may modify from time to time its service area. Any such modifications shall not interfere with Kern Delta's ability to deliver Regulated Water to Valley unless consented to in writing by Valley.

4.2.3 Notwithstanding any other provision of this Agreement, Kern Delta may temporarily reduce or terminate groundwater pumping for the purpose of returning Regulated Water to Valley to (i) ensure that the groundwater basin underlying Kern Delta is protected (to the maximum extent practicable), (ii) ensure that Valley's Account Balance does not become negative, (iii) ensure that the project facilities are physically capable of returning banked water either through exchange or directly, to the California Aqueduct, and (iv) protect Kern Delta's groundwater basin in regards to an extended drought. However, such reduction or termination shall only be temporary and Kern Delta shall, with Valley's approval, adjust the scheduling of groundwater pumping to mitigate reductions in return of Regulated Water and to the extent practical, in a manner that does not cause additional unreimbursed costs to Kern Delta, Kern Delta shall take measures to change the timing and location of pumping to avoid reduction in or termination of the return of Regulated Water or return other available supplies.

4.2.4 The Regulation Program shall not adversely affect Kern Delta's existing

exchanges with other parties.

4.3 Annual Scheduling of Regulated Water. Valley shall notify Kern Delta of its intent to take delivery of Regulated Water at a Point of Delivery to Valley as early in the Year as possible, but no later than March 15 of the same Year. If such notification is provided after March 15 Kern Delta shall, in good faith, endeavor to comply with the notice to the maximum extent feasible. Kern Delta shall be responsible for all necessary approvals to return the Regulated Water to the Point of Delivery to Valley. Valley shall be responsible for any necessary approvals and costs once the Regulated Water has been returned to the Point of Delivery to Valley, provided that Kern Delta shall cooperate in obtaining such approvals.

4.4 Water Quality.

4.4.1 Based on available data, the parties have concluded that Kern Delta currently can supply Regulated Water at the California Aqueduct which meets existing Safe Drinking Water Act primary and secondary standards. (The foregoing is only a reference to an existing standard and shall not be interpreted as causing Kern Delta to become subject to the Safe Drinking Water Act.) Subject only to Kern Delta obligations under contracts or agreements existing as of Execution Date, Kern Delta shall take no direct action that would knowingly cause the quality of recovered groundwater returned as Regulated Water to not meet the existing or reasonably predictable future Safe Drinking Water primary and secondary standards. Should Kern Delta knowingly take such impermissible direct action which causes the quality of Regulated Water delivered into the California Aqueduct to not meet existing or reasonably predictable future Safe Drinking Water Act primary and secondary standards, Kern Delta shall be responsible for taking additional steps, at Kern Delta's expense, to ensure that such water meets such standards. The preceding sentence shall not apply to delivery of water under Kern

Delta's Normal and Customary Uses or water quality degraded as a result of operating under this Program. In the event that future water quality standards change, or the quality of groundwater from Kern Delta wells or surface water is such that Kern Delta cannot meet acceptable standards for direct pumpback of Regulated Water into the California Aqueduct, Regulated Water shall be returned to Valley by alternative methods satisfactory to Valley. Such alternative methods may include, but are not necessarily limited to: purchases, exchanges with others, and/or by improving Regulated Water quality to acceptable standards for direct pumpback, with the additional costs of any such methods being paid by Valley. Kern Delta's operations and financial situation shall not be adversely impacted as a result of these alternative methods.

4.4.2 Without limiting the foregoing, Kern Delta shall rotate pumping if and to the extent necessary to maximize Regulated Water quality and to use the best quality wells available, to the greatest extent practicable, for Regulated Water return purposes.

ARTICLE 5. COMPENSATION

5.1 Put Payments. Valley shall pay Kern Delta for each acre foot of Delivered Water a Put Payment which shall consist of; (i) a Participation Payment, plus (ii) an amount equal to actual costs per acre foot of operation, maintenance and replacement of Kern Delta Facilities used to regulate Delivered Water determined in accordance with Section 5.5 (OM&R Fees); plus (iii) an amount sufficient to pay all energy costs associated with the delivery, distribution, and recharge of each acre foot of Delivered Water determined in accordance with Section 5.4 (Power & Energy Costs).

5.2 Take Payments. For each acre foot of Regulated Water returned by Kern Delta to Valley, whether by recovery from the Kern Delta Basin or by exchange, Valley shall pay to

Kern Delta a Take Payment equal to the sum of the following components: (i) $47.00 adjusted pursuant to Subsection 5.3 (Adjustment of Rates) from the Effective Date; plus (ii) an amount equal to actual costs per acre foot of operation, maintenance, repair and replacement of Kern Delta Facilities used to provide Regulated Water to Valley calculated as set forth in Section 5.5 (OM&R Fees) below; plus (iii) an amount sufficient to pay all energy costs associated with the delivery of each acre foot of Regulated Water to Valley calculated as set forth in Section 5.4 (Power & Energy Costs) below.

5.3 Adjustment of Rates. The amount payable for a calendar year under Section 5.1 and Section 5.2 shall be adjusted commencing December 1 of each year commencing 2011 for the following year by the fraction of the numerator of which is the Consumer Price Index, All Urban Consumers, All Items Index, Western Cities with populations of 50,000 to 330,000 (the "CPI") for December of the Year immediately preceding the Year with respect to which the adjusted amount is being determined and the denominator of which shall be the CPI for 2010 (based on the 1982-84 index).

5.4 Power & Energy Costs.

5.4.1 The Put Payment component as specified in Section 5.1 to convey Delivered Water from Kern Delta's Point of Delivery to Spreading Facilities or in lieu delivery points shall be an amount sufficient to pay all energy costs associated with the delivery, distribution, and recharge of each acre foot of Delivered Water. Take Payment component specified in Subsection 5.2 shall be determined by calculating the average unit power and energy costs to pump Regulated Water from the Kern Delta Basin for either direct delivery to the California Aqueduct or for entitlement exchange, and to convey Regulated Water through the distribution system and to deliver such water into the California Aqueduct. Said power costs

shall be computed based on the amount of energy consumed to pump, withdraw, transport, and when applicable to convey to the California Aqueduct Valley's Regulated Water in a given Year multiplied by Kern Delta's average actual unit power cost for that period.

5.4.2 The initial calculation of energy costs shall be consistent with the calculation shown in the table included in Exhibit "B-1," (Methodology for Determining Energy Requirements) and incorporated herein by this reference. The Table 2 (Energy Analysis Results) in Exhibit B-1 may be revised from time to time by written consent of the Parties, which consent shall not be unreasonably withheld. The intent of Exhibit B-1 is to provide Kern Delta with sufficient revenue to recover the power costs incurred by Kern Delta for transportation, regulation and withdrawal of Delivered and Regulated Water and to allow Kern Delta flexibility to change the calculation based on experience and the changing electric utility industry and possible changes in its power supply and transmission contracts.

5.5 OM&R Fees. For each acre-foot of Delivered Water or Regulated Water, whether conveyed directly by Kern Delta or by exchange, Valley shall pay to Kern Delta the applicable operation, maintenance and replacement fee ("OM&R fee") based on the following rates which are to approximate Kern Delta's actual OM&R and administrative costs to perform the functions listed. The methodology for determining such costs is included in Exhibit "B-2" (Methodology for Determining O&M Costs and Replacement Cost) attached hereto and incorporated herein by this reference.

5.5.1 Spreading (Either direct recharge or in-lieu or exchange) OM&R Fee of $3.52 per acre-foot of Delivered Water regulated for Valley.

5.5.2 Extraction (Either direct pumping or in-lieu or exchange) OM&R Fee of $8.20 per acre-foot of Regulated Water delivered to Valley upon return of Regulated Water.

5.5.3 Conveyance (Either directly conveyed or exchange) OM&R Fee of $19.88 per acre-foot of Delivered Water (upon delivery into storage), and $12.88 per acre-foot of Regulated Water (upon return of Regulated Water).

5.5.4 Commencing December of the first full year following Execution Date, each OM&R Fee provided for in this Section 5.5 (OM&R Fees) shall be adjusted for the following year by the fraction of the numerator of which is the Consumer Price Index, All Urban Consumers, All Items Index, Western Cities with populations of 50,000 to 330,000 (the "CPI") for December of the Year immediately preceding the Year with respect to which the adjusted amount is being determined and the denominator of which shall be the CPI for 2010 (based on the 1982-84 index). In lieu of the aforesaid adjustment for each of the sixth and subsequent fifth full years ("Methodology Adjustment Years") following Execution Date, each OM&R Fee provided for in this Section 5.5 (OM&R Fees) shall be subject to the Methodology Adjustment, which shall utilize the applicable methodology provided for in Exhibit B-2 (Methodology for Determining O&M Costs and Replacement Costs). For purposes of calculating adjustments in years between Methodology Adjustment Years, the OM&R Fee determined for the previous Methodology Adjustment Year shall be utilized for adjustments until the next succeeding Methodology Adjustment Year.

5.6 State Project Costs. For all Regulated Water returned by Kern Delta pursuant to Subsection 4.1.2 of Section 4.1 (Methods of Return of Regulated Water), Valley shall pay applicable State Water Project costs beyond the Point of Delivery to Valley.

5.7 Payment Schedule. For payment obligations incurred pursuant to Participation Payments; Sections 5.1 (Put Payments); 5.2 (Take Payments); 5.4 (Power & Energy Costs); and 5.5 (OM&R Fees), Kern Delta may only bill Valley for water previously credited or debited to

Account pursuant to this Agreement. In all events, Kern Delta may only bill Valley, no more frequently than monthly for payments under this Agreement which payments shall be due Kern Delta and shall become delinquent thirty (30) days after Valley receives the invoice under the terms of this Agreement. Data supporting the amounts invoiced shall be provided upon the request of Valley. Kern Delta shall correct any erroneous billing promptly upon discovery of the error. If Valley has been underbilled, payment of the underbilled amount, together with interest thereon at the average investment yield of Valley's investments as reported monthly by Valley's Treasurer, shall be due and become delinquent thirty (30) days after Valley receives the corrective invoice and data justifying the change. Correction of overpayments by Valley shall become delinquent unless refunded by Kern Delta to Valley within forty-five days of discovery by either Valley or Kern Delta, together with interest thereon computed from the date the overpayment was made at the average investment yield of Valley's investments as reported monthly by Valley's Treasurer.

5.8 Delinquencies. In addition to other amounts payable, delinquencies shall bear interest at the rate of one percent (1%) per month.

ARTICLE 6. DIVISION OF RISK RESPONSIBILITIES

Kern Delta and Valley agree to cooperate, in reducing, to the greatest extent practicable, the risk from claims arising against any of the Parties from implementation of this Agreement. In the event of claims by third parties relating to this Agreement, the responsibilities of Kern Delta, and Valley shall be divided as follows:

6.1 Kern Delta Responsibilities. Kern Delta shall defend, indemnify and hold harmless Valley and its directors, officers, agents, employees and volunteers against any and all

losses, claims, demands and causes of action (herein collectively referred to as "claims") and shall assume responsibility for payment of any settlements, judgments, costs and attorneys' fees arising from claims concerning the following:

(a) Control, carriage, transportation, handling, use, disposal, or distribution of Delivered, Regulated or Transported Water from the Point of Delivery to Kern Delta and to the Point of Delivery to Valley;

(b) Any contest or dispute by any landowner or water user within the service area of, or otherwise served by, Kern Delta concerning the allocation of benefits among or the assessment of charges to Kern Delta landowners or water users;

(c) Construction, repair, modification, or replacement of any Regulation Program Facilities;

(d) Operation of the Regulation Program or Kern Delta Facilities or the actions of Kern Delta's officers, employees or agents; and

(e) Any other activities under the exclusive control of Kern Delta. If Valley is named in any such action, it may submit its defense to Kern Delta, which shall bear the full cost of defense, except to the extent that Valley utilizes its own counsel for such defense. Notwithstanding the foregoing, the responsibility for any claims challenging the validity, underlying authority or enforceability of the Regulation Program under this Agreement shall be as provided at Section 6.3 (Other Claims). Valley shall not be entitled to any indemnification from Kern Delta except as set forth in this Section 6.1 (Kern Delta Responsibilities).

6.2 Valley Responsibilities. Valley shall defend, indemnify and hold harmless Kern Delta and its respective directors, officers, agents, employees and volunteers, against any and all claims and shall assume responsibility for payment of any settlements, judgments, costs or

attorneys' fees arising from claims concerning the following:

(a) Control, transportation, handling, use, disposal or distribution of Delivered Water to the Point of Delivery to Kern Delta and Regulated Water from the Point of Delivery to Valley;

(b) Any claim by a landowner, resident, public agency or other entity within the service area of, or otherwise served by, Valley challenging the Regulation Program or this Agreement directly or indirectly;

(c) Construction, repair, modification or replacement of any of the facilities of Valley, or the State Water Project;

(d) Operation of the facilities of or the actions of the officers, employees or agents of Valley; and

(e) Any other activities under the exclusive control of Valley.

If Kern Delta is named in any such action, it may submit its defense to Valley involved, in which event Valley shall bear the full cost of defense, except to the extent Kern Delta utilizes its own counsel for such defense. Notwithstanding the foregoing, the responsibility for any claims challenging the validity, underlying authority or enforceability of the Program under this Agreement shall be as provided at Section 6.3 (Other Claims). Kern Delta shall not be entitled to any indemnification from Valley except as set forth in this Section 6.2 (Valley Responsibilities).

6.3 Other Claims. As for any claims by a third party with respect to the Regulation Program which are not otherwise provided for at Sections 6.1 (Kern Delta Responsibilities) or 6.2 (Valley Responsibilities), including any claims challenging the underlying authority for or the validity or enforceability of the Regulation Program under this Agreement, Valley shall be responsible for payment of any settlements it has approved or any judgments with respect to such claims. If Kern Delta is named in any action with respect to such a claim, it may submit its

defense to Valley and Valley shall bear the full cost of defense, except to the extent Kern Delta utilizes its own counsel for such defense. At the request of Valley, Kern Delta shall join in the defense of any claim which is not adverse to Kern Delta's water supply or financial interests, in which case Valley shall reimburse Kern Delta for all of its costs of defense. However, with respect to claims in which one or more of the plaintiffs resides or does business in Kern County challenging the recovery of groundwater under this Agreement, Valley may demand that Kern Delta join in the defense of claims. In such case, Kern Delta must comply with any such demand, the Parties shall jointly manage the litigation, and Kern Delta and Valley shall each pay one-half of the defense costs. In other such cases, Valley shall reimburse Kern Delta for all of its costs of defense.

6.4 Multiple Claims. In the event that payments are made in settlement of a claim, in satisfaction of a judgment or for defense costs where the claim arises from issues applying to both Kern Delta and Valley, payments shall be divided in proportion to the relative liability of each arising from the common claim. If the Parties cannot agree on the proportion, then the share to be paid by each of Kern Delta and Valley shall be submitted to arbitration as provided at Article 7 hereof.

ARTICLE 7. DISPUTE RESOLUTION

7.1 Informal Mediation. In the event of a dispute regarding the interpretation or implementation of this Agreement, or if the parties are unable to agree upon a matter as to which their agreement is provided for hereunder, the Parties will endeavor to resolve the dispute by using the services of a mutually acceptable consultant. The fees and expenses of the consultant shall be shared equally by the Parties.

7.2 Arbitration.

7.2.1 If a consultant cannot be agreed upon, or if the consultant's recommendations are not acceptable to the Parties, and unless the Parties otherwise agree, the matter shall be resolved by arbitration as provided in this Article 7 and in the California Arbitration Act (Part 3 [commencing with § 1280], Tit. 9, Calif. Code Civ. Proc.), including Section 1283.05. The Parties agree to be bound by the majority decision of a three-member panel to be selected as follows: (i) one member shall be selected by Valley; (ii) one member shall be selected by Kern Delta; and (iii) the third member shall be selected by the other two (2) members. If the two (2) members selected by Valley and Kern Delta are unable to agree on the selection of a third member, either Party may petition a court to appoint the third member pursuant to Code of Civil Procedure Section 1281.6. Each Party shall be responsible for any fees and expenses of the member of the panel appointed by that Party, and the fees and expenses of the third member of the panel shall be shared fifty percent (50%) by Kern Delta and fifty percent (50%) by Valley.

7.2.2 If a Party asserts that another Party has breached obligations under this Agreement, it may request that the arbitration panel order the other Party to comply with this Agreement. Upon the panel finding that a Party has in fact breached this Agreement, the panel shall order compliance. The panel may order any other equitable relief permitted by California law, including declaratory or injunctive relief, applicable to the matter before the panel for resolution. If termination is sought by a party pursuant to the terms hereof, the panel may determine the issues of whether a default has occurred or other condition precedent to the termination alleged has been satisfied and, if so, may issue orders implementing that termination. The orders of the panel shall be judicially enforceable. The panel may order that the effective

date of its order be the date of the breach, if appropriate. If Valley has suspended payments as provided in Subsection 9.1.2 of Section 9.1 (Remedies in the Event of Kern Delta's Willful Failure to Perform), it shall reimburse Kern Delta for any monies withheld and then due to Kern Delta as soon as Kern Delta again fully complies with this Agreement unless otherwise ordered by the panel. The panel may not order any damages (including consequential or punitive damages) beyond those provided for or permitted under this Agreement.

ARTICLE 8 TERM OF AGREEMENT

8.1 Regulation Program. Unless the Regulation Program provisions of this Agreement are earlier terminated pursuant to Subsection 9.1.3 of Section 9.1 (Remedies in the Event of Kern Delta's Willful Failure to Perform), Section 9.2 (Remedies in the Event of Valley's Voluntary Failure to Perform), Section 9.3 (Remedies in Event of Failure of Certain Other Remedies), or Section 10.2 (Involuntary Termination), Valley's right to provide Delivered Water pursuant to Section 2.1 (Source of Water) and to receive Regulated Water pursuant to Article 4 (Return of Water) shall terminate at the end of 2035. At the end of 2035, the entire Account Balance shall be debited and the remaining Regulated Water, if any, shall be available for Kern Delta to utilize for its own purposes.

8.2 Agreement Termination. This Agreement shall terminate at the time of termination of both the Regulation Program unless extended pursuant to Section 8.3 (Pending and Late Arising Claims).

8.3 Pending and Late Arising Claims. If a claim arising under or with respect to one or more terms of this Agreement has not been resolved when such term terminates, or if such a claim is brought after this Agreement has terminated but within the period of time for bringing

such a claim under California law ("Late Arising Claim"), the provisions of this Agreement shall continue in full force and effect for such additional period of time as is necessary to resolve such claims and to satisfy the rights and obligations of the Parties hereto with respect thereto.

8.4 Renewals of Agreement. This Agreement may be renewed by mutual agreement of the Parties, which renewal shall, unless otherwise agreed, effect a continuation of both parties' rights and duties under this Agreement.

ARTICLE 9. REMEDIES

9.1 Remedies in the Event of Kern Delta's Willful Failure to Perform.

9.1.1 If Valley alleges that Kern Delta has not substantially performed according to the terms of this Agreement or has willfully failed to perform this Agreement by causing (or, if within Kern Delta's jurisdiction, permitting) other entities or persons to interfere with Regulation Program operation, or by failing to accept or return water as and when required by this Agreement, or if Kern Delta has otherwise breached its obligations under this Agreement and notice has been provided to Kern Delta pursuant to Section 11.4 (Waiver/Cure of Defaults) and Kern Delta has failed to cure the alleged breach within the time provided in Section 11.4 (Waiver/Cure of Defaults), Valley may, at any time thereafter while the default is continuing, advise Kern Delta of the remedy or remedies provided in Article 7 (Dispute Resolution), and Subsections 9.1.2 and 9.1.3 below which Valley intends to pursue with respect to such default. Kern Delta may challenge at any time, through Article 7 (Dispute Resolution), whether in fact there has been a breach of or default under this Agreement by Kern Delta.

9.1.2 In the event of an alleged breach as to which Valley has given notice to Kern Delta pursuant to Section 9.1.1, Valley may elect to suspend any payment obligations it

may have under Article 5 (Compensation) of this Agreement until Kern Delta complies with the terms of this Agreement and cures such breach or default, or is determined, pursuant to Article 7 (Dispute Resolution), not to have violated the Agreement. Notwithstanding such suspension of Valley's payment obligations, this Agreement shall remain in effect unless and until Valley elects to terminate the Agreement under Section 9.1.3 in which case termination shall occur in accordance with and as provided in such provision. Notwithstanding an election by Valley under this Section 9.1.2 to suspend payment obligations, Valley or Kern Delta may thereafter also seek relief under Article 7 (Dispute Resolution).

9.1.3 If Kern Delta willfully fails to recharge or return water for or to Valley under circumstances where such performance or nonperformance is not excused by the terms of this Agreement and Valley elects to terminate this Agreement, Kern Delta shall purchase the amount of Valley's Regulated Water in its Account Balance for an amount equal to Valley's previous payments with respect to such Regulated Water, all adjusted as provided in Section 5.5.2, all payable within one (1) year of said election by Valley to terminate. Once such payment has been fully made, this Agreement shall be fully terminated except for Preamble; Recitals; Articles 1 (Definitions); 7 (Dispute Resolution); 8 (Term of Agreement); 9 (Remedies); and 11 (Miscellaneous Provisions). Upon payment in full by Kern Delta as provided above, Valley's beneficial interest in the amount of Regulated Water in Valley's Account Balance shall vest in Kern Delta free of obligations and Kern Delta shall be entitled to produce and use such water for its own account.

9.2 Remedies in the Event of Valley's Voluntary Failure to Perform. If Valley has not substantially performed according to the terms of this Agreement, and notice has been provided to Valley pursuant to Section 11.4 (Waiver/Cure of Defaults) and Valley has failed to

cure the alleged breach within the time provided in Section 11.4 (Waiver/Cure of Defaults), Kern Delta may at its election, at any time thereafter while the default is continuing, either (i) suspend further performance and thereafter seek relief under Article 7 (Dispute Resolution), recommencing performance once Valley complies with the Agreement, or (ii) terminate this Agreement. If Kern Delta elects to terminate this Agreement, any Regulated Water remaining in Valley's Account shall be transferred to Kern Delta at no cost to Kern Delta. In such event, Kern Delta shall have no further responsibility for repayment of funds advanced by Valley under Article 5 (Compensation). Valley may challenge at any time, through Article 8 (Dispute Resolution), whether in fact there has been a breach of this Agreement by Valley.

9.3 Remedies in Event of Failure of Certain Other Remedies. If: (i) Kern Delta has breached or defaulted in the performance of its obligations under this Agreement, and (ii) Valley has given notice of the breach or default pursuant to Subsection 9.1.1 of Section 9.1 (Remedies in the Event of Kern Delta's Willful Failure to Perform), and (iii) Kern Delta has failed to cure that breach or default within thirty (30) days as required by Section 11.4 (Waiver/Cure of Defaults), and (iv) Valley has elected a remedy for that breach or default pursuant to Subsection 9.1.1 of Section 9.1 (Remedies in the Event of Kern Delta's Willful Failure to Perform), and (v) Kern Delta has agreed to such remedy or, if Kern Delta has not so agreed, Valley has obtained a judgment or court order against Kern Delta (whether based on an order of an arbitration panel under Article 7 (Dispute Resolution) or otherwise) which judgment or court order Kern Delta has failed or refused to perform, *then* Valley may notify Kern Delta that Valley is entitled to and intends to exercise its right to appointment of a successor in place of Kern Delta and, thereafter, Valley may apply to a court of competent jurisdiction for such appointment of a successor who shall be charged with performing the duties pursuant to the

terms of this Agreement. The successor, when appointed, shall be entitled to exercise any and all rights theretofore held by Kern Delta for Valley. Upon the later of (i) receipt by Valley at the California Aqueduct of water in an amount equal to Valley's Account Balance pursuant to the exercise by such successor of its rights, or (ii) expiration of the term specified in Section 8 (Term of Agreement), this Agreement shall be fully terminated unless extended pursuant to Section 8.4 (Pending and Late Arising Claims).

ARTICLE 10. EARLY TERMINATION

10.1 Resignation of Kern Delta. Kern Delta may not resign its duties and obligations under this Agreement for the term of this Agreement except as permitted by Sections 9.2 (Remedies in the Event of Valley's Voluntary Failure to Perform) and 10.2 (Involuntary Termination), and any other attempt by Kern Delta to resign shall be deemed to be a breach of its obligations hereunder.

10.2 Involuntary Termination. Notwithstanding Article 9 (Remedies), in the event that Kern Delta is unable to perform its obligations under this Agreement for reasons beyond its control, the following shall apply ("reasons beyond its control" as used in this sentence shall not include any reasons caused by Kern Delta's breach of its obligations under this Agreement or other failure to comply with any of its legal obligations).

10.2.1 If such inability to perform relates to the Regulation Program, and that inability to perform includes the inability of Kern Delta to return Regulated Water which remains in the Valley Account Balance, Kern Delta shall purchase the Regulated Water which Kern Delta is unable to return for an amount equal to the costs which Kern Delta would have incurred to purchase such water under its contract with the KCWA in the Year such Regulated Water was

delivered to storage. Such payment by Kern Delta to Valley upon involuntary termination under this Section 9.2 (Remedies in the Event of Valley's Voluntary Failure to Perform) shall be financed over time upon terms mutually agreeable to Valley and Kern Delta. If Valley and Kern Delta are unable to agree on such terms in a reasonable period of time, they shall resolve their disagreement pursuant to Article 7 (Dispute Resolution). Once such payments have been fully made, this Agreement shall be fully terminated. If payment is made as provided above, the beneficial interest in the amount of Valley's Regulated Water in Valley's Account Balance which Kern Delta is unable to return shall vest in Kern Delta.

ARTICLE 11. MISCELLANEOUS PROVISIONS

11.1 Successors and Assigns. This Agreement shall bind and inure to the benefit of the successors and assigns of the Parties; provided, however, neither Party shall assign any of their rights or obligations under this Agreement without the prior written consent of the other. Nothing in this Agreement is intended to confer any right or remedy under this Agreement on any person other than the parties to this Agreement and their respective successors and permitted assigns, or to relieve or discharge any obligation or liability of any person to any party to this Agreement, or to give any person any right of subrogation or action over or against any party to this Agreement.

11.2 No Precedent. Kern Delta entering into this Agreement shall not create in Valley any rights beyond those expressly provided by this Agreement, nor shall it establish any precedent for extension or renewal of this Agreement beyond its term. Furthermore, Valley shall not make any claim to continued use of water provided under this Agreement, beyond that expressly provided under this Agreement, including, but not limited to, asserting any right

against Kern Delta to use of water beyond the term of this Agreement under the doctrine of intervening public use.

11.3 No Modification of Existing Contracts. This Agreement shall not be interpreted to modify the terms or conditions of either the water supply contracts between DWR and Valley or the water supply and related agreements between Kern Delta and other parties.

11.4 Waiver/Cure of Defaults. The failure of any Party to enforce against the other a provision of this Agreement shall not constitute a waiver of that Party's right to enforce such a provision at a later time. No Party shall be deemed to be in default of any provision of this Agreement unless the other Party has given written notice specifically stating the alleged default and the Party in default fails to cure the default within thirty (30) days of receipt of such written notice.

11.5 Construction of Agreement. The language in all parts of this Agreement shall be in all cases construed simply according to its fair meaning and not strictly for or against any of the parties hereto and Section 1654 of the Civil Code has no application to interpretation of this Agreement. Headings at the beginning of Sections, paragraphs and subparagraphs of this Agreement are solely for the convenience of the Parties, are not a part of this Agreement and shall not be used in construing it. The preamble, recitals and all exhibits and schedules to this Agreement are part of this Agreement and are incorporated herein by this reference. When required by the context: whenever the singular number is used in this Agreement, the same shall include the plural, and the plural shall include the singular; and the masculine gender shall include the feminine and neuter genders and vice versa. Unless otherwise required by the context (or otherwise provided herein): the words "herein," "hereof" and "hereunder" and similar words shall refer to the Agreement generally and not merely to the provision in which such term

is used; the word "person" shall include individual, partnership, corporation, limited liability company, business trust, joint stock company, trust, unincorporated association, joint venture, governmental authority and other entity of whatever nature; each of the words "Valley" and "Kern Delta" shall include the respective representatives, successors and permitted assigns, if any, of such person; the words "including," "include" or "includes" shall be interpreted in a non-exclusive manner as though the words "but [is] not limited to" or "but without limiting the generality of the foregoing" immediately followed the same; the word "month" shall mean calendar month; and the term "business day" shall mean any day other than a Saturday, Sunday or legal holiday. If the day on which performance of any act or the occurrence of any event hereunder is due is not a business day, the time when such performance or occurrence shall be due shall be the first business day occurring after the day on which performance or occurrence would otherwise be due hereunder. All times provided in this Agreement for the performance of any act will be strictly construed, time being of the essence of this Agreement.

11.6 Entire Agreement. This Agreement and other documents expressly referenced herein constitute the entire agreement between the Parties pertaining to the matters provided for herein and, except as herein provided, supersedes all prior and/or contemporaneous agreements and understanding, whether written or oral, pertaining between the Parties relating to the matters provided for herein. In the event of inconsistency between and among (i) other documents, (ii) Exhibits to this Agreement, and (iii) the remaining provisions of this Agreement, the remaining provisions of this Agreement shall control.

11.7 Severability. In the event that a court of competent jurisdiction or an arbitration panel as provided at Article 7 (Dispute Resolution) determines that a provision included in this Agreement is legally invalid or unenforceable and such decision becomes final, the Parties to this

Agreement shall use their best efforts to (i) within thirty (30) days of the date of such final decision identify by mutual agreement the provisions of this Agreement which must be revised, and (ii) within three (3) months thereafter promptly agree on the appropriate revision(s). The time periods specified above may be extended by mutual agreement of the Parties. Pending the completion of the actions designated above, to the extent it is reasonably practical and can be done without violating any applicable provisions of law, the provisions of this Agreement which were not found to be legally invalid or unenforceable in the final decision shall continue in effect. If the Parties cannot agree on appropriate revisions, this Agreement shall be involuntarily terminated in accordance with Section 9.2 (Remedies in the Event of Valley's Voluntary Failure to Perform).

11.8 Force Majeure. All obligations of the Parties other than monetary or payment obligations shall be suspended for so long as and to the extent the performance thereof is prevented, directly or indirectly, not to exceed one year, by earthquakes, fires, tornadoes, facility failures, floods, strikes, other casualties, acts of God, orders of court or governmental agencies having competent jurisdiction, or other events or causes beyond the control of the Parties. In no event shall any liability accrue against a Party, to its officers, agents or employees, for any damage arising out of or connected with a suspension of performance pursuant to this Section 11.8. All time limits to perform and the term of the Agreement shall be extended by period equivalent to the length of suspension. In event of such an occurrence of duration in excess of one year, Section 10.2 (Involuntary Termination) shall control, unless the Parties otherwise agree.

11.9 Notices. All notices, requests and demands hereunder ("Notices") shall be in writing and shall be deemed to have been duly given when delivered (or, if mailed, postage

prepaid, on the third business day after mailing, if that date is earlier than actual delivery). Notices shall be sent to a Party at the address of that Party set forth below or, if such Party has furnished notice of a change of that address as herein provided, to the address of that Party most recently so furnished. Notices for Kern Delta shall be sent to the Engineer Manager of Kern Delta at 501 Taft Highway, Bakersfield, CA 93307-6247. Notices for Valley shall be sent to the General Manager of Valley at 380 East Vanderbilt Way, San Bernardino 92408. Each Party hereto (a "Recipient") who receives from another Party hereto (a "Sender") by electronic facsimile transmission (telecopier) any writing which appears to be signed by that Sender is authorized to rely and act upon that writing in the same manner as if the original signed writing was in the possession of the Recipient upon oral confirmation of that Sender to the Recipient that the writing was signed by that Sender and is intended by that Sender to be relied upon by the Recipient. Each Party transmitting any writing to any other Party by electronic facsimile transmission agrees to forward immediately to that Recipient, by expedited means (for next day delivery, if possible), or by first class mail if the Recipient so agrees, the signed hard copy of that writing, unless the Recipient expressly agrees to some other disposition of the original by the Sender.

11.10 Regulatory Changes. It is recognized that changes in Kern Delta's actual costs of operating the Regulation Program or changes in other conditions affecting the Regulation Program may occur on or after the date this Agreement is executed as a result of enactments, amendments, changes in implementation or interpretation, or repeal of any federal or state law, rule, regulation or ordinance or changes in contract terms (each, a "Regulatory Change"). If either Party determines that a Regulatory Change has occurred that would result in a material change (upward or downward) in Kern Delta's costs or other conditions relating to regulating,

recovering or transporting water pursuant to the terms of this Agreement, which change is not reflected in the adjustments in the payments due from Valley to Kern Delta pursuant to Article 5 (Compensation) or other provision of this Agreement, such Party shall promptly inform the other Party of the nature and extent of such alleged Regulatory Change and of the reason why that party believes an adjustment pursuant to this Section 11.10 is warranted in the payments due from Valley to Kern Delta or in other terms or conditions. The Parties will thereupon attempt to reach an appropriate amendment of this Agreement in light of the Regulatory Change. If such agreement cannot be reached within forty-five (45) days after either Party has provided the required notice and information, the matter shall be resolved pursuant to Article 7 (Dispute Resolution), the qualified third party or arbitration panel being charged with determining (i) whether a Regulatory Change has occurred (if that is in dispute), (ii) the amount of change, if any, in Kern Delta's costs resulting from the Regulatory Change, and (iii) the manner in which the payments due from Valley to Kern Delta or other terms or conditions which should be modified are to be adjusted to fairly and equitably reflect that change in Kern Delta's costs or other terms and conditions (it being the intent of the Parties that no windfall or unwarranted compensation or benefit should result to any Party as a result of any adjustment made pursuant to this Section 11.10). Any adjustment to the payments due from Valley to Kern Delta or other terms and conditions made pursuant to this Section 11.10 shall be effective as of the first day such Regulatory Change affects Kern Delta operations hereunder unless the Parties otherwise agree and may be reconsidered thereafter at any time, at the request of any Party, if the adjustment is unjustly under-compensating or over-compensating any Party.

11.11 Further Assurances. Each Party hereto, upon the request of the other, agrees to perform such further acts and to execute and deliver such other documents as are reasonably necessary to carry out the provisions of this instrument.

11.12 Counterparts. This Agreement, and any document or instrument entered into, given or made pursuant to this Agreement or authorized hereby, and any amendment or supplement thereto may be executed in two or more counterparts, and by each party on a separate counterpart, each of which, when executed and delivered, shall be an original and all of which together shall constitute one instrument, with the same force and effect as though all signatures appeared on a single document. Any signature page of this Agreement or of such an amendment, supplement, document or instrument may be detached from any counterpart without impairing the legal effect of any signatures thereon, and may be attached to another counterpart identical in form thereto but having attached to it one or more additional signature pages. In proving this Agreement or any such amendment, supplement, document or instrument, it shall not be necessary to produce or account for more than one counterpart thereof signed by the party against whom enforcement is sought.

Executed the day and year first hereinabove written.

EXECUTIVE SUMMARY

PURPOSE

The purpose of this memorandum is to evaluate the energy requirements associated with the facilities required for the Kern Delta Water District Water (KDWD) Banking Program (Kern Delta Project). The estimated energy requirements associated with these facilities are based on Black & Veatch experience and record data from the operation of similar facilities by other local agencies. In addition to estimating the power requirements, a preliminary assessment of the existing local electrical distribution facilities ability to meet potential future operating demands are investigated.

BACKGROUND

As part of the Water Banking Program, five new pump stations (Kern Delta pump stations No.1 through 5) would be built along the new Kern Delta Canal to allow for conveyance of water between the Kern Water Bank Authority (KWBA) Canal and the Arvin-Edison Canal. The pumping plants would take water from a lower canal segment and lift it to the adjacent canal segment. During wet years, the proposed

Kern Delta canal system would allow for the diversion of water from the California Aqueduct to the Kern Delta agricultural canals and spreading basins.

An existing pump within the existing Arvin-Edison Forrest Frick Pump Station would also be used to meet irrigation demands in the eastern section of the Kern Delta service area through the in-lieu (pipeline) facilities. These facilities will allow the use of State Water Project (SWP) water.

The project would also include thirty-two groundwater wells to recover previously stored water in the groundwater basin. The extraction wells would be located near existing water conveyance facilities.

ENERGY ANALYSIS

The facilities requiring energy to operate the water-banking project include of five pumping stations along the proposed canal conveyance facility, thirty-two new groundwater wells which will be utilized to withdraw stored water supplies, and the existing Arvin-Edison Forrest Frick Pump Station will be used to provide SWP supplies to meet irrigation demands in lieu of current groundwater extraction operations. The canal pumping stations and groundwater extraction wells are planned as motor-operated pumps with electricity to be provided from the existing Pacific Gas and Electric Company (PG&E) facilities.

Energy Rate Schedules and Metering Requirements

Energy rate schedules have been obtained from PG&E for evaluation of the power and metering requirements relevant to the operation of the pumping stations and groundwater extraction wells. PG&E recommends using schedule AG-5B, "Large Time-of-Use Agricultural Power for the Water Banking facilities. Schedule AG-5B is used for customers with high annual operation (generally over 1,200 hours) who run 24 hours per day or can minimize electric use on sum weekdays between noon and 6 p.m.

Energy rates for this schedule vary by the summer or winter season and the time of day the energy is consumed. A seasonal demand charge and a maximum-peak-period demand charge, based on peak kW usage, is also exercised. In addition to these base charges, PG&E also has a flat surcharge rate of $0.02953/kWh in

accordance with the "Energy Procurement Surcharge Schedule (EPS)". This surcharge is applied after all other calculations are made and is applicable to all kW-hours consumed. Lastly, the customer's bill includes a customer charge, a meter charge, and a one-time installation and processing charge per meter.

A summary of the AG-5B / EPS rate schedule is provided in Table 1.

TABLE 1

PG&E "AG-5B/ EPS" RATE SCHEDULE

Charges	Summer Season (May – October)	Winter Season (November – April)
Energy Charge (per kWh per month)		
Peak (12 noon–6:00 p.m.) Mon.-Fri.*	$0.14294	-
Partial Peak (8:30 a.m.-12:00 p.m.) & (6:00 p.m.-9:30 p.m.) Mon.-Fri.*	-	$0.04661
Off-Peak	$0.04088	$0.03706
Demand Charges (per kW)		
Seasonal billing demand	$6.55	$4.40
Peak Period Demand	$2.70	-
Surcharges (per kWh)		
EPS Rate for AG-5B Schedule	$0.02953	$0.02953
Monthly Base Service Charges		
Customer Charge per meter	$16.00	$16.00
Meter Charge per month	$6.00	$6.00

* Except Holidays.

Energy Analysis Model Development and Methodology

A preliminary version of the energy model has been created in Microsoft Excel using a single workbook that incorporates several worksheets. The model estimates power requirements of the proposed Water Banking facilities based on user defined operating scenarios. The following input is required by the user to perform a simulation:

1. Number of pumps operating at the five existing canal pumping stations (1 or 2 pumps @ 100 cfs each).
2. Desired flowrate for the "in lieu" element of the program (typically 25 to 30 cfs).
3. Number of groundwater wells operating during withdraw operation in dry years (between 0 to 32 groundwater wells).

4. Define seasonal operating conditions for "storage" and "withdrawal" facilities (daily hours of operation).

The total dynamic lift of each groundwater well is estimated and assumed to be consistent for each well. Electrical horsepower is calculated from the total dynamic lift, flowrate, and the overall efficiency (pump and motor). Currently the overall efficiency is estimated and a single typical value is used. However, it is anticipated that record flow rates and power data will be available and the program will utilize specific efficiencies based on the record data.

The model estimates power requirements for each of the pumping facilities along the proposed canal conveyance facility. The output tabulates the daily, monthly, and yearly facility power requirements.

Model Assumptions

Currently, the following assumptions have been made for the pumping plant facilities:

1. Combined pump and motor efficiency is 75 percent for all pumps at all plants under all conditions.
2. Arvin-Edison Forrest Frick Pumping Station has an assumed 67 percent combined pump and motor efficiency.
3. Proposed canal pumping plants will deliver 100 cfs or 200 cfs. The model currently assumes that when a pump from a pumping station is taken off-line to accommodate decreased flows, a single pump is operating at all the other pumping stations.

The following assumptions have been made for the groundwater extraction wells:

1. Combined pump and motor efficiency is 75 percent for all groundwater pumps.
2. Since the design of the wells is at conceptual levels, the power supply requirements are calculated assuming a "typical" well, and then multiplied by the number of wells.
3. Due to the lack of specific detailed design, the length of well discharge pipeline is estimated in order to calculate losses for the "typical well".
4. Each of the wells will extract groundwater at a rate of 6.25 cfs.

5. Assume negligible groundwater level drop due to extraction.

Some of these assumptions will be modified or quantified after additional data is received.

Energy Analysis Results

Preliminary analysis has been completed assuming the facilities operate at 200 cfs, 24 hours per day, until 55,500 ac-ft is stored into the groundwater basin. The initial results are presented in the following table.

TABLE 2
ENERGY ANALYSIS RESULTS

	Storage Mode [1][2] 1 cycle = 64,750 Ac-Ft [3]	Withdrawal Mode [4] 1 cycle = 55,500 Ac-Ft
Summer Costs		
$/month	$108,000	$615,000
$/cycle	$648,000	$3,690,000
$/ac-ft	$7	$49
Winter Costs		
$/month	$82,500	$445,000
$/cycle	$495,000	$2,660,000
$ /ac-ft	$5	$35

(1) Assumes canal facilities operate 24 hours per day, 7 days per week for 20 weeks, totaling 55,500 Ac-Ft.
(2) Assumes In-Lieu facilities operate during off-peak hours, totaling 9,250 Ac-Ft.
(3) 50,000 Ac-Ft storage + 9,250 Ft In-Lieu
(4) Assumes groundwater facilities operate 24 hours per day, 7 days per week.

The initial analysis estimated the electrical costs associated with operating the water banking program facilities 24 hours per day, 7 days per week. As presented in Table 1, significant savings maybe realized if the facilities were operated in a manner that minimizes peak demand charges.

CONCEPTUAL ELECTRICAL ARRANGEMENT

Based on the electrical demands estimated in the energy evaluation, conceptual one-line diagrams have been prepared for the canal pumping facilities and the groundwater pumping facilities and are attached for reference. An order of magnitude cost estimate was prepared for the new electrical equipment required between the existing PG&E 12 kV distribution power line and the pumping equipment, totaling $80,000 per site. This cost is generally accurate for both the groundwater wells and the canal pumping stations.

Typically, PG&E will install and maintain this equipment and will recover the costs in the monthly billings. Alternatively, the KDWD can install and maintain the facilities between the main distribution power line and the pumping facilities and be eligible for a "voltage discount" within their rate. Upon preliminary investigation, it is recommended that KDWD have PG&E provide, install, and maintain these facilities.

CONCLUSION

A customized spreadsheet has been developed to estimate power requirements for the Kern Delta facilities. Currently, it is assumed that all facilities operate 24 hours per day seven days per week. However, significant savings may be realized if the facilities are operated to avoid peak demand periods. It is recommended that the model presented herein be used to evaluate the potential savings associated with minimizing peak demand charges.

EXECUTIVE SUMMARY

PURPOSE

The purpose of this memorandum is to evaluate the operations and maintenance (O&M) requirements associated with the Kern Delta Water District Water Banking Program components (Kern Delta Project). The recommended manufacturer O&M requirements and estimated replacement costs associated with operation of the major equipment components have been identified and tabulated. Actual maintenance history from similar facilities, and engineer's experience on similar projects were also utilized to define the O&M schedule for the facilities in the preferred project.

BACKGROUND

As part of the Water Banking Program, five new pump stations (Kern Delta pump stations No.1 through 5) would be built along the new Kern Delta Canal allowing conveyance of water between the Kern Water bank Authority (KWBA) Canal and the Arvin-Edison Canal. The pumping plants would take water from a lower canal segment and lift it to the adjacent canal segment. During wet years, the proposed Kern Delta

canal system would allow for the diversion of water from the California Aqueduct to the Kern Delta agricultural canals and spreading basins.
An existing pump within the existing Arvin-Edison Forrest Frick Pump Station would also be used to meet irrigation demands in the eastern section of the Kern Delta service area through the in-lieu (pipeline) facilities. These facilities will allow the use of SWP water "in-lieu" of local groundwater.

Lastly, the project includes 32 new groundwater wells to recover previously stored water in the groundwater basin. The extraction wells would be located near existing water conveyance facilities.

OPERATION AND MAINTENANCE INVESTIGATION

The water-banking project facilities that require O&M include the five pumping stations along a proposed canal conveyance facility, 32 new groundwater wells to withdraw stored supplies, and the existing pump within the Arvin-Edison Forrest Frick Pump Station.

A maintenance schedule for the preferred project components and a preliminary estimate for the corresponding O&M costs has been included. The schedule includes recommended procedures for operating the canal pump stations, groundwater pumps and motors, and the equipment within the Arvin-Edison Forrest Frick Pump Station. The procedures include placing the equipment in service and operating it under both normal and abnormal conditions.

Operation & Maintenance Schedule

The attached example O&M schedule is based on information and recommendations obtained from the equipment manufacturers, maintenance history from other agencies with similar equipment, and the engineer's experience on similar projects. The attached example schedule is intended to provide a general idea of the O&M procedures required for each of the major equipment components of the Water Banking Project. Prior to startup of these facilities, a more detailed O&M schedule should be developed based on specific manufacturer's manuals and shop drawing information.

Estimated O&M Costs

A preliminary estimate of the O&M costs associated with the recommended maintenance procedures for the proposed Water Banking equipment is summarized in

Table 1.

Table 1
Annual Operation & Maintenance Costs
(2002 Dollars)

Description	Cost
STORAGE MODE	
Annual Power Costs	$1,143,000
Labor (Personnel)	$435,000
Annual Maintenance Costs[1]	$54,000
Total Annual O&M Cost	**$1,632,000**
5 YR Minor overhaul of canal pumps	$25,000
20 YR Major overhaul of canal pumps	$57,000
50 YR Major canal / spreading basin equipment replacement	$2,400,000
Present Worth of Maintenance Costs [4]	**$716,817**
Cost per AC-FT of Stored Water	**$14**
WITHDRAWAL MODE	
Annual Power Costs	$6,350,000
Labor (Personnel)	$492,000
Annual Maintenance Costs[2]	$67,000
Total Annual O&M Cost	**$6,909,000**
5 YR Minor Overhaul of GW Pumps	$55,000
20 YR Major Overhaul of GW Pumps	$124,000
50 YR Major groundwater pump equipment replacement	$2,200,000
Present Worth of Maintenance Costs [3]	**$842,741**
Cost per AC-FT of Recovered Water	**$53**

[1] Maintenance costs for storage mode include idle maintenance costs for the groundwater facilities.
[2] Maintenance costs for withdrawal mode include idle maintenance costs for the canal pumps.
[3] Assumes 3% inflation & 6% discount factor.

The power costs presented in Table 1 are based on the results presented in the KDWD Water Banking Program "Energy Requirements" Technical Memorandum. Personnel costs associated with operating and maintaining the Water Banking facilities are based on 5 additional staff positions during the storage model and 6 positions during the withdrawal mode. It may be possible to utilize existing staff to assist with the operation of these facilities and minimize the total number of additional staff required. The estimated annual maintenance and overhaul costs are based on typical maintenance costs for similar facilities. Table 2 summarizes O&M costs by component.

Table 2
Operation & Maintenance Cost Summary By Component
(2002 Dollars)

Description	Annual Cost	
	In-Service	Idle
Canal Pumping Facilities		
Labor (Personnel) Costs	$210,496	$103,904
Routine Maintenance Costs	$21,000	$4,000
Annualized Major Equipment Overhaul & Replacement Costs	$57,345	-
Total O&M Costs ($ / AC-FT)	**$4**	
Energy Costs per AC-FT [1] [2]	$5	
Total Energy + O&M Costs per AC-FT	**$9**	
Spreading Basins		
Labor (Personnel)	$170,880	$33,600
Routine Maintenance Costs	$9,000	$2,000
Annualized Major Equipment Overhaul & Replacement Costs	$0	-
Total O&M Costs ($ / AC-FT)	**$3**	-
Energy Costs per AC-FT	-	
Total Energy + O&M Costs per AC-FT	**$3**	
In-lieu Facilities		
Labor (Personnel)	$5,824	$1,400
Routine Maintenance Costs	$8,000	$2,000
Annualized Major Equipment Overhaul & Replacement Costs	$5,735	-
Total O&M Costs per AC-FT	**$2.1**	-
Energy Costs per AC-FT [1] [3]	$6	
Total Energy + O&M Costs per AC-FT	**$8**	
Well Field Facilities		
Labor (Personnel)	$342,400	$40,960
Routine Maintenance Costs	$46,000	$9,000
Annualized Major Equipment Overhaul & Replacement Costs	$93,774	-
Total O&M Costs per AC-FT	**$7**	-
Energy Costs per AC-FT [1] [4]	$35	
Total Energy + O&M Costs per AC-FT	**$42**	
Canal / Pipeline Facilities		
Labor (Personnel) Costs	$23,720	$4,016
Routine Maintenance Costs	$18,000	$3,000
Annualized Major Equipment Overhaul & Replacement Costs	$7,335	-
Total O&M Costs ($ / AC-FT)	**$6.3**	

(1) Reference Kern Delta Water Banking Project Energy Requirements Memorandum, dated February 27, 2002.
(2) Assumes winter demand charges, if operated in summer months additional $5/AC-FT will be realized.
(3) Assumes winter demand charges, if operated in summer months additional $6/AC-FT will be realized.
(4) Assumes winter demand charges, if operated in summer months additional $35/AC-FT will be realized.

NOTES:

[1] Kern County Water Agency Member Units' made deliveries of Federal Section 215 supplies utilizing Lower-Tule River Irrigation District, Pixley Irrigation District and Kern-Tulare Water District capacities per long-term agreements which allow for KCWA MIU's to utilize unused capacities.

[2] Deliveries of Kern Delta WD Metropolitan SWP supplies (750 af) to the Section 4 Turnout were made to the Kern County Water Agency Member Units as part of an operational exchange of KCWA MIU Lower River supplies CVC Pool 5 through the Pioneer Inlet (which was then delivered by Kern Delta WD to Rosedale Turnout No. 2).

[3] Deliveries of Kern Delta WD SWP Table A supplies (303 af) to the River Turnout No. 1 were made to Semitropic WSD as part of an operational exchange of Semitropic WSD Lower River supplies delivered to Kern Delta WD off the Kern River Channel in August 2011.

[4] Deliveries of KCWA MIU water to Buena Vista WSD at the North and South Strand Ranch Turnout (3,015 af) were part of an operational exchange with Buena Vista WSD Kern River supplies delivered to the Berrenda Mesa and Pioneer Projects off the Kern River Channel.

[5] Deliveries by Semitropic WSD to the Section 4 Turnout (645 af) were part of an operational exchange with KCWA MIU Lower River water delivered off the Kern River Channel to the Pioneer Project (645 af).

NOTES:

[1] Kern County Water Agency Member Units' made deliveries of Federal Section 215 supplies utilizing Lower-Tule River Irrigation District, Pixley Irrigation District and Kern-Tulare Water District capacities per long-term agreements which allow for KCWA MU's to utilize unused capacities.

[2] Deliveries of Arvin-Edison WSD and Kern Delta WD MWD SWP Table A supplies to River Turnout No. 1 and 2 were delivered to the City of Bakersfield in lieu of Rosedale Rio-Bravo WSD as part of an exchange to accommodate the City of Bakersfield Westside Parkway Project impacts to Rosedale Rio-Bravo WSD conveyance facilities. These deliveries will be paid back by the City to Rosedale Rio-Bravo WSD.

[3] Deliveries of Cawelo WD SWP Table A supplies delivered to the KWB were transferred to Belridge WSD as part of an exchange of 4,000 af of Belridge WSD Federal supplies delivered off the Friant-Kern Canal to Cawelo WD.

NOTES:

[1] Arvin-Edison Water Storage District made deliveries of Metropolitan Water District State Water Project Table A supplies utilizing Lower-Tule River Irrigation District and Pixley Irrigation District capacities per a short-term agreement with North Kern WSD (per the Agreement for the Management of Conveyance Capacity in the Cross Valley Canal Capacity).

[2] Kern County Water Agency Member Units' made deliveries of State Water Project Table A supplies utilizing Lower-Tule River Irrigation District, Pixley Irrigation District and Kern-Tulare Water District capacities per long-term agreements which allow for KCWA M/U's to utilize unused capacities.

[3] Deliveries of Cross Valley Canal refill water by Rosedale Rio-Bravo WSD and the Kern County Water Agency M/U's with their 2011 State Water Project Table A supply were made persuant to the Refill/Dewatering Policy Guidelines. Rosedale Rio-Bravo and the KCWA Member Units' received dewatering supplies in October 2011 (see attached delivery summary) and were subsequently responsible for refilling the Cross Valley Canal based upon the total dewatered supplies received.

[4] In the month of October 2011, Arvin-Edison WSD delivered 632 af of Arvin-Edison WSD Federal supplies to the AEWSD Turnout as part of an operational exchange for 632 af of MWD State Water Project Table A supplies at Rosedale Rio-Bravo Turnout No. 2.

Cross Valley Canal
December 2011

Estimated power costs for deliveries of Rosedale Rio-Bravo WSD SWP Table A supplies to the Pioneer Project utilizing the Section 4 Turnout and River Turnout No. 1. Deliveries of Kern Delta WD at Rosedale Turnout No. 1 and 2 and the North and South Turnouts were made with Kern Delta WD MWD and SBVMWD supplies; adjusted for lined losses.

EXEMPT GOVERNMENT AGENCY Per Government Code Sec. 6103

By_____
District Secretary, San Bernardino Valley Water Conservation District

AGREEMENT TO DEVELOP AND OPERATE ENHANCED RECHARGE FACILITIES

This Agreement to Develop and Operate Enhanced Recharge Facilities ("**Agreement**") is entered into and effective this 1st day of October, 2012 by and among the San Bernardino Valley Water Conservation District (the "**Conservation District**"), the San Bernardino Valley Municipal Water District ("**Valley District**") and Western Municipal Water District of Riverside County ("**Western**"). The Conservation District, Valley District and Western are each sometimes referred to as a "**Party**" and are collectively sometimes referred to as the "**Parties.**"

Recitals

A. General Purposes.

(1) The Parties each hold water rights to the waters of the Santa Ana River and each own and operate facilities that serve to divert and/or store the waters of the Santa Ana River. Furthermore, each Party possesses critical assets and unique skills that the other Parties do not possess.

SBVMWD LEGAL
DOCUMENT 2382

(2) The Parties wish to collaboratively use all of their respective assets and skills, including but not limited to water rights and facilities necessary or useful for the diversion and storage of water, to improve the reliability of local water supplies for their respective constituents by establishing a collaborative partnership to coordinate the use of their separate resources for mutual advantage.

(3) The Parties specifically wish to collaborate by increasing opportunities to recharge local surface water supplies, as well as State Project Water, in the San Bernardino Basin Area (the "**SBBA**"); by reducing the time and cost required to permit and construct essential public infrastructure (such as spreading basins); and by working together to achieve an efficient division of labor in the operation and maintenance of water infrastructure.

(4.) The Parties acknowledge that their water resource management activities in the Santa Ana River wash area proceed in concert with other uses of the lands in that area, including the mining of sand and gravel mineral deposits pursuant to existing leases, and habitat conservation and management, pursuant to a series of multi-agency cooperative initiatives involving local, state, and federal resource management and control agencies. The Parties' goal is to harmonize their water resource activities with these other uses, for the optimization of coordinated use by all.

(5) The Parties wish to memorialize their joint understandings by means of this Agreement.

B. Findings.

(1) The Parties agree that they must increase groundwater storage in the SBBA in order to meet current and future demands for water among their constituents.

(2) In the past, reasonable disagreements among the Parties have added unintentional and undesirable costs and complexity to the planning and permitting of important water resources projects in the region.

(3) The Parties believe that it is in their best interests, and the best interest of the public they serve, to cooperate in increasing the available water supply by establishing a new and more productive working relationship.

(4) In certain years, wet weather conditions and increased availability of State Project Water can create a limited opportunity to improve the reliability of local water supplies by increasing recharge and storage to groundwater. These favorable conditions are temporary and perishable. Therefore, time is of the essence. New inter-agency operating agreements should be established immediately in order to make the most of this and future opportunities because they occur on an irregular and unpredictable basis.

(5) Because of the limited and sporadic opportunities to augment local water supplies, the Parties intend for this Agreement to continue for a long period, thereby allowing the utilization of such limited water supplies.

Agreements

1. *Term.* The term of this Agreement shall commence on the Effective Date first written above and shall continue for a term of twenty five (25) years ("Initial Term") , unless terminated earlier as provided in this Agreement. This Agreement may be extended by written agreement among all parties for up to five additional, consecutive five year terms ("Extension Terms"), on the same terms and conditions stated herein, provided that prior to the expiration of the term then in effect, all parties agree in writing to the applicable extension, by action of their legislative bodies, to extend the Agreement for another term.

2. *Duties of the Conservation District.*

a. *Lease of Facilities for the Purpose of Groundwater Recharge to Valley District and Western.* The Conservation District hereby leases to Valley District and Western, for the term of this Agreement and on the terms specified herein, the surface of the lands shown on Exhibit 1 during the term of this Agreement ("**Leased Property**"). Exhibit 1A provides the legal description for the lands owned in fee by the Conservation District and Exhibit 1B provides the legal description of lands made available under existing easements under ownership by the Bureau of Land Management. Exhibit 1 is attached hereto and incorporated herein by reference. Valley District and Western shall have the right to enter upon and use the Leased Property, and any reasonably necessary subsurface areas incident thereto. Such entry and use shall be only for the purpose of recharging, storing or conveying water from any source (collectively "**recharging of water**" herein) into or through the percolation basins and other facilities owned or controlled by the Conservation District, whether existing as of the effective date of this Agreement, or as may be constructed pursuant to the terms of this Agreement, as such existing and contemplated future facilities are depicted in Exhibit 2, which is attached hereto and incorporated herein by reference). The Conservation District reserves all rights in and to the Leased Property not expressly conveyed as a part of this lease. Specific terms of this lease are as follows:

(1) Valley District and Western may construct, operate, maintain, repair, reconstruct and rehabilitate diversion facilities, recharge basins, pumps and other ancillary facilities or equipment located within the Leased Property as Valley District and Western may reasonably deem necessary for the recharging of water on the Leased Property,

recognizing that the Parties intend that the Conservation District shall be responsible for the operation and maintenance of such facilities.

(2) Included within this lease are all rights of reasonable ingress and egress as may be useful or necessary, in Valley District and/or Western's sole discretion, for the purpose of the recharging of water on the Leased Property, provided that such activities shall not interfere with: (i) any conservation easements that may now exist, or may be established consistent with the Conservation District's Upper Santa Ana River Wash Land Management and Habitat Conservation Plan, on said lands, or (ii) other easements existing as of the effective date of this Agreement.

(3) The designs for any such facilities or other tenant improvements must be approved, in advance by the Conservation District, which approval shall not be unreasonably withheld or delayed, and are subject to any limitations on the Conservation's District's holding of the Leased Property. The Conservation District shall cooperate reasonably with Valley District and Western to obtain local, state, or federal permits that may be required to construct or operate such facilities approved by the Conservation District.

(4) The Conservation District will utilize its best efforts under all existing and future lease agreements and easements with other individuals, organizations or entities operating on the Leased Property to harmonize the objective of Valley District and Western making full use of the facilities on the Leased Property for the recharge of water, consistent with the hydrological design limitations of these facilities, with any competing uses of the properties on which such facilities are or may be located.

(5) The Parties recognize that the Conservation District has negotiated lease agreements with mining companies that allow the Conservation District to engage in recharge of water that may periodically interfere with or prevent mining, without liability on the part of the Conservation District, which agreements are attached hereto as Exhibits 3 and 4. The Conservation District represents and warrants that these are the only current agreements that authorize mining on the Leased Property, and represents and warrants that the copies of these agreements attached as Exhibits 3 and 4 are true and correct copies of those agreements. Based on those representations, the Parties believe that they can collaboratively manage the recharge of water to avoid liability arising from any incompatibility between the recharging of water and any

activities otherwise authorized under the mining leases. Toward this end, the Parties agree as follows:

(a) During the winter season (from October 1 to March 31), the Parties will consult with each other on a regular basis to determine the quantity of water that may be recharged without interfering with mining operations.

(b) In the event that the recharging of water threatens to substantially limit or interfere with mining operations, the Parties shall immediately confer to determine how to maximize the recharge without unduly interfering with mining activity. Towards this end, the parties acknowledge that the Conservation District has the right, from time to time and as it deems necessary in the exercise of its reasonable discretion, to utilize all or any portion of the areas subject to the mining leases for its water recharge, conservation, spreading, and other operations, provided such activities are undertaken utilizing best efforts to avoid storing water so as to require temporary use of the mining lease areas. In connection with the exercise of their activities on the Leased Property hereunder, Valley District and Western shall assist the Conservation District to make every effort to minimize the time of any interruption of the mining lessees' activities on the Leased Property, to permit sufficient time for the Conservation District to observe all requirements for notice to mining lessees required under the applicable leases in the event of conflicts, and to harmonize their recharge of water with the then-current and anticipated immediate future excavation and other activities of the mining lessees, with the overall goal that the mining activity and the water conservation activity can harmoniously exist, without interruption to either.

(c) Any decisions about the proper scope, location, or amount of recharging of water after such consultation with appropriate agencies shall be made solely by the Conservation District in the exercise of its reasonable discretion, consistent with paragraph 4(d)(2) below, and consistent with the principle of ensuring that the optimum quantity of water possible is replenished within the San Bernardino Basin Area.

In the event the Conservation District determines, in the exercise of its reasonable discretion, that portions of the Leased Property cannot be made available to Valley District and Western, and such determination is made at a time when water supplies are otherwise

immediately available to Valley District and Western for recharge into facilities on the leased land:, Conservation District will not object, directly or indirectly, to efforts by Valley District and/or Western to deliver water supplies that cannot be spread on the Leased Property to other locations, *provided that* in determining where to deliver such water supplies, Valley District and Western act consistent with the priority of first delivering water for direct delivery or spreading within the SBBA, then delivering water for direct delivery or spreading within the boundaries of Valley District, then delivering water for direct delivery, spreading or storage within Western, and then delivering water for direct delivery, spreading or storage outside of Western.

In such event, the parties shall meet and confer in good faith, under the auspices of the Joint Operations Committee provided for in paragraph 4(b) below, regarding whether some proportional refund to Valley District, Western, or both of a portion the gross lease fee paid for the given year in which the Leased Premises were unavailable for the recharge of water may be appropriate, and if so, in what amount.

b. *Operation and Maintenance of Spreading Basins.* The Conservation District shall operate and maintain all new and existing facilities, located on the areas depicted in Exhibit 2 hereto, in good working condition, to ensure that the recharge of water continues efficiently, in accordance with a mutually-agreed schedule of regular maintenance and any supplemental agreements governing special or emergency maintenance responsibilities. The Conservation District shall set aside a portion of the gross lease fee provided for in Paragraph 3(a) below received from Valley and Western, in accordance with the Conservation District's Reserve Policy, to ensure sufficient funds are available to meet the agreed maintenance obligations.

c. *Ownership of New Facilities* Upon expiration or other proper termination of this Agreement, however, improvements made on land owned or controlled by the Conservation District shall become Conservation District property, to be used by the Conservation District for water management and the recharge of water.

d. *Groundwater Charge*. All parties producing water in the Conservation District's jurisdictional boundaries shall be subject to all then-applicable groundwater charges, and this Agreement shall not exempt nor excuse any party, including Valley District and Western, from the levy or payment thereof. Notwithstanding, the parties recognize that they do not intend that groundwater charges would be required to be paid on production of water pursuant to measures taken for the emergency alleviation of high groundwater conditions, or the implementation of

other basin management objectives as may be approved by the Basin Technical Advisory Commission ("**BTAC**") or other similar organization including all of the parties hereto that may perform a substantially similar role under any Conjunctive Use Plan that may be implemented for the SBBA. The Conservation District agrees to consider implementing reasonable measures to reduce or eliminate groundwater charges for groundwater production devoted to such agreed purposes, whether by exemption, or refund of charges otherwise paid, as may be consistent with applicable law.

3. *Duties of Valley District and Western.*

a. *Gross Lease Fee.* Valley District and Western shall together pay to the Conservation District a gross lease fee of $350,000/year for the right to the recharge of water through the existing percolation basins and other facilities owned by the Conservation District, and the right to construct and have operated additional recharge and conveyance facilities on the Leased Property. The parties acknowledge and affirm that the gross lease fee is a lease payment for access to and use of the Leased Property, only, and for partial offset to the costs of operation and maintenance of facilities thereon same by the Conservation District. The gross lease fee does not include, and is not intended to replace or offset, any charges for the acquisition, conveyance, storage, or production of water, that may otherwise apply by or among the parties, or third parties, whether now or in the future.

b. Valley District and Western, or either of them, shall pay the gross lease fee, in advance, by October 1st of each year, which sum may be apportioned by the Conservation District to its Groundwater Enterprise and other funds.

(1) Valley District and Western shall annually adjust the gross lease fee to account for inflation using the U.S. Bureau of Labor Statistics Consumer Price Index (CPI-U) for the Los Angeles District. The base year for such payments will be 2012.

(2) In the event that Valley District and/or Western construct new percolation basins or other facilities useful or necessary for the recharge of water, the Parties shall adjust the gross lease fee proportionally to reflect the additional operation and maintenance costs that will be incurred by the Conservation District in operating and maintaining those new facilities, as may be agreeable to the Parties.

c. *Permitting for New or Augmented Spreading Basins.* Valley District and Western shall be responsible for obtaining all federal, state and local permits (including conducting environmental review under the California Environmental Quality Act or the National Environmental Policy Act) that may be required to construct

additional facilities for the recharge of water supplied by Valley and Western. If, after 10 years, Valley and Western have been unable to obtain the necessary permits, either or both may terminate this lease agreement subject to the provisions of paragraph 9.c. below. Valley District and Western shall bear all costs associated with protecting, repairing or replacing the material infrastructure improvements (including pipelines, gates, valves, weirs, fencing, gauges, etc.) installed by Valley District and Western on lands owed by the Conservation District.

d. *Resource Management.*

(1) Valley District and Western shall coordinate their operations to harmonize with mineral resource extractions, to avoid any potential liability under mineral leases, or other uses authorized by the Conservation District on the Leased Property.

(2) Valley District and Western shall negotiate supplemental payments to the Conservation District where unusual and unforeseen circumstances necessitate extraordinary maintenance expenses that are in excess of the budget prepared and approved by the Joint Operations Committee.

(3) Valley District and Western shall cooperate with the Conservation District in developing a long-term resource management plan to govern multiple-use activities in Reach 5 of the Santa Ana River wash (i.e., the Upper Santa Ana River Wash Land Management and Habitat Conservation Plan).

4. *Duties of All Parties*

a. *No Rights to Other Party(ies)' Water or Facilities.* Except as provided for in paragraph 2(c) above, the Conservation District will not assert any claim to own or control the new facilities constructed, or the additional water recharged by, Valley District and Western under the terms of this Agreement, provided that these activities occur in conformance with this Agreement. Valley District and Western will not assert any claim to own or control any water that is percolated in the new or existing recharge basins that is not supplied by Valley District or Western, nor make any attempt to acquire or control land or facilities owned by the Conservation District.. Valley District and Western acknowledge and represent to Conservation District that this Agreement provides for and constitutes "compatible use" of the Conservation District's property and facilities, as that term is utilized in California Code of Civil Procedure sections 1240.510 et seq., thereby eliminating any need for any exercise of eminent domain by any party to acquire any additional interest in the Leased Property from any other party.

b. *Establishment of Joint Operations Committee.* The Parties shall establish and participate in a Joint Operations Committee (the "**JOC**") to serve in an advisory capacity to the Conservation District, which shall assist the Conservation District to develop a schedule and budget for planned operation and maintenance activities relating to the recharge of water on the Leased Property, and perform other functions as otherwise specified herein, under such rules and procedures as it shall formulate and unanimously approve. The JOC shall meet at least twice a year to plan water recharge, review financial and water accounting matters implicated hereunder, and review performance.

c. *Joint Reporting.* The Parties shall jointly provide planning documents, monitoring reports, and other records that may be requested by authorized agencies to demonstrate compliance with federal, state or local laws and regulations. Specifically, the Parties shall continue to cooperate in the preparation and submission of annual reports to the California State Water Resources Control Board, which reports will follow the format used by the Parties in reporting the use of water for calendar year 2010. A copy of the report filed with the California State Water Resources Control Board is attached hereto as Exhibit 5 and incorporated herein by reference.

d. *Water Resources Management.*

(1) The Parties will continue to coordinate all recharge of water with one another to protect and enhance the safe yield in the SBBA. Specifically, the Parties will: (i) jointly develop the Regional Conjunctive Use Plan (or its equivalent) through the Basin Technical Advisory Committee, (ii) seek additional opportunities to increase safe yield in the SBBA by engaging in cooperative joint development of new water supply projects or conservation programs in the region, and (iii) cooperate with one another to document the water resource management benefits accrued by establishing and implementing this Agreement.

(2) The parties agree to dedicate and use the water made available pursuant to their respective water rights in and to the Santa Ana River to give priority to preserving the safe yield of the SBBA, as part of the reasonable and prudent management of their entire portfolio of water resources. All parties shall refrain from contesting any water rights claimed or held by one another at any time during the term of this Agreement, so long as such water rights are exercised in the manner consistent with this Agreement.

(3) The Parties will not export native water from the SBBA, or recharge water on behalf of agencies located outside the SBBA, except as

provided for by the 1969 *Western* Judgment and/or by the Regional Conjunctive Use Plan (or its equivalent).

5. *Amendments.* The Parties will negotiate amendments, including but not limited to areal expansion of the scope of activities, to this Agreement in good faith and not unreasonably withhold consent.

6. *Liberal Construction.* The Parties shall construe all terms and conditions in this Agreement in a manner which most favors increasing available water supplies by encouraging greater recharge of water in the area.

7. *Indemnification*

a. *Generally.* Each Party shall indemnify, defend and hold harmless the other Parties, their directors, officers, employees and agents from and against all damages, liabilities, claims, actions, demands, costs and expenses (including, but not limited to, costs of investigations, lawsuits and any other proceedings whether in law or in equity, settlement costs, attorneys' fees and costs), and penalties or violations of any kind, which arise out of, result from, or are related to a Party's performance of its obligations under this Agreement. In extending such indemnification, however, no party hereto waives any sovereign or governmental immunities, privileges, or rights that they may have or enjoy under any applicable law, including but not limited to California Government Code sections 810 et seq., and except as otherwise specifically provided for hereunder, and each party reserves all such immunities, privileges and rights , and any claims or other procedures applicable to same, that may presently exist or hereafter be created, to themselves, as against each of the other parties, and as against any third party.

b. *Indemnification Procedures.* Any Party that is an indemnified party (the "**Indemnified Party**") that has a claim for indemnification against the other Party (the "**Indemnifying Party**") under this Agreement, shall promptly notify the Indemnifying Party in writing, specifying the nature of the claim, the grounds upon which the Indemnified Party believes the Indemnifying Party is liable in whole or in part for the liability or other obligation asserted under the claim, and including any appropriate demand for defense or indemnification, or both. No delay on the part of the Indemnified Party in notifying the Indemnifying Party shall relieve the Indemnifying Party from any obligation unless (and then solely to the extent) the Indemnifying Party is prejudiced. Further, the Indemnified Party shall promptly notify the Indemnifying Party of the existence of any claim, demand, or other matter to which the indemnification obligations apply, and shall give the Indemnifying Party a reasonable opportunity to defend the same at its own expense and with counsel of its own selection, *provided* that the Indemnified Party shall at all times also have the right to fully participate in the disputed matter at its own expense. If the Indemnifying Party refuses to provide the

indemnity, or within a reasonable time after written notice from the Indemnified Party, fails to defend a claim, demand or other matter to which the indemnification obligations apply, the Indemnified Party shall have the right, but not the obligation, to undertake the defense of, and to compromise or settle (exercising reasonable business judgment), the claim or other matter, on behalf, or for the account, and at the risk, of the Indemnifying Party. If the claim is one that cannot by its nature be defended solely by the Indemnifying Party, then the Indemnified Party shall make available all information and assistance to the Indemnifying Party that the Indemnifying Party may reasonably request. In the event of any dispute between the Indemnified party and the Indemnifying Party as to whether the claim is one to which the indemnification obligations apply, the matter shall be resolved in the manner of resolution of disputes, as provided in paragraph 9 hereunder. Except as specifically provided otherwise in Paragraph 9(b) (4) below with respect to tolling of limitations periods, the notice provided for hereunder shall be in addition to, and not in place of, any other notice that may be provided for or otherwise required under law.

8. *Force Majeure.* In addition to any other specific provisions of this Agreement, a Party hereto shall not be deemed to be in default under this Agreement where failure or delay in performance of any of such Party's obligations under this Agreement is caused by floods, earthquakes, winds, other Acts of God, power outages, equipment failure, acts of vandalism, fires or other casualties, wars, riots or similar hostilities, strikes and other labor difficulties beyond the Party's control, (including the Party's employment force), enactment of new or conflicting, laws or regulations, including any new listing of endangered species or designation of critical habitat for endangered species, court actions (such as restraining orders or injunctions), judicial actions such as issuance of restraining orders and injunctions, or other causes beyond such Party's control. If any one or more of such events occur, the term of this Agreement and the time for performance by any Party of any of its obligations hereunder shall be extended by the period of time that such one or more events prevented or delayed such performance, provided that the term of this Agreement shall not be extended under any circumstances for more than five (5) years. In the event that said period of time must be extended by more than five years, this Agreement shall automatically terminate.

9. *Administration of Agreement*

a. *Books and Records.* Each Party shall have access to and the right to examine any of the other Party's pertinent books, documents, papers or other records (including, without limitation, records contained on electronic media) relating to the performance of that Party's obligations pursuant to this Agreement. Each Party shall retain all such books, documents, papers or other records to facilitate such review in accordance with that Party's record retention policy. Access to each Party's books and records shall be during normal business hours only.

Nothing in this paragraph shall be construed to operate as a waiver of any applicable privileges.

b. *Disputes.* The Parties recognize that there may be disputes regarding the obligations of the Parties or the interpretation of this Agreement. The Parties agree that they may attempt to resolve disputes as follows:

(1) *Statement Describing Alleged Violation of Agreement.* A Party or Parties alleging a violation of this Agreement (the "**Initiating Party(ies)**") shall provide a written statement describing all facts that it believes constitute a violation of this Agreement to the Party(ies) alleged to have violated the terms of this Agreement (the "**Responding Party(ies)**").

(2) *Response to Statement of Alleged Violation.* The Responding Party(ies) shall have sixty days from the date of the written statement to prepare a written response to the allegation of a violation of this Agreement and serve that response on the Initiating Party(ies) or to cure the alleged violation to the reasonable satisfaction of the Initiating Party(ies). The Initiating Party(ies) and the Responding Party(ies) shall then meet within thirty days of the date of the response to attempt to resolve the dispute amicably.

(3) *Mediation of Dispute.* If the Initiating Party(ies) and the Responding Party(ies) cannot resolve the dispute within ninety days of the date of the written response, they shall engage a mediator, experienced in water-related disputes, to attempt to resolve the dispute. Each Party shall ensure that it is represented at the mediation by a Director or Councilperson. These representatives of the Initiating Party(ies) and the Responding Party(ies) may consult with staff and/or technical consultants during the mediation and such staff and/or technical consultants may be present during the mediation. The costs of the mediator shall be divided evenly between the Initiating Party(ies) and the Responding Party(ies).

(4) *Prior to Claims Under California Tort Claims Act.* The Parties agree that the procedure described in this paragraph represents an effort to resolve disputes without the need for a formal claim under the California Tort Claims Act or other applicable law. The period of time for the presentation of a claim by one Party against another shall be tolled for the period from the date on which the Initiating Party(ies) file a written statement until the date upon which the mediator renders a decision.

(5) *Reservation of Rights.* Nothing in this paragraph shall require a Party to comply with a decision of the mediator and, after the completion of the mediation process described above, each Party shall retain and may exercise at any time all legal and equitable rights and remedies it may have to enforce the terms of this Agreement; provided, that prior to commencing litigation, a Party shall provide at least five calendar days' written notice of its intent to sue to all Parties.

c. *Termination of Agreement*

(1) *Failure to Obtain Permits.* The Parties recognize and acknowledge that the implementation of this Agreement may require one or more Parties to obtain permits or other regulatory approvals from one or more local, state or federal regulatory agencies, including but not limited to the Regional Water Quality Control Board, the California Department of Fish & Game and the U.S. Fish & Wildlife Service or the U.S. Army Corps of Engineers. Because of the significant regulatory uncertainties associated with obtaining these permits or regulatory approvals, the Parties agree that, if Valley District and Western have not received all regulatory permits or approvals required or useful for groundwater replenishment on the Leased Property within ten years from the effective date of this Agreement, Valley District and/or Western may terminate this Agreement at any time by providing the Conservation District with one-year's written notice of such termination. In the event that Valley District or Western, but not both wish to terminate this Agreement, the Party wishing to terminate this Agreement shall be allowed to terminate the Agreement as to itself and the remaining two Parties may continue the Agreement on such terms as they deem to be equitable.

(2) *Material Breach.* If one Party deems that another Party has materially breached one of the provisions of this Agreement, the Parties shall use the dispute resolution procedures set forth in paragraph 9. b. above in an effort to resolve the dispute amicably. If, the dispute resolution process described in paragraph 9. b. above is not successful in resolving the dispute, any Party may terminate this Agreement for material breach thereof, and may seek any remedy that it would otherwise be entitled to in a court of law.

d. *Recordation of Agreement.* All Parties agree that this Agreement constitutes a lease of certain lands by the Conservation District to Valley District and Western for the purpose of constructing, operating, maintaining, repairing and rehabilitating percolation basins and ancillary facilities on the Leased Property, and consequently, all Parties agree that this Agreement should be recorded in the

Official Records of the County of San Bernardino. Valley District shall, within ten days of the effective date of this Agreement, cause this agreement to be recorded in the Official Records of the County of San Bernardino and shall promptly provide the Conservation District and Western with recorded copies of this Agreement upon receipt of such copies from the County of San Bernardino.

10. *General Provisions.*

a. *Authority.* Each signatory of this Agreement represents that s/he is authorized to execute this Agreement on behalf of the Party for which s/he signs. Each Party represents that it has legal authority to enter into this Agreement and to perform all obligations under this Agreement.

b. *Amendment.* This Agreement may be amended or modified only by a written instrument executed by each of the Parties to this Agreement.

c. *Jurisdiction and Venue.* This Agreement shall be governed by and construed in accordance with the laws of the State of California, except for its conflicts of law rules. Any suit, action, or proceeding brought under the scope of this Agreement shall be brought and maintained to the extent allowed by law in the County of San Bernardino, California.

d. *Headings.* The paragraph headings used in this Agreement are intended for convenience only and shall not be used in interpreting this Agreement or in determining any of the rights or obligations of the Parties to this Agreement.

e. *Construction and Interpretation.* This Agreement has been arrived at through negotiations and each Party has had a full and fair opportunity to revise the terms of this Agreement. As a result, the normal rule of construction that any ambiguities are to be resolved against the drafting Party shall not apply in the construction or interpretation of this Agreement.

f. *Entire Agreement.* This Agreement constitutes the entire agreement of the Parties with respect to the subject matter of this Agreement and, save as expressly provided in this Agreement, supersedes any prior oral or written agreement, understanding, or representation relating to the subject matter of this Agreement.

g. *Partial Invalidity.* If, after the date of execution of this Agreement, any provision of this Agreement is held to be illegal, invalid, or unenforceable under present or future laws effective during the term of this Agreement, such provision shall be fully severable. However, in lieu thereof, there shall be added a provision as similar in terms to such illegal, invalid or unenforceable provision as may be possible and be legal, valid and enforceable.

h. *Successors and Assigns.* This Agreement shall be binding on and inure to the benefit of the successors and assigns of the respective Parties to this Agreement. No Party may assign its interests in or obligations under this Agreement without the written consent of the other Parties, which consent shall not be unreasonably withheld or delayed.

i. *Waivers.* Waiver of any breach or default hereunder shall not constitute a continuing waiver or a waiver of any subsequent breach either of the same or of another provision of this Agreement and forbearance to enforce one or more of the rights or remedies provided in this Agreement shall not be deemed to be a waiver of that right or remedy.

j. *Attorneys' Fees and Costs.* The prevailing Party in any litigation or other action to enforce or interpret this Agreement shall be entitled to reasonable attorneys' fees, expert witnesses' fees, costs of suit, and other and necessary disbursements in addition to any other relief deemed appropriate by a court of competent jurisdiction.

k. *Necessary Actions.* Each Party agrees to execute and deliver additional documents and instruments and to take any additional actions as may be reasonably required to carry out the purposes of this Agreement.

l. *Compliance with Law.* In performing their respective obligations under this Agreement, the Parties shall comply with and conform to all applicable laws, rules, regulations and ordinances.

m. *Third Party Beneficiaries.* This Agreement shall not create any right or interest in any non-Party or in any member of the public as a third party beneficiary.

n. *Counterparts.* This Agreement may be executed in one or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute but one and the same instrument.

o. *Notices.* All notices, requests, demands or other communications required or permitted under this Agreement shall be in writing unless provided otherwise in this Agreement and shall be deemed to have been duly given and received on: (i) the date of service if served personally or served by facsimile transmission on the Party to whom notice is to be given at the address(es) provided below, (ii) on the first day after mailing, if mailed by Federal Express, U.S. Express Mail, or other similar overnight courier service, postage prepaid, and addressed as provided below, or (iii) on the third day after mailing if mailed to the Party to whom notice is to be given by first class mail, registered or certified, postage prepaid

MINERAL LEASE FOR EXTRACTION OF SAND AND GRAVEL MATERIALS

THIS MINERAL LEASE FOR EXTRACTION OF SAND AND GRAVEL MATERIALS ("Lease") is entered into this 1 day of November, 2011, by and between SAN BERNARDINO VALLEY WATER CONSERVATION DISTRICT ("District") and CEMEX CONSTRUCTION MATERIALS PACIFIC, LLC ("Lessee"). This Lease is entered into in consideration of all of the following:

A. District is a California Water Conservation District, duly formed and existing under California Water Code section 74000 et seq. District has the authority to enter into leases of property it owns pursuant to provisions of California Water Code section 74550, and other provisions of law. Lessee is a limited liability corporation, with its principal place of business located in El Dorado Hills, California. Lessee is the successor-in-interest to a prior lease agreement between the District and C. L. Pharris Sand & Gravel, Inc.

B. District's and Lessee's predecessor-in-interest, C. L. Pharris Sand & Gravel, Inc., entered into a "Lease Agreement" dated September 10, 1979. That Lease Agreement authorized various excavation and sale of sand, gravel, and related material from property owned by the District, on terms and conditions stated therein, and incorporating prior leases between the parties (collectively "Original Lease").

C. The Original Lease was amended variously between the parties over time, culminating on a "Lease Amendment" dated July 10, 1997. Under the "Lease Amendment," the term of the lease was defined as an initial term ending June 1, 2011, with nine (9) additional successive five (5) year options to renew. The Lease Amendment required renewal notices to be in writing, made no later than six (6) months prior to the expiration of the then-existing term. The parties followed these procedures through the first five (5)-year extension of the term.

D. A dispute then arose between Lessee and the District regarding Lessee's expressed intent to enter an additional five (5)-year term under the lease. District rejected Lessee's attempt to exercise an additional five (5)-year option as untimely, and considers the lease effectively terminated as of June 1, 2011. Lessee believes that the option for an additional five (5)-year period under the lease was properly exercised, and that the term of the original lease, as modified by the Lease Amendment, continues until June 1, 2016.

E. The parties have met and conferred pursuant to a "Tolling Agreement Re Lease Dispute," they entered into on or about June 1, 2011 and extended on August 31, 2011 to resolve their differences. Pursuant to such discussions, the parties have now determined to enter into a new lease, defining new terms, and replacing, superseding, and rendering of no further effect the Original Lease, the Lease Amendment, and all previous agreements between District and Lessee with respect to lease of the District's property.

NOW, THEREFORE, in consideration of all of the foregoing, the parties do hereby set forth the terms of their new and sole lease agreement as follows:

1.0 Definitions. As used herein, the following terms shall have the following defined meanings:

1.1. "DISTRICT" shall mean the San Bernardino Valley Water Conservation District.

1.2. "LESSEE" shall mean Cemex Construction Materials Pacific, LLC, and its successors and assigns.

1.3. "PREMISES" shall mean all those properties owned by DISTRICT, more specifically described in the legal description attached hereto as Exhibit "A" and as more specifically depicted in the plat map attached hereto as Exhibit "B," with the exception of the northeasterly one-quarter of Section 12, which shall not be included within the PREMISES.

1.4. "MATERIAL" shall mean sand, rock, gravel, and kindred substances, lying on or under the PREMISES, and suitable for commercial extraction, processing, and sale, and any saleable by-products from same.

1.5. "Ton" shall mean a measurement of 2,000 pounds of material aggregate, by weight.

1.6. "INDEX" shall mean the Bureau of Labor Statistics Producer Price Index for Mining (Except Oil and Gas): NAICS 212, or if such index is no longer published or kept, such similar index as may be agreed to by the parties.

1.7. "FAIR MARKET ROYALTY" shall mean the prevailing market royalty rate being paid for Material within the markets served or able to be served by Material from the Premises, and such markets as may be reasonably comparable thereto, as of a then-present data value.

1.8. "WASH PLAN" shall mean the Upper Santa Ana River Wash Land Management and Habitat Conservation Plan, a comprehensive land use, property exchange, and mining and related permitting effort undertaken by District, Lessee, and a number of other public and private entities for realignment of prior leases for sand and gravel extraction, and for accommodation of water conservation and species habitat preservation.

1.9. "TRANSFER PREMISES" shall mean those properties which District and Lessee agree are appropriate for replacement of any portion of the Premises which may be exchanged to the federal government, Bureau of Land Management, or other entity, under the implementation and effectuation of the Wash Plan, or otherwise rendered unavailable for extraction, processing, and sale of Material. The parties contemplate that the Transfer Premises will consist of a portion of those properties already proposed to be exchanged from the Bureau of Land Management to the District under the Wash Plan, or otherwise transferred from the federal government to the District for the purposes of making such transferred areas available for mining. District and Lessee agree, however, that availability of, and the specific areas of the Transfer Premises cannot be determined precisely at this time, and that the exact areas, locations and parameters of the Transfer Premises will have to be determined in connection with the ultimate approvals that might be obtained through the Wash Plan.

1.10. "COMMENCEMENT DATE" shall be the date this Lease becomes effective, November 1, 2011.

1.11. "LEASE YEAR" shall mean the year following the commencement date in the first year of this Lease, and for every subsequent year, the period beginning each year on the anniversary of the Commencement Date, and continuing one (1) year thereafter.

1.12. "ORANGE STREET PLANT SITE" shall mean that area generally described in the legal description and depicted on the plat map collectively attached as Exhibit "D" hereto, consisting of approximately 100 acres, on which Lessee has, as of the Commencement Date, established and maintains a mining processing plant.

1.13. "REDLANDS AGGREGATES SITE" shall mean the area generally described in the legal description and depicted on the plat map collectively attached as Exhibit "E" hereto.

2.0 Lease of Premises and Rights Conferred.

2.1. Under this Lease, District hereby grants to Lessee the right to come onto the Premises, and to dig, excavate, transport, wash, process, crush, convey, stockpile, and sell all Material on the Premises, consistent with any applicable federal, state, or local regulations, and conditions of any permits that may be applicable thereto. This Lease includes the right to maintain all processing plants, structures, facilities, and equipment legally established by Lessee and existing on the Premises as of the Commencement Date, as are necessary or suitable for the defined purposes of the Lease. Lessee may also establish such other plants, buildings, paved roadways, structures, or other permanent improvements, or any silt ponds or places for the deposition of impermeable materials (collectively "Improvements") on the Premises, as may be necessary or appropriate for accomplishment of the purposes of the Lease, subject to the prior

written approval of the District as to the location, extent, specifications, and composition of such improvements. District's approval shall not be unreasonably withheld, conditioned or delayed. District's approval of Lessee's Improvements shall be directed to District's reserved water spreading and other reserved rights in, to, and for the Premises under this Lease, and the compliance and consistency of such Improvements with the terms and conditions of this Lease, and shall not be directed to the suitability of such Improvements for Lessee's purposes, nor the design, effectiveness, safety, nor engineering suitability of such Improvements, except insofar as District may, but is not required to, confirm that such Improvements as proposed meet otherwise applicable legal requirements and standards. Lessee shall not undertake any construction of such improvements without prior District review and approval of the plan for the location and other specifications for such improvements. District shall have a period of 45 days after submission of the complete construction plans and working drawings by Lessee of any proposed improvement construction to approve, conditionally approve, or disapprove such proposed improvements. Any disapproval by District shall be accompanied by written statement of the reasons therefor, including an explanation of what would be required for approval. Upon District's failure to approve, conditionally approve, or disapprove the Improvements construction within the 45 day period, the plans shall be deemed approved as submitted, so long as they are consistent with all other applicable legal requirements and standards. Lessee may relocate any Improvements located on the Premises, subject to District's approval, in the same manner as for Lessee's original establishment of Improvements. District may require Lessee to remove any Improvements placed on the Premises for which Lessee failed to provide the 45 day notice and opportunity for review and approval of District called for hereunder to the extent such Improvements violate applicable legal requirements, without any liability of District to Lessee. Such Improvements so constructed shall be the property of Lessee during the duration of the Lease, and shall be removed by Lessee upon the expiration or earlier termination of this Lease; provided, however, District may in writing elect to permit Lessee to leave any or all of the Improvements on the Premises after expiration of the Lease, in which case all such Improvements shall become the property of the District. Lessee shall assume all maintenance and insurance responsibilities for any Improvements constructed on the Premises. In addition, Lessee shall provide District no less than forty-five (45) days' notice before Lessee establishes any staging areas, processing areas, unpaved but graded and compacted haul routes, and equipment servicing areas which do not otherwise fit the definition of Improvements provided above, though such facilities shall not require District's prior approval before Lessee may be permitted to place them on the Premises. Further, Lessee shall provide to District no less than fifteen (15) days' notice before Lessee establishes any portable crushing or processing sites, which do not otherwise fit the definition of Improvements provided above, though such facilities shall likewise not require District's prior approval before Lessee may be permitted to place them on the Premises.

2.2. Premises Leased in "As Is" Condition. Lessee acknowledges that it is granted lease rights to the Premises, and the right to move Material therefrom, on an "as is" basis, and Lessee takes and operates the Premises without reliance on any representation by the District, or any of its officers, employees, agents, or representatives, or any other person, concerning the extent or quality of the Material on the Premises, its fitness for Lessee's intended use, or any particular purpose or use, its income producing history, potential, or capabilities, its value, or any other promise, representation, or inducement not expressly set forth in writing in

this Lease. District represents and warrants that it has not caused nor is aware of any environmental conditions relating to the Premises.

2.3. No Warranty. Lessee acknowledges that neither the District, nor any of its officers, employees, agents, or representatives, has made any written or oral representation, promise, or warranty, express or implied, arising out of or in connection with the Material on the Premises, or the transfer of Premises, if any, its fitness for Lessee's intended use, or any purpose or use, its income producing history, potential or capabilities, its value, the likely success or outcome of the Wash Plan, or any other matter not expressly set forth in writing in this Lease. Lessee acknowledges it has inspected, and occupied, the Premises prior to the execution of this Lease. Lessee acknowledges it takes and accepts the Premises in the condition in which the Material on the Premises (or lack thereof) exists as of the Commencement Date this Lease. Lessee assumes that any and all change in the condition of the rock on the Premises either before the Commencement Date or during the term of this Lease.

3.0 Lease Term.

3.1. Original Term. This lease shall begin on the Commencement Date, and shall continue in full force and effect for a period of four (4) years thereafter.

3.2. Options to Renew and Right of First Refusal. So long as Lessee shall not be in material breach of this Lease, Lessee shall have one (1) additional, successive six -year option to renew ("Option to Renew"). The renewal shall be on the terms of this Lease, or such additional or revised terms as the parties may then agree to.

3.3. Procedure for Exercise of Options.

(a) Initial Option. In the event Lessee elects to exercise the Option to Renew, Lessee shall provide written notice to District in writing. Such Option to Renew shall be made no later than one hundred eighty (180) days prior to the expiration of the Original Term of this Lease, to the person and in the manner set forth herein for the provision of Notices in Section 14.1 below.

(b) Exclusive Negotiation Period. In the event Lessee fails to exercise the six (6) year option provided for above, this Lease shall terminate as of the expiration of the initial four-year term. In the event Lessee does exercise the six (6) year option, Lessee shall have an Exclusive Negotiation Period with the District to meet and confer with District regarding the terms and conditions of a renewal or replacement lease for the Premises. Such Exclusive Negotiation Period shall run concurrently with the final ninety (90) days of the six (6) year option period so exercised by Lessee. The Exclusive Negotiation Period shall arise only upon the expiration of the exercised six (6) year option term; there shall be no Exclusive Negotiation Period upon the termination of the Lease, for whatever reason, or in the event of a Lessee default. During the Exclusive Negotiation Period, District shall not make any effort to sell, lease, offer, market, or solicit proposals with or from any party for the excavation, processing, or sale of Material from the Premises, except Lessee. Neither District nor Lessee shall be

obligated to enter into any type of an agreement during or as a result of the Exclusive Negotiation Period, but the parties shall meet and confer in good faith to discuss and explore the possibility of entering into such an agreement, should the parties determine that doing so would be in their mutual benefit.

(c) Right of First Refusal. In the event the Exclusive Negotiation Period occurs, and fails to result in an agreement between District and Lessee, and only in such event, Lessee shall have a Right of First Refusal upon any offer District may make to any other party for the right to excavate, process, or sell Material from all or any part of the Premises. Such Right of First Refusal shall entitle Lessee to priority acceptance of any such offer District may make to any other party, on the identical terms, conditions, requirements, and stipulations as the District makes, and is willing to accept, from any other party. The Right of First Refusal shall begin on the expiration of the Exclusive Negotiation Period, and shall continue for a period of three (3) years thereafter. District shall, prior to making or soliciting any offer for the right to excavate, process, or sell Material from the Premises advise the party or parties with whom it is dealing of the Lessee's Right of First Refusal. District shall require any offer it receives from any party to excavate, process, or sell Material from all or a portion of the Premises, and which it is prepared to accept and is authorized by its legislative body to accept, to be reduced to writing, and shall within thirty (30) days of any such offer, provide a written copy to Lessee, to the person and in the manner provided for in Section 14.1, Notices, below. Lessee shall have thirty (30) days thereafter to accept or reject the offer. In the event Lessee accepts the offer, District and Lessee shall enter into an agreement, on the identical terms as proposed to District and conveyed to Lessee. In the event Lessee rejects the offer, the Right of First Refusal shall thereupon terminate, and be of no further force and effect.

4.0 Royalty and Rental Payments.

4.1. Orange Street Plant Site Rent. Lessee shall pay to District, throughout the entire term of this Lease and any holdover period, the sum of Four Thousand Dollars ($4,000.00) per month for the lease of the Orange Street Plant Site ("Orange Street Plant Site Rent"). Such rent shall be in addition to, and shall not be credited against, any royalty amounts due, including guaranteed annual minimum royalty, which may be otherwise due and owing under this Lease.

4.2. Royalty. In addition to the plant site rent, Lessee shall pay a royalty to District, for every ton of Material removed from the Premises, as measured by State certified truck scales and recorded by a standardized, nationally recognized ticketing system whose mechanics and accuracy are disclosed and available to, and verifiable by, District. Lessee shall keep true, complete, and accurate records of all Material excavated on and removed from the Premises, and an accounting of all Material excavated and removed from the Redlands Aggregates Site. . Lessee shall report such figures, under penalty of perjury, to District on a monthly basis, in a form as District may reasonably specify and require. The parties shall track, calculate, and collect the royalty due on the excavated Material based on the amount of tonnage of Material sold or otherwise removed from the Premises and the Redlands Aggregates Site.

Any differences between the amount of Material excavated and the amount of Material sold or otherwise removed from the Premises shall be reconciled by way of a biannual audit. On or before ninety (90) days following the execution of this Agreement by both parties, District and Lessee shall jointly select and retain a party to perform a baseline aerial topographic survey of the Premises and the Redlands Aggregates Site. The parties shall share equally in the expense of the baseline aerial topographic survey, and once it is generated and delivered, the parties shall meet and confer to work out any issues or disagreements they may have regarding it, and both shall indicate in writing their approval of same, once any issues with the baseline survey that may arise are resolved. Once approved by both parties, the baseline aerial topographic survey shall serve as the beginning survey for later aerial topographic surveys to be performed under this Lease, for volumetric calculations of material excavated, inventoried, deposited into silt ponds, and removed from the premises by deduction. The volumetric results will be used to assess, compare, and reconcile the truck scale weight measurements. Based upon the results of the area topographic survey, Lessee and District shall reconcile the amounts paid on the tonnage sold or otherwise removed from the Premises and the Redlands Aggregates Site, and make any necessary adjustments to account for differences in the royalties due for Material from the Premises, and that from the Redlands Aggregates Site, and reconcile any amounts due or any credit for any amounts that may be overpaid during the immediately preceding twenty-four (24) month period. In the event the parties are unable to come to an agreement on such reconciliation, the matter shall be submitted to binding arbitration, as provided for herein.

4.3. Royalty Rate. For the first twelve (12) month period following the Commencement Date, the royalty rate shall be set at Fifty-Five Cents ($0.55) per ton. As of the first anniversary of the Commencement Date, the royalty rate shall be the Fair Market Royalty. On or before ninety (90) days prior to the first anniversary of the Commencement Date, the parties shall meet and confer, in an attempt to come to an agreement on the Fair Market Royalty. The parties shall provide, one to the other, any and all market analyses, appraisals, or other valuation Materials or opinions upon which their proposed Fair Market Royalty is based. If no agreement is reached within thirty (30) days of the parties' exchange of such information, the matter shall be submitted to binding arbitration, as provided for herein. The arbitrator shall select either one or the other of the parties' original Fair Market Royalty proposals, and the Fair Market Royalty rate so selected shall be the royalty rate paid by Lessee to the District for the remainder of the term, subject to any Index adjustment. The arbitrator shall not have the authority or discretion to compromise between the two parties' proposals, nor to come to an independent determination of the Fair Market Royalty rate. In the arbitration, no party may rely on, or submit to the arbitrator, any Material which was not originally exchanged pursuant to the exchange of Fair Market Royalty proposals ninety (90) days before the Commencement Date. The arbitrator shall only select one of the parties' Fair Market Royalty rates, which he or she determines most accurately determines the appropriate Fair Market Royalty.

4.4. Index Adjustment. All royalty rates shall be adjusted annually, on each anniversary of the Commencement Date, by any change in the Index, using 2012 as the base year. In no event, however, shall such change in any one year amount to a change in the applicable royalty rate more than fifty percent (50%), higher or lower, than the immediately preceding Fair Market Royalty rate. Such fifty percent limitation shall operate only to serve as the cap or floor for the year in which the change in the Index results in a change in the royalty rate of 50% or more, and not to change prospectively the Index calculation for succeeding years.

4.5. Guaranteed Annual Royalty; Orange Street Plant Site Material as Recovery of Credits.

(a) Guaranteed Annual Royalty Payments. Notwithstanding the level of excavation or sale of Material from the Premises, Lessee shall pay to District a guaranteed annual royalty, in addition to the Orange Street Plant Site rent. Such guaranteed annual royalty shall be in the amount of One Hundred Fifty Thousand Dollars ($150,000.00) for the first year of the Lease, and shall increase by an additional One Hundred Thousand Dollars ($100,000.00) on each anniversary of the Commencement Date thereafter; provided, however, such guaranteed annual royalty shall not exceed $550,000.00 annually. Such guaranteed annual royalty shall be paid in equal monthly installments, and shall be submitted along with all reporting by Lessee of its excavation and sales activities on the Premises and the Redlands Aggregate Site, comparing the amounts of guaranteed annual royalty paid, against the actual amount of Material excavated, and the actual amount of Material sold or otherwise removed from the Premises. The guaranteed annual royalty amount shall be paid by Lessee to the District; provided, however, to the extent District has Annual Royalty Credits in excess of Three Million Four Hundred Thousand Dollars ($3,400,000.00) ("Royalty Credits Cap"), Lessee's obligation to pay Guaranteed Annual Royalty Payments shall be suspended until such time as the Annual Royalty Credits are reduced below the Royalty Credits Cap., All per-ton royalty rates applicable to Material excavated by Lessee in excess of the guaranteed annual royalty rate shall be paid at the then-prevailing royalty rate, in addition to guaranteed annual royalty.

(b) Guaranteed Annual Royalty Credits. To the extent the per-ton royalty rate paid by Lessee in any given Lease Year is less than the amount of guaranteed annual royalty, Lessee shall be credited for the difference against any per-ton royalties otherwise due in any succeeding Lease Years above the guaranteed annual royalty due in such Lease Year, until all such credits have been offset against per-ton royalties in excess of applicable guaranteed annual rental. In no event shall such credit ever diminish or decrease the amount of guaranteed annual royalty due.

(c) Orange Street Plant Site Holdover to Retire Guaranteed Annual Royalty Credits. Except in the event of a Lessee default under Section 10.1 below, should this Lease expire or otherwise terminate prior to the time Lessee's guaranteed annual royalty credits have been retired, Lessee shall have the right, but not the obligation, to hold over and continue to occupy the Orange Street Plant site only, to remove any Improvements or other equipment or operations thereon, and to excavate and sell Material from such site. Such holdover right shall begin on the date the Lease expires or is terminated for any reason, including Lessee's exercise of its right of termination under Section 10.3 below. No guaranteed annual royalty or other royalty amounts shall be paid to District on the Material excavated and sold by Lessee from the Orange Street Plant Site during the holdover period, and such amounts of such per-ton royalties as would otherwise be applicable to the Material, as adjusted by the Index through and

including the holdover period, shall be applied to reduce the credits for guaranteed annual royalty payments made in excess of royalties paid on a per-ton basis. Lessee shall pay the Orange Street Plant site rent for all time that Lessee occupies the Orange Street Plant site during such holdover period, and such Orange Street Plant Site rental shall be adjusted by the Index, using the Effective Date as the base period and the beginning of the holdover period as the adjustment date for application of the Index adjustment. Thereafter, on each anniversary date of the beginning of the holdover period, the Orange Street Plant Site rent shall be adjusted again, per the Index. Such Orange Street Plant Site rent shall not be offset against or reduced to retire any guaranteed annual royalty credits. Lessee's right to hold over on the Orange Street Plant site shall continue only until the per-ton royalty amounts applicable to such Material excavated and sold by Lessee from the Orange Street Plant Site during the holdover period are equal to the sum total of guaranteed annual royalty credits for Lessee's payments of guaranteed annual royalty in excess of per-ton royalty, which accrued prior to the holdover period, but in no event longer than five (5) years from the time of the Lease's expiration or earlier termination. Any guaranteed annual royalty credits not retired within the applicable holdover period shall be lost, and forfeited without any further liability from District to Lessee.

4.6. Late Payments. Any payment due hereunder shall be made within thirty (30) days of the expiration of the month during which the excavations occurred, or the sales or other transfers occurred. Late payments shall incur a one and one-half percent per month late charge, which charge shall be added to, and considered to be additional, rent.

5.0 Permits.

5.1. Wash Plan Processing. As of the Commencement Date the parties are cooperating as part of the Upper Santa Ana River Wash Land Management and Habitat Conservation Plan Task Force ("Task Force") to process and secure approval of the Wash Plan. Under the agreement forming the Task Force, each of the participants was assigned a certain percentage of allocation for the overall costs of the Wash Plan. Beginning on the Commencement Date, and continuing until the Wash Plan gets final approval, or either parties' participation in the Task Force agreement shall have been finally terminated, either as provided in paragraph 23 of that agreement, or upon dissolution of the Task Force pursuant to paragraph 22 of the Task Force agreement, Lessee shall advance to District one-half of District's share of the Wash Plan processing and consultant costs, under the allocation as defined in the Task Force agreement. All such advanced costs shall be credited against any guaranteed annual royalty otherwise owing from Lessee to District, and to the extent such advanced costs exceed the amount of guaranteed annual royalty, shall be credited against future years' guaranteed annual royalty, until the entire amount of such advanced costs has been retired.

5.2. Lessee's Obligation to Secure Permits. Notwithstanding the parties' mutual efforts to effectuate the Wash Plan, it is and shall be the Lessee's sole responsibility to secure any and all land entitlements, SMARA permits or approvals, conditional use permits, or any and all discretionary permits required for Lessee to operate and maintain its operations on the Premises for the excavation, processing, removal, and sale of Material therefrom, including

any reclamation plans, or requirements, from all applicable federal, state and local jurisdictions (collectively "permits" herein). In the event the Wash Plan fails to result in the grant of such permits, Lessee shall diligently and continuously take all other actions necessary to obtain all permits required to accomplish the Material excavation purposes set forth herein, and shall obtain such permits at Lessee's sole cost and expense. Lessee shall submit to District, no less than forty five (45) days prior to submission of any permit application, or forty five (45) days prior to accepting any conditions that may be imposed on any such permit, all information, studies, applications, and other information relative to the permit or the proposed terms and conditions proposed to be imposed on same, for District's prior, written approval. District's review shall be limited to such permit applications, and / or permit conditions that the District determines, in the exercise of its reasonable discretion, could impair its ability to perform its water storage, conservation or spreading activities, or District's other reserved rights and uses in the Premises under this Lease, and / or impact the Premises beyond the term of this Lease. District shall not unreasonably disapprove the permit nor the conditions thereto. Lessee shall not finalize the permit, nor take any action in furtherance of conducting activities pursuant to any permit, until the District has approved the permit and any conditions thereto. In the event District fails to approve or disapprove any permit submitted to it by Lessee, provided that all proposed conditions have been documented and forwarded to District, within forty five (45) days from District's receipt of same from Lessee, the permit and conditions thereto shall be deemed approved by the District.

5.3. District Cooperation With Permits. District agrees that within the bounds of its reasonable discretion as reserved in Section 5.2 above, it will reasonably cooperate with Lessee and Lessee's efforts to obtain applicable permits and land use entitlements to allow Lessee to fulfill the purposes of this Lease, including, but not limited to, execution of petitions, applications or authorizations for applications. No consent given under this Lease by the District shall affect or limit Lessee's obligations under this Lease, nor shall any approvals or consents given by the District, in its capacity as the owner of the Premises, be deemed to be approval as to compliance or conformance of any application or any permit with applicable governmental codes, laws, orders, rules, or regulations.

5.4. Habitat Mitigation Dedications. District and Lessee acknowledge that effectuation of the Wash Plan, or potentially other permits should the Wash Plan not come fruition, may require the dedication by District of various areas, within or without the Premises, for endangered or threatened species habitat preservation or management. Notwithstanding this, however, District and Lessee agree to cooperate reasonably in an effort to effectuate the Wash Plan, as consistently as possible with the identified mitigation areas from the Final Environmental Impact Report for the Wash Plan certified by the District in 2008. The parties acknowledge the need to meet and confer, between themselves and other members of the Task Force, regarding the proper identification of any such required mitigation areas, the degree of reserved water conservation activity the District may require as a result of any encumbrance of District property for such purposes, and the nature and cost of habitat management strategies appropriate for such areas, none of whose specifics is presently known at this time. District and Lessee agree to cooperate reasonably on such subjects, in an attempt to effectuate the purposes of the Wash Plan and the purposes of this Lease.

5.5. Lessee Indemnification re Permit Challenges. Except at to such permits as may be obtained by the parties pursuant to the Wash Plan, Lessee shall indemnify, defend and hold the District harmless from any action, judicial or otherwise, contesting the validity of any permit granted to Lessee by the District or any other permitting jurisdiction, and Lessee shall promptly pay any judgment or award against the District in any such action, and shall take all other measures necessary to diligently defend and resolve any challenge to the validity of any such permit.

5.6. Transfer of Permits. Upon the expiration or earlier termination of this Lease, all transferable permits applicable to the Premises shall immediately transfer to the District, and Lessee shall take all actions required to complete such transfer, and otherwise cooperate fully with the District in accomplishing everything required to complete such transfer.

6.0 Use and Operation of Premises.

6.1. Safeguards. Lessee shall, at all times during this Lease, maintain proper and adequate safeguards on the Premises to assure its orderly use, and to prevent intrusion from trespassers, playing children and vandals.

6.2. No Waste or Nuisance. Lessee shall not maintain, commit or permit the maintenance of or commission of any waste or any nuisance (as defined in California Civil Code section 3479) within the premises. Lessee shall not use or permit the use of the Premises for any unlawful purpose.

6.3. Hazardous Materials Lessee shall not cause, permit or suffer the release or dumping of any Hazardous Materials on the Premises at any time. As used in this Lease, the term "Hazardous Materials" shall mean:

(a) Hazardous wastes, hazardous materials, hazardous substances, hazardous constituents, toxic substances or related materials, whether solids, liquids or gases, including but not limited to, substances deemed as "hazardous wastes," "hazardous materials," "hazardous substances," "toxic substances," "pollutants," "contaminants," "radioactive materials," or other similar designations in, or otherwise subject to regulation under, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended ("CERCLA"), 42 U.S.C. §§ 9601 *et seq.*; the Toxic Substance Control Act ("TSCA"), 15 U.S.C. § 2601, *et seq.*; the Hazardous Materials Transportation Act, 49 U.S.C. § 1802; the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. § 9601, *et seq.*; the Clean Water Act ("CWA"), 33 U.S.C. § 1251, *et seq.*; the Safe Drinking Water Act, 42 U.S.C. § 300, *et seq.*; the Clean Air Act ("CAA"), 42 U.S.C. § 7401, *et seq.*; the Hazardous Waste Control Law, California Health & Safety Code § 2025, *et seq.* and Health & Safety Code § 33349; the Carpenter-Presley-Tanner Hazardous Substance Account Act, California Health & Safety Code Div. 20, Ch. 6.8; the Hazardous Materials Release Response Plans and Inventory Act, California Health & Safety Code Div. 20, Ch. 6.95; the Underground Storage of Hazardous Substances Act, California Health & Safety Code Div. 20, Ch. 6.7; the Porter-Cologne Act, California Water

Code § 13050, *et seq.*; and in any permits, licenses, approvals, plans, rules, regulations, or ordinances adopted, or other criteria and guidelines promulgated pursuant to, the preceding laws (collectively, the "Environmental Laws"); and

(b) Any other substances, constituents or wastes subject to any applicable federal, state or local law, regulation or ordinance, including any Environmental Law now in effect, including but not limited to petroleum, refined petroleum products, waste oil, waste aviation or motor vehicle fuel, asbestos, lead in water, paint or elsewhere, radon, polychlorinated biphenyls (PCBs), and ureaformaldehyde.

Lessee shall defend, indemnify, and hold District harmless for any release of any Hazardous Materials on the Premises caused by or arising from Lessee's possession of the Premises, or any of its activities undertaken thereunder except cause by the negligence or willful misconduct of District or any breach of District's warranties. Such indemnification shall include promptly paying any and all costs for site characterization, remediation, and any and all judgments for damages to persons or property, including any penalties, regulatory fines, or any other liabilities which may arise out of the Hazardous Materials released.

6.4. Maintenance and Perimeter Controls. Lessee shall, to the satisfaction of the District, keep and maintain the Premises and all improvements of any kind thereon in a state of good repair, clean, safe, and in compliance with all regulatory standards, laws, ordinances, statutes, and regulations applicable thereto, and any licenses or permits in connection therewith. Lessee shall maintain, and repair, fencing around the exterior boundaries of any active excavation on the Premises, so as to prevent purposeful or accidental intrusion by unauthorized persons or parties; provided, however, Lessee shall not be responsible or liable for maintenance, repair, or fencing around any portion of the Premises devoted to District's water spreading facilities on which no active excavation occurs. District shall be given keys, combinations, or other means of access through any such gates that may be connected or maintained pursuant to this requirement. Lessee and District shall each indemnify the other for any claims, liabilities, losses, or damages to persons or property caused by the indemnifying party's negligence or willful misconduct regarding such perimeter controls.

6.5. Mining Controls. In addition to complying with the conditions of any mining permit or other governmental approval relating to its mining activities, Lessee shall conduct its mining activities on the Premises subject to the following conditions and limitations:

(a) Timing. Lessee will notify the District in writing regarding which specific areas of the Lease Property will be mined, and at what times. Such notice shall be for the purpose of permitting the District to utilize portions of the Premises which are not actively being mined by Lessee, for water spreading activities or other activities which do not unreasonably inhibit or interfere with Lessee's proposed mining activity, which right is specifically granted to and reserved by the District. District and Lessee agree to reasonably coordinate their respective activities to minimize any interference with both groundwater recharge activities and mining activities.

(b) Mining Within Acceptable Distance to Groundwater.

(i) For all mining areas, Lessee shall establish, at its own cost, groundwater monitoring wells, at such times, and in such locations and numbers, as may be reasonably required by District to determine groundwater levels in the vicinity of active mining areas. Such wells shall be established in numbers and at locations sufficient to provide information regarding groundwater levels throughout the full extent of Lessee's active mining operations. District shall at all times have access to such wells, and may utilize such wells at any time to monitor or characterize groundwater levels; provided, however, District shall promptly replace or repair any damage caused by the District to the monitoring wells. Lessee does not warrant or confirm the accuracy of the monitoring wells and the District assumes all risk in utilizing the information obtained from the monitoring wells. District shall operate and maintain such wells, provided that Lessee shall not conduct any operations on the Premises which could damage or destroy such monitoring wells. Lessee shall promptly repair or replace any wells damaged by Lessee's mining or other activities, at Lessee's cost.

(ii) In the event groundwater levels in or around Lessee's mining operations rise to a point that is within twenty feet (20') of any active excavation, all such operations shall thereupon immediately be halted by Lessee, until such time as the groundwater table level drops to a point more than twenty feet (20') below the level of any active mining operations. Lessee shall be released from any payment obligations which accrue during any period in which Lessee is required to halt excavation activities under this subsection (ii). In addition, Lessee's Guaranteed Annual Royalty shall be reduced proportionally based on the number of days Lessee is required to cease excavation activities.

(iii) In the event of any unplanned cessation of mining activity by Lessee because of groundwater levels, District shall use its best efforts to redirect surface water recharge to areas which will not exacerbate high groundwater conditions in areas of active mining operations, and shall continue to do so until 1) the high groundwater conditions have abated, and mining activities can resume within the necessary twenty foot (20') separation between mining activities and groundwater levels in the affected area of active mining operations, or 2) it appears that District's operations are not affecting groundwater levels in the affected area of active mining operations, or 3) District has no reasonable alternative to spreading water in or around the areas of active mining operations.

(c) Depths. The Premises shall be mined in phased depths, as follows:

(i) In the initial phase, all of the Premises may be mined to a maximum depth of seventy-five feet (75').

(ii) In the second phase, all of the Premises may be mined to an additional depth of twenty-five feet (25'), provided:

(a) No more than fifteen percent (15%) of reserves are available to Lessee in the Premises above the Phase I depth limit of seventy-five feet (75') (excluding any reserves that are located at the Orange Street Plant Site which), lands are being utilized for processing, shipping, and storage of Materials; and

(b) Groundwater monitoring well information indicates such additional twenty-five foot depth can be achieved without posing an unreasonable risk of contamination, evaporation, or other risk, to groundwater.

(iii) The third phase will permit mining of the Lease Property to an additional depth of twenty feet (20'), provided:

(a) No more than fifteen percent (15%) of reserves are available to Lessee in the Premises above the Phase II depth limit of one hundred feet (100') (excluding any reserves that are located at the Orange Street Plant Site), which lands are being utilized for processing, shipping, and storage of Materials; and

(b) Groundwater monitoring wells indicate such additional depth can be achieved without posing an unreasonable risk of contamination, evaporation, or other risk, to groundwater.

(d) Side Slopes. For all portions of the Premises which are located in Section 12, mining shall be conducted in such manner that the ultimate side slope excavations and pit bottoms are never at any time steeper than 3:1 as measured from permitted setbacks. For those portions of the Premises located in Section 9, 10, and 11, side slopes shall be no steeper than 2:1 except existing slopes mined prior to the Effective Date left a finished slope steeper than 2:1, and the parties agree that Lessee has no obligation to correct those slopes. The ultimate side slopes, except at the Northwest corner of the Redlands Aggregate North parcel (south ½ of the northeast ¼ of Section 11, T1S, R3w, SBBM), and except where such side slopes were already in their final configuration as of the Effective Date of the July 10, 1997 Lease Amendment, shall be maintained in their natural condition, not reconstructed or recompacted.

6.6. Silt Deposits. District agrees that Lessee may deposit silt or impermeable fines within the Premises, only as follows:

(a) Alabama Pit No. 2 may be filled to its full capacity.

(b) The existing silt located along the north edge of the Johnson South Parcel and the existing silt pond on the Johnson North Parcel (consisting of the 80 acre parcel located in the South one-half of the Northwest one-quarter of

Section 11, T1S, R3W, SBBM), as shown and delineated in Exhibit "C" hereto, may remain, and effective on the Effective Date District waives any demand or claim for removal of silts deposited in such area by Lessee. District's waiver is of District's right, if any, to demand removal of such silts under its contractual rights as Lessor, and District makes no further representation or warranty regarding Lessee's ability to maintain any silts already deposited or whether such deposits comply with any applicable laws, statutes, regulations, or permit conditions of any kind. In addition, Lessee may use the Johnson North Parcel (but no portion of the Johnson South Parcel) for future deposit of silts or impermeable fines. Lessee shall not conduct any mining activity on the Premises north of the existing Johnson North parcel silt pond, except as may ultimately be allowed under the Wash Plan. The existing silt pond on the Johnson North Parcel (consisting of the 80 acre parcel located in the South one-half of the Northwest one-quarter of Section 11, T1S, R3W, SBBM), may remain. In addition, Lessee may use this area for future deposit of silts or impermeable fines. Lessee shall not conduct any mining activity on the Premises north of the existing Johnson North parcel silt pond.

(c) For both the Alabama Pit No. 2 and the Johnson North Parcel silt ponds, Lessee shall reclaim the areas by grading the top level of such silts or impermeable Materials according to the reasonable specifications of District, and by backfilling with non-silt, pervious earth Material of at least ten feet (10') of depth, and construct shallow water percolation basins and dikes thereon above the ten feet of pervious Material, all to the reasonable specifications of the District, so as to make the reclaimed land usable for spreading water in shallow surface ponds. Lessee shall not be responsible for payment of royalty for any Material excavated exclusively for such purposes.

(d) All pit bottoms shall be scarified to a depth of two feet (2'), as part of Lessee's reclamation activities, prior to quitting any mining site.

6.7. Lessee Production of Water. In addition to the groundwater monitoring wells provided for in Section 6.5 (2) (i), Lessee may sink such groundwater wells, or otherwise produce water from the Premises, as may be reasonably required in the quarrying, processing, and transportation of Material excavated and sold or removed from the Premises. Any wells established by Lessee on the Premises shall be considered improvements, and shall be subject to the requirements of Section 2.1 above. Lessee shall, in addition to any and all other payments due under this Lease, pay any groundwater charges associated with production of groundwater from the Premises, at then-applicable rates, and shall pay any and all other permitting or other charges required to establish and operate such wells. In connection with such wells, Lessee shall, upon reasonable request by the District, provide such information regarding groundwater levels, or water quality, produced from such wells, as Lessee otherwise does or is required to produce as a well operator, at no additional charge to District

7.0 District's Reservations.

7.1. District's Reservation for Water Conservation Activities. District reserves the right, from time to time and as it deems necessary in the exercise of its reasonable discretion, to utilize all or any portion of the Premises for its water recharge, conservation, spreading, and other operations. In connection with the exercise of this reserved right, the Conservation District shall make every effort to harmonize its water conservation activities with the then-current and anticipated immediate future excavation and other activities of Lessee, with the goal that the mining activity and the water conservation activity can harmoniously exist, without interruption to either. In the exercise of these reserved conservation rights, District shall do all of the following:

(a) Provide Lessee no less than forty-eight (48) hours' notice of its need to utilize portions of any active excavation areas, or areas of active haul road or other transport of excavated Material to and from areas of excavation and the plant site or stockpiling sites utilized in connection with the same.

(b) District shall not take all then-permitted portions of the Premises, which at that time Lessee is or could actively mine, out of production.

(c) Except in circumstances of sudden threatening precipitation, threat of immediate flooding from dam releases or other causes, or other immediate danger to persons or property, District shall meet and confer with Lessee to determine the appropriate areas for the exercise of the District's reserved water spreading rights as they impact active areas of excavation or other Lessee activities, to harmonize the need for areas of spreading with the needs of portions of the Premises for the activities permitted or authorized by this lease.

7.2. No Liability. Notwithstanding the procedural restrictions above, District shall have no liability to Lessee for any interruptions to excavations, or any other activities Lessee may undertake on the Lease, from the exercise of its reserved water spreading rights except as otherwise provided herein.

7.3. Inspection and Monitoring. District shall have the right, at all times during the pendency of this Lease, and at its own expense, to have an inspector remain on the Premises, including any plant site, scales, or sales areas, to observe, monitor, and inspect all aspects of Lessee's operations, and to confirm the validity and accuracy of Lessee's record keeping with respect to excavation and sale and removal of Material, and Lessee's compliance with all other aspects of the Lease. Such inspector shall be required to have all reasonable safety clearances or certifications required to access such areas of the Premises as District desires to monitor, as may be required under federal, state, or local statute, ordinance, or regulation. In addition, the inspector shall comply with Lessee's reasonable operating procedures and regulations, and shall undertake its monitoring activities in such a way as not to unduly disrupt, delay, or interfere with Lessee's operations.

7.4. Periodic Inspections. Whether or not District exercises its right to have an inspector on the Premises, District may, at any time during the pendency of this Lease, and upon no less than twenty four (24) hours' notice, come on to the Premises to assure compliance with permit conditions, conditions of the Lease, or the proper counting of tonnages excavated or sold.

7.5. Confidentiality of Information. All information received by the District pursuant to any inspector it maintains on the Premises, or any of its periodic inspections, shall be used solely for the purpose of assuring compliance with the terms of the Lease, and shall be considered confidential to Lessee, and kept confidential by District to the full extent permitted by the law. In connection with the receipt of such information, both District and Lessee specifically intend that the information is considered to be protected under Government Code section 6254(e), and shall not constitute a public record.

7.6. Audit. District may, no more frequently than once every two (2) years, and at its own expense require a full audit of Lessee's books, records, receipts, accounts, and any or all other information pertinent to the payment of plant site rent, royalties, or guaranteed annual royalty hereunder, including tonnages of Material excavated, sold, or otherwise transferred from the Premises the Redlands Aggregates Site, or both. Lessee shall reasonably and promptly cooperate with any and all requests made by District in connection with such audit, and any and all information received by the District in connection with such audit shall be considered confidential, as provided in the immediately preceding Section. To the extent the audit reveals any discrepancies between the amounts of plant site rent, royalty, or guaranteed annual royalties due, or any claimed offsets for Wash Plan processing costs or other items that may be agreed to between the parties as a legitimate offset to any amounts otherwise owing under the Lease, the party from whom either payment or refund is owing shall promptly pay the amount indicated by the audit. In the event of any disagreement as to the accuracy or results of the audit, the matter shall be submitted to binding arbitration, as provided for herein.

8.0 Binding Arbitration. In the event of any dispute arising under this Lease, including but not limited to disputes with respect to tonnages of Material excavated or sold or otherwise removed from the site, amounts of plant site rent, per-ton royalty, or guaranteed annual royalty, advanced costs for Wash Plan processing, or other amounts claimed due from one party to the other under this Lease, the determination of Fair Market Royalty, or any other controversy or dispute arising under this Lease, the matter shall be submitted to binding arbitration. To the extent not otherwise provided herein, any party wishing to submit any disagreement or alleged breach or noncompliance with any of the covenants or other provisions of this Lease shall first make demand upon the other party, in writing, specifying the issue, the amounts claimed due if known, and the steps it requires of the other party to resolve the dispute. Following such written notice, the parties shall, unless a different time period is specifically provided for otherwise herein, meet and confer in an attempt to resolve the dispute for a period of fourteen (14) days thereafter. In the event parties are unable to come to resolution, either party may demand that the matter may be submitted to binding arbitration. If such a demand is made, both parties shall, within five (5) business days of the receipt of the written demand to submit to arbitration, submit to the other a list of three (3) proposed arbitrators. Following exchange of such lists, the parties shall attempt to mutually select a single arbitrator to arbitrate the dispute. In the event the parties are unable to do so, each of the parties shall strike two arbitrators from the list of the other party, and the two remaining listed arbitrators shall thereupon decide upon a third arbitrator, who shall be someone other than the three originally listed by either party. Arbitrations regarding Fair Market Royalty shall proceed as provided for in Section 4.3 above. Arbitrations on all other subjects shall proceed according to such rules as the parties may reasonably agree to, and in the absence of their ability to agree, upon such rules as may be imposed by the single selected arbitrator. The decision of the arbitrator shall be final and binding, with each party waiving any

right to jury or other judicial determination of the dispute, except that the award may be corrected, or vacated, as provided by Code of Civil Procedure sections 1280 et seq. Notwithstanding Code of Civil Procedure section 1286.4 and 1286.8, the award may also be vacated or corrected if it is clearly contrary to law. Each party shall initially bear its own costs and fees in connection with the prosecution and hearing of the arbitration, and shall pay one-half (1/2) of the costs of the arbitrator. The advanced share of the arbitrator's costs and expenses, and attorneys' fees, expert witness fees, and the fees of any audit shall be considered as recoverable costs of the arbitration, and the reasonable costs thereof shall be recoverable by the prevailing party, in addition to any other relief that might be awarded.

9.0 Insurance. Lessee shall maintain, and keep in effect, all of the following policies of insurance at all times it occupies the Premises:

9.1. Workers' Compensation Insurance. By signature hereunder, Lessee certifies that Lessee is aware of the provisions of Section 3700 of the Labor Code, which requires every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and Lessee will comply with such provisions before commencing the performance or the work of this Agreement.

9.2. Workers' Compensation and Employer's Liability Insurance. Lessee, its agents, and its sub-contractors shall cover or insure under the applicable laws relating to workers' compensation insurance, all of their employees employed directly by them or through subcontractors in carrying out the work contemplated under this Agreement, all in accordance with the Workers' Compensation and Insurance Act, Division IV of the Labor Code of the State of California and any Acts amendatory thereof. Lessee shall provide employer's liability insurance in the amount of, at least, $1,000,000 per accident for bodily injury and disease.

9.3. Liability Insurance. Lessee shall provide and maintain at all times during the performance of this Agreement, the following commercial general liability insurance:

(a) Coverage. Coverage shall be at least as broad as the following:

(1) Commercial General Liability. Commercial General Liability coverage (Occurrence Form CG 0001) in the amount of two million dollars ($2,000,000) per occurrence for bodily injury, personal injury, and property damage. If Commercial General Liability Insurance or other form with a general aggregate limit is used, either the general aggregate limit shall apply separately to the project/location (with the ISO CG 2501 or insurer's equivalent endorsement provided to the District) or the general aggregate limit shall be twice the required occurrence limit.

(2) Required Provisions. All policies specified hereunder shall state or be endorsed to state that coverage shall not be canceled by either party, except after thirty (30) days (10 days for nonpayment of premium) prior written notice by U.S. mail has been given to the District.

(3) Required Format. All of the liability insurance shall be provided on policy forms satisfactory to the District. All insurance

correspondence, notations, certificates, or other documents from the insurance carrier or agent/broker shall each separately reference the District project number.

(4) Deductibles and Self-Insured Retention. Any deductible or self-insurance retention must be declared to and approved by the District. At the option of the District, the insurer shall reduce or eliminate such deductibles or self-insured retention.

(5) Acceptability of Insurers. Insurance is to be placed with insurers having a current A.M. Best's rating of no less than A-:VII or equivalent or as otherwise approved by the District.

(6) Evidences and Cancellation of Insurance. Prior to execution of this Agreement, Lessee shall file with the District evidence of insurance satisfactory to the District. The insurer will give by U.S. mail written notice to the District at least thirty (30) days prior to the effective date of any cancellation, except for nonpayment of premium for which ten (10) days prior written notice will be given. Lessee shall, upon demand of the District, deliver to the District all such policy or policies of insurance and the receipts for payment of premiums thereon.

9.4. Subcontractors. In the event that Lessee employs other contractors as part of the services covered by this Agreement, it shall be the Lessee's responsibility to confirm that each subcontractor meets the minimum insurance requirements specified above.

10.0 Default or Termination.

10.1. Default by Lessee. Each and every covenant and agreement contained in this Lease is declared to be a condition to the Lease, and to the rights hereby granted to Lessee. Lessee shall be considered to have materially breached this Lease, giving the District the remedies set forth in Section 10.2 below, in the event that any one or more of the following occur:

(a) Lessee fails or refused to pay to the District any royalties or other rentals due hereunder when due, and such royalty or rent remains unpaid for thirty (30) days after written notice by the District to Lessee; or

(b) Lessee defaults in the performance of or breaches any covenant, condition, or provision contained in this requirement other than set forth in Section 10.1 (a) hereinabove, and such default or breach is not cured within thirty (30) days after written notice thereof is served by the District on Lessee, or if such cure is physically impossible to cure within thirty (30) days, Lessee has begun and diligently prosecuted such cure.

(c) Lessee becomes insolvent. For the purposes of this Lease, Lessee shall be conclusively presumed to have become insolvent if (i) a receiver is appointed to take possession of all or substantially all of Lessee's property

because of insolvency; or (ii) Lessee makes a general assignment for the benefit of creditors; or (iii) Lessee allows any judgment against Lessee to remain unsatisfied or unbonded for a period of thirty (30) days or longer; or (iv) an attachment or execution is levied upon or against any or all of Lessee's right, title, or interests in or under this Lease, and the same shall not have been released within thirty (30) days from the date thereof; or (v) proceedings or receivership in bankruptcy have been instituted against Lessee; or (vi) Lessee is adjudicated bankrupt.

(d) Any disagreement between the parties as to whether a default has occurred shall be decided by binding arbitration, as provided for herein.

10.2. Remedies on Lessee's Default. Should Lessee breach this Lease, the District may, in addition to any other remedy given the District by law or in equity:

(a) Continue this Lease in effect by not terminating Lessee's right to possession of the Premises, in which event District shall be entitled to enforce all of the District's rights and remedies under this Lease, including the right to recover the royalties and other rental payments specified herein, as such royalties and payments become due under this Lease; or

(b) Terminate this Lease and Lessee's right to possession of the Premises;

(c) In the event Lessee becomes insolvent, the District may, by giving thirty (30) days' written notice to Lessee or to the person appointed to manage Lessee's affairs at the address for such person appearing in the official records of the court that appointed such person, terminate this Lease and forfeit Lessee's rights under the Premises and in any Improvements or facilities on or appurtenant to the Premises.

The remedies herein shall not be exclusive, but shall be cumulative and in addition to any and all of the remedies now or hereafter allowed by law or otherwise authorized in this Lease, and the exercise of one or more of said rights, powers, elections, or remedies shall not impair the District's right to exercise any other right, power, election, or remedy.

10.3. Lessee's Right of Termination. Lessee may terminate this Lease, with or without cause, at any time after the first anniversary of the Commencement Date, by providing District no less than one hundred and eighty (180) days' written notice. Upon giving such notice, and until the one hundred eighty day period passes, the Lease shall remain in effect, and Lessee shall fulfill all obligations of Lessee hereunder which accrues during the one hundred eighty (180) days, including the payment of Orange Street Plant Site rent, guaranteed annual royalty and any per-ton royalty amounts.

10.4. Surrender of Possession. At the expiration or termination of this Lease, for whatever reason, Lessee shall execute, acknowledge, and deliver to the District a Quitclaim Deed conveying all right, title, and interest of the Lessee to the Premises, both land and improvements. Thereafter, Lessee shall promptly, but in any event no later than six (6) months

following the expiration or earlier termination of the Lease, remove all Improvements (unless the requirements for such removal has been waived in writing by District), portable buildings, equipment, and personal property placed on the Premises by Lessee, and clear the Premises of all debris, and otherwise surrender to the District the Premises in good order and clean condition.

10.5. Quiet Enjoyment. District represents, covenants and warrants that Lessee, upon paying the rent and performing the covenants herein provided, shall peacefully and quietly have, hold and enjoy the Premises, subject to District's reserved rights hereunder.

11.0 Encumbrance, Assignment, and Subletting.

11.1. Hypothecation.

(a) Lessee shall have the right at any time, from time to time, and subject to prior written approval of the District (except to the extent any Improvements are subject to an encumbrance prior to the execution of this Lease), to subject the leasehold estate and any or all Improvements placed or to be placed on the Premises to one or more deeds of trust or other security instruments (collectively "Leasehold Deed of Trust" herein) as security for a loan or loans or other obligation of Lessee, provided that:

(i) The Leasehold Deed of Trust and all rights acquired under it shall be subject and subordinate to each and all of the covenants, conditions, and restrictions stated in this Lease, and to all rights and interest of the District except as otherwise provided herein, and

(ii) Lessee shall give District prior notice of any such Leasehold Deed of Trust, and shall accompany the notice with a true copy of the note and deed of trust.

11.2. Assignment and Sublease; Transfer Restrictions. Lessee may assign or sublease all or a portion of its interest hereunder to any other entity, but only with the prior written permission of the District. For the purposes of this Lease, an "assignment" shall include a transfer to any person or group of persons acting in concert, of more than twenty-five percent (25%) of the present ownership and/or control of Lessee in the aggregate, taking all transfers into account on a cumulative basis, except transfers of such ownership or control interest between members of the same immediate family, or transfer to a trust, testamentary or otherwise, in which the beneficiaries are limited to members of the transferor's immediate family. In the event Lessee or its successor is a corporation or trust, such transfer shall refer to the transfer of the issued and outstanding capital stock of Lessee, or of the beneficial interests of such trust; in the event that Lessee or its successor is a limited or general partnership, such transfer shall refer to the transfer of more than twenty-five percent (25%) of the limited or general partnership interest; in the event that Lessee or its successor is a joint venture, such transfer shall refer to the transfer of more than twenty-five percent (25%) of the ownership and/or successor control of any such joint venture partner, taking all transfers into account on a cumulative basis.

11.3. Licenses. Lessee shall have the right to grant licenses for ingress and egress to the Premises in connection with any assignment or sublease, provided such licenses are

made specifically subject to the covenants contained in this Lease, and do not extend beyond the term of this Lease. Upon any assignment, the assigning Lessee shall have no further obligation or liability under this Lease with respect to the portion assigned, except for such obligations that arose from the period of such assigning Lessee's occupancy of the Premises, and the new Lessee shall agree in writing to be bound by all terms and conditions hereof.

12.0 Transfer Premises. The parties agree to cooperate reasonably in defining the Transfer Premises, either before or upon the final approval of the Wash Plan, if the Wash Plan becomes effectuated. The Transfer of Premises shall be identified by way of appropriate legal description and plat maps, and shall be incorporated as Premises to which this Lease applies by way of a written amendment to this Lease. The Transfer of Premises shall not be replaced for any portion of the Premises without the mutual agreement of District and Lessee.

13.0 Condemnation. If during the term of this Lease, all or any portion of the Premises is acquired for public use by the use of eminent domain, or transfer under threat of eminent domain, the following shall apply:

(a) District shall be entitled to all compensation awarded for the taking of the Premises, including any leasehold bonus value, except that Lessee shall be entitled to any portion of the award representing the value of its leasehold improvements (less any reversionary value allocable to District upon the scheduled end of the lease term), moveable equipment, inventory, moving expenses or relocation benefits, any award for loss of Lessee's business goodwill, and any separately-assessed attorneys fees or costs which are awarded solely to Lessee.

(b) If the entire Premises are taken pursuant to any condemnation proceeding, or acquisition under threat of condemnation, the Lease shall terminate in its entirety, effective on the date the acquiring entity takes actual possession of the Premises. If only a part of the Premises is taken pursuant to any condemnation proceeding, or acquisition under threat of condemnation, and the part taken is so essential that the remainder Premises subject to the Lease is no longer suitable for the purposes of the Lease, Lessee shall have the option to terminate this Lease. Such option shall be exercised in writing, no later than: (1) thirty (30) days after the filing of any complaint in eminent domain and service of same upon Lessee; or (2) within thirty (30) days of Lessee being notified, by District or any other party, of the acquiring entity's intent to acquire by eminent domain, accompanied by a legal description or other detailed indication of the specific area and property interests the acquiring entity proposes to take, whichever of the two occurs earlier. Any dispute between the District and Lessee as to whether a part taking taken is so essential that the remainder Premises subject to the Lease is no longer suitable for the purposes of the Lease shall be submitted to binding arbitration as provided herein if no condemnation action is then pending, and if such an action is pending, by the court hearing and determining such action.

(c) If only a part of the Premises is taken pursuant to a condemnation proceeding or acquisition under threat of condemnation, and there is either (1) no such material impairment of Lessee's use of the remaining portion of the Premises, or (2) Lessee otherwise elects not to terminate this Lease as provided in this Section, then the Lease shall terminate only as to the portion taken, effective on the date the acquiring entity takes actual possession of the portion taken, and the Lease shall continue in full force and effect as to the remaining portion of the Premises.

(d) If any portion of the plant site is taken as part of a partial taking, the plant site rent shall be reduced, in a percentage equal to the percentage the land taken area from the plant site bears to the total area of the plant site before the taking, such reduction to be effective on the date the Lease terminates as to the portion of the plant site taken. There shall be no reduction to the guaranteed annual royalty or the per-tonnage royalty, however.

14.0 Assignment and Transfer. The qualifications and identity of Lessee are of particular concern to District. It is because of those qualifications and identity that District has entered into this Agreement with Lessee. Accordingly, except as expressly set forth herein, Lessee shall not, whether voluntarily, involuntarily or by operation of law, assign, transfer or convey all or any part of this Agreement or any rights hereunder or in this Lease or the Premises without District's prior written approval, which shall not be unreasonably withheld, delayed or conditioned on items not related to the prospective assignee's financial ability to perform Lessee's requirements and obligations under this Lease, or the prospective assignee's ability to comply with the terms, conditions, or requirements of any applicable permit, entitlement, development condition, or provision of law governing the mining activities to be carried out on the premises under this Lease. Notwithstanding the foregoing, Lessee may assign its interest in this Lease to (a) an entity whose majority interest is owned or controlled by Lessee; or (b) a limited partnership or limited liability company whose general partner or managing member is Lessee. The term "control," as used in the immediately preceding sentence, means, with respect to a person that is a corporation, the right to exercise, directly or indirectly, at least 50% of the voting rights attributable to the shares of the controlled corporation, and, with respect to a person that is not a corporation, the possession, directly or indirectly, of the power to direct or cause the direction of the management or policies of the controlled person

If District approves the assignment, the approval shall be subject to the satisfaction of the following conditions ("**Transfer Conditions**"):

(a) All of the obligations of this Lease shall have been assumed by the transferee pursuant to a written assignment and assumption agreement(s) in a form reasonably approved by District's legal counsel.

(b) The organizational documents of the transferee and a good standing certificate of the transferee shall have been submitted to District.

(c) There shall be no default of Lessee of this Agreement and no event has occurred that would constitute a default with the giving of notice or the passage of time.

15.0 Miscellaneous Provisions.

15.1. Notices. As expressly provided to the contrary herein, any notice, consent, report, demand document, or other such item to be given, delivered, furnished, or received hereunder, shall be deemed given, delivered, furnished, or received when given in writing and personally delivered to an authorized agent of the applicable party, or upon delivery by United States Postal Service, first class registered or certified mail, postage prepaid, return receipt requested, or by national "overnight courier," such as Federal Express, at the time of delivery shown upon receipt, and in any case, delivered to the address, addresses, and persons as each party may from time to time, by written notice designate to the other, and who initially are:

If to District:	San Bernardino Valley Water Conservation District 1630 West Redlands Boulevard Suite A Redlands, California 92373 Attn: General Manager
With a Copy to:	Rutan & Tucker 611 Anton Boulevard Suite 1400 Costa Mesa, CA 92626 Attn: David B. Cosgrove
If to Lessee:	Cemex Construction Materials Pacific, LLC 5180 Golden Foothills Parkway Suite 200 El Dorado Hills, CA Attn: Tom Powell
With a Copy to:	Cemex 920 Memorial City Way, Suite 100 Houston, TX 77024 Attn: General Counsel

15.2. Interpretation. The terms of this Lease shall be construed in accordance with the meaning of the language used, and shall not be construed for or against either party by reason of authorship. This lease contains the full agreement of the parties with respect to the subject matter contained herein, and supersedes all prior leases, negotiations, agreements, and/or representations, whether oral or written. Specifically, this Lease supersedes the "Lease Agreement" dated September 10, 1979, between the District and C. L. Pharris Sand and Gravel, Inc., the "Lease Amendment" dated July 10, 1997 between the District and C. L. Pharris Sand

and Gravel, Inc., dba Sunwest Materials, and any other prior lease agreements between the parties with respect to any portion of the Premises. All such prior lease agreements are superseded and replaced by this Lease Agreement, including any options, rights of first refusal, or other rights that may arise thereunder, all of which are of no force or effect. This Lease constitutes the entire lease agreement between District and Lessee.

15.3. Amendment. This Lease may be amended at any time by mutual agreement of the parties, by an instrument in writing, signed by both parties, and referencing that it is an amendment to this Lease.

15.4. Corporate Authority. The persons executing this Lease on behalf of the parties hereto warrant that (i) the party on whose behalf the signature appears is duly organized and existing; (ii) such party is authorized to execute and deliver this Lease on behalf of such party; (iii) by so executing this Lease, such party is bound to the provisions of this Lease; and (iv) by entering into this Lease, such party does not violate any provision to any other agreement to which said party is bound. .

15.5. Binding on Successors. Subject to the transfer restrictions stated elsewhere in this Lease, this Lease shall be binding upon each party's respective successors and assigns.

15.6. Time is of the Essence. Time is of the essence in this Lease. Failure to comply with any requirement, including but not limited to any time requirement of this Lease shall constitute a material breach of the Lease.

15.7. Severability. The invalidity or illegality of any provision of this Lease shall not affect the remainder of the Lease. The parties hereby declare that it is their intent that, in the event one or more portions of the Lease is declared invalid or unenforceable, they intend that the remainder of the Lease continue to bind both parties, unless the severed remainder is so essential to the terms of this Lease that additional performance of the Lease is impossible or so uncertain as to render meaningful performance impossible or unrealistic.

15.8. Force Majeure. The time limits provided herein for performance of any actions required hereunder shall be extended during any time, but only during such time, as a party is unable to perform obligations to war, insurrection, strikes, lock-outs, riots, floods, earthquakes, fires, casualties, acts of the public enemy, epidemics, quarantine restrictions, freight embargoes, inaccessibility of transportation or critical infrastructure, governmental restrictions or priority litigation, acts of God, or other similar causes beyond the control of, and without the fault of, the party charged to perform. The party to perform shall continue to exercise reasonable diligence to minimize the period of delay during any period of force majeure. An extension of time for any such cause shall be limited to the period of the delay, and shall commence to run from the time of the commencement of the force majeure, provided notice by the party be to perform claiming such extension is sent to the other party within ten (10) days of the commencement of the cause.

15.9. Attorneys' Fees. In the event of any suit to enforce any provision of this Lease, or to prevent or to correct any breach of this agreement, the prevailing party in such

action or proceeding, in addition to any other relief which may be granted, legal or equitable, shall be entitled to reasonable attorneys' fees. As used herein, "attorneys' fees" shall include costs for legal services, and all other reasonable costs for investigating the action, including the taking of depositions and discovery, and any other recoverable costs. All such fees shall be deemed accrued on the commencement of such action, and shall be enforceable whether or not such action is prosecuted to final judgment. The court in any such action shall be requested to name a prevailing party.

15.10. Counterparts. This Lease may be executed in two or more counterparts, each of which shall be an original, but all of which shall constitute one and the same instrument.

Exhibit 4

Roberton's Ready Mix Lease

AGREEMENT

This Agreement is made on this 11th day of August, 2003, by and between San Bernardino Valley Water Conservation District ("District") and Robertson's Ready Mix, Ltd., ("Robertson's"), together "Parties" or individually, "Party".

RECITALS

A. District is a California water conservation district duly formed and operating under Sections 74000, et seq., of the California Water Code, and operating as a water conservation district, having as a purpose the recharge of ground water supply and maintenance of groundwater basins underlying its jurisdiction area.

B. Robertson's is a California limited partnership, duly formed and organized pursuant to the laws of the State of California, with its principal place of business in Corona, California. Robertson's engages in the business of excavating, processing, and selling rock, sand, gravel and other like substances ("Aggregates").

C. On or about October 5, 1992, the Parties entered into a Lease Agreement for Mineral Extractions ("Cone Camp Lease") pursuant to which Robertson's, on the satisfaction of certain conditions, would have the right to extract Aggregates from that property defined as the "Premises" in the Cone Camp Lease, and commonly referred to as "Cone Camp Quarry." A copy of the Cone Camp Lease is appended hereto, denoted Exhibit "A".

D. Some time in or about 1993, the Parties, together with other entities interested in mining, flood control, resource management and conservation, and municipalities, formed the Santa Ana River Wash Area Coordinated Planning Activities Committee ("Wash Committee") to address land use issues related to the Upper Santa Ana River Wash ("Wash").

E. The Wash Committee examined the most appropriate manner in which to use the Wash for the benefit of all landowners without regard to the existing interests in real property situated in the Wash. The Wash Committee determined that there should be a balance of land uses to accommodate the varied and competing concerns. The Wash Committee further determined that in order to achieve land use balance, the existing and potential uses must be reallocated among specific portions of the Wash.

F. Deliberations of the Wash Committee resulted in the drafting, circulation, and approval of a "Proposed Land Management and Habitat Conservation Plan for the Upper Santa Ana River Wash" ("Concept Plan"), which sets out concepts for realignment of mining, water conservation, recreation, habitat preservation, and other uses in the Santa Ana River Wash and was conceptually endorsed by all members of the Wash Committee, including the Parties. A copy of the Concept Plan as presently conceived is attached as Exhibit "B." This Concept Plan is subject to revision as the parties impacted continue to refine and negotiate its parameters. Implementation of the Concept Plan, as it may evolve over time, will require the formation of a Task Force, of which the Parties shall be members, to fund studies for environmental review of proposed mining, transfer of various property ownerships and lease interests, habitat conservation plans, recreational facilities, regional infrastructure, and water supply and conservation activities, and to implement such activities. A Task Force Agreement has been

prepared and circulated among applicable Wash Committee members, including the Parties, to guide and fund implementation of the Concept Plan. It has been reviewed and approved by the Parties, in the form attached hereto as Exhibit "C," and shall be executed by the Parties upon or prior to execution of this Agreement.

G. The Parties have found and determined that it is in their individual best interests to join together with other members of the Task Force to manage activities in connection with the planning, environmental review, and implementation of the Concept Plan (collectively the "Project").

H. The Cone Camp Lease requires that Robertson's "diligently and continuously take all actions necessary to obtain any and all licenses, permits, or other governmental entitlements.... required to accomplish the excavation purpose set out [therein]". There is currently pending before the city of Highland Robertson's application ("Cone Camp Application") for entitlements to mine Aggregates from the Cone Camp Quarry.

I. Robertson's has represented to the District that it has reached an agreement with Cemex Construction Materials, LP ("Cemex"), an entity engaged in business similar to that in which Robertson's is engaged, concerning the allocation, between Robertson's and Cemex, of the right to extract Aggregates from property which is contemplated for the excavation of Aggregates under the Concept Plan.

NOW, THEREFORE, IN CONSIDERATION OF THE MUTUAL COVENANTS CONTAINED HEREIN THE PARTIES AGREE AS FOLLOWS:

Section 1. Definitions.

In addition to capitalized terms defined elsewhere in this Agreement, the following terms shall be defined as follows:

1.1 "Effective Date" shall mean the date on which both Parties have executed the Task Force Agreement and this Agreement.

1.2 "Section," except as may be qualified to refer to the Cone Camp Lease, shall be deemed to be a reference to a portion of this Agreement.

1.3 "WPA" shall mean the Wash Planning Area, as that term is used and defined in the Concept Plan.

1.4 "Robertson's WPA Allocation" shall mean that portion of the WPA which is allocated, through written agreement between Robertson's and Cemex attached as Exhibit "D", to Robertson's for the mining of Aggregates. Robertson's agrees it must obtain approval from District for any substantial changes to this allocation prior to such changes being effective. Any change within the land acreage specifically dimensioned in Exhibit "D" as 1847' x 1303', that does not change the amount allocated to Robertson's for mining by more than 50% of the area of that dimensioned parcel, shall not constitute a substantial change; all other changes to the allocation agreement shall be considered substantial. The "Robertson's WPA Allocation" specifically excludes the real property located within the WPA and owned by Robertson's,

and/or its affiliate RRM Properties, Ltd., A California limited partnership, in fee as of the Effective Date.

1.5 "Premises Transfer Date" shall occur upon transfer of ownership of interest to the District of those portions of the WPA that fall within Robertson's WPA Allocation, and which, as of the date of this Agreement, are owned by the United States, through the Bureau of Land Management.

1.6 "Concept Plan Termination Date" shall mean any date prior to the Premises Transfer Date upon which either Party's participation in the Task Force Agreement shall have been finally terminated, as provided in Paragraph 23 of the Task Force Agreement, or upon dissolution of the Task Force pursuant to Paragraph 22 of the Task Force Agreement. Upon occurrence of the Premises Transfer Date, there shall be no Concept Plan Termination Date.

1.7 "Concept Plan Term" shall mean the period between the Effective Date and the occurrence of the earlier of the (1) Concept Plan Termination Date; or (2) Premises Transfer Date.

Section 2. Obligations During Concept Plan Term.

2.1 Prosecution of Concept Plan. The Parties, and each of them, agree that for so long as the Concept Plan, as may be modified consistent with the provisions of Section 2.3, below, but otherwise in substantially the same form as set forth in the Task Force Agreement, is being diligently and in good faith pursued, they will not, prior to January 1, 2006, terminate their participation under the Task Force Agreement pursuant to Paragraph 23 of the Task Force Agreement. Notwithstanding the foregoing, in the event that prior to January 1, 2006, Robertson's contribution to the total Task Force funding exceeds that required to be paid by CEMEX, or exceeds, by more than 0.25 percent of the total Task Force funding, that required to be paid by the District, Robertson's shall be free to exercise its rights of termination under Paragraph 23 of the Task Force Agreement. . During the Concept Plan Term each of the Parties shall use their best efforts to achieve the Premises Transfer Date; provided, however, that neither Party shall be considered to be in breach of this provision unless a party who believes that a breach has occurred first provides to the other Party written notice informing the notified Party of the specific nature of the alleged breach of this provision, the reasons therefore, the actions the notifying Party alleges must be taken to cure the alleged breach and provides to the noticed Party either, (a) reasonable opportunity to cure the breach, or (b) in the event the breach is of the nature that a cure cannot be promptly effected, reasonable opportunity to prepare and prosecute a plan pursuant to which the breach will be cured, or (c) in the event the alleged breach is one that cannot be cured, a good faith effort to meet and confer regarding whether mutually satisfactory alternative arrangements can be made. In the event of any dispute regarding either Party's alleged breach of this "best efforts" obligation, the matter shall be resolved through the binding arbitration mechanism set forth in Section 8.06 of the Cone Camp Lease.

2.2 Suspension of Robertson's Duty to Obtain Permits. During the Concept Plan Term, Robertson's obligations pursuant to paragraph 5.05 of the Cone Camp Lease, to diligently and continuously take all actions necessary to obtain any and all licenses, permits, or other governmental entitlements required to accomplish the excavation purpose set out in the Cone

Camp Lease, shall be suspended. Such suspension shall begin on the Effective Date and shall continue until the earlier occurrence of: A) the Premises Transfer Date or B) the Concept Plan Termination Date. Robertson's shall not pursue such licenses, permits, or other governmental entitlements for any excavation of any portion of the "Premises," as originally defined in the Cone Camp Lease, at any time during the Concept Plan Term.

2.3 District to Support Robertson's Attempt to Amend Concept Plan. Robertson's has advised District that during the Concept Plan Term, Robertson's will seek Task Force Approval to amend the present iteration of the Concept Plan, to expand the Concept Plan mining area to include additional property owned by Robertson's. District agrees that it will support Robertson's attempt to so amend the Concept Plan, provided it is consistent with District's water conservation and land management objectives.

2.4 Incorporation of Defined Terms into Cone Camp Lease. Beginning on the Effective Date hereof, the following terms, as they are defined herein, shall be deemed incorporated, as applicable, into the Cone Camp Lease: Premises Transfer Date, Concept Plan Term; Concept Plan Termination Date; Robertson's WPA Allocation; and Cone Camp Quarry.

Section 3. Rights and Obligations on Premises Transfer Date

3.1 Transfer of Premises. The Premises shall, upon the Premises Transfer Date, immediately and automatically be deemed to mean and refer to the Robertson's WPA Allocation and the Cone Camp Lease shall no longer apply to the Cone Camp Quarry. Upon the Premises Transfer Date, the parties shall prepare, and may record, such documents as may be necessary or appropriate to reflect the proper legal descriptions or other identification of the transferred Premises, but the transfer of the Premises from the area originally defined in the Cone Camp Lease to the Robertson's WPA Allocation shall not be conditioned or dependent upon such documentation, but rather shall occur immediately upon occurrence of the Premises Transfer Date.

3.2 Revival of Robertson's Duty to Obtain Permits on Premises Transfer Date. Immediately upon the Premises Transfer Date, Robertson's obligations pursuant to Section 5.05 of the Cone Camp Lease, to diligently and continuously take all actions necessary to obtain any and all licenses, permits, or other governmental entitlements required to accomplish the excavation purpose set out in the Cone Camp Lease, shall revive, and shall apply to the Robertson's WPA Allocation, as provided in Section 3.1 of this agreement.

3.3 Commencement Date on Premises Transfer Date. Immediately upon occurrence of the Premises Transfer Date, Section 1.01 of the Cone Camp Lease shall be automatically amended to read as follows:

> 1.01 Commencement Date. The Commencement Date of the Lease Term shall be the date sixty (60) days after occurrence of the Premises Transfer Date.

In applying the foregoing provision it is the intention of the Parties that in the event that Premises Transfer Date does not occur by January 1, 2007, the Cone Camp Lease shall not be terminated, but shall survive, subject to modification triggered by the happening of either Premises Transfer Date or Concept Plan Termination Date.

Section 4. Rights and Obligations on Concept Plan Termination Date.

4.1 Revival of Robertson's Duty to Obtain Permits on Concept Plan Termination Date. Immediately upon the Concept Plan Termination Date, Robertson's obligations pursuant to Section 5.05 (A) of the Cone Camp Lease, to diligently and continuously take all actions necessary to obtain any and all licenses, permits, or other governmental entitlements required to accomplish the excavation purpose set out in the Cone Camp Lease, shall revive.

4.2 Commencement Date on Concept Plan Termination Date. Immediately upon occurrence of the Concept Plan Termination Date, Section 1.01 of the Cone Camp Lease shall be amended to read as follows:

> 1.01 Commencement Date. The Commencement Date of the Lease Term shall, at Robertson's election, either be (x) the date sixty (60) days after the Concept Plan Termination Date, or (y) January 1, 2003, provided, however, that in no event shall District be required to refund any portion of the Phase I Payment before the expiration of one (1) full year following the date Robertson's provides to District written notice of its election hereunder. Robertson's election shall be made in writing and delivered to District prior to the 60th day following Concept Plan Termination Date.

In applying the foregoing provision it is the intention of the Parties that in the event that Concept Plan Termination Date does not occur by January 1, 2007, the Cone Camp Lease shall not be terminated, but shall survive, subject to modification triggered by the happening of either Premises Transfer Date or Concept Plan Termination Date.

Section 5. Mancino Property. Effective immediately upon the Effective Date, the original Cone Camp Lease shall be amended to exclude from the definition of "Premises" therein, all of the property more specifically described in Exhibit "E" hereto (the "Mancino Property").

Section 6. Waiver. Each of the Parties herein fully waives its right to claim that any act, omission, or inaction of the other Party, prior to the Effective Date, constituted: (a) a breach of any of the provisions of the Cone Camp Lease, or any obligation arising thereunder or in connection therewith, or (b) any basis for reformation or rescission of all or any part of the Cone Camp Lease, for which any relief, legal or equitable, and specifically, but not by way of limitation, monetary damages, were or could have been available, either as affirmative relief, or as an offset against any other claim. This waiver extends to all claims or causes of action, whether presently known or unknown, and in connection with such waiver, both parties specifically waive any operation or applicability of California Civil Code section 1542, which provides:

> "A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him must have materially affected his settlement with the debtor."

Each Party represents and warrants it has consulted with counsel regarding the nature and consequences of waiving the operation of Civil Code section 1542, and knowingly and willingly has decided to waive it.

Section 7. No Obligation on Robertson's to Transfer. Robertson's execution of this Agreement, its execution of the Task Fore Agreement, anything expressed or implied in either document, and/or its participation in advancing the Concept Plan, whether taken individually or collectively in any combination, shall not be construed or interpreted to require Robertson's to transfer, encumber or agree to any use restrictions being placed upon any real property Robertson's owns in fee on the Effective Date; or to cause any such real property be transferred, encumbered, or restricted as to use. Nothing in this Section 7 affects or relieves Robertson's obligation to transfer the Premises, as provided in section 3 above, however.

Section 8. Notices. All notices required to be provided hereunder, shall be in writing, and either served personally or sent by United States Mail. For these purposes, the addresses for the Parties are as follows:

As to Robertson's Ready Mix, Ltd.	As to District
President Robertson's Ready Mix, Ltd. 200 South Main Street Suite 200 Corona CA 92878	General Manager San Bernardino Valley Water Conservation District 1630 West Redland Blvd., Suite A Redlands CA 92373

Notices shall be deemed delivered on the date of personal service or on the third day following deposit in the United States Mail. Any Party may change the address or person to whom notices are to be directed hereunder, by written notice to the other Party.

Section 9. Entire Agreement. This Agreement, in connection with the unaffected portions of the original Cone Camp Lease, contains the entire agreement of the Parties hereto with respect to the matters contained herein and supersedes all negotiations, prior discussions, and preliminary agreements or understandings, written or oral. No waiver or modification of this Agreement shall be binding unless consented to by the Parties in writing.

Section 10. Cooperation; Further Acts. The Parties agree to use reasonable care and diligence to perform their respective obligations under this Agreement. The Parties agree to act in good faith to execute all instruments, prepare all documents, and take all actions as may be reasonably necessary, appropriate or convenient to carry out the purposes of this Agreement.

Section 11. Governing Law. This Agreement shall be governed by and construed under the laws of the State of California.

Section 12. Attorneys' Fees. In an action or proceeding involving a dispute between the Parties arising out of this Agreement, including arbitration, the prevailing Party shall be entitled to receive from the other Party, reasonable attorneys' fees. The term "attorneys' fees" shall include reasonable costs for investigating the action, conducting discovery, cost of appeal, costs

and fees for expert witnesses, and all other normally allowable costs incurred in such litigation, whether or not such litigation is prosecuted to final judgment.

Section 13. No Third Party Beneficiaries. There are no intended third party beneficiaries of any right or obligation assumed by the Parties.

Section 14. Construction; Captions. The language of this Agreement shall be construed according to its fair meaning, and not for or against any Party hereto based on authorship. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

Section 15. Severability. Each provision of this Agreement shall be severable from the whole. If any provision of this Agreement shall be found contrary to law, it is the intention of the Parties that the remainder of this Agreement shall continue in full force and effect.

Section 16. Incorporation of Recitals. The Recitals are incorporated herein and made an operative part of this Agreement.

Section 17. Authority to Enter into Agreement. The Parties warrant they have all requisite power and authority to execute and perform this Agreement. Each person executing this Agreement on behalf of their party warrants that he or she has the legal power, right, and authority to make this Agreement and bind his or her respective Party, and that in so doing, such Party is not thereby in breach of any other contract or agreement.

Section 18. Counterparts. This Agreement may be signed in counterparts, each of which shall constitute an original.

Section 19. Assignment. Neither Party shall assign its rights or delegate its responsibilities hereunder without the express written consent of the other Party, which consent shall not be unreasonably withheld. This Agreement, including the rights of first refusal and options granted hereunder, shall be binding on all successors and is intended to and shall run with the land.

Section 20. Recordation. Within fifteen (15) days of the Effective Date, the Parties shall have this Agreement recorded with the County Recorder for the County of San Bernardino, State of California.

SWRCB Annual Water Rights Report

Annotation to Accompany Filings by SBVWCD and SBVMWD/WMWD

During 2010, the San Bernardino Valley Water Conservation District (SBVWCD) and San Bernardino Valley Municipal Water District (SBVMWD)/Western Municipal Water District (WMWD) diverted water at the Cuttle Weir to replenish the groundwater basin. Each agency's season of diversion, total quantity of diversion and water rights are listed in the following table.

Agency	Season of Diversion	Total Quantity of Water Diverted	Water Right
SBVWCD	1/1/10 to 5/31/10	5,671 af	License No. 2831
SBVMWD/WMWD	6/29/10 to 12/31/10*	14,934 af	Permit No. 21264
SBVWCD	10/1/10 to 12/31/10	307 af	License No. 2832

* The State Water Resources Control Board issued Permit No. 21264 on June 29, 2010.

Diversion of approximately 882 acre feet to replenish the groundwater basin were shifted outside the Season of Diversion due to operations of the Seven Oaks Dam by the USACOE and are not being accounted for in this table. Such diversions occurred under water rights, jointly utilized under the Santa Ana River and Mill Creek Cooperative Water Project.

Additionally, SBVMWD/WMWD and SVBWCD are finalizing negotiations to expand our contractual relationships to cooperatively utilize and expand District facilities to maximize the water diverted for recharge jointly under these permits and licenses. Notwithstanding our intentions, should these negotiations for cooperative agreement not be fruitful, both districts may need to revise their filings.

AGREEMENT FOR THE COOPERATIVE USE OF UNUSED WELL CAPACITY, THE TEXAS GROVE RESERVOIR AND THE CENTRAL FEEDER

This Agreement for the Cooperative Use of Unused Well Capacity, the Texas Grove Reservoir and the Central Feeder ("Agreement") is entered into and effective this 2nd day of April , 2013 ("Effective Date") by and between the City of Redlands ("City") and San Bernardino Valley Municipal Water District ("Valley District"). City and Valley District are sometimes individually referred to herein as a "Party" and, together, as the "Parties."

Recitals

A. City owns the 3.9 million gallon Texas Grove Reservoir, which is shown on the map attached hereto as Exhibit "A" and incorporated herein by reference. The Texas Grove Reservoir is located adjacent to the Valley District Redlands Pump Station.

B. Valley District desires to purchase 2.3 million gallons of capacity in the existing City of Redlands' Texas Grove Reservoir which is already intertied with the Valley District Central Feeder system.

C. City is willing to sell Valley District 2.3 million gallons of capacity in the Texas Grove Reservoir.

D. City owns various water wells that deliver water to the Texas Grove Reservoir.

E. Valley District has constructed the Central Feeder Project Phase 1, which includes the Redlands Pump Station and a 78-inch pipeline (the "**Central Feeder**") that connects to the Metropolitan Water District of Southern California's Inland Feeder Pipeline and the East Branch Extension of the State Water Project. The Central Feeder is shown on the map attached hereto as Exhibit "A." Valley District further intends to construct new wells in the San Bernardino Basin Area (the "**SBBA**"), in, or upstream of, the Area of Historic High Groundwater (the "**AHHG**" or the "**Pressure Zone**") that could deliver water to the Central Feeder.

F. From time to time, Valley District intends to use its proposed wells to dewater the AHHG during periods when the Boards of Directors for Valley District and Western Municipal Water District (**"Western"**) agree additional extractions are needed to mitigate the risks associated with high groundwater which include the flooding of basements and the increased risk of property damage and personal injury from soil liquefaction during an earthquake. These Valley District wells may also be used to extract: (i) State Water Project water that has been "banked" in the SBBA, (ii) Western's portion of Santa Ana River water diverted and stored in the SBBA under State Water Resources Control Board permits 21264 and 21265, or (iii) "new conservation water," as defined in the *Western* Judgment (*Western Municipal Water District et al. v. East San Bernardino County Water District et al.*, Riverside County

SBVMWD LEGAL
DOCUMENT 2392

Superior Court Case No. 78426, April 17, 1969) and determined by the Western-San Bernardino Watermaster that is banked in the SBBA. Additionally, Valley District intends to consult with other water agencies with interests in the SBBA, by working with the Basin Technical Advisory Committee, in order to ensure Valley District and Western Boards of Directors are provided with the most up-to-date technical information upon which to base decisions.

G. To postpone the need to construct its own wells and related transmission pipelines, Valley District desires to utilize the City's water wells when the City is not using such wells (unused capacity) to pump and deliver water to the Central Feeder via the Texas Grove Reservoir and Redlands Pump Station.

H. City wishes to make its unused water well capacity available to Valley District provided that it does not cause lower water levels and, thereby, increase pumping costs for City's own customers nor cause water quality degradation for Total Dissolved Solids ("**TDS**") in the SBBA that causes Redlands Wastewater Treatment Plant discharges to exceed permitted concentrations.

I. City and Valley District, in addition to other parties, entered into the "Settlement Agreement Relating to the Diversion of Water From the Santa Ana River System (the "**Seven Oaks Accord**")" on July 21, 2004. One of the provisions of the Seven Oaks Accord provides for participation in a "groundwater spreading program" that would, among other things, maintain groundwater levels at relatively constant levels in the SBBA.

J. Valley District and the Santa Ana Regional Water Quality Control Board entered into the "Cooperative Agreement to Protect Water Quality and Encourage the Conjunctive Uses of Imported Water in the Santa Ana River Basin" (the "**RWQCB Agreement**") on January 16, 2008, which requires preparation of a report on water quality conditions in the SBBA every three years.

K. City and Valley District wish to cooperate in the operation of facilities for the mutual benefit of the Parties.

Agreements

1. *Valley District Purchase of Storage Rights in the Texas Grove Reservoir*

   a. *Storage Rights.* City hereby sells, and Valley District hereby purchases, all rights to the use of the upper 2.3 million gallons of usable storage capacity in the existing Texas Grove Reservoir, for the life of the reservoir, which capacity is understood by the Parties to be at, or above, elevation 1338.9 feet MSL NGVD. City shall retain all storage rights to the use of that portion of the Texas Grove Reservoir below elevation 1338.9 feet MSL NGVD. Neither Party shall interfere

with the other Party's use of its share of the storage capacity of the Texas Grove Reservoir, unless such storage capacity is needed to meet fire fighting demands by City. In such instances, City shall have the right to use all water available in the Texas Grove Reservoir. City shall cooperate with Valley District and allow Valley District to construct City-approved facilities necessary to utilize Valley District's full storage rights in the Texas Grove Reservoir.

b. *Payment by Valley District for Storage Rights.* Valley District shall pay City the sum of $2,168,426 for the rights described in paragraph 1a within 30 calendar days after the Effective Date of this Agreement. Valley District will make such payment by electronic funds transfer into a fund approved by City. City shall provide Valley District with a written receipt, acknowledging payment in full, within 7 calendar days of the electronic funds transfer.

c. *Operation and Maintenance.* City shall be responsible for the day to day operation and maintenance of the Texas Grove Reservoir, except for the 42-inch nozzle connecting the Texas Grove Reservoir to Valley District's Redlands Pump Station which shall be the responsibility of Valley District.

(1) *Ordinary Operation and Maintenance.* City shall operate the Texas Grove Reservoir in accordance with the terms of this Agreement and in accordance with good engineering practices, including normal maintenance of the reservoir.

(2) *Substantial Work.* In the event City determines, in its reasonable engineering judgment, that substantial work (i.e., more than $50,000 in a calendar year) is needed to properly maintain the Texas Grove Reservoir, City shall promptly consult with Valley District and, before commencing any work, City shall give written notice to Valley District of: (i) the work to be performed, (ii) the estimated cost of the proposed work, and (iii) the contractor(s) that will perform work. City may only commence such work upon receipt of written approval from Valley District, which approval shall not be unreasonably withheld or delayed.

(3) *Emergency Circumstances.* Nothing in paragraph 1c(2) shall be construed to prevent City from taking any action it reasonably believes necessary in the event of an emergency. City shall notify Valley District of the existence of an emergency as soon as reasonably possible and shall, to the extent feasible under the circumstances, coordinate a response with Valley District.

(4) *Reimbursement by Valley District.* Valley District shall reimburse City for 63% of the costs to operate and maintain the Texas Grove Reservoir, as determined based on the calculations attached hereto as Exhibit "B" and

entitled "City of Redlands Reservoir #1 (Texas Grove Reservoir)." Reimbursable costs shall include, but not be limited to, actual and reasonable costs of City staff, consultants and contractors for operating and maintaining the Texas Grove Reservoir.

(5) *Invoices to Valley District.* City shall invoice Valley District for such operation and maintenance costs quarterly in arrears and Valley District shall pay such invoices within 30 calendar days of the date of the invoice. Invoices shall indicate, in reasonable detail, the cost of each action undertaken by City to operate and maintain the Texas Grove Reservoir, including the date of the service, the individuals performing the service, the hourly rate of such individuals, and the costs of any materials. In the event Valley District objects to any costs identified on an invoice, Valley District shall pay the undisputed costs and shall invoke the dispute resolution process described in paragraph 10c below for the objectionable costs.

2. *Term of Agreement.* This Agreement shall have an initial term of five years from its Effective Date and shall automatically renew for subsequent five-year terms thereafter unless terminated as provided for in paragraph 8 below.

3. *Cooperative Operation of City Wells and the Central Feeder*

a. *Delivery of Water by City to Valley District.*

(1) *Estimate of unused capacity by City.* No later than each November 1, City shall provide Valley District with a written estimate of the availability of water during the following calendar year, up to a maximum of 20,000 acre-feet. City shall make this estimate in its sole and reasonable discretion. City may base its estimate on hydrologic conditions, groundwater levels, facility limitations, demand for water within City, or any other reasonable factor.

(2) *Valley District Water Order.* No later than each December 1 of each year, Valley District shall provide City with a written order for water for the following calendar year, up to a maximum amount equal to City's estimate of unused capacity.

(3) *Water delivery to Texas Grove Reservoir.* City shall operate its water production and distribution systems to provide Valley District with the amount of water ordered by Valley District at the Texas Grove Reservoir. Valley District shall install or cause to be installed a meter to measure deliveries by City to Valley District. City shall have the right to read the

meter on a monthly basis and inspect the meter at least annually in order to ensure the accurate calculation of water delivered to Valley District.

(4) *Modification of City's Estimate.* The Parties understand and acknowledge that a number of factors, including but not limited to greater/lesser precipitation or changes in customer demand for water, may modify City's ability to supply Valley District with ordered water. It is the intent of the Parties that this Agreement not interfere with City's obligation to serve its customers.

(a) City may increase or decrease its estimate of water available to Valley District at any time during a calendar year as may be reasonable to provide water service to City's customers. City will use reasonable, good faith efforts to meet Valley District's water demands.

(b) In the event of an emergency, as defined in California Public Contract Code Section 1102, City may take any actions it deems reasonably necessary to respond to the emergency and provide water service to its customers. City shall promptly consult with Valley District and jointly develop a plan that will provide Valley District water as soon as practicable after the conclusion of the emergency.

b. *Payment by Valley District for Water.* Valley District shall pay City the actual production cost, as determined pursuant to paragraph 3b(1) below, and the Operations, Maintenance and Repair ("**OMR**") cost, as determined pursuant to paragraph 3b(2) below, for water delivered to Valley District at the Texas Grove Reservoir.

(1) *Payment for Production Cost.* Valley District shall pay City for City's actual cost of producing water pursuant to this Agreement. Such actual costs may be determined by using either: (i) energy and treatment costs for the water production facilities that City specifically operates to meet Valley District's water order or (ii) a weighted average cost of energy and treatment for all City facilities producing water during a period in which City delivers water to Valley District. City shall determine, and notify Valley District in writing, which method will be used to determine the actual cost of producing water for Valley District prior to delivery of water to Valley District. Absent notification, the Parties shall use method (ii) above until notice is given.

(2) *Payment for OMR Cost.* Valley District shall pay City's actual costs to operate, maintain and repair its water production and distribution facilities

(including, without limitation, production wells, booster pumps, treatment facilities, etc.) for the benefit of Valley District. Specifically, Valley District shall pay all costs, including staff time, associated with City's operation of its water production and distribution facilities to deliver water to Valley District. In addition, Valley District shall pay its fair share of City's costs to maintain and repair its water production and distribution facilities. This cost shall be equal to the City's actual per acre-foot cost for maintenance and repair of its water production and distribution facilities over the preceding three calendar years, multiplied by the number of acre-feet ordered by Valley District.

(3) *Invoices to Valley District.*

(a) *Production Cost Invoices.* City shall invoice Valley District for production costs at least quarterly in arrears and Valley District shall pay such invoices within 30 calendar days of the date of the invoice. Invoices shall indicate, method used to determine production costs as described in paragraph 3b(1), facilities used to provide Valley District water, and cost for chemicals and power used. In the event Valley District objects to any costs identified on an invoice, Valley District shall pay the undisputed costs and shall invoke the dispute resolution process described in paragraph 10c below for the objectionable costs.

(b) *OMR Cost Invoices.* City shall invoice Valley District for OMR costs at least quarterly in arrears and Valley District shall pay such invoices within 30 calendar days of the date of the invoice. Invoices shall indicate, in reasonable detail, the information necessary to calculate costs as described in paragraph 3b(2). For expenses and work outside of what should normally be expected, City shall identify expenses and/or work performed and include date expense was made or work was performed, facilities involved, the individuals or company performing the service, hourly rate of such individuals or company, and costs of any materials or service using the methodology provided on Exhibit "C." In the event Valley District objects to any costs identified on an invoice, Valley District shall pay the undisputed costs and shall invoke the dispute resolution process described in paragraph 10c below for the objectionable costs.

c. *Water Quality Reporting.* The City shall provide Valley District with copies of all reports submitted to the Santa Ana Regional Quality Control Board.

d. *Future Actions.* The Parties understand and acknowledge that this Agreement is intended not only to serve as the basis for cooperative operations beginning in 2013, but is also intended to serve as the basis for long-term cooperation. The Parties agree they will consider amending this Agreement at appropriate times to reflect additional facilities and new opportunities to improve the conjunctive management of the SBBA and/or water supply reliability for the San Bernardino Valley.

4. *Water Level and Water Quality Monitoring.* The Parties shall cooperate in monitoring water levels and water quality to ensure that the terms of this Agreement do not have an adverse impact on water levels or water quality in the SBBA.

a. The Parties shall monitor water levels using the Basin Technical Advisory Committee annual Regional Water Management Plan and/or, independently, to ensure compliance with the water level requirements of the Seven Oaks Accord.

b. The Parties agree to monitor any water quality impacts to Total Dissolved Solids ("**TDS**") using data provided in the triennial report prepared for the Santa Ana Regional Water Quality Control Board pursuant to the Santa Ana Regional Water Quality Control Board Agreement.

5. *Impacts to Water Levels.* If it is determined by the Parties that the water level requirements in the Seven Oaks Accord are not being met, Valley District will take one of the following actions:

a. *Stop taking deliveries.* Valley District will cease to water through City facilities until water levels are in compliance with the requirements of the Seven Oaks Accord.

b. *Deliver Exchange Water to City.* To offset the pumping costs associated with lower water levels, Valley District will provide water to City, on a 1:1 basis ("**Exchange Water**"), for deliveries made to Valley District after water levels are determined to be out of compliance with the Seven Oaks Accord and up until the point water levels are determined to be in compliance with the Seven Oaks Accord.

(1) *Sources of Exchange Water.* Valley District may obtain such Exchange Water from the State Water Project, from the Santa Ana River, from Mill Creek, from sources outside the SBBA or from "new conservation" as that term is defined in the *Western* Judgment (*Western Municipal Water District et al. v. East San Bernardino County Water District et al.* (Riverside County Superior Court No. 78426, April 17, 1969). The selection of sources of Exchange Water shall be within the sole discretion of Valley District but water diverted from the Santa Ana River shall not

comprise more than 50% of the Exchange Water delivered to City during any three-year reporting period, as defined in paragraph 4a below.

(2) *Delivery of Exchange Water.* Valley District shall deliver Exchange Water to City as soon as feasible but no later than three calendar years after the calendar year in which City delivered water to Valley District. Valley District shall deliver Exchange Water to one or more of the following agreed upon locations:

(a) San Bernardino Valley Water Conservation District Mill Creek Spreading Grounds;

(b) San Bernardino Valley Water Conservation District Santa Ana River Spreading Grounds;

(c) Bear Valley Mutual Water Company Airport Spreading Grounds;

(d) City's San Bernardino Avenue Spreading Grounds (formerly Bear Valley Mutual Water Company Judson Ponds);

(e) Such other spreading grounds that directly benefit City's wells and other wells in the surrounding area, as the Parties may determine through mutual consent in the future.

Valley District shall calculate and document deliveries of Exchange Water to City at the above locations in a manner that both Parties agree to be reasonable, recognizing that several of the above locations are owned by non-parties to this Agreement.

In the event Valley District is unable to deliver Exchange Water to City within a three consecutive calendar year time period, Valley District shall increase the amount of Exchange Water delivered to City by 5% of the overdue balance for every calendar year beyond the three calendar years allowed until the Exchange Water is delivered. The Parties shall use a "first-in, first-out" accounting to track Exchange Water for multiple years.

(3) *In-Lieu Recharge.*

(a) In the event spreading of Exchange Water is not prudent: (i) due to high groundwater conditions in the pressure zone, (ii) because such spreading would have adverse impacts on groundwater contaminants, or (iii) because City determines it would be beneficial for City to take deliveries of Exchange Water at a water treatment plant in lieu of the spreading grounds identified in

paragraph 5b(2), City may take deliveries of up to 50% of Exchange Water at its Horace Hinckley Surface Water Treatment Plant or Henry Tate Surface Water Treatment Plant, at its sole discretion. Valley District shall deliver the remaining Exchange Water to such locations that Valley District, in its sole discretion, determines appropriate for sound management of the SBBA.

(b) If City chooses to take delivery of Exchange Water at the Henry Tate Surface Water Treatment Plant, City may receive up to 10% of the total Exchange Water delivered in a calendar year at Henry Tate Surface Water Treatment Plant at no cost to the City.

6. *Impacts to Water Quality.* If it is determined by the Parties that pumping by City for delivery to Valley District, under the terms of this Agreement, is the sole cause for the City violating one or more of its permits from the Santa Ana Regional Water Quality Control Board, Valley District will take one of the following actions:

a. *Stop taking deliveries.* Valley District will cease to water through City facilities until water levels are in compliance with the Seven Oaks Accord.

b. *Recharge high quality water.* Valley District will recharge lower TDS water in a mutually agreeable locations until TDS has returned to acceptable levels.

c. *Any combination.* Valley District may use one, or both, of the above, at its discretion, to reduce the TDS level until the TDS has returned to mutually agreed upon acceptable levels.

d. *Violation of Santa Ana Regional Water Quality Control Board TDS discharge limit on Redlands wastewater plant.* In the event the Santa Ana Regional Water Quality Control Board orders City to remedy an increase in the TDS limit for City's wastewater treatment plant that the Parties agree has been caused by conditions derived by the activities associated with this Agreement, Valley District shall take any or all of the actions identified in subparagraphs a-c above until water quality has returned to acceptable levels. Additionally, Valley District and City will work together to resolve the condition with the Santa Ana Regional Water Quality Control Board identify a solution to the condition, and fund an appropriate solution.

7. *Natural Disaster or Civil Unrest.* In the event that the Texas Grove Reservoir suffers from substantial damage due to natural disaster (e.g., earthquake, flooding or otherwise) or due to civil unrest (e.g., rioting, terrorist attack, or otherwise), neither Party shall be obliged to rebuild/reconstruct the Texas Grove Reservoir in its current configuration or to its current capacity. Instead, the Parties shall promptly meet and confer, determine a rebuilding plan/configuration that is reasonable and financially feasible under the

circumstances at the time, and then rebuild/reconstruct the Texas Grove Reservoir as quickly as practicable.

8. *Termination of Agreement.* Either Party may terminate this Agreement, with or without cause, by providing written notice of termination to the other Party at least one year prior to the conclusion of the then-current term of this Agreement. Valley District's purchase of storage rights at, or above, elevation 1338.9 feet MSL NGVD shall survive termination of this Agreement and, after termination, Valley District may use its storage rights by supplying water available to Valley District from any source. In the event that Valley District has not completed its delivery of Exchange Water to City as required by paragraph 5b above, that obligation shall survive any termination of this Agreement.

9. *Indemnification.* Each Party shall defend and indemnify the other Party and the other Party's elected officials, officers, employees, agents and authorized volunteers from and against all claims, demands, or liability for damages arising out of the Party's performance of the terms of this Agreement where such liability is caused or claimed or alleged to be caused by the willful misconduct, sole negligence or active negligence of the Party or any person or organization for whom or which the Party is legally liable.

   In particular, Valley District shall defend and indemnify City's elected officials, officers, employees, agents and authorized volunteers for any and all claims, demands or liability arising from: (i) Valley District or its contractors' construction of the Central Feeder; (ii) the movement of groundwater contaminants due to the spreading of Exchange Water by Valley District and increased pumping; or (iii) a reduction in static groundwater levels due to extraction of water by City for delivery to Valley District.

   The provisions of this Section 9 shall survive any termination of this Agreement.

10. *Administration of Agreement*

   a. *Workers' Compensation.* Each Party certifies that it is aware of the provisions of section 3700 of the California Labor Code which requires every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code and each Party shall comply with such provisions before commencing the performance of any work under this Agreement. Each Party and any contractors or subcontractors shall keep workers' compensation insurance for their employees in effect during all work covered by this Agreement. Upon request, each Party shall provide the other with the certificate required by Labor Code section 3700.

   b. *Books and Records.* Each Party shall have access to and the right to examine the other Party's pertinent books, documents, papers or other records (including, without limitation, records contained on electronic media) relating to the performance of that Party's obligations pursuant to this Agreement. The Parties

shall each retain all such books, documents, papers or other records to facilitate such review. Access to each Party's books and records shall be during normal business hours only. Nothing in this paragraph shall be construed to operate as a waiver of any applicable privileges.

c. *Disputes.* The Parties recognize there may be disputes regarding the obligations of the Parties or the interpretation of this Agreement. The Parties agree they may attempt to resolve disputes as follows:

(1) *Statement Describing Alleged Violation of Agreement.* A Party alleging a violation of this Agreement (the "**Initiating Party**") shall provide a written statement describing all facts it believes constitute a violation of this Agreement to the Party alleged to have violated the terms of this Agreement (the "**Responding Party**").

(2) *Response to Statement of Alleged Violation.* The Responding Party shall have sixty calendar days from the date of the written statement to prepare a written response to the allegation of a violation of this Agreement and serve that response on the Initiating Party or to cure the alleged violation to the reasonable satisfaction of the Initiating Party. The Initiating Party and the Responding Party shall then meet within thirty calendar days of the date of the response to attempt to resolve the dispute amicably.

(3) *Mediation of Dispute.* If the Initiating Party and the Responding Party cannot resolve the dispute within ninety calendar days of the date of the written response, they shall engage a mediator, experienced in water-related disputes, to attempt to resolve the dispute. Each Party shall ensure that it is represented at the mediation by an employee of such Party. These representatives of the Initiating Party and the Responding Party may consult with staff and/or technical consultants during the mediation and such staff and/or technical consultants may be present during the mediation. The costs of the mediator shall be borne by the unsuccessful Party.

(4) *Reservation of Rights.* Nothing in this paragraph 10c shall require a Party to comply with the dispute resolution process contained herein, and each Party retains and may exercise at any time all legal and equitable rights and remedies it may have to enforce the terms of this Agreement.

11. *CEQA Compliance.*

The Parties have determined that, because the activities contemplated under the terms of this Agreement involve the cooperative use of existing facilities within the capacity of those

facilities and within the limits established by existing regulations, the implementation of this Agreement is exempt from environmental review pursuant to Title 14, section 15301 of the Code of California Regulations. Within five business days of the Effective Date of this Agreement, the Parties will file a Notice of Exemption with the County Clerk for the County of San Bernardino, which Notice is attached hereto as Exhibit "D" and incorporated herein by reference.

12. *General Provisions.*

a. *Authority.* Each signatory of this Agreement represents that he is authorized to execute this Agreement on behalf of the Party for which he signs. Each Party represents that it has legal authority to enter into this Agreement and to perform all obligations under this Agreement.

b. *Amendment.* This Agreement may be amended or modified only by a written instrument executed by each of the Parties to this Agreement.

c. *Jurisdiction and Venue.* This Agreement shall be governed by and construed in accordance with the laws of the state of California, except for its conflicts of law rules. Any suit, action, or proceeding brought under the scope of this Agreement shall be brought and maintained to the extent allowed by law in the County of San Bernardino, California.

d. *Headings.* The paragraph headings used in this Agreement are intended for convenience only and shall not be used in interpreting this Agreement or in determining any of the rights or obligations of the Parties to this Agreement.

e. *Construction and Interpretation.* This Agreement has been arrived at through negotiations and each Party has had a full and fair opportunity to revise the terms of this Agreement. As a result, the normal rule of construction that any ambiguities are to be resolved against the drafting Party shall not apply in the construction or interpretation of this Agreement.

f. *Entire Agreement.* This Agreement constitutes the entire agreement of the Parties with respect to the subject matter of this Agreement and supersedes any prior oral or written agreement, understanding, or representation relating to the subject matter of this Agreement.

g. *Partial Invalidity.* If, after the Effective Date of this Agreement, any provision of this Agreement is held to be illegal, invalid, or unenforceable under present or future laws effective during the term of this Agreement, such provision shall be fully severable. However, in lieu thereof, there shall be added a provision as similar in terms to such illegal, invalid or unenforceable provision as may be possible and be legal, valid and enforceable.

h. *Successors and Assigns*. This Agreement shall be binding on and inure to the benefit of the successors and assigns of the respective Parties to this Agreement. No Party may assign its interests in or obligations under this Agreement without the written consent of the other Party, which consent shall not be unreasonably withheld or delayed.

i. *Waivers*. Waiver of any breach or default hereunder shall not constitute a continuing waiver or a waiver of any subsequent breach either of the same or of another provision of this Agreement and forbearance to enforce one or more of the remedies provided in this Agreement shall not be deemed to be a waiver of that remedy.

j. *Attorneys' Fees and Costs*. The prevailing Party in any litigation or other action to enforce or interpret this Agreement shall be entitled to reasonable attorneys' fees (including fees for use of in-house counsel by a Party), expert witnesses' fees, costs of suit, and other necessary disbursements in addition to any other relief deemed appropriate by a court of competent jurisdiction.

k. *Necessary Actions*. Each Party agrees to execute and deliver additional documents and instruments and to take any additional actions as may be reasonably required to carry out the purposes of this Agreement.

l. *Representations and Warranties*. Each representation and warranty contained herein or made pursuant hereto shall be deemed to be material and to have been relied upon and shall survive the execution, delivery and termination of this Agreement.

m. *Compliance with Law*. In performing their respective obligations under this Agreement, the Parties shall comply with and conform to all applicable laws, rules, regulations and ordinances.

n. *Third Party Beneficiaries*. This Agreement shall not create any right or interest in any non-Party or in any member of the public as a third party beneficiary.

o. *Counterparts*. This Agreement may be executed in one or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute but one and the same instrument.

p. *Notices*. All notices, requests, demands or other communications required or permitted under this Agreement shall be in writing unless provided otherwise in this Agreement and shall be deemed to have been duly given and received on: (i) the date of service if served personally or served by facsimile transmission on the Party to whom notice is to be given at the address(es) provided below, (ii) on the first day after mailing, if mailed by Federal Express, U.S. Express Mail, or other

similar overnight courier service, postage prepaid, and addressed as provided below, or (iii) on the third day after mailing if mailed to the Party to whom notice is to be given by first class mail, registered or certified, postage prepaid, addressed as follows:

Project Title: Agreement for Use of Water Facilities

Project Location - Specific: City of Redlands – Texas Grove Reservoir

Project Location - City: Redlands **Project Location - County:** San Bernardino

Description of Nature, Purpose and Beneficiaries of Project: The Project is an agreement between the San Bernardino Valley Municipal Water District ("Valley District") and the City of Redlands ("City") (collectively, the "Parties") providing for the cooperative use of existing water storage facilities and well capacity. Under the agreement, Valley District will purchase 2.3 million gallons of capacity in the City's existing Texas Grove Reservoir which is connected to Valley District's Redlands Pump Station that delivers water to Valley Districts Central Feeder Pipeline. Valley District will have an annual option of purchasing up to 20,000 acre-feet of existing well capacity to the extent such capacity is not needed by the City in any given year. The purpose of the Project is to postpone the need for Valley District to construct new water facilities in the area. The project involves the operation of existing facilities within existing limits established by applicable laws, regulations, agreements, and permits.

Name of Person or Agency Carrying Out Project: San Bernardino Valley Municipal Water District, City of Redlands

Exempt Status: *(check one)*

- ☐ Ministerial (Sec. 21080(b)(1); 15268);
- ☐ Declared Emergency (Sec. 21080(b)(3); 15269(a));
- ☐ Emergency Project (Sec. 21080(b)(4); 15269(b)(c));
- ☒ Categorical Exemption. State type and section number: Sec. 15301, 15303
- ☐ Statutory Exemptions. State code number:

Reasons why project is exempt: The Project is categorically exempt under section 15301 of the CEQA Guidelines because it involves the operation of existing facilities within existing limits established by applicable laws, regulations, agreements, and permits. Valley District will make use of existing storage and well capacity not needed by the City, thus there will be no expansion of those facilities. The connection between the Reservoir and existing pipelines is categorically exempt under section 15301 as an addition to existing structures, and alternatively is categorically exempt under section 15303 as an extension of an existing pipeline of the length necessary to serve the Reservoir.

2013 AGREEMENT REGARDING ADDITIONAL EXTRACTIONS OF NEW CONSERVATION WATER FROM THE SAN BERNARDINO BASIN AREA BETWEEN WESTERN MUNICIPAL WATER DISTRICT OF RIVERSIDE COUNTY AND SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT

SBVMWD LEGAL
DOCUMENT 2402

2013 AGREEMENT REGARDING ADDITIONAL EXTRACTIONS OF NEW CONSERVATION WATER FROM THE SAN BERNARDINO BASIN AREA

This Agreement is entered into between San Bernardino Valley Municipal Water District ("Valley District") and Western Municipal Water District of Riverside County ("Western") on July 17, 2013.

RECITALS

A. Western and Valley District are parties to the Judgment in the case of *Western Municipal Water District of Riverside County v. East San Bernardino County Water District, et al.*, Riverside Superior Court No. 78426 ("Western Judgment" or "Judgment").

B. The Judgment is administered and enforced by a Watermaster, consisting of a committee of two persons, one representative nominated by Valley District, and one by Western.

C. The Judgment further implements the physical solution in the related Orange County Water District action, as well as determines the rights of the named Plaintiffs to extract water from the San Bernardino Basin Area ("SBBA"), and provide replenishment of the area above Riverside Narrows. Among other provisions, the Judgment provides that the annual "adjusted right" of each Plaintiff to extract and export water from the SBBA is the sum of (a) its base right, which was adjusted based on a determination of safe yield and is currently expressed as a percentage of safe yield; and (b) an equal percentage of any new conservation, provided the conditions described in the Judgment are met. Similarly, the Judgment provides that Valley District shall provide imported water for replenishment of the SBBA at least equal to the amount by which extractions in any five year period exceed the 1959-1963 "base period" extractions (such amount was reduced based on a determination of safe yield and may be increased by the amount of any new conservation).

D. "New Conservation" is defined in the Judgment as "[a]ny increase in replenishment from natural precipitation which results from operation of works and facilities not now in existence, other than those works installed and operations which may be initiated to offset losses caused by increased flood control channelization."

E. The Seven Oaks Dam is a component of the Santa Ana River Mainstem Project and was originally conceived as a way to address anticipated flooding on the Santa Ana River. In addition to providing flood control benefits and related incidental water conservation, Western and Valley District wished to formally include water conservation as an element of the facility. In 1991, Western and Valley District jointly filed an application to appropriate water conserved as part of the Seven Oaks project. The State Water Resources Control Board approved the application and issued permits to Western and Valley District in 2010.

F. Construction on the Dam began in the mid 1990s. Western, Valley District and Plaintiffs in the above-referenced action agreed to a methodology for participation in the project and a cost sharing formula pursuant to Paragraph VI(b)2 of the Judgment. Based on the cost sharing formula, Western, Valley District and Plaintiffs entered cost sharing agreements to study the feasibility of water conservation and to fund the physical improvements necessary to achieve water conservation in connection with the operation of the Dam.

G. The acquisition of the water rights permit and the related infrastructure improvements allow Western and Valley District to fully utilize water conserved by the project for replenishment of the SBBA.

H. As part of the 1991-2010 water rights permitting process, Western and Valley District developed models and other analytical tools to forecast hydrology and calculate water conservation. Over the last 2 years, a collaborative group of stakeholders has been meeting to further develop the models and procedures necessary to forecast long-term average New Conservation.

I. In addition to utilizing the recently-developed models and analytical tools to project future long-term average New Conservation, Watermaster has utilized the models and analytical tools to calculate the amount of New Conservation that occurred from 1998 through 2012. Watermaster was previously unable to calculate such New Conservation because the models and analytical tools were still being developed.

J. Consistent with the Judgment and cost-sharing agreements, Plaintiffs have paid their proportionate share of New Conservation-related costs through December 31, 2012 and are therefore entitled to the benefits associated with their allocated share of New Conservation that occurred from 1998 through 2012 due to operation of the Dam.

K. The Judgment does not provide a mechanism by which to allocate New Conservation retroactively. However, Paragraph VI(b)6 of the Judgment provides that Western and Valley District may enter into agreements providing for additional extractions from the SBBA. Western and Valley District have utilized Paragraph VI(b)6 in the past to allow additional extractions from the SBBA.

L. In addition, Western, Valley District and the City of Riverside are parties to an "Agreement Relating to the Diversion of Water from the Santa Ana River System" ("Diversion Agreement") dated March 20, 2007, wherein the parties acknowledge that water conservation in the SBBA associated with the operation of Seven Oaks Dam may cause adverse impacts on the Riverside Basin. The parties agreed that one method of mitigating such adverse impacts was to provide for additional Plaintiff extractions in the SBBA in an amount equal to the amount of replenishment in the SBBA that would have occurred in the Riverside Basin in the absence of the Seven Oaks Project, in exchange for a like amount of reduction in extractions in the Riverside Basin near the key wells used to measure Valley District's compliance with the Judgment objectives

M. Parties to the Diversion Agreement also agreed to implement an accounting methodology under the Western Judgment that will allow Plaintiffs to fully utilize their water

rights in the SBBA. In conjunction with this Agreement, the full use of such water rights could be facilitated by amending the August 18, 2004 Paragraph VI(b)6 agreement entitled "Western Replenishment and Extraction Agreement" which would allow Plaintiffs, in any year in which their entitlement was not fully used, to return any amount of water up to the amount of imported water previously acquired from Western.

N. The primary purpose of this Agreement is to provide for additional extractions of water from the SBBA by Plaintiffs and users within Valley District without replenishment by Valley District in amounts equal to the amount of New Conservation determined by Watermaster to have occurred from 1998 through 2012 due to operation of the Dam. As to future New Conservation associated with the operation of the Dam, Watermaster will utilize Paragraph VI(b)1, VI(b)2, and VI(c) to account for such New Conservation, as provided herein. In addition, another purpose of this Agreement is to ensure implementation of specific provisions of the 2007 Diversion Agreement related to New Conservation, as referenced in Recitals L and M, above.

O. Although the Judgment does not require court approval of Paragraph VI(b)6 agreements, the parties have historically sought court approval of such agreements.

NOW, THEREFORE, in consideration of the mutual covenants of the parties, and based upon the recitals above, IT IS HEREBY AGREED TO AS FOLLOWS:

1. Definition of Additional Extractions. As used herein, the term "additional extractions" means any extraction of water by Plaintiffs in the above-referenced action in excess of the amounts permitted by the Judgment; with respect to entities other than Plaintiffs in such action, the term means any extractions in excess of the total amount of water that can be produced from the SBBA without any replenishment obligation. No replenishment obligations shall be incurred on account of any additional extractions made pursuant to this Agreement.

2. Amount of Additional Extractions. Watermaster has determined that the total quantity of New Conservation resulting from operation of the Seven Oaks Dam for the period of 1998 through 2012 is 42,840 acre-feet. Consistent with the Judgment, such amount may be extracted by Plaintiffs and non-plaintiff entities producing water within the SBBA as additional extractions pursuant to this Agreement.

3. Allocation of Additional Extractions to Plaintiffs. Plaintiffs may make additional extractions from the SBBA for use within Western in any future year in the aggregate amount of 11,974 AF, or 27.95% of the 1998-2012 New Conservation water. Such amount shall be allocated among individual Plaintiffs as follows:

a.	City of Riverside	9,635 AF
b.	Meeks and Daley Water Co.	1,448 AF
c.	Riverside Highland Water Co.	793 AF
d.	Regents of University of California	98 AF

Such individual allocations are in proportion to Plaintiffs' respective shares of the safe yield of the SBBA.

4. Allocation of Additional Extractions to Other Entities. Entities in San Bernardino County other than Plaintiffs who produce water within the SBBA may make additional extractions from the SBBA in any future year in the amount of 30,866 AF, or 72.05% of the 1998-2012 New Conservation water.

5. Periodic Changes in Paragraph VI(b) and VI(c) Allowable Extractions. Periodically Watermaster shall consider making changes in:

(a) the portion of Plaintiffs' "adjusted right" related to New Conservation determined pursuant to Paragraph VI(b); and

(b) the New Conservation to which users in Valley District are entitled pursuant to Paragraph VI(c).

Such periodic consideration and any resulting changes shall be made to ensure that over a long-term period, equal to or greater than the number of years used to forecast the average amount of New Conservation, the amount of New Conservation allowed to be extracted is the same as it would have been if the New Conservation had been made available to Plaintiffs and users within Valley District each year in amounts equal to the actual amount of conserved water that is replenished. Any change shall be made prospectively in order to ensure that such change does not result in a change or reconciliation of a prior year "adjusted right" for Plaintiffs or an amount of New Conservation available for use by users within Valley District.

Periodic consideration of changes in the allowable extractions related to New Conservation shall occur for the duration of the forecast period at intervals of not less than five years nor more than ten years. The periodic consideration of change in the long-term average increase in allowable extractions related to New Conservation shall account for physical improvements in storage, diversion or recharge capability that may result in an increase in the forecast of the long-term average amount of New Conservation; and prospectively account for changes in the long-term forecast that arise from annual determinations of actual New Conservation and/or improvements in the data base and the analytical tools and procedures used to forecast New Conservation.

6. Paragraph VI(b) Service Area Delivery Limitations. The service area delivery limitations provided in Paragraphs V and VI of the Western Judgment shall not apply to New Conservation.

7. Assignment. Any Plaintiff may assign all or a portion of that Plaintiff's right to make additional extractions, as provided in Paragraph 3 herein, to any other Plaintiff.

8. Potential Reductions in Additional Extractions. If at any time prior to the extraction of all additional extractions pursuant to this Agreement Watermaster determines that New Conservation that occurred from 1998-2012 is causing a decrease in the natural safe yield of the SBBA by increasing subsurface outflow or rejecting native recharge that would have

occurred in the absence of Seven Oaks Dam, then Watermaster shall reduce the then-remaining amount of additional extractions provided for in Paragraph 2 and the subsequent amounts allocated to Plaintiffs and Valley District in Paragraphs 3 and 4 by an amount equal to the increase in subsurface outflow or rejected native recharge.

9. Annual Reports. Watermaster shall exclude any additional extractions under this Agreement from extractions in the Annual Report Tables 3A through 3D showing extractions by Plaintiffs. Watermaster shall also exclude additional extractions by entities other than Plaintiffs from the determination of extractions in Table 2 of the Annual Report.

10. Riverside Basin Mitigation Account. Any amount of replenishment in the SBBA resulting from the operation of Seven Oaks Dam and related diversion and spreading facilities that, in the absence of such operation, would have been replenished in the Riverside Basin, shall not be considered New Conservation and shall not be allocated for use by Plaintiffs and users within Valley District and shall instead be included in a Riverside Basin Mitigation Account. Watermaster shall maintain a record of the amount of water in the Riverside Basin Mitigation Account. Western shall maintain in force an agreement with the City of Riverside that provides for the City to increase extractions from its wells in the SBBA by a specified amount and reduce extractions from its Flume Tract wells in the Riverside Basin by the same amount. The agreement shall provide that such change in the location of extractions is subject to the following:

(a) Western and Valley District will jointly determine the specified amount of the change in extractions and the time period for such change; and

(b) The City of Riverside will change the location of extractions as determined by Western and Valley District unless Riverside is unable to do so because of physical or prior contractual constraints.

Watermaster shall account for the required extractions from the SBBA as additional extractions pursuant to Section 9 of this agreement and shall include the amount of the additional SBBA extractions as an extraction by the City of Riverside from Riverside North in the Annual Report Table 5.

11. Amendment to the Paragraph VI(b)6 Western Replenishment and Extraction Agreement. Paragraph 5 of the "Western Replenishment and Extraction Agreement" dated August 18, 2004 is hereby amended to also provide that, "Any Plaintiff at its option may assign and transfer to Western an amount of water equal to its unused water right in the SBBA in any year provided the aggregate amount of such transfers may not exceed the Plaintiffs aggregate amount of previously transferred right to extract imported water pursuant to this paragraph."

REPORT/RECOMMENDATION TO THE BOARD OF SUPERVISORS OF THE SAN BERNARDINO COUNTY FLOOD CONTROL DISTRICT AND RECORD OF ACTION

July 23, 2013

FROM: **GERRY NEWCOMBE, Director**
Flood Control District

SUBJECT: **PLANNING MEMORANDUM OF UNDERSTANDING BETWEEN THE SAN BERNARDINO COUNTY FLOOD CONTROL DISTRICT AND THE SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT**

RECOMMENDATION(S)

Acting as the governing body of the San Bernardino County Flood Control District, approve a ten year Planning Memorandum of Understanding **(Agreement No. 13-608)** between the San Bernardino County Flood Control District and the San Bernardino Valley Municipal Water District for the purpose of working together in the planning and evaluation of San Bernardino County Flood Control District facilities for joint use by the San Bernardino County Flood Control District and the San Bernardino Valley Municipal Water District for both flood control and groundwater replenishment operations.
(Presenter: Gerry Newcombe, Director, 387-7906)

BOARD OF SUPERVISORS COUNTY GOALS AND OBJECTIVES

Pursue County Goals and Objectives by Working with Other Public Agencies.
Implement the Countywide Vision.

FINANCIAL IMPACT

Approval of this item will not result in the use of Discretionary General Funding (Net County Cost). The Planning Memorandum of Understanding (MOU) does not commit the San Bernardino County Flood Control District (FCD) to any expenditure other than staff time which has been accounted for in the 2013-14 budget. Site specific agreements may be brought to the Board of Supervisors at a later date that will contain provisions bringing revenue to FCD.

BACKGROUND INFORMATION

Approval of this item will authorize FCD to enter into an MOU with the San Bernardino Valley Municipal Water District (Valley District) to work cooperatively in the planning and evaluation of the possible joint use of FCD's facilities for both flood control and groundwater replenishment operations. The MOU does not bind FCD to any project. Any proposed use of FCD properties by Valley District that originates from this MOU is at the sole discretion of FCD.

LAURA H. WELCH, CLERK OF THE BOARD

BY _____

DATED: July 23, 2013

FCD owns and operates a number of flood control facilities within Valley District's operational boundaries. Valley District and FCD first entered into a cooperative agreement for Valley District to deliver water to several FCD detention basins for purposes of recharging the groundwater basin in 1972, and both agencies have continued to cooperatively use these facilities ever since. Valley District is now interested in expanding the number of facilities used in this effort, in addition to upgrading the facilities currently used, in order to maximize the amount of water recharge performed while acknowledging the primary goal of FCD facilities is to maintain adequate flood protection for the safety and protection of the public. FCD and Valley District wish to jointly explore the opportunities to use existing flood control basins and perhaps other facilities owned by either party, for the combined purposes of adequate flood control and useful and beneficial water replenishment operations. The MOU establishes the framework for FCD and Valley District to work together to plan and evaluate the environmental, operational and financial impacts of such combined use of their facilities. The MOU does not authorize or guarantee any specific project and the parties will comply with the California Environmental Quality Act (CEQA) prior to approving any specific project. Any future use of a facility shall be subject to the parties' approval of a site specific agreement. The MOU remains in effect for a term of ten years and provides that the parties may agree to extend the MOU for subsequent ten-year periods. Either party may terminate the MOU prior to its expiration date, but only if there is cause (e.g. breach of the agreement), and after providing the other party a 60-day written notice and opportunity to cure.

REVIEW BY OTHERS

This item has been reviewed by County Counsel (Scott Runyan, Deputy County Counsel, 387-5455) on June 28, 2013, County Administrative Office (Cory Nelson, Administrative Analyst, 387-4378) on July 1, 2013, and Finance and Administration (Mary Jane Olhasso, Assistant Executive Officer, 387-4599) on July 8, 2013.

Planning Memorandum of Understanding
San Bernardino County Flood Control District (FCD) and
San Bernardino Valley Municipal Water District (Valley District)

1. *Recitals*

a. WHEREAS, the FCD was created by the San Bernardino County Flood Control Act of 1939, found in Chapter 43 of the California Water Code Appendix (Flood Control Act), and its primary statutory objects and purposes are to provide for the control of flood and storm waters and secondarily to conserve such flood and storm waters, and other waters, for beneficial uses in FCD's district area by spreading, storing, retaining, and through percolation.

b. WHEREAS, Valley District was formed in 1954 as a regional agency formed to plan a long-range water supply for the San Bernardino Valley and it imports water into its service area from the State Water Project and manages groundwater storage within its boundaries.

c. WHEREAS, FCD owns and operates a number of flood control facilities within Valley District's boundaries.

d. WHEREAS, Valley District and FCD first entered into a cooperative agreement for Valley District to deliver water to FCD detention basins for purposes of recharging the groundwater basin in 1972, and Valley District and FCD have continued to cooperatively use these facilities ever since.

e. WHEREAS, Valley District is interested in continuing to cooperatively use FCD's flood control facilities to promote groundwater recharge while acknowledging the primary goal of FCD facilities to maintain adequate flood protection for the safety and protection of the public.

f. WHEREAS, as a general matter, FCD and Valley District wish to jointly explore the opportunities to use existing flood control basins (and perhaps other facilities owned by either party) for the combined purposes of adequate flood control and useful and beneficial water replenishment operations.

g. WHEREAS, FCD and Valley District wish to enter into this Planning Memorandum of Understanding (MOU) to describe in general terms their interests in coordinating their efforts to plan and evaluate the environmental and financial impacts of such combined use of FCD's facilities.

h. WHEREAS, as provided herein, this MOU does not authorize nor guarantee any specific project and the parties will comply with the California Environmental Quality Act (CEQA) prior to approving any specific project.

NOW, THEREFORE, it is mutually agreed as follows:

2. *Understandings*

a. *Priorities*

i. The parties recognize that flood control is a higher, better and more necessary public use of the property and facilities owned by the FCD pursuant to the Flood Control Act and other state and federal law. This MOU shall be subject to the paramount legal duties and obligations of FCD pursuant to the Flood Control Act.

ii. The FCD shall have the sole discretionary authority to determine what constitutes "adequate flood protection" for the operation of its facilities.

iii. FCD shall have the sole discretionary authority to determine which of its facilities are available for use in re-charge activities proposed by the Valley District. Any future use of a FCD facility shall be subject to the parties' approval of a site specific agreement.

iv. Based on the priorities and discretion provided in this Section 2.a., "Priorities", as well as the general planning nature of this MOU, FCD and Valley District acknowledge and agree that no implied covenants attach to this agreement, including, but not limited to, the implied covenant of good faith and fair dealing.

b. *Term*

This MOU shall have a term of 10 years from the date on which the last party executes this MOU. This MOU may be extended by the parties for subsequent 10-year periods, subject to approval by both parties.

c. *General Planning Efforts*

i. Once a specific plan is initiated by Valley District for the specific use of a particular flood control facility, the parties agree to allocate sufficient staff time and resources to evaluate the joint use/operation of that existing facility for adequate flood control purposes in conjunction with water replenishment. Valley District shall provide to FCD all of the details associated with the proposed use for each FCD facility including, but not limited to, any proposed improvements (including a statement as to which entity will own the improvements after a project specific agreement terminates) and a proposed operational plan for each FCD facility. This information will also include the amount of estimated recharge for both

native stormwater and State Water Project water (if any), or other sources of water, for each facility, and quality of such water.

ii. The joint evaluation may consider replenishment with both native water and water from the State Water Project or other sources and shall also consider the potential effects of groundwater replenishment to the environment, including, but not limited to, an evaluation of whether such activities will introduce water quality pollutants or mobilize existing groundwater contamination, or will cause land subsidence, liquefaction, or seepage to low lying lands in any basin to be impacted by the replenishment activities of Valley District. The parties acknowledge that Valley District will be the agency primarily leading this evaluation as it has the appropriate expertise concerning groundwater storage and the quality of waters from sources such as the State Water Project. FCD will independently review Valley District's evaluation.

iii. Considering the statutory purposes of the FCD and the goals of Valley District, both parties agree that they will determine, on a case by case basis, which agency will be in charge of seeking permits for projects and which agency will be the "Lead Agency" for purposes of complying with CEQA.

iv. Valley District will work cooperatively with FCD towards Valley District's goal of maximizing the quantity of water that can be replenished annually from the existing flood control basins, while maintaining or improving the protection of the public from the dangers of flooding. In general, FCD will not object to Valley District's use of FCD's fee owned properties or the modification of existing flood control basins that are owned in fee by FCD by means of the installation of dual-purpose facilities, *provided* that: (i) Valley District is responsible for all regulatory and other costs associated with said activities, and (ii) the incremental cost of those modifications is paid by Valley District, and (iii) FCD reviews and is satisfied with the individual circumstances surrounding the proposed project and the existing flood control facility. Nothing in this paragraph is intended to alter the sole discretionary authority of the FCD concerning the uses of its facilities.

v. The parties will also collaborate with other local, state and federal agencies with regulatory authority over these activities, including, but not limited to, the U.S. Army Corps of Engineers, the U.S. Environmental Protection Agency, the U.S. Fish and Wildlife Service, the California Regional Water Quality Control Board, the California Department of Fish and Wildlife and any others.

vi. Valley District agrees to pay a reasonable use fee for the use of the FCD's land and facilities as agreed to by both parties on a case by case basis.

vii. Valley District acknowledges and agrees that future project specific agreements with FCD will include indemnification and insurance provisions developed by FCD's counsel and FCD's Risk Management Department that adequately protect FCD from any and all claims, actions, losses, and damages arising out of the water conservation and replenishment activities described in this MOU. The parties agree that such indemnification and insurance provisions will be negotiated in consideration of the individual circumstances surrounding each existing flood control facility on a case-by-case basis.

viii. Valley District acknowledges and agrees that future project specific agreements with FCD will also require FCD permits.

3. *General Provisions*

a. *Early Termination.* Either party may terminate this agreement prior to its expiration date for cause, *provided* that it has provided 60-day written notice and opportunity to cure to the other party prior to termination.

b. *Recitals Incorporated Herein.* The parties agree and acknowledge that the recitals set forth above are true and correct and are fully incorporated in this MOU.

c. *Non-Exclusive Agreement.* Nothing in this MOU shall prevent either party from working cooperatively with other individuals, public agencies or private organizations to improve flood protection or groundwater recharge within that party's respective jurisdiction.

d. *Authority.* Each signatory of this MOU represents that he/she is authorized to execute this MOU on behalf of the party for which he/she signs. Each party represents that it has legal authority to enter into this MOU and to perform all obligations under this MOU.

e. *Amendment.* This MOU may be amended or modified only by a written instrument executed by each of the parties to this MOU.

f. *Jurisdiction and Venue.* This MOU shall be governed by and construed in accordance with the laws of the state of California, except for its conflicts of law rules. Any suit, action, or proceeding brought under the scope of this MOU shall be brought and maintained to the extent allowed by law in the County of San Bernardino, California.

g. *Headings.* The paragraph headings used in this MOU are intended for convenience only and shall not be used in interpreting this MOU or in determining any of the rights or obligations of the parties to this MOU.

h. *Construction and Interpretation.* This MOU has been arrived at through negotiations and each party has had a full and fair opportunity to revise the terms of this MOU. As a result, the normal rule of construction that any ambiguities are to be resolved against the drafting party shall not apply in the construction or interpretation of this MOU.

i. *Entire Agreement.* This MOU constitutes the entire agreement of the parties with respect to the subject matter of this MOU and supersedes any prior oral or written agreement, understanding, or representation relating to the subject matter of this MOU.

j. *Attorneys' Fees and Costs.* Regardless of whether it is the prevailing party in any litigation or other action to enforce or interpret this MOU, each party shall bear its own attorneys' and expert witnesses' fees, costs of suit and other necessary disbursements. This paragraph shall not apply to the costs or attorney(s) fees relative to Section 3.p., "Indemnification and Insurance."

k. *Necessary Actions.* Each party agrees to execute and deliver additional documents and instruments and to take any additional actions as may be reasonably required to carry out the purposes of this MOU.

l. *Third Party Beneficiaries.* This MOU shall not create any right or interest in any non-party or in any member of the public as a third party beneficiary.

m. *Counterparts.* This MOU may be executed in one or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute but one and the same instrument.

n. *Notices.* All notices, requests, demands or other communications required or permitted under this MOU shall be in writing unless provided otherwise in this MOU and shall be deemed to have been duly given and received on: (i) the date of service if served personally or served by facsimile transmission on the party to whom notice is to be given at the address(es) provided below, (ii) on the first day after mailing, if mailed by Federal Express, U.S. Express Mail, or other similar overnight courier service, postage prepaid, and addressed as provided below, or (iii) on the third day after mailing if mailed to the party to whom notice is to be given by first class mail, registered or certified, postage prepaid, addressed as follows:

SAN BERNARDINO COUNTY FLOOD CONTROL DISTRICT

Director
Department of Public Works
County of San Bernardino
825 East Third Street
San Bernardino, California 92415
Telephone: (909) 387-7906
Facsimile: (909) 387-7911

SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT

General Manager
San Bernardino Valley Municipal Water District
380 East Vanderbilt Way
San Bernardino, California 92408
Telephone: (909) 387-9200
Facsimile: (909) 387-9247

o. *Assignment.* This MOU may not be assigned by either party without the written consent of the other party.

p. *Indemnification and Insurance.* FCD agrees to indemnify, defend (with counsel approved by Valley District) and hold harmless Valley District, its employees, officers, agents, and volunteers from any and all claims, actions, losses, damages, and/or liability resulting from FCD's negligent acts or omissions which arise from FCD's performance of its obligations under this MOU. Valley District agrees to indemnify, defend (with counsel approved by FCD) and hold harmless the FCD, its employees, officers, agents, and volunteers from any and all claims, actions, losses, damages, and/or liability resulting from the Valley District's negligent acts or omissions which arise from the Valley District's performance of its obligations under this MOU. In the event, FCD and/or Valley District is found to be comparatively at fault for any claim, action, loss or damage which results from their respective obligations under this MOU, FCD and/or Valley District shall indemnify the other to the extent of its comparative fault. FCD and Valley District shall maintain throughout the term of this MOU such policies of insurance or legally sufficient self-insurance for Professional Liability (as applicable), Automobile Liability, Comprehensive General Liability, and Workers' Compensation that are adequate to protect against all liabilities and indemnification responsibilities arising out of the performance of the terms, conditions or obligations of this MOU.

IN WITNESS WHEREOF, the parties have caused this MOU to be executed by their duly authorized officers or representatives as of the last day and year appearing below.

AMENDMENT TO AGREEMENT TO FORM THE UPPER SANTA ANA RIVER WASH LAND MANAGEMENT AND HABITAT CONSERVATION PLAN TASK FORCE

THIS AMENDMENT TO AGREEMENT TO FORM THE UPPER SANTA ANA RIVER WASH LAND MANAGEMENT AND HABITAT CONSERVATION PLAN TASK FORCE ("Amendment") is made effective this 1st day of September, 2013, by and between the following entities (hereinafter individually referred to as a "Party" and collectively referred to as the "Parties"):

CEMEX CONSTRUCTION MATERIALS, LP ("CEMEX")

CITY OF HIGHLAND ("HIGHLAND")

CITY OF REDLANDS ("REDLANDS")

COUNTY OF SAN BERNARDINO ("SAN BERNARDINO COUNTY")

SAN BERNARDINO VALLEY WATER CONSERVATION DISTRICT ("SBVWCD" OR "CONSERVATION DISTRICT")

ROBERTSON'S READY MIX, LTD ("ROBERTSON'S")

EAST VALLEY WATER DISTRICT ("EVWD")

REDLANDS MUNICIPAL UTILITIES AND ENGINEERING DEPARTMENT ("RMUED")

SAN BERNARDINO COUNTY FLOOD CONTROL DISTRICT ("SBCFCD")

UNITED STATES BUREAU OF LAND MANAGEMENT ("BLM")

SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT ("VALLEY DISTRICT")

RECITALS

This Amendment is entered into on the basis of the following facts, understandings, and intentions of the Parties:

A. All Parties hereto, except Valley District, entered into that certain "Agreement to Form the Upper Santa Ana River Wash Land Management and Habitat Conservation Plan Task Force" on November 20, 2002 ("Original Agreement"), for the purposes of advancing environmental planning and permitting in connection with the Upper Santa Ana River Wash Land Management Plan ("Wash Plan").

B. Since the time the Original Agreement was entered into, planning for the Wash Plan has advanced in all phases, including with respect to groundwater recharge and other water conservation facilities. In connection with such facilities, Conservation District and Valley District have entered into a series of agreements to allow for joint use

of Conservation District property, and construction of additional facilities as part of an Enhanced Recharge Program with Valley District, to fulfill various of the Wash Plan objectives regarding expanded groundwater recharge and water conservation capabilities.

C. The Original Agreement provided, in paragraph 2 (G), that all Parties acknowledged and agreed that the effectiveness of the Task Force may be improved by the addition of other entities that had interest in the work of the Task Force, and given Valley District's intended role in contributing to expanding groundwater recharge facilities in the Wash Plan area, Valley District is such an entity.

D. At a Task Force meeting held July 16, 2013, the Task Force reviewed cost estimates for the completion of environmental review and permitting activities for the Wash Plan, and the individual members will be going to their respective governing bodies for funding authorization for the completion of such environmental review and permitting activities. In addition, the Task Force has refined its description of covered activities to be included within the "take" and other permitting authorizations proposed to be pursued, such that the Wash Plan process is now at a point where responsible estimates for long-term habitat maintenance and other costs can be generated, and an equitable distribution of such costs over parties sponsoring, or benefitting from, component projects of the overall Wash Plan can be determined.

E. The Parties therefore wish to amend the Original Agreement to add Valley District as a regular member of the Task Force, and to specify their going-forward intentions for additional consultations for deriving an equitable cost-sharing allocation for the costs that may be incurred by the Task Force members for implementation of the Habitat Conservation Plan and other permanent funding requirements that may attend final Wash Plan approval.

NOW, THEREFORE, the Parties do hereby agree as follows:

1. Valley District is, and henceforth shall be, a "Regular Member" of the Task Force under Section 2 (A) of the Original Agreement. Valley District shall pay a one-time fee into the Fund (provided in Section 5 (C) of the Task Force Agreement) of $275,000.00. Such amount shall be utilized by the Conservation District, as Project Manager, to help offset the Conservation District's share of interim and estimated costs of completion of the environmental and permitting documentation for the Wash Plan. The Task Force at its meeting on July 16, 2013 approved estimated costs for planning and consulting services.

2. The Parties agree to meet and confer, in order to rework the contribution levels specified in Exhibit "B-1" to the Original Agreement, for those expenses that will be required of the Task Force members for costs for implementation of the Habitat Conservation Plan and other implementation funding requirements that may attend final Wash Plan approval. As presently contemplated, the basis for the allocation of such implementation costs shall be allocated on a proportionate acreage basis as it relates to the habitat disturbances attributable to the portions of the

component projects of the Wash Plan advanced by, sponsored by, or benefitting Task Force members, with offsetting credit being given to the amount of habitat as acreage being contributed by various Task Force members. The Task Force will refine such costs allocations once the PAR analysis and final permitting costs are more fully determined.

3. Except as specifically amended herein, the Original Agreement remains in full force and effect.

IN WITNESS WHEREOF, the Parties hereto have entered into the Amendment as of the day and year first set forth above.

AGREEMENT TO FORM THE UPPER SANTA ANA RIVER WASH LAND MANAGEMENT AND HABITAT CONSERVATION PLAN TASK FORCE

THIS AGREEMENT is made effective this 20TH day of NOV, 2002, by and between the following entities (hereinafter individually referred to as a "Party" and collectively referred to as the "Parties"):

CEMEX CONSTRUCTION MATERIALS, LP ("CEMEX")	ROBERTSON'S READY MIX, LTD ("ROBERTSON'S")
[CITY OF HIGHLAND ("HIGHLAND")]	EAST VALLEY WATER DISTRICT ("EVWD")
CITY OF REDLANDS ("REDLANDS")	REDLANDS UTILITIES DEPARTMENT ("RUD")
COUNTY OF SAN BERNARDINO ("SAN BERNARDINO COUNTY")	SAN BERNARDINO COUNTY FLOOD CONTROL DISTRICT ("SBCFCD")
SAN BERNARDINO VALLEY WATER CONSERVATION DISTRICT ("SBVWCD" OR "CONSERVATION DISTRICT")	UNITED STATES BUREAU OF LAND MANAGEMENT ("BLM")

RECITALS

This Agreement is entered into on the basis of the following facts, understandings, and intentions of the Parties:

A. Representatives of numerous agencies, including water, mining, flood control, resource management and conservation, and municipalities, formed the Santa Ana River Wash Area Coordinating Planning Activities Committee ("Wash Committee") to address local mining issues and other land functions on the Upper Santa Ana River Wash ("Wash"). A Policy Action Committee ("PAC") was subsequently established, consisting of elected officials from San Bernardino County, Highland, Redlands, and the Conservation District, as well as the Field Manager of the BLM. A Technical Advisory Committee ("TAC") was also formed with representatives from the PAC agencies, and other water, mining, flood control, and resource protection interests.

B. The Wash Committee examined the most appropriate manner in which to use the Wash for the benefit of all landowners without regard to preexisting planning of the Wash or current land ownership. Ultimately, the Wash Committee determined that there should be a balance of land uses to accommodate the needs of mineral extraction, water conservation, habitat protection, and municipal infrastructure

requirements (i.e. utilities, trails, etc.). To achieve land use balance, current land uses must be reassigned to better accommodate mineral extraction, water conservation, and habitat. To effect such change, an exchange of existing land ownership between BLM and the Conservation District, and a transfer of leasehold interests between the mining companies and the Conservation District will be required.

C. The TAC reached a general consensus in early 2000 regarding the designation of specific areas of the Wash for the desired uses. The result of this multi-jurisdictional effort was the creation of a proposed Land Management and Habitat Conservation Plan for the Upper Santa Ana River Wash ("Concept Plan"). The Concept Plan establishes the framework for balancing ongoing and future land activities proposed for the Wash Planning Area ("WPA"), including habitat protection areas and recreational trail alignments. The Concept Plan was reviewed and endorsed by the governing boards and/or officials with approval authority from each of the Parties, and various other agencies involved in the deliberations on the Concept Plan.

D. Each of the Parties have found and determined that it is in their best interests to join together to: manage activities in connection with the necessary refinements, environmental review, and implementation of the Land Management and Habitat Conservation Plan (collectively the "Project"); provide an equitable cost-sharing mechanism for the funding of the Project; and, define the projected schedule and scope of work to execute the Project.

E. The Parties hereto now enter into this Agreement to establish a Task Force, consisting of a representative from each party, to oversee and administer the preparation of plans, environmental review documents, public notices and hearings, and other activities requisite to the formulation and, if adopted, execution of the Project.

F. In entering into this Agreement, the Parties reserve their discretionary authority with regard to the execution of the Project, including but not limited to, any land use and planning authority under state and local law, authority, designated under the Surface and Mining Recovery Act ("SMARA"), and CEQA approval of their own discretionary decisions executing the Project.

TERMS & CONDITIONS

SECTION 1: DESCRIPTION OF PROJECT.

The Project to be undertaken by the Task Force consists of all of the following:

A. Refinement and expansion of the Concept Plan (Exhibit "A") to develop the Component Plans of a "Land Management and Habitat Conservation Plan for the Upper Santa Ana River Wash" ("Plan"), which includes the following:

1. A Mining and Reclamation Plan under the Surface Mining and Reclamation Act ("SMARA") designating the areas as generally depicted in Exhibit "A" to be devoted to sand, gravel, and mineral extraction and the terms and conditions under which such extraction may proceed, which will be provided by CEMEX and

Robertson's to the appropriate municipality, Highland or Redlands, for review and approval;

2. A Water Conservation Plan, which describes the scope, extent, and location of water diversions, conveyance, spreading, and monitoring activities, which will be provided by the Conservation District;

3. A Recreation Plan, which coordinates the planning and development of trails, parks, and public recreation areas, which will be provided by Conservation District, San Bernardino County, and Redlands;

4. An Infrastructure Plan, which describes the location of pipelines, utility corridors, roads, highways, and communication facilities, which will be provided by the Conservation District, EVWD, and Redlands;

5. A Habitat Protection Plan, which will be provided by the Conservation District to identify habitat areas that may be considered to protect threatened and endangered species at such time as other activities within the Wash are presented to the appropriate agency for entitlements, approvals and /or land use permits; and

6. A Flood Control Plan, which describes flood control facilities/activities including detention and retention basins, drains, and storm water conveyance facilities, which will be provided by SBCFCD.

B. Preparation of preliminary documents necessary to conduct an environmental analysis, including the following:

1. A Project Description for the environmental analysis based on the Component Plans described above;

2. Alternative land balancing plans to be studied in the environmental analysis;

3. A plan outline, including actions, required funding, and the administrative or legislative measures needed to implement the Project, which will be known as the Implementation Action Plan; and

4. A draft agreement to execute the Implementation Action Plan, which will be known as the Implementation Agreement.

C. Preparation of an EIR/EIS for implementation of the Plan, including a mitigation monitoring plan, based on the Component Plans in 1.A. above, and the preliminary documents in 1.B. above.

D. Completion of a proposed land exchange between BLM and Conservation District. BLM, working with the Conservation District, shall undertake activities to assess, and if appropriate, implement by way of a Memorandum of Understanding or

other appropriate instrument with the Conservation District, a land exchange. The assessment and potential implementation of the land exchange will analyze whether portions of property currently owned by BLM can feasibly and beneficially be exchanged for portions of property owned by the Conservation District.

E. Preparation of the implementation documents based on the completed EIR/EIS, including the following:

1. A certification of the EIR and record of decision for the EIS;

2. An Implementation Action Plan; and

3. A Habitat Conservation Plan, including a programmatic Section 10a Take Permit.

F. Task Force submit the EIR/EIS, Implementation Action Plan, and Habitat Conservation Plan to the appropriate agencies for their action and, if adopted, subsequent implementation.

SECTION 2: CREATION OF THE TASK FORCE.

There is hereby created a task force that shall be known as the Upper Santa Ana River Wash Land Management and Habitat Conservation Plan Task Force ("Wash Task Force" or "Task Force"). The Task Force shall oversee and direct preparation of the Project and shall be comprised of regular and advisory members as follows:

A. Regular Members.

Each Party who contributes financially to fund the Project in accordance with Exhibit "B" to this Agreement, as may be amended from time to time, or contributes with in-kind services that result in a product for use by the Task Force commensurate with the level of contribution identified in Exhibit "B," shall be deemed a Regular Member of the Task Force. Any dispute regarding whether "in-kind" services contributions by a Party entitles such Party to status as a Regular Member shall be submitted to all then-existing Task Force Regular Members, and will be decided by a majority vote of the Task Force Regular Members. Each Regular Member shall be entitled to appoint two (2) representatives to the Task Force concurrently with the execution of this Agreement. Each Regular Member shall appoint (1) representative to oversee and contribute to the technical/staff aspects of the Task Force's work, and one (1) member of the legislative body, Board of Directors, or other body with ultimate decision making and policy making authority for the Regular Member, who shall be the voting member of the Task Force. Notwithstanding that each Regular Member shall have two (2) representatives to the Task Force, each Regular Member shall have and exercise only one (1) vote. The identity of each of the appointed representatives from each respective Party shall be promptly communicated to the Project Manager. Appointed representatives to the Task Force shall serve at the pleasure of the governing body of the respective appointing Party, and may be removed by them at any time, with or without cause; provided, however, that the Parties acknowledge and agree the continuity of representation on the

Task Force is important to the overall effectiveness of the Task Force, and the Parties further agree to ensure such continuity whenever possible.

B. Advisory Members.

1. Any member of the TAC, which is not a Regular Member of the Task Force, and any other public or governmental agency, may with the approval of a majority of the Regular Members of the Task Force, designate representatives as non-voting advisors to the Task Force ("Advisory Members"). The Task Force will formally recognize these Advisory Members and ensure all materials and products of the Task Force are provided to the Advisory Members. A list of Advisory Members will be maintained by the Project Manager.

2. The California Department of Water Resources (DWR), the California Department of Fish and Game (DFG), and the United States Fish and Wildlife Service (USFWS), County of Orange, and the City of Highland are hereby designated as Advisory Members to the Task Force.

3. Advisory Members may be admitted as Regular Members, with voting privileges, with approval by a majority vote of Regular Members of the Task Force.

C. Function.

1. The Task Force shall oversee and direct the preparation of all of the component elements of the Project.

2. The Task Force shall assist in the selection of a consultant to assist in planning and implementing the Project ("Consultant"). The Consultant selected must be acceptable to the Federal lead agency.

3. The Task Force shall meet periodically for the purpose of reviewing and evaluating the work product of the Task Force and the Consultant.

4. The Task Force shall administer this Agreement, subject to the reserved right of each of the Parties to approve their respective financial appropriations to Task Force budgets.

5. The Task Force shall propose contribution levels for each Party, subject to Section 4.D. herein. The contribution level for each Party shall initially be those set out in Exhibit "B" hereto.

6. The Task Force shall, in consultation with the Consultant, prepare and adopt a project schedule ("Project Schedule"). When completed, the Project Schedule will be circulated among all Regular and Advisory Members, and will be maintained by the Project Manager.

D. Committees.

The Task Force may establish working committees, which shall be designated from a pool of Regular and Advisory members who shall be selected by and serve at the pleasure of the Task Force.

E. Designation of Officers.

The Task Force shall designate and appoint one of its representatives to act as Chair and another of its members to act as Vice-Chair, both of which shall be selected from the pool of Regular Members. The Conservation District shall perform the functions of project administrator, including secretarial and treasurer duties.

F. Meetings

Regular meetings of the Task Force shall be held at the Conservation District offices, or such other place as may be agreed upon by the Task Force. At the first meeting, the Task Force shall provide for the time and place of its regular meetings. Special meetings may be called at the request of the Chair or of a majority of Regular Members to the Task Force. A majority of Regular Members of the Task Force shall constitute a quorum for the purposes of transacting business. Except as otherwise provided herein, all actions of the Task Force shall be passed and adopted upon the affirmative vote of a majority of the quorum of Regular Members. All meetings of the Task Force shall be conducted in accordance with California's Open Meeting Laws. The Project Manager shall keep or cause to be kept, minutes of the meetings of the Task Force, copies of which shall be forwarded to each Task Force representative and to each Party. The Task Force may adopt, from time to time, such additional rules and regulations for the conduct of its affairs as may be required.

G. Additional Parties.

The Parties to this Agreement acknowledge and agree that the effectiveness of the Task Force may be improved by the addition of other entities that have interest in the work of the Task Force. Such entities may join the Task Force upon approval of a majority of the Regular Members of the Task Force, and upon such terms and conditions as are acceptable to such Regular Members, including, but not limited to, cash contributions to past, present, and/or future work of the Task Force.

H. City of Highland as Regular Member.

At the time of execution of this Agreement, the City of Highland has expressed its interest in joining the Task Force as a Regular Member, and the parties to this Agreement contemplate and desire that it do so. Provided City of Highland approves and executes this Agreement within One Hundred Eighty (180) days of the Effective Date, and pays its share of the Task Force Contribution Levels as set forth in Exhibit "B-1," for application to all expenses incurred by the Task Force from the Effective Date and following, City of Highland may join the Task Force, as a Regular Member, without the necessity of an approving vote of the Regular Members. In the event City of

Highland so joins the Task Force pursuant to the terms and conditions of this Section 2 (H), and effective immediately and prospectively from the date it does, various provisions of this Agreement shall be thereupon automatically be amended, all as more specifically set out in Exhibit "D" hereto.

SECTION 3: LEAD AGENCY DESIGNATION

A. Consistent with the First Amendment to the Memorandum of Understanding Regarding Coordinated Planning Activities Pertaining to the Santa Ana River Wash Area dated August 13, 1997, ("MOU") and its designation of the Conservation District as the Permanent Chair of the Policy Action Committee, the Conservation District is hereby designated as the Lead Agency for all non-federal activities associated with the Project under the California Environmental Quality Act ("CEQA").

B. The BLM is hereby designated as the Lead Agency for all federal activities associated with the Project under the National Environmental Policy Act ("NEPA").

SECTION 4: PROJECT MANAGER.

A. The Conservation District shall serve as the Project Manager, at the pleasure of the Task Force. The Project Manager shall act as the primary liaison and contact between the Consultant, the Task Force, and the Parties to the Second Amendment.

B. The duties of the Project Manager shall include the following:

1. Serve as the Lead Agency under CEQA and as assistant to BLM, which is the Lead Agency under NEPA; provided, however, that on issues relating to definition of level of significance for impacts, existence of and mitigation for significant adverse environmental impacts, and formulation of a mitigation monitoring program for those portions of the Project which involve mining activity within the jurisdictional boundaries of Redlands, and which require permits under SMARA, the Project Manager shall accept and incorporate into the EIR/EIS the determinations of Redlands for such aspects of the Project.

2. Administer the cost-sharing formula, which designates the percentage of the total cost of the Project, as approved by each Party to fund the Project;

3. Coordinate communications between the Consultant and the Parties;

4. Provide the Consultant with copies of all earlier studies and EIRs, which may be helpful to the Consultant to complete the Project;

5. Gather and transmit data to the Consultant from the Parties;

6. Provide periodic reports to the Task Force of the progress of the Project;

7. Report to and solicit input from the Task Force regarding policy issues that may arise;

8. Oversee the billing for all aspects of the Project;

9. Receive and pay all appropriate invoices for the Consultant;

10. Review the Consultant's charges and advise the Task Force of any problems associated with the Project;

11. Facilitate meetings of the Task Force and maintain records of the Task Force;

12. The Project Manager shall, through a written Notice to Proceed, cause the Consultant to commence the Project, and shall cause the Consultant to perform all services within the time period(s) established in the Project Schedule, and in conformity with the approved Project Flow Diagram, attached hereto as Exhibit "C"; and,

13. Either approve or deny by way of written response any requests for minor adjustments to the time period(s) specified in the Project Schedule.

C. Administration of Task Force Work.

The Conservation District shall make its personnel available as reasonably necessary to the Task Force to perform the secretarial, clerical, administrative, legal general counsel, and financial management duties requested by the Task Force. The Task Force shall compensate the Conservation District for the Conservation District's actual costs incurred in providing such services to the Task Force, upon presentation of an invoice detailing the services rendered and costs thereof, and approval of the same by the Task Force.

SECTION 5: FUNDING MECHANISM.

A. The current estimated cost for the preparation of plans and environmental review for the Project is $823,258, or $973,258 if the consultant prepares the Implementation Agreement. The Task Force shall periodically approve a contribution amount to be requested of all Regular Members, to be paid to and managed by the Project Manager consistent with the provisions of this Section 4, from which the Project Manager will meet the expenses incurred in implementing the Project. Contributions shall be apportioned among the Parties, as agreed to by the Parties. The initial levels of contribution are identified in Exhibit "B" to this Agreement.

B. The Conservation District as Project Manager shall coordinate Consultant retention, direction, coordination, and oversight in the planning and implementation of

the Project, and shall serve as the agency through which funds are to be conveyed and disbursed for the purpose of completing the Project.

C. The Conservation District shall establish a fund ("Fund") into which it will cause to be deposited all of the contributions received from the Task Force towards the estimated cost of the Project. It is intended that this Fund finance the Project in its entirety. In establishing the Fund, the Conservation District shall assure that all interest earned by the Fund is to be paid into the Fund, and made solely available for the funding of the Project. The Task Force may from time to time propose a cost-sharing formula differing from that attached as Exhibit "B", which designates the percentage of the total cost of the Project each Party will be required to contribute to the Fund. Upon approval by the Task Force of a contribution amount to be requested of the Regular Members, the Project Manager shall submit invoices to each Party requesting payment of their respective contributions, pursuant to the formula attached as Exhibit "B," or as otherwise proposed by the Task Force. Payment of these invoices shall be made to the Conservation District within 30 days of receipt of such invoice. If any Regular Member fails to timely remit payment of its share of the invoices in accordance to Exhibit "B" to this Agreement, the voting rights of such Regular Member shall be suspended until such time as the full amount of the invoice is paid, or the final resolution of any dispute regarding the invoice, as provided below. During such period of suspension, the Party shall enjoy only those rights and privileges as an Advisory Member of the Task Force.

D. Each Party reserves the right to approve its own contribution level to the Project, as well as its ultimate payment authority of invoices issued by the Project Manager, in whole or in part, on a per-invoice basis.

E. The Project Manager shall have authority and control of disbursements from the Fund. The Project Manager shall provide the Task Force with an accounting on at least a quarterly basis showing all disbursements, accrued interest, and other debits and credits to the Fund for the preceding quarter. Any amounts paid to the Project Manager shall not be subject to refund, except as provided herein.

F. Should a dispute arise between the Project Manager and any Party(ies) with respect to either an invoice submitted by the Consultant or any other disbursement from the Fund, the complaining Party(ies) shall notify the Project Manager in writing, specifying the nature of the objections, the reasons therefor, and the action the complaining Party(ies) requests the Project Manager to take in resolution of the dispute. Upon receipt of any such written objection, the Project Manager shall meet or otherwise confer with the complaining Party(ies) in a good faith effort to resolve the dispute. In the event such efforts do not result in resolution of the dispute within ten (10) days of the Project Manager's receipt of the written objection, the Project Manager shall refer the matter to the Task Force, and shall provide it with any and all receipts, invoices, or other documents necessary for the prompt resolution of the dispute. The Task Force shall consider and resolve the matter at its next scheduled meeting, but no later than thirty (30) days following the Project Manager's referral of the dispute to the Task Force. In resolving the dispute, the decision of the majority of the Regular Members of the Task Force shall be final.

G. Upon completion of the Project, or earlier termination of this Agreement, any unexpended Funds shall be returned to the Parties in proportion to their financial contribution.

SECTION 6: OWNERSHIP OF DOCUMENTS.

All work produced in association with the Project (including originals prepared by anyone in connection with, or pertaining to, the work of the Task Force) shall become the property of the Regular Members of the Task Force, and each of them.

SECTION 7: INDEMNIFICATION.

Neither the Project Manager nor any officer or employee thereof shall be responsible to any other Party for any damage or liability occurring by reason of anything done, or omitted to be done, by the Consultant, or in connection with any work, authority or jurisdiction delegated to the Project Manager under this Agreement. All Parties, and each of them, hold the Project Manager harmless from any claim, demand, suit of law or equity, or other proceeding arising from or relating to the Project Manager's performance of its obligations contemplated by this Agreement. Nothing herein shall be read or understood as indemnifying or holding the Conservation District, or any officer or employee thereof, harmless from any claim, demand, suit on law or equity, or other proceeding arising from or relating from the acts or omissions of the Conservation District while acting as a Party to this Agreement.

In addition, each Party agrees to indemnify, defend, and hold harmless each other Party and its officers, employees, agents, and volunteers from any and all claims, actions, losses, damages, and/or liability arising out of its obligations under this Agreement.

In the event any Party is found to be comparatively at fault for any claim, action, or loss, or damage that results from their respective obligations under this Agreement, the Party(s) found to be at fault shall indemnify the other(s) to the extent of its comparative fault.

Federal agencies' obligations under this Agreement shall be to the extent permitted by the Federal Tort Claims Act.

SECTION 8: NOTICES.

All notices required to be provided hereunder, except meeting notices, shall be in writing, and either served personally or sent by United States Mail. Meeting notices may be provided by electronic mail correspondence. For these purposes, the addresses for the Parties and Advisory Members are as follows:

SECTION 9: ENTIRE AGREEMENT.

This Task Force Agreement contains the entire agreement of the Parties hereto with respect to the matters contained herein, and supersedes all negotiations, prior discussions, and preliminary agreements or understandings, written or oral relating to

the Task Force and Project Manager. No waiver or modification of this Agreement shall be binding unless consented to by all Parties in writing.

SECTION 10: WAIVER.

No waiver of any default shall constitute a waiver of any other default or breach, whether of the same or other covenant or condition. No waiver, benefit, privilege, or service voluntarily given or performed by a Party shall give the other Party any contractual rights by custom, estoppel, or otherwise.

SECTION 11: COOPERATION: FURTHER ACTS.

All parties agree to use reasonable care and diligence to perform their respective obligations under this Agreement. All parties agree to act in good faith to execute all instruments, prepare all documents, and take all actions as may be reasonably necessary, appropriate or convenient to carry out the purposes of this Agreement.

SECTION 12: GOVERNING LAW.

This Agreement shall be governed by and construed under the laws of the State of California. Federal agency participation under this Agreement, however, shall be governed by the applicable federal laws.

SECTION 13: ATTORNEYS' FEES.

In the event the Task Force initiates or defends any litigation or other judicial or administrative proceeding in connection with the Project or this Agreement, retention of counsel to represent the Task Force, if required, shall be by the Project Manager, subject to the approval of the Task Force. The costs of such retention will be invoiced to the members of the Task Force in the same manner, and subject to the same procedures, as all other consultant costs invoiced to the Task Force. In any action or proceeding involving a dispute between the Parties arising out of this Agreement, the prevailing Party shall be entitled to receive from the other Party, reasonable attorneys' fees. The term "attorneys' fees" shall include reasonable costs for investigating the action, conducting discovery, cost of appeal, costs and fees for expert witnesses, and all other normally allowable costs incurred in such litigation, whether or not such litigation is prosecuted to final judgment. Service of process on any Party shall be made in any manner permitted by law and shall be effective whether served inside or outside of California.

Notwithstanding the foregoing, attorneys' fees and costs' recoverable against the United States, however, shall be governed by applicable federal laws.

SECTION 14: NO THIRD PARTY BENEFICIARIES.

There are no intended third party beneficiaries of any right or obligation assumed by the Parties. No member of, or delegate to, Congress or Federal Resident

Commissioner, shall be entitled to any share of this Agreement, or to any benefit that may arise from it.

SECTION 15: CONSTRUCTION: CAPTIONS.

The language of this Agreement shall be construed according to its fair meaning, and not for or against any Party hereto based on authorship. The captions of the various articles and paragraphs are for convenience and ease of reference only, and do not define, limit, augment, or describe the scope, content, or intent of this Agreement.

SECTION 16: SEVERABILITY.

Each provision of this Agreement shall be severable from the whole. If any provision of this Memorandum shall be found contrary to law, it is the intention of all the Parties, and each of them, that the remainder of this Agreement shall continue in full force and effect.

SECTION 17: INCORPORATION OF RECITALS.

The Recitals are incorporated herein and made an operative part of this Agreement.

SECTION 18: AUTHORITY TO ENTER INTO AGREEMENT.

All Parties warrant that they have all requisite power and authority to execute and perform this Agreement. Each person executing this Agreement on behalf of their party warrants that he or she has the legal power, right, and authority to make this Agreement and bind his or her respective Party, and that in so doing, such Party is not thereby in breach of any other contract or agreement.

SECTION 19: COUNTERPARTS.

This Agreement may be signed in counterparts, each of which shall constitute an original.

SECTION 20: EFFECTIVE DATE

The Effective Date of this Agreement shall be latest of the dates set next to the signatures of the parties hereto evidencing signature by all the parties hereto, which latest date shall be inserted into the preamble to this Agreement.

SECTION 21: NO ASSIGNMENT.

The rights and obligations of this Agreement may not be transferred, assigned, or encumbered by any Party hereto without the prior, express, written consent of a majority of the Regular Members of the Task Force.

SECTION 22: DISSOLUTION.

The Task Force may be dissolved upon a 2/3 majority vote of the regular members. Upon such dissolution, the Project Manager is entitled to pay all outstanding invoices, and distribute any remaining money in the Fund among the contributing members pro-rata according to each Party's respective financial contribution.

SECTION 23: TERMINATION.

A. Any Party may voluntarily terminate its participation under the Agreement at any time upon delivery of at least 60 days prior written notice to the Task Force.

B. The Task Force may, upon a 2/3 majority vote, terminate any Party's participation under the Agreement upon that Party's failure to make its pro-rata contribution:

(1) Within 30 days of the date said Party's contribution becomes due; OR

(2) Within 45 days after the Task Force resolves said Party's dispute over the payment of an invoice in favor of payment as set forth in Section 4(F) of this Agreement.

C. Upon a Party's termination from participation under the Agreement, the Project Manager shall return the portion of that Party's pro-rata contribution not expended by the Project Manager after paying invoices for all charges incurred during the period that Party served as a Member of the Task Force.

D. The termination of any member or members of the Task Force shall not affect the remaining Parties' obligations under this Agreement, except for redistribution of contributions described herein. This Agreement shall remain in effect until such time as 2/3 of the regular members vote to dissolve the Task Force as provided by Section 22 of this Agreement.

EXHIBIT "B": TASK FORCE CONTRIBUTION LEVELS

Allocation to the Parties of their share of the costs associated with the Project is as set forth below in the following proportions:

AGENCY	RESPONSIBILITY FOR FINANCIAL CONTRIBUTION
CEMEX	24.774
ROBERTSON'S READY MIX	24.774
SAN BERNARDINO VALLEY WATER CONSERVATION DISTRICT	24.644
EAST VALLEY WATER DISTRICT	3.226
REDLANDS UTILITIES DEPARTMENT	3.226
COUNTY OF SAN BERNARDINO	6.452
SAN BERNARDINO COUNTY FLOOD CONTROL DISTRICT	6.452
CITY OF REDLANDS	6.452

Should the cost to complete financing of the Project exceed the total current estimated charges set forth above, the Task Force will have the responsibility of obtaining any required additional funding from each of the Parties. Any such additional funding shall be assessed to those Parties in the above-mentioned proportions, or as otherwise determined by the Task Force.

Note that in the event the City of Highland joins the Task Force as a Regular Member pursuant to the provisions of Section 2 (H) of this Agreement, the contribution levels set forth here will be superseded by the levels set forth in Exhibit "B-1."

EXHIBIT "B-1": TASK FORCE CONTRIBUTION LEVELS IN THE EVENT CITY OF HIGHLAND JOINS AS A REGULAR MEMBER

Allocation to the Parties of their share of the costs associated with the Project is as set forth below in the following proportions:

AGENCY	RESPONSIBILITY FOR FINANCIAL CONTRIBUTION
CEMEX	23.272
ROBERTSON'S READY MIX	23.272
SAN BERNARDINO VALLEY WATER CONSERVATION DISTRICT	23.152
EAST VALLEY WATER DISTRICT	3.030
REDLANDS UTILITIES DEPARTMENT	3.030
COUNTY OF SAN BERNARDINO	6.061
SAN BERNARDINO COUNTY FLOOD CONTROL DISTRICT	6.061
CITY OF HIGHLAND	6.061
CITY OF REDLANDS	6.061

Should the cost to complete financing of the Project exceed the total current estimated charges set forth above, the Task Force will have the responsibility of obtaining any required additional funding from each of the Parties. Any such additional funding shall be assessed to those Parties in the above-mentioned proportions, or as otherwise determined by the Task Force.

This schedule of contribution levels shall only become effective if the City of Highland joins the Task Force as a Regular Member pursuant to the provisions of Section 2 (H) of this Agreement.

EXHIBIT "D": REVISIONS TO AGREEMENT IN THE EVENT CITY OF HIGHLAND JOINS AS A REGULAR MEMBER

In the event the City of Highland joins the Task Force as a Regular Member pursuant to, and in compliance with, the provisions of Section 2 (H) of this agreement, the parties hereto have agreed to certain modifications of the text of the Task Force Agreement, which will serve as amendments thereto, effective immediately and prospectively upon inclusion of the City of Highland as a Regular Member pursuant to Section 2 (H). These amendments are set out below:

Section 1 (A) 3): A Recreation Plan, which coordinates the planning and development of trails, parks, and public recreation areas, which will be provided by Conservation District, San Bernardino County, Highland, and Redlands.

Section 1 (A)(4): An Infrastructure Plan, which describes the location of pipelines, utility corridors, roads, bridges, highways, and communication facilities, which will be provided by the Conservation District, San Bernardino County, Highland, and Redlands.

Section 1 (F): Task Force submit the EIR/EIS, Implementation Action Plan, and Habitat Conservation Plan to the appropriate agencies for their action and, if adopted, subsequent implementation. The EIR/EIS shall not be certified by the Lead Agency as to those portions of the Project occurring within the jurisdictional boundaries of the City of Highland if, prior to the time the Lead Agency certifies the EIR/EIS, it has been disapproved by the City Council of the City of Highland. The EIR/EIS shall not be certified by the Lead Agency as to those portions of the Project occurring within the jurisdictional boundaries of the City of Redlands if, prior to the time the Lead Agency certifies the EIR/EIS, it has been disapproved by the City Council of the City of Redlands.

Section 2 (B)(2): The California Department of Water Resources (DWR), the California Department of Fish and Game (DFG), the United States Fish and Wildlife Service (USFWS), and County of Orange are hereby designated as Advisory members of the Task Force.

Section 4 (B)(1): Revise Section 4 (B)(1). to read as follows:

Serve as the Lead Agency under CEQA and as assistant to BLM, which is the Lead Agency under NEPA, provided, however, that on issues relating to definition of level of significance for impacts, existence of and mitigation for significant adverse environmental impacts, and formulation of a mitigation monitoring program for those portions of the Project requiring permits under SMARA, the Project Manager shall accept and incorporate into the EIR/EIS the collective determinations of the applicable agencies with SMARA permitting authority for such aspects of the Project, and in the absence of any agreement by such agencies, shall refer determination of such issues to the Task Force;

Exhibit "B": Replace with Exhibit "B-1."

EXHIBIT "D": REVISIONS TO AGREEMENT IN THE EVENT CITY OF HIGHLAND JOINS AS A REGULAR MEMBER (CONTINUED)

Exhibit "C": Replace with Exhibit "C-1."

Jack Woodbury
San Bernardino Valley WCD
31919 Florida Street
Mentone, CA 92346

RE: Agreement to Form the Upper Santa Ana River Wash Land Management and Habitat Conservation Plan Task Force

Dear Mr. Woodbury:

As previously announced, all of the required signatures have been obtained for the Task Force Agreement ("Agreement") referenced above. Attached are the signature pages that you should insert in your copy of the Agreement. On page 1 of the Agreement, you should write in "20th day of "November" 2002 as the effective day. In accordance with the Agreement, the San Bernardino Valley Water Conservation District ("District") shall be the Task Force Project Manager.

As a reminder, the Agreement was prepared to accommodate the City of Highland because there was a potential delay in their decision to participate. As we now know, the City of Highland agreed to participate several months ago. Therefore, please annotate the appropriate paragraphs of the Agreement to refer to Exhibit "D," "*Revisions to Agreement in the Event City of Highland Joins as a Regular Member*."

Section 2 of the Agreement identifies the criteria for Regular and Advisory Members of the Task Force, and stipulates that each Regular Member will have two representatives: one to oversee and contribute to the technical/staff aspects and one from the governing body. The names of those representatives should be forwarded to the Project Manager at this time. Advisory Members should also submit representative names to the Project Manager at this time. A list of current Regular and Advisory Members is attached.

On December 20, the former Wash Committee Technical Advisory Committee (TAC) will meet for a Pre-final review of the proposed scope of work prior to the Project Manager issuing a Notice to Proceed to LSA Associates, Inc., who will prepare the environmental documentation for the Concept Plan. Following that review, an invoice will be submitted to each Regular member for its share of the consultant's cost, based

BOARD OF DIRECTORS: Bert Marcum, Jr. · Clare Henry Day · Arnold L. Wright · Sterling Woodbury · Cheryl A. Tubbs · Melody Henriques · Manuel Aranda, Jr.
GENERAL MANAGER: D. Burnell Cavender, AICP

on the distribution of costs shown on Exhibit "B-1": *Task Force Contribution Levels in the Event City of Highland Joins as a Regular Member*, of the Agreement, and attached hereto.

The District is looking forward to starting calendar year 2003 by issuing a Notice to Proceed to prepare the environmental documentation. Please note that the first task in the scope of work is to complete the Project Description. Therefore, please review Section 1 of the Agreement as a reminder of the responsibilities of the Task Force and the Regular Members for preparing the "Component Plans." When the Notice to Proceed is issued, we will not want to delay the consultant by not having Component Plans ready for review. It has already been 6 years since we started developing the Concept Plan. As Project Manager, we will do our best to assure the environmental documentation is prepared within the estimated 18 months.

We thank you for your past and continued perseverance and willingness to work toward a coordinated plan that we all know intuitively is the right thing to do. We look forward to continued good working relations among the Task Force members.

Sincerely,

D. Burnell Cavender, AICP
General Manager

PROPOSED

LAND MANAGEMENT AND HABITAT CONSERVATION PLAN FOR THE UPPER SANTA ANA RIVER WASH

EXECUTIVE SUMMARY

PREPARED FOR THE
SANTA ANA RIVER WASH AREA COORDINATED
PLANNING ACTIVITIES COMMITTEE

BY

STAFF OF THE
SAN BERNARDINO VALLEY WATER CONSERVATION DISTRICT

APRIL 2001
(Figures Revised December 2001)

PROPOSED LAND MANAGEMENT AND HABITAT CONSERVATION PLAN FOR THE UPPER SANTA ANA RIVER WASH

D. Burnell Cavender, AICP
General Manager
San Bernardino Valley Water Conservation District

Introduction

The land area between the mouth of the Santa Ana River Canyon, down stream of the new Seven Oaks Dam on the east, Interstate 215 (I-215) on the west, the cities of Highland and Redlands to the north and south, respectively, is known locally as the Upper Santa Ana River Wash (Wash) (Fig 1). A part of that Wash, containing approximately 5,200 acres, from the canyon mouth to Alabama Street on the west and bounded by the cities, has been the subject of intense planning the past three years. This area is known as the Wash Planning Area or the "WPA" (Fig 2).

Historically, the Wash was a natural flood plain and alluvial fan. In the past, the flood plain has provided a place to convey frequently devastating flood waters and deposit sediment. The alluvial deposit provides excellent geologic conditions to establish settling basins for percolating surface water to the groundwater basin, providing a significant part of the water supply for the local region. These same geologic conditions provide regionally significant deposits of sand and gravel as classified by the California Department of Conservation, that are used to support the local economy. In recent years, the value of the Wash as habitat for a variety of sensitive, threatened, and endangered species has become more apparent due to the decrease in this type of habitat throughout Southern California (Fig 3). Because the Wash is a unique open space and corridor, the County of San Bernardino (County) and the cities of Highland and Redlands are also planning to establish a series of recreational trails in and around the Wash. These important functions within the Wash, flood control, water conservation, mineral extraction, and wildlife habitat, are often in direct competition for much of the same land. It has been apparent since the early 1980s that a land management plan for the future use of the Wash would be needed to maintain other public services (water supply facilities, transportation and utility corridors, and recreation/trails), provide areas for the extraction of valuable construction materials, and preserve declining sensitive habitats.

In 1993, representatives of numerous agencies, including water, mining, flood control, wildlife and municipal interests, formed a Wash Committee to address local mining issues. Subsequently, the role of the Committee was expanded to address all the land functions in the Wash. The Wash Committee began meeting again in 1997 to determine how to use the WPA to accommodate all the important functions identified above. A Policy Action Committee (PAC) was established consisting of elected officials from the County, cities of Highland and Redlands, and the San Bernardino Valley Water Conservation District (District), and the Field Manager from the U.S. Bureau of Land Management (BLM). A Technical Advisory Committee (TAC) was formed with

representatives of the PAC agencies and other water, mining, flood control, and wildlife interests. The District chairs and provides staff support for the Committees.

The TAC, in concept, wiped the WPA clean of land ownership lines (Fig 4) and began anew to decide how the land could best be used. As a result of extensive workshops during 1998 and 1999, a conceptual Coordinated WPA map has been developed. As expected, the way the land might best be used and the way the land use was planned were not the same, nor does it conform to current land ownership. For example, the TAC found that some land proposed for mining was better suited for joint use by water conservation and wildlife habitat while other areas proposed for habitat preservation could be used better for mining. It became apparent that to make a plan work, land ownership would have to change, in particular, a land transfer or exchange between the BLM and the District, and areas leased by the District for mining.

A general consensus of the TAC was reached in early 2000 on the areas within the WPA designated for the specified land uses, which is the basis of the Land Management and Habitat Conservation Plan (Plan) (Fig 5). As stated, the proposed designations for land use crossed land ownership (3 public and 2 private) and land use authority lines (2 cities and the County). The TAC determined that mining expansion is best addressed by consolidating the future mining activity into one large area adjacent to existing mining operations within the western half of the WPA. This focuses extraction activities on lands currently disturbed by mining and lands with the least long-term wildlife habitat value. Furthermore, the TAC determined that portions of the BLM land designated as Areas of Critical Environmental Concern (ACEC) were either previously disturbed or were fragmented by adjacent mining activities, and thus would be better suited for mining expansion. Some of the most intact, viable wildlife habitat areas are contained within lands that are leased for future mining and currently used for water conservation. The TAC concluded that some of these lands were best suited for joint use as water and habitat conservation rather than mining. For example, the up-gradient side of a percolation basin dike could be wetted and periodically contain water for water-dependent species; whereas, the down-gradient side could generally remain undisturbed, except for maintenance and repair of the percolation basin dike and, therefore, could support other wildlife species common to the WPA.

Refinements in land use boundaries were made and agency and jurisdictional coordination was accomplished. The result of this effort is a proposed Plan that designates areas of the WPA for specific uses. The Plan will allow the existing and future Wash activities and land functions to occur and establish habitat preserves.

It is imperative that the principles that will govern the use, management, and conservation of the WPA be set forth in legally binding documents to which all concerned parties can agree. The PAC believes that there are sufficient lands in the WPA that can be divided equitably among the advocates to accommodate the needs for water conservation and supply facilities, aggregate extraction, and flood protection, while providing land for wildlife habitat and recreation.

It is equally important to note that if this coordinated Plan is not implemented, the consequences could be very grave for each of the primary use groups. Without the Plan, attempts to expand water conservation to meet future demands, develop additional aggregate resources, or effectively protect habitat will likely be held up by legal proceedings. Such action could result in

piecemeal planning, thus impairing the ability to reach an effective compromise. If local land use agencies make decisions regarding mining development in the WPA, without considering a coordinated plan, there could be greater environmental degradation and reduced ability to meet future water supply demands. On the other hand, if local officials make land use decisions that significantly restrict water conservation activities and mining, the reduced availability of water and aggregate resources may impact the economic development of the region. The affect of not implementing this Plan is that none of the groups would be able to accomplish its goals.

Proposed Project Description Summary

The proposed project is a Land Management and Habitat Conservation Plan (Plan) for the Upper Santa Ana River Wash Planning Area. The land area addressed in this Plan is part of the overall alluvial fan and flood plain located along the Santa Ana River one mile downstream from the new Seven Oaks Dam between the cities of Highland on the north and Redlands to the south. The City of San Bernardino, to the northwest, is the largest city in the San Bernardino Valley. The WPA covers approximately 5,200 acres and starts at the canyon mouth at Greenspot Road, extends for some six miles to Alabama Street, and is as much as two miles wide.

The Plan will coordinate and accommodate existing ongoing and anticipated future activities planned to occur in the WPA, establish habitat preserve areas, and provide recreational trails. Each function will occupy designated specific areas within the WPA best suited for that function and will also accommodate the other competing uses for the overall benefit of the WPA. These existing and future activities include the following:

- Water conservation of both native and (when necessary) imported water resources for groundwater basin replenishment to augment public water supplies;
- Flood control, and management of the Seven Oaks Dam releases;
- Aggregate extraction and processing;
- Protection and conservation of sensitive and listed native species and habitat;
- Recreation planning including a portion of the Santa Ana River trail system; and
- Utilities, transportation, and water supply corridors and facilities.

The final approved Plan, its associated actions and permits, and environmental review will provide the necessary information for jurisdictional approvals for the described activities to move forward. The Plan, when implemented will be considered a "Win-Win-Win" for all the water, utility and service functions, mineral resource management, and environmental resource preservation.

As staff for the Wash Committee, the District invites your questions and support for this inter-relational concept plan. You may call me at 909-793-2503, or write to me at P.O. Box 1839, Redlands, CA 92373.

Coordinated Operations Agreement

This Coordinated Operations Agreement ("**Agreement**") is entered into and effective this 9 day of September, 2013 (the "**Effective Date**") by and between the San Bernardino Municipal Water Department (the "**Department**") and San Bernardino Valley Municipal Water District ("**Valley District**"). The Department and Valley District are each sometimes referred to herein as a "**Party**" and are collectively referred to as the "**Parties.**"

Recitals

A. The Department owns certain water delivery facilities serving the residents of the City of San Bernardino, including certain groundwater wells, the Encanto pumping station, the 10th Street Pipeline, and the Virginia Street Pipeline, all of which are identified more fully on the map attached hereto as **Exhibit A**, which is incorporated herein by reference ("**Department Facilities**").

B. By agreement dated June 15, 2005, Valley District purchased 61.98% of the capacity in Department's 10th Street Transmission Main and 46.73% of the capacity in Department's Virginia Street Transmission Main.

C. Valley District owns certain water delivery facilities in and through the City of San Bernardino which are identified more fully on the map attached hereto as **Exhibit A**, which is incorporated herein by reference ("**Valley District Facilities**").

D. At Valley District's request, the Department has been operating and making Department deliveries utilizing Valley District's Baseline Feeder Extension South Pipeline.

E. Both the Department and Valley District from time to time have unused capacity in their respective water delivery facilities.

F. The Parties share an interest in using their respective facilities to increase operational flexibility, improve water supply reliability in their respective service areas, encourage the efficient use of capacity within the each Party's water delivery system and provide the public with more reliable water service as efficiently as possible.

G. The Parties wish to enable each other to make use of unused capacity in their respective facilities whenever possible and so wish to provide for the coordinated operation of those facilities.

H. The Parties agree that if either Party uses the other's water delivery facilities to deliver water, that Party using the facilities should be responsible for the increased cost associated with that Party's use.

SBVMWD LEGAL
DOCUMENT 2415

I. The Parties wish to continue the spirit of cooperation they enjoy by memorialing in this Agreement their desire to share their respective water production, transmission and distribution facilities.

Agreements

The Parties agree as follows:

1. *Term.* This Agreement shall have an initial term of twenty-five (25) years from its Effective Date and shall automatically renew for subsequent ten-year terms thereafter unless terminated as provided for in paragraph 2 below.

2. *Termination.* This Agreement may be terminated by either Party: (i) at the end of the initial term or any subsequent term, with or without cause, upon written notice provided at least one year prior to the end of the initial or subsequent term; or (ii) for cause upon 90-days' written notice, *provided* that the Parties have, prior to the notice of termination, attempted to resolve the dispute as provided in paragraph 13.cbelow.

3. *Other Agreements.* This agreement is not intended to modify or change any other agreement the Parties may have together.

4. *Facilities Subject to This Agreement.* This Agreement governs the Parties' coordinated operation and use of the Department Facilities and the Valley District Facilities as described in Exhibit A, respectively. The Parties may amend this Agreement to add additional water delivery facilities owned by either Party upon the written consent of the other Party. Neither Party shall unreasonably delay or deny its consent for the addition of facilities owned by the other Party.

5. *Priority.* Save as may be provided by any other written agreement existing as of the Effective Date of this Agreement, each Party shall have priority for the use of the other Party's facilities, as set forth in Exhibit A, over any non-Party to this Agreement. Nothing in this Agreement, however, shall be construed to create a right by either Party to any specific share of the capacity in the other Party's facilities except for that capacity already purchased in Department's facilities by Valley District.

6. *Coordinated Operations.* This Agreement provides for the Parties' coordinated use of unused capacity within their respective water delivery facilities.

a. *Operation of Department Facilities.* The Department shall operate the Department Facilities to serve Valley District as follows:

(1) When Valley District requests a change to the current flow rate in one or more of the Department Facilities, Valley District shall request that change in writing at least 24 hours in advance, except in case of emergency.

(2) If the Valley District request is for flow through facilities in which Valley District has purchased capacity, Department's staff shall make the operational changes needed to provide the requested flow rate to Valley District for the duration requested.

(3) If the Valley District request is for flow through Department facilities in which Valley District does not own capacity and Department, in its sole discretion, determines that there will be unused and available capacity in that Department Facility, the Department's staff shall make the changes needed to provide the requested flow rate to Valley District for the duration requested.

b. *Operation of Valley District's Baseline Feeder Extension South Pipeline.* The Department shall operate the Baseline Feeder Extension South Pipeline on behalf of Valley District as follows:

(1) If the Department wishes to change the flow rate in the Valley District Facilities to make better use of unused and available capacity, the Department will provide Valley District with at least 24 hours' written notice of such change in flow rate. Valley District may, in its sole discretion, veto such modification of flow rates if Valley District believes that the modification in flow rates would not serve the interests of Valley District or its other customers.

(2) Valley District will coordinate deliveries of water with the Department staff operating the pipeline.

(3) The Baseline Feeder Extension South Pipeline presently conveys potable drinking water for the Department. Department agrees to fulfill all monitoring and other requirements associated with operating a potable water line per all applicable state and federal laws.

c. *Operation of other Valley District Facilities.* Valley District shall operate Valley District Facilities to serve the Department as follows:

(1) If the Department wishes to change the flow rate of a Valley District Facility to make better use of unused and available capacity, the Department will provide Valley District with at least 24 hours' written notice of such a change in flow rate. Valley District may, in its sole discretion, veto such modification of flow rates if Valley District believes that the modification in flow rates would not serve the interests of Valley District or its other customers.

(2) If the Department request is for flow through Valley District facilities, Valley District, in its sole discretion, determines that there will be unused and available capacity in that Valley District Facility, the Valley District

staff shall make the changes needed to provide the requested flow rate to the Department for the duration requested.

7. *Establishment of Joint Operations Committee.* The Parties shall establish and participate in a Joint Operations Committee (the "**JOC**") to serve in an advisory capacity to both Parties regarding their coordinated operation of the Department Facilities and the Valley District Facilities. The JOC shall establish which costs for the Department Facilities and the Valley District Facilities are eligible for reimbursement, and shall perform such other functions as determined by the Parties. The JOC shall meet at least twice a year to review the financial and water accounting needed to implement this Agreement.

8. *Maintenance.* Valley District shall be responsible for performing routine maintenance on Valley District Facilities, and Department shall be responsible for performing routine maintenance on Department Facilities. However, each Party shall be reimbursed for any JOC approved maintenance costs associated with the shared use of the facilities as described in Section 9 below.

9. *Eligible Reimbursement Costs.* Each Party will reimburse the other Party for its use of that Party's facilities as follows:

a. *Valley District Facility Replacement Costs.* Since Valley District's facilities were constructed and paid for entirely by Valley District, Valley District shall pay all replacement costs.

b. *Valley District Baseline Feeder Extension South Pipeline.* The Department will continue to provide and pay for all operations costs associated with the Baseline Feeder Extension South Pipeline provided that the Department is the sole user of this facility. At such time that Valley District and/or its partner Western Municipal Water District begin to operate this facility, the Department shall pay its proportional share of the operations costs as calculated in paragraph c, below.

c. *Valley District Operations Costs.* The Department will reimburse Valley District for **Fixed Costs** and **Variable Costs** associated with the Department's use of the Valley District Facilities, as provided in this paragraph. Department's total reimbursement to Valley District shall be the sum of the Fixed Cost and the Variable Cost in each calendar year.

(1) *Fixed Costs.* **Fixed Costs** shall consist of the sum of: (i) sampling costs, and (ii) permit compliance costs incurred by Valley District in the operation of its Facilities. Department shall pay Valley District a portion of total Fixed Costs for the operation of the Valley District Facilities that is equal to the proportion of the total capacity of the Valley District Facilities which is authorized for Department's use in that calendar year.

(2) *Variable Costs.* **Variable Costs** shall consist of the sum of: (a) energy costs associated with the use of the Valley District Facilities; (b) repair costs; and (c) personnel costs for the use of the Valley District Facilities.

Department shall pay Valley District the portion of the total Variable Costs for the operation of the Valley District Facilities that is equal to the proportion of the total capacity of the Valley District Facilities which is authorized for Department's use in that calendar year.

d. *Department Facilities.* Valley District will reimburse Department for **Fixed Costs** and **Variable Costs** associated with Valley District's use of the Department Facilities, as provided in this paragraph. Valley District's total reimbursement to the Department shall be the sum of the Fixed Cost and the Variable Cost in each calendar year.

(1) *Replacement Costs.* For all of the Department facilities in which Valley District has purchased capacity, Valley District shall pay its proportionate share of any replacement costs.

(2) *Fixed Costs.* **Fixed Costs** shall consist of the sum of: (i) sampling costs, and (ii) permit compliance costs incurred by the Department in the operation of the Department Facilities. Valley District shall pay the Department a portion of total Fixed Costs for the operation of the Department Facilities that is equal to the capacity which Valley District has purchased in Department facilities or its proportionate share, based on the capacity that has been authorized for Valley District use in that calendar year.

(3) *Variable Costs.* **Variable Costs** shall consist of the sum of: (a) energy costs associated with the use of the Department Facilities; (b) repair costs and (c) personnel costs for the use of the Department Facilities. Valley District shall pay the Department a portion of the total Variable Costs for the operation of the Department Facilities that is equal to the proportion of the total flows conveyed through the Department Facilities during a calendar year that were conveyed at the request of Valley District in that year.

e. *Fair Compensation.* For the purposes of Water Code Section 1810, both Parties agree that the payment structure set forth in this paragraph 8 constitutes fair compensation for each Party's use of unused capacity in the other Party's facilities.

10. *Invoices.* Each Party shall invoice the other Party for eligible reimbursement costs, as described in paragraph 8 above, annually in arrears on each March 1. Invoices shall include a full cost accounting, and must indicate, in reasonable detail, the cost of each action undertaken to operate and maintain the facilities in question. Invoices shall include all information reasonably necessary for each Party to confirm the other Party's calculation of reimbursement costs. In the event that either Party objects to any costs identified on an invoice, that Party shall pay the undisputed costs and shall invoke the dispute resolution process set forth in paragraph 13.c below for the objectionable costs.

11. *Payment Schedule.* Within 45 days of the date that an invoice is provided to a Party, the Party shall pay the invoicing Party for any costs that are not subject to an objection.

12. *Indemnification.*

a. *Indemnification by Department.* The Department shall indemnify, defend and hold harmless Valley District, its directors, officers, employees and agents from and against all damages, liabilities, claims, actions, demands, costs and expenses (including, but not limited to, costs of investigations, lawsuits and any other proceedings whether in law or in equity, settlement costs, attorneys' fees and costs), and penalties or violations of any kind, which arise out of, result from, or are related to the implementation of this Agreement by Department.

b. *Indemnification by Valley District.* Valley District shall indemnify, defend and hold harmless Department, its directors, officers, employees and agents from and against all damages, liabilities, claims, actions, demands, costs and expenses (including, but not limited to, costs of investigations, lawsuits and any other proceedings whether in law or in equity, settlement costs, attorneys' fees and costs), and penalties or violations of any kind, which arise out of, result from, or are related to the implementation of this Agreement by Valley District.

c. *Indemnification Procedures.* Any Party that is an indemnified party (the "**Indemnified Party**") that has a claim for indemnification against another Party (the "**Indemnifying Party**") under this Agreement, shall promptly notify the Indemnifying Party in writing, *provided, however,* that no delay on the part of the Indemnified Party in notifying the Indemnifying Party shall relieve the Indemnifying Party from any obligation unless (and then solely to the extent) the Indemnifying Party is prejudiced. Further, the Indemnified Party shall promptly notify the Indemnifying Party of the existence of any claim, demand, or other matter to which the indemnification obligations would apply, and shall give the Indemnifying Party a reasonable opportunity to defend the same at its own expense and with counsel of its own selection, *provided* that the Indemnified Party shall at all times also have the right to fully participate in the disputed matter at its own expense. If the Indemnifying Party, within a reasonable time after notice from the Indemnified Party, fails to defend a claim, demand or other matter to which the indemnification obligations would apply, the Indemnified Party shall have the right, but not the obligation, to undertake the defense of, and to compromise or settle (exercising reasonable business judgment), the claim or other matter, on behalf, or for the account, and at the risk, of the Indemnifying Party. If the claim is one that cannot by its nature be defended solely by the Indemnifying Party, then the Indemnified Party shall make available all information and assistance to the Indemnifying Party that the Indemnifying Party may reasonably request.

13. *Administration of Agreement.*

a. *Recordation of Agreement.* Valley District shall, within ten days of the Effective Date of this Agreement, cause this Agreement to be recorded in the Official Records of the County of San Bernardino. Valley District shall provide the Department with a recorded copy of this Agreement promptly upon the receipt of such copy from the County of San Bernardino.

b. *Books and Records.* Each Party shall have access to and the right to examine any of the other Party's pertinent books, documents, papers or other records (including, without limitation, records contained on electronic media) relating to the performance of that Party's obligations pursuant to this Agreement. The Parties shall each retain all such books, documents, papers or other records to facilitate such review. Access to each Party's books and records shall be during normal business hours only. Nothing in this paragraph shall be construed to operate as a waiver of any applicable privileges.

c. *Disputes.* The Parties recognize that there may be disputes regarding the obligations of the Parties or the interpretation of this Agreement. The Parties agree that they may attempt to resolve disputes as follows:

(1) *Statement Describing Alleged Violation of Agreement.* A Party alleging a violation of this Agreement (the "**Initiating Party**") shall provide a written statement describing all facts that it believes constitute a violation of this Agreement to the Party alleged to have violated the terms of this Agreement (the "**Responding Party**").

(2) *Response to Statement of Alleged Violation.* The Responding Party shall have sixty days from the date of the written statement to prepare a written response to the allegation of a violation of this Agreement and serve that response on the Initiating Party or to cure the alleged violation to the reasonable satisfaction of the Initiating Party. The Initiating Party and the Responding Party shall then meet within thirty days of the date of the response to attempt to resolve the dispute amicably.

(3) *Mediation of Dispute.* If the Initiating Party and the Responding Party cannot resolve the dispute within ninety days of the date of the written response, they shall engage a mediator, experienced in water-related disputes, to attempt to resolve the dispute. Each Party shall ensure that it is represented at the mediation by a Commissioner or Director. These representatives of the Initiating Party and the Responding Party may consult with staff and/or technical consultants during the mediation and such staff and/or technical consultants may be present during the mediation. The costs of the mediator shall be divided evenly between the Initiating Party and the Responding Party.

(4) *Reservation of Rights.* Nothing in this paragraph 13.c shall require a Party to comply with the dispute resolution process contained herein and each Party retains and may exercise at any time all legal and equitable rights

and remedies it may have to enforce the terms of this Agreement; provided, that prior to commencing litigation, a Party shall provide at least five calendar days' written notice of its intent to sue to all Parties.

14. *No Changes to Water Rights.* This Agreement is an agreement for the coordinated use of the Department Facilities and the Valley District Facilities only. Nothing in this Agreement shall validate, invalidate or modify, in any way, any rights to water held or claimed by a Party.

15. *Ownership of Department and Valley District Facilities.* Nothing in this Agreement shall be construed so as to change the ownership of such facilities or to provide one Party with a real property interest in the facilities of the other Party

16. *General Provisions.*

a. *Authority.* Each signatory of this Agreement represents that s/he is authorized to execute this Agreement on behalf of the Party for which s/he signs. Each Party represents that it has legal authority to enter into this Agreement and to perform all obligations under this Agreement.

b. *Amendment.* This Agreement may be amended or modified only by a written instrument executed by each of the Parties to this Agreement.

c. *Jurisdiction and Venue.* This Agreement shall be governed by and construed in accordance with the laws of the State of California, except for its conflicts of law rules. Any suit, action, or proceeding brought under the scope of this Agreement shall be brought and maintained to the extent allowed by law in the County of San Bernardino, California.

d. *Headings.* The paragraph headings used in this Agreement are intended for convenience only and shall not be used in interpreting this Agreement or in determining any of the rights or obligations of the Parties to this Agreement.

e. *Construction and Interpretation.* This Agreement has been arrived at through negotiations and each Party has had a full and fair opportunity to revise the terms of this Agreement. As a result, the normal rule of construction that any ambiguities are to be resolved against the drafting Party shall not apply in the construction or interpretation of this Agreement.

f. *Entire Agreement.* This Agreement constitutes the entire agreement of the Parties with respect to the subject matter of this Agreement and supersedes any prior oral or written agreement, understanding, or representation relating to the subject matter of this Agreement.

g. *Partial Invalidity.* If, after the date of execution of this Agreement, any provision of this Agreement is held to be illegal, invalid, or unenforceable under present or future laws effective during the term of this Agreement, such provision shall be

fully severable. However, in lieu thereof, there shall be added a provision as similar in terms to such illegal, invalid or unenforceable provision as may be possible and be legal, valid and enforceable.

h. *Successors and Assigns.* This Agreement shall be binding on and inure to the benefit of the successors and assigns of the respective Parties to this Agreement. No Party may assign its interests in or obligations under this Agreement without the written consent of the other Parties, which consent shall not be unreasonably withheld or delayed.

i. *Waivers.* Waiver of any breach or default hereunder shall not constitute a continuing waiver or a waiver of any subsequent breach either of the same or of another provision of this Agreement and forbearance to enforce one or more of the remedies provided in this Agreement shall not be deemed to be a waiver of that remedy.

j. *Attorneys' Fees and Costs.* The prevailing Party in any litigation or other action to enforce or interpret this Agreement shall be entitled to reasonable attorneys' fees, expert witnesses' fees, costs of suit, and other and necessary disbursements in addition to any other relief deemed appropriate by a court of competent jurisdiction.

k. *Necessary Actions.* Each Party agrees to execute and deliver additional documents and instruments and to take any additional actions as may be reasonably required to carry out the purposes of this Agreement.

l. *Compliance with Law.* In performing their respective obligations under this Agreement, the Parties shall comply with and conform to all applicable laws, rules, regulations and ordinances.

m. *Third Party Beneficiaries.* This Agreement shall not create any right or interest in any non-Party or in any member of the public as a third party beneficiary.

n. *Counterparts.* This Agreement may be executed in one or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute but one and the same instrument.

o. *Notices.* All notices, requests, demands or other communications required or permitted under this Agreement shall be in writing unless provided otherwise in this Agreement and shall be deemed to have been duly given and received on: (i) the date of service if served personally, by facsimile transmission or by electronic mail on the Party to whom notice is to be given at the address(es) provided below, (ii) on the first day after mailing, if mailed by Federal Express, U.S. Express Mail, or other similar overnight courier service, postage prepaid, and addressed as provided below, or (iii) on the third day after mailing if mailed to the Party to whom notice is to be given by first class mail, registered or certified, postage prepaid, addressed as follows:

D-1: UWMP Compliance Checklist

Order	2025 Guidebook Location	Water Code Section	Summary as Applies to UWMP	Subject	Relevant Submittal Table	2025 UWMP Location
1	Chapter 1	10615	A plan shall describe and evaluate sources of supply, reasonable and practical efficient uses, reclamation and demand management activities.	Introduction and overview	n/a	Section 4.2, 4.4, 4.5, 4.8; Tables 414–420
1	Chapter 1	10630.5	Each plan shall include a simple description of the Supplier's plan including water availability, future requirements, a strategy for meeting needs, and other pertinent information. Additionally, a Supplier may also choose to include a simple description at the beginning of each chapter.	Plan preparation	n/a	Section 4.4, 4.5, 4.6, 4.8
2.1	Section 2.1	10620(b)	Every person that becomes a Supplier shall adopt UWMP within one year after it has become a Supplier.	Plan preparation	n/a	Section 4.9
2.5	Section 2.5	10644	Supplier shall report the Public Water Systems number, volume of delivered water, and number of connections that are included in this UWMP.	Plan preparation	2-1	Table 42, 43, 44
2.5	Section 2.5	10644	Supplier shall report if this UWMP is an individual UWMP and whether the Supplier belongs to a regional UWMP or regional alliance.	Plan preparation	2-2	Part 1 Chapter 1
2.5	Section 2.5	10644	Supplier shall report whether the data is in fiscal or calendar years and the units of measure used for reporting water volumes.	Plan preparation	2-3	Section 4.1
2.4	Section 2.4	10642	Provide supporting documentation that the Supplier has encouraged active involvement of diverse social, cultural, and economic elements of the population within the service area prior to and during the preparation of the plan and contingency plan.	Plan preparation	n/a	Section 4.9
2.4	Section 2.4.2	10620(d)(3)	Coordinate the preparation of its plan with other appropriate agencies in the area, including other Suppliers that share a common source, water management agencies, and relevant public agencies, to the extent practicable.	Plan preparation	n/a	Section 4.9
2.4	Section 2.4.1	10631(h)	Retail Suppliers will include documentation that they have provided their Wholesale Supplier(s)—if any—with water use projections from that source.	Plan preparation	2-4 R	Section 4.2
2.4	Section 2.4.1	10631(h)	Wholesale Suppliers will provide their Suppliers with identification and quantification of the existing and planned sources of water available from the Wholesale Supplier to the Supplier during various water year types.	Plan preparation	2-4 W	Section 4.4, 4.5; Tables 414–420
3	Chapter 3.0	10631(a)	Describe the Supplier service area.	System description	n/a	Section 4.1; Figure 41
3.3	Section 3.3	10631(a)	Describe the climate of the Supplier's service area.	System description	n/a	Section 4.1, 4.2.6
3.4	Section 3.4.1	10631(a)	Provide the current and projected service area populations for 2030, 2035, 2040, 2045 and optionally 2050.	System description	3-1	Section 4.1; Table 41
3.4	Section 3.4.2	10631(a)	Describe other social, economic, and demographic factors affecting the Supplier's water management planning.	System description	n/a	Section 4.2
3.5	Section 3.5	10631(a)	Describe the land uses within the service area… include the current and projected land uses within the existing or anticipated service area affecting the Supplier's water management planning. Describe the land uses within the service area.	System description and baselines	n/a	Section 4.1; Figure 42
4.2	Sections 4.2.3 and 4.2.4	10631(d)(1)	Quantify past, current, and projected water use, identifying the uses among water use sectors.	System water use	4-1 and 4-2	Section 4.2; Table 43,47, 48; Figures 43, 44
4.3	Section 4.3.1	10631(d)(3)(A)	Report the distribution system water loss for each of the five years preceding the plan update.	System water use	4-5	Section 4.2.4 ; Table 44
4.3	Section 4.3.2	10631(d)(3)(C)	Retail Suppliers shall provide data to show the distribution loss standards were met.	System water use	4-6	Section 4.2.4 ; Table 45
4.2	Section 4.2.5.4	10631.1(a)	Include projected water use needed for lower income housing projected in the service area of the Supplier.	System water use	4-3	Section 4.2.6; Table 49
4.2	Section 4.2.5.3	10631(d)(4)(A)	In projected water use, include estimates of water savings from adopted codes, plans, and other policies or laws.	System water use	4-3	Section 4.2.3; Table 46
4.2	Section 4.2.5.3	10631(d)(4)(B)	Provide citations of codes, standards, ordinances, or plans used to make water use projections.	System water use	4-3	Section 4.2.3, 4.8
4.2	Section 4.2.5.3	10631(d)(4)(B)(ii)	To the extent that a Supplier reports the information described in subparagraph (A), an urban water Supplier shall… Indicate the extent that the water use projections consider savings from codes, standards, ordinances, or transportation and land use plans. Water use projections that do not account for these water savings shall be noted of that fact.	System water use	4-3	Section 4.2.3; Table 46
4.2	Section 4.2.5.6	10635(b)	Demands under climate change considerations must be included as part of the drought risk assessment.	System water use	n/a	Section 4.2.6, 4.6
5.1	Section 5.1	10608.36	Wholesale Suppliers shall include an assessment of present and proposed future measures, programs, and policies to help their Retail Suppliers achieve targeted water use reductions.	Baselines and targets	n/a	Section 4.8

Order	2025 Guidebook Location	Water Code Section	Summary as Applies to UWMP	Subject	Relevant Submittal Table	2025 UWMP Location
5.2	Section 5.2	10608.4	Retail Suppliers shall report on their compliance in meeting their water use targets. Reporting requirements will vary depending on whether the Supplier: - Was considered an urban retail water supplier in 2020, - Met its 2020 target in 2020, or - Was part of a merger or consolidation since 2020. Chapter 5 Subsections 5.2.1, 5.2.2, and 5.2.3 address each of these situations.	Baselines and targets	5-1	4.3
6.1	Section 6.1	10631(b)(2)	When multiple sources of water supply are identified, describe the management of each supply in relationship to other identified supplies.	System supplies	n/a	Section 4.4, 4.4.1–4.4.6
6.1	Sections 6.1 and 6.2	10631(b)(1)	Provide a discussion of anticipated supply availability under a normal, single dry year, and a drought lasting five years, as well as more frequent and severe periods of drought, including changes in supply due to climate change.	System supplies	n/a	Section 4.5; Tables 418, 419
6.2	Section 6.2.2	10631(b)(4)(C)	Indicate whether groundwater is an existing or planned source of water available to the Supplier. If groundwater is identified as an existing or planned source of water… (include) a detailed description and analysis of the location, amount and sufficiency of groundwater pumped by the Supplier for the past five years.	Water supplies and recycled water	6-1	Section 4.4; Table 411
6.2	Section 6.2.2	10631(b)(4)(A)	Indicate whether a groundwater sustainability plan or groundwater management plan has been adopted by the Supplier or if there is any other specific authorization for groundwater management. Include a copy of the plan or authorization.	System supplies	n/a	Section 4.5
6.2	Section 6.2.2	10631(b)(4)(B)	Describe the groundwater basin.	System supplies	n/a	Section 4.4
6.2	Section 6.2.2	10631(b)(4)(B)	Indicate if the basin has been adjudicated and include a copy of the court order or decree and a description of the amount of water the Supplier has the legal right to pump.	System supplies	n/a	Section 4.5
6.2	Section 6.2.2	10631(b)(4)(B)	For unadjudicated basins… (include) information as to whether DWR has identified the basin as a high- or medium-priority basin in the most current official departmental bulletin…	Water supplies and recycled water	n/a	Sections 4.4, 4.5
6.2	Section 6.2.2	10631(b)(4)(B)	For unadjudicated basins… describe efforts by the Supplier to coordinate with sustainability or groundwater agencies to achieve sustainable groundwater conditions.	Water supplies and recycled water	n/a	Section 4.5
6.2	Section 6.2.2.	10631(b)(4)(C)	If groundwater is identified as an existing or planned source of water… (include) a detailed description and analysis of the location, amount and sufficiency of groundwater pumped by the Supplier for the past five years.	System supplies	n/a	Section 4.4; Table 411
6.2	Section 6.2.2	10631(b)(4)(D)	Provide a detailed description and analysis of the amount and location of groundwater that is projected to be pumped.	System supplies	6-9	Section 4.4.6; Table 415
6.1	Section 6.1	10631(b)	Identify and quantify the existing and planned sources of water available for 2025, 2030, 2035, 2040, 2045 and optionally 2050.	System supplies	6-8 and 6-9	Section 4.4 ; Table 414, 415
6.2	Section 6.2.7	10631(c)	Describe the opportunities for exchanges or transfers of water on a short-term or long-term basis.	System supplies	n/a	Section 4.4, 4.4.7
6.2	Section 6.2.5	10633(a)	Describe the wastewater collection and treatment systems in the Supplier's service area with quantified amount of collection and treatment and the disposal methods.	System supplies (recycled water)	6-2	Section 4.4; Table 412, 413
6.2	Section 6.2.5	10633(b)	Describe the quantity of treated wastewater that meets recycled water standards, is being discharged, and is otherwise available for use in a recycled water project.	System supplies (recycled water)	6-3	Section 4.4; Table 413
6.2	Section 6.2.5	10633(c)	Describe the recycled water currently being used in the Supplier's service area.	System supplies (recycled water)	6-4	Sections 4.2, 4.4; Table 43
6.2	Section 6.2.5	10633(d)	Describe and quantify the potential uses of recycled water and provide a determination of the technical and economic feasibility of those uses.	System supplies (recycled water)	6-4	Section 4.4
6.2	Section 6.2.5	10633(e)	Describe the projected use of recycled water within the Supplier's service area at the end of 5, 10, 15, and 20 years, and describe the actual use of recycled water in comparison to uses previously projected.	System supplies (recycled water)	6-4 and 6-5	Table 47, 48
6.2	Section 6.2.5	10633(f)	Describe the actions that may be taken to encourage the use of recycled water and the projected results of these actions in terms of acre-feet of recycled water used per year.	System supplies (recycled water)	6-6	Section 4.4; Table 415, Table 47
6.2	Section 6.2.5	10633(g)	Provide a plan for optimizing the use of recycled water in the Supplier's service area.	System supplies (recycled water)	n/a	Section 4.4
6.2	Section 6.2.6	10631(g)	Describe desalinated water project opportunities for long-term supply.	System supplies	6-7	Part 1 3.8.2
6.2	Section 6.2.10	10631(f)	Describe the expected future water supply projects and programs that may be undertaken by the water Supplier to address water supply reliability in average, single-dry, and for a period of drought lasting five consecutive water years.	System supplies	6-7	Section 4.4, 4.5; Tables 418–420
6.3	Section 6.3 and Appendix O	10631.2(a)	The UWMP must include energy information, as stated in the code, that a Supplier can readily obtain.	System suppliers, energy intensity	O-1A, O-1B, O-1C, and O-2	4.4.9
7.1	Section 7.1	10634	Provide information on the quality of existing sources of water available to the Supplier and the manner in which water quality affects water management strategies and supply reliability.	Water supply reliability assessment	n/a	Section 4.4.6, 4.5

Order	2025 Guidebook Location	Water Code Section	Summary as Applies to UWMP	Subject	Relevant Submittal Table	2025 UWMP Location
7.2	Section 7.2	10635(a)	Service Reliability Assessment: Assess the water supply reliability during normal, dry, and a drought lasting five consecutive water years by comparing the total water supply sources available to the Supplier with the total projected water use over the next 20 years.	Water supply reliability assessment	7-2, 7-3, and 7-4	Section 4.5; Table 416, 419, 420
7.2	Section 7.2.3	10620(f)	Describe water management tools and options to maximize resources and minimize the need to import water from other regions.	Water supply reliability assessment	n/a	Section 4.4, 4.5, 4.8
7.3	Section 7.3	10635(b)	Provide a drought risk assessment as part of information considered in developing the demand management measures and water supply projects.	Water supply reliability assessment	n/a	Section 4.6, 4.8
7.3	Section 7.3	10635(b)(1)	Include a description of the data, methodology, and basis for one or more supply shortage conditions that are necessary to conduct a drought risk assessment for a drought period that lasts five consecutive years.	Water supply reliability assessment	n/a	4.5
7.3	Section 7.3	10635(b)(2)	Include a determination of the reliability of each source of supply under a variety of water shortage conditions.	Water supply reliability assessment	n/a	4.5
7.3	Section 7.3	10635(b)(3)	Include a comparison of the total water supply sources available to the Supplier with the total projected water use for the drought period.	Water supply reliability assessment	7-5	4.6
7.3	Section 7.3	10635(b)(4)	Include considerations of the historical drought hydrology, plausible changes on projected supplies and demands under climate change conditions, anticipated regulatory changes, and other locally applicable criteria.	Water supply reliability assessment	n/a	Part 1 – 2.5.2; Part 1 – 3.1.2; Part 1 – 5
8	Chapter 8	10632(a)	Provide a water shortage contingency plan (WSCP) with specified elements below.	Water shortage contingency planning	n/a	Appendix D-6
8	Chapter 8	10632(a)(1)	Provide an analysis of water supply reliability (from Guidebook Chapter 7) in the WSCP.	Water shortage contingency planning	n/a	Appendix D-6
8.2	Section 8.2	10632(a)(2)(A)	Provide the written decision-making process and other methods that the Supplier will use each year to determine its water reliability.	Water shortage contingency planning	n/a	Appendix D-6
8.2	Section 8.2	10632(a)(2)(B)	Provide data and methodology to evaluate the Supplier's water reliability for the current year and one dry year pursuant to factors in the code.	Water shortage contingency planning	n/a	Appendix D-6
8.3	Section 8.3	10632(a)(3)(A)	Define six standard water shortage levels of 10%, 20%, 30%, 40%, 50% shortage, and greater than 50% shortage. These levels shall be based on supply conditions, including percent reductions in supply, changes in groundwater levels, changes in surface elevation, or other conditions. The shortage levels shall also apply to a catastrophic interruption of supply.	Water shortage contingency planning	n/a	Appendix D-6
8.3	Section 8.3	10632(a)(3)(B)	Suppliers with an existing WSCP that uses different water shortage levels must cross reference their categories with the six standard categories.	Water shortage contingency planning	8-1	Appendix D-6
8.4	Section 8.4	10632(a)(4)(A)	Suppliers with WSCPs that align with the defined shortage levels must specify locally appropriate supply augmentation actions.	Water shortage contingency planning	8-2	Appendix D-6
8.4	Section 8.4	10632(a)(4)(B)	Specify locally appropriate demand reduction actions to adequately respond to shortages.	Water shortage contingency planning	8-3	Appendix D-6
8.4	Section 8.4	10632(a)(4)(C)	Specify locally appropriate operational changes.	Water shortage contingency planning	8-2	Appendix D-6
8.4	Section 8.4	10632(a)(4)(D)	Specify additional mandatory prohibitions against specific water use practices that are in addition to State-mandated prohibitions are appropriate to local conditions.	Water shortage contingency planning	Table 8-3	Appendix D-6
8.4	Section 8.4	10632(a)(4)(E)	Estimate the extent to which the gap between supplies and demand will be reduced by implementation of the action.	Water shortage contingency planning	8-2 and 8-3	Appendix D-6
8.4	Section 8.4.6	10632.5	The UWMP shall include a seismic risk assessment and mitigation plan.	Water shortage contingency plan	n/a	Appendix D-6
8.5	Section 8.5	10632(a)(5)(A)	Suppliers must describe that they will inform customers, the public and others regarding any current or predicted water shortages.	Water shortage contingency planning	n/a	Appendix D-6
8.5	Section 8.5	10632(a)(5)(B), 10632(a)(5)(C)	Suppliers must describe that they will inform customers, the public and others regarding any shortage response actions triggered or anticipated to be triggered and other relevant communications.	Water shortage contingency planning	n/a	Appendix D-6
8.6	Section 8.6	10632(a)(6)	Retail Supplier must describe how it will ensure compliance with and enforce provisions of the WSCP.	Water shortage contingency planning	n/a	Appendix D-6
8.7	Section 8.7	10632(a)(7)(A)	Describe the legal authority that empowers the Supplier to enforce shortage response actions.	Water shortage contingency planning	n/a	Appendix D-6
8.7	Section 8.7	10632(a)(7)(B)	Provide a statement that the Supplier will declare a water shortage emergency per Water Code Chapter 3. *Water Shortage Emergencies* .	Water shortage contingency planning	n/a	Appendix D-6
8.7	Section 8.7	10632(a)(7)(C)	Provide a statement that the Supplier will coordinate with any city or county within which it provides water for the possible proclamation of a local emergency.	Water shortage contingency planning	n/a	Appendix D-6
8.8	Section 8.8	10632(a)(8)(A)	Describe the potential revenue reductions and expense increases associated with activated shortage response actions.	Water shortage contingency planning	n/a	Appendix D-6

MUTUAL AID STANDBY WATER AGREEMENT BETWEEN THE CITY OF REDLANDS AND THE CITY OF LOMA LINDA

This Agreement is made and entered this 15th day of September, 1987, by and between the CITY OF REDLANDS, a Municipal Corporation, hereinafter referred to as "Redlands," and the CITY OF LOMA LINDA, a Municipal Corporation, hereinafter referred to as "Loma Linda."

RECITALS

WHEREAS, it is to the mutual advantage and in the best interests of Redlands and Loma Linda, both operating water utilities, so far as their mains, service requirements to existing customers, supply, and situations permit, to have a mutual aid standby water agreement whereby in case of emergencies, either can avail itself of the emergency water standby service of the other for the benefit of their respective consumers; and

WHEREAS, Redlands and Loma Linda desire to enter into such a mutual aid standby water agreement to serve one another during emergencies on the terms and conditions hereinafter set forth;

NOW, THEREFORE, it is agreed by and between the Cities of Redlands and Loma Linda as follows:

AGREEMENT

1. Emergency. An emergency shall mean any unforeseen circumstance or combination of circumstances such as the inability to pump due to loss of power, broken water mains, a major fire, earthquake or such other occurrence which results in the inability of either Redlands or Loma Linda to provide water service to a portion of their respective water systems.

2. Obligations of Redlands.

A. Redlands shall maintain in good working order and operational condition, an existing eight (8) inch standby water service located on the west side of Mt. View Avenue, north of Redlands Boulevard for temporary use by Loma Linda during emergencies which arise in the Loma Linda water system. Such emergency service shall be provided by Redlands to Loma Linda to the extent that Redlands' water mains, pressure, and existing services will permit, with due regard to the rights of the water consumers of Redlands first being met.

B. The existing Redlands eight (8) inch standby water service connection and the double check valve backflow prevention assembly now in service near the intersection of Redlands Boulevard and Mt. View Avenue shall remain in the system of Redlands for use by Loma Linda for standby emergency water service as long as such connection and assembly are useful and necessary to the Redlands water

system. Said connection was installed by Redlands and shall remain the property of Redlands.

3. Obligations of Loma Linda

A. Loma Linda shall furnish and maintain in good working order and operational condition, a six (6) inch standby water service to Redlands for temporary use by Redlands during emergencies which arise in the Redlands' water system. Such emergency service shall be provided by Loma Linda to Redlands to the extent that Loma Linda water mains, pressure, and existing services will permit, with due regard to the rights of the water consumers of Loma Linda first being met.

B. This six (6) inch standby water service with meter and backflow prevention assembly shall be installed by Loma Linda at the Redlands connection near the intersection of Redlands Boulevard and Mt. View Avenue. Prior to determining the exact location of this service connection, the City of Loma Linda will consult with the City of Redlands and receive its input. The six (6) inch meter, double check valve backflow preventor and valves shall be furnished, installed, and maintained in good working order and operational condition by and at the expense of Loma Linda. The six (6) inch piping and connection to Loma Linda's present system and the six (6) inch meter, double check backflow preventor and gate valves shall remain the property of Loma Linda.

4. Payment for Emergency Water Service. Each City shall pay the other for emergency water which it

receives at the time of receipt of such water and at the rate equal to the other City's production cost.

5. Requests for Service. Each City shall provide to the other the name, address, telephone numbers and title of each person authorized to respond to a request for emergency water service under this Agreement. Detailed procedures shall be determined by each City's water utility department regarding requests and responses, maximum and minimum delivery pressures, maximum flow rates, water quality at time of delivery, notifications and any other operational considerations affecting this Agreement.

6. At such time as the six (6) inch emergency standby by-pass contemplated in Section 3 for Redlands is in service, Loma Linda shall cease paying Redlands the bi-monthly rate for the existing standby water service. Redlands shall not be obligated to pay any standby charges to Loma Linda.

7. Interest in Water Systems. No claim, right, title or interest in water supplied under this Agreement, other than the contractual interest established in this Agreement, shall be acquired by either City in the other's water or water system.

8. Indemnification. Redlands shall defend, indemnify and hold harmless Loma Linda, its elected officials and employees, from and against all claims, liens, encumbrances, actions, loss, damages, causes of action,

expense and liability, including court costs and attorneys' fees arising out of or resulting from the negligent acts or omissions of Redlands, its elected officials and employees in the performance of this agreement. Loma Linda shall defend, indemnify and hold harmless Redlands, its elected officials and employees, from and against all claims, liens, encumbrances, actions, loss, damages, causes of action, expense and liability, including court costs and attorneys' fees, arising out of or resulting from the negligent acts or omissions of Loma Linda, its elected officials and employees in the performance of this agreement.

9. Successors and Assigns/Termination. This agreement shall be binding upon the successors and assigns of the parties hereto and shall remain in effect indefinitely; provided, however, either party may terminate this agreement by providing the other party with six (6) months' prior written notice of such party's intention to terminate this agreement.

10. Termination of Prior Agreements. The agreement dated June 9, 1975 between Redlands and Loma Linda relating to water service shall terminate upon execution of this Agreement.

11. Assignment. This Agreement shall not be assigned, conveyed or hypothecated without the mutual consent of the parties hereto.

12. Attorney's Fees. In the event any legal

action is commenced to enforce or interpret the terms or conditions of this Agreement the prevailing party shall, in addition to any costs and other relief, be entitled to recover its reasonable attorney's fees.

IN WITNESS WHEREOF, the parties hereto have caused their corporate names to be subscribed hereto by their officers, upon authorization of their respective City Councils, and have caused their corporate seals to be affixed this 16th day of September, 1987.

AGREEMENT BETWEEN
THE CITY OF REDLANDS AND WESTERN HEIGHTS WATER COMPANY FOR POTABLE WATER SYSTEM INTERCONNECTION

This AGREEMENT is made and entered into this 18th day of April, 2017, by and between the City of Redlands (hereinafter referred to as REDLANDS) and the Western Heights Water Company (hereinafter referred to as COMPANY), sometimes individually referred to as a PARTY and, collectively referred to as the PARTIES.

1. PURPOSE

a. The Parties have determined that an interconnection between potable water systems (the "Interconnection") would be of mutual benefit and improve system reliability during an emergency situation. This agreement sets forth the term for the construction and operation of such an Interconnection. This agreement does not provide for sustained use of the Interconnection as a source of supply outside of an emergency situation, without written approval for such sustained use from the State Water Resources Control Board.

2. DESIGN AND CONSTRUCTION

a. Project design plans have been supplied by REDLANDS at no cost to COMPANY.

b. COMPANY shall construct the Interconnection in accordance with the REDLANDS design shown in Exhibit "A." COMPANY shall invoice REDLANDS monthly for the cost of construction of those portions of the project attributed to REDLANDS as delineated in Exhibit "B." REDLANDS shall reimburse COMPANY within 30 days of receiving and approving COMPANY invoice.

c. If necessary, the Parties shall share the cost of additional design and construction of the Interconnection based on the needs of each Party, and based on the Party receiving the addition as delineated in Exhibit "B".

3. OWNERSHIP OF FACILITIES

a. Each Party shall own, operate, and maintain the pipelines and related improvements located on its side of the Interconnection.

4. TERMS OF USE

a. Availability of Water

i. Each Party will provide water to the other Party through the Interconnection during nonrecurring events and emergencies and when hydraulic conditions permit the other Party to receive water. There is no guarantee of any particular flow under any circumstance, however if delivery capacity is available, each Party will make its best efforts to provide water to the other Party and when requested to do so. At the discretion of the delivering Party, water delivered through the Interconnection may be stopped at any time, even during an emergency event, when

continued delivery would jeopardize the delivering Party's systems, water supply, or ability to meet the demands of the delivering Party's customers.

ii. To accommodate emergencies situations, which may occur without warning, all valves on both sides of the Interconnection shall be set to allow water to flow to either Party automatically during conditions when water pressure drops to levels substantially below normal. Once the party experiencing the emergency becomes aware of the use of the Interconnection they will immediately notify the supplying Party of the estimated flow and duration of the emergency. The receiving Party shall keep the delivering Party aware of changes to conditions.

iii. Where outages are known beforehand, the Party requesting water will do so in writing (e-mail is acceptable) to a Party designated employee of the providing Party. The written request shall include the requested flow rate, desired start time, and estimated duration of the delivery. The providing Party will confirm in writing (e-mail is acceptable) delivered to the requesting Party the estimated availability of the requested flow.

b. Costs and Metering

i. REDLANDS is an existing customer of COMPANY and water received by REDLANDS through the Interconnection shall be billed to the existing Oakmont Park account at COMPANY's then current regular rates. Water received by COMPANY shall be billed at REDLANDS then current regular rate. It shall be the responsibility of each Party to monitor their respective water meters and bill the receiving party within sixty (60) days of any water transfer. Bills shall be paid by the receiving Party within 30 days of receipt of bill.

ii. Each Party shall calibrate and test all metering components a minimum of once annually, providing a copy of the associated test and calibration report to the other Party, to confirm accuracy of plus or minus two percent (±2.0%). If the calibration discloses an error exceeding plus or minus two percent (±2.0%), an adjustment shall be made in metered charges, covering the known or estimated amount up to a six month period. Each Party shall be authorized to independently test the other Party's meter for verification purposes upon request, said testing shall be at the requesting Party's expense.

c. No Liability. Neither Party shall be responsible or liable to the other Party, or to any other person or entity, for any loss, liability, damage, claim, or other consequences resulting from any failure to provide water pursuant to this Agreement or any interruption or suspension of water delivery to the other Party pursuant to this Agreement.

d. No Warranty. Subject to each Party's obligation to comply with applicable law as provided herein, neither Party represents nor warrants the quality, quantity, or flow rate of any water available at any time through the Interconnection. The requesting Party shall be responsible for verifying, to its satisfaction, the quality of water entering its system and ensuring that the integration of such water with its system does not cause any water quality issues. If either Party becomes aware that the water provided by such Party fails to comply with the State Water Resources Control Board Division of Drinking Water potable water regulations and requirements, it shall immediately notify the other Party.

e. Compliance with Laws. Each Party is responsible for obtaining and maintaining all required permits and complying with all applicable laws, rules, and regulations relating to the construction, maintenance, repair, ownership, operation, and maintenance of the Interconnection facilities for which that Party is responsible as set forth in this Agreement.

f. Protection of Facilities. If any occurrence or condition during operation, maintenance, or repair of the Interconnection threatens, in the reasonable judgment of a Party (the "Affected Party"), the integrity or operational capacity of the Affected Party's facilities, the Affected Party may suspend operation, maintenance, or repair of the Interconnection or take such other action as the Affected Party deems reasonably necessary to protect its facilities.

g. Notice. The Affected Party shall give as much notice as reasonably possible to the other Party of the action taken or proposed to be taken.

h. Indemnity. Each PARTY shall defend, indemnify and hold harmless the other PARTY from and against any claim of liability, damages, costs or loss, including costs and attorneys' fees, from personal injury or death to persons, or property damage (collectively "Claims") resulting from or arising out of the negligence or willful misconduct of the indemnifying PARTY, or its elected officials, employees, contractors or agents, except to the extent such Claims may be caused by or result from the negligence or willful misconduct of the other PARTY, or its elected officials, employees, contractors or agents. Further, COMPANY shall require its contractors to defend, indemnify and hold harmless REDLANDS and its elected officials, employees and agents from and against any and all claims, losses or liability, including costs and attorneys' fees, arising from injury or death to persons or damage to property occasioned by or resulting from any negligent act, omission or failure to act, or willful misconduct by any contractor or its officers, employees and agents in constructing the Interconnection. Notwithstanding the foregoing, this obligation to indemnify shall not apply to any loss, liability, damage, claim, or other consequences resulting from any failure to provide water pursuant to this Agreement or any interruption or suspension of water delivery to the other Party pursuant to this Agreement as provided in Section 4.3, above.

5. NOTIFICATION

a. Any notice, demand, or request to be given under or pursuant to this Agreement shall be given in writing at the physical addresses set forth below by personal service; overnight courier; or registered or certified, first class mail, return receipt requested:

If to REDLANDS: Chris Diggs, Municipal Utilities & Engineering Director, 35 Cajon Street, Suite 15A, Redlands, CA 92373.

If to COMPANY:

E-mail is also an acceptable means of notification, if provided to the current e-mail address of the appropriate manager. Each Party is responsible for keeping the other Party apprised of any change to such Party's contact information.

6. TERM AND TERMINATION

a. This Agreement shall commence on the date first above written and shall continue unless and until terminated as follows:

i. Seven days after written notice is provided to either Party.

ii. Either Party may terminate this Agreement for cause if the other Party defaults on any material obligation under this Agreement and such default continues for a period of thirty (30) days after written notice of such default is delivered.

b. Upon termination of this Agreement, all amounts due and owing by either Party to the other shall be paid in full within thirty (30) days of the termination date, and all other rights and obligations of the Parties shall terminate, except that each Party shall retain ownership and responsibility for its own improvements as provided in this Agreement. Upon termination, the intertie shall be closed.

IN WITNESS WHEREOF, the Parties have executed this Agreement by their duly authorized representatives as of the Effective Date.

DANIEL J. McHUGH
City Attorney

Date: 4/19/17

APPROVED AS TO FORM AND PROCEDURE:

By: _____
NAME Manuel D. Serpa
Title Counsel for Western Heights Water Company

Date: 4/21/17

ATTEST: _____
Jeanne Donaldson, City Clerk

D-5: DWR Tables

Submittal Table 2-1 Retail: Public Water Systems			
Public Water System Number	Public Water System Name	Number of Municipal Connections 2025	Volume of Water Supplied 2025 (AF)
Add additional rows as needed			
CA3610037	City	23,506	25,934
	Total	23,506	25,934
DWR NOTES: **Units of measure (AF, CCF, MG)** must remain consistent throughout the UWMP as reported in Submittal Table 2-3. This table identifies the unit of measure selected in Submittal Table 2-3.			
NOTES:			

Submittal Table 2-2: Plan Identification		
Select One	**Type of Plan**	**Name of Regional Alliance or RUWMP** (Drop Down List)
☐	**Individual UWMP**	
	If Water Supplier is also a member of a SB X7-7 Regional Alliance, select name from the drop-down.	
☑	**Regional Urban Water Management Plan (RUWMP)**	
	If Supplier selected RUWMP, select name from the drop-down.	**San Bernardino Valley Municipal Water District**
NOTES:		

Submittal Table 2-3: Supplier Identification	
Type of Supplier (select one or both)	
☐	Supplier is a wholesale supplier
☑	Supplier is a retail supplier
Fiscal or Calendar Year (select one)	
☑	UWMP Tables are in calendar years
☐	UWMP Tables are in fiscal years
If using fiscal years provide month and date that the fiscal year begins (mm/dd)	
Units of measure used in UWMP (Select from the drop down list).	
Unit	AF
DWR NOTES: **Units of measure (AF, CCF, MG)** must remain consistent throughout the UWMP as reported in Submittal Table 2-3.	
NOTES:	

Submittal Table 2-4 Retail: Water Supplier Information Exchange **Water Code Section 10631(h)**
The retail Supplier has informed the following wholesale supplier(s) of projected water use.
Wholesale Water Supplier Name
Add additional rows as needed
San Bernardino Valley Municipal Water District
NOTES:

10631(h) An urban water supplier that relies upon a wholesale agency for a source of water shall provide the wholesale agency with water use projections from that agency for that source of water in five-year increments to 20 years or as far as data is available.

Submittal Table 3-1 Retail: Population - Current and Projected Water Code Section 10631(a)						
Population Served	2025	2030	2035	2040	2045	2050(opt)
	84,183	88,516	92,297	94,910	97,597	100,361
NOTES:						

CWC 10631(a) describe the current and projected population of the service area including current and projected population…

Submittal Table 4-1 Retail: Total Uses for Potable and Non-Potable Water — Actual
Water Code Section 10631(d)(1)

Use Type	Additional Description (as needed)	2025 Actual Water Use	
Drop down list May select each use multiple times These are the only use types that will be recognized by the WUEdata online submittal tool		**Potable or Non-Potable** (OPTIONAL) Drop down list	Volume (AF)
Add additional rows as needed			
Single Family		Potable	12,467
Multi-Family		Potable	2,887
Commercial		Potable	3,040
Landscape		Potable	2,353
Agricultural		Potable	476
Other (optional)		Potable	212
Commercial		Non-Potable	209
Landscape		Non-Potable	1,383
Agricultural		Non-Potable	0
Distribution System Water Loss		Potable	1,202
Other (optional)	Recycled Water	Non-Potable	1,705
		Subtotal Potable	22637
		Subtotal Non-Potable	3297
		Total	25,934

DWR NOTES: Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Submittal Table 2-3. This table identifies the unit of measure selected in Submittal Table 2-3.

NOTES:

Submittal Table 4-2 Retail: Total Uses for Potable, and Non-Potable Water — Projected
Water Code Section 10631(d)(1)

Use Type		Projected Water Use (Report To the Extent that Records are Available)					
Drop down list May select each use multiple times These are the only Use Types that will be recognized by the WUEdata online submittal tool	Additional Description (as needed)	**Potable or Non-Potable** (OPTIONAL) Drop down list	**2030 (AF)**	**2035 (AF)**	**2040 (AF)**	**2045 (AF)**	**2050 opt (AF)**
Add additional rows as needed.							
Single Family		Potable	12,806	13,285	13,642	13,999	14,356
Multi-Family		Potable	3,435	3,564	3,659	3,755	3,851
Commercial		Potable	3,447	3,588	3,683	3,782	3,879
Landscape		Potable	2,300	2,386	2,445	2,503	2,563
Agricultural		Potable	360	360	360	360	360
Other (optional)		Potable	175	175	175	175	175
Commercial		Non-Potable	180	180	180	180	180
Landscape		Non-Potable	820	820	820	820	820
Distribution System Water Loss		Potable	1,941	2,015	2,072	2,128	2,184
Other (optional)	Recycled Water	Non-Potable	3,357	3,510	3,642	3,773	3,905
		Subtotal Potable	24,464	25,373	26,036	26,702	27,368
		Subtotal Non-Potable	4,357	4,510	4,642	4,773	4,905
		Total	28,821	29,883	30,678	31,475	32,273

DWR NOTES: Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Submittal Table 2-3. This table identifies the unit of measure selected in Submittal Table 2-3.

NOTES:

CWC 10631(d)(1) For an urban retail water supplier, quantify, to the extent records are available... projected water use…identifying the uses among water use sectors…

Submittal Table 4-3 Retail: Inclusion in Water Use Projections Water Code Section 10631 (a), 10631 (d)(4)(A), and 10631 (d)(4)(B)	
Are Future Water Savings Included in Projections? **Drop down list (y/n)**	Yes
If "Yes" to above, **state the section or page number**, in the cell to the right, where citations of the codes, ordinances, or otherwise are utilized in demand projections are found. ***Optional*** Suppliers may complete Optional Submittal Table 4-4 R to quantify the expected savings.	Section 4.2.3
Are Lower Income Residential Demands Included In Projections? **Drop down list (y/n)**	Yes
Optional If the method for accounting Lower Income Residential Demands has been included, provide page number where this accounting can be found.	
DWR NOTES: Additional guidance is provided in Appendix K.	
NOTES:	

CWC10631 (d) (4) (A) Water use projections, where available, shall display and account for water savings estimated to result from adopted codes, standards, ordinances, or transpotation and land use plans identified by the urban water supplier, as applicable to the service area.

CWC 10631 (d) (4) (B) to the extent that an urban water supplier reports the information described in subparagraph (A), an urban water supplier shall do both of the following: (i) Provide citations of the various codes, standards, ordinances or transportation and land use plans utilized in making the projections.
(ii) Indicate the extent that the water use projections consider savings from codes, standards, ordinances, or transportation and land use plans. Water use projections that do not account for these water savings shall be noted of that fact.
CWC 10631(a) Water use projections required by section 10631 shall include projected water use for single-family and multifamily residential housing needed for lower income households, as identified in the housing element of any city, county, or city and county, in the service area of the supplier .

Submittal Table 4-5 Retail: Water Loss Audit Reporting Water Code Section 10631(d)(3)(A)		
Public Water System ID # Reported in Table 2-1 R	Reporting Period	Submitted to DWR Water Loss Audit Program (yes/no)
Report submittal status for all five years for each Public Water System as available. Add rows as needed		
CA3610037	**2020**	Yes
	2021	Yes
	2022	Yes
	2023	Yes
	2024	Yes
DWR NOTES: Suppliers will provide a link to the WUEdata submittals of their Water Loss Audit Reports.		
NOTES:		

CWC 10631(d)(3) (A) The distribution system water loss shall be quantified for each of the five years preceding the plan update, in accordance with rules adopted pursuant to Section 10608.34.

Submittal Table 4-6 Retail: Progress Towards 2028 Water Loss Standard
Water Code Section 10631(d)(3)(C)

Public Water System ID # Reported in Submittal Table 2-1 R	Did the Water Board Calculate a Water Loss Standard for this Public Water System? (y/n) If no, Supplier will not complete this row.	Real Water Loss					Apparent Water Loss				
		State Water Board Standard		Most Recent AWWA Water Loss Audit			State Water Board Standard		Most Recent AWWA Water Loss Audi		
		2028 Real Water Loss Standard per Unit per day	Units for Real Water Loss Drop down list	Number of Units (Connections or Miles corresponding with units selected)	Volume of Total Real Loss (from AWWA Water Loss Audit) (AF)	Real Water Loss Per Unit per Day	2028 Apparent Water Loss Standard per Unit per Day	Units for Apparent Water Loss	Number of Connections	Volume of Total Apparent Loss (from AWWA Water Loss Audit) (AF)	Apparent Water Loss Per Unit per Day
Add additional rows as needed.											
CA3610037	Yes	24.8	Gallons per Service Connection per Day (GPSCD)	22859	618	24.1	29.6	Gallons per Service Connection per Day (GPSCD)	22859	328	12.8

Water Board's Calculated Water Loss Standards

DWR NOTES: Units of measure (AF, CCF, MG) for Water Loss **MUST** remain consistent with units reported in Submittal Table 2-3. The units reported in Submittal Table 2-3 are used in this table's calculations.

NOTES:

Submittal Table 5-1 Retail: SB X7-7 2020 Target Progress Water Code Section 10608.40						
☐	Check the box if the Supplier was not an Urban Water Supplier during or before the 2020 UWMP reporting cycle. Proceed to the next table.					
Was Supplier part of a merger or consolidation since 2020?	Regional Alliance Target or Individual Target? Drop down list	2020 Target	Actual 2020 GPCD	Did Supplier Achieve Targeted Reduction for 2020?	Only for suppliers that did not meet the Target in 2020 See DWR NOTES below.	
					Actual 2025 GPCD (From SB X7-7 Compliance Form)	Did Supplier meet the 2020 Target in 2025?
No	Individual Target	285	279	Yes		NA
DWR NOTES: **Suppliers calculating a 2025 GPCD** will need to complete and submit SB X 7-7 Compliance Tables to verify the use of SB X7-7 Methodologies. **Suppliers that were part of a merger or consolidation since 2020** see Chapter 5 and Appendix P for guidance.						
NOTES:						

10608.40 Urban water retail suppliers shall report to the department on their progress in meeting their urban water use targets as part of their urban water management plans submitted pursuant to Section 10631.

Submittal Table 6-1 Retail: Groundwater Volume Pumped Water Code Section 10631(4) and 10631(4)(c)							
☐	Check the box if the Supplier does not pump groundwater. Proceed to the next table.						
☐	Check the box if all or part of the groundwater described below is desalinated. (OPTIONAL)						
Groundwater Type **Drop Down List** May use each category multiple times	Potable or Non-Potable (OPTIONAL) **Drop down list**	Location or Basin Name	2021 (AF)	2022 (AF)	2023 (AF)	2024 (AF)	2025 (AF)
Add additional rows as needed							
Alluvial Basin		Bunker Hill (part of SBB)	18392	18293	13067	13215	18232
Alluvial Basin		Yucaipa	697	906	422	0	0
		Total	19,089	19,199	13,489	13,215	18,232
DWR NOTES: **Units of measure (AF, CCF, MG)** must remain consistent throughout the UWMP as reported in Submittal Table 2-3. This table identifies the unit of measure selected in Submittal Table 2-3.							
NOTES: Redlands no longer uses Yucaipa Basin.							

10631(4) If groundwater is identified as an existing or planned source of water available to the supplier, all of the following information:

(C) A detailed description and analysis of the location, amount, and sufficiency of groundwater pumped by the urban water supplier for the past five years. The description and analysis shall be based on information that is reasonably available, including, but not limited to, historic use records.

Submittal Table 6-2 Retail: Wastewater Collected Within Service Area Water Code Section 10633(a)				
☐	Check the box if there is no wastewater collection system. Proceed to the next table.			
	Percentage of 2025 service area served by wastewater collection system (OPTIONAL)			
	Percentage of 2025 service area population served by wastewater collection system (OPTIONAL)			
Wastewater Collection			**Recipient of Collected Wastewater**	
Name of Wastewater Collection Agency	Wastewater Volume Metered or Estimated? OPTIONAL **Drop Down List**	Volume of Wastewater Collected from UWMP Service Area 2025 (AF)	Name of Wastewater Treatment Plant (WWTP) and Place ID Number **Drop down list**	Is WWTP Located Within UWMP Area? **Drop Down List**
Add additional rows as needed				
City of Redlands	Metered	5,685	Redlands WWRF, Place ID 259148	Yes
Total Wastewater Received from UWMP Service Area in 2025:		5,685		
DWR NOTES: Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Submittal Table 2-3. This table identifies the unit of measure selected in Submittal Table 2-3. **Additional Guidance**: See Appendix M, Section M.21 for detailed guidance on this table.				
NOTES:				

CWC 10633(a) A description of the wastewater collection and treatment systems in the supplier's service area, including a quantification of the amount of wastewater collected and treated and the methods of wastewater disposal.

Submittal Table 6-3 Retail: Wastewater Treatment and Outcomes Within UWMP Service Area
Water Code Section 10633(b)

☐ **Check the box if no wastewater is treated or disposed of within the UWMP service area.**
Proceed to the next table.

Wastewater Treatment Plant Name and Place ID Number **Drop down list**	Does This Plant Treat Wastewater Generated Outside the UWMP Service Area? (OPTIONAL) **Drop down list**	2025 Volume of Wastewater Received from UWMP Service Area (As Reported in Submittal Table 6-2 R) (AF)	Total 2025 Volume of Water Treated (AF)	2025 Outcomes of Treated Wastewater										
				Water Recycled Within UWMP Service Area (enter data as applicable)		**Water Recycled Outside of UWMP Service Area** (enter data as applicable)		**Effluent Discharge that is not a Permitted Recycled Water Use** (enter data as applicable)		**Required Discharge for Instream Flow** (enter data as applicable)		**Delivered to Another Entity for Additional Treatment** (enter data as applicable)		
				Treatment Level **Drop down list**	Volume (AF)	Treatment Level **Drop down list**	Volume (AF)	Treatment Level **Drop down list**	Volume (AF)	Treatment Level **Drop down list**	Volume (AF)	Treatment Level **Drop down list**	Volume (AF)	Name of other entity
Add additional rows as needed														
Redlands WWRF, Place ID 259148	No	5685	5,685	Tertiary	1,665			Secondary, Disinfected - 23	3663					
Total		5,685	5,685		1,665		0		3,663		0		0	

DWR NOTES:
Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Submittal Table 2-3. This table identifies the unit of measure selected in Submittal Table 2-3.
IPR: Indirect Potable Reuse would have the treatment level of its end use requirement in the Level of Treatment drop-down.
Additional Guidance: See Appendix M, Section M.21 for detailed guidance on this table.

NOTES:

10633. The plan shall provide, to the extent available, information on recycled water and its potential for use as a water source in the service area of the urban water supplier...and shall include all of the following:
(b) A description of the quantity of treated wastewater that meets recycled water standards, is being discharged, and is otherwise available for use in a recycled water project.

Submittal Table 6-4 Retail: Recycled Water Direct Beneficial Uses Within Service Area
Water Code Section 10633 (c),(d),(e)

☐ Check box if recycled water is not used and is not planned for use within the service area of the supplier. The supplier will only complete the column on "Potential Recycled Water Use" and submit an accompanying narrative on the feasibility of that potential recycled water use.

Name(s) of Facility/ies Producing (Treating) the Recycled Water (OPTIONAL) :	Redlands Wastewater Treatment Plant
Name of Supplier Operating the Recycled Water Distribution System (OPTIONAL) :	City of Redlands
Volume of Supplemental Water Added in 2025 (OPTIONAL) :	
Source of 2025 Supplemental Water (OPTIONAL) :	

Use Type **Drop down list**	**Potable or Non-Potable** (after treatment if treated) (OPTIONAL) Drop down list	Additional Information (as needed)	2025 (AF)	2030 (AF)	2035 (AF)	2040 (AF)	2045 (AF)	2050 (AF)	**Potential Recycled Water Use**	
									Volume	Narrative page number (OPTIONAL)
Add additional rows as needed										
Industrial use	Non-Potable	MVPP and Landfill	846	1300	1300	1300	1300	1300	5685	
Landscape irrigation (exc golf courses)	Non-Potable		819	2057	2210	2342	2473	2605	5685	
Subtotal Potable			0	0	0	0	0	0	0	
Subtotal Non-Potable			1,665	3,357	3,510	3,642	3,773	3,905	5,685	
Total			1665	3357	3510	3642	3773	3905	5685	0

DWR NOTES: Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Submittal Table 2-3. This table identifies the unit of measure selected in Submittal Table 2-3.
Additional Guidance: See Appendix M, Section M.21 for detailed guidance on this table.
Potential recycled water use: a description of the feasibility of these uses must be included in the narrative.
Multiple Producers: If you have multiple recycled water producers, submit a separate table for each.

NOTES:

10633. The plan shall provide, to the extent available, information on recycled water and its potential for use as a water source in the service area of the urban water supplier... and shall include...
(c) A description of the recycled water currently being used in the supplier's service area, including, but not limited to, the type, place, and quantity of use
d) A description and quantification of the potential uses of recycled water, including, but not limited to, agricultural irrigation, landscape irrigation, wildlife habitat enhancement, wetlands, industrial reuse, groundwater recharge, indirect potable reuse, and other appropriate uses, and a determination with regard to the technical and economic feasibility of serving those uses.
(e) The projected use of recycled water within the supplier's service area at the end of 5, 10, 15, and 20 years, and a description of the actual use of recycled water in comparison to uses previously projected pursuant to this subdivision.

Submittal Table 6-5 Retail: 2020 UWMP Recycled Water Use Projection Compared to 2025 Actual
Water Code Section 10633(e)

☐ Check the box if recycled water was not used in 2025 nor previously projected for use in 2020.
Proceed to the next table.

Use Type Drop Down list	2020 Projection for 2025 (AF)	2025 Actual Use (AF)
Add additional rows as needed		
Industrial use	1,050	846
Landscape irrigation (exc golf courses)	1,050	819
Total	2,100	1,665

DWR NOTES:
Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Submittal Table 2-3. This table identifies the unit of measure reported in Submittal Table 2-3
Additional Guidance: See Appendix M, Section M.21 for detailed guidance on this table.

NOTES: 2020 Projection was 2,100 AFY and not specified between uses. Split 50%/50% here for display.

10633. The plan shall provide, to the extent available, information on recycled water and its potential for use as a water source in the service area of the urban water supplier. The preparation of the plan shall be coordinated with local water, wastewater, groundwater, and planning agencies that operate within the supplier's service area, and shall include all of the following: (e) ...a description of the actual use of recycled water in comparison to uses previously projected pursuant to this subdivision

Submittal Table 6-6 Retail: Methods to Encourage Future Recycled Water Use Water Code Section 10633(f)			
☐	Check the box if the Supplier does not plan to expand recycled water use in the future. Supplier will not complete the table below but will provide narrative explanation.		
Section 4.4.5.1, page 4-22	Provide page location of narrative in the UWMP		
Name of Action	Description	Planned Implementation Year	Expected Increase in Recycled Water Use (AF)
Add additional rows as needed			
Recycled Water System Expansion	Expand existing recycled water system for recycled water deliveries to the 1350 zone for irrigation use	2027	1,600
		Total (AF)	1,600
		Unit Conversion to AF	1,600
DWR NOTES: **Units of measure** (AF, CCF, MG) MUST remain consistent with units reported in Submittal Table 2-3. This table identifies the unit of measure selected in Submittal Table 2-3. **The unit conversion to Acre Feet** addresses the Water Code's requirement that this value be provided in acre-feet.			
NOTES:			

10633. The plan shall provide, to the extent available, information on recycled water and its potential for use as a water source in the service area of the urban water supplier. The preparation of the plan shall be coordinated with local water, wastewater, groundwater, and planning agencies that operate within the supplier's service area, and shall include all of the following:
(f) a description of actions, including financial incentives, which may be taken to encourage the use of recycled water, and the projected results of these actions in terms of acre feet of recycled water used per year.

Submittal Table 6-7 Retail: Expected Future Water Supply Projects or Programs
Water Code Section 10631(f)

☐	Check the box if there are no expected future water supply projects or programs that provide a quantifiable increase to the agency's water supply. Proceed to the next table.
☑	Check the box if some or all of the supplier's future water supply projects or programs are not compatible with this table and are described in a narrative format.
4.4.7 / 4-25	Provide page location of narrative in the UWMP

Name of Future Projects or Programs	Joint Project with other suppliers?		Additional Description (as needed)	**Potable or Non-Potable** (after treatment if treated) (OPTIONAL) Drop Down list	Planned Implementation Year	Planned for Use in Year Type **Drop Down List**	Expected Increase in Water Supply to Supplier (This may be a range) (AF)
	Drop Down List (yes/no)	If Yes, Supplier Name					
Add additional rows as needed							

DWR NOTES:
Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Submittal Table 2-3. This table identifies the unit of measure reported in Submittal Table 2-3.

NOTES:

10631 (f) Include a description of all water supply projects and water supply programs that may be undertaken by the urban water supplier to meet the total projected water use, as established pursuant to subdivision (a) of Section 10635. The urban water supplier shall include a detailed description of expected future projects and programs that the urban water supplier may implement to increase the amount of the water supply available to the urban water supplier in normal and single-dry water years and for a period of drought lasting five consecutive water years. The description shall identify specific projects and include a description of the increase in water supply that is expected to be available from each project. The description shall include an estimate with regard to the implementation timeline for each project or program.

Submittal Table 6-8 Retail: Water Supplies — Actual Water Code Section 10631(b)				
Water Supply		**2025**		
Drop down list May use each category multiple times. These are the only water supply categories that will be recognized by the WUEdata online submittal tool	Additional Description (as needed)	**Potable or Non-Potable** (after treatment if treated) (OPTIONAL) Drop Down list	Actual Volume (AF)	Total Entitlement (OPTIONAL) See 'DWR Notes' below (AF)
Add additional rows as needed				
Groundwater (not desalinated)	Bunker Hill (Part of SBB)	Potable	17,043	
Groundwater (not desalinated)	Bunker Hill (Part of SBB)	Non-Potable	1,189	
Surface water (not desalinated)	Santa Ana River (Part of SBB)	Potable	1,033	
Surface water (not desalinated)	Mill Creek (Part of SBB)	Potable	4,097	
Purchased or Imported Water	SWP - Direct	Potable	907

Recycled Water	Recycled Water Direct	Non-Potable	3,357		3,510		3,642		3,773		3,905	
		Subtotal Potable	24,463	0	25,372	0	26,037	0	26,702	0	27,367	0
		Subtotal Non-Potable	4,357	0	4,510	0	4,642	0	4,773	0	4,905	0
		Total	28,820	0	29,882	0	30,679	0	31,475	0	32,272	0

DWR NOTES:
Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Submittal Table 2-3.
Total Entitlement: e.g. Water Right, Groundwater Allocation, Contracted Amount.

NOTES:

10631. A plan shall be adopted in accordance with this chapter that shall do all of the following... (b) Identify and quantify, to the extent practicable, the existing and planned sources of water available to the supplier over the same five-year

Optional Submittal Table O-1B: Recommended Energy Reporting - SINGLE DELIVERY PRODUCT - TOTAL UTILITY APPROACH

Water Delivery Product drop down list (If delivering more than one type of product recommend using Table O-1C)	Retail Potable Deliveries	**Only for Water Delivery Products Under the Urban Water Supplier's Operational Control**		
Start Date of Reporting Period	1/1/2025	**Sum of All Water Management Processes**	**Non-Consequential Hydropower**	
End Date of Reporting Period	12/31/2025			
Is upstream embedded energy in the values reported?	No			
Units of Measure for Water	AF	**Total Utility** See DWR NOTES	**Hydropower**	**Net Utility**
Volume of Water Entering Process		22,637		22,637
Energy Consumed (kWh)		12,735,307		12,735,307
Energy Intensity (kWh/vol. converted to MG)		1,727	-	1,727

DWR NOTES:

Total Utility: The volume of water entered in the "Total Utility" column should equal the volume of water entering the distribution system (excluding recycled water); in most cases, this is the total volume calculated in UWMP Table 4-1: 2025 Actual Total Uses for Potable and Non-Potable Water. Note if recycled water is included in your Submittal Table 4-1, you must exclude it from your volume in this table.

Quantity of Self-Generated Renewable Energy

0 kWh

Data Quality (Estimate, Metered Data, Combination of Estimates and Metered Data)

Metered Data

Data Quality Narrative:

Narrative:

NOTES: Potable only, excludes recycled water and non-potable water

Optional Submittal Table 7-1 Retail: Basis of Water Year Data (Reliability Assessment)

Year Type	Base Year If not using a calendar year, type in the last year of the fiscal, water year, or range of years, for example, water year 2024-2025, use 2025	Available Supplies if Year Type Repeats	
		☐	Check the box if quantification of available supplies is not compatible with this table and is provided elsewhere in the UWMP. **Location:** [insert location from UWMP]
		Quantification of available supplies is provided in this table as either volume only, percent only, or both.	
		Volume Available (AF)	**% of Average Supply**
Average Year	2025		100%
Single-Dry Year	2025		104%
Consecutive Dry Years 1st Year	2025		104%
Consecutive Dry Years 2nd Year	2025		104%
Consecutive Dry Years 3rd Year	2025		104%
Consecutive Dry Years 4th Year	2025		104%
Consecutive Dry Years 5th Year	2025		104%

DWR NOTES: Supplier may use multiple versions of Submittal Table 7-1 R if different water sources have different base years and the supplier chooses to report the base years for each water source separately. If a Supplier uses multiple versions of Submittal Table 7-1 R, in the "Note" section of each submittal table, state that multiple versions of Submittal Table 7-1 R are being used and identify the particular water source that is being reported in each submittal table.

Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Submittal Table 2-3. This table reports the units of measure reported in Submittal Table 2-3.

NOTES:

Submittal Table 7-2 Retail: Normal Year Supply and Use Comparison Water Code Section 10635 (a)					
	2030 (AF)	**2035 (AF)**	**2040 (AF)**	**2045 (AF)**	**2050 (AF)**
Supply totals (autofill from Submittal Table 6-9 R)	28,820	29,882	30,679	31,475	32,272
Use totals (autofill from Submittal Table 4-2 R)	28,821	29,883	30,678	31,475	32,273
Surplus/(shortfall)	(1)	(1)	1	0	(1)

1	Other	Percentage	0-5	Voluntary, Landscape - Adjust landscape irrigation fixtures and systems to avoid waste.	No
1	Other	Percentage	0-1	Voluntary, install water saving devices.	No
1	Other	Percentage	0-1	Voluntary, select low-water-demand plants for new landscaping.	No
1	CII - Restaurants may only serve water upon request	Percentage	0-1	Voluntary, Restrict water service in restaurants.	No
1	Landscape - Restrict or prohibit runoff from landscape irrigation	Percentage	0-1	Adjust sprinklers and irrigation systems to avoid overspray, runoff, and waste. Avoid watering on windy days.	No
2	Increase Water Waste Patrols	Percentage	0-5	Efforts in Phase 2 of City's Plan of Action.	Yes
2	Other	Percentage	0-1	Increased regional collaboration to ensure sufficient water supplies for the entire region.	No
2	Landscape - Limit landscape irrigation to specific times	Percentage	0-5	Irrigation of lawns, gardens, landscaped areas, trees, shrubs, or other plants utilizing individual sprinklers or sprinkler systems is prohibited between the hours 12:00 P.M. and 8:00 P.M.	Yes
2	Landscape - Limit landscape irrigation to specific days	Percentage	0-5	Irrigation of lawns, gardens, landscaped areas, trees, shrubs, or other plants utilizing individual sprinklers or sprinkler systems is allowed only on an irrigation day designated by the city.	Yes
2	Landscape - Other landscape restriction or prohibition	Percentage	0-1	Commercial agriculture exempt from limit on irrigation days and times but shall curtail all non-essential water use.	Yes
2	Other	Percentage	0-1	Washing of any vehicles/mobile equipment is limited to allowed watering days and times and only with handheld bucket, or hose equipped with automatic shut-off nozzle.	Yes
2	Other	Percentage	0-1	Use of water from fire hydrants is limited to firefighting and other activities necessary to maintain the health, safety, and welfare of the citizens of Redlands. The use of water piped from fire hydrants and sprinkled for construction purposes is prohibited.	Yes
2	Other water feature or swimming pool restriction	Percentage	0-1	The refilling or adding of water to uncovered swimming or wading pools or spas is allowed only on designated irrigation days and is prohibited between the hours of 12:00 P.M. and 8:00 P.M.	Yes
2	Water Features - Restrict water use for decorative water features, such as fountains	Percentage	0-1	The operation of any ornamental fountain or other structure making similar decorative use of water is prohibited, unless the fountain or structure has a recycling system.	Yes

2	Other	Percentage	0-1	Washing / sprinkling of foundations/structures, allowed only by City Permit.	Yes
2	Landscape - Other landscape restriction or prohibition	Percentage	0-5	Golf greens and tees are only allowed irrigation on allowed watering days and times. Fairway irrigation is absolutely prohibited. Exemption from restrictions: Golf course irrigation utilizing treated wastewater or reused water.	Yes
2	CII - Restaurants may only serve water upon request	Percentage	0-1	Restaurants shall not serve water to customers except upon specific customer request.	Yes
2	Other - Customers must repair leaks, breaks, and malfunctions in a timely manner	Percentage	0-5	Failure to repair controllable leaks is prohibited.	Yes
2	Other - Prohibit use of potable water for washing hard surfaces	Percentage	0-1	Use of running water to wash driveways, sidewalks, parking areas, patios, tennis courts, and other paved areas is prohibited.	Yes
2	Landscape - Restrict or prohibit runoff from landscape irrigation	Percentage	0-5	Failure to prevent excessive runoff from irrigation activities is prohibited.	Yes
3	Other	Percentage	0-1	Implement hotline and email address for water waste reporting.	No
3	Other	Percentage	0-1	Develop internal Drought Task Force to collaborate on different methods to reduce consumption under each City department's purview of responsibilities.	No
3	Landscape - Other landscape restriction or prohibition	Percentage	0-5	All outdoor irrigation of vegetation shall occur only on allowed days and times using only handheld hoses, drip irrigation, handheld buckets, or permanently installed automatic sprinkler systems.	Yes
3	Landscape - Other landscape restriction or prohibition	Percentage	0-1	Golf tee area watering is prohibited. Except when irrigated with treated wastewater or reused water.	Yes
4	Landscape - Prohibit all landscape irrigation	Percentage	10-30	All outdoor irrigation of vegetation shall be allowed only between the hours of 8:00 P.M. and 12:00 A.M. on designated irrigation days.	Yes
4	Other - Prohibit vehicle washing except at facilities using recycled or recirculating water	Percentage	0-1	The washing of automobiles, trucks, trailers, boats, airplanes, and other types of mobile equipment not occurring upon the immediate premises of commercial car washes and commercial service stations and not in the immediate interest of the public health or safety is prohibited.	Yes
4	Other - Prohibit vehicle washing except at facilities using recycled or recirculating water	Percentage		The washing of automobiles, trucks, trailers, boats, airplanes, or other types of mobile equipment upon the immediate premises of commercial car washes and commercial service stations shall occur only between the hours of 12:00 P.M and 6:00 P.M.	
4	Landscape - Other landscape restriction or prohibition	Percentage	0-5	Commercial Agriculture irrigation is only permitted on designated days and times and only using handheld hoses, drip irrigation systems, or handheld buckets.	Yes
4	Other water feature or swimming pool restriction	Percentage	0-1	The filling, refilling, or adding of water to uncovered swimming or wading pools and spas is prohibited at any time of day or night.	Yes
4	Water Features - Restrict water use for decorative water features, such as fountains	Percentage	0-1	The operation of any ornamental fountain or similar structure is prohibited.	Yes
4	Other	Percentage	0-1	The issuance of new service connections and meters is prohibited.	Yes
DWR NOTES: Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Submittal Table 2-3.					
NOTES: The above shortage levels correspond to Redlands' four existing shortage stages. A surcharge is applied to a customer's utility bill on the 3rd violation. When in a particular stage, all elements of less restrictive stages shall apply as well.					

10632(a)(4) Shortage response actions that align with the defined shortage levels and include, at a minimum, all of the following:
(B) Locally appropriate demand reduction actions to adequately respond to shortages.
(D) Additional, mandatory prohibitions against specific water use practices that are in addition to state-mandated prohibitions and appropriate to the local conditions.
(E) For each action, an estimate of the extent to which the gap between supplies and demand will be reduced by implementation of the action.

Submittal Table 10-1 Retail: Notification to Cities and Counties Water Code Section 10621(b) and 10642

City of Redlands

This Water Shortage Contingency Plan is a strategic plan that the City of Redlands (Redlands or the City) uses to prepare for and respond to water shortages.

A water shortage occurs when the water supply available is insufficient to meet the normally expected customer water use at a given point in time. A shortage may occur due to a number of reasons. This includes water supply quality changes, climate change, drought, regional power outages, and catastrophic events (e.g., earthquakes). Additionally, the State may declare a statewide drought emergency and mandate that water suppliers reduce demands. The WSCP serves as the operating manual that Redlands will use to prevent catastrophic service disruptions through proactive, rather than reactive, mitigation of water shortages.

This WSCP provides a process for an annual water supply and demand assessment and structured steps designed to respond to actual conditions. This level of detailed planning and preparation provides accountability and predictability to help Redlands maintain reliable supplies and reduce the impact of any supply shortages and/or interruptions.

This WSCP was prepared in conjunction with Redlands 2025 UWMP, which is included in the 2025 Regional Urban Water Management Plan (2025 RUWMP) and is a standalone document that can be modified as needed. This document is compliant with the California Water Code (CWC) Section 10632 and incorporates guidance from the State of California Department of Water Resources (DWR) UWMP Guidebook.

IN THIS SECTION

- Water Service Reliability
- Annual Water Supply and Demand Assessment
- Supply Shortage Stages and Response Actions

The WSCP describes the following:

1. **Water Service Reliability Analysis:** Summarizes Redland's water supply analysis and reliability and identifies any key issues that may trigger a shortage condition.
2. **Annual Water Supply and Demand Assessment Procedures:** Describes the key data inputs, evaluation criteria, and methodology for assessing the system's reliability for the coming year and the steps to formally declare any water shortage stages and response actions.
3. **Water Shortage Stages:** Establishes water shortage stages to clearly identify and prepare for shortages.
4. **Shortage Response Actions:** Describes the response actions that may be implemented or considered for each stage to reduce gaps between supply and demand.
5. **Communication Protocols:** Describes communication protocols under each stage to ensure customers, the public, and government agencies are informed of shortage conditions and requirements.
6. **Compliance and Enforcement:** Defines compliance and enforcement actions available to administer demand reductions.
7. **Legal Authority:** Lists the legal documents that grant the City the authority to declare a water shortage and implement and enforce response actions.
8. **Financial Consequences of WSCP Implementation:** Describes the anticipated financial impact of implementing water shortage stages and identifies mitigation strategies to offset financial burdens.
9. **Monitoring and Reporting:** Summarizes the monitoring and reporting techniques to evaluate the effectiveness of shortage response actions and overall WSCP implementation. Results are used to determine if shortage response actions should be adjusted.
10. **WSCP Refinement Procedures:** Describes the factors that may trigger updates to the WSCP and outlines how to complete an update.
11. **Plan Adoption, Submittal, and Availability:** Describes the process for the WSCP adoption, submittal, and availability after each revision.

1.0 Water Service Reliability Analysis

As part of the 2025 RUWMP, Redlands completed a water supply reliability analysis for normal, single-dry, and five-year consecutive dry year periods from 2030-2050. A Drought Risk Assessment (DRA) was also performed to analyze supply reliability under five consecutive years of drought from 2021-2025. As described in Chapter 3 of the 2025 RUWMP, the effects of a local drought are not immediately recognized since the region uses the local groundwater basins to simulate a large reservoir for long-term storage. Redlands is able to pump additional groundwater to meet increased demands in dry years and participates in efforts to replenish the basins with imported and local water through regional recharge programs. Additionally, Redlands implements several ongoing water conservation measures. Regional recharge programs and conservation help to optimize and enhance the use of regional water resources.

Based on the 2025 RUWMP analysis, Redlands's water supply is reliable and not expected to see impactful change under drought conditions.

Even though localized drought conditions should not affect supply, other shortages may occur due to a number of reasons, such as water supply quality changes, regional power outage, State mandates for water use efficiency standards, and catastrophic events (e.g., earthquakes). Therefore, Redlands will use this WSCP as appropriate to address shortages and other supply emergencies.

2.0 Annual Water Supply and Demand Assessment Procedures

As an urban water supplier, Redlands must prepare and submit an Annual Water Supply and Demand Assessment (Annual Assessment or AWSDA) by July 1 each year pursuant to CWC Section 10632.1. The Annual Assessment is an evaluation of the near-term outlook for supplies and demands to determine whether the potential for a supply shortage exists and whether there is a need to trigger a WSCP shortage stage and response actions in the current calendar year to maintain supply reliability. This process will take place at the same time each year based on known circumstances and information available to Redlands at the time of analysis and can be updated or revised at any time if circumstances change.

Redlands will convene an internal WSCP Team to conduct the Annual Assessment each year.

The WSCP Team may include the following staff:

- Water Conservation Specialist
- Water Utility Manager
- Water Production Operations Superintendent

- Regulatory Compliance Officer
- Revenue Manager

The Annual Assessment procedure, including key data inputs and evaluation criteria, is summarized in Table 1. The Annual Assessment procedure and timeline, along with how it integrates with the annual assessment that will be conducted on a regional basis in parallel, is shown graphically in Figure 1.

Table 1: Annual Assessment Procedure

TIMING	ASSESSMENT ACTIVITIES	PROCEDURE, KEY DATA INPUTS, EVALUATION CRITERIA AND OTHER CONSIDERATIONS	STAFF RESPONSIBLE
JAN – FEB	Estimate unconstrained demands for coming year	Demands will be estimated based on water sales forecasts from annual budget or prior year demands plus any anticipated changes.	Water Conservation Specialist, Water Production Operations Superintendent
JAN – FEB	Estimate available supplies for the year, considering the following year will be dry	Each December, Redlands submits an order to San Bernardino Valley Municipal Water District (San Bernardino Valley or SBV) for the volume of State Water Project (SWP) water that is planned for use the following year. If the requested volume is not available due to reduced SWP supplies, Redlands will meet with San Bernardino Valley and other SWP users to discuss reducing SWP orders and may update the Annual Assessment to reflect a shift from SWP to groundwater production, if needed. The remainder of supply needs not met from SWP, and surface water will be pumped from the San Bernardino Basin Area (SBBA). The SBBA is sustainably managed to provide long-term supply reliability and is not anticipated to be significantly impacted in dry years. In the unlikely event that local supplies are reduced, Redlands will coordinate with the other agencies to identify available supplies for the coming year.	Water Conservation Specialist, Water Production Operations Superintendent, Water Utility Manager
JAN – FEB	Consider potential constraints that may impact supply delivery	Identify any known regional or Redlands infrastructure issues that may pertain to near-term water supply reliability, including repairs, construction, and environmental mitigation measures that may temporarily constrain capabilities, as well as any new projects that may add to system capacity. Identify any facilities out of service due to water quality problems, equipment failure, storm damage, etc. that may impact normal water deliveries. Identify any potential or emerging impacts to groundwater quality, such as emerging regulatory constraints that may limit use of available supplies for potable needs. Depending on infrastructure in question, Bear Valley Mutual Water Company (BVMWC) may need to be consulted.	Water Conservation Specialist, Water Production Operations Superintendent, Water Utility Manager Optional: BVMWC-General Manager, San Bernardino Valley Staff

TIMING	ASSESSMENT ACTIVITIES	PROCEDURE, KEY DATA INPUTS, EVALUATION CRITERIA AND OTHER CONSIDERATIONS	STAFF RESPONSIBLE
FEB	Convene WSCP Team to conduct Annual Assessment	Compare supplies and demands and discuss any constraints that may impact supply delivery. If the potential for a shortage exists, determine which shortage response stage and actions are recommended to reduce/eliminate the shortage. Additionally, if the State declares a drought state of emergency and requires demand reductions, the WSCP Team will determine which water shortage stage and response actions are needed to comply with the State mandate.	WSCP Team
MAY/JUNE	City Council	If the potential for a shortage exists or the State has mandated demand reductions, the results of the Annual Assessment will be presented to the Redlands City Council, including the recommended shortage stage and response actions. The City Council may order the implementation of a shortage stage and will adopt a resolution declaring the applicable water shortage stage.	Municipal Utilities and Engineering Department, City Manager's Office, Redlands City Council
ON-GOING	Implement WSCP actions, if needed	Relevant members of Redlands staff will implement shortage response actions associated with the declared water shortage stage.	WSCP Team
BY JULY 1	Submit Retail Annual Assessment	Send Final Retail Annual Assessment to DWR.	Water Conservation Specialist

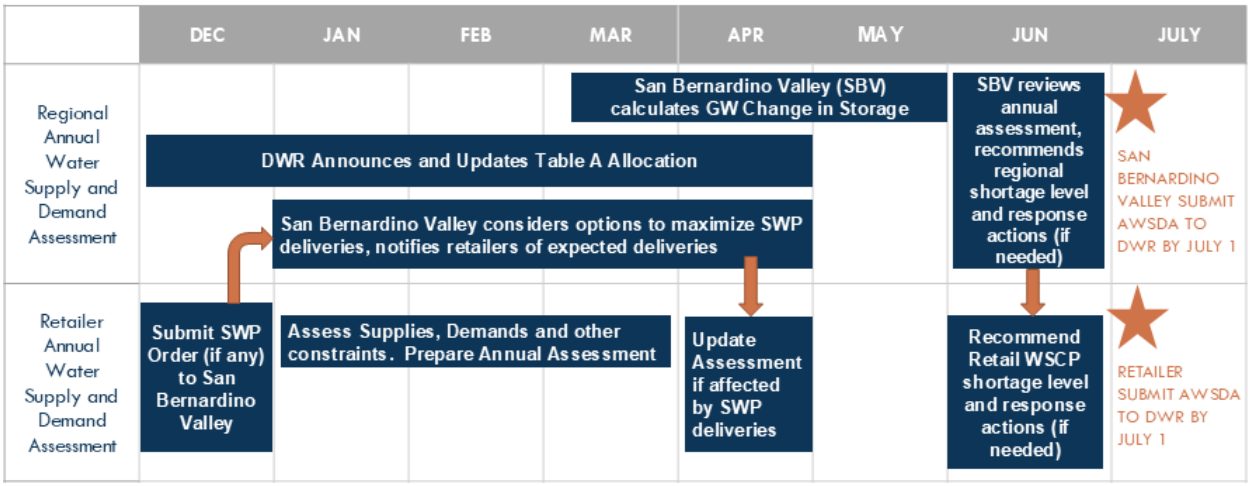

Figure 1: Regional and Retail Agency Annual Assessment Process and Timeline

3.0 Water Shortage Stages

Redlands does not foresee imposing a water shortage stage based on climate conditions, except under the State's direction, as occurred in 2014 and again in 2022 with Governor Newsom's Executive Order N-7-22 (EO N-7-22), which required that urban water suppliers implement demand reduction actions listed in the supplier's state standard shortage stage 2. However, Redlands does see a greater likelihood of imposing a water shortage stage due to a catastrophic failure of infrastructure or emerging regulatory constraints on groundwater quality. If a potential water supply shortage is identified in the Annual Assessment, this section provides information on the water shortage stages and response actions that Redlands may implement.

Redlands uses four (4) shortage stages to identify and respond to water shortage emergencies. At a minimum, Redlands encourages baseline conservation efforts year-round, regardless of a shortage emergency.

Stage I: Voluntary Conservation Measures

A small decrease, up to 15 percent, in water supply is expected. Water users are requested to limit their water use from June 1 to October 1 of each year to an amount necessary for health, safety, economic necessity, and irrigation. Water users should use water wisely and prevent its waste or unreasonable use.

Stage II: Mandatory Compliance; Water Alert

A water shortage of up to 25 percent is expected. Redlands will implement several mandatory restrictions.

Stage III: Mandatory Compliance; Water Warning

A more significant decrease in water supply is expected, with a shortage of up to 25 percent. Redlands will implement restrictions in addition to those implemented in stages I and II.

Stage IV: Mandatory Compliance; Water Emergency

Water supplies are in danger of being depleted to a point where such uses as human consumption, sanitation, and fire protection would be endangered. This would be a decrease in supply of more than 50 percent, most likely associated with a natural disaster.

The CWC outlines six standard water shortage stages that correspond to a gap in supply compared to normal year availability. The six standard water shortage stages correspond to progressively increasing estimated shortage conditions (up to 10-, 20-, 30-, 40-, 50-percent, and greater than 50-percent shortage compared to the normal reliability condition) and align with the response actions that a water supplier would implement to meet the severity of the impending shortages.

The CWC allows suppliers with an existing WSCP that uses different water shortage stages to comply with the six standard stages by developing and including a cross-reference relating its existing shortage categories to the six standard water shortage stages. Redlands is maintaining

its current four shortage stages for this WSCP. A crosswalk was developed that defines how Redlands' current four water shortage stages will align with DWR's standardized six stages of shortage. A visual representation of this alignment is shown in Figure 2 and Table 2.

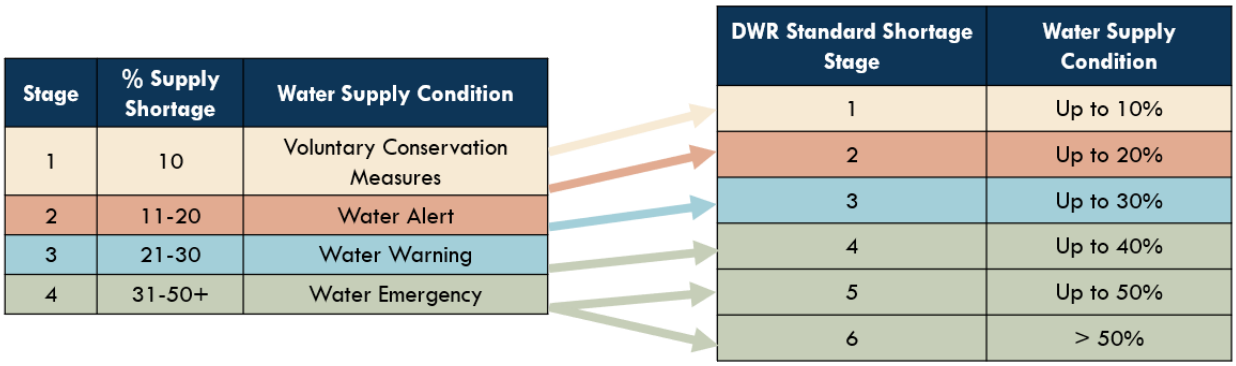

Figure 2: Crosswalk to DWR's Six Standard Stages

Table 2: DWR Table 8-1 Water Shortage Contingency Plan Stages

DWR STANDARD SHORTAGE LEVEL	DWR PERCENT SHORTAGE RANGE	REDLANDS' SHORTAGE LEVEL	REDLANDS' PERCENT SHORTAGE LEVEL
1	Up to 10%	Voluntary Conservation Measures (Redlands Stage 1)	Up to 10%
2	Up to 20%	Mandatory Compliance; Water Alert (Redlands Stage 2)	11-20%
3	Up to 30%	Mandatory Compliance; Water Warning (Redlands Stage 3)	21-30%
4	Up to 40%	Mandatory Compliance; Water Emergency (Redlands Stage 4)	31-50+%
5	Up to 50%	Mandatory Compliance; Water Emergency (Redlands Stage 4)	31-50+%
6	>50%	Mandatory Compliance; Water Emergency (Redlands Stage 4)	31-50+%

Note: One stage in the Water Shortage Contingency Plan must address a water shortage of 50%.

4.0 Shortage Response Actions

This section was completed pursuant to CWC Section 10632(a)(4) and 10632.5(a) and describes the response actions that must be implemented or considered for each stage to minimize social and economic impacts to the community.

In accordance with CWC 10632(b), Redlands analyzes and defines water features that are artificially supplied with water, including ponds, lakes, waterfalls, and fountains, separately from swimming pools and spas.

4.1 Supply Augmentation

Table 3 identifies the supply augmentation actions Redlands can take in the event of a water shortage condition. Redlands currently maintains interconnections with the City of Loma Linda and Western Heights Water Company. During water shortage emergencies, Redlands may be able to obtain supplemental water supply through these connections, if available.

Table 3: DWR 8-2R Supply Augmentation & Other Actions

SHORTAGE LEVEL	SUPPLY AUGMENTATION METHODS AND OTHER ACTIONS BY WATER SUPPLIER	HOW MUCH IS THIS GOING TO REDUCE THE SHORTAGE GAP?	ADDITIONAL EXPLANATION OR REFERENCE
4	Other purchases	~3%	Utilize intertie with City of Loma Linda. Mutual Aid agreement between Cities, September 1987
4	Other purchases	~3%	Utilize intertie with Western Heights Water Company. Intertie constructed August 2016

Note: The above shortage level corresponds to Redlands' four existing shortage stages.

4.2 Demand Reduction

In addition to prohibitions on end uses, which are the responsibility of customers, Redlands is committed to lead by example. In 2015, Redlands created a "Plan of Action" (POA) that outlines efforts to improve outreach and resources for customers and increase water efficiency at its own facilities. This four-phase approach includes increasing efforts and funding in correlation with increasing water reduction requirements. Many elements of this plan have been completed, are ongoing, or are in process of completion. Table 4 summarizes these efforts and end use prohibitions.

Table 4: DWR 8-3R Demand Reduction Actions

SHORTAGE LEVEL	DEMAND REDUCTION ACTIONS	HOW MUCH IS THIS GOING TO REDUCE THE SHORTAGE GAP?	ADDITIONAL EXPLANATION OR REFERENCE	PENALTY, CHARGE, OR OTHER ENFORCEMENT
All	Expand Public Information Campaign	0-20%		No
All	Improve Customer Billing	0-1%		No
All	Offer Water Use Surveys	0-1%		No
All	Provide Rebates on Plumbing Fixtures, Devices and Appliances	0-1%		No
All	Provide Rebates for Landscape Irrigation Efficiency	0-1%		No
All	Provide Rebates for Turf Replacement	0-1%		No
All	Reduce System Water Loss	0-5%		No
All	Other	0-5%	Upgrades to increase recycled water use.	No
1	Other	0-5%	Voluntary, Landscape - Adjust landscape irrigation fixtures and systems to avoid waste.	No
1	Other	0-1%	Voluntary, install water saving devices.	No
1	Other	0-1%	Voluntary, select low-water-demand plants for new landscaping.	No
1	CII - Restaurants may only serve water upon request	0-1%	Voluntary, Restrict water service in restaurants.	No

SHORTAGE LEVEL	DEMAND REDUCTION ACTIONS	HOW MUCH IS THIS GOING TO REDUCE THE SHORTAGE GAP?	ADDITIONAL EXPLANATION OR REFERENCE	PENALTY, CHARGE, OR OTHER ENFORCEMENT
1	Landscape - Restrict or prohibit runoff from landscape irrigation	0-1%	Adjust sprinklers and irrigation systems to avoid overspray, runoff, and waste. Avoid watering on windy days.	No
2	Water Waste Patrols	0-5%	Efforts in Phase 2 of City's Plan of Action.	Yes
2	Other	0-1%	Increased regional collaboration to ensure sufficient water supplies for the entire region.	No
2	Landscape - Limit landscape irrigation by sprinkler to specific times	5-10%	Irrigation of lawns, gardens, landscaped areas, trees, shrubs, or other plants utilizing individual sprinklers or sprinkler systems is prohibited between the hours 12:00 P.M. and 8:00 P.M.	Yes
2	Landscape - Limit landscape irrigation by sprinkler to specific days	5-10%	Irrigation of lawns, gardens, landscaped areas, trees, shrubs, or other plants utilizing individual sprinklers or sprinkler systems is allowed only on an irrigation day designated by the city.	Yes
2	Landscape - Other landscape restriction or prohibition	0-1%	Commercial agriculture exempt from limit on irrigation days and times but shall curtail all non-essential water use.	Yes
2	Other	0-1%	Washing of any vehicles/mobile equipment is limited to allowed watering days and times and only with handheld bucket, or hose equipped with automatic shut-off nozzle.	Yes
2	Other - Prohibit use of fire hydrants for construction purposes	0-1%	Use of water from fire hydrants is limited to firefighting and other activities necessary to maintain the health, safety, and welfare of the citizens of Redlands. The use of water piped from fire hydrants and sprinkled for construction purposes is prohibited.	Yes
2	Pool/Spa Prohibition	0-1%	The refilling or adding of water to uncovered swimming or wading pools or spas is allowed only on designated irrigation days and is prohibited between the hours of 12:00 P.M. and 8:00 P.M.	Yes

SHORTAGE LEVEL	DEMAND REDUCTION ACTIONS	HOW MUCH IS THIS GOING TO REDUCE THE SHORTAGE GAP?	ADDITIONAL EXPLANATION OR REFERENCE	PENALTY, CHARGE, OR OTHER ENFORCEMENT
2	Decorative Water Features-Use is Prohibited	0-1%	The operation of any ornamental fountain or other structure making similar decorative use of water is prohibited, unless the fountain or structure has a recycling system.	Yes
2	Washing/Sprinkling of Foundations/ Structures	0-1%	Allowed only by City Permit.	Yes
2	Landscape - Other landscape restriction or prohibition	0-5%	Golf greens and tees are only allowed irrigation on allowed watering days and times. Fairway irrigation is absolutely prohibited. Exemption from restrictions: Golf course irrigation utilizing treated wastewater or reused water.	Yes
2	CII - Restaurants may only serve water upon request	0-1%	Restaurants shall not serve water to customers except upon specific customer request.	Yes
2	Other - Customers must repair leaks, breaks, and malfunctions	0-5%	Failure to repair controllable leaks is prohibited.	Yes
2	Other - Prohibit use of water for washing hard surfaces	0-1%	Use of running water to wash driveways, sidewalks, parking areas, patios, tennis courts, and other paved areas is prohibited.	Yes
2	Landscape - Restrict or prohibit runoff from landscape irrigation	0-5%	Failure to prevent excessive runoff from irrigation activities is prohibited.	Yes
3	Other	0-1%	Implement hotline and email address for water waste reporting.	No
3	Other	0-1%	Develop internal Drought Task Force to collaborate on different methods to reduce consumption under each City department's purview of responsibilities.	No

SHORTAGE LEVEL	DEMAND REDUCTION ACTIONS	HOW MUCH IS THIS GOING TO REDUCE THE SHORTAGE GAP?	ADDITIONAL EXPLANATION OR REFERENCE	PENALTY, CHARGE, OR OTHER ENFORCEMENT
3	Landscape - Other landscape restrictions or prohibition	0-5%	All outdoor irrigation of vegetation shall occur only on allowed days and times using only handheld hoses, drip irrigation, handheld buckets, or permanently installed automatic sprinkler systems.	Yes
3	Landscape - Other landscape restriction or prohibition	0-1%	Golf tee area watering is prohibited. Except when irrigated with treated wastewater or reused water.	Yes
4	Landscape - Prohibit all landscape irrigation	10-30%	All outdoor irrigation of vegetation shall be allowed only between the hours of 8:00 P.M. and 12:00 A.M. on designated irrigation days.	Yes
4	Other - Prohibit vehicle/mobile equipment washing except at commercial car washes and service stations	0-1%	The washing of automobiles, trucks, trailers, boats, airplanes, and other types of mobile equipment not occurring upon the immediate premises of commercial car washes and commercial service stations and not in the immediate interest of the public health or safety is prohibited.	Yes
4	Other - Prohibit vehicle/mobile equipment washing except at commercial car washes and service stations		The washing of automobiles, trucks, trailers, boats, airplanes, or other types of mobile equipment upon the immediate premises of commercial car washes and commercial service stations shall occur only between the hours of 12:00 P.M and 6:00 P.M.	
4	Landscape - Other landscape restriction or prohibition	0-5%	Commercial Agriculture irrigation is only permitted on designated days and times and only using handheld hoses, drip irrigation systems, or handheld buckets.	Yes
4	Other water feature or swimming pool restriction	0-1%	The filling, refilling, or adding of water to uncovered swimming or wading pools and spas is prohibited at any time of day or night.	Yes

SHORTAGE LEVEL	DEMAND REDUCTION ACTIONS	HOW MUCH IS THIS GOING TO REDUCE THE SHORTAGE GAP?	ADDITIONAL EXPLANATION OR REFERENCE	PENALTY, CHARGE, OR OTHER ENFORCEMENT
4	Water Features - Restrict water use for decorative water features, such as fountains	0-1%	The operation of any ornamental fountain or similar structure is prohibited.	Yes
4	Other	0-1%	The issuance of new service connections and meters is prohibited.	Yes

Notes: The above shortage levels correspond to Redlands' four existing shortage stages.

A surcharge is applied to a customer's utility bill on the 3rd violation. When in a particular stage, all elements of less restrictive stages shall apply as well.

4.3 Operational Changes and Additional Mandatory Restrictions

During shortage conditions, operations may be affected by supply augmentation or demand reduction responses. Redlands will consider its operational procedures when it completes its Annual Assessment. Any additional mandatory restrictions implemented in response to the declaration of a shortage response stage, beyond the actions listed in Table 3 and Table 4, are listed in Redlands' Ordinance No. 2151 in January 1991 and Ordinance No. 2751 in 2011, which make up the City of Redlands Water Conservation Plan ("Plan"), provided in Attachment 1.

4.4 Emergency Response Plan

In December 2025, Redlands completed a Risk and Resilience Assessment (RRA) and by June 30th, 2026, will have completed the Emergency Response Plan (ERP) in accordance with America's Water Infrastructure Act (AWIA) of 2018. The purpose of the RRA and ERP is to meet the AWIA compliance requirements and plan for long-term resilience of Redlands' infrastructure. The RRA assessed Redlands' water system to identify critical assets and processes that may be vulnerable to human and natural hazards, and to identify measures that can be taken to reduce risk and enhance resilience from service disruption for the benefit of customers. The RRA identifies and characterizes both infrastructure-specific and system-wide vulnerabilities and threats and quantifies the consequences of disruption. The RRA also identifies various options (and constraints) in addressing and mitigating risk. The RRA, in conjunction with the ERP, charts a course for water system resilience. The RRA also provided various recommendations to increase reliability of Redlands' system. Since critical pieces of infrastructure and specific vulnerabilities are detailed in the RRA and ERP, the contents of these documents are confidential and for use by Redlands' staff only. However, Redlands can confirm that these assessments will meet the requirements set forth by AWIA and evaluate seismic risks and mitigation actions to Redlands' infrastructure.

In the event of a water shortage emergency resulting from equipment failure, power outage, or other catastrophe, Redlands is prepared to purchase emergency water supplies from nearby agencies while repairs or other remedial actions are underway. Redlands may also implement its four-stage plan for conservation, as described above, with either voluntary or mandatory reductions depending on the severity of the shortage. For severe disasters (Stage 4), mandatory water use reductions are specified.

4.5 Seismic Risk Assessment and Mitigation Plan

Disasters, such as earthquakes, can and will occur without notice. In addition to the AWIA RRA and ERP (underway), the City of Redlands has a 2021 Local Hazard Mitigation Plan (LHMP) that includes an assessment of seismic risk and mitigation strategies. The LHMP is included as Attachment 2.

The seismic hazards evaluated include fault rupture, liquefaction and seismic shaking and assessed the threat to critical facilities. The LHMP concluded that there are potential mitigation activities to reduce the risk of damage in earthquakes. These include structural mitigation of vulnerable building structures and infrastructure facilities.

In 2022, Redlands completed a Condition, Seismic, and Structural Assessment for their water infrastructure, which will include specific mitigation actions.

4.6 Shortage Response Action Effectiveness

Redlands has estimated the effectiveness of shortage response actions in Table 3 and Table 4, when data pertaining to such actions is available. It is expected that response actions effectiveness is also a result of successful communication and outreach efforts.

5.0 Communication Protocols

Redlands prioritizes effective communication, especially in times of a water shortage emergency. Redlands has a protocol in place to communicate with the public, government agencies, and other interested parties about water shortages and any anticipated or triggered shortage response actions. Communication methods may include email, bill inserts, handouts, informative flyers, direct mail pieces to newspapers, bus shelter advertisements, news releases, social media outreach, website content, electronic signboards along major transportation routes, Emergency Notification System phone and text alerts, and the City's Government Access cable television station. Redlands provides reminders about shortage stages as they develop, and Redlands encourages conservation at all times.

6.0 Compliance and Enforcement

For prohibitions on end uses, customers will receive a violation should they violate restrictions set forth in the stage currently in effect and the preceding stages. Upon third violation, a surcharge is imposed on the customer's next regular water bill. The surcharge consists of a percentage of the customer's commodity charge on the most recent water bill, based on the stage then in effect.

The surcharge for each stage is as follows:

- **Stage II: 25 percent**
- **Stage III: 50 percent**
- **Stage IV: 75 percent**

If a water customer cited for a third violation fails or refuses to comply with the requirements of this chapter or to pay any outstanding water bills including surcharges, the City Manager is hereby granted discretionary authority pursuant to CWC section 375 to cause a flow-restricting device to be installed at the meter to reduce water availability to the customer's service address. Pursuant to CWC section 35423, if installation of a flow restrictor is infeasible, impractical or is unlikely to induce compliance with this chapter, the City Manager may authorize a shut-off of service to the premises involved (Ord. 2151 § 1, 1991).

A city water user may file a request for relief from any provision of this chapter. The City Manager shall review all requests and hold a hearing with each applicant. The City Manager may grant relief from the provisions of this chapter if he determines that special circumstances make compliance not reasonably possible, or that the restrictions herein would either:

- Cause an unnecessary and undue hardship to the water user or the public; or
- Cause an emergency condition affecting the health, sanitation, fire protection, or safety of the water user or of the public.

Such relief may be granted only upon written request to the City. Upon granting such relief, the City Manager may impose any conditions he determines to be just and proper. The City Manager shall make his determination within fourteen (14) days of receipt of the request for relief and shall inform the applicant of the decision in writing.

An applicant shall have the right to appeal the City Manager's decision regarding his or her application to the City Council or its designee. The appeal must be in writing and received by the City within ten (10) days of the date of the City Manager's written decision. The appeal shall be heard by the City Council or its designee within a reasonable period of time from the date the appeal is filed. The City shall provide written notice to the applicant of the time and date of the hearing. The City Council or its designee, at its discretion, may affirm, reverse, or modify the City Manager's decision and impose any conditions it deems proper. The decision of the City Council shall be final (Ord. 2151 § 1, 1991).

7.0 Legal Authority

To offset the prolonged effects of a drought period or other emergency, the City Council adopted Ordinance No. 2151 in January 1991, and Ordinance No. 2751 in 2011, which make up the City of Redlands Water Conservation Plan (“Plan”), the City’s water shortage contingency plan. These ordinances collectively provide water conservation measures in order to minimize the effect of a water shortage on the citizens of the community. The Plan includes provisions that will significantly reduce the waste and inefficient use of water, thereby extending the available water resources required for the domestic and fire protection needs of the City and general public. The adopted Plan, approved by City Council, can be found in Attachment 1.

7.1 Water Shortage Emergency Declaration

In accordance with CWC Section Division 1, Section 350, the City Council shall declare a water shortage emergency condition to prevail within the area served by such distributor whenever it finds and determines that the ordinary demands and requirements of water consumers cannot be satisfied without depleting the water supply of the distributor to the extent that there would be insufficient water for human consumption, sanitation, and fire protection.

7.2 Local/Regional Emergency Declaration

If a water shortage is approaching, Redlands shall coordinate with any of the cities and counties in its service area for the possible proclamation of a local emergency.

8.0 Financial Consequences of WSCP Implementation

Implementation of any stage of the Plan and CWC Chapter 3.3 (Excessive Residential Water Use During Drought) requiring mandatory restrictions may cause a decrease in revenues and an increase in expenditures. The State drought emergency declaration of 2014-2017 resulted in decreased revenue and increased expenditures. Mandatory restrictions were required, necessitating an increase in staffing to target water use reduction requirements and an increase in outreach efforts. Like most agencies, the majority of the City's costs are fixed, and the combination of decreasing revenues and increased expenditures required implementation of revenue adjustments.

Although the City had reserve funds, reserve funds are typically reserved for emergencies needing immediate attention where time constraints of a rate study, customer noticing, and public hearings would impede immediate actions. The City determined it was not sound financial practice to spend reserve funds to address declining sales due to drought but rather addressed revenue shortages with a rate adjustment. It is expected that in the event of another water shortage emergency, the City would follow the same protocol to address a revenue decrease and/or expenditure increase. In the case where revenue adjustments and use of reserve funds are not options, the City would postpone capital improvement projects to offset diminished revenues.

9.0 Monitoring and Reporting

The water savings from implementation of the WSCP will be determined based on monthly production reports which are reviewed and compared to production reports and pumping statistics from prior months and the same period of the prior year. Under shortage conditions, these production reports could be prepared as often as daily. At first, the cumulative consumption for the various sectors (e.g., residential, commercial, etc.) will be evaluated for reaching the target level. Then if needed, individual accounts will be monitored. Weather and other possible influences may be accounted for in the evaluation.

10.0 WSCP Refinement Procedures

The WSCP is best prepared and implemented as an adaptive management plan. Redlands will use results obtained from their monitoring and reporting program to evaluate any needs for revisions. Potential changes to the WSCP that would warrant an update include, but are not limited to, any changes to trigger conditions, changes to the shortage stage structure, and/or changes to customer reduction actions.

Any prospective changes to the WSCP would need to be presented to Redlands' City Council for discretionary approval. Once discretionary approval has been granted, Redlands will hold a public hearing, obtain any comments, and adopt the updated WSCP. Notices for refinement and the public hearing date will be published in the local newspaper in advance of any public meetings.

11.0 Plan Adoption, Submittal, and Availability

Redlands adopted this WSCP with the 2025 RUWMP. The 2025 RUWMP and WSCP were made available for public review in May 2026, and a public hearing was held on June 2, 2026, to receive public input on the draft 2025 RUWMP and the WSCP.

The Redlands City Council adopted the 2025 RUWMP and the WSCP at a public meeting on June 2, 2026. The resolution of adoption is included as Attachment 3.

This WSCP was submitted to DWR through the WUEData portal before the deadline of July 1, 2026.

This WSCP will be available to the public on the City of Redlands' website.

If Redlands identifies the need to amend this WSCP, it will follow the same procedures for notification to cities, counties, and the public as used for the 2025 RUWMP and for initial adoption of the WSCP.

Attachment 1

City of Redlands Water Conservation Plan

1

Chapter 13.06
WATER CONSERVATION PLAN

13.06.010: TITLE:

This chapter establishes the *CITY OF REDLANDS WATER CONSERVATION PLAN.* (Ord. 2151 § 1, 1991)

13.06.020: INTENT:

The city council of the city of Redlands declares that the public health, safety and general welfare requires that water resources available to the city be put to maximum beneficial use, that the waste or unreasonable use of water be prevented, and that the conservation of such water must occur to protect the people and property of the city of Redlands. (Ord. 2151 § 1, 1991)

13.06.030: PURPOSE AND SCOPE:

A. The purpose of this chapter is to reduce the nonessential use of water to conserve city water supplies, thereby minimizing the effect of a shortage of water supplies on city users. The water conservation plan here established is to:

1. Protect the health, safety, and welfare of the citizens and property owners of the city;

2. Assure the maximum beneficial use of city water supplies; and

3. Attempt to provide sufficient water supplies to meet the basic needs of human consumption, sanitation and fire protection.

B. This chapter shall remain in effect until the city council declares by ordinance that the provisions of this chapter are no longer applicable to existing water supply conditions and the supply of water available for distribution within the city's service area has been replenished or augmented. (Ord. 2151 § 1, 1991)

13.06.040: AUTHORIZATION:

A. The city is authorized to implement the provisions of this chapter following a public hearing as specified below upon the city council's determination by majority vote of the entire council that such implementation is necessary to protect the public health and safety.

B. A public hearing shall be held to determine whether to adopt a water conservation plan, and, if so, which measures provided herein should be implemented. A similar public hearing shall be held by the city council prior to the implementation or termination of each incremental water conservation stage pursuant to section 13.06.080 of this chapter. Notice of the time and place of these public hearings shall be published not less than ten (10) days before the hearing in a newspaper of general circulation.

C. Upon adoption by the city council, the provisions of this chapter shall become effective immediately. Notice of the implementation of successive stages of water conservation shall be given to water users immediately both by publication at least once in a newspaper of general circulation within ten (10) days after adoption, and by a notice enclosed with the next regular city invoice for water or utility service.

D. If the city council cannot meet in time to act to protect the public interest pursuant to this chapter, the city manager or his designee is hereby authorized and directed to implement such provisions of this chapter upon his or her written determination that the city cannot supply adequate water to meet the ordinary demands of water consumers, and that such implementation is necessary to protect the public health or safety. Such written determination shall be presented to the city council at its next meeting for review, revocation or ratification. Such meeting shall be held as soon as possible. (Ord. 2151 § 1, 1991)

13.06.050: APPLICATION:

The provisions of this chapter shall apply to all persons, customers, and property served water by the city wherever situated. (Ord. 2151 § 1, 1991)

13.06.060: GENERAL PROHIBITION:

No water user shall make, cause, use, or permit the use of water supplied by the city for residential, commercial, industrial, agricultural, governmental or any other use in a manner contrary to this chapter. Waste or the unreasonable or nonbeneficial use of water is prohibited in the city of Redlands. (Ord. 2151 § 1, 1991)

13.06.070: MANDATORY CONSERVATION; STAGE CRITERIA:

The director of the public works department shall recommend guidelines for adoption by the city council setting forth the criteria to determine when water supply conditions in the city require the implementation or termination of each water conservation stage. Such guidelines shall be updated when the director determines that water availability so requires. The director shall include in such guidelines a calendar symbol system designating allowed days for irrigation. (Ord. 2151 § 1, 1991)

13.06.080: MANDATORY CONSERVATION; PHASE IMPLEMENTATION:

The public works department shall monitor the projected supply and demand for water by its customers on a daily basis during the months of June, July, August, September, and October and shall recommend to the city manager the extent of conservation required through the implementation and/or termination of particular conservation stages to allow the department to prudently plan for and supply water to its customers. Thereafter, the city manager may recommend to the city council the implementation or termination of the appropriate stage of water conservation in accordance with the applicable provisions of this chapter. The city council may implement or terminate the appropriate stage pursuant to section 13.06.040 of this chapter. Notice of the implementation or termination of each stage shall be given pursuant to subsection 13.06.040C of this chapter.

A. Stage I, Voluntary Conservation Measures: Water users are requested to limit their water use from June 1 to October 1 of each year to an amount necessary for health, safety, economic necessity and irrigation. Water users should use water wisely and prevent its waste or unreasonable use.

   The following actions are recommended:

   1. Adjust sprinklers and irrigation systems to avoid overspray, runoff, and waste. Avoid watering on windy days;

   2. Install water saving devices, such as low flow showerheads and faucet aerators;

   3. Select low water demand shrubs, ground covers and trees for new landscaping;

4. Restrict water service in restaurants.

B. Stage II, Mandatory Compliance; Water Alert: When implemented pursuant to subsection 13.06.040B of this chapter and noticed pursuant to subsection 13.06.040C of this chapter, the following restrictions shall apply to the use of water supplied by the city in addition to the recommendations of stage I:

1. Irrigation of lawns, gardens, landscaped areas, trees, shrubs, or other plants utilizing individual sprinklers or sprinkler systems is allowed only on an irrigation day designated by the city and is prohibited between the hours of twelve o'clock (12:00) noon and eight o'clock (8:00) P.M. However, irrigation is permitted at any time if:

   a. A handheld hose is used, or

   b. A handheld, faucet filled bucket containing five (5) gallons or less is used, or

   c. A drip irrigation system is used.

   Commercial nurseries, commercial farmers, and grove settings requiring twenty four (24) hour irrigation cycles, are exempt from stage II irrigation restrictions, but shall curtail all nonessential water use.

2. The washing of automobiles, trucks, trailers, boats, aircraft and other types of mobile equipment is allowed only on designated irrigation days and is prohibited between the hours of twelve o'clock (12:00) noon and eight o'clock (8:00) P.M. Mobile equipment washing shall be done only with a handheld bucket or a handheld hose equipped with a positive shutoff nozzle for quick rinses.

   Notwithstanding the above, washing of such equipment may be done at any time on the immediate premises of a commercial car wash or commercial service station with washwater recycling facilities. Garbage trucks and vehicles to transport food and perishables are exempt from these regulations if the public health or safety requires frequent vehicle cleaning.

3. The washing or sprinkling of foundations or structures shall be allowed only by city permit. Regulations for such permit shall be enacted by resolution.

4. The refilling or adding of water to uncovered swimming or wading pools or spas is allowed only on designated irrigation days and is prohibited between the hours of twelve o'clock (12:00) noon and eight o'clock (8:00) P.M.

5. The operation of any ornamental fountain or other structure making similar decorative use of water is prohibited, unless the fountain or structure has a recycling system.

6. The use of water for irrigation of golf greens and tees is allowed only on designated irrigation days and is prohibited between twelve o'clock (12:00) noon and eight o'clock (8:00) P.M. The irrigation of golf course fairways is absolutely prohibited. The irrigation of golf courses utilizing treated wastewater or reused water is not subject to these prohibitions.

7. Restaurants shall not serve water to customers except upon specific customer request.

8. Failure to repair controllable leaks is prohibited.

9. Use of running water to wash driveways, sidewalks, parking areas, patios, tennis courts and other paved areas is prohibited.

10. Failure to prevent excessive runoff from irrigation activities is prohibited.

11. Use of water from fire hydrants is limited to firefighting and other activities necessary to maintain the health, safety, and welfare of the citizens of Redlands. The use of water piped from fire hydrants and sprinkled for construction purposes is prohibited.

C. Stage III, Mandatory Compliance; Water Warning: When implemented pursuant to subsection 13.06.040B of this chapter and noticed pursuant to subsection 13.06.040C of this chapter, the following restrictions, in addition to all elements of stages I and II, shall apply:

1. All outdoor irrigation of vegetation shall occur only on designated days using handheld hoses, drip irrigation, or handheld buckets and is prohibited between the hours of twelve o'clock (12:00) noon and eight o'clock (8:00) P.M.

   Exemption: Permanently installed automatic sprinkler systems may be used on designated irrigation days but are prohibited between the hours of twelve o'clock (12:00) noon and eight o'clock (8:00) P.M.

2. The watering of golf tee areas is prohibited except with treated wastewater or reused water.

D. Stage IV, Mandatory Compliance; Water Emergency: Pursuant to California Water Code section 350 et seq., the city council may declare a water shortage emergency upon its determination that the ordinary demands of city water users cannot be satisfied without depleting the city water supply to a point of insufficient water for human consumption, sanitation and fire protection. When implemented pursuant to subsection 13.06.040B of this chapter and noticed pursuant to subsection 13.06.040C of this chapter, the following restrictions, in addition to all elements of stages I, II and III, shall apply:

1. All outdoor irrigation of vegetation shall be allowed only between the hours of eight o'clock (8:00) P.M. and twelve o'clock (12:00) midnight on designated irrigation days.

2. The washing of automobiles, trucks, trailers, boats, airplanes, and other types of mobile equipment not occurring upon the immediate premises of commercial car washes and commercial service stations and not in the immediate interest of the public health or safety is prohibited.

3. The washing of automobiles, trucks, trailers, boats, airplanes, or other types of mobile equipment upon the immediate premises of commercial car washes and commercial service stations shall occur only between the hours of twelve o'clock (12:00) noon and six o'clock (6:00) P.M.

4. Commercial nurseries and commercial farmers using city water shall water only on designated irrigation days between the hours of ten o'clock (10:00) A.M. and six o'clock (6:00) P.M. and shall use only handheld hoses, drip irrigation systems, or handheld buckets.

5. The filling, refilling, or adding of water to uncovered swimming or wading pools and spas is prohibited at any time of day or night.

6. The operation of any ornamental fountain or similar structure is prohibited.

7. The issuance of new service connections and meters is prohibited. (Ord. 2151 § 1, 1991)

13.06.090: RELIEF FROM COMPLIANCE:

A city water user may file a request for relief from any provision of this chapter. The city manager shall review all requests and hold a hearing with each applicant. The city manager may grant relief from the provisions of this chapter if he determines that special circumstances make compliance not reasonably possible, or that the restrictions herein would either:

A. Cause an unnecessary and undue hardship to the water user or the public; or

B. Cause an emergency condition affecting the health, sanitation, fire protection or safety of the water user or of the public.

Such relief may be granted only upon written request to the city. Upon granting such relief, the city manager may impose any conditions he determines to be just and proper. The city manager shall make his determination within fourteen (14) days of receipt of the request for relief and shall inform the applicant of the decision in writing.

An applicant shall have the right to appeal the city manager's decision regarding his or her application to the city council or its designee. The appeal must be in writing and received by the city within ten (10) days of the date of the city manager's written decision. The appeal shall be heard by the city council or its designee within a reasonable period of time from the date the appeal is filed. The city shall provide written notice to the applicant of the time and date of the hearing. The city council or its designee, at its discretion, may affirm, reverse or modify the city manager's decision and impose any

conditions it deems proper. The decision of the city council shall be final. (Ord. 2151 § 1, 1991)

13.06.100: FAILURE TO COMPLY:

Violation by any customer of the water use prohibitions of this chapter shall be penalized as follows:

A. First Violation; Notice Of Noncompliance: The city manager is authorized and directed to issue a written notice of noncompliance to any water user who, in the reasonable judgment of the city manager, has failed or refused in a significant way to comply with those water use curtailment provisions of this chapter currently in effect. Any such notice of violation shall specify the time, place and manner of noncompliance, and shall specify a reasonable period to achieve compliance. Any notice of noncompliance shall be directed to the customer of record for the premises where the noncompliance was observed. Delivery may be through regular mail or by personal delivery with a declaration of delivery returned to the city manager.

B. Second Violation; Warning Of Penalties: For a second violation by any customer of the water use curtailment provisions of this chapter currently in effect, a written warning notice of the future imposition of penalties on the customer's water bill shall be issued. Any such warning notice shall specify the time, place and manner of noncompliance and shall require compliance within two (2) days. Any warning notice shall be directed to the customer of record for the premises where the violation has occurred. Delivery will be made by personal delivery with a declaration of delivery returned to the city manager.

C. Third Violation; Imposition Of Penalties:

1. For a third violation by any customer of this chapter, a citation shall be issued and a surcharge imposed on the customer's next regular water bill. The surcharge shall consist of a percentage of the customer's commodity charge as shown on the most recent water bill, based upon the water conservation stage then in effect at the time of the most recent violation. The penalty surcharge for each stage is shown below:

Stage II		25 percent
Stage III		50 percent
Stage IV		75 percent

As an example, if a water user's most recent commodity charge is twenty five dollars ($25.00), a third violation while the city is in stage III would result in the imposition of a twelve dollar fifty cent ($12.50) surcharge.

2. If a water customer cited for a third violation fails or refuses to comply with the requirements of this chapter or to pay any outstanding water bills including surcharges, the city manager is hereby granted discretionary authority pursuant to California Water Code section 375 to cause a flow restricting device to be installed at the meter to reduce water availability to the customer's service address. Pursuant to California Water Code section 35423, if installation of a flow restrictor is infeasible, impractical or is unlikely to induce compliance with this chapter, the city manager may authorize a shutoff of service to the premises involved. (Ord. 2151 § 1, 1991)

13.06.110: HEARING REGARDING VIOLATIONS:

A. Any customer receiving notice of a second or subsequent violation pursuant to section 13.06.100 of this chapter shall have a right to a hearing by the city manager within fifteen (15) days of mailing or other delivery of the notice of violation.

B. The customer's written request for a hearing within the fifteen (15) day period shall automatically stay the imposition of monetary penalties on the customer's water bill until the city manager renders his decision. The decision of the city manager shall be final and not subject to further appeal pursuant to this code. (Ord. 2751, 2011)

13.06.120: CITY MANAGER DELEGATION:

The city manager may delegate all duties and responsibilities hereunder. (Ord. 2151 § 1, 1991)

13.06.130: SEVERABILITY:

If any provision, section, subsection, sentence, clause, or phrase of this chapter, or the application of same to any person or set of circumstances is held to be unconstitutional, void, or invalid, such decision shall not affect the remaining portions of this chapter which

shall remain in full force and effect, and all provisions of this chapter are declared to be severable for that purpose. (Ord. 2151 § 1, 1991)

13.06.140: INCOMPATIBLE PROVISIONS:

To the extent any provision of this chapter is incompatible with or at variance with any prior adopted ordinance or resolution, the provisions of this chapter shall take precedence, and all prior ordinances and resolutions shall be interpreted to harmonize with and not change the provisions of this chapter. (Ord. 2151 § 1, 1991)

13.06.150: PUBLIC HEALTH AND SAFETY NOT TO BE AFFECTED:

Nothing in this chapter shall be construed to require the city to curtail the supply of water to any customer when such water is required by that customer to maintain an adequate level of public health or public safety. (Ord. 2151 § 1, 1991)

13.06.160: EXEMPTION FROM CALIFORNIA ENVIRONMENTAL QUALITY ACT:

The city council determines that the adoption of this chapter and implementation of the measures set forth herein are exempt from review under the California environmental quality act[1] because it is an action taken to mitigate or prevent a water shortage emergency, and to protect natural resources. The city council directs the city manager or his designee to prepare and file a notice of exemption as soon as possible following adoption of the ordinance codified in this chapter. (Ord. 2151 § 1, 1991)

PREFACE

Impacts from hazards are a challenge to jurisdictions, its leaders, and its citizens. After catastrophic disaster events communities can experience power outages, loss of telecommunications and water service, limited access to fuel, and closed roadways in addition to significant damage to buildings, mass injuries, and loss of life. Depending on the magnitude of the event, recovery from these events can take weeks, months, and in some instances, years. The goal of many communities is to reduce the potential impacts thus shortening the recovery time. In emergency management, this is generally called mitigation.

Mitigation is defined by the Department of Homeland Security (DHS)-Federal Emergency Management Agency (FEMA) as "*any action taken to reduce and/or eliminate the long-term risk to human life and property from natural hazards*." Mitigation is one of the primary phases of the Disaster Cycle and is the only phase specifically dedicated to breaking the cycle of damage. The goal of mitigation is to build resiliency within the community; enabling a more efficient and effective response to and recovery from disasters.

To assist communities become more resilient to hazards, FEMA developed a program and guidance around the creation of Local Hazard Mitigation Plans (LHMPs). LHMPs promote a comprehensive planning process, requiring an assessment of local capabilities against impacts from hazards in order to identify potential projects and/or strategies.

With an approved and adopted LHMP, cities, counties, and special districts are eligible for Federal Hazard Mitigation Assistance (HMA) grants offered through FEMA: Hazard Mitigation Grant Program (HMGP), Building Resilient Infrastructure and Communities (BRIC; formerly Pre-Disaster Mitigation- PDM), and Flood Management Assistance (FMA). The HMA grants are a great source of funding to help implement local mitigation actions identified in the LHMPs.

This update to the City of Redlands LHMP built upon previous mitigation efforts in the City and incorporated new, relevant information into the plan. Part of this update process also includes reassessing and reevaluating: local capabilities (personnel resources, governance, technical skills, and fiscal resources); community hazards (identification, impacts, and prioritization); and mitigation goals, objectives, and measures/actions. Significant consideration was given to acknowledging new (and existing) challenges and issues facing the City (i.e., pandemic, extension of the commuter rail, civil disturbance, technology disruption, wind driven wildfire events). During this update, the City tried to take a more comprehensive, strategic approach to the LHMP. This led to reorganizing the plan and also adding, renaming, and expanding hazards and mitigation actions.

Because the LHMP must include information to meet federal requirements and guidance it includes information not traditionally found in other planning documents. This can lead to a large, cumbersome document, making it difficult to easily access specific information. In an attempt to ensure the LHMP contains all required information and is user-friendly; it has been organized as follows:

Chapter 1: ***Introduction***- provides information on the purpose of the plan, outlines the scope of the work, and presents the adoption process and authority.

Chapter 2: ***Planning Process***- provides information on the methodology used to prepare the LHMP, including a list of the Planning Team members and the public outreach efforts.

Chapter 3: ***Community Profile***- provides background information on the City, ensuring all Planning Team members have a common understanding of the dynamics within the community.

Chapter 4: ***Capability Assessment***- provides information on the current mitigation efforts by the City, including department roles and responsibilities, existing plans/programs/codes, and available funding.

Chapter 5: ***Hazard Assessment***- provides information on hazards within the City and assesses the priority of each hazard.

Chapter 6: ***Risk Assessment***- provides information on the potential impacts, through exposure and loss (damage) estimates for each hazard within the City.

Chapter 7: ***Mitigation Strategies***- provides information on the actions/projects the City is proposing to address the vulnerabilities to the high-risk hazards within the City.

Chapter 8: ***Plan Administration***- provides information on how the City intends to keep the LHMP current, incorporate it into other efforts, and share it with the public.

1 INTRODUCTION

The Local Hazard Mitigation Plan (LHMP) is a "*living document*" that should be reviewed, reevaluated, monitored, and revised to reflect changing conditions and new information. As required, the LHMP must be updated every five (5) years to remain in compliance with regulations to receive Federal Hazard Mitigation Assistance (HMA) grants. The City of Redlands has had several approved and adopted LHMPs, the latest being in 2015. This LHMP is an update to the 2015 City of Redlands LHMP.

1.1 PURPOSE OF THE PLAN

The purpose of this plan is to outline a mitigation strategy to help reduce and/or eliminate impacts from hazards within the City of Redlands.

1.2 SCOPE OF THE PLAN

The scope of this plan is to: 1) assess relevant existing conditions and capabilities within the City; 2) identify potential hazards and their impacts within the City; and 3) propose mitigation actions to address the impacts to the high-priority hazards within the City. In support of the above scope, this update will: evaluate mitigation progress since the approved and adopted LHMP: implement and document a comprehensive planning process: present actions to maintain and integrate the LHMP with other City plans: and, establish methods to continuously inform and educate the public on hazards and potential actions that can be taken to reduce and/or eliminate impacts.

1.3 HAZARD MITIGATION PLANNING DIRECTIVE

In 2000, the Federal Emergency Management Agency (FEMA) adopted revisions to Title 44 of the Code of Federal Regulations (44 CFR). This revision is known as "Disaster Mitigation Act (DMA) 2000". Section 322 (a-d) of DMA 2000 requires that local governments, as a condition of receiving federal disaster mitigation funds, have an approved and adopted Hazard Mitigation Plan (HMP) that describes the process for assessing hazards, risks and vulnerabilities; identifying and prioritizing mitigation actions; and soliciting input from the community (public), key stakeholders, and adjacent jurisdictions/agencies.

1.4 PROMULGATION AUTHORITY

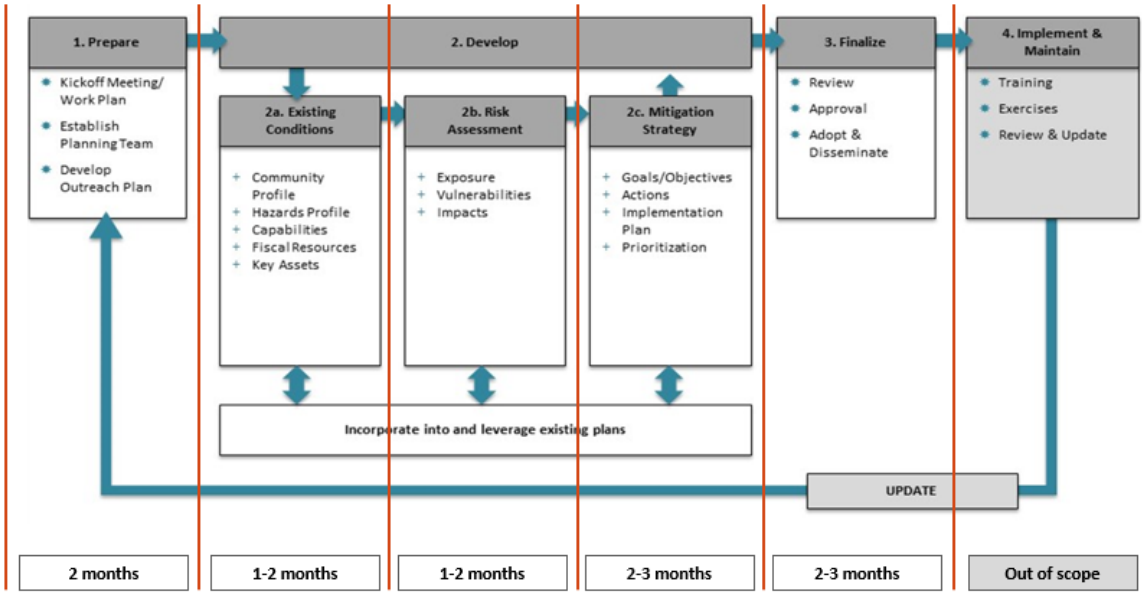
The City Council is the legislative body of the City of Redlands. It decides policy for the municipal government, enacts laws, and oversees all activities of the City. The City Council also serves as the governing body of the City of Redlands Redevelopment Agency. The promulgation authority is vested in the members of the City Council. A list of the members of Redlands City Council include:

Mayor	Paul Barich	***Council Member***	Paul Foster
Mayor Pro Tem	Eddie Tejada	***Council Member***	Denise Davis
		Council Member	Jenna Guzman-Lowery

1.5 LOCAL HAZARD MITIGATION PLAN ADOPTION

The update of the City of Redlands LHMP was reviewed and adopted by the City Council on November 16, 2021, under Resolution 8268. A copy of the Resolution is in **Appendix 1**.

2 PLANNING PROCESS



2.1 OVERVIEW

This section demonstrates the methodology used by the City of Redlands to develop the LHMP. FEMA's LHMP development guidance outlines recommended actions, emphasizing involving the "*whole community*" in the planning process. The whole community concept promotes the inclusion of not only emergency managers but other City department representatives (e.g., zoning, floodplain management, public works, community, and economic development), as well as, outside partners (e.g., surrounding counties/cities, special districts, lifelines companies, businesses leaders) to participate in the LHMP effort. The concept also includes outreach to the general public to bring awareness to community hazards and the planning effort. Soliciting and considering input from diverse interests is essential to building a comprehensive plan and gaining community-wide support for the plan.

2.2 METHODOLOGY AND TIMELINE

To complete the update of LHMP, the City of Redlands incorporated a three (3) phase planning process: 1) Prepare; 2) Develop; and, 3) Finalize (**Figure 2.1**). Phase 2- Develop, has three (3) sub-phases that establish the current conditions, determine the risk and vulnerabilities, and identifies strategies and projects. In addition to the phases, Figure 2.1 also depicts the timeline to complete the project. While this methodology is in alignment with the FEMA guidance, sequence and naming of phases were adjusted to better suit the City of Redlands' needs.

Figure 2.1- Planning Methodology

Under the *Prepare* phase general project tasks were completed. This included conducting an Administrative Kickoff meeting with the consultant, validation of the Planning Team, an identification of the Public Outreach effort, and a Kickoff meeting with the Planning Team.

As mentioned, the *Develop* phase had three (3) sub-phases. During the Existing Conditions sub-phase, the Planning Team confirmed current City mitigation capabilities, including identification of departments supporting mitigation, current governance guiding mitigation efforts, identification of fiscal resource availability to possibly support mitigation, discussion of key assets, and identification and description of local hazards within the City. Under the Risk Assessment sub-phase, the Planning Team reviewed exposure and impacts of hazards within the City; and prioritized hazards. The final sub-phase, Mitigation Strategies, had the Planning Team discuss previous mitigation efforts, identify and prioritize new mitigation projects, and develop an implementation plan for each project.

Throughout the *Develop* Phase, plans and other documents, both internal and external, were also analyzed and leveraged to ensure decisions were based on the best available information and that proposed actions were compatible with other efforts. And conversely, efforts were made to encourage results from the LHMP planning process were considered and incorporated into other planning efforts.

The last phase of the planning process methodology was *Finalize*. During this phase the Planning Team reviewed and provided additional comments on the complete LHMP before being forwarded to the California Governor's Office of Emergency Services (Cal OES) and FEMA. This phase also included addressing both Cal OES and FEMA comments and working with the City Council to adopt the LHMP.

During the planning process, draft LHMP sections (i.e., Capabilities, Hazards, Risk, Mitigation Strategies) were disseminated for review and comment as the Planning Team moved through each phase and sub-phase. This helped the Planning Teams focus their review on the subject matter at hand and enforced the relationship between the phases. At the end of the planning process, another review cycle was provided, this time with all draft sections under one cover.

2.3 PLANNING TEAM

Building on the whole community concept, a Planning Team was established to assist with the updating of the City of Redlands LHMP. The primary goal of the Planning Team is to help define and identify the strategies within the LHMP. The Planning Team was led by representatives from the City of Redlands Fire Department. The City of Redlands Fire Department representatives took on the responsibilities of Project Manager and facilitated and coordinated Planning Team activates. Additionally, the City of Redlands Fire Department hired a consultant to provide technical support and prepare the final updated LHMP.

2.3.1 MEMBERS

The Planning Team was comprised of subject matter experts who could provide great benefit to the team or represented specific topics covered by the LHMP. Leveraging the list of Planning Team members during the last update to the LHMP, the City of Redlands Fire Department and its consultant evaluated and confirmed the list of Planning Team members. An email invite was sent out to each Planning Team member and a series of follow-up telephone calls were conducted to discuss to project and confirm participation. Keeping the Planning Team to a manageable number of members while ensuring that all perspectives are captured and/or included in the process is challenging. To balance this, the Planning Team members were urged to act as liaisons to community groups with whom they regularly interact with, exchanging thoughts on the LHMP with other groups in the community. Planning Team member

were encouraged to communicate the direction and status of the planning effort to their outside members and in return they were expected to bring outside perspectives to the Planning Team. The City of Redlands took great efforts to engage and include as many Planning Team members as possible. A list of the Planning Team members can be found in **Appendix 2**.

2.3.2 MEETINGS

There were a series of meetings held with the Planning Team. Each meeting had a primary focus and provided an opportunity to discuss/review information and exchange ideas. Below is a list of the Planning Team meetings (**Table 2.1**) and Planning Team member attendance at each meeting can be found in **Appendix 3**:

Table 2.1- Planning Team Meetings

Date	Purpose of the Meeting
Jun 16, 2020	Project Kickoff- Discussed: Goal/Objectives of LHMPs, Type of Information Needed, Role of the Planning Team, LHMP Update Process, Public Outreach Effort, and Project Timeline
Aug 18, 2020	Prepare- Discussed: 1) relationship between EOPs and LHMPs, 2) FEMA Review Tool, 3) 2015 LHMP sections- Community Profile, Capabilities, Key Assets, and Hazards. Solicit feedback on draft LHMP sections
Sep 21, 2020	Existing Conditions- Discuss: 1) Key Assets, and 2) Hazards (Identification). Solicit feedback on draft LHMP sections
Oct 19, 2020	Existing Conditions- Discuss: 1) Key Assets, and 2) Hazards (Priority). Solicit feedback on draft LHMP sections
Nov 16, 2020	Existing Conditions- Discuss: 1) Hazards (Profiles, Priority). Solicit feedback on draft LHMP sections
Jan 14, 2021	Risk Assessment- Review of Hazard 1) Exposure, 2) Impacts, and 3) Prioritization. Solicit feedback on draft LHMP sections
Mar 16, 2021	Mitigation Strategies- Review of 1) Previous Projects, 2) Previous Goals/Objectives, and 3) Identification of New Projects
Apr 07, 2021	Mitigation Strategies- Discussion of 1) New Projects, and 2) Project Implementation Plan
May 25, 2021	Draft Plan- Review of draft LHMP; including Public Comments
Sep 16, 2021	*Draft Plan*- Review of Cal OES/FEMA Comments on draft LHMP. Discuss next steps

2.4 COMMUNITY STAKEHOLDER INVOLVEMENT

2.4.1 RECURRING COORDINATION

The City of Redlands attends and coordinates several meetings with community stakeholders focused on Emergency Management topics (i.e., response, recovery, mitigation, preparedness, prevention). Prior to the LHMP update process, the City leveraged these meetings to announce and discuss the City's intent to update its LHMP and solicit participation from stakeholder representatives. Many these stakeholder meetings are organized by San Bernardino County Fire Department Office of Emergency Services (OES). The San Bernardino County Fire Department OES leads the San Bernardino Operational Area (OA) efforts. It's role as lead is to support local governments response and recovery operations. The San Bernardino County Fire Department OES also encourages coordination across local governments and community stakeholders. Some of these efforts include:

- San Bernardino County OA Stakeholder Group- meetings focused on maintaining, coordinating, and updating the OA Multi-hazard LHMP and the individual city LHMPs
- Critical Route Planning Committee- has a committee that develops and validates countywide routes and alternate routes for use in evacuating residents from a disaster area while simultaneously allowing first responders' access into a disaster area without congestion and gridlock.
- California Governor's Office of Emergency Services Annual Exercise- coordinates the OA's participation in the exercise. The purpose for participation is to better prepare for regional, catastrophic events, ensuring an effective multi-agency/multi-jurisdictional response.

The City of Redlands also meets quarterly with the Voluntary Organizations Active in Disasters (VOAD) group. The San Bernardino County chapter of the VOAD group is a community network of non-partisan membership organizations that serves as the forum to share knowledge and resources to help communities prepare for and recover from disasters. Further, VOAD fosters efficient delivery of available member resources to persons with unmet needs affected by disaster.

At the local-level, the City of Redlands meets with faith-based organizations monthly. This group coordinates all faith-based organizations in the City of Redlands. The group supports positive interfaith relationships, enhance non-violent attitudes & behavior, support peace & promote goodwill in the Redlands Community. During Disasters this group supports the city not only in having volunteers, but also in being the emotional and religious support.

2.4.2 STAKEHOLDER MITIGATION RELATED PLANNING RESOURCES

To ensure consistency within the region, the City of Redlands Fire Department and its consultant ensured the Planning Team reviewed and was aware of the state HMP and several LHMPs from surrounding jurisdictions. This list included:

- State of California Hazard Mitigation Plan
- San Bernardino County Multi-Jurisdictional Hazard Mitigation Plan
- Yucaipa, City of
- Loma Linda, City of
- Colton, City of
- Riverside County Multi-Jurisdictional Hazard Mitigation Plan
- Calimesa, City of

While not technically considered a mitigation plan, the Planning Team also reviewed available Emergency Operations Plans (EOPs) and the General Plan Safety Elements from the jurisdictions above. The value of reviewing EOPs is to understand how the City of Redlands and other communities within the region will respond to events and the type of equipment and facilities they will be reliant upon. Gaining this perspective, the Planning Team was able to incorporate these considerations into its LHMP. Although there is a concerted effort to incorporate LHMP information into the General Plan Safety Elements, that is not always the case. A review of the Safety Elements can provide additional insight into hazards within the community and present a closer tie to community-wide goals and objectives.

2.5 PUBLIC OUTREACH

For the purposes of the LHMP, the public is defined as any person within the jurisdiction or adjacent areas, not part of the Planning Team, not acting in an official capacity of a recognized form or level of government. There were two (2) different Public Outreach campaigns used during the City of Redlands LHMP update process: the first informing the community of the efforts to update to the LHMP and the second educating the community of hazards and mitigation actions. Below is a summary of the campaigns:

2.5.1 LHMP AWARENESS CAMPAIGN

This campaign presents the strategy of how the City of Redlands engaged the public during the LHMP update process. A significant piece of the FEMA's LHMP guidance is to ensure the "*whole community*" is involved. A significant element of FEMA's "*whole community*" concept is the general public.

The public outreach strategy worked in conjunction with LHMP planning process and timeline. As the Planning Team completed critical milestones, key information was disseminated to the public for consideration and input. Because of the pandemic (COVID), there were limited options and opportunities to reach out to the public. All public outreach efforts were done virtually. The City of Redlands held two (2) public meetings: one (1) at the start of the project; and, one (1) at the end of the project. In between, there were a series of status update provided through the city website, keeping the general public aware of the progress and status of the project.

This outreach strategy shared information about the project kickoff, hazards and potential impacts within the community, current mitigation capabilities, and proposed mitigation actions. The information was shared through presentations, status updates, and handout materials, through meetings, social media platforms (Facebook, Twitter, Instagram, LinkedIn, Nextdoor), media (print, broadcast), and other announcements.

For the update process, the City of Redlands leveraged the existing City Disaster Council to engage the public. The Disaster Council holds regular, ongoing meetings with the public and its purpose was in alignment with the LHMP efforts. On October 8, 2020, the City of Redlands issued a press release, via email and the city website, announcing the LHMP as an agenda item for the October 26th Disaster Council meeting. The Disaster Council agenda is also disseminated to registered users and the general public.

A second Public Outreach meeting was held on April 26, 2021, to provide an overview of the draft LHMP; a meeting announcement went out the beginning of April. The presentation informed the community of the LHMP planning process and the hazards included in the LHMP. The presentation presented an overview of the chapters in the LHMP, highlighting the proposed mitigation actions; inviting the public to review and submit comments on the draft LHMP.

Attendance at the Public Outreach meetings were good considering the challenges from the COVID-19 pandemic and competing priorities. In addition to the COVID-19 pandemic, the community has faced regional wildfires. Presentations were prepared for each meeting to inform the public on mitigation, the LHMP update planning process, and to walk the public through the LHMP content. During the meetings, some comments were received, most requesting clarification of the presentation material. The draft LHMP was made available to the public through the City of Redlands website. The website also provided a function that allowed the public to submit comments on the LHMP after their review. The Planning Team received minor comments during the Public Outreach review period, one requesting to simplify the

material for public use (NOTE: The Planning Team already identified a Mitigation Measure/Action to create mitigation material for public outreach/education purposes). All comments were shared with the Planning Team; and revisions were incorporated into the LHMP where appropriate. The public announcements and presentations for both meetings can be found in **Appendix 4**.

2.5.2 MITIGATION AWARENESS CAMPAIGN

Over past few years, the City of Redlands established both regular meetings and ad hoc meetings/events to educate and exchange information on mitigation within the city. The regular meetings involve the re-establishment of the Disaster Council. The Disaster Council consist of existing groups that support a strong team merging sectors of the community including elected officials, emergency management, first responders, volunteer services, major industry and commercial, healthcare and education. The Disaster Council meets quarterly. Ad hoc meeting/events consist of events run by the city or others that may provide opportunities to share and exchange information about mitigation. The City organized and/or participated in a number of initiatives to inform the public of hazards in the community and discussed possible mitigation actions. The City sponsors and staff information booths at local events, encourages Community Emergency Response Team (CERT) training, and participates in several regular community-based stakeholder and public meetings. The CERT training helps the City educate citizens about hazards and train citizens to be self-sufficient following a major disaster, while staffing information booths provide City staff with the opportunity to provide literature and handouts pertaining to mitigation strategies and emergency and disaster preparedness. The City has also used surveys in the past to determine the level of knowledge local citizens already have about potential disasters and assess areas of vulnerability to various types of disasters. The City also leverages its social media platforms (Facebook, Twitter, Instagram, LinkedIn, Nextdoor), media (print, broadcast), and other general public announcements to disseminate vital information about hazards in the community, relevant programs being undertaken to safeguard the public from the effects of hazards, and actions the public can take to prepare themselves for events.

3 COMMUNITY PROFILE

The purpose of this section is to present an overview of the City of Redlands, providing the Planning Team with a common understanding of the existing conditions and perspective on select aspects within the community. Gaining a common understanding of the existing conditions provides the basis on which the Planning Team can assess the impacts of hazards, as well as, identify needed mitigation actions.

3.1 LOCATION

The City of Redlands is located at the base of the San Bernardino Mountains in southwestern San Bernardino County, eight (8) miles east of the City of San Bernardino, sixty-three (63) miles east of the Los Angeles metropolitan area, and one-hundred- ten (110) miles north of San Diego (**Figure 3.1**). The City of Redlands planning area covers approximately 46 square miles. The planning area covers the City of Redlands (approximately 37.5 square miles), the City's Sphere of Influence (SOI), and an unincorporated County island (referred to as the "Donut Hole). The SOI is represented in light gold (east of the City of Redlands) and the Donut Hole in tan (northwest portion of the City of Redlands) on Figure 3.1.

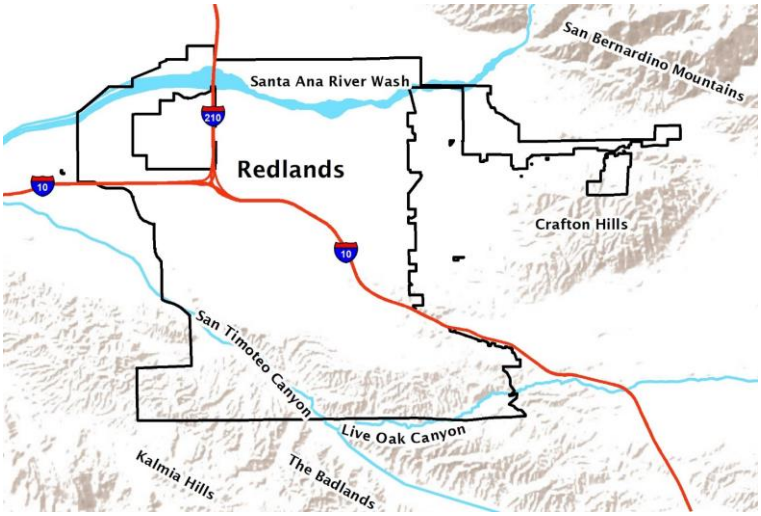

Figure 3.2- Surrounding Jurisdictions to the City of Redlands

3.2 GEOGRAPHY

The City is located in what is known as the East Valley Corridor of the Inland Empire. Surrounding physical features include the San Bernardino Mountains (11,503 feet in elevation) and the Santa Ana River (and/or wash) located on the valley floor at the base of San Bernardino Mountains to the north, the Crafton Hills (3,297 feet in elevation) to the east, and San Timoteo Canyon, the Badlands Mountain range- 2,520 feet, the Kalmia Hills- 2,405 feet and Live Oak Canyon (at base of the San Timoteo Badlands Mountain range) to the south (**Figure 3.3**). Interstate 10 (I-10) freeway which bisects the City east to west, stretches from the Pacific Ocean to Atlantic Ocean; and courses through the major cities of Los Angeles, Phoenix, San Antonio, Houston, Baton Rouge, Mobile, and Jacksonville. The City is also served by State Route 210 which intersects with I-10 Freeway close to the west City limit.

Figure 3.3- Physical Features Around the City of Redlands

There are two (2) principal streams that drain into the City of Redlands, each of presents identifiable flood hazards at peak flows:

- **Santa Ana River/Mill Creek**- The Santa Ana River/Mill Creek emerges from its mountain canyon 5 miles northeast of Redlands, spreads out in shallow, braided channels more than a 1.5-mile-wide wash, mantled with fluvial debris. In 1965, 1966, 1969, 1976, 1980, 1992, 1993, and 1995 the flood waters from the upper regions of the Santa Ana River/Mill Creek were responsible for extensive damage to Orange Street and Alabama Street, ranging from washouts from five to six-foot high flood waters, to extensive, permanent damages from uncontrollable runoff from the upper regions of the San Bernardino mountains.
- **Mission Zanja,** *also known as Mill Creek Zanja and Mission Storm Drain*- The Mission Zanja was constructed for water supply in 1819. Diverting water from Mill Creek, the Zanja carried water for 12 miles to support the San Bernardino Assistance and surrounding farms and ranches. Today, as it traverses an east/west direction, the Zanja drains major portions of the City through various storm drain systems. During significant storm periods, the Zanja poses a serious threat to the community, and is presently being studied by the U. S. Army Corps of Engineers to determine if Corps funding might be available for design and construction of facilities to remove the flood hazard. The Mission Zanja, from the 2800 block of Mentone Boulevard to the west edge of Sylvan Park, is a designated landmark, and part of the National Register of Historic Places.

3.3 HISTORY

Once part of the Spanish Mission lands, Redlands was incorporated in 1888 following an influx of wealthy easterners and mid westerners. Early settlers brought their cultures, traditions and treasures, adding to the City's reputation as a cultural and educational community. Agriculture prospered with the navel orange and many citrus groves still surround Redlands today. More than a hundred years ago the seed which became the city of Redlands was planted by two young Easterners who shared a dream of an idyllic agricultural and residential community.

Redlands was the shared dream of Frank E. Brown, a civil engineer and Yale graduate, and E. G. Judson, a New York stockbroker, who met in Southern California in late 1870's. Naming their Redlands colony for the color of the adobe soil, the two busily laid out a city, brought water from the mountains to the community, introduced the newly discovered Washington navel orange, and recruited settlers. It wasn't long before Redlands proudly proclaimed itself the Navel Orange Capital of the World.

One group of early settlers called itself the Chicago Colony and created what is now the downtown business district. They named the principal shopping street for State Street in Chicago.

In 1889, twins Alfred H. and Albert K. Smiley came to Redlands, and the town was changed forever. The Smiley brothers, well-known educators and resort owners from New York, established a tradition of philanthropy with their donation of the A.K. Smiley public library and park in 1889. Two decades later, the Clarence G. Whites gave the Prosellis at the Redlands Bowl, and Robert Watchorns built the Lincoln Shrine next to the library. These and many others built a city that was known as the "Jewel of the Inland Empire."

The interval from 1920-1930 was another period of growth and prosperity, largely due to the citrus industry. The town's other "industry," the University of Redlands, expanded as well and a general increase in population occurred. Another regional contributor was the establishment of Norton Air Force Base, which remained an active military facility until 1994. Because of Redlands' historic and cultural heritage, the City attracted many commissioned military personnel as residents. The closure of Norton Air Force

Base, coupled with a declining economy beginning in 1990, had a negative impact on the City's economic stability.

3.4 CLIMATE

Redlands' climate is typical of Southern California inland areas. Residents of the City experience mild winters, low annual rainfall, and prolonged, dry summers. (**Table 3.1**)

Table 3.1- Average Temperature and Precipitation in Redlands

3.5 DEMOGRAPHICS

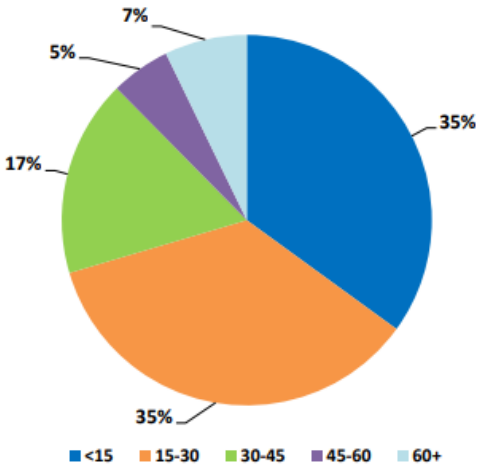
According to the U.S. Census Bureau 2019 estimate, the total population of San Bernardino County is approximately 2,171,600 people. Most of the County's population is in the valley areas located in the southwestern portion of the County. The County's population has grown by approximately 121,690 people (6.4%) since the 2010 population of 2,040,910 persons. This rate of growth was relatively slower than the population growth in three neighboring Southern California counties (Riverside County with 11.3%, San Diego County with 7.7%, and Kern County with 6.6%), but much higher than the next three other counties in (Los Angeles County with 2.88%, Ventura County with 3.13%, and Orange County 5.62%).

The population in City of Redlands is estimated to be 71,513 (US Census, 2019 estimate), slightly up from the 2018 estimate of 71,196. The City of Redlands 2019 population estimate represents approximately 3.3% of the population residing within San Bernardino County. The City of Redlands population has increased approximately 12% since 2000; lower than the population growth in the San Bernardino County (27.2%) over the same period. The historical population estimates for the City of Redlands are shown in **Figure 3.4**.

Figure 3.4- Historical Population Estimates for the City of Redlands, 2000-2018

Source: California Department of Finance, E-5, 2000-2018

Below are some additional relevant population statistics from the 2019 U.S. Census estimate for the City of Redlands:



- 22.9% under 18 years old
- 15.4% over the age 65
- 61.7% between the ages of 18 and 65
- 25.5% reported speaking a language other than English at home
- 88.9% over the age of 25 are high school graduates
- 38.6% have attained a Bachelor's Degree or higher
- 6.9% over the age of 65 with a disability
- $72,523 median household income
- 13.6% living below the poverty level

In addition to the above information, the Planning Team reviewed information from Southern California Association of Government (SCAG). In 2008, SCAG initiated the Local Profiles which provided a variety of demographic, economic, education, housing, and transportation information about each member jurisdiction and are updated every two years. The SCAG region includes six counties (Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura) and 191 incorporated cities. In addition, the SCAG region is a major hub of global economic activity, representing the 16th largest economy in the world, and is considered the nation's gateway for international trade with two of the largest ports in the nation. Below is some information from the SCAG Local Profile for the City of Redlands (2019):

- 26,973 Housing Units in the City of Redlands (or 3.7% of San Bernardino County)
- 57.5% own their homes, and 42.5% rent
- Mean drive time to work in the City of Redlands is 22.8 minutes (compared to 30.9 minutes for San Bernardino County)

According to the US Census American Community Survey (2017), 70% of the City of Redlands population commute over 45 minutes to work (**Figure 3.5**)

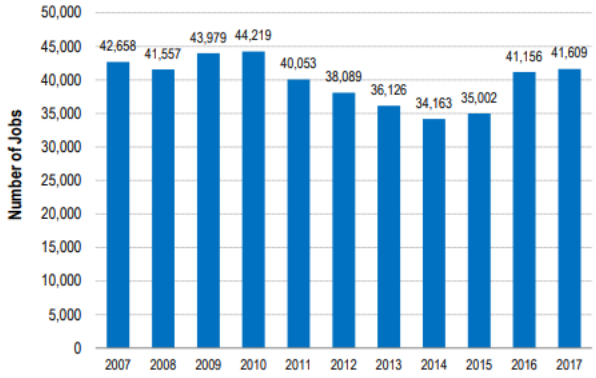
Figure 3.5- Travel Time to Work (minutes) City of Redlands

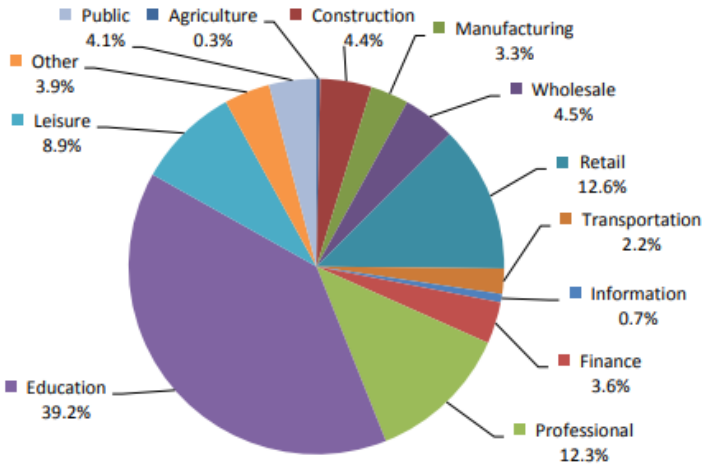
3.6 ECONOMY

According to the SCAG report, the total number of jobs in the City of Redlands is 41,610 (or 5.4% of jobs located in San Bernardino County). The total number of jobs in the City of Redlands reflects a 2.5% decrease (1,049 jobs) from 2007 (**Figure 3.6**). A more detailed breakdown of the jobs in the City of Redlands is depicted in **Figure 3.7**. Below is a summary of some of the larger losses in job sectors since 2007:

- Manufacturing: 1,204 jobs in 2017(a 40.4% decrease)
- Construction: 1,619 jobs in 2017 (a 42.3% decrease)
- Retail: 4,621 jobs in 2017(a 17.7% decrease)
- Professional/Management: 4,510 jobs in 2017 (a 56.7% decrease)

Figure 3.6- Total Number of Jobs in the City of Redlands- 2007-2017





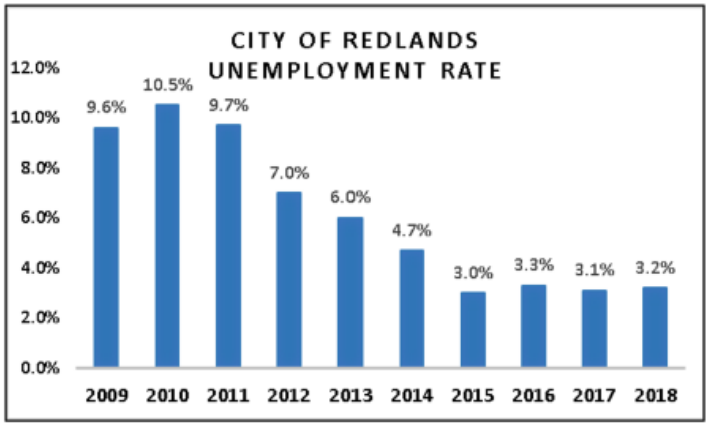


Figure 3.7- Total Number of Jobs in the City of Redlands- 2007-2017

As presented in the Comprehensive Annual Financial Report, The City of Redlands' economy is based largely in the service and trade sectors (health care, retail trade, technology, and education) and light manufacturing. Since 2007-2008, the vacancy rate for industrial and manufacturing space has declined significantly as the City expanded its manufacturing and industrial base. This growth has added to the relative stability of the unemployment rate over the years since the 2007-2009 economic recession.

During that time the unemployment rate rose to a high in 2010 of 10.5%, declining in the following years to reach 3.2% by 2018 (**Figure 3.8**).

Figure 3.8- Unemployment Rate, City of Redlands

3.6.1 MAJOR EMPLOYERS IN REDLANDS AND SURROUNDING VICINITY

Major industries with headquarters or divisions located within the City's boundaries (or in close proximity) include computer technology manufacturers, electrical controls, several financial and insurance institutions, and educational institutions. Within the "Donut Hole"- the unincorporated 1,100-acre island of parcels, located in the northwestern portion of the city, a number of large warehouse distribution centers were developed over the past several, alongside a variety of retail establishments. Major employers in the City and the Donut Hole are presented in **Table 3.2**.

Table 3.2- Major Employers

Employer	Number of Employees

3.7 LAND USE

Land Use in the City of Redlands is guided by the General Plan, Zoning Laws, and Municipal Building Codes. The Land Use element of the General Plan supports opportunities to create a cohesive and attractive image for each district and neighborhood. The City of Redland's Land Use Plan includes three related parts: 1) description of allowed land uses; 2) overlay districts; and 3) the location of allowed land use. **Table 3.3** provides a summary of the permitted Land Uses and the maximum density.

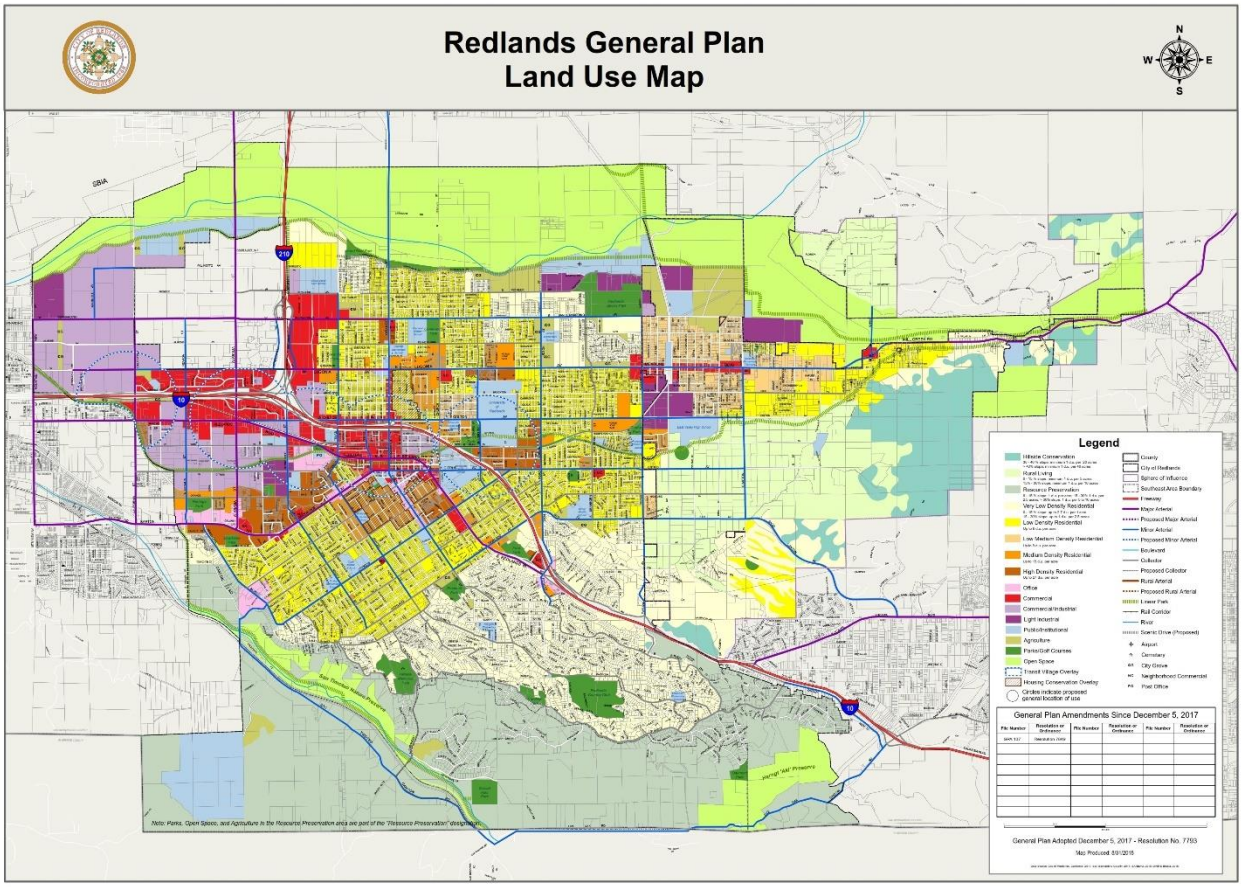

Table 3.3- Land Use Categories

Land Use	Maximum Density
Residential	
Rural Living	*0.2 dwelling unit/gross acre*
Very Low	*2.7 dwelling unit/gross acre*
Low	*6.0 dwelling unit/gross acre*
Low Medium	*8.0 dwelling unit/gross acre*

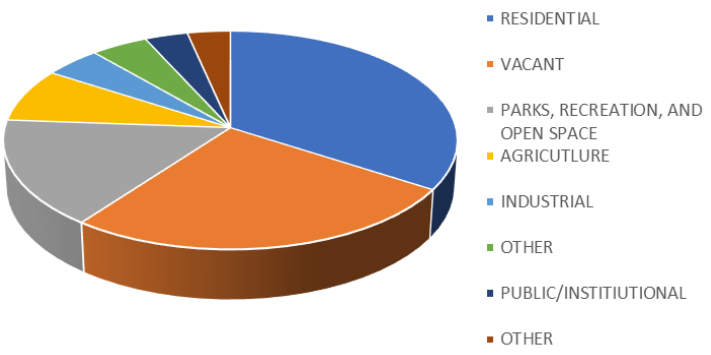
3.7.1 POTENTIAL LAND USE



The Land Use in the City of Redlands consists of the following categories: Agriculture; Commercial; Industrial; Office; Residential; Public/Institutional; Vacant; Parks; Open Space, and Recreational; and other (airport, utilities, parking lots, and water). As presented in the City of Redlands General Plan, the proposed distribution of the land uses within the City limits can be seen in **Figure 3.9**.

Figure 3.9. General Plan Land Use Map

According to the City of Redlands General Plan, the breakdown of Land Use in the Planning Area (**Figure 3.10**) includes: Residential (30%); Vacant (23%); Parks, Recreation, and Open Space (14%); Agriculture (7%); Industrial (4%); Other (4%), Public/Institutional (3%); and Commercial (3%).

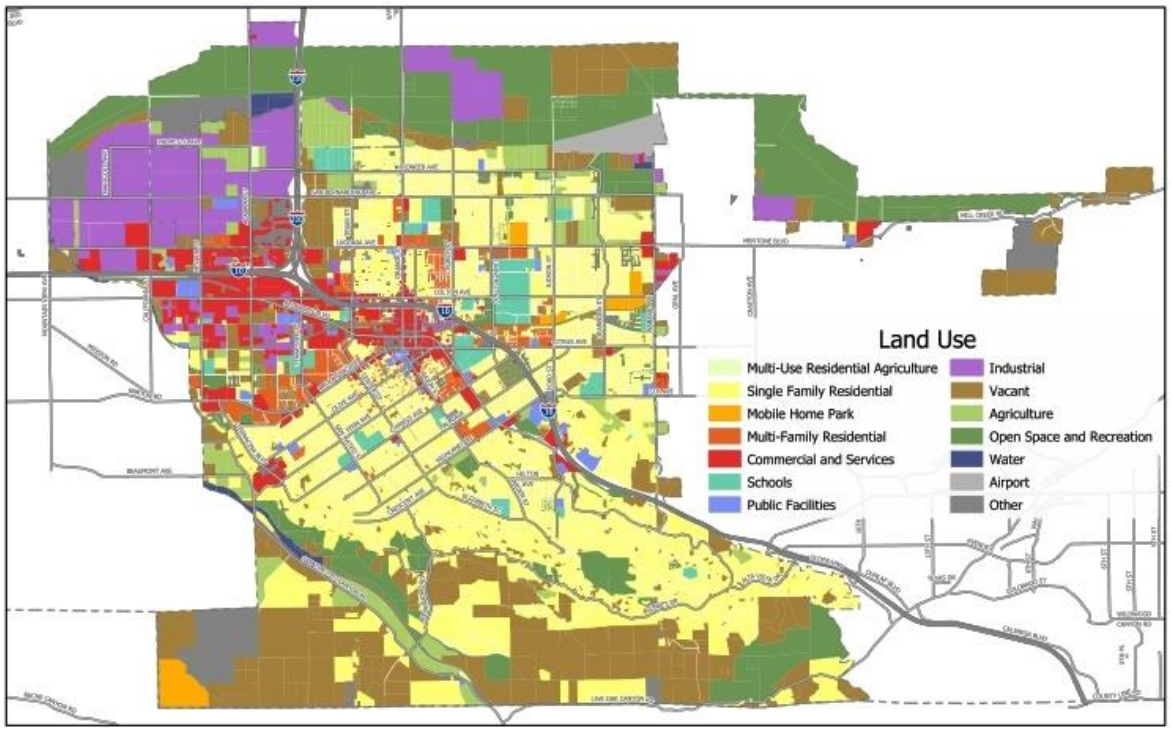


Figure 3.10- Land Use Distribution

3.7.2 EXISTING LAND USE

While the General Plan Land Use illustrates potential buildout of the City, **Figure3.11** depicts the current, existing Land Use within the city.

Figure 3.11- Existing Land Use Map

The LHMP, also leveraged information from the FEMA-sponsored San Bernardino County Essential Facilities Risk Assessment (*SBEFRA*) project. The *SBEFRA* project improved Hazus model default data to better reflect what was currently "on-the-ground" and use it for flood and earthquake loss estimation analysis (damage) and exposure assessment for wildfire. **Table 3.6** presents the "*improved*" Hazus data for City of Redlands.

Table 3.6- Improved Hazus Default Data- City of Redlands

Building Stock	Building Count	Building Replacement Value ($1,000)	Contents Replacement Value ($1,000)	Building Sq. Ft. (1,000 Sq. Ft.)
Residential	19,661	$4,586,535	$2,293,253	39,193
Commercial	790	$2,000,690	$2,077,158	20,969
Industrial	116	$154,116	$231,174	2,020
Other	524	$449,264	$219,703	2,817
TOTAL	**21,091**	**$7,190,605**	**$4,821,288**	**64,998**
Concrete	223	$572,025

Reinforced Masonry	398	$617,472		
Steel	142	$264,195		
URM	59	$73,705		
Wood Frame (Other)	990	$1,406,583		
Wood Frame (SFR)	18,141	$3,820,407		
TOTAL	**21,091**	**$7,190,605**		

3.7.3 DEVELOPMENT TRENDS

Limited incremental growth has occurred within the City of Redlands since the adopted 2015 LHMP. All development occurring over the past few years was constructed in accordance with all local land use, building codes, zoning, and environmental requirements, and applicable State and Federal regulations. Because of the limited growth and rigorous project review over the past five (5) years, there have been no changes to the community's vulnerability.

Because much of the City of Redlands has already been developed, no significant growth is anticipated over the next five (5) years. Projected development is expected to be for small infill and redevelopment projects, not of any significant scale. Many of these sites are concentrated in the East Valley Corridor and Transit Village areas. The City has prepared Specific Plan for both of these areas to ensure measured and safe development.

According to the 2035 General Plan, the projected population at buildout in the City of Redlands is 79,013 persons, with an additional 14,611 persons in the Sphere of Influence (SOI) outside the city's current boundaries. Buildout projections in the 2035 General Plan only factor in the potential maximums based on Land Use and Zoning designations; it does not consider other factors that may limit growth (e.g., downturn in the economy, building material shortages, etc.). At full build-out by year 2035, the General Plan suggests that there may be the following additional types of development: 4,703 new residential structures (2,676 in the City and 2,027 in the SOI); up to 3,135,379 square feet of additional commercial development; up to 300,704 square feet of additional office development, up to 2,943,653 square feet of commercial/industrial development; up to 1,599,503 square feet of additional industrial development; and up to 115,815 square feet of additional public/institutional development. The new 2035 General Plan generally encourages new development to occur on infill lots in core areas of the city (e.g., the Transit

Villages Concept), thereby trying to avoid unrestrained expansion or sprawl around the city's periphery (such as new residential subdivisions in hillside, open space, and high fire hazard areas).

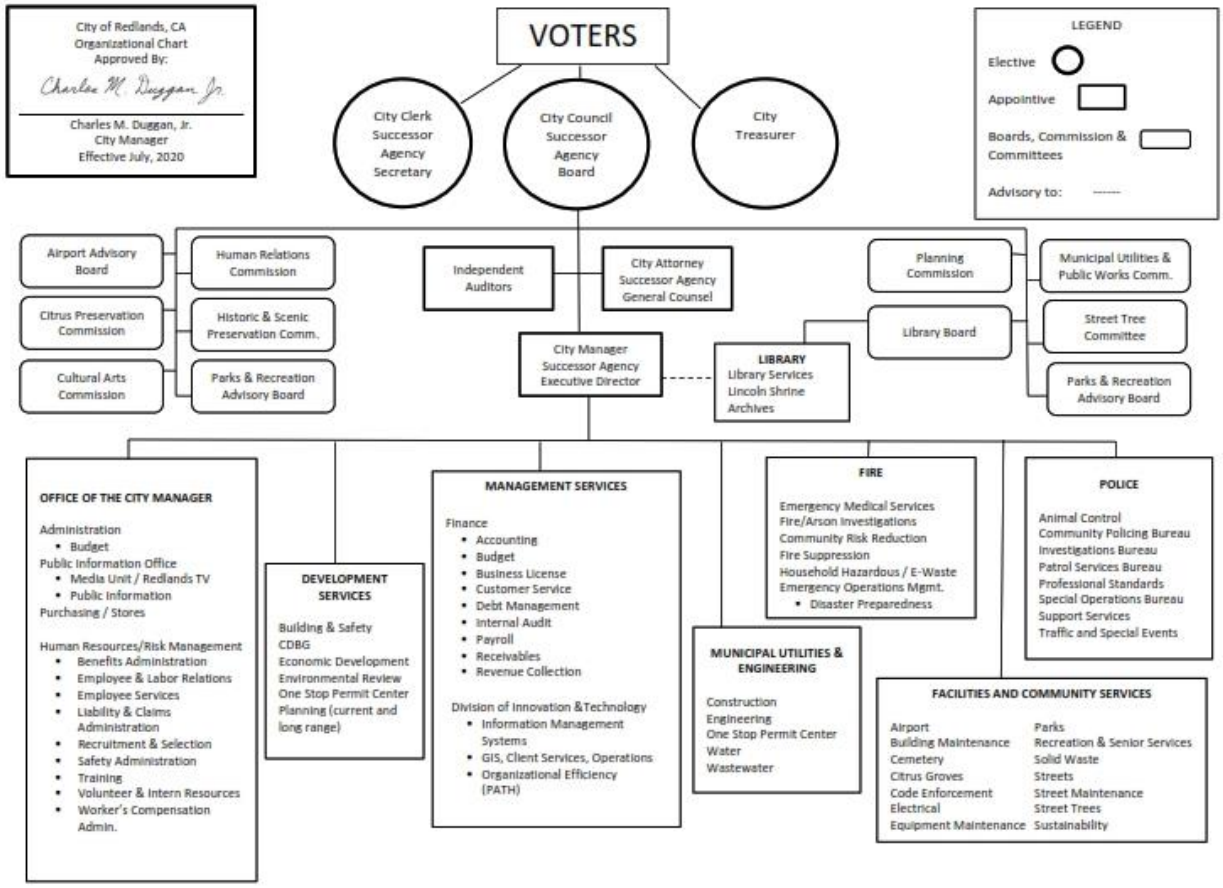
Whether the projections are realized or not, all future development proposed for the City of Redlands will continue to be reviewed to ensure compliance with all relevant land use and zoning regulations, building codes and fire codes, and environmental and engineering standards. Additionally, the LHMP will be referenced during the review of proposed development projects to assess exposure (or risk) to community hazards. The LHMP will also serve as a reference for any suggested mitigation measures to reduce and/or eliminate risk from those hazards.

3.8 KEY ASSETS

A subset of the general building stock are key buildings the City will rely on when responding to and recovering from disaster events. Because of the role and importance of these facilities, the City needs to ensure the facilities are maintained and will be functional during and after disasters. Also, part of these key assets are systems and equipment used to perform certain functions and/or operations. The list of key assets includes, but are not limited to: Police Stations, Fire Stations, City Hall, Water facilities, Hospitals/Medical facilities, airports, Community Centers, Corporate Maintenance Yards, Library and, Schools. A list of Key Assets can be found in **Appendix 5**.

4 CAPABILITY ASSESSMENT

The purpose of this section is to capture the different resources available to the City of Redlands in support of mitigation. In an effort to efficiently demonstrate these resources, the section has been organized by: Personnel Resource; Mitigation Governance Resources; Technical Resources; and, Fiscal Resources.



4.1 PERSONNEL RESOURCES

This sub section demonstrates the City of Redlands capability to dedicate and/or assign, long-term or short-term, workforce to mitigation efforts. There are four (4) primary ways the City of Redlands can provide personnel resources: directly from the City of Redlands government workforce; through Contracts, through Volunteer organizations; through Mutual Aid; and, through Partnerships.

4.1.1 GOVERNMENT

The City of Redlands is a full service, general law city. The major services provided include: Police, Fire, Water, Wastewater, Solid Waste, Engineering, Public Works and Community Development. The City is governed by a five-member City Council, who also chair several Boards, Committees, and Commissions. The City Council is support by the City Clerk's Office, the City Treasurer, and the City Manager. The City Manager oversees the Office of the City Manager staff, Development Services, Management Services, Municipal Utilities & Engineering, Fire, Facilities and Community Services, and Police. The organization structure of the City of Redlands is depicted in **Figure 4.1**.

Figure 4.1- City of Redlands Organizational Structure

While each City department plays a role with regard to emergency Preparedness and Response, not all have a role in Mitigation. The City of Redlands has an established Emergency Management Division under the Fire Department. Below is a summary of the City departments and their role:

- **Office of the City Manager**- The Office of the City Manager oversees the city departments and administers the day-to-day operations of the city. The Office of The City Manager is responsible for maintaining and updating the City's Administrative Policies and Procedures (CAPP) Manual. The policies and procedures contained within CAPP Manual reflect not only the City's values as an employer, but also convey the standards that the City has for its employee. The Office of Human Resources and Risk Management, Public Information Office, and Purchasing are also part of the Office of the City Manager.
  - *Office of Human Resources and Risk Management*- The Office Human Resources and Risk Management supports the over 500 full and part-time employees to provide the highest quality of service to the local community. The Risk Management Division maintains a set of operating principles that serve as the foundation for how we interact with residents, colleagues, employees and other stakeholders.
  - *Public Information Office*- The Public Information Officer (PIO) is responsible for the regular dissemination of public information about the City of Redlands to the media. The PIO hosts press conferences, writes press releases and articles for publication in magazines and newsletters and helps coordinate public events. The Public Information Officer also oversees

the City's Government Access cable TV channels 3 (Spectrum customers) and 35 (Verizon customers). The Public Information Office includes the Redlands TV video unit, which produces original programming regarding municipal services for Redlands TV

- *Purchasing*- City of Redlands Purchasing Division serves as the central acquisition point for equipment and services. The Central Warehouse provides all types of commodities to all City departments. The Division is the sole authority for the purchase of supplies, services or equipment. This division also handles items declared as surplus for redistribution, sale or disposal per the City Municipal Code.

- **Development Services**- The Development Services Department provides quality service to customers through professionalism, integrity and the efficient use of resources. The Department endeavors to enhance and protect the urban and natural environment of the city helping to ensure that Redlands remains an ideal place to live and work. Functional divisions include: Building and Safety; Economic Development; and, Planning.
  - *Building & Safety*- conducts building inspections, plan review and permit processing
  - *Economic Development*- business attraction and retention, workforce development and tourism promotion
  - *Planning*- land development, application review, general plan, specific plan, long-range planning and historic preservation) as well as the administration of the Community Development Block Grant (CDBG) Program
- **Management Services**- The Management Services/Finance Department is comprised of the divisions of Finance, Revenue, Utility Billing Customer Service, Geographic Information Systems (GIS) and Innovation & Technology
  - *Finance Division- performs the functions of administration, accounting and budgeting, payroll, accounts payable and accounts receivable. Other responsibilities of the division include administration of all City related debts/bonds, preparation of regular financial analysis, responsibility for the annual budget process and spending oversight, performance of periodic internal audits of City operations, as well as coordination of the City's annual audit and preparation of all related reports as required by law.*
  - *Revenue- responsible for the collection of all fees, taxes and penalties owed to the city, safekeeping of the funds invested, and deposited in various financial institutions.*
  - *Utility Billing Customer Service- provides accurate and timely billing for water, wastewater, solid waste, street cleaning and household hazardous waste services. In addition to providing billing services, the Customer Service Division is a cross-functional team that provides assistance to customers for information on their utility bill.*
  - *Innovation & Technology*- includes both the Information Technology (IT) and Geographic Information Systems (GIS)
- **Municipal Utilities & Engineering**- is organized into several divisions which include capital improvement engineering services, land development engineering, water and wastewater operations and maintenance and utility administration. Municipal Utilities & Engineering (MUED) plans, designs and constructs Redlands' physical infrastructure for the residents and businesses in the City, making it a desirable place to live, work, and visit. MUED is responsible for delivering the following services to the City's residents and businesses:
  - *Utility Operations: water production and distribution; non-potable water distribution; and wastewater collection, treatment, and disposal*
  - *Engineering review and inspection of development proposals for compliance with State and City codes, standards, and other governmental requirements relating to land subdivisions, grading, drainage, and improvements within the City right-of-way*

- *Management, rehabilitation, and replacement of infrastructure such as water mains, sewer mains, storm drains, streets, and traffic signals to provide reliable service to the community*
- *Development and construction of new public facilities to protect and enhance Redlands' livability*
- *Floodplain Management- administrators of the National Flood Insurance Program (NFIP)*

- **Fire**- mission is to provide a safe, professional and courteous team that strives to exceed the expectations of the community and our organization. This mission requires our members to be part of a capable, aggressive, all-risk fire department that is focused on "Preserving the Past and Protecting the Future" of those we serve. The Fire Suppression & Operations Division of the Fire Department is responsible for putting out fires, emergency rescues and medical emergency response.
  - *Hazardous Materials Response Team*- consists of eighteen (18) active members, with ten (10) members trained to the "Specialist" Level, and eight (8) members trained to the "Technician" Level. All trained personnel are also members of the San Bernardino County Inter-Agency Hazardous Materials Response Team, and respond countywide, through a countywide mutual aid agreement. Personnel maintain their skills by attending monthly training sessions. Redlands is covered by the LEPC for California Region VI (CA05), located in Hemet. The City is a member of a Countywide Hazardous Materials Response Team. As a part of this, all City of Redlands Fire Department field employees are trained in Hazardous Materials First Responder Certifications. The Countywide team would provide a response if the level of hazard were above the certified level of City Staff. From there, the County Hazardous Materials response team would provide for the evacuation, mitigation and facilitation of cleanup efforts in the event of an accidental release of hazardous materials.
  - *Community Risk Reduction*- Operating under the direction of the Fire Chief, and guided by the California Fire Code (CFC), the goal of the Fire Prevention Division is to safeguard the community from fire through programs ensuring adherence to fire regulations, public education, and mitigation.
  - *Emergency Management*- Emergency Management coordinates all activities related to disaster planning, response, recovery and mitigation (Ord. 2639 § 1, 2006: Ord. 2485 § 3, 2002). The Emergency Management's focus under mitigation is identifying, analyzing potential hazards, and recommending appropriate countermeasures.
- **Facilities and Community Services**- ensures residents, businesses and visitors enjoy City services and facilities including parks, recreation and senior services, trees, City-owned groves, solid waste removal and recycling, code enforcement, the maintenance of street lights, traffic signals and streets as well as oversight of the Downtown area, Redlands Municipal Airport and Hillside Memorial Park Cemetery. All services and support are coordinated under comprehensive Green Initiatives.
  - Citrus Division- The City's citrus operation operates as an enterprise fund. The revenue received from the harvesting of the crops is used to continue the care of maintenance of the groves. The City of Redlands owns 21 citrus groves throughout the city totaling 184 acres. They include Valencia Oranges, Navel Oranges, Ruby Star Grapefruit, and Rio Grapefruit
  - *Code Enforcement*- The Code Enforcement Division is dedicated to enhancing the quality of life for the residents of Redlands by enforcing local Building, Zoning and Public Nuisance Ordinances. This Division is responsible for enforcing codes which address public health and safety issues, including regulations related to rubbish, garbage, specific nuisances, removal of vegetation, zoning, housing, dangerous buildings, and inoperable and unlicensed vehicles on

private property. Enforcement actions are taken in response to requests for action received from residents.

- *Solid Waste & Recycling Services*- currently services over 20,000 customers for solid waste, green waste, food waste, and recycling services. The Solid Waste Division is seeking new technologies and services which will not only preserve our environment, but provide more efficient and economical collection, recycling, and disposal of waste materials, while meeting all health, safety, and regulatory requirements. In addition to this service, the Division also provides roll-off services for the entire City of Redlands.
- *Streets & Lights Division*- provides general maintenance and repair of 314 miles of street, 90 miles of storm drains, 72 City-owned traffic signals, approximately 5,000 City-owned street lights and routine street sweeping services on public roadways within the City
- *Street Trees*- maintains approximately 53,875 tree sites located within the City's right-of-way. The Trees Division, in partnership with the Redlands Street Tree Committee, is dedicated to the continued enhancement, maintenance, and care of this living asset.
- *Building Maintenance Division*- performs both routine maintenance and emergency service for all City-owned facilities. The Division consists of three (3) full-time and one (1) part time positions and provides a wide range of building maintenance functions maintenance services to approximately 385,000 square feet of City facilities. The Division also administers contracts for various vendors to provide ongoing and/or specialized maintenance services.

- **Police**- dedicated to bolstering the public's trust through accountability to high standards of performance, ethics, transparency, and professional conduct. Strives to serve the community in a fair and just manner.
  - *Community Services Bureau*- reaches out to the residential and business communities to establish and maintain cooperative relationships that keep the City of Redlands a safe and enjoyable community
  - *Traffic Safety Unit*- focuses on Traffic Education, Moving Violations, and Parking Citations. The Patrol Services Bureau is comprised of Patrol, Custody, and the Field Training and Evaluation Program
  - *Special Services Bureau*- is comprised of the following specialized units: Investigations Unit, Multiple Enforcement Team (MET), Street Enforcement Team (SET), Crisis Negotiations Team, K-9 Unit, and the Special Weapons and Tactics (SWAT) Team
  - *Support Services Bureau*- offers a wide variety of services that provide a vital link between the community and public safety personnel within the Police Department and other law enforcement agencies

4.1.2 CONTRACTORS

The City of Redlands is able to hire contract employee. A contract employee is an individual retained by the City for a predetermined time and price. Benefits of hiring contract employees include:

- Ability to hire workers for short-term projects, on an as-needed basis
- Ability to hire highly skilled individuals for which there is no one in-house qualifications
  - *usually little to no downtime as noticed with onboarding new staff*
- Lower overhead operating costs
  - *do not need to pay taxes (social security, workers compensation) or provide benefits (unemployment, health, sick leave, vacation time, retirement or profit sharing)*
  - *usually do not need to provide office space or equipment*

Disadvantages of hiring contract employees include:

- May work for several employers simultaneously and may not be available when needed
- Integrating with City staff can be difficult because of remote working and unfamiliar with city organization and resources

4.1.3 VOLUNTEERS

The City of Redlands has the ability to leverage volunteer workers. A volunteer worker generally means anyone who agrees to work for free, California labor laws narrow in on a more specific definition of a volunteer. According to California Labor Code Section 1720.4, which defines volunteering in California labor law, an individual must perform services freely and without coercion for a civic, humanitarian or charitable purpose to be considered a volunteer. To legally volunteer, an individual must offer her services to a public agency or nonprofit organization. Businesses may not legally utilize volunteers.

California labor law permits the extension workers' compensation to volunteers during their time in service. Workers' compensation is a type of insurance that covers employees in the event of industrial accidents or occupational injury. Often, public agencies will grant volunteers insurance protection under workers' compensation to help encourage volunteering and avoid the potential for lawsuits. In order to be deemed an employee for workers' compensation, the organization -- whether public or private -- usually must declare a volunteer as such prior to an injury incident. Under the law, this declaration should be in writing through a resolution of the governing body of the organization or agency, such as its board of directors.

Unpaid internships are another volunteer opportunity the City can leverage, however, some criteria must be meet. California Labor Relations Department has provided some clarification regarding unpaid internships. Unpaid internships are a type of volunteering that is intended to provide educational opportunities -- and in some cases, school credit -- for volunteers. As of April 2010, the California Labor Relations Department applies six criteria based on federal law when determining the legality of an unpaid internship: 1) the experience must resemble those of vocational schools, 2) the experience is primarily for the benefit of the intern, 3) the intern does not displace a regular employee, 4) the intern's services provide no immediate advantage to the employer, 5) the intern is not entitled to a job at the end of his internship, and 6) both the employer and intern have a mutual understanding that no compensation is expected for the internship.

4.1.4 MUTUAL AID

The City of Redlands has several mutual aid agreements; most focused on emergency management. An emergency management mutual aid agreement defines and formalizes the arrangement to lend assistance across jurisdictional boundaries in situations that exhausted internal resources or there is a need for increased capabilities. Some of the City of Redlands mutual aid agreements are with the state of California. This enables the state to either request or fulfill requests for mutual aid from one region to another; enabling locals to maintain readiness in their region.

4.1.5 PARTNERSHIPS

The City of Redlands has the ability to enter into partnerships with surrounding cities and counties, and outside agencies, special districts, and companies. Partnerships are an arrangement where parties agree to cooperate to advance their mutual interests. In most cases partnerships are done through a

Memorandum of Understanding (MOU) outlining the scope of work, the mission, and roles and responsibilities.

4.2 MITIGATION GOVERNANCE RESOURCES

There are a variety of governance directly related to or influence mitigation efforts. This governance generally falls under: 1) Laws, Regulations, Codes, and Ordinances; 2) Plans, Studies, and Reports; and, 3) Programs. While the intent is to capture City-level information, there are some state-level and/or county-level information that has direct implications on the City. As can be expected, the City has greater ability revise, adjust, add, and remove governance to better reflect needs on governance it sponsors. The City regularly assess and evaluates the effectiveness of its governance and incorporates changes to help meet the intended goal. The City does provide input and comments on governance sponsored by other organizations but because the intended audience of the governance is usually greater than the City, it is not always incorporated. To ensure there is a comprehensive list of governance, relevant state-level and/or county-level information is also captured.

4.2.1 LAWS, REGULATIONS, CODES, AND ORDINANCES

Title: Senate Bill (SB) 379
Sponsor: State of California, Senate
Description: In 2017, the California State Senate approved Senate Bill (SB) 379 which requires the General Plan's Safety Element to address climate adaptation and resilience strategies. This must be done after the next revision to the Local Hazard Mitigation Plan (LHMP) or by January 2022 if the city/county does not have a LHMP. If the jurisdiction has an approved and adopted LHMP it can be summarized and incorporated by reference into the Safety Element.

Title: Assembly Bill (SB) 477
Sponsor: State of California, Assembly
Description: In 2019, the California State Assembly approved Assembly Bill (AB) 477. AB 477 requires local jurisdictions (cities/counties) to include representatives from the access and functional needs population in the next update of the Emergency Plan. The primary focus areas include, but are not limited to: emergency communications, emergency evacuations, and emergency sheltering.

Title: Assemble Bill (AB) 2140
Sponsor: State of California, Assembly
Description: In 2006, the California State Assembly approved Assembly Bill (AB) 2140. AB 2140 enables the state of California to provide greater than 75% of the eligible state share if a local jurisdiction (city/county) has an approved and adopted LHMP as part of the General Plan's Safety Element.

Title: California Building Codes
Sponsor: State of California
Description: The City abides by and is governed by California 2010 Building Codes adopted in February 2014, including sections on electric, plumbing, mechanical, green, and residential requirements, standards and regulations.

Title: San Bernardino County Building Codes
Sponsor: San Bernardino County
Description: An amendment to Title 6 of the County of San Bernardino Building Code to adopt by reference the 2010 Editions of the California Building Standards Codes became effective on January 2011.

Title: California Zoning Ordinance
Sponsor: State of California
Description: The City has adopted a Zoning Ordinances as part of the General Plan process. These ordinances regulate land use and map the official land use and hazard overlay districts, to include safety hazard and environmental protection areas.

Title: Model Water Efficient Landscape Ordinance
Sponsor: State of California
Description: Over the years, the State of California has been promoting water conservation for all new development within the State. In a drought-prone California, where approximately 60 percent of all residential water is used in landscape applications, California lawmakers have adopted such legislation as Assembly Bill (AB) 325 (1990), AB 2717 (2004), and AB 1881 (2006) that outline, and in some instances mandate, the practice of water conservation in landscape applications. As part of AB 325, the Department of Water Resources (DWR) prepare and promote the State's first Model Water Efficient Landscape Ordinance (MWELO). In 2006, State lawmakers adopted AB 1881, which gave guidelines and timelines for revision of the State's MWELO and mandated that every city, county, or other agency within the State of California adopt the State's revised MWELO, or be in compliance with it through their own ordinance, by January 2010. San Bernardino County has adopted and revise Development Code Chapter 83.10 which sets forth landscaping and irrigation standards within the unincorporated areas of the County.

Title: Emergency Planning and Community Right-to-Know Act
Sponsor: State of California
Description: The Emergency Planning and Community Right-to-Know Act (EPCRA) was created to help communities plan for emergencies involving hazardous substances. EPCRA has four (4) major provisions: one (1) deals with emergency planning and three (3) deal with chemical reporting. EPCRA local emergency planning requirements (Sections 301 to 303) stipulate that every community in the United States must be part of a comprehensive emergency response plan. Facilities are required to participate in the planning process. State Emergency Response Commissions (SERCs) oversee the implementation of EPCRA requirements in each state.

Title: Hazard Mitigation Plan Ordinance
Sponsor: City of Redlands
Description: The City of Redlands has adopted Ordinances 2639 and 2485 that require the Emergency Management to be responsible for the development and update of the City of Redlands Emergency Multi-hazard Functional Plan and Hazard Mitigation Plan. Emergency Multi-hazard Functional Plan shall provide for the effective mobilization of all of the resources of the City, both public and private, to meet any condition constituting a local emergency, state of emergency, or state of war emergency. Both plans shall take effect upon adoption by resolution of the city council. (Ord. 2639 § 3, 2006: Ord. 2485 § 4 [5], 2002). The City of Redlands Title 2 – Administration and Personnel Chapter 2.52.150 – Emergency Organization Ordinance 2639).

4.2.2 PLANS, REPORTS, STUDIES

Title: General Plan and Environmental Impact Report
Sponsor: City of Redlands
Description: All cities and counties in California are required to adopt a General Plan that lays out major policy goals. The General Plan includes elements, which are sections that address a variety of important topics. The element most closely related to Mitigation is the Safety and Hazardous Waste Element, which focuses on natural, technological, and other human caused hazards. The aim of the Safety and Hazardous Waste Element is to reduce the potential risk of death, injury, property damage, and economic and social

dislocation resulting from fires, floods, earthquakes, landslides, and other hazards. The Safety and Hazardous Waste Element identifies all significant hazards and risks in a community and defines policies to mitigate and respond to those risks. In addition to ensuring that the General Plan incorporates information from the LHMP in to the Safety Element, the General Plan is also reviewed while producing the LHMP to ensure goals, objectives, and mitigation actions are compatible and in sync with each other.

Title: Emergency Operations Plan
Sponsor: City of Redlands
Description: all-hazard plan describing how the City will organize and respond to incidents. It is based on and is compatible with the laws, regulations, plans, and policies listed above. The Emergency Operations Plan (EOP) also addresses the integration and coordination of resources and activities with other Governmental Agencies, Special Districts, and private-sector partners.

Title: Transit Villages Specific Plan (Draft)
Sponsor: City of Redlands
Description: This Specific Plan provides a "*road map*" for the growth and change for the plan area until the year 2040. It is comprised of unique and customized standards that enable the City to shape or reshape its streets and public spaces and property owners to develop or redevelop their properties according to the vision of the Specific Plan. The Specific Plan area is generally bound to the west by Kansas Street, Redlands Boulevard, Alabama Street, and Tennessee Street; to the north by the I-10 Freeway, Colton Avenue, and Sylvan Boulevard; to the east by Judson Street; and the south by Citrus Avenue, Central Avenue, Redlands Boulevard, Olive Avenue, Brookside Avenues, Ash Street, Pine Avenue, Tennessee Street, and State Street.

Title: Drainage Master Plan
Sponsor: City of Redlands
Description: The Master Plan of Storm Drainage covers the City and adjacent areas that are tributary to the major regional flood control facilities that traverse through the City. The City of Redlands has a long history of flooding during moderate to severe storm events. One of the main causes for flooding is the lack of conveyance capacity in the historical channel of Mission Zanja (Zanja). The Zanja, formerly known as the Mill Creek Zanja, is a surface channel that flows from the Crafton Hills area, west to 9th Street, near downtown Redlands, where it transitions into a box culvert. The Zanja was built by the natives in 1819 as a water-supply, irrigation ditch, pulling flows from Mill Creek. Due to extensive flooding and development, the diversion of flow from Mill Creek was blocked. Nonetheless, the Zanja was never improved to convey local storm flows and the drainage area tributary to the 9th Street storm drain still produces flows that far exceed the capacity of the box culvert, causing extensive flooding through the downtown area.

Title: Strategic Plan: 2014-2017
Sponsor: City of Redlands
Description: Utilizing the City Council's five (5) priority focus areas of Fiscal Accountability, Economic Development, Infrastructure, Land Resource Management, Safety and Community Services, the Strategic Plan highlights activities and accomplishments that City staff will complete in the coming three years.

Title: Existing Conditions Report
Sponsor: City of Redlands
Description: Part of the General Plan. Used to provide background information and technical analysis to inform the planning process. The report describes Redlands' planning context and delves into the topics of land use and development; growth management; demographics and economics; community design; transportation and circulation; parks, recreation, and open space; historic resources; biological resources; hazards; public utilities and services; and noise.

Title: Downtown Specific Plan
Sponsor: City of Redlands
Description: The plan's primary goal is to support the economic vitality of Downtown Redlands, and it seeks to facilitate the development of financial, technical, professional and research-development offices and services Downtown, supported by retail, restaurants, entertainment, and cultural activities. Downtown Specific Plan covers a larger area, including residential and civic areas in south Downtown. The plan also has a new emphasis on mixed-use and transit-oriented development, including guidelines to ensure compatibility with historic buildings. The plan identifies districts and corridors, and provides direction for vehicle and pedestrian circulation, and pedestrian-oriented street design.

Title: East Valley Corridor Specific Plan
Sponsor: City of Redlands
Description: aims to strengthen the local economy, attract major businesses, and result in the orderly and aesthetic development of industrial, commercial, and residential areas in the East Valley Corridor Specific Plan (EVCSP) plan area. The EVCSP plan area is composed of 4,350 acres adjacent to I-10 and I-210, and includes portions of the City of Redlands and the City of Loma Linda, as well as unincorporated area under jurisdiction of San Bernardino County (the "Donut Hole") surrounded by the City of Redlands.

Title: Community Sustainability Plan
Sponsor: City of Redlands
Description: a conceptual framework for sustainability policy related to water conservation, green buildings, waste reduction, climate friendly purchasing, renewable energy, carbon emissions, land use.

Title: Economic Development Action Plan
Sponsor: City of Redlands
Description: identifies strategies to attract businesses to Redlands, retain and expand existing businesses, develop a skilled workforce, and market Redlands to visitors.

Title: Redlands Municipal Airport Master Plan
Sponsor: City of Redlands
Description: Plan in order to preserve investment in the airport, reflect community needs, attract airport tenants and users, preserve the environment, strengthen the economy, and ensure safety.

Title: Climate Action Plan
Sponsor: City of Redlands
Description: demonstrate how the City will comply with State of California's Green House Gas (GHG) emission reduction standards. As a Qualified GHG Reduction Strategy, the CAP will also enable streamlined environmental review of future development projects, in accordance with the California Environmental Quality Act (CEQA)

Title: San Bernardino County Desert Area Groundwater Inventory and Atlas
Sponsor: San Bernardino County Fire Department OES
Description: The San Bernardino County Desert Area Groundwater Inventory (DGI) and Atlas includes a database providing locational and water depth information for specific regions of the County that currently do not have a groundwater inventory. This DGI and Atlas provides information applicable for flood mitigation or ground water availability for usage during severe drought. The location and water depth in the inventory are important for an earthquake hazard analysis, if liquefaction potential exists. California Department of Water Resources will give priority to local agencies with adopted groundwater management plans (SB1938 compliant), and which demonstrate collaboration with other local agencies in managing groundwater basins. County's groundwater management ordinance satisfies this requirement.

Title: Drainage Studies
Sponsor: San Bernardino County Public Works-Solid Waste Management Division
Description: Drainage studies including review of upstream properties, site drainage area, potential upstream development, and site-specific development will help to mitigate damage from future storm events. San Bernardino County owns landfill sites, transfer stations and closed disposal sites where combined site property totals several hundred acres. Landfills and disposal site properties include acreage that has been constructed to design grades and may include improved drainage systems. Also, within most landfill and disposal site properties there are many acres of property that remain in its natural state including native vegetation and natural grades. During severe weather events both engineered areas and undisturbed areas are subject to erosion from storm run-off. The erosion can range from minor to severe depending on the storm event and amount of precipitation. Most sites where engineered drainage systems are in place hold up well experiencing only minor erosion and debris flow. However, during major storm events, runoff from native and unimproved areas carrying solids and debris flow may compromise downstream drainage systems and overwhelm system facilities.

Title: Mass Care and Shelter Plan Concept of Operations
Sponsor: San Bernardino County Fire Department OES/ American Red Cross
Description: Outlines the framework of a new one-stop shelter concept, Shelter Operations Compound (SHOC). It combines a shelter, a Local Assistance Center (LAC) and a Non- LAC Unit in one easy location. Residents can access public information and referral services through the LAC, and then take a short walk to the Non-LAC Unit for communication, postal services, and other private organizations/business at little to no cost. The ConOps also helped to sync local resources, encourage local self-sufficiency, foster partnership between public and private agencies, and serve as a reference document for the region.

Title: Water Conservation Plan
Sponsor: City of Redlands
Description: Chapter 13.06 of the Redlands Municipal Code (RMC), provides guidance on how to reduce the nonessential use of water to conserve city water supplies, thereby minimizing the effect of a shortage of water supplies on city users. The water conservation plan here established is to: 1) protect the health, safety, and welfare of the citizens and property owners of the city; 2) assure the maximum beneficial use of city water supplies; and, 3) attempt to provide sufficient water supplies to meet the basic needs of human consumption, sanitation and fire protection.

4.2.3 PROGRAMS

The City of Redlands currently has the following mitigation programs to address the top hazards which are Flood, Wildfire, Earthquakes, Drought and Hazardous Material. It should be noted that some of these programs were listed under Mitigation Strategy section under the previous LHMP. However, because they are ongoing programs, they have since been removed from the Mitigation Strategy section and only captured here.

Title: Flood Programs
Sponsor: City of Redlands
Description: The City has implemented the Flood Control, ADA Ramps, Sidewalks, Trees and Parks (FAST) Program to inform the City of Redlands residents of funding needs for critical infrastructure and to solicit residents' input regarding the preparation of a possible ballot measure to provide revenue to meet those needs. Community Outreach is done through CERT, Market night and Safety Fairs. There are also Pamphlets provided to residence on flood insurance, and flood preparedness. Redlands has committed to a variety of mitigation measures that will progressively lower flood insurance premiums for those

residents whose properties are located within the floodplain and require the added level of insurance protection provided through the National Flood Insurance Program (NFIP). The City of Redlands has participated with the NFIP since 10/01/2007 and is a class 9. The City of Redlands sends out notifications to residents upon receipt of FEMA Letter of Map Revisions (LOMR) Letters. Residents that reside in flood prone zones are provided brochures about the NFIP. Public notices are published in the San Bernardino County Sun newspaper, Federal Register and Flood Hazard Mapping website. Our continued compliance include: community outreach, LOMR notifications, Flood Insurance brochure and provide FEMA Mapping tools and provide tools on City of Redlands website.

Title: Wildfire Program
Sponsor: City of Redlands
Description: The City has an on-going Vegetation Management and Weed Abatement Program to manage weeds and brush and provided the defensible space (100-foot clearance) for areas prone to wildfire due to high vegetation area.

Title: Earthquake/Geologic Hazard Program
Sponsor: City of Redlands
Description: Since 1982, the City of Redlands has participated in long term recovery programs for earthquakes, wildfires and floods. This program provides continued stability to sustain and continue infrastructure services.

Title: Drought Program
Sponsor: City of Redlands
Description: The City of Redlands is in the process of updating Ordinance 2151 Water Conservation Plan to address drought. The plan will implement a plan to conserve city water supplies, thereby minimizing the effect of a shortage of water supplies on city users.

Title: Hazardous Materials Program
Sponsor: City of Redlands
Description: The City of Redlands in coordination with the County of San Bernardino is providing an outreach program to limit the negative impacts associated with inappropriate discard of hazardous material into the environment. This outreach program will provide community awareness of how to dispose of the hazardous material. The outreach material will be provided at emergency preparedness fairs and fire safety fairs.

Title: Mass Care and Shelter Trailer/Cache Program
Sponsor: City of Redlands
Description: To increase Mass Care and Shelter capability of the county, grants from 2008-2009 Homeland Security Grant Program (HSGP) and 2009 Riverside Regional Urban Area Security Initiative (UASI) funded the Mass Care and Shelter Trailer/Cache Program. In December 2012, the program will have procured 36 trailers/caches equipped with mass care and shelter supplies, strategically placed throughout the County and ready for rapid deployment. It is expected to serve over 7,200 residents. In addition to enhancing the comfort levels of shelter residents, the program will produce standardized documents and protocols for procuring and maintaining Mass Care and Shelter trailers/caches. The City of Redlands obtained one of the 200 person trailers in December 2013.

Title: Disaster Council
Sponsor: City of Redlands
Description: In October 2013, the City of Redlands re-implemented its Disaster Council. The meetings are Chaired by the Mayor and Co-Chaired by the City Manager. Disaster Council meetings provide for

communication and coordination between the public and private sectors in the City in analyzing and developing plans, projects, policies, and procedures for emergency operations.

Title: Community Emergency Response Team (CERT)
Sponsor: City of Redlands
Description: The City of Redlands recently re-implemented CERT training in October 2013. This three-day course will provide the citizens of Redlands the much-needed training to prepare in an event of emergency or a disaster. Currently, the city has 150 people trained in personal preparedness.

Title: Emergency Communications Group
Sponsor: City of Redlands
Description: This group is responsible for redundant emergency communications and provides supplemental communication assistance to City agencies in the event of a disaster, emergency, or other designated event. The Federal Communications Commission (FCC) in Part 97, Sub-part E of the Commission's Rules provide for the Radio Amateur Civil Emergency Service (RACES). The purpose of RACES is to provide communication support to government during periods of local, regional or national emergency.

4.3 TECHNICAL RESOURCES

4.3.1 PROFICIENCIES AND EXPERTISE

The City of Redlands has many proficiencies and expertise that can be leveraged in support of mitigation efforts. In addition to public safety and fire suppression capabilities, the City has access to staff with skills in Engineering/Construction, Planning, Environmental, Project/Grant Management, Economic Development, Debris Removal, HazMat Response, and Water resources.

4.3.2 TECHNOLOGY

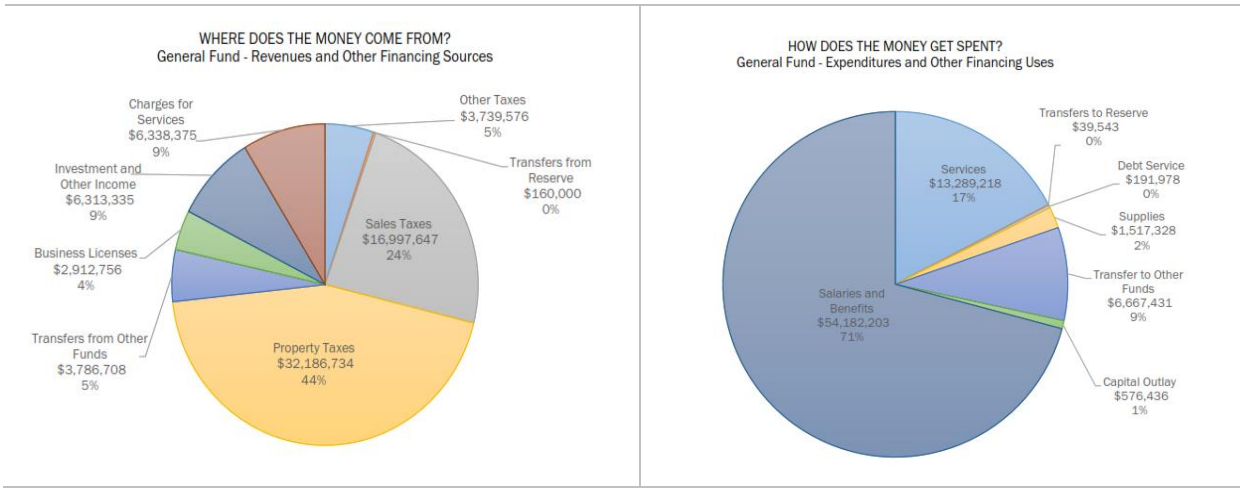
As with many jurisdictions, the City of Redlands has been increasing its technology capabilities. This includes providing secure platforms to store and access information, means of ensuring continuity of government, and general technical support. A significant capability available to support mitigation efforts is the establishment of the Geographic Information Systems (GIS) group. GIS is a computer system for capturing, storing, checking, and displaying data related to positions on Earth's surface. By relating seemingly unrelated data, GIS can help individuals and organizations better understand spatial patterns and relationships. The GIS group is able to analyze and generate reports of critical data (land use, built environment, natural environment), able to demonstrate potential ramifications of actions or events, and generate graphic representation of results.

4.3.3 COMMUNICATIONS

The City of Redlands has several platforms to communicate with staff, surrounding jurisdictions, and the general public. In addition to the standard methods (telephone/cell phones, emails), the City has inoperable communication capabilities (radio communications and satellite communications). In addition to the above, 2-way communications platforms, there are several "push" platforms that can be used. These consist of television, broadcast radio, websites, and social media (Facebook, Twitter, Instagram, Nextdoor).

The City of Redlands Emergency Notification System will communicate emergency and other urgent messages to residents and community members within Redlands. The system uses both text and voice messages to keep residents and community members in Redlands informed in case of emergencies that affect areas in which they live or work. With this information, residents and businesses can make arrangements to help ensure the safety of family members, employees, pets, and property in the event of fires, floods, earthquakes, or other types of disasters. In the event of an emergency, residents and community members will receive a message with the latest information and safety instructions. The system is programmed to know whether or not the message has been delivered to a person, recorded to voicemail, or was not delivered due to a telephone system error. The system will continue to attempt to deliver its message until the message is successfully delivered to a person, or until the message expires. The system utilizes the area's 9-1-1 database, provided by the local telephone company, and thus is able to contact land-line telephones whether listed or unlisted.

4.4 FISCAL RESOURCES



The financial resources of the City of Redlands are allocated to and accounted for in various funds based upon the purposes for which the funds are to be spent and the means by which spending activities are controlled. The varies funds include: Governmental Funds; Proprietary Funds; and, Fiduciary Funds.

- **Governmental Funds-** used for most of city governmental functions. There are four (4) types of Governmental Funds: General Fund; Special Fund; Debt Services Fund; and, Capital Project Funds.
  - *General Fund- the operating fund used to account for all activities, expect those requires to be accounted for in another fund*
  - *Special Fund- used for proceeds of specific revenue sources that are restricted to expenditures of special purposes*
  - *Debt Services Fund- used for accumulation of resources and the payment of principal, interest and related costs of general long-0term debt*
  - *Capital Project Funds- used for resources for the acquisition or construction of major capital facilities*
- **Proprietary Funds**- used for government's business-type activities. These funds recover the cost of providing services through fees and charges on those who use their services. There are two (2) types of Proprietary Funds: Enterprise Funds, and, Internal Services Funds.
  - *Enterprise Funds- used for services provided primarily to external customers and legal requirements or management policy required services, including capital, be fully recovered through fees and charges*
  - *Internal Services Funds- used for services provided to other funds, departments, or agencies of the government. Costs are allocated to the benefitting funds in the form of fees and charges in order to recover the full cost of providing services*
- **Fiduciary Funds**- used for assets held in a trustee or agency capacity for outside parties, including individuals, private organizations and other government.

4.4.1 GOVERNMENT FUND

The primary account under the Government Fund is the General Fund. Reallocation of the General Fund is the main source of funds the City can access to implement mitigation projects. The following figure from the Comprehensive Annual Financial Report (CARF) illustrate where the City of Redlands General Funds come from and how the General Fund money is spent (**Figure 4.2**).

Figure 4.2- City of Redlands General Fund Allocation

According to the CARF, by the end of June 2019, the total fund balance reported for the general fund was $39,647,517, an increase of $3.9 million, or 10.9%, from the prior year fund balance of $35,734,630. As a measure of the General Fund's liquidity, it can be useful to compare the total fund balance to total fund expenditures, which indicates that fund balance is 59.3% of general fund expenditures, however only $17,654,773 of the $39.6 million fund balance is unassigned. The unassigned fund balance of $17.7 million, together with the $8.3 million fund balance committed to stabilization arrangement (contingencies), is the only portion of fund balance readily available for spending and represents 39.1% of general fund expenditures. Total general fund expenditures this year were $66.3 million, which is 4.9% greater than the prior year amount of $63.3 million, and total General Fund revenues was $72.6 million, or 5.8% greater than the prior year amount of $68.6 million.

4.4.2 PROPRIETARY AND FIDUCIARY FUNDS

Other means to implementing mitigation projects is the utilization of Proprietary and Fiduciary Funds. While there are a variety of options that the City may be able to access under these funds, the primary funds will be those secured through project grants, such as the FEMA Hazard Mitigation Assistance (HMA) programs- Hazard Mitigation Grant Program- HMGP, Flood Mitigation Assistance- FMA, or Building Resilient Infrastructure and Communities- BRIC (formerly, the Pre-Disaster Mitigation- PDM program). Currently, other than the grant to fund the update of this LHMP, the City has not received any FEMA HMA grants over the past five (5) years.

5 HAZARD ASSESSMENT

5.1 OVERVIEW

The purpose of this section is to capture the approach used by the City of Redlands LHMP Planning Team to identify and prioritize (screen) hazards in its community. This is an important step to ensure all potential hazards are considered and relevant hazards ranked as to the greatest concern within the community.

This section also presents relevant information (profiles) on each hazard in the community. The "*Hazard Profiles*" provide a description of the hazard, the location and/or extent of the hazard within the community, the history of the hazard within the community, the probability of the hazard occurring in the community, and a discussion of any considerations needed due to changing conditions (i.e., climate). This information was referenced when prioritizing hazards.

5.2 HAZARD IDENTIFICATION

The Planning Team went through an extensive effort to identify all of the hazards present in the community. The Planning Team started with the list of hazards in the City of Redlands 2015 LHMP and augment the list as necessary. This augmentation considered adding, removing, and renaming of hazards to create a list of all potential hazards in the community. The Planning Team utilized several external resources to ensure they were considering all potential hazards. These resources included the State of California HMP (2018), the San Bernardino County OA LHMP (2017), and several other surrounding community LHMPs (i.e., Colton, Loma Linda, Yucaipa). This helped the Planning Team understand statewide, countywide, and surrounding area hazard concerns. Each hazard identified in the external resources were reviewed and considered by the Planning Team. After careful review and consideration, the Planning Team identified the following hazards for inclusion in the City of Redlands LHMP update:

- Aircraft Accident/Incident
- Civil Disturbance
- Dam Breach
- Drought
- Earthquake
- Energy Shortage/Power Outage
- Extreme Temperature
- Flood
- Hazardous Material Accident
- Infectious Disease
- Infestation
- Landslide
- Technology Disruption
- Terrorism
- Train Accident/Incident
- Wildfire
- Windstorm

As a note, no hazards from the City of Redlands 2015 LHMP were removed, however, the Planning Team added four (4) new hazards: *aircraft accident/incident*, *civil disturbance, technology disruption,* and *train*

accident/incident. It is also important to note that the Planning Team did revise the name and description of some hazards to provide more clarity and understanding of the hazard. This step also led to separating and creating distinct individual hazards (i.e., Power Outage/Excessive Heat). The changes to the hazard descriptions and other relevant hazard information are captured under sub section 5.4- *Hazard Profiles*.

5.3 HAZARD SCREENING AND PRIORITIZATION

After the list of hazards was identified, the Planning Team went through a process to prioritized (screened) the hazards to determine which hazards created the greatest concern in the community. The Planning Team utilized the same non-numerical ranking system that was implemented during the last update to the City of Redlands LHMP. This process consists of generating a qualitative ranking, High, Medium, or Low rating for: 1) *Probability*; and, 2) *Impact* from each hazard. As part of this process, the following criteria (definitions) were applied:

- **Probability**

  High: (Highly Likely/Likely) There may or may not have been historic occurrences of the hazard in the community or region but experts feel that it is likely that the hazard will occur in the community. Citizens feel that there is a likelihood of occurrence.

  Medium: (Possible) There may or may not have been a historic occurrence of the hazard in the community or region but experts feel that it is possible that the hazard could occur in the community. Citizens may feel that there is a likelihood of occurrence.

  Low: (Unlikely) There have been no historic occurrences of the hazard in the community or region and both experts and citizens agree that it is highly unlikely that the hazard will occur in the community.

- **Impact**

  High: (Catastrophic/Critical) Both experts and citizens feel that the consequences will be significant in terms of building damage and loss of life.

  Medium: (Limited, but not insignificant) Consequences are thought to be modest in terms of building damage and loss of life, limited either in geographic extent or magnitude.

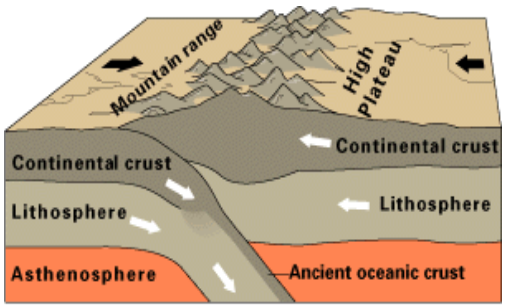
  Low: (Negligible) Consequences are thought to be minimal in terms of building damage and loss of life, limited either in geographic extent or magnitude.

After each hazard was ranked using the above criteria, the results were displayed in a graph to assist the Planning Team validate the results (**Figure 5.1**). The Planning Team determined all hazards falling within the gray-colored boxes were Tier I priority hazards, those within the blue-colored boxes were Tier II priority hazards, and those within the white-colored boxes were Tier III priority hazards. The higher priority hazards (Tier I and Tier II), reflect those hazards the Planning Team determined the community should focus on over the next five (5) years. This does not mean that the community will not address the lower priority hazards. It means if resources are limited (i.e., funding, staffing), the primary focus will be on the higher priority hazards.

Figure 5.1- Hazard Prioritization Matrix

		Impact		
		High	**Medium**	**Low**
Probability	**High**	• Energy Shortage/Power Outage	• Wildfire • Windstorm	
	Medium	• Earthquake • Flood • Infectious Disease	• Aircraft Accident/Incident • HazMat Accident • Civil Disturbance • Landslide • Train Accident/Incident	• Drought • Infestation • Extreme Temperature
	Low	• Technology Disruption	• Terrorism • Dam Breach	

5.4 HAZARD PROFILES



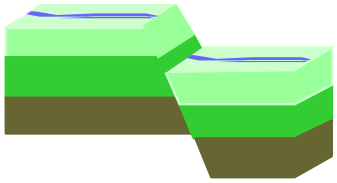
The Hazard Profiles include the incorporation of all new information, material, and reports to better help the Planning Team and the community understand the hazard. The hazards are organized alphabetically by the priority screening ranking (i.e., Tier I, Tier II, and Tier III). The hazards assessed by the Planning Team are summarized below:

5.4.1 TIER I

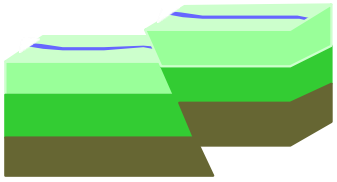
The hazards, in alphabetical order, under Tier I include: Earthquake; Energy Shortage/Power Outage; Flood; Infectious Disease; Wildfire; and, Windstorm

5.4.1.1 EARTHQUAKE

- **Ranking-** *Probability*- Medium; *Impact*- High
- **Description**



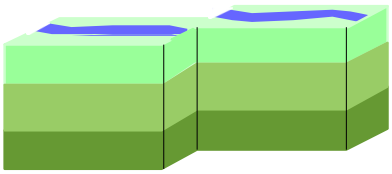
Continental-continental convergence



An earthquake is caused by a release of strain within or along the edge of the Earth's tectonic plates, producing ground motion, surface fault rupture, and secondary hazards such as ground failure. For hundreds of millions of years, the forces of plate tectonics have shaped the Earth as the huge plates that form the Earth's surface move slowly over, under, and past each other. Sometimes the movement is gradual. At other times, the plates are locked together, unable to release the accumulating energy. When the accumulated energy grows strong enough, the plates break free causing the ground to shake. Most earthquakes occur at the boundaries where the plates meet; however, some earthquakes occur in the middle of plates.

The severity of the shaking increases with the amount of energy released, decreases with distance from the causative fault or epicenter, and is amplified by soft soils. After just a few seconds, earthquakes can cause massive damage and extensive casualties. A fault is a fracture between blocks of the earth's crust where either side moves relative to the other along a parallel plane to the fracture.

There are three (3) different types of earthquake faults: 1) Normal, 2) Thrust; and, 3) Strike-slip. Normal fault and Thrust faults are examples of dip-slip faults. Dip-slip faults are slanted fractures where the blocks mostly shift vertically. If the earth above an inclined fault moves down, the fault is called a normal fault, but when the rock above the fault moves up, the fault is called a reverse (or trust) fault. Thrust faults have a reverse fault with a dip of 45° or less.



Normal Fault

Thrust Fault

Strike-slip faults are vertical or almost vertical rifts where the earth's plates move mostly horizontally. From the observer's perspective, if the opposite block looking across the fault moves to the right, the slip style is called a right lateral fault; if the block moves left, the shift is called a left lateral fault.

Strike-slip Fault

The effect of an earthquake on various locations throughout the felt area is called the intensity. The intensity scale consists of a series of certain key responses such as people awakening, movement of furniture, damage to chimneys, and total destruction of property. The scale currently used in the United States is the Modified Mercalli Intensity (MMI) Scale (**Table 5.1**). It was developed in 1931 by the American seismologists Harry Wood and Frank Neumann. This scale is composed of increasing levels of intensity designated by Roman numerals that range from imperceptible shaking (MMI I) to catastrophic destruction (MMI X). It does not have a mathematical basis; instead, it is an empirical scale based on observed effects.

Table 5.1- Modified Mercalli Intensity (MMI) Scale

Intensity	Shaking	Description
I	Not Felt	Not felt except by a very few under especially favorable conditions.
II	Weak	Felt only by a few persons at rest, especially on upper floors of buildings
III	Weak	Felt quite noticeably by persons indoors, especially on upper floors of buildings. Many people do not recognize it as an earthquake. Standing motor cars may rock slightly. Vibrations similar to the passing of a truck. Duration estimated
IV	Light	Felt indoors by many, outdoors by few during the day. At night, some awakened. Dishes, windows, doors disturbed; walls make cracking sound. Sensation like heavy truck striking building. Standing motor cars rocked noticeably.
V	Moderate	Felt by nearly everyone; many awakened. Some dishes, windows broken. Unstable objects overturned. Pendulum clocks may stop
VI	Strong	Felt by all, many frightened. Some heavy furniture moved; a few instances of fallen plaster. Damage slight
VII	Very Strong	Damage negligible in buildings of good design and construction; slight to moderate in well-built ordinary structures; considerable damage in poorly built or badly designed structures; some chimneys broken
VIII	Severe	Damage slight in specially designed structures; considerable damage in ordinary substantial buildings with partial collapse. Damage great in poorly built structures. Fall of chimneys, factory stacks, columns, monuments, walls. Heavy furniture overturned
IX	Violent	Damage considerable in specially designed structures; well-designed frame structures thrown out of plumb. Damage great in substantial buildings, with partial collapse. Buildings shifted off foundations
X	Extreme	Some well-built wooden structures destroyed; most masonry and frame structures destroyed with foundations. Rails bent

However, most people are familiar with the Richter scale, a method of rating earthquakes based on the amplitude of seismic waves - an indirect measure of energy released (**Table 5.2**). The Richter scale is logarithmic. Each one-point increase corresponds to a 10-fold increase in the amplitude of the seismic shock waves and a 32-fold increase in energy released. For example, an earthquake registering magnitude 7.0 on the Richter scale releases over 1,000 times more energy than an earthquake registering magnitude 5.0. It should be noted that while an earthquake may have many intensity values across the impacted area, there is just one Richter magnitude associated with each event.

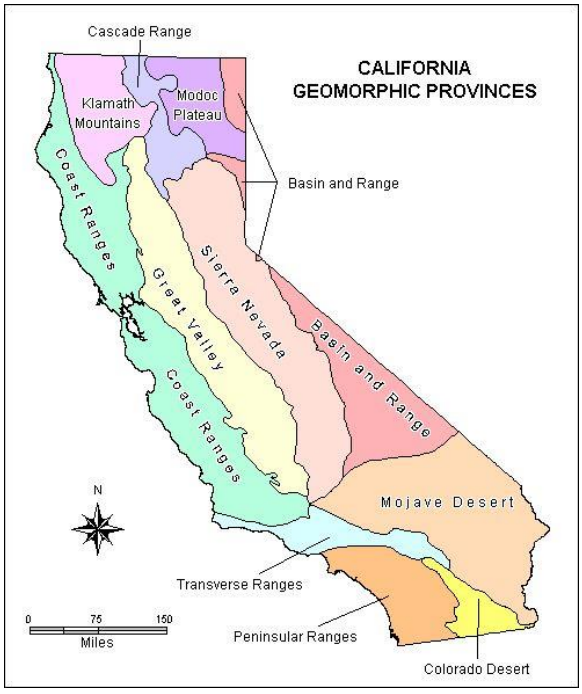


Table 5.2 Richter Scale

Magnitude	Earthquake Effects
0-1.9	*Micro*- Not felt by people
2.0-2.9	*Minor*- Felt by few people
3.0-3.9	*Minor*- Felt by some people, inside objective can be seen shaking
4.0-4.9	*Light*- Felt by most people, inside object shake and fall
5.0-5.9	*Moderate*- Felt by everyone, damage and possible collapse of unreinforced buildings
6.0-6.9	*Strong*- Felt by everyone, widespread shaking/damage, some buildings collapse
7.0-7.9	*Major*- Felt by everyone, widespread shaking/damage, many buildings collapse
8.0 or greater	*Great*- Felt by everyone, widespread shaking/damage, most buildings collapse

Ground shaking and ground deformation (i.e., surface fault rupture, landslides, and liquefaction) are the specific hazards associated with earthquakes. The severity of these hazards depends on several factors, including soil and slope conditions, proximity to the fault, magnitude, and the type of earthquake.

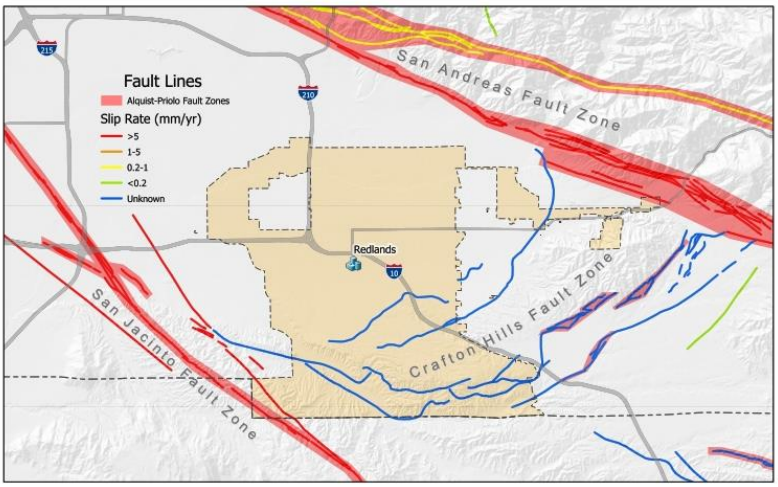
- *Ground Shaking*- Ground shaking is the motion felt on the earth's surface caused by seismic waves generated by the earthquake. It is the primary cause of earthquake damage. The strength of ground shaking depends on the magnitude of the earthquake, the type of fault, distance from the epicenter (where the earthquake originates), and local soil conditions. Soils and soft sedimentary rocks near the earth's surface can amplify earthquake ground shaking. Amplification increases the magnitude of the seismic waves generated by the earthquake. The amount of amplification is influenced by the thickness of geologic materials and their physical properties. Buildings and structures built on soft and unconsolidated soils can face greater risk. Amplification can also occur in areas with deep sediment filled basins and on ridge tops. Peak Ground Acceleration (PGA) is a measure of the strength of ground shaking. Larger PGAs result in greater damage to structures. PGA is used to depict the risk of damage from future earthquakes by showing earthquake ground motions that have a specified probability (10%, 5%, or 2%) of being exceeded in 50 years return period. These values are often used for reference in construction design, and in assessing relative hazards when making economic and safety decisions.
- *Surface Fault Rupture*- As previously mentioned, the sudden sliding of one part of the earth's crust past another releases the vast storage of elastic energy in the rocks as an earthquake. The resulting fracture is known as a fault, while the sliding movement of earth on either side of a fault is called fault rupture. Fault rupture generally begins below the ground surface at the earthquake hypocenter, typically between three and ten miles below the ground surface in California. If an earthquake is large enough, the fault rupture will reach the ground surface (referred to as "surface fault rupture"), wreaking havoc on structures built across its path. Structures built across the fault are a risk of significant damage from surface fault rupture. In California, the 1972 Alquist-Priola Earthquake Fault Zoning Act prohibits the siting of most structures for human occupancy across traces of active faults that constitute a potential hazard to structures from surface faulting. Recent large earthquakes in Turkey and Taiwan have shown that few structures built across the surface traces of faults can withstand the large displacements that may occur during an earthquake.
- *Landslides*- Earthquake-induced landslides are secondary earthquake hazards that occur from ground shaking. They can destroy the roads, buildings, utilities, and other critical facilities necessary to respond and recover from an earthquake. Many communities in Southern California have a high likelihood of encountering such risks, especially in areas with steep slopes. (NOTE: while mentioned here, landslides are covered under a separate hazards)
- *Liquefaction*- Liquefaction is the phenomenon that occurs when ground shaking causes loose, saturated soils to lose strength and act like viscous fluid. Liquefaction causes two types of ground failure: lateral spread and loss of bearing strength. Lateral spreads develop on gentle slopes and entail the sidelong movement of large masses of soil as an underlying layer liquefies. Loss of bearing strength occurs when the soil supporting structures liquefy, causing the structures to settle, resulting in damage and, in some cases, collapse.

- **Location and Extent**

As noted by the California Geological Survey, California is divided into eleven (11) geomorphic provinces. California's geomorphic provinces are naturally defined geologic regions that display a distinct landscape or landform. Each region displays unique, defining features based on geology, faults, topographic relief and climate. These geomorphic provinces are remarkably diverse. They provide spectacular vistas and unique opportunities to learn about earth's geologic processes and history. These geomorphic provinces each have the potential to create significant earthquakes and associated hazards. The City of Redlands is located in a high seismic activity zone in the Transverse Range geologic province. The Transverse Ranges are an east-west trending series of steep mountain ranges and valleys. The east-west structure of the Transverse Ranges is oblique to the normal northwest trend of coastal California, hence the name "Transverse." The province extends offshore to include San Miguel, Santa Rosa, and Santa Cruz islands. Its eastern extension, the San Bernardino Mountains, has been displaced to the south along the San Andreas Fault. Intense north-south compression is squeezing the Transverse Ranges. As a result, this is one of the most rapidly rising regions on earth. Great thicknesses of Cenozoic petroleum-rich sedimentary rocks have been folded and faulted, making this one of the important oil-producing areas in the United States.

The more significant faults within the region include the San Andreas Fault, the San Jacinto Fault, and the Crafton Hills Fault Zone. The City of Redlands is geographically located between active traces of the San Andreas Fault located to the northeast of the City, and the San Jacinto Fault located to the southwest of the City, with the Crafton Hills Fault Zone located southeastern of the city (**Figure 5.2**). The San Jacinto Fault forms the southwestern boundary of the San Bernardino Valley and intersects the City of Redlands at its southwest corner. The fault zone extends approximately 120 miles in distance from its point of origin in the San Bernardino Valley at the San Andreas Fault. The formation of this juncture exists within the geographical location of the Devore Pass. The southernmost section of the zone travels northwest of El Centro. The San Bernardino segment of the San Andreas Fault is located to the east of the City of Redlands. This 50 km segment is considered to be "*the currently active segment of the San Andreas fault system to the northwest of Gorgonio Pass*". The Crafton Hills Fault Zone is a series of normal faults, each about 10 km in length or less, located just to the east of the City of Redlands, between the San Jacinto and San Andreas Faults.

Figure 5.2- Earthquake Fault Zones in the Vicinity of the City of Redlands



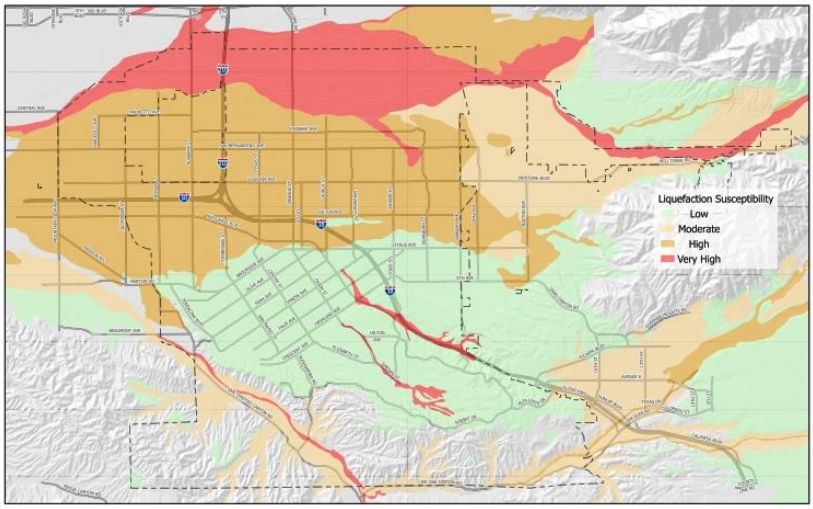


Figure 5.3 depicting the liquefaction susceptibility areas in the vicinity of the City of Redlands. There are considerable areas of Very High and High liquefaction susceptibility in areas of sandy soil associated with the Santa Ana River, the Mission Zanja, and San Timoteo Creek, but the City of Redlands is located within an area of Low landslide susceptibility.

Figure 5.3- Liquefaction Susceptibility in the Vicinity of the City of Redlands

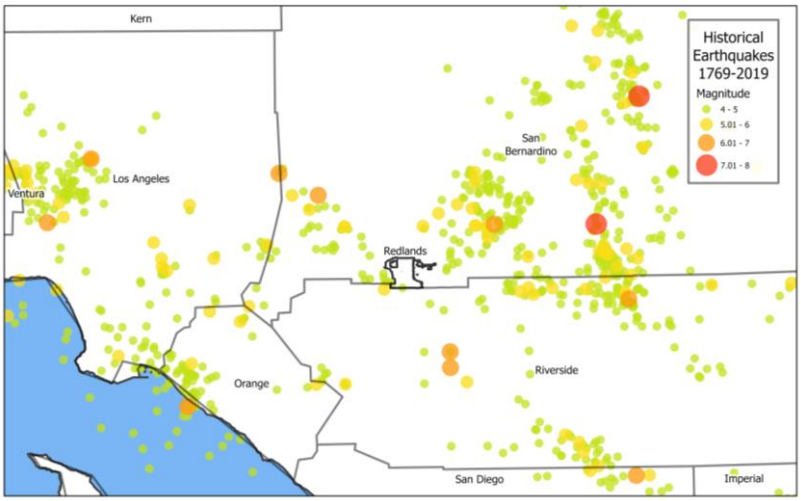
- **History**

There are 45 states and territories in the United States at "moderate" to "very high" risk from earthquakes, and they are located in every region of the country. California experiences the most frequent damaging earthquakes; however, Alaska experiences the greatest number of large earthquakes—most located in uninhabited areas. The largest earthquakes felt in the United States were along the New Madrid Fault in Missouri, where a three-month long series of quakes from 1811 to 1812 included three quakes larger than a magnitude of 8 on the Richter scale. These earthquakes were felt over the entire Eastern

United States, with Missouri, Tennessee, Kentucky, Indiana, Illinois, Ohio, Alabama, Arkansas, and Mississippi experiencing the strongest ground shaking.

Historical and geological records show that California has a long history of seismic events (a list of significant earthquakes can be found in **Appendix 5**). In California, movement between the North American and the Pacific tectonic plates manifest primarily along a region known as the San Andreas Fault system. Experts believe the San Andreas Fault is capable of producing an earthquake of magnitude 8.0+ over the next few years. The San Andreas Fault is considered the "*Master Fault*" because it has frequent (geologically speaking), large earthquakes, and it controls the seismic hazard in southern California. Faults in the San Andreas Fault zone that passes through Los Angeles County are part of the very active southern segment. This segment includes historically active, active, potentially active, and inactive faults.

Southern California area has experienced several earthquakes, two very large earthquakes, the Fort Tejon in 1857 (M7.9) and the Owens Valley in 1872 (M7.6) are evidence of the tremendously damaging potential of earthquakes in Southern California. The Fort Tejon earthquake surface rupture broke the portions of the central and southern segments of the San Andreas Fault system (Cholame, Carrizo, and Mojave segments), resulting in displacements of as much as 27 feet (9 meters) along the rupture zone. These fault segments are thought to have an incident recurrence interval of between 104 and 296 years. The most recent significant earthquake event affecting the region was the Northridge Earthquake. At 4:31 A.M. on Monday, January 17, 1994, a very damaging earthquake with a magnitude of 6.7 struck the San Fernando Valley. In the following days and weeks, thousands of aftershocks occurred, causing additional damage to affected structures. Effects of the earthquake were felt north into Ventura County, south in Orange County, and east into Riverside and San Bernardino Counties.



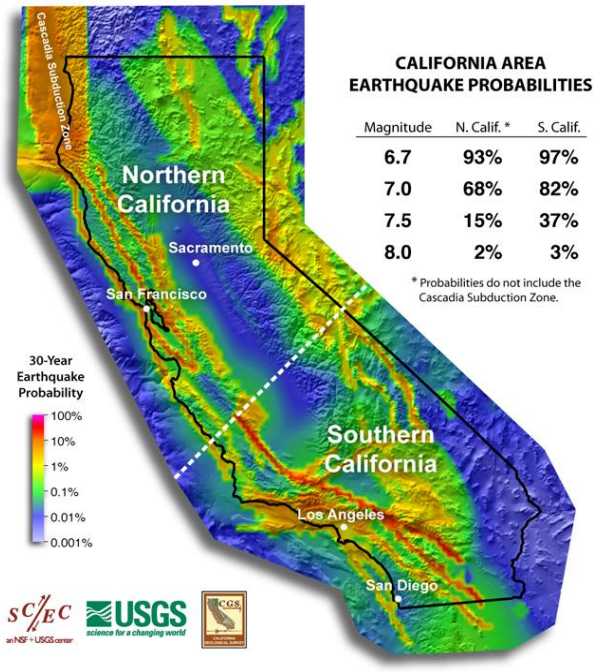
In June of 1992, the M7.3 Landers Earthquake ruptured 85 km (53 miles) along a series of faults in a roughly contiguous fault system, including the Johnson Valley, Landers, Homestead Valley, Emerson and Camp Rock faults. Strong shaking was felt in the City of Redlands. The largest aftershock of the Landers earthquake was the M6.4 Big Bear Earthquake, which caused damage and landslides in the Big Bear area. Declared as Disaster FEMA-947-DR CA, these earthquakes resulted in structural damage to many residential dwellings in Redlands, including chimneys and foundation slippage. Other significant earthquake events in the region included:

- *Newport-Inglewood Earthquake, 6.4m (1933)- 120 deaths, over $50 million in damage*
- *San Fernando (Sylmar) Earthquake, 6.5m (1971)- 65 deaths, over $500 million in damage*
- *Whittier Narrows Earthquake 5.9m (1987)- 8 deaths, over $358 million in damage*
- *Sierra Madre Earthquake 5.8m (1991)- 2 deaths, over $40 million in damage*
- *Chino Hills Earthquake 5.4m (2008)- no casualties and only minor damage*
- *City of Los Angeles Earthquake 4.7m (2009)- no casualties and minor to moderate damage*
- *El Mayor Cucapah Earthquake 7.2m (2010)- major damages to the area and Imperial County*
- *Calimesa 4.1m (2011)- no casualties and minor to moderate damage*
- *La Habra Earthquake 5.1m (2014)- no casualties and minor to moderate damage*
- *Fontana Earthquake 4.4m (2014)- no casualties and minor to moderate damage*
- *Running Springs 4.6m (2014)- no casualties and minor to moderate damage*
- *Fontana 4.2m (2015)- no casualties and minor to moderate damage*
- *Big Bear Lake 4.0m (2015)- no casualties and minor to moderate damage*
- *Muscoy 4.4m (2015)- no casualties and minor to moderate damage*

- *Banning 4.4m (2016)- no casualties and minor to moderate damage*
- *Cabazon 4.5m (2017)- no casualties and minor to moderate damage*
- *Big Bear 3.5m (2018)- no casualties and minor to moderate damage*
- *Trona (2019)- no casualties and minor to moderate damage*
- *Ridgecrest 7.1m (2019)- no casualties and minor to moderate damage*

Figure 5.4 displays historical epicenters of historical earthquakes located in southern California since 1568.

Figure 5.4- Historical Earthquakes in Southern California since 1568



- **Probability**

Earthquakes strike suddenly, without warning. Earthquakes can occur at any time of the year and at any time of the day or night. On a yearly basis, 70 to 75 damaging earthquakes occur throughout the world. Recent estimates of expected annualized earthquake loss for the U.S. totals $5.3 billion per year, with 66% ($3.5 billion) concentrated within the State of California, and $397 million in Riverside and San Bernardino Counties (FEMA, 2008[1]).

The probability of a significant (M6.7 or greater) earthquake occurring in Southern California in the next 30 years has been estimated to be 97% by the 2007 California Working Group on Earthquake Probability, as shown in **Figure 5.5**. California Area 30-Year Earthquake Probabilities. (USGS Open-File Report 2007-1437).

[1] "HAZUS®MH Estimated Annualized Earthquake Losses for the United States", FEMA 366, April, 2008.

Figure 5.5- California Area 30-Year Earthquake Probabilities

- **Climate Change Considerations**

To date, no credible evidence has been provided that links climate to earthquakes. However, climate and weather does play a significant role in the response and recovery from earthquakes. Effects from climate change could create cascading complications and impacts.

5.4.1.2 ENERGY SHORTAGE/POWER OUTAGE

- **Ranking**- *Probability*- High; *Impact*- High
- **Description**

For the purposes of this LHMP, Energy Shortage/Power Outage hazards are confined to rolling blackouts or brownouts and Public Safety Power Shutdown (PSPS) events. While some accidents can cause energy shortage/power outage, they are usually smaller, localized events and are not part of this assessment. Additionally, Energy Shortage/Power Outage hazards can be consequences from other events. These energy shortage/power outage consequences are discussed under the primary hazard event (high winds, wildfire, earthquake). A brownout is a partial, temporary reduction in total system capacity, while a blackout is a complete interruption in power. A brownout is caused by high electricity demand that is near or above a utility's production capacity. When this occurs, the utility may reduce the flow of electricity to certain areas to prevent a blackout. The state of California has also implemented "Flex Alerts" to bring awareness to times in which supply and demand of power could become an issue. A blackout is a large-scale service interruption that can happen as a result of severe weather or equipment failure at power plants. There are several factors that can play into energy shortage/power outage: 1) increased demand within the city; and, 2) increased demand elsewhere. Because Southern California Edison is part of the

western power grid, increases in other parts in the west region could curtail the energy available to the City.

PSPS events are initiated by power utility companies and are implemented in response to severe weather events. The purpose is to mitigate the increased fire risk during "red flag" weather conditions. Red flag weather conditions include: high winds, low humidity, and high temperatures. By shutting off power, the utility companies are ensuring that electrical equipment, which can arc and spark, during severe events, will not exacerbate or start a fire.

- **Location and Extent**

An Energy Shortage/Power Outage events can occur throughout the entire City.

- **History**

Southern California has experienced a population growth over the years. This coupled with changes to daily life styles (heavier reliance on power) and changing weather patterns have contributed to a higher demand for power over recent years. Because of this, the City of Redlands, like other parts of California, have had energy shortage/power outage events related to the failure of the statewide or regional systems not being able to meet demand. The Energy Shortage/Power Outage events usually occur during the warmer summer months and have lasted for a few hours and in some cases days. Recently, the City has experienced several Energy Shortage/Power Outage events due to the power company's implementing PSPS events in response to Red Flag weather conditions. Similar to the power outage during the summer months, these PSPS energy shortage/power outage are relativity short in duration.

- **Probability**

There are no studies that predict the probability of Energy Shortage/Power Outage events; however, it is expected that there is a higher probability of events occurring during the warmer summer months and during Red Flag (high temperatures, low humidity, high wind) events.

- **Climate Change Considerations**

Climate can play a significant role in Energy Shortage/Power Outage events. As temperatures rise due to changing conditions, it will have significant impacts on energy supply and demand. Additionally, changing climate conditions can create more Red Flag events, causing the power companies to consider to turn off power to lessen the potential fire threat.

5.4.1.3 FLOOD

- **Ranking-** *Probability*- Medium; *Impact*- High
- **Description**

A flood is a temporary condition (short-duration or long-duration) of partial or complete inundation on land that is normally dry. This condition is generally caused by precipitation (i.e., rainfall). Several factors determine the severity of floods, including rainfall intensity and duration, antecedent moisture conditions, surface permeability, and geographic characteristics of the watershed such as shape and slope. Other causes of flooding can include a ruptured dam or levee, rapid ice or snow melting in the mountains, under-engineered infrastructure, or even a poorly placed beaver dam can overwhelm a river or channel and send

water spreading over adjacent land or floodplains. According to FEMA, there are several different types of floods and under some there are subtypes. The flooding types and subtypes include:

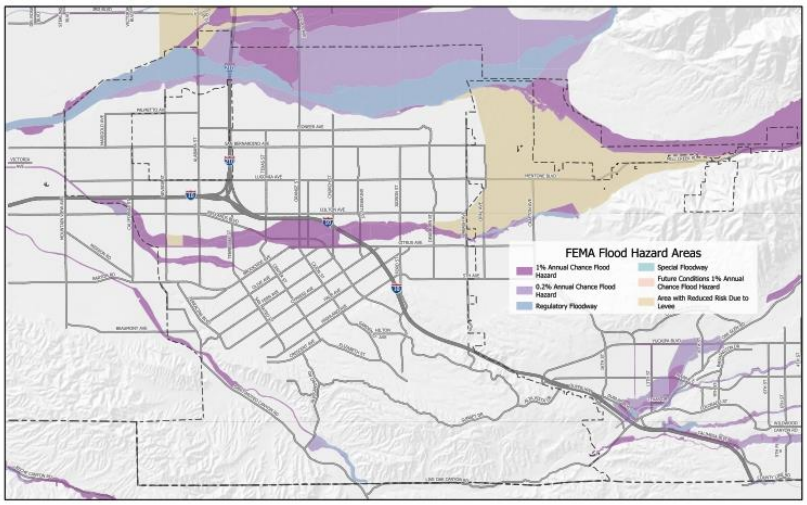
- *Riverine Flooding*- River/Stream Overbank Flooding, Flash Floods, Dam and Levee Failure, Alluvia Fans, Ice Jam Flooding, Moveable Bed Streams
- *Urban Drainage*- Drainage system capacity deficiencies
- *Ground Failures*- Mud flood and Mud flows, Subsidence, Liquefaction
  (*NOTE: while mentioned here, mud flows are covered under landslide hazards and Subsidence and Liquefaction hazards are covered under earthquake hazards*)
- *Fluctuating Lake Levels*- Increase volume caused by rain, snowmelt, and other runoffs
- *Coastal Flooding and Erosion- Storm Surge*

In California, some of the more common types of flooding fall under Riverine Flooding (i.e., flash flooding), Urban Flooding, and Coastal Flooding (i.e., storm surge). Floods can take several hours to days to develop. A flash flood is a flood occurring in a watershed where the time of travel of the peak of flow from one end of the watershed to the other is less than six hours. Coastal flooding occurs when storms produce large ocean waves that sweep across coastlines making landfall. The following flood characterization designates the amount of time for response:

- *Flood Watch*- a flood is possible in the area. Advanced warning
- *Flood Warning*- flooding is already occurring or will occur soon in the area. Advanced warning
- *Flash Flood Watch*- a flash flood is possible in the area. Little-to-no advanced warning
- *Flash Flood Warning*- flooding is already occurring or will occur soon in the area. Little-to-no advanced warning

- **Location and Extent**

The geographical location, climate, and topography of the City of Redlands make the city prone to flooding. In Redlands, floods usually occur during the winter "*wet*" season, the time of year with the highest precipitation totals or heavy rainfalls. During significant rainfall years, the season is characterized by high intensity rainfalls and rapid runoffs or discharge. These storm events have: inundate streams; flooded areas; create debris flows (i.e., sediment, rock, dead trees) that have plug culverts and damage bridges/overpasses; and/or, eroded or scared the landscape. The common type of flooding in the City of Redlands is:



- *Alluvial Fan*- Alluvial fan flooding occurs in the steep arid or semiarid mountains found throughout California. Alluvial fans are fan-shaped deposits of eroded rock and soil carried out of mountains and into valley floors by landslides, mudslides, mudflows, and surface runoff. At the beginning of the valley, alluvial fans are steep and narrow with boulders and other coarse material. The deposited material becomes increasingly fine as the gradient decreases and the material, mainly gravels, sand and mud, spreads. When rain falls, runoff from the canyon walls flows as a high-velocity sheet that channels into rivulets, and then to natural drainage courses. The rapidly moving water often carries large boulders and other material from the watershed depositing them into runoff channels, blocking the flow of water. Floodwater then spills out onto the fan, with each event finding a new channel that

soon fills up with deposits and overflows. Flooding in alluvial fans often can cause greater damage than clear-water flooding.

- *Flash Flood*- A flash flood is a rapid flooding of low-lying areas, rivers and streams that is caused by the intense rainfall associated with a thunderstorm, or multiple thunderstorms. Flash floods also occur when a man-made structure, such as a dam, collapses. Flash flooding occurs when the ground under a storm becomes saturated with water so quickly that it cannot be absorbed. The runoff collects in low-lying areas and flows rapidly downhill. As a result, anything in its path is suddenly in rising water. A typical flash flood begins with a slow-moving thunderstorm. This usually takes longer to move out of the affected areas and causes the area to endure a greater amount of rainfall for a longer period of time. In addition, a thunderstorm may pass over an affected area repeatedly, dumping even more rainfall. A large amount of rainfall in a short time can result in flash flood conditions, as can a dam failure or other sudden spill. The National Weather Service's definition of a flash flood is a flood occurring in a watershed where the time of travel of the peak of flow from one end of the watershed to the other is less than six hours.
- *Urban Drainage*- The heavy rainfall associated with these storm systems contributes to urban flooding in a number of ways. Primarily, heavy rainfall will often overwhelm the capacity of the conventional drainage system made up of storm drains, catch basins, sewers, and additional natural mechanisms for storm-water management. These systems typically cannot handle more than one or two inches of rainfall per hour before they begin to backup and overflow. This amount is further diminished if the storm drains, and other components of the storm-water management system, have not been adequately maintained, are clogged with debris such as trash or natural waste, or are old and in a state of disrepair. Heavy rainfall, combined with storm-water runoff, can cause local waterways to rise and overflow their banks.

Four (4) streams drain Redlands, each of which represents a potential flood hazard at peak flows; 1) the Santa Ana River/Mill Creek (located at the northern edge of the City), 2) the Mission Zanja (also known as Mill Creek Zanja and Mission Storm Drain), 3) San Timoteo Creek and 4) Live Oak Creek. The Santa Ana River/Mill Creek emerges from its mountain canyon 5 miles northeast of Redlands, spreads out in shallow, braided channels more than a 1.5-mile-wide wash, mantled with fluvial debris. The Mission Zanja (in the southwest part of the City) was constructed for water supply in 1819. Diverting water from Mill Creek, the Zanja carried water for 12 miles to support the San Bernardino Asistencia and surrounding farms and ranches. Today, as it traverses an east/west direction, the Zanja drains major portions of the City through various storm drain systems. Taking into account these features and other factors, FEMA has developed Flood Hazard Maps. The most common flood hazard map is the Federal Emergency Management Agency (FEMA) 100-year flood zone map (**Figure 5.6**). The 100-year flood zone map depicts areas within the City of Redlands that may be prone to flooding. It is worth to note that FEMA is in the process of updating the area flood maps around Redlands. These updates will be incorporated into future LHMPs.

Figure 5.6- FEMA Flood Hazard Areas for the City of Redlands

The flood hazard zones depicted on the map are derived from FEMA Flood Insurance Rate Maps (FIRM) and indicate the probability of flooding happening over a given period of time. FEMA National Flood Insurance Program (NFIP) produces FIRMs. The FIRM identifies potential flood risk in geographic areas. The FIRMs are the official map of a community on which FEMA has delineated both the special flood hazard areas and the risk premium zones applicable to the community. Historically, FIRMs were produced on paper; however, over recent years FEMA has begun the process of creating digital versions- *DFIRM*. Because of the volume of area, not all FIRMs have been digitized. Due to the limited detail and large scale of the base maps used for most FIRMs, much interpolation between contour lines is done in mapping the floodplain boundaries. This is why you may find discrepancies when actual ground elevations are surveyed: the maps are just the best available graphic representations of the Base Flood Elevations (BFEs). Definitions of flood zone designations are provided in **Table 5.3**.

Table 5.3- FEMA Flood Zone Designations

Risk Level	Flood Zone	Description
High	A	Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are not performed for such areas; no depths or base flood elevations are shown within these zones.
	AE	The base floodplain where base flood elevations are provided.
	AH	Areas with a 1% annual chance of shallow flooding, usually in the form of a pond, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones.
	AO	River or stream flood hazard areas, and areas with a 1% or greater chance of shallow flooding each year, usually in the form of sheet flow, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Average flood depths derived from detailed analyses are shown within these zones.
Moderate to Low	X (Shaded)	Area of moderate flood hazard, usually the area between the limits of the 100-year and 500-year floods.
	X (Unshaded)	Area of minimal flood hazard, usually depicted on FIRMs as above the 500-year flood level. Zone X is the area determined to be outside the 500-year flood and protected by levee from 100-year flood.
Undetermined	D	Areas with possible but undetermined flood hazards. No flood hazard analysis has been conducted. Flood insurance rates are commensurate with the uncertainty of the flood risk.

The City of Redlands has also conducted focused flood studies in the area; the majority of which are for the downtown area. The most recent work was done to augment the Redlands Master Plan of Drainage, to better understand the extent of flooding under the proposed Transit Village Specific Plan project. Redlands Master Plan of Drainage utilized the Environmental Protection Agency (EPA) Storm Water Management Model (SWMM) to identify flooding potential in the downtown area. Inputs into the model included the then-planned Opal Basin. Because the Opal Basin was not realized and there was a need to expand the downtown area under the Redlands Master Plan of Drainage, another EPA SWMM was run. The results of the expanded EPA SWMM run for downtown Redlands is depicted in **Figure 5.7** and **Figure 5.8**.

Figure 5.7- Redlands Transit Village- 100-year Proposed

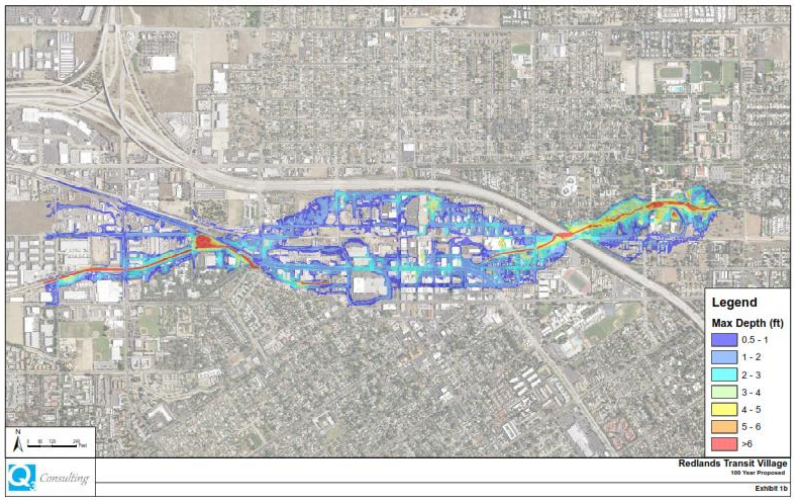


Figure 5.8- Redlands Transit Village- 25-year Proposed

- **History**

While not always a significant event, floods inundate portions of the City of Redlands almost every year. These smaller flood events create issues for local residents and business with everything from traffic congestion to localized water damage. Most of the smaller flood events do not rise to the level of significance (i.e., requiring local, county, state, or federal declarations) and do not require activation of the City of Redlands Emergency Operations Center (EOC). The City has not experienced a significant flood event since 2011. The significant flood events have been known to create considerable impacts. During some significant flood events the flood waters from the upper regions of the Santa Ana River/Mill Creek were responsible for extensive damage to Orange Street and Alabama Street, ranging from washouts from five to six-foot high flood waters, to extensive, permanent damages from uncontrollable runoff from the upper regions of the San Bernardino mountains. The following information provides a summary of the historic significant flooding events in the City of Redlands:

- *FEMA 1952-DR-CA*- (January 2011) The City of Redlands sustained more than 600,000 in damages costs associated with Emergency Protection and debris removal. The amounts included salaries, benefits, overtime and other professional and special contractual services for repairs and maintenance supplies. Several repairs of damages in various locations in the amount of $282, 050; $7,870 for repairs of damages on Bond Avenue, Fern Avenue, and Brookside Avenue; $4,000 with for geologic evaluations services; $10,722 for restriping San Timoteo Road from Alessandro Road to Fern Street; $12, 585 for emergency street sweeping of San Timoteo Canyon; and $6,487 for surfacing of damaged playground at Jennie Davis Park.
- *FEMA 1884-DR-CA*- (March 2010) The City of Redlands sustained a significant amount of damage due to the heavy rains and associated flooding.
- *FEMA 1577-DR-CA*- (December 27, 2004) The City of Redlands sustained over $40,000 in damages were sustained as a result of the storm.
- *FEMA 1203-DR-CA*- (February 1998) Redlands experienced a continuing series of storms. On February 27 and 28, 1998, the strongest storm created a 2-day event that resulted in considerable damage and private property loss.
- *FEMA 1046-DR-CA*- (March 1995) The second storm series resulted in more than $12,000 in damage. The most significant damage, however, was the loss of the temporary emergency crossings at Orange and Alabama Streets. Warm tropical rain, coupled with an extreme snowmelt, created severe flooding conditions in the Santa Ana River. Mud, debris, and boulders swept away both roads, which were replaced in 1993 (FEMA 979) at a cost of $570,000.
- *FEMA 979-DR-CA*- (January 1993) Produced the most significant damage to the City of Redlands in recent history. Recurrent flooding during the months of December through March resulted in an over saturation of soil which promoted long-term effects of storm waters in the City and region. Tropical rains melted a heavy snowpack at the higher elevations, producing increased flood activity. With approximately $6.5 Million in damages, but no loss of life, these storms finally claimed both the Alabama Street and Orange Street bridges. The Mission Zanja again produced flooding along its banks at Sylvan Blvd. and Judson Street, resulting in channel improvements at that intersection. Partial collapse of the Zanja occurred again in Sylvan Park. Landslides crushed the Monkey Face Falls waterline, which provides water to residents of Mountain Home Village. One additional water line, serving sparse residences north of the Santa Ana River, was washed out. Repair was affected in October 1993, following subsidence of the Santa Ana River. Several city-owned buildings sustained water damage, including the Smiley Library, which is on the National Register of Historic Places. Landslides occurred in the San Timoteo/Live Oak Canyon area, resulting in road closures for a portion of the three-month Declaration period.
- *FEMA 935-DR-CA*- (February 1992) significant flooding occurred as a result of major storm systems moving through Southern California. The three-day storm system produced most of the 14.96 rainfalls for 1991-92. Historically, the Santa Ana River and Mission Zanja were the cause of the most significant damages, and due to extensive build out of the southeast area, storm runoff produced increased flooding of the Country Club area. Most significantly, water run-off from the populated Country Club area traversed a private elementary school as well as Ford Street and developed subdivisions to the north. School property was damaged as a result of flood waters flowing through the school's parking lot and only street entrance, resulting in a lawsuit against the City. The Bear Valley Pipeline, generally located in Mill Creek

near Greenspot Road and Florida Street, sustained damage to approximately 400 feet of steel pipe and supports. There was no loss of life or public property.

- *February 1980 Floods*- produced a mirror image of prior floods, as extensive damage again occurred as a result of rising storm waters and runoff from the upper regions of the Santa Ana River. The Santa Ana River at Alabama Street changed course and completely washed out the road in two locations, plugged existing culverts, eroded shoulders at various locations, scoured the existing A.C. pavement and washed out the existing pipe on the north end of the river. Minor erosion damage occurred on various City streets and some private property. The Zanja experienced collapse between Redlands Boulevard and State Street near Kendall Drive, as well as in a portion of the channel in Sylvan Park.
- *September 1976 Flood*- an intense local thunderstorm dropped most of its precipitation in a 20-30-minute period. At one spot, 3 ½ inches of rain fell during this time. This heavy rain produced an extremely high rate of runoff, which quickly exceeded the capacity of local drainage systems. Major overflows occurred on the eastern edge of Redlands' downtown business district, flooding the area and depositing mud up to three feet deep. Damages to houses, businesses, roads, and flood control facilities reached $2 million. Mission Zanja overflowed again in 1978, depositing water up to 30 inches deep in some places.
- *Flood of January 1969*- The storms and floods caused the deaths of at least 13 persons. "An intense downpour on January 25, 1969, climaxed a nine-day period of heavy precipitation. From 10 to 20 inches of rain fell in the lowlands, from 25 to more than 50 inches in the mountains. Emergency crews prevented large property damage with sandbagging and other emergency work. Flooding could have been worse, but the ground was not saturated prior to the storms, so water was able to percolate into the ground.
- *February 1969 Flood*- Occurred one month after the January storm series hit. Since the ground was by then saturated, property damage was more severe. The runoff from the storms resulted in the greatest flood of record on many streams in the upper Santa Ana River basin. Flooding from Mission Zanja deposited debris on streets, eroded road shoulders and parts of the Zanja's rock and mortar channel, washed out the bridge at New Jersey Street, damaged several residences, and inundated four citrus packing plans and several commercial businesses. Estimated damages were $304,000." (US Army Corps of Engineers, LA District, Information Bulletin, July 1984.) Flood damages in San Bernardino County from both floods were more than $54,000,000. Damages to residential property in the County were widespread. Damages in the Cucamonga area were particularly heavy: hundreds of people were forced to leave their homes – some for as long as 3 months. Damages to businesses and industrial property in San Bernardino County also were great. Agricultural losses were very severe. Flood damaged sewer lines and sewage-treatment plants posed a threat to the lives and health of many residents of San Bernardino County.
- *OEP-233-DR*- (December 1966) a series of three storms swept through San Bernardino County. December recorded the fourth most severe rainfall period in 76 years of San Bernardino rainfall history with a near-record 4.23. Nearly one-half mile of Alabama Street was washed out during flows up to five feet deep. Violent flows from the Santa Ana River also severely eroded the north levee protecting the Redlands Sewage Treatment Plant. The Zanja again overflowed east of Wabash Avenue, poured through an orange grove and flooded the Crafton School Yard. The University area, as well as the Central Business District, was layered with tons of mud and debris. The north approach to the Kansas Street Bridge was washed

away, and flows undercut the abutment, dropping the north end of the bridge about two feet. The bridges at both Iowa and New Jersey Streets suffered similar damages.

- *OEP-211-DR*- (November 1965) a series of five storm periods, ranging from light to severe, inflicted extensive damage in the region. The most severe of these storms occurred between November 20 and 25, when 11 deaths (6 in San Bernardino County) were attributed to the storms. Property damage estimates greater than $11 million were recorded. Within Redlands' jurisdiction, Alabama Street suffered extensive damage due to flood waters from the upper regions of the Santa Ana River/Mill Creek. Resultant flows put the Redlands Sewage Treatment Plan out of operation, took the city's largest water reservoir off line and produced significant damage throughout the northern portion of Redlands and its Central Business District. The Mission Zanja Creek, which flows through Redlands from a controlled diversion of Mill Creek for irrigation purposes, produced significant levels of mud and debris deposits, and flooded homes along Sylvan Boulevard. Water carried tons of mud from construction-bared slopes along Palo Alto Drive across Country Club Drive and through the storm drain channel, which bisects the golf course. Many intersections throughout the City were flooded, with gutters filled to overflowing with heavy runoff. Floodwater from the overflow of the Zanja flooded the basement of the Crafton Elementary School.
- *November 1965 Flood*- a damaging general storm occurred throughout Southern California, following on the heels of a smaller general storm, which occurred about a week earlier. The antecedent rainfall conditions from the earlier storm left watersheds with a residual moisture content in the soils thus contributing to the accelerated runoff that occurred as a result of the intense precipitation. Above freezing temperatures in the mountain areas further contributed to increased runoff. Major flood-producing waters emanated from the highest watersheds in the 10,000-foot ranges. The storm has been placed in the category of a small flood likely to recur every 5-15 years. Mill Creek flow was of about a 15-year frequency, the Santa Ana Canyon flow about a 5-year frequency, and Cucamonga Creek somewhat greater that a 10-year frequency.
- *August 1965 Flood*- In what was called an “electrifying” flash flood, muddy water cascaded destructively through the City’s streets. The muddy runoff overtaxed the capacities of storm drains and spewed across streets and highways into low-lying areas. Water swept into the basements of the Crafton and Kingsbury schools and flowed through the lobby of Provident Federal Savings at Orange and State and into the basement where the vaults were flooded. Two youths were rescued after they were swept 1 ¾ miles along a storm drain system, portions of which are buried pipe extending through downtown Redlands.
- *April 1965 Flood*- During this flood event, fast-moving water spilled out of the debris-choked channel in numerous spots, creating a serious flood hazard to low-lying homes between Dearborn and University Streets. City officials generally blamed poor maintenance of the Zanja for the flood. One house at Lincoln and Laramie Streets was partially flooded while foot-deep water swirled through the yards of many homes along the Zanja. Small bridges used for access from Sylvan Boulevard to homes on the other side were under water, but withstood the pressure.

- **Probability**

Flooding tends to occur in the summer and early fall because of the monsoon and is typified by increased humidity and high summer temperatures. The County of San Bernardino Flood Control District initiated a report following the floods of January and February 1969, which summed up the repetition of flood

damage in Redlands and vicinity. It stated that "*A review of the occurrence of past floods of serious magnitude in San Bernardino Valley shows that one may be expected on the average of every 20 to 21 years. 'Great floods' have been recorded for the years 1825, 1862, 1867, 1884, 1891, 1916, 1938, 1969 and 1993. Available records indicated that the greatest of these by far was the flood of January 1862. If the reconstructed data for that storm is reasonably accurate, it would have been approximately a once-in-350-years flood!*"

The standard measure for flooding is the "*100-year flood*", a benchmark used by the FEMA to establish a standard of flood control in communities throughout the country. The 100-year flood is also referred to as the "regulatory" or "base" flood. The term 100-year flood is often incorrectly used and can be misleading. The correct designation is "*the 1% annual chance flood*", meaning there is a 1% chance that a flood of that intensity and elevation will occur in any given year, not that the flood will occur once every hundred years.

The 100-year Flood map of the City of Redlands is shown in Figure 1 under the Flood Location and Extent subsection. As defined by FEMA, Zone A, AE, AE Floodway, AH, and AO (lighter shades of blue) indicate a 1% annual chance of flooding; while Zone Shaded X (dark blue) indicates a 0.2% of annual chance of flooding. Complete definitions of flood zone designations are provided in Table 1 under the Flood Location and Extent subsection.

- **Climate Change Considerations**

Climate change acts as an amplifier to flood hazards. Extreme weather events have become more frequent over the past 40 to 50 years and this trend is projected to continue. Rising sea levels and shifting weather patterns (temperate, winds) are expected to have a significant impact on rainfall frequency, intensity and distribution; which in turn will have a significant impact on the frequency of flood occurrences. Additionally, warmer weather patterns increase snowmelt, which in turn produces more runoff to the lower elevations.

5.4.1.4 INFECTIOUS DISEASE

- **Ranking-** *Probability*- Medium; *Impact*- High
- **Description**

Infectious Disease is a broad term used to describe illness caused by a specific type of bacterium, parasite, virus, or fungus organisms. Below is a brief overview of the main infectious disease types:

- *Bacterial Infections*- Responsible for a variety of diseases from strep throat to meningitis and tuberculosis.
- *Fungal Infections*- There are roughly 300 types of fungi known to cause infectious disease. Common types include ringworm, blastomycosis, histoplasmosis, and pneumocystis pneumonia.
- *Parasitic Infections*- Responsible for a variety of diseases including malaria, Chagas disease, and toxocariasis.
- *Viral Infections*- Responsible for a variety of diseases including the common cold, influenza, mononucleosis, smallpox, and HIV/AIDS.

These organisms can be transmitted:

- *Person-to-person (e.g., measles, mumps, meningococcal disease, tuberculosis)*
- *By consuming contaminated food or water, also known as foodborne (e.g.: salmonella, E.coli, botulinum toxin)*
- *Through animal bites (i.e., mosquito, ticks, fleas) also known as vector-borne (e.g.: West Nile virus, dengue, Zika, malaria).*

Newly emerging infectious diseases include Ebola, Zika, Severe acute respiratory syndrome (SARS), Middle East respiratory syndrome (MERS), avian influenza. The current pandemic (COVID-19) is linked to the SARS virus. The SARS coronavirus (SARS-CoV) is a virus identified in 2003. SARS-CoV is thought to be an animal virus from an as-yet-uncertain animal reservoir, perhaps bats, that spread to other animals (civet cats) and first infected humans in the Guangdong province of southern China in 2002. In 2019, in Wuhan China a new coronavirus was discovered. The coronavirus is closely related to the SARS coronavirus. The new virus goes by both COVID-19, standing for coronavirus disease 2019, and SARS CoV-2. Additional detail about the impacts of the COVID 19 can be found under the History section.

Also, of concern are the threats of potential biological terrorism (bioterrorism), the intentional release or spread of disease (or toxins). Bioterrorism, also known as biological warfare, is not new and has been used for centuries. As early as 600 BC, military leaders have implemented practices to poison water supplies and infect citizens/soldiers to gain strategic advantages in their efforts to conquer territories. Today there have been occurrences are both at the large scale (by military) and small scale (by terrorist organizations or individuals). No matter the purpose, the release of organisms could have devastating effects on an international, national, state, or local level if it is a highly infectious disease.

Infectious disease emergencies are incidents caused by these organisms, with the potential for significant illness or death in the population. The impact of infectious disease emergencies can also the local economy through loss of production and costs of treating or preventing spread of the disease. The ability to recover from an infectious disease emergency will depend on:

- *The type of biological agent (organism)*
- *The availability of prophylaxis (i.e., vaccine) for responders and the public*
- *The scale of the current and ongoing exposure*
- *The mode of transmission and whether transmission can be interrupted*
- *Whether the event is affecting critical infrastructure such as transportation, law enforcement, health care, and the medical and food supply chains.*

There are three (3) common levels (or categories) of infectious disease emergencies: Outbreaks, Epidemics, and Pandemics.

- *Outbreak*- when there are more cases than would be normally expected, often suddenly, of an infectious disease in a community or facility.
- *Epidemic*- when there are more cases than would be normally expected of an infectious disease, often suddenly, in a population of a large geographic area.
- *Pandemic*- refers to an epidemic that has spread over several countries or continents, usually affecting a large number of people.

Outbreaks, epidemics, or pandemics can occur when a new virus emerges to which the population has little immunity. Public Health measures are used to control outbreaks, epidemics, or pandemics of

infectious diseases, and are especially important for diseases with high morbidity or mortality and limited medical prophylaxis and/or rapid treatment. Public Health measures to control disease include:

- *Isolation and quarantine of persons or products, and legal closure of food establishments*
- *Control of contaminated food through recall of product*
- *Control of contaminated water through "Do Not Use", "Do Not Drink" or "Boil Water" orders*
- *Vector control spraying to target animals, bugs, and/or inspects*

- **Location and Extent**

An infectious disease incident can occur throughout the entire city any time during year.

- **History**

Infectious diseases have been of concern for many years. It is only recently, because of COVID-19 that the potential risk has been heightened. As sited by the Centers for Disease Control and Prevention (CDC), the 20th century saw three (3) pandemics, the most notable of which was the 1918 Spanish influenza pandemic that was responsible for 20 million deaths throughout the world. The pandemics are now known to represent three (3) different antigenic subtypes of influenza A virus: H1N1 (in 1918), H2N2 (Asian Influenza in 1957), and H3N2 (Hong Kong Influenza in 1968). Not classified as true pandemics are three (3) notable epidemics: a pseudo pandemic in 1947 with low death rates, an epidemic in 1977 that was a pandemic in children, and an abortive epidemic of swine influenza in 1976 that was feared to have pandemic potential. Major influenza epidemics show no predictable periodicity or pattern, and all differ from one another. Evidence suggests that true pandemics with changes in hemagglutinin subtypes arise from genetic reassortment with animal influenza A viruses.

Currently, the world is dealing with the effects of COVID-19. According to the CDC, COVID-19 was first identified in Wuhan, China, in December 2019. Although most people who have COVID-19 have mild symptoms, COVID-19 can also cause severe illness and even death. Some groups, including older adults and people who have certain underlying medical conditions, are at increased risk of severe illness. Because it is a new virus, scientists are learning more each day. New cases of and death rates from COVID-19 are rising globally each day. Potential vaccines are being tested but to date, there is no known cure.

Locally, the City of Redlands has been impacted by COVID-19 both from an economic standpoint, as well as its citizen impacted by the virus. Other infectious disease events include the 2009 H1N1, 2003 Avian Flu, 2015-17 Zika, 2014-16 West African Ebola; 2015 West Nile, 2013 large scale Tuberculosis, 2004 botulism Type A, 2003 West Nile, and the 2020 Hepatitis A outbreak.

- **Probability**

There is an annual risk of experiencing an infectious disease outbreak in the City of Redlands. While there is a continued threat from a novel influenza virus the potential threat of outbreaks and epidemics have been increased due expanding global trade and accessible national and international travel. Infectious disease outbreaks and epidemics occur on an ongoing basis.

Aside from the City of Redlands currently dealing with the effects from COVID-19, annual outbreaks of the seasonal flu usually occur during the late fall through early spring. Most people have natural immunity, and a seasonal flu vaccine is generally available. According to the CDC, in a typical year, approximately 5

to 20 percent of the population gets the seasonal flu and flu-related deaths range from 3,300 to 48,600 (average 23,600).

Bird flu (H5N1) is an influenza A virus subtype that is highly contagious among birds; although rare, some human infections with the Bird flu virus have occurred. Most confirmed cases have occurred in Asia, Africa, the Pacific, Europe and the Near East. According to the CDC, there are currently no confirmed human cases of Bird flu infections but it remains a serious concern with the potential to cause a deadly pandemic.

Swine flu (H1N1) was first detected in the United States in April 2009. This virus was a unique combination of influenza virus genes never previously identified in either animals or people. The Swine flu virus caused more illness in young people and pregnant women than is usual for prior flu seasons, and was declared a Worldwide Pandemic by the World Health Organization.

- **Climate Change Considerations**

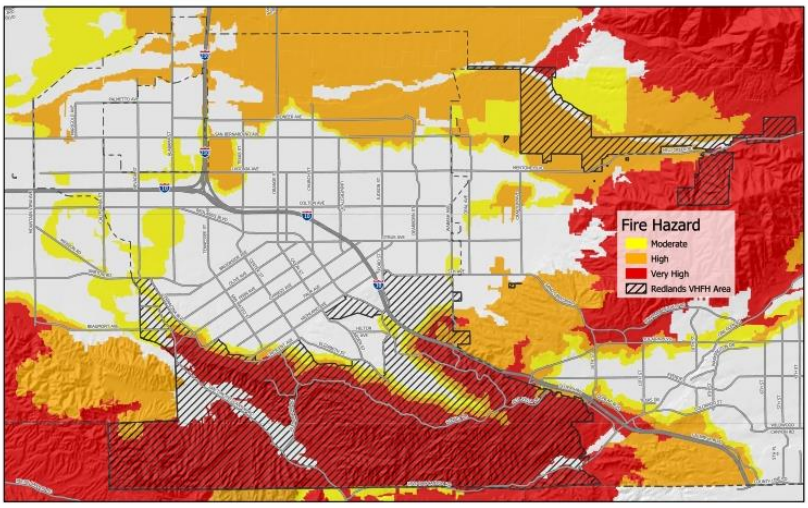
While many vector-borne diseases, such as malaria, yellow fever, dengue, and murine typhus, are rarely seen in the United States, the United States are susceptible to these vector-borne diseases. Many vector-borne diseases are climate sensitive and ecological shifts associated with climate change are expected to impact the distribution and incidences of these diseases. Changes in temperature and precipitation directly affect vector born disease transmission through pathogen-host interaction, and indirectly through ecosystem changes and species composition. As temperatures increases vectors can spread into new areas that were previously too cold. For example, two (2) mosquito vectors that carry malaria are now found at the U.S.-Mexico border.

5.4.1.5 WILDFIRE

- **Ranking-** *Probability*- High; *Impact*- High
- **Description**

Wildfires can be started by natural and mad-made causes. There are three (3) different classes of wild land or wildfires: 1) surface; 2) ground; and, 3) crown. A “Surface fire” is the most common type and burns along the floor of a forest, moving slowly and killing or damaging trees. A “Ground fire”; usually started by lightning, are fed by subterranean roots, and smolder on or below the forest floor. A “Crown fire” spread rapidly by wind and move quickly by jumping along the tops of trees. Wildfires can be classified as either a wildland fire or a wildland-urban interface (WUI) fire. Wildland fires involve situations where a fire occurs in an area that is relatively undeveloped except for the possible existence of basic infrastructure such as roads and power lines. A WUI fire includes situations in which a wildland fire enters an area that is developed with structures and other human developments. In WUI fires, the fire is fueled by both naturally occurring vegetation and the urban structural elements themselves. According to the National Fire Plan issued by the U.S. Departments of Agriculture and Interior, the wildland-urban interface is defined as “*…the line, area, or zone where structures and other human development meet or intermingle with undeveloped wildland or vegetative fuels.*”

The WUI fire can be subdivided into three (3) categories (NWUIFPP, 1998): 1) classic wildland-urban interface; 2) the mixed wildland-urban interface; and, 3) the occluded wildland-urban interface. The *classic wildland-urban interface* exists where well-defined urban and suburban development presses up against open expanses of wildland areas. The *mixed wildland-urban interface* is characterized by isolated



homes, subdivisions, and small communities situated predominantly in wildland settings. The *occluded wildland- urban interface* exists where islands of wildland vegetation occur inside a largely urbanized area. Generally, many of the areas at risk within the City of Redlands fall into the classic wildland-urban interface category.

Certain conditions must be present for a wildfire hazard to occur; a large source of fuel must be present, the weather must be conducive (generally hot, dry, and windy), and fire suppression sources must not be able to easily suppress and control the fire. The cause of a majority of wildfires is human-induced or lightning; however, once burning, wildfire behavior is based on three (3) primary factors: 1) fuel; 2) topography; and, weather. Fuel will affect the potential size and behavior of a wildfire depending on the amount present, its burning qualities (e.g., level of moisture), and its horizontal and vertical continuity. Topography affects the movement of air, and thus the fire, over the ground surface. The terrain can also change the speed at which the fire travels, and the ability of firefighters to reach and extinguish the fire. Weather as manifested in temperature, humidity and wind (both short and long term) affect the probability, severity, and duration of wildfires. Other factors that create concern are drought conditions and development (the build environment). Drought conditions bring on contributing concerns in that it can lead to relatively drier conditions and leave reservoirs and water tables lower; thus, creating hotter fires and less water to fight the fires. The expansion of the built environment into previously unoccupied areas introduces more people to the hazard and in some cases make response actions more challenging.

- **Location and Extent**

The climate, topography, and vegetation in Redlands is conducive to annual wildfire events. California Department of Forestry and Fire Protection, Fire and Resource Assessment Program (CDF-FRAP) was established and mandated to map areas of significant fire hazards based on fuels (vegetation), terrain, weather, and other relevant factors. These zones, referred to as Fire Hazard Severity Zones (FHSZ), define the application of various mitigation strategies to reduce risk associated with wildland fires. CDF-FRAP developed data that displays the relative risk to areas of significant population density from wildfire. This data is created by intersecting residential housing unit density with proximate fire threat, to give a relative measure of potential loss of structures and threats to public safety from wildfire. The maps below show the “very high” Fire Hazard Severity Zones located in Redlands for state and local responsibility areas (**Figure 5.9**).

Figure 5.9- Fire Hazard Severity Zones- City of Redlands

Due to a combination of topography, weather, and fuel, and exacerbated by potentially high winds and limited access, the southern portion of the City of Redlands is highly susceptible to wildland fire hazards. The slopes of San Timoteo and Live Oak canyons, the Badlands to the south, and the Crafton Hills to the east are not only difficult for firefighters and their equipment to reach, but the hill's steepness and configuration can result in the rapid upslope spread of fire.

Limited rainfall, low humidity, and seasonal high temperatures continue to contribute to the desiccation of the grasses and chaparral which cover the foothills, providing prime fuel for intense burns. Although some of the canyons are shielded from the direct impact of the powerful, dry Santa Ana winds, their occurrence generally aggravates the fire hazard. In addition, the presence of human activities in or near a wildland area dramatically increases the risk of a major fire due to careless smokers, illegal campfires, and other related risks. As noted above, the canyon areas located at the southwest of the City (and the surrounding areas) are the zones of highest hazard.

- **History**

Historically, fires in the City of Redlands have started in either San Timoteo or Live Oak Canyon and burn from a western to easterly direction, driven by prevailing winds and topography. **Figure 5.10** depicts the location of significant wildfires since 1950 in the City of Redlands, while **Table 5.4** shows the year and acres of reported wildfires in the City of Redlands since 2000.

Figure 5.10- Fire History for the City of Redlands and Vicinity, 1950-2020

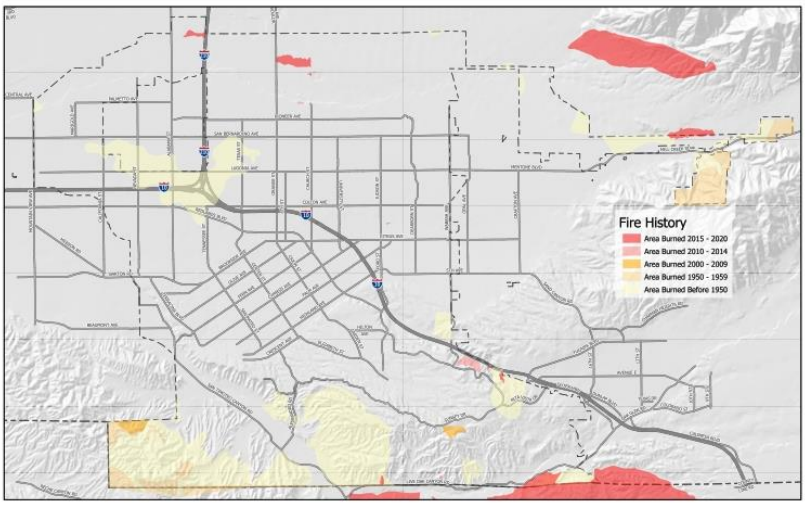


Table 5.4- Recent Fires Occurring in the Vicinity of the City of Redlands, 2000-2020

Name	Acres	Year
Reche	1,798	2001
Locust	1,899	2003
Mill Creek	173	2004
Hatchery	200	2005

Bruder Fire	147	2020

- *Reche/Redlands Fires*- This wind-driven fire originated in Riverside County, in an area known as Reche Canyon. The fire burned northeast over a period of approximately 2 hours, entering San Bernardino County and threatening residents in the area of San Timoteo Canyon and Pilgrim Road. We were notified by Riverside County that the fire was moving into our county and expected to burn into San Timoteo Canyon. They requested us to assemble engines for structure protection along Pilgrim Road in San Timoteo Canyon. The fire was diverted away from these structures because of backfiring operations, air support and hand crews into San Timoteo. Overall, the fire damaged approximately 700 acres by containment.
- *Compost Fire*- This fire occurred within the High Fire Hazard Area of the City of Redlands. This area is subject to a great deal of commuter and transient activity between counties. Fire was located at 1901 Alessandro Road, and caused by illegal dumping of organic materials within the San Timoteo Canyon. Chemical reaction resulted in spontaneous combustion of the compost heap at Sunset Hills Kennels. A unified command was established, including numerous Strike Teams, Hand Crews, Fixed Wing Aircraft, Helicopters and Manpower. The fire consumed 140 acres, and resulted in one firefighter injury.
- *Canyon Fire*- Sparking from railroad train traffic ignited this vegetation fire, which started adjacent to the Southern Pacific tracks north of San Timoteo Canyon Road and west of Alessandro Road. The high temperature was 99 degrees, with humidity at 24%. The fire was one-quarter acre in size, with medium fuel and moderate rate of spread. Winds were out of the west and steady, at 10 miles per hour. Limited access and erratic winds increased the spread of the fire, which spotted along the base of the hills, west of Smiley Ridge. The fire spread north, up the west slope of the Smiley Ridge subdivision. Winds increased, causing a spot fire in the flats east of Alessandro, adjacent to Sunset Hills Ranch. Increased erratic winds caused another spot fire to occur north of the first, now in heavier brush. Incoming resources attempted a hose lay up the flanks, but terrain and weather conditions advanced the spot out of reach. Due to topography and weather conditions, additional resources were ordered. Due to the fire's potential, a unified command was established, and structure groups assigned. Aircraft dropped on all flanks of the fire, and dozers cut lines on two divisions. Hand crews were also placed on all Divisions to facilitate a line between the burned and unburned areas. The fire was 50% contained around midnight and 70% contained by 0600 hours on 9/10/96. The fire consumed 250 acres, with no loss of structures. Effective suppression tactics, ignition resistant construction requirements, residential sprinklers, and fuel modification allowed this fire to move eastward with no structure loss or damage. The fire then presented the potential of structure loss in older existing neighborhoods where these types of fuel modification had not been conditioned 15-20 years previous. This posed a threat for conflagration potential, and this is where the Fire Department would like to address hazard mitigation through grant implementation for existing property owners. Costs shown in damage figures are strictly related to overhead, manpower and equipment.

- **Probability**

The majority of work done to estimate the probability of wildfire occurrence has been around identifying the potential areas for wildfire to occur. As previously mentioned, vegetation, weather, and topography were the significant elements in identifying areas of potential threat to wildfire occurrences. The area south and east of the city of Redlands is marked by mountains, foothills, and canyons are covered in susceptible vegetation. A large amount of the native vegetation in the Redlands area is commonly called chaparral, it is a dense and scrubby bush that has evolved to persist in a fire-prone habitat. Chaparral

plants will eventually age and die; however, they will not be replaced by new growth until a fire rejuvenates the area. Chamise, manzanita and ceanothus are all examples of chaparral which are quite common in the Redlands area. The City of Redlands climate, with its warm and dry summers, contributes to low relative humidity and low fuel moistures. When combined with high fuel loading, the potential for a catastrophic wildfire event is significant. Three (3) weather conditions specific to Redlands that may cause the ignition and/or impact the behavior of wildfires are as follows:

- *Thunderstorms and the associated lightning are a significant source of fire starts, and usually occurs mid to late summer*
- *High winds can become steady up to 20 mph and gust up to 30-40 mph throughout the year but are most likely to exacerbate wildland fires during the months of August through October when dry vegetation conditions are generally present*
- *Hot, dry conditions most commonly occur in August and September*

This knowledge and understanding are a key driver in the methodology of the CDF-FRAP program. According the CDF, the FRAP "very high" Fire Hazard Severity Zone maps are based on data and models of, potential fuels over a 30- to 50-year time horizon and their associated expected fire behavior and expected burn probabilities to quantify the likelihood and nature of vegetation fore exposure to buildings. This indicates a very high likelihood of wildfire occurrence in the area. As such, Redlands is susceptible to annual wildfire risk. An aspect of wildfires that needs greater consideration within the City of Redlands is man-made caused wildfires. Over the past few years, the City has noticed an increase in the number of wildfires started by arsonists, illegal homeless encampments, and improper use of fireworks. All of these factors have increased the probability of wildfires in the City.

- **Climate Change Considerations**

Climate change plays a significant role in wildfire hazards. The changing conditions from wet to dry can create more fuel; the increased possibility of high winds increase risk and present a challenge, and drought conditions could hinder ability to contain fires. Large wildfires also have several indirect effects beyond those of a smaller, local fire. These may include air quality and health issues, road closures, business closures, and other forms of losses. Furthermore, large wildfires increase the threat of other disasters such as landslide and flooding.

5.4.1.6 WINDSTORM

- **Ranking**- *Probability*- High; *Impact*- Medium
- **Description**

Winds are often referred to according to their strength, and the direction from which they are blowing. Wind is caused by the difference in pressure from one point on the earth's surface to another. Wind is created by air moving from the area of "*higher*" pressure to the area of "*lower*" pressure; the difference in pressure over a certain distance, determines the strength of the wind. Air does not move directly from the point of highest pressure to the point of lowest pressure. The earth's rotation affects the air flow by deflecting it to the right. This effect is called the Coriolis Effect. In the Northern Hemisphere, this causes air to flow clockwise around high-pressure areas and counter-clockwise around low-pressure areas.

Winds are categorized by types and each type is associated with wind speeds: breeze (<0-31 mph), gale (32-65 mph), storm (66-72 mph), and hurricane (73-139> mph). Within each category are sub classifications with differential names depending on geographic location (i.e., tropical depression, tropical storm/cyclone) and/or categories (i.e., category 3 hurricane). Damage from winds account for half of all severe reports in the lower 48 states and is more common than damage from tornadoes. Winds are also measured using the Beaufort Scale. The Beaufort Scale categories winds by wind speed, using Force categories between 0-12 to measure speed and summarize descriptions (**Table 5.5**).

Table 5.5- Beaufort Scale

Category (Force)	Speed (MPH)	Description
0	0-1	Calm. Smoke rises vertically and the sea is flat.
1	1-3	Light air. The direction of the wind is shown by drifting smoke, but not wind vanes.
2	4-7	Light breeze. Wind is felt on the face, leaves rustle, and wind vanes move. Small wavelets appear on the ocean, but do not break
3	8-12	Gentle breeze. Leaves and small twigs are in motion, and light flags extend. Larg3 wavelets appear on the ocean and crests begin to break.
4	13-18	Moderate breeze. Dust and loose paper become airborne, and small branches move. Small waves appear on the ocean.
5	19-24	Fresh breeze. Small trees begin to sway and moderate waves appear.
6	25-31	Strong breeze. Large branches are in motion, and holding an umbrella becomes difficult. Large waves begin to form.
7	32-38	Near gale. Whole trees are in motion, and walking against the wind can be hard. Foam from breaking waves is blown in streaks.
8	39-46	Gale. Walking is difficult and twigs break off trees.
9	47-54	Severe gale. There is slight structural damage, and the crests of waves begin to topple.
10	55-63	Storm. Trees are uprooted and there is considerable damage to structures. Very high waves form in long, overhanging crests.
11	63-72	Violent storm. There is widespread structural damage, exceptionally high waves form, and the ocean is completely covered in foam.
12	>73	Hurricane. There is devastating structural damage. On the ocean, the air is filled with foam and spray.

For the purposes of the LHMP, windstorms include both 1) cyclonic winds and 2) significant straight-line, with little-to-no precipitation.

Cyclonic winds are the wind which swirl counter-clockwise in the northern hemisphere or clockwise in the southern hemisphere. The biggest differences between hurricanes and tornadoes are how big they are and how long they last. Hurricanes are typically hundreds of miles in diameter, with high winds and heavy rains over the entire region. Hurricanes can last for days or even weeks. Tornadoes usually last no more than a few minutes.

- *Hurricane*- A rotating low-pressure weather system (storm) that has organized thunderstorms but no fronts (a boundary separating two air masses of different densities. Hurricanes originate in the Atlantic basin, which includes the Atlantic Ocean, Caribbean Sea, and Gulf of Mexico, the eastern North Pacific Ocean, and, less frequently, the central North Pacific Ocean. Hurricanes develop in stages; working their way up to hurricane status:
  - *Tropical Wave*- A low-pressure trough moving generally westward with the trade winds.

- *Tropical Disturbance*- An organized area of thunderstorms that usually forms in the tropics. Typically, they maintain their identity for 24 hours and are accompanied by heavy rains and gusty winds.
- *Tropical Cyclone*- A generic term for any organized low pressure that develops over tropical and sometimes sub-tropical waters. Tropical depressions, tropical storms, and hurricanes are all example of tropical cyclones.
- *Tropical Depression*- An organized area of low pressure in which sustained winds are 38 mph or less.
- *Tropical Storm*- A tropical cyclone with maximum sustained wind speeds that range from 39 to 73 mph.
- *Hurricane*- A tropical cyclone with sustained winds of at least 74 mph.

After the storm reaches Hurricane status, the Saffir-Simpson Hurricane Wind Scale is used to categorizes hurricanes by sustained wind speeds (**Table 5.6**).

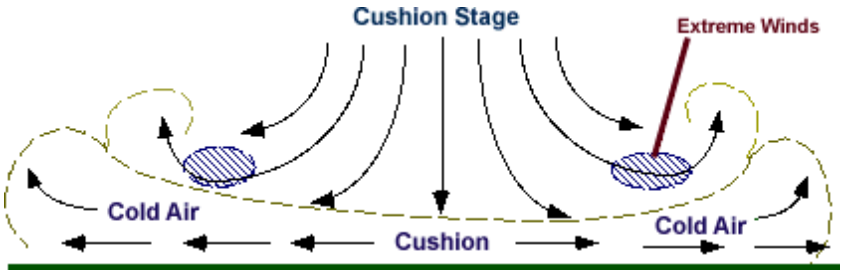
Table 5.6- Saffir-Simpson Hurricane Wind Scale

Category	Wind Speed	Description
1	74-95	Very dangerous winds will produce some damage: Well-constructed frame homes could have damage to roof, shingles, vinyl siding and gutters. Large branches of trees will snap and shallowly rooted trees may be toppled. Extensive damage to power lines and poles likely will result in power outages that could last a few to several days
2	96-110	Extremely dangerous winds will cause extensive damage: Well-constructed frame homes could sustain major roof and siding damage. Many shallowly rooted trees will be snapped or uprooted and block numerous roads. Near-total power loss is expected with outages that could last from several days to weeks.
3	111-129	Devastating damage will occur: Well-built framed homes may incur major damage or removal of roof decking and gable ends. Many trees will be snapped or uprooted, blocking numerous roads. Electricity and water will be unavailable for several days to weeks after the storm passes
4	130-156	Catastrophic damage will occur: Well-built framed homes can sustain severe damage with loss of most of the roof structure and/or some exterior walls. Most trees will be snapped or uprooted and power poles downed. Fallen trees and power poles will isolate residential areas. Power outages will last weeks to possibly months. Most of the area will be uninhabitable for weeks or months
5	>156	Catastrophic damage will occur: A high percentage of framed homes will be destroyed, with total roof failure and wall collapse. Fallen trees and power poles will isolate residential areas. Power outages will last for weeks to possibly months. Most of the area will be uninhabitable for weeks or months

- *Tornado*- A tornado is a rapidly (violent) rotating column of air that is in contact with both the surface of the Earth and a cumulonimbus cloud or, in rare cases, the base of a cumulus cloud. Tornadoes come in many shapes and sizes, and are often visible in the form of a condensation funnel originating from the base of a cumulonimbus cloud, with a cloud of rotating debris and dust beneath it. Most tornadoes have wind speeds less than 110 miles per hour, are about 250 feet across, and travel a few miles before dissipating. The most violent tornadoes are capable of tremendous destruction with wind speeds of up to 300 mph. They can destroy large buildings, uproot trees and throw vehicles hundreds of yards. They can also drive straw into trees. Damage paths can be in excess of one mile wide to 50 miles long.

Most tornadoes form from thunderstorms. They need warm, moist air from the Gulf of Mexico and cool, dry air from Canada. When these two air masses meet, they create instability in the atmosphere. A change in wind direction and an increase in wind speed with increasing height creates an invisible, horizontal spinning effect in the lower atmosphere. Rising air within the updraft tilts the rotating air from horizontal to vertical. An area of rotation, 2-6 miles wide, now extends through much of the storm. Most strong and violent tornadoes form within this area of strong rotation. Tornadoes are measured by the Fujita Tornado Scale (**Table 5.7**) which classifies tornadoes by intensity categories, based on the maximum winds occurring within the funnel.

Table 5.7- Fujita Tornado Scale

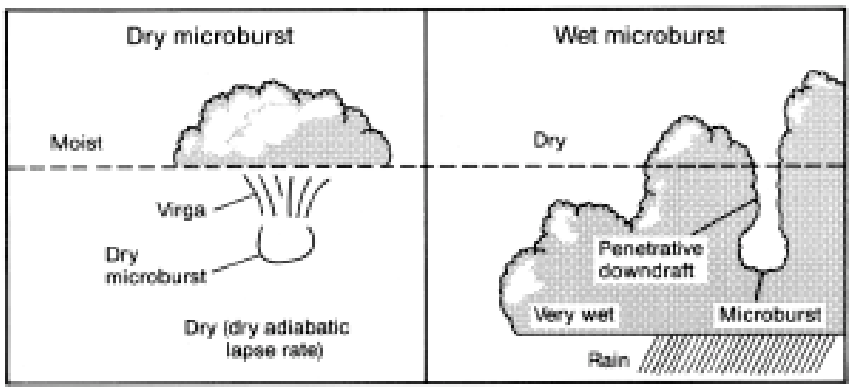


Category	Wind Speed	Description
F0	40-72 miles per hour	Gale Tornado. Light Damage: Some damage to chimneys; breaks twigs and branches off trees; pushes over shallow-rooted trees; damages signboards; some windows broken; hurricane wind speed begins at 73 miles per hour.
F1	73-112 miles per hour	Moderate Tornado. Moderate Damage: Peels surfaces off roofs; mobile homes pushed off foundations or overturned; outbuildings demolished; moving autos pushed off the roads; trees snapped or broken.
F2	113-157 miles per hour	Significant Tornado. Considerable Damage: Roofs torn off frame houses; mobile homes demolished; frame houses with weak foundations lifted and moved; boxcars pushed over; large trees snapped or uprooted; light-object missiles generated.
F3	158-206 miles per hour	Severe Tornado. Severe Damage: Roofs and some walls torn off well-constructed houses; trains overturned; most trees in forests uprooted; heavy cars lifted off the ground and thrown; weak pavement blown off roads.
F4	207-260 miles per hour	Devastating Tornado. Devastating Damage: Well-constructed homes leveled; structures with weak foundations blown off some distance; cars thrown and disintegrated; large missiles generated; trees in forest uprooted and carried some distance away.
F5	261-318 miles per hour	Incredible Tornado. Incredible Damage: Strong frame houses lifted off foundations and carried considerable distance to disintegrate; automobile-sized missiles fly through the air in excess of 300 feet (100 meters); trees debarked; incredible phenomena will occur.
F6-12	>319 miles per hour	The maximum wind speeds of tornadoes are not expected to reach the F6 wind speeds.

Straight-line winds are common with the gust front of a thunderstorm or originate with a downburst from a thunderstorm. The winds can gust to 130 mph and winds of 58 mph or more and can last for more than twenty minutes. Straight-line wind events are most common during the spring when instability is highest and weather fronts routinely cross the country. These storms have wind speeds capable of reaching up to 100 mph, capable of producing a path of damage extending for hundreds of miles. Terms and characteristics of damaging straight-line wind events include:

- *Derecho*- Derechos, Spanish for “straight”, are a widespread, long-lived, straight-line wind storm event that is associated with a land-based, fast-moving group of severe thunderstorms. Derechos can cause hurricane-force winds, tornadoes, heavy rains, and flash floods. A warm-

weather phenomenon, derechos occur mostly in summer, especially during June, July, and August.



- *Updrafts/Downdraft*- Localized regions of warm or cool air will exhibit vertical movement (updrafts/downdrafts). Updrafts are small-scale current of rising air, often within a cloud. A mass of warm air will typically be less dense than the surrounding region, and so will rise until it reaches air that is either warmer or less dense than itself. The converse will occur for a mass of cool air, and is known as subsidence. This movement of large volumes of air, especially when regions of hot, wet air rise, can create large clouds, and is the central source of thunderstorms. Drafts can also be conceived by low or high-pressure regions. A low-pressure region will attract air from the surrounding area, which will move towards the center and then rise, creating an updraft. A high-pressure region will then attract air from the surrounding area, which will move towards the center and sink, spawning a downdraft.
- *Downburst*- Strong, downdraft winds flowing out of a thunderstorm cell. A downburst is a straight- direction surface wind in excess of 39 miles per hour caused by a small-scale, strong downdraft from the base of convective thundershowers and thunderstorms. Downbursts of all sizes descend from the upper regions of severe thunderstorms when the air accelerates downward through either exceptionally strong evaporative cooling or by very heavy rain, which drags dry air down with it. When the rapidly descending air strikes the ground, it spreads outward in all directions, like a fast-running faucet stream hitting the bottom of the sink.

There are two (2) sub-categories of downbursts: the larger macrobursts and small microbursts.

Macroburst- Macrobursts are downbursts with winds up to 117 miles per hour which spread across a path greater than 2.5 miles wide at the surface and which last from 5 to 30 minutes.

Microburst- Microbursts are strong, damaging winds which strike the ground and often give the impression a tornado has struck. They frequently occur during intense

thunderstorms. The origin of a microburst is downward moving air from a thunderstorm's core. But unlike a tornado, they affect only a rather small area, less than 2.5 miles in diameter from the initial point of downdraft impact. An intense microburst can result in damaging winds near 170 miles per hour and often lasts for less than five minutes. There are two (2) types of microburst windstorms: dry and wet.

- *Gust Front*- A gust front is the leading edge of rain-cooled air that clashes with warmer thunderstorm inflow. Gust fronts are characterized by a wind shift, temperature drop, and gusty winds out ahead of a thunderstorm. Sometimes the winds push up air above them, forming a shelf cloud or detached roll cloud.
- *Haboob*- Haboobs, Arabic for blasting/drifting, is a type of intense dust storm carried on an atmospheric gravity current (i.e., thunderstorm), also known as a weather front. When a thunderstorm collapses, and begins to release precipitation, wind directions reverse, gusting outward from the storm and generally gusting the strongest in the direction of the storm's travel. Haboobs occur regularly in arid regions throughout the world.

In Southern California, Santa Ana winds are considered a windstorm event. Santa Ana winds are katabatic winds- Greek for *"flowing downhill"*. These winds occur below the passes and canyons of the coastal ranges of Southern California and in the Los Angeles basin. Santa Ana winds often blow with exceptional speed in the Santa Ana Canyon (the canyon from which it derives its name). Santa Ana winds are strong, extremely dry (low humidity) down-slope winds that originate from cool, dry high pressure air masses in the Great Basin region (the high plateau east of the Sierra Mountains and west of the Rocky Mountains, including most of Nevada and Utah) and affect Southern California. These winds come up, over, and are pulled southward down the eastern side of the Sierra Nevadas and into the Southern California region. The air warms as it descends toward the California coast at the rate of 5 degrees Fahrenheit per 1000 feet due to compressional heating. Thus, compressional heating provides the primary source of warming. The air is dry since it originated in the desert, and it dries out even more as it is heated.

Forecasters at the National Weather Service offices in Oxnard and San Diego usually place speed minimums on these winds and reserve the use of "*Santa Ana*" for winds greater than 25 knots. These winds accelerate to speeds of 35 knots as they move through canyons and passes, with gusts to 50 or even 60 knots. Santa Ana winds can happen anytime during the year but are most prevalent in the autumn and winter months. The most significant hazard associated with Santa Ana winds is an increased wildfire danger, but Santa Ana winds can also cause downed trees and power lines, and property damage, as well as causing potentially hazardous conditions for RV's, semi-trailers, aircraft and boaters.

- **Location and Extent**

Although tornadoes and hurricanes are rare, the entire City of Redlands is susceptible to various types of windstorms.

- **History**

As mentioned, tornadoes and hurricanes are rare in the area but the City of Redlands has experienced significant straight-line winds events. Over the past five (5) years, the City has noticed an increase in local straight-line wind events. Many of the straight-line wind events do not rise to the level of significance or require the activation of the City's EOC but they do leave behind a trail of damage. The straight-line wind

events range in strength of wind and duration but they all have similar impacts; downed trees and powerlines, injuries, and minor structural damage. These straight-line wind events create issues for local resident and business, including property damage and traffic congestion.

- **Probability**

The City of Redlands is at risk of windstorms at any given time during the calendar year. However, as previously mentioned they are more prevalent in the autumn and winter months. Santa Ana winds, which commonly occur between October and February, and can, reach speeds of more than 100 miles per hour. Tornadoes and/or Hurricanes occur infrequently in California, which has a statewide average of just 5 tornadoes/hurricanes a year. This is significantly less than states located in the US' "*tornado alley*", which can experience as many as 50–100 tornadoes per year or along the southern Atlantic US/Gulf of Mexico region which can experience twelve (12) named storms, six (6) hurricanes, and three (3) major hurricanes each year**.** In addition, most California tornadoes and hurricanes are considered "weak"; the historical average occurrence rate of Strong – Violent events in California is zero.

- **Climate Change Considerations**

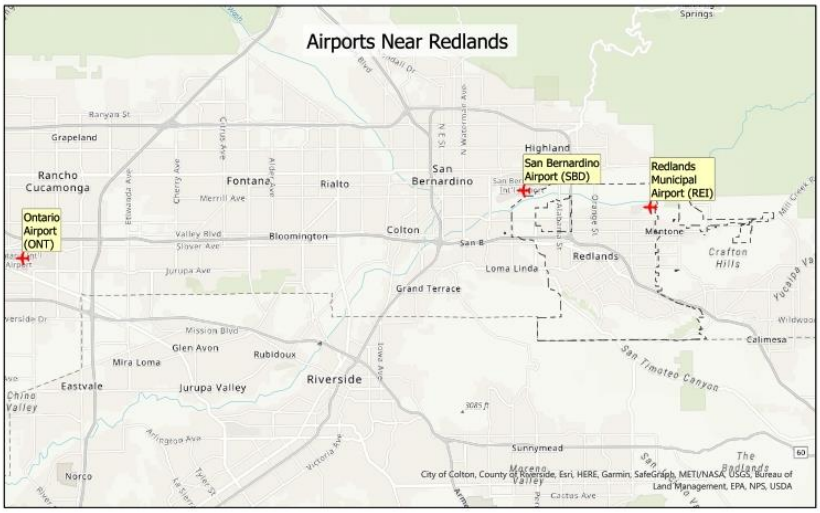
Climate change will play a significant role with windstorm events. The changing conditions are expected to cause a significant amplification to many existing conditions. Because of this, climate change might impact the frequency and intensity of windstorms. Climate change, although still being studied, could have an effect on high- and low-pressure zones. High- and low-pressure zones are created by many factors, but many are related to uneven heating of the earth's surface by the sun. Many of the factors that go into the heating of the earth's surface, but many may be impacted by Climate change (i.e., type of vegetation in areas impact ability to absorb heat, amount of snow cover which reflects heat). In addition to altering and possibly increasing frequency of significant winds in the area. This indicates that the City of Redlands could experience a greater number of windstorm events in the future.

5.4.2 TIER II

The hazards, in alphabetical order, under Tier 1I include: Aircraft Accident/Incident; Civil Disturbance; Drought; Extreme Temperature, Hazardous Material Accident; Infestation; Landslide; Technology Disruption; and, Train Accident/Incident.

5.4.2.1 AIRCRAFT ACCIDENT/INCIDENT

- **Ranking-** *Probability*- Medium; *Impact*- Medium
- **Description**



Aircraft Accidents/Incidents can occur "*in-flight*" or "*on ground*", that either cause death and injuries or cause substantial damage to an aircraft and/or airport facilities. This can include fatalities or injuries as a result of: 1) being in the aircraft, 2) direct contact with any part of the aircraft, including parts which have become detached from the aircraft, or 3) direct exposure to jet blast (with excepts). Damages includes accidents/incidents that affect the structural strength, performance or flight characteristics of the aircraft and/or airport requiring major repair or replacement and incidents where the aircraft is missing or is completely inaccessible. For purposes of this LHMP, the definition of "aircraft accident" does not include "unmanned aircraft accident,".

- **Location and Extent**

Since 1947, the Redlands Municipal Airport (REI) has been serving the area's aviation community. Redlands Municipal Airport is a 180-acre facility with a 4,570 foot long by 75-foot-wide runway serving

approximately 240 based aircraft. In addition to the Redlands Municipal Airport, the Ontario International Airport (ONT) and the San Bernardino International Airport (SBD) are in close proximity to the City of Redlands. **Figure 5.11** depicts the location of the three (3) local airports in the general area of the City of Redlands.

Figure 5.11- Airports Around the City of Redlands

In addition to the local airports, there are four (4) large commercial airports operating in the region. The City of Redlands is transected by the flight pattern from LAX, ONT, SBD, and March Air Reserve Base.

- **History**

The City of Redlands has suffered several accidents/incidents in the past. **Table 5.8** provides an overview of the events that have occurred since 2008, according to the National Transportation Safety Board (NTSB) Case Analysis and Reporting Online (CAROL) Query Tool. All reported aircraft accidents involved small craft, aircraft.

Table 5.8- Aircraft Accidents Since 2008

Accidents	Total	Dates
Incidents	8	
Incident Injury Type		
Fatal	*3*	*Jun 2020, Feb 2010, Sep 2009*
Serious	*1*	*Sep 2011*
Minor	*1*	*Mar 2015*
None	*3*	*May 2015, Jul 2013, Sep 2011*

- **Probability**

The possibility of an aircraft accident/incident occurring in the City of Redlands will continue to exist due to the location (and existing use) of the Redlands Municipal Airport, SBD, ONT, and March Air Reserve Base. It is worth to note, that the Redlands Municipal Airport also supports the US Forest Service and CAL FIRE NOT heliports during fire seasons. Based on historic events and known increase safety standards, it is anticipated that future accidents/incidents will be minimal. The risk to the City of Redlands associated with these types of accidents/incidents is similar to other general aviation airports in southern California.

- **Climate Change Considerations**

While there are many devices that monitor and/or track weather conditions, it is expected that changing conditions are going to impact air travel. From the simplest of impacts from temperatures altering takeoffs and landing, to increase in rains and winds altering flight patterns, changes in our environment could increase the likelihood of an aircraft accidents/incidents.

5.4.2.2 CIVIL DISTURBANCE

- **Ranking-** *Probability*- Medium; *Impact*- Medium
- **Description**

Civil Disturbance is a term generally used to describe disorderly conduct or a breakdown of orderly society by a large group of people. Civil Disturbance can range from a form of protest against major socio-political problems to riots.

- **Location and Extent**

Civil Disturbance can occur in any part of the City of Redlands. However, it is generally located within larger, more concentrated, commercial areas.

- **History**

No significant historical incidents to report to date. However, there have been a few small incidents that have occurred due to recent social and political movements.

- **Probability**

There are no studies that predict the probability of civil disturbance occurrences.

- **Climate Change Considerations**

While there is no direct linkage between climate change and civil disturbances, there could be indirect linkages. As climate change impacts are either felt or perceived to be felt it could ignite passions within people to demonstrate against possible causes or enablers.

5.4.2.3 DROUGHT

- **Ranking-** *Probability*- Medium; *Impact*- Low
- **Description**

Drought can best be thought of as a condition of water shortage for a particular user in a particular location. Drought is a gradual phenomenon and generally are not signified by one or two dry years. California's extensive system of water supply infrastructure (reservoirs, groundwater basins, and interregional conveyance facilities) generally mitigates the effects of short-term dry periods for most water users. However, drought conditions are present when a region receives below-average precipitation, resulting in prolonged shortages in its water supply, whether its water supply is provided by atmospheric, surface, or ground water means. A drought can last for months or years, or may be declared after as few as 15 days.

Drought is not a purely physical phenomenon, but rather an interplay between natural water availability and human demands for water supply. The precise definition of drought is made complex owing to political considerations, but there are generally four (4) types of conditions that are referred to as drought:

- *Meteorological drought is brought about when there is a prolonged period with less than average precipitation.*
- *Agricultural drought is brought about when there is insufficient moisture for average crop or range production. This condition can arise, even in times of average precipitation, owing to soil conditions or agricultural techniques.*
- *Hydrologic drought is brought about when the water reserves available in sources such as aquifers, lakes, and reservoirs fall below the statistical average. This condition can arise, even in times of average (or above average) precipitation, when increased usage of water diminishes the reserves.*
- *Socioeconomic drought associates the supply and demand of water services with elements of meteorological, hydrologic, and agricultural drought. Socioeconomic drought occurs when the demand for water exceeds the supply as a result of weather-related supply shortfall.*

The U.S. Drought Monitor, established in 1999, is a weekly map of drought conditions produced jointly by the National Oceanic and Atmospheric Administration, the U.S. Department of Agriculture, and the National Drought Mitigation Center at the University of Nebraska-Lincoln. The map is based on measurements of climatic, hydrologic and soil conditions as well as reported impacts and observations from more than 350 contributors around the country. Droughts are generally categorized into five (5) categories: D1) Abnormally Dry, D2) Moderate Drought; D3) Severe Drought; D4) Extreme Drought; and, D5) Exceptional Drought. There are many considerations that are factored into the determining the drought status; these include consideration of status on the: Palmer Drought Severity Index; CPC Soil Moisture Model; USGS Weekly Streamflow; Standardized Precipitation Index; and Objective Drought Indicator Blends.

- **Location and Extent**

The entire City of Redlands is subject to drought conditions and water shortages.

- **History**

It was only recently that the State of California emerged from a proclaimed a State of Emergency due to extremely dry conditions. The longest duration of drought (D1-D4) in California lasted 376 weeks beginning on December 27, 2011 and ending on March 5, 2019. The most intense period of drought occurred 2014 and 2017, where at its peak over 50% of the land in California was under Exceptional Drought (D4) conditions. The City of Redlands has experienced several droughts, most recently during the statewide drought from 2011-2019.

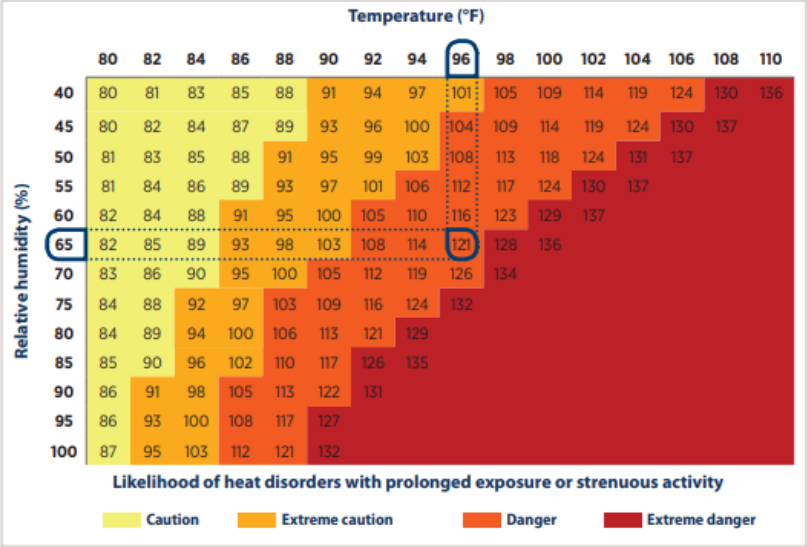
- **Probability**

In any given year, California and the City of Redlands can be subject to drought conditions and water shortages. This is especially true since much of the water is provided by outside resources, resources that a shared with others. It is also important to note that droughts do not happen over night, they are a slow buildup of conditions. On average, seventy-five percent (75%) of the state's annual precipitation occurs in the "wet season"- *November thru March*. December, January, and February generally see the most precipitation but there have been many early and late season storms that bring in a substantial amount

of precipitation. One of the best ways to predict drought conditions is to study the status of the El Niño Southern Oscillation (ENSO) patterns. In California. ENSO is a periodic shifting of ocean atmosphere conditions in the tropical Pacific that ranges from El Niño (warm phase) to neutral to La Niña (cold phase). La Niña conditions tend to favor a drier outlook for Southern California; while the El Niño conditions favor stronger, and wetter storms.

- **Climate Change Considerations**

Climate change has the potential to make drought events more common in the West, including California. Extreme heat creates conditions more conducive for evaporation of moisture from the ground, thereby increasing the possibility of drought. A warming planet could lead to earlier melting of winter snow packs, leaving lower stream flows and drier conditions in the late spring and summer. Snow packs are important in terms of providing water storage and ensuring adequate supply in the summer, when water is most needed. Changing precipitation distribution and intensity have the potential to cause more of the precipitation that does fall to run-off rather than be stored. The result of these processes is an increased potential for more frequent and more severe periods of drought.



5.4.2.4 EXTREME TEMPERATURE

- **Ranking-** *Probability*- Medium; *Impact*- Low
- **Description**

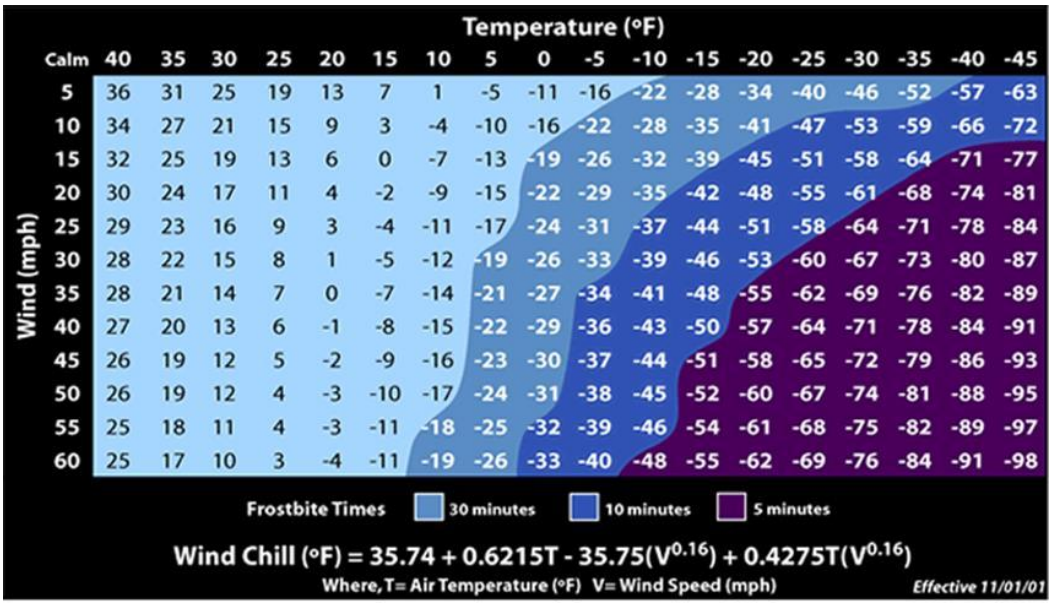
For the purposes of the LHMP, Extreme Temperatures include both 1) extreme heat and 2) freezing weather conditions.

Extreme Heat conditions, according to the EPA and CDC, is defined as weather that is much hotter and more humid than average for a particular time and place. The heat index is a measure of how hot it feels when relative humidity is factored in with the actual air temperature (**Figure 5.12**). Relative humidity is the percentage of moisture in the air compared with the maximum amount of moisture the air can hold. Humidity is an important factor in how hot it feels because when humidity is high, water doesn't evaporate as easily, so it's harder for your body to cool off by sweating.

Figure 5.12- NOAA's National Weather Service Heat Index

Extreme heat is not just a nuisance; it kills hundreds of Americans every year and causes many more to become seriously ill. Measures to prevent illness are generally common sense, including staying cool indoors, keeping hydrated, limiting physical activity, and monitoring those at highest risk.

Freeze conditions are noted when there are sustained temperatures below freezing (32F). Prolonged freezing temperatures can pose a risk to vulnerable populations, particularly if combined with power outages. When combined with precipitation, ice can form on roadways, trees, and power lines creating secondary hazard conditions. Extreme cold can result in significant damage to homes and businesses (e.g., from burst pipes), and can cause significant health problems, such as hypothermia and frostbite. Agriculture and livestock are subject to damage and life loss, and may cause economic impacts as well. The NOAA provides three (3) different categories of actions for freeze events: advisory, watch, and warning.



- *Frost Advisory* is issued when the minimum temperature is forecast to be 33 to 36 degrees on clear and calm nights during the growing season.
- *Freeze Watch* is issued when there is a potential for significant, widespread freezing temperatures within the next 24–36 hours.
- *Freeze Warning* is issued when significant, widespread freezing temperatures are expected.

Prolonged freezing temperatures can pose a risk to vulnerable populations, particularly if combined with power outages. Exposure to cold can cause significant health problems, such as frostbite or hypothermia and become life-threatening. When combined with extreme cold temperatures, winds can compound the events creating a phenomenon known as "wind chill" factor.

Wind Chill is the term used to describe the rate of heat loss on the human body resulting from the combined effect of low temperature and wind. As winds increase, heat is carried away from the body at a faster rate, driving down both the skin temperature and eventually the internal body temperature. Animals are also affected by wind chill; however, cars, plants and other objects are not. **Figure 5.13** shows the NWS Wind Chill Chart which uses science and other information to provide an

accurate, understandable, and useful formula for calculating the dangers from winter winds and freezing temperatures.

Figure 5.13 -Wind Chill Chart

- **Location and Extent**

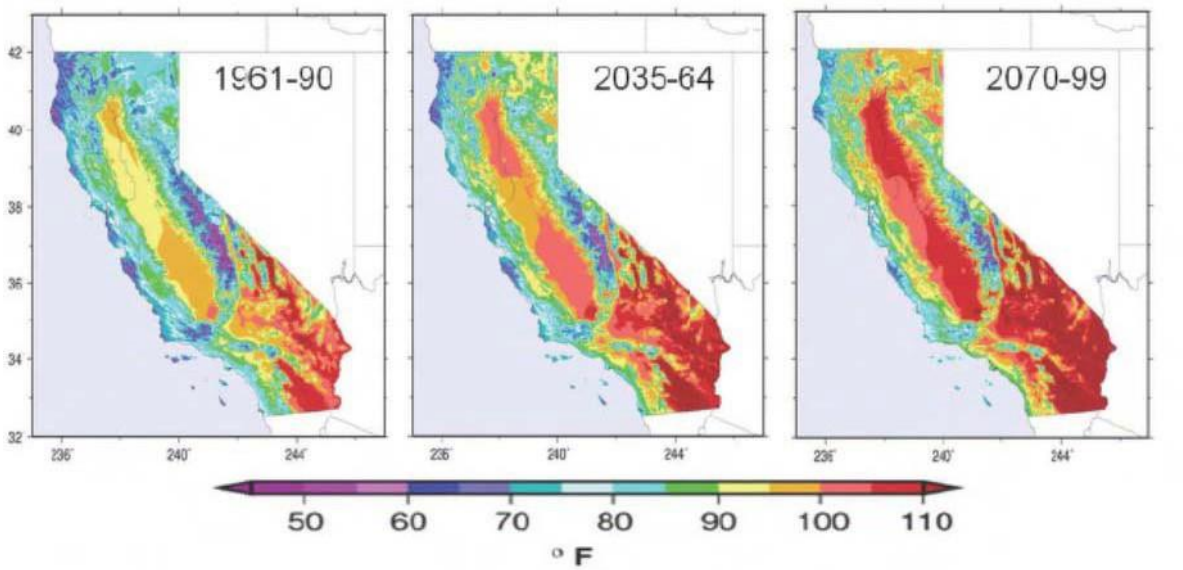
The entire city is subject to Extreme Heat and/or Freeze conditions. While, this will affect humans, a significant impact would be felt on livestock and agriculture. The City of Redlands also has several agriculture growers that produce citrus and other crops.

- **History**

The City of Redlands experiences extreme temperatures on an annual basis. In most instances, the events are short in duration and do not create significant impacts on the community. Some of the minor events do require the City to take action including dissemination of Public Service Announcements, checking in with vulnerable populations (elderly, homeless), and opening and/or coordinate with others to open heating and/or cooling centers. Some of the more significant extreme weather events in the region include:

- *In 2010 an extreme heat event occurred in impacting the Southeastern Desert Region.*
- *In 2007 an extreme cold event damaged citrus, row, field and nursery crops county-wide, including agriculture.*
- *In 2006, San Bernardino County experienced an extreme heat event affecting the Valley communities.*

- **Probability**



In any given year the City could experience Extreme Heat or Freeze events.

- **Climate Change Considerations**

Climate plays a significant role in Excessive Heat and Freeze events. As temperatures rise and fall due to changing conditions, Californians will face greater possibility of Extreme Heat or Freeze events. Depending on the model and the study referenced, freezing spells are likely to increase and/or decrease in frequency

as climate conditions change. By mid-century, extreme heat events in urban centers could cause two to three times more heat-related deaths than occur today. By 2100, The California Energy Commission is projecting hotter temperatures are expected throughout the state, with an increase of 3 to 5.5°F under the lower emissions scenario and 8 to 10.5°F under the higher emissions scenario (**Figure 5.14**).

Figure 5.14- Comparison between Historic and Projected Temperature

According to the EPA and CDC, the chances are increasing that an Extreme Heat or Freeze event could happen where you live because, the average temperatures are rising, both in the United States and around the world:

- *Globally, the annual average temperature has been rising since the beginning of the 20th century, and temperatures are expected to continue to rise through the end of this century.*
- *Worldwide, 15 of the 16 warmest years on record have occurred since 2000, with the exception of 1998*

5.4.2.5 HAZARDOUS MATERIAL ACCIDENT

- **Ranking**- *Probability*- Medium; *Impact*- Medium
- **Description**

Hazardous materials are used and/or created in manufacturing, agriculture, service industries (e.g., gas stations, dry cleaners), and health care facilities. Several household products such as cleaning supplies and paint are also considered hazardous materials. These chemicals and hazardous materials may be corrosive or otherwise damaging over time. The US Department of Transportation (US DOT) classifies hazard chemicals/materials into the following classification system:

- *Class 1*- Explosives
- *Class 2*- Flammable, non-flammable, and poisonous gases
- *Class 3*- Flammable liquids
- *Class 4*- Flammable, spontaneously combustible, and dangerous when wet solids
- *Class 5*- Oxidizers and organic peroxides
- *Class 6*- Toxic (poisonous) substances

- *Class 7*- Radioactive materials
- *Class 8*- Corrosive substances
- *Class 9*- Miscellaneous dangerous goods/hazardous materials and articles

The release of these chemicals and/or materials into a community can have devastating effects. A hazardous materials release could also result in public health risks, fires, and/or explosions. Contamination may be carried out of the immediate area of the incident by people, vehicles, wind, and water. Weather conditions can increase the size and intensity of the Hazardous Materials Release. Typography, such as hills and canyons, can increase the size of the release or make it more difficult to contain. There are several types of hazardous materials releases:

- *Fixed-Site Releases*- releases involving the production and manufacturing, handling, and storage of a hazardous product at a single facility as well as any releases that may occur at a designated hazardous waste disposal site.
- *Transportation-Related Releases*- Includes releases that occur while the hazardous material is in transit from one facility to another or en route to be disposed of at a designated hazardous waste disposal site (e.g., on highways, railways, airports, or in pipelines).
- *Intentional Releases*- includes criminal acts and acts of terrorism in which a hazardous material is used to intentionally cause injuries and/or fatalities, damage the environment and/or property, or advance a political or social agenda.

- **Location and Extent**

As outlined above, hazardous materials can be found throughout the community. The location and identity of facilities that store hazardous materials must be reported to local and federal governments as required by the Emergency Planning and Community Right-to-Know Act (EPCRA). Many facilities have their own hazardous materials guides and response plans, including transportation companies who transport hazardous materials. The release of hazardous materials into the environment can cause a multitude of problems. Although these incidents can happen almost anywhere, certain areas of Redlands are at higher risk, such as near roadways that are frequently used to transport hazardous materials and locations with industrial facilities that use, store, and/or dispose of such materials. Areas crossed by railways, waterways, airways, and pipelines also have increased potential for mishaps. **Table 5.9** provides a list of sites within the City of Redlands.

Table 5.9- Registered Hazardous Chemical Sites in the City of Redlands

Site/Facility Name	Location
Crafton-Redlands area	Bunker hill groundwater sub-basin
Edison/Redlands II (Redlands Boulevard) MGP	501-525 w. Redlands Boulevard at Kendall
Jorco Chemical Company	32185 east outer Highway 10
Judson Street Elementary School	Judson Street/Pennsylvania Avenue
Layne Christensen Redlands property	1675 West Park Avenue
Lockheed Propulsion Corporation	1500 Crafton Avenue
New High School No.3	Texas Street/w. Pioneer Avenue
QA Processor Service	302 Alabama Street, ste8
Redlands Airport	1745 Sessums Drive
Redlands Community Day School	Alabama Street/West Park Avenue
Redlands Early Education Center	1712 West Park Avenue
Redlands Farming Company	780 West San Bernardino Avenue
SoCal gas/Redlands I (State Street.) MGP	State Street at Redlands Boulevard

Teledyne Battery Products	840 W Brockton Avenue

- **History**

A significant hazardous materials events in San Bernardino County included the February 1996 train derailment in the Cajon Pass. A 49-car Burlington Northern-Santa Fe freight train en route from Barstow, California, to Los Angeles, derailed near Cajon Junction, killing the conductor and a trainman, and seriously injuring the engineer. The derailment resulted in a rail car pile-up which included five cars containing hazardous materials. The train ignited, and continued to burn for several days, requiring immediate closure of I-15, extended closure of SR-138, and a secondary closure of I-15 three days later due to the potential explosion of a tank car containing butyl acrylate. In addition to the train crew casualties, 32 people suffered minor injuries (21 police officers, 8 California Transportation Department personnel, and 3 civilians). According to the National Transportation Safety Board (NTSB), the total economic cost of the incident reached almost $9.5 million, including equipment, environmental and other costs.

Within the City of Redlands, the Fire Department has the responsibility for responding to hazardous materials incidents. The City of Redlands Fire Department has responded to a series of hazardous material incidents over the years. While most are routine in natural and do not require significant resources, there have been a handful of incidents that have required greater response and recovery coordination/effort. **Figure 5.15** depicts the location of the more significant hazardous material incidents within the City of Redlands between 1999-2020 and **Table 5.10** provides details of the events.

Figure 5.15- Hazardous Material Spills City of Redlands (1999-2020)

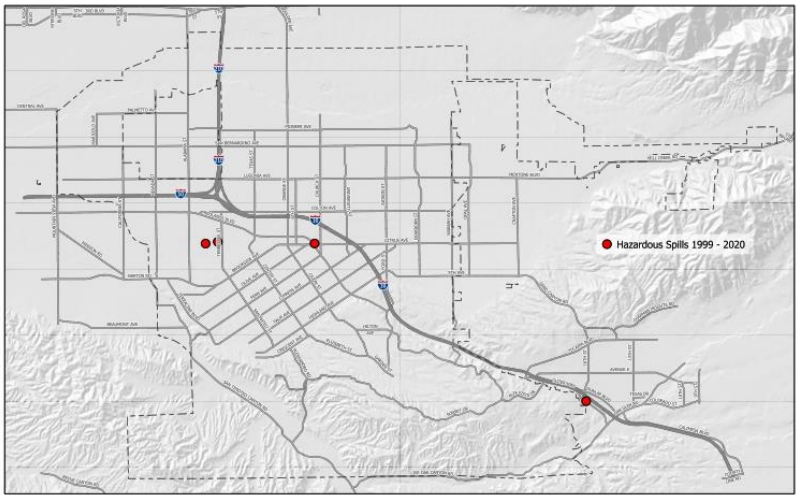


Table 5.10- Hazardous Material Spills City of Redlands (1999-2020)

Address	Date	Quantity	Unit of Measure	Commodity
12910 16th Street	10/11/1999	50	LGA	acrylic acid, stabilized
300 Kansas Street	4/2/2008	160	SLB	batteries, wet, filled with acid, electric storage
539 E Redlands Boulevard	8/1/2000	300	LGA	gasoline
301 Tennessee Street	2/14/2018	56	LGA	diesel fuel

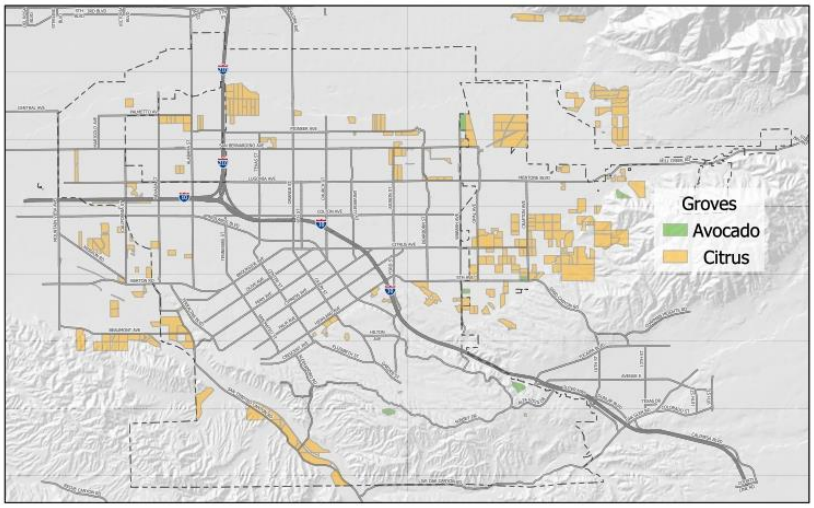
- **Probability**

The release of chemicals and hazardous materials can occur anywhere in the city but are more likely on or near major transportation corridors. Incidences can occur during production, storage, transportation, and/or during use or disposal of materials. Communities can be at risk if a chemical is used unsafely or released in harmful amounts into the environment. Hazardous materials can cause death, serious injury, long lasting health effects, and damage to buildings, the environment, homes, and other property.

- **Climate Change Considerations**

While there is little evidence to link climate change increase occurrences of chemical and hazardous material releases, weather plays a significant factor in certain aspects of chemical and hazardous material releases. Changing conditions can create more mishaps and accidents with production, storage, transportation, use, and disposal of chemicals and hazardous materials. Additionally, changing conditions could impact the response and recovery efforts after releases.

5.4.2.6 INFESTATION



- **Ranking-** *Probability*- Medium; *Impact*- Low
- **Description**

Agricultural pests and disease infestation occur when an undesirable organism inhabits an area in a manner that causes serious harm to agriculture crops, livestock or poultry, and wild land vegetation or animals. Countless insects and diseases live on, in, and around plants and animals in all environments. Most are harmless, while some can cause significant damage and loss. Under some conditions, insects and diseases that have been relatively harmless can become hazardous. For example, severe drought conditions can weaken trees and make them more susceptible to destruction from insect attacks than they would be under normal conditions.

- **Location and Extent**

The City of Redlands has several agriculture crops (orange groves) but limited commercial livestock or poultry. However, the City of Redlands, much like most cities have areas and vegetation susceptible to infestations. Impacts to local plants happen throughout the entire city. Impacts on wildland vegetation or animals generally happened in interface areas along edges of the community (i.e., Crafton Foothills, Live Oak Canyon, Sam Timoteo Canyon, San Bernardino Mountains). The location of the groves is depicted on **Figure 5.16**.

Figure 5.16- Citrus Groves

- **History**

As mentioned, the city is vulnerable to insect infestation. Infestations of Mediterranean Fruit Fly, Oriental Fruit Fly, Gypsy Moth, Glassy-winged Sharpshooter, Asian Citrus Psyllid, and Light-Brown Apple Moth have all occurred in the last 30 years; however, there are not detailed records to list each event. Diseases such as Chrysanthemum White Rust and Pierce's Disease of Grapes have caused significant losses to local plants and impacts on wildland vegetation or animals.

Emergencies related to insect infestation have impacted San Bernardino County and its local jurisdictions in the last decade, including an increased fire risk due to Bark Beetle infestation of trees in 2003, and mosquito-borne West Nile Virus in 2007. Since 2002, the Bark Beetle infestation has required removal of 99,500 acres of affected trees in the San Bernardino National Forest, as well as on private lands, at a cost of $4 million in grants and matching funds. However, both the Bark Beetle and West Nile Virus infestations are under control and did not seriously impact the City of Redlands. Additionally, while future infestation issues are possible, the impact on the City of Redlands is generally expected to be limited and no major impact to the community.

- **Probability**

Due to its interaction with the global economy, its mild Mediterranean climate, and its diversified agricultural and native landscape, the City of Redlands can experience impacts from agricultural pests and diseases annually.

- **Climate Change Considerations**

Continued climate change is likely to alter the abundance and types of pests, lengthen pests' breeding season, and increase pathogen growth rates. For example, the pink bollworm, a common pest of cotton crops, is currently a problem only in southern desert valleys because it cannot survive winter frosts elsewhere in the state. However, if winter temperatures rise 3 to 4.5°F, the pink bollworm's range would likely expand northward, which could lead to substantial economic and ecological consequences for the state.

Temperature is not the only climatic influence on pests. For example, some insects are unable to cope in extreme drought, while others cannot survive in extremely wet conditions. Furthermore, while warming speeds up the lifecycles of many insects, suggesting that pest problems could increase, some insects may grow more slowly as elevated carbon dioxide levels decrease the protein content of the leaves on which they feed (California Climate Change Center 2006).

5.4.2.7 LANDSLIDE

- **Ranking-** *Probability*- Medium; *Impact*- Medium
- **Description**

Landslides can be defined as the movement of a mass of rock, debris, or earth down an incline. According to the USGS, the term "*landslide*" encompasses five (5) modes of slope movement: falls, topples, slides, spreads, and flows.

- *Falls are masses of soil or rock that dislodge from steep slopes and free-fall, bounce, or roll downslope.*
- *Topples move by the forward pivoting of a mass around an axis below the displaced mass.*
- *Spreads (lateral) commonly induced by liquefaction of material in an earthquake, move by horizontal extension and shear or tensile fractures.*
- *Slides displace masses of material along one or more discrete planes.*
  - In "rotational" sliding, the slide plane is curved and the mass rotates backwards around an axis parallel to the slope;
  - In "translational" sliding, the failure surface is more or less planar and the mass moves parallel to the ground surface.
- *Flows mobilize as a deforming, viscous mass without a discrete failure plane.*

Landslides can be caused by natural processes or by man-made activities. Landslides occurs when down-slope forces (gravity) exceed the resistance (strength) of the earth materials. Landslides can be initiated by rainfall, snowmelt, changes in water level, stream erosion, changes in ground water, earthquakes, volcanic activity, disturbance by human activities, or any combination of these factors. Two (2) of the more common types of landslides include:

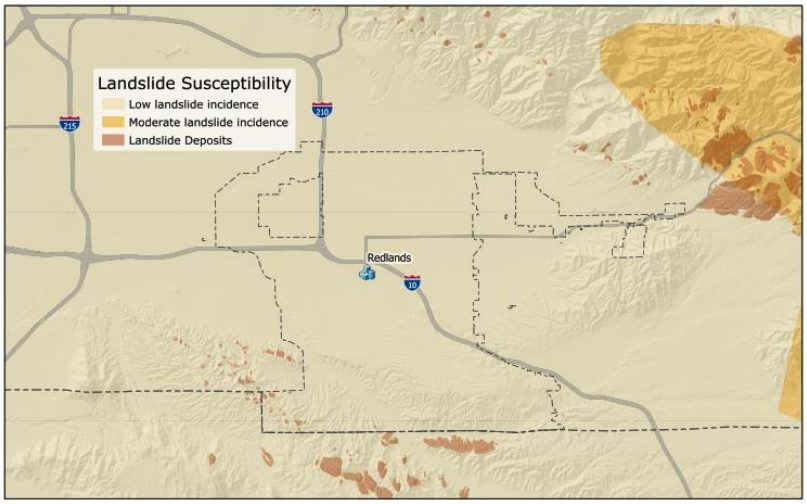
- *Mudflows*- defined as flows or rivers of liquid mud down a hillside on the surface of normally dry land. They occur when water saturates the ground, usually following long and heavy rain falls, or rapid snow melt. Mud forms and flows down slope if there is no ground cover such as brush or trees to hold the soil in place.
- *Debris Flow*- defined when water begins to wash material from a slope or when water sheets off of a newly burned stretch of land. Chaparral land is especially susceptible to debris flows after a fire. The flow will pick up speed and debris as it descends the slope. As the system gradually picks up speed it takes on the characteristics of a basic river system, carrying everything in its path along with it.

Fast-moving (or rapidly-moving) landslides present the greatest risk to human life, and people living in or traveling through areas prone to rapidly moving landslides are at increased risk of serious injury. Debris-flows can travel down a hillside with speeds up to 200 miles per hour (though more commonly, 30-50 miles per hour), depending on the slope angle and type of earth and debris in the flow.

Slow-moving landslides can occur on relatively gentle slopes and can cause significant property damage but are less likely to result in serious human injuries. Slow-moving slides include rotational slides, where sliding material moves along a curved surface, and translational slides, where movement occurs along a flat surface. These slides are generally slow-moving and can be deep. Slumps are small rotational slides that are generally shallow.

The size of a landslide usually depends on the geology and the initial cause of the landslide. Landslides vary greatly in their volume of rock and soil; the length, width, and depth of the area affected; frequency of occurrence; and speed of movement. Some characteristics that determine the type of landslide are slope of the hillside, moisture content, and the nature of the underlying materials. Landslides are given different names, depending on the type of failure and their composition and characteristics.

Many landslides are difficult to mitigate, particularly in areas of large historic movement with weak underlying geologic materials. As communities continue to modify the terrain and influence natural processes, it is important to be aware of the physical properties of the underlying soils as they, along with climate, create landslide hazards. Proper planning cannot completely eliminate the threat of landslides to the safety of people, property, and infrastructure; however, without proper planning, landslide hazards will be even more common and more destructive.



- **Location and Extent**

The California Geological Survey is in the process of recording and mapping historical and potential landslides in the state. The location and extent of landslides are extremely difficult to predict and are usually based on historical event and/or soil type and topography. Landslides have the potential to occur in areas with one or more of the following conditions:

- *On or close to steep hills*
- *Steep road-cuts or excavations*
- *Existing landslides or places of known historic landslides (such sites often have tilted power lines, trees tilted in various directions, cracks in the ground, and irregular-surfaced ground)*
- *Steep areas where surface runoff is channeled, such as below culverts, V -shaped valleys, canyon bottoms, and steep stream channels*
- *Fan-shaped areas of sediment and boulder accumulation at the outlets of canyons*
- *Canyon areas below hillside and mountains that have recently (within 1-6 years) been subjected to a wildland fire.*

Figure 5.17 depicts the location around the City of Redlands of low landslide incidence on the USGS' Landslide Incidence and Susceptibility in the Conterminous United States map (Overview map, 2001), which shows areas of landslides and areas susceptible to future land sliding (defined to include most types of gravitational mass movement such as rock falls, debris flows, and the failure of engineered soil materials).

Figure 5.17- Landslide Incidence in the Vicinity of the City of Redlands

- **History**

Historically, the majority of landslides in Redlands have been a secondary hazard to other hazards (i.e., earthquakes, floods); there have been no known previous occurrences of landslides documented in the City of Redlands.

- **Probability**

Landslides are a common hazard in California. Weathering and the decomposition of geologic materials produce conditions conducive to landslides, and human activity further exacerbates many landslide problems. It is difficult to estimate the probability of occurrence for landslide as no landslide susceptibility maps have been prepared for Redlands. However, recently there has been increased probability for mud flows and debris flows due to wildfire events in the area.

- **Climate Change Considerations**

Climate change can increase the probability, frequency, and/or intensity of landslides. Changes in precipitation, specifically the increased frequency of intense precipitation, can result in significant water run-off, which may cause landslides. Additionally, increase in wildfire hazards will result in loss of hillside vegetation. The loss of hillside vegetation will increase the likelihood of debris and mudflows. This could result in landslides occurring in areas not previously identified.

5.4.2.8 TECHNOLOGY DISRUPTION

- **Ranking-** *Probability*- Low; *Impact*- High
- **Description**

Technology disruption includes both deliberate (cyber-attacks) or accidental (equipment failure or human error) actions that can cause the loss of use of technology and/or data. A cyber threat/attack is a circumstance or event that has or indicates the potential to exploit technology vulnerabilities and to adversely impact organizational operations, organizational assets (including information and information systems), individuals, other organizations, or society. Critical infrastructure, such as utilities and

telecommunications, are also potential targets. Cyber threats/attacks are most easily described as either external threats (where attacks originate outside of established networks) or internal/insider threats (where attacks originate from users who have existing access to an internal network). Examples of cyber threats/attacks include: malware and hacking, phishing, denial of service attacks, ransomware, and state-sponsored hacking. Any one of these threats, if initiated, and successful, can produce a cyber-attack that has major implications throughout the organization. Recent report produced by Verizon (2020) analyzes 32,002 security incidents and 3,950 confirmed breaches from 81 global contributors from 81 countries and indicate the following trends:

- *86% of data breaches for financial gain - up from 71% in 2019*
- *Cloud-based data under attack – web application attacks double to 43%*
- *67% of breaches caused by credential theft, errors and social attacks*
- *Clearly identified cyber-breach pathways enable a "Defender Advantage" in the fight against cyber-crime*
- *On-going patching successful - fewer than 1 in 20 breaches exploit vulnerabilities*
- *37% of credential theft breaches used stolen or weak credentials*
- *25% involved phishing*
- *Human error accounted for 22%*

- **Location and Extent**

Technology disruptions can happen anywhere within the City but will generally be targeted towards larger corporations or government organizations.

- **History**

While there have been several smaller cyber threats and hacking, none have reached a level of significance. However, the frequency of cyber-attacks on public and private sector organizations in general, continues to rise.

- **Probability**

The probability of technology disruptions is on the rise globally, national, and locally. The probability of occurrence of cyber threats is rapidly increasing, especially with increased reliance on the Internet and cloud-based computing. However, cyber security threats/attacks will generally be targeted towards larger corporations or state/national governments which are not located within the county.

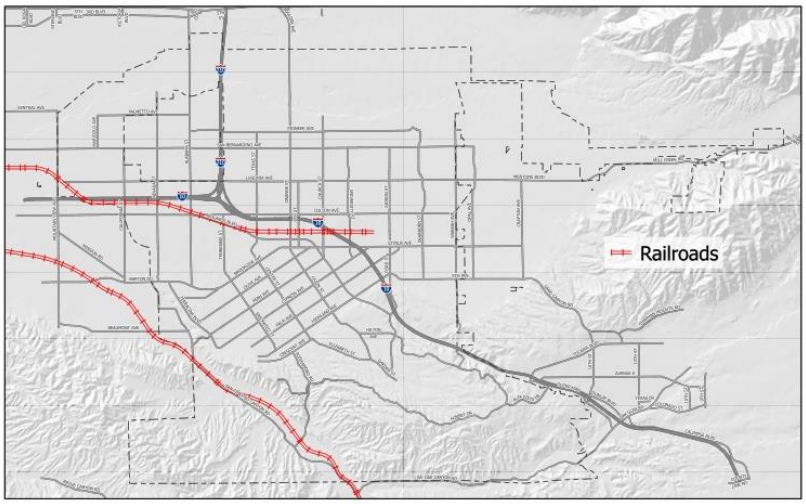
Local governments are increasingly being targeted by cyber criminals on the basis that they have fewer resources to defend themselves. Unlike natural hazards, where there is historical data, and some predictive modeling can occur, cyber-attacks are an emerging hazard, which are more challenging to anticipate

- **Climate Change Considerations**

While there is little evidence to link climate change to increase in occurrences of cyber security threats/attacks, the target could be related to persons/groups with issues with individuals or companies they perceive to have effect on the climate (i.e., greenhouse gas producers) within the community. And much like terrorism, depending on the consequence of the cyber-attack, it could hinder the response and recovery efforts.

5.4.2.9 TRAIN ACCIDENT/INCIDENT

- **Ranking-** *Probability*- Low; *Impact*- Medium
- **Description**



Train derailments are defined as any accidents involving public or private trains carrying passengers or cargo along the rail corridor. Cargo commodities include such things as hazardous materials, fuel (including oil), agriculture, meats, and non-consumables (*NOTE: hazardous materials incident are covered under a separate hazard*). Train derailments, like other transportation accidents, are less likely to lead to a state or federal disaster declaration, than other hazards previously and afore mentioned.

- **Location and Extent**

Trains running through the City of Redlands carry both commuters and commodities (**Figure 5.18**). However, San Bernardino County is currently in the final stages of extending the Metrolink line to the City of Redlands. This will increase the frequency of trips and volume of riders/passengers, thus increasing the potential for commuter-related train incidents.

Train accidents are generally localized, and the incidents result in limited impacts at the community level. However, if there are volatile or flammable substances on the train and the train is in a highly populated or densely forested area, death, injuries, and damage to homes, infrastructure, and the environment, including forest fires can occur.

Figure 5.18- Rail Lines in Vicinity of the City of Redlands

- **History**

There have been no historical train derailments incidents within the City of Redlands.

- **Probability**

Train accidents can occur any time during the year. Because of current plans to extend the commuter rail into the City of Redlands, it is expected that the provability of an incident/accident will increase.

- **Climate Change Considerations**

Weather conditions have been known to play a significant role in some train derailments globally. While current train operations anticipate and plan for current and future weather conditions, sudden changes

to weather conditions and weather patterns can affect the safe movement of trains. Additionally, climate change could impact response and recovery operations.

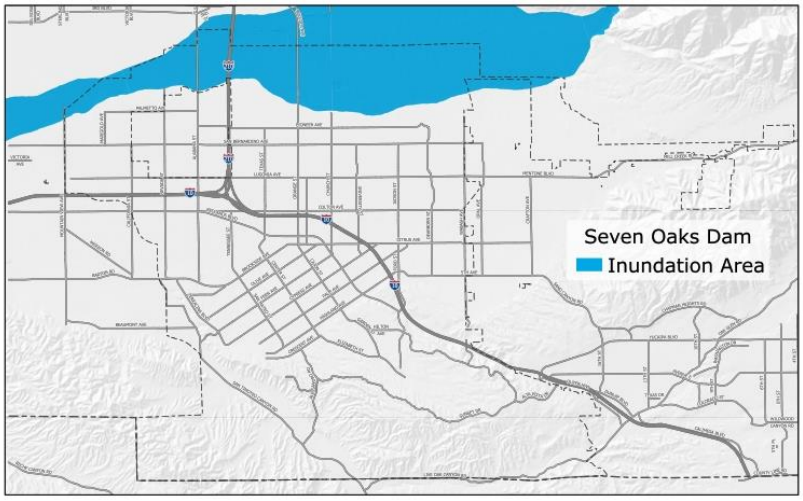
5.4.3 TIER III

The hazard under Tier III includes Dam Breach and Terrorism.

5.4.3.1 DAM BREACH

- **Ranking-** *Probability*- Low; *Impact*- Medium
- **Description**

Because of California's seasonal and climatic conditions, water storage is critical. Dams and reservoirs help reserve (store) the water necessary for agriculture, hydroelectric power, recreational activities, environmental protection, and a stable drinking water supply. They are also critical tools in flood and debris control. Based on the function, dams can be classified as: storage dam, diversion dam, detention dam, debris dam, or coffer dam. In addition to the classifications there are several types of dams:



- *Gravity Dams- concrete, rubber masonry*
- *Embankment Dams- earth or rock*
- *Arch/Multiple Arch Dams- concrete*
- *Buttress Dams- concrete, timber, steel*

Along with their many benefits, dams and reservoirs present formidable consequences if not properly designed, built, and maintained. Failures to dams and reservoir are generally due to old age, poor design/construction, lack of maintenance, structural damage, improper siting, landslides flowing into a reservoir, or terrorist actions. Structural damage is often a result of a flood, erosion, or earthquake. A catastrophic dam/reservoir failure could inundate the area downstream. The degree of flood impact is dependent upon topography, vegetation, duration and intensity of rainfall with consequent storm water runoff. The force of the water is large enough to carry boulders, trees, automobiles, and even houses along a destructive path downstream. Another factor in dam/reservoir failures is heavy or increased precipitation, especially in very short periods of time. This increase in rainfall can crested dams, weaken structures, and erode supports. The potential for casualties, environmental damage, and economic loss is great. Damage to electric generating facilities and transmission lines could impact life support systems in communities outside the immediate hazard area.

- **Location and Extent**

As shown in **Figure 5.19**, the northernmost portions of the City of Redlands, along the Santa Ana River margin, are located within the potential dam inundation area for Seven Oaks Dam as mapped by San Bernardino County ISD/GIS as part of the San Bernardino County General Plan. Construction of this modern dam by the U.S. Army Corps of Engineers was completed in 1999. Designed for flood control, its location near the San Andreas Fault resulted in the dam's being designed to resist earthquake damage for events as large as a M8 earthquake.

Figure 5.19- Dam Inundation Areas in the City of Redlands

- **History**

The State of California and the federal government have a rigorous Dam Safety Program. This is a proactive program that ensure proper planning in the event of failure but also sets standards for dam design and maintenance. Because of this, many potential issues have been addressed and/or resolved. Within the City of Redlands, no significant dam failures have occurred.

- **Probability**

Dam failure events are infrequent and usually coincide with the events that cause them, such as earthquakes, landslides, excessive rainfall and snowmelt. These impacts can also be exacerbated by aging or poor maintenance of the structures. There is a "residual risk" associated with dams; residual risk is the risk that remains after safeguards have been implemented. For dams, the residual risk is associated with events beyond those that the facility was designed to withstand. However, the probability of occurrence of any type of dam failure event is considered to be low in today's regulatory and dam safety oversight environment.

- **Climate Change Considerations**

Increased rainfall from changing climate conditions could present a risk to dams and reservoirs in area if volume of runoff is greater than the dam's capacity. This could cause the County to release stored water into the downstream water courses in order to ensure the integrity of the dam.

5.4.3.2 TERRORISM

- **Ranking-** *Probability*- Low; *Impact*- Medium
- **Description**

Terrorism has become an undeniable reality throughout the United States. The term terrorism refers to intentional, criminal malicious acts. There is no single, universally accepted definition of terrorism, and it can be interpreted in many ways. Terrorism is defined in the Code of Federal Regulations as "...t*he unlawful use of force and violence against persons or property to intimidate or coerce a government, the*

civilian population, or any segment thereof, in furtherance of political or social objectives." (28 CFR, Section 0.85). For the purposes of this plan, terrorism refers to the use of weapons of mass destruction, including biological, chemical, nuclear, and radiological weapons; arson, incendiary, explosive, and armed attacks; industrial sabotage and intentional hazardous materials releases; and cyber terrorism. Many of these incidents can be a well-planned, coordinated attacks with multiple suspects, or the result of a lone individual on a rampage. Conventional Attacks/Active Shooter incidents are generally considered a lone individual incident; some are considered "homegrown violent extremists" inspired by foreign terrorist groups.

- **Location and Extent**

Terrorism can occur throughout the entire city but due to terrorisms' intended purpose to cause the greatest amount of destruction it would most likely happen in more populous areas (high value, visually recognized targets) where more devastation, fear, and chaos will ensue.

- **History**

The City and surrounding area have experienced several terrorism (Active Shooter) events. In March of 2016, the police responded to a single shooter incident at Office Depot. There was one (1) minor injury reported. In April of 2017, there was also a shooting at North Park Elementary, part of the Redlands Unified School District. The shooting was an apparent murder–suicide and an act of domestic violence. Three people died from their wounds and another student was wounded and hospitalized. However, the most significant Active Shooter event in the area occurred December of 2015 at the Inland Regional Center in San Bernardino. Fourteen (14) people were killed and 22 others were seriously injured. The pursuit to capture the shooters lead the police to the City of Redlands. The shooters were killed in a shootout, which also left two (2) officers injured.

- **Probability**

All City businesses and facilities are perceived as a soft target; however, due to the intended purpose of terrorism, it would most likely happen in more populous urban areas where more devastation (and fear) will ensue.

- **Climate Change Considerations**

While there is little evidence to link climate change increasing occurrences of terrorism. However, depending on the type of attack, it could intensify the incident (i.e., Improvised Explosive Device- *IED* during high wind event), and hinder the response and recovery efforts (i.e., evacuation during flooding).

6 RISK ASSESSMENT

6.1 OVERVIEW

The purpose of this section is to estimate the potential exposure and vulnerability (impacts) of hazards within the City of Redlands. While an emphasis will be on the built environment (residential, non-residential, critical facilities, etc.), the economy, and the general population; other areas may be considered (i.e., lifelines, environment). The focus of this section will be on Tier I hazards. As presented in Section 5.0- Hazard Assessment, the Planning Team ranked hazards into tiers: Tier I, Tier II, and Tier III hazards. Understanding potential impacts (damage and losses) is essential to decision-making at all levels of government, providing a basis for developing mitigation plans and policies, emergency preparedness and response and recovery planning. To accomplish this, two (2) different approaches were used:

Scientific Loss Estimation Modeling

The scientific loss estimation modeling efforts included the utilization of the FEMA Hazus model. Hazus is a nationally applicable standardized methodology that estimates potential losses from floods, earthquakes, hurricane winds and tsunamis. Hazus uses state-of-the-art Geographic Information Systems (GIS) software to map hazard data and estimate potential *physical damage* to residential, commercial, schools, critical facilities, and infrastructure; *economic loss*, including lost jobs, business interruptions, repair, and reconstruction cost; and, *social impacts*, including estimating shelter requirements, displaces households, and population exposure to the hazard.

Hazus standard configuration allows for "*out-of-the-box*" regional or community-wide loss assessment using default (Level 1) building inventory databases, aggregated to the census tract (for earthquakes) or census block (for floods) level. Hazus also allows for the replacement of the default data with data that better reflects the area. In 2009, FEMA sponsored a project to leverage and improve San Bernardino County Assessor data for general building stock and utilize it in Hazus for county-level flood and earthquake analysis (San Bernardino County Essential Facilities Risk Assessment- *SBEFRA*). The SBEFRA project incorporated enhanced flood data from information on the FEMA updated (2008) Digital Flood Insurance Rate Map (DFIRM). The results of the SBEFRA project were leveraged and incorporated into this plan.

Exposure Assessment

Because scientific loss estimation models are not available for all types of hazards, a different approach was used on some hazards to identify potential impacts; exposure assessments. There are two (2) kinds of exposure assessment: 1) when there a hazard exposure area (or footprint); and, 2) when an exposure area (footprint) does not exist.

A hazard exposure footprint enables you to determine areas in the planning area where you are either "*in*" or "out" of the hazard (i.e., wildfire). With this footprint, the Planning Team was able to determine elements within the hazard area and conduct a qualitative assessment of the potential impact. For those hazards where an exposure footprint does not exist (i.e., infectious disease, energy shortage/power outage), the assessment is done for the entire planning area/City. Neither approach provides an estimate potential damage but provides an understanding of the exposure and as such,

the potential loss during events. Types of elements that were considered during the exposure assessment were general building stock, populations, lifeline infrastructure, economy, and the environment. **Table 6.1** provides a summary of relevant building stock from Hazus, population, and economy information presented in *Section 3.0- Community Profile*. This information provides a reference point which can be used to assess the potential impacts from the hazard.

Table 6.1- Summary of Building Stock, Population, and Economy within the City of Redlands

BUILDING STOCK	Building Count	Building Replacement Value ($1,000)	Contents Replacement Value ($1,000)	Building Sq. Ft. (1,000 Sq. Ft.)
Residential	19,661	$4,586,535	$2,293,253	39,193
Commercial	790	$2,000,690	$2,077,158	20,969
Industrial	116	$154,116	$231,174	2,020

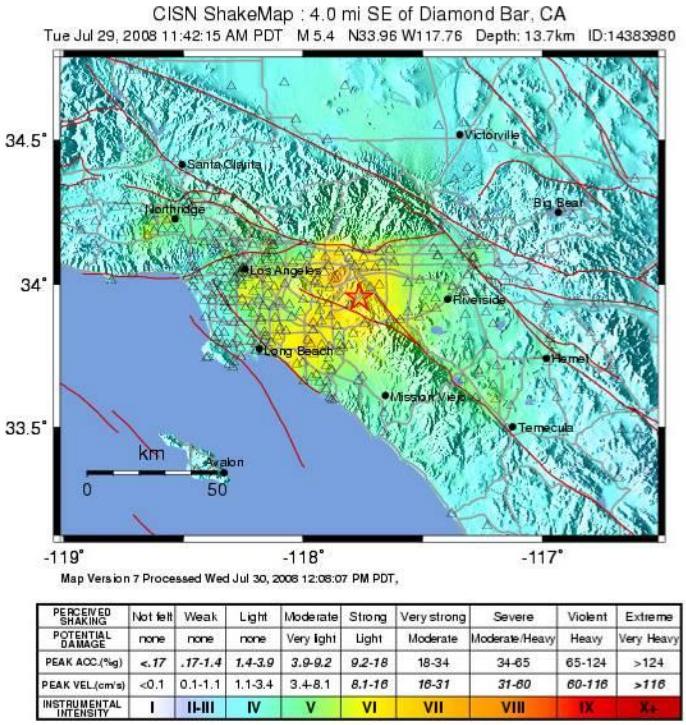
Transportation	915	2.20%		
Information	291	0.70%		
Agriculture	125	0.30%		

TOTAL	**41,609**	**100%**		

Additionally, the FEMA-funded SBEFRA project also did an exposure assessment of facilities deemed critical under the project (i.e., police stations, fire stations, emergency operations centers, schools). The SBEFRA project did a damage assessment of critical facilities for earthquake and an exposure assessment of critical facilities for Flood and Wildfire.

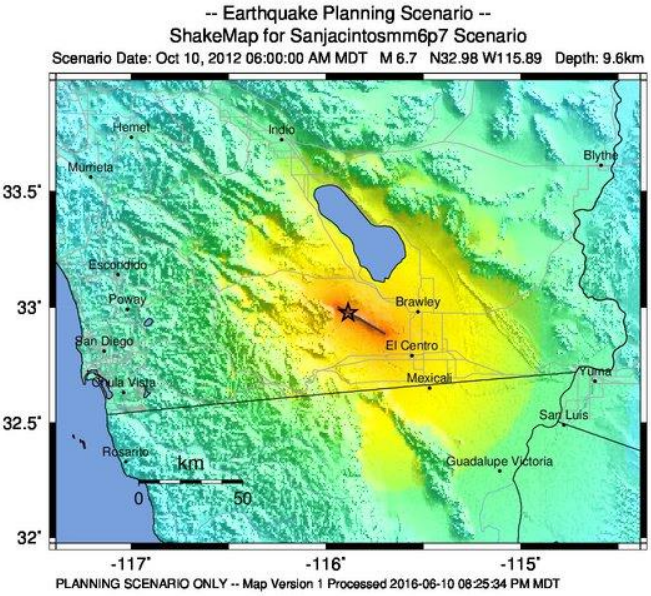
6.2 TIER I HAZARDS



6.2.1 EARTHQUAKE

To understand the vulnerability to Earthquakes in the City of Redlands, a scientific loss estimation model was used. The City of Redlands leveraged the Hazus assessment and critical facilities exposure assessment conducted under the SBEFRA Project. The Planning Team ranked this hazard as a HIGH impact during the hazard prioritization process.

6.2.1.1 HAZUS ASSESSMENT



The SBEFRA Project looked at three (3) earthquake scenarios: the M7.8 Shakeout Scenario, a M6.7 San Jacinto scenario earthquake, and a M6.7 Chino Hills Scenario earthquake (**Figure 6.1**, **Figure 6.2**, and **Figure 6.3**). A summary of the Hazus results is presented in **Table 6.2**. It should be noted that the casualty figures reported are not direct Hazus outputs; they are estimates in more medically-meaningful categories derived from Hazus outputs using a "calibration" methodology developed using historic injury data from the 1994 Northridge and other California earthquakes (Seligson & Shoaf, 2003). The method was also recently applied for the San Andreas "ShakeOut" Scenario developed by the USGS and others for the 2008 Golden Guardian statewide disaster exercise (Jones et al., 2008). Also as noted previously, Hazus estimates earthquake impacts at the census tract level. Accordingly, building count totals may differ from totals reported in the flood risk assessment**,** which were developed at the census block level.

6.2.1.2 CRITICAL FACILITIES EXPOSURE ASSESSMENT

Damage and functionality of critical facilities identified in the FEMA-funded SBEFRA project were estimated for the earthquake scenarios identified above using HAZUS. Results are presented in **Table 6.3.** As shown, three of the four fire stations existing in 2009 are expected to be less than 50% functional in a M7.8 earthquake on the San Andreas fault (ShakeOut scenario), although physical damage is likely to be considered Moderate or less (none of the stations are have probabilities of experiencing moderate or greater damage exceeding 50%). In this same event, the EOC is expected to have functionality between 50-75%, while the Redlands Police Department is expected to have less than 50% functionality and its probability of being in the Moderate or greater damage state exceeds 50%. The Police Department is also expected to have less than 50% functionality in the M6.7 San Jacinto earthquake scenario.

Table 6.3- Estimated Essential Facility Earthquake Impacts (Hazus)

		Earthquake Scenario		
		M7.8 ShakeOut	M6.7 San Jacinto	M6.7 Chino Hills
Fire Stations	**Redlands Fire Department**			
	Total Number of Buildings	**4**		
	Damage			
	# Blgs with >50% Probability of Moderate or Greater Damage	0	0	0
	# Blgs with >50% Probability of Complete Damage	0	0	0
	Functionality			
	Functionality < 50 % on Day 1	3	0	0
	Functionality 50 - 75% on Day 1	1	4	0
	Functionality >75% Day 1	0	0	4
EOCs	**City of Redlands**			
	Total Number of Buildings	**1**		
	Damage			
	# Blgs with >50% Probability of Moderate or Greater Damage	0	0	0
	# Blgs with >50% Probability of Complete Damage	0	0	0
	Functionality			
	Functionality < 50 % on Day 1	0	0	0
	Functionality 50 - 75% on Day 1	1	0	0
	Functionality >75% Day 1	0	1	1

		Earthquake Scenario		
		M7.8 ShakeOut	M6.7 San Jacinto	M6.7 Chino Hills
Police Station	**Redlands Police Department**			
	Total Number of Buildings	**1**		
	Damage			
	# Blgs with >50% Probability of Moderate or Greater Damage	1	0	0
	# Blgs with >50% Probability of Complete Damage	0	0	0
	Functionality			
	Functionality < 50 % on Day 1	1	1	0
	Functionality 50 - 75% on Day 1	0	0	0
	Functionality >75% Day 1	0	0	1

Under the FEMA-funded SBEFRA project, the earthquake exposure analysis also included an assessment of Liquefaction Susceptibility Zones. The analysis identified several facilities in High and Very High Liquefaction Susceptibility zones:

- Three (3) Fire Station (FS 262, FS 263, and FS 264)
- Emergency Operations Center
- Four (4) Police Department (Community Policing Station, Animal Control, Redlands Community Senior Center, Police Annex)
- Two (2) Municipal Utility facility (Corporate Yard)
- City Hall

Because the school district participated in the FEMA-funded SBEFRA project, it was possible to develop damage and functionality estimates for the Redlands Unified School District's (District or RUSD) facilities in each of the three scenario earthquakes. An overall summary of the District's performance, in terms of damage and functionality on the day of the earthquake, is given in **Table 6.4**

Table 6.4- Estimated Earthquake Impacts for the Redlands Unified School District Summary (Hazus)

	Earthquake Scenario		
	M7.8 ShakeOut	M6.7 San Jacinto	M6.7 Chino Hills
Total Number of Buildings	**592**		
Damage			
# Buildings with >50% Probability of Moderate or Greater Damage	79	18	0
# Buildings with >50% Probability of Complete Damage	17	0	0
Functionality			
Functionality < 50 % on Day 1	519	101	0
Functionality 50 - 75% on Day 1	73	448	1
Functionality >75% Day 1	0	43	591

As shown in Table 6.4, 79 buildings have a high likelihood (>50% probability) of experiencing Moderate or greater damage in the M7.8 ShakeOut Scenario earthquake on the San Andreas Fault; 17 of these are likely (have >50% probability) to suffer Complete damage. These 79 buildings are located on 19 different campuses (*see* Table 6). The campuses with the most buildings in this category are Redlands High School (29) and Clement Middle School (10). In the San Jacinto scenario earthquake, there are 18 buildings on 9 campuses likely to experience Moderate or greater damage.

Overall, 519 of the 592 buildings are expected to have initial functionality of less than 50% on Day 1 following the M7.8 ShakeOut scenario earthquake; these buildings are spread across virtually all facility locations (*see* Table 6) number decrease to 101 buildings on 16 campuses with less than 50% functionality

following a M6.7 San Jacinto scenario earthquake, with no buildings expected to have less than 50% functionality following a M6.7 Chino Hills scenario earthquake.

Damage information for each campus in the two earthquake events shown to cause potential damage (the M7.8 ShakeOut Scenario and the M6.7 San Jacinto Scenario earthquakes) is given in **Table 6.5**, while **Table 6.6** provides campus level functionality estimates for all three events.

The FEMA-funded SBEFRA project also assessed Liquefaction Susceptibility risk for the RUSD facilities. The assessment found:

- Fifty-three (53) buildings in the Moderate zone (Arroyo Verde Elementary, Fallsvale Elementary, and Mentone Elementary)
- Two hundred-nineteen (219) buildings in the High zone (Central Admin./Enrollment Center, Clement Middle, District Office-North, District Office-South, Judson & Brown Elem., Lugonia Elem., Mission Elem., Orangewood High, Redlands East Valley High, Supply Center, Victoria Elem
- One-hundred (100) buildings in the Very High zone (Beattie Middle, Highland Grove Elem., Redlands High, Transportation

6.2.2 ENERGY SHORTAGE/POWER OUTAGE

To understand the vulnerability to Power Outage in the City of Redlands, an exposure assessment was used. Because there is not a hazard exposure area (or footprint), the Planning Team considered potential impacts within the entire City. A power outage could have a considerable impact on the population, built environment, lifeline infrastructure, and the economy. The Planning Team ranked this hazard as a HIGH impact during the hazard prioritization process.

- *Population*- Our communities have become more reliant on power for gadgets and appliances to perform basic daily activities. This loss of power will not only be an inconvenience but could become a life-threatening experience. Many citizens rely on power to operate medical machinery to survive (i.e., oxygen tanks, dialysis machines).
- *Built Environment*- Power outages have a significant impact on buildings. While in most cases it will not damage the structure, the loss of power will impact the buildings functionality. This includes loss of: lighting, HVAC, electrical outlets, communications, and elevators in taller buildings.
- *Lifeline Infrastructure*- Because of interdependencies, the loss of power can impact several other lifeline systems (i.e., water, telecommunications, natural gas, fuel). While there are backup systems for some aspects of the system, depending on the length of time, many systems will loss functionality or be required to shut down for safety.
- *Economy*- If lifeline systems shutdown and/or fail, there are rippling effects on the economy as there is an inability to provided services and/or move merchandise. Additionally, implementation of temporary mitigation actions could impact operating budgets.

While a power outage can vary in size and length of time, in the City of Redlands, it is expected to be smaller and of limited time.

6.2.3 FLOOD

To understand the flood vulnerability in the City of Redlands, a scientific loss estimation model was used and an exposure assessment was performed. The City of Redlands leverage the Hazus assessment and critical facilities exposure assessment that was conducted as part of the SBEFRA Project and conducted an exposure assessment of its list key assets, general building stock, and population against flood hazard zones. While the Hazus model and the exposure assessment does a good job of estimating damage and potential injuries from the damage, it does not consider challenges from illegal encampments within the watershed and along the riverbeds. These encampments have created an increased concern and extra work for city officials during potential flood events. This vulnerability needs to be better understood and analyzed; and actions taken to help reduce and/or eliminate potential future risk from flooding.

Another aspect that is not part of the Hazus model and the exposure assessment is the National Flood Insurance Program (NFIP). As previously mentioned, the City of Redlands is a NFIP participating community and takes an active role in floodplain management. An important part of its role is to understand and address reoccurring losses, particularly with regards to NFIP claims. A recent check of repetitive and severe repetitive loss properties conducted by FEMA Region IX's NFIP Unit indicates that there are no repetitive or severe repetitive loss properties in the City of Redlands.

The Planning Team ranked this hazard as a HIGH impact during the hazard prioritization process.

6.2.3.1 HAZUS ASSESSMENT

Under the SBEFRA Project, three (3) flood scenarios were analyzed: a 100-year flood, a 100-year flood without levee protection, and a 500-year flood. **Table 6.7** provides the Hazus losses estimated for the County in each of these scenarios.

Table 6.7- Regional Flood Impacts to San Bernardino County (Hazus)

	Regional Risk Assessment Results	Flood Scenario		
		100-year	100-year*	500-year
Regional Risk	Economic loss due to building damage ($B)	0.46	1.6	2.7
	Total building-related direct economic loss ($B)	1.4	5.4	8.6
	# of buildings in the Complete Damage State	345	350	1,105
	Total # Displaced Households	14,828	52,856	86,062
	Total # people needing short-term shelter	32,095	138,991	231,452
	Debris Generated (million tons)	0.1	0.23	0.37

**- 100-year Flood without levee protection*

Unfortunately, the County results can't be disaggregated to individual City-level using publicly-available information. However, the City of Redlands represents 4% of the values of the entire County. Making a simplifying assumption of a uniform distribution of flood risk across the County, the City of Redlands could be expected to suffer as much as:

- $18 million in economic loss due to building damage in a 100-year flood
- $64 million in a 100-year flood event without levee protection
- $108 million in a 500-year flood event
- Have 14 buildings in Complete Damage State during the 100-year event and 44 buildings in Complete Damage State during the 500-year event
- Have 593 displaced households during a 100-year event with levee protection (2,114 households without levee protection); and 3,442 households displaced during a 500-year event
- Of the displaced household, the city can expect 5,560 people needing shelter during a 100-year event with levee protection (1,284 people without levee protection); and 9,258 people during a 500-year event

The SBEFRA project also produced facility-level flood risk assessment results for the 100-year, 100-year without levee protection, and 500-year flood scenarios for the identified essential facilities (Emergency Operations Centers-*EOC*, Police Stations, Fire Stations). The City of Redlands' existing fire stations, police station and EOC were all determined to be functional in each of the three (3) flood scenarios.

To determine a more robust estimate of the potential flood risk faced by the City of Redlands, a quantitative assessment of exposure to flooding was also performed. The improved census-block level general building stock data generated by the SBEFRA project was overlain onto maps of flood hazard (FEMA's National Flood Hazard Layer) to quantify the amount of the building inventory that falls within each hazard zone. The results of this overlay are provided in **Table 6.8**.

Table 6.8- Redlands Building Inventory Exposure to Flood Hazards

Building Inventory Data by General Occupancy	Special Flood Hazard Areas Subject to Inundation by the 1% Annual Chance (100-year) Flood				Other flood areas		Other Areas

Notes: *Special Flood Zone Areas are defined in the Hazard Assessment section under Flood*

As shown in the Table 6.8, most of the city's buildings are located outside of mapped areas subject to flooding (i.e., Zone X). However, $410 million (6%) of the City's building value (3.2% of the buildings by count) is subject to inundation by the 1% Annual Chance (100-year) Flood. Should these buildings suffer flood losses on the order of 12–16% (e.g., the expected range of damage possible for: a two-story home with no basement, a typical retail store, a typical office, or a typical industrial facility, each with two feet

of flood water, as modeled by the Hazus software's damage function library), building damage could reach $50–65 million dollars, significantly more than was estimated from countywide loss estimates assuming uniform risk.

Further, while most of the building value at risk in the 100-year floodplain is commercial development (67%), more than 400 residential buildings are also exposed. Very little inventory (<1%) is exposed to the 500-year flood hazard (Zone X (Shaded)—0.2% Annual chance (500yr) Flood), and just 1% is located in areas of levee protection for the 100-year flood (Zone X Protected by Levee—Areas protected from the 1% annual chance flood).

It should be noted that the totals in this Table 6.8 will vary slightly from those presented in Community Profile sections, because it was developed by identifying individual census blocks falling within the boundaries of each hazard zone, and will therefore produce a more refined overlay assessment than a similar analysis conducted using census tract data. The table in the Community Profile section was developed from census tract data.

6.2.3.2 CRITICAL FACILITIES EXPOSURE ASSESSMENT

Under the FEMA-funded SBEFRA project, a flood exposure analysis of the critical facilities was performed. The analysis identified one (1) Fire station (Fire Station 261) and eighty-eight (88) RUSD buildings (Redlands High School, Supply Center) in Zone AO; and one-hundred-thirty (130) RUSD buildings and one (1) Municipal Utility facility (Hinkley Surface Water Treatment Plant) in Zone X. The other critical facilities were all located in Zone X (Unshaded).

6.2.4 INFECTIOUS DISEASE

To understand the vulnerability to Infectious Disease in the City of Redlands, an exposure assessment was used. Because there is not a hazard exposure area (or footprint), the Planning Team considered potential impacts within the entire City. The city, as well as the state, country, and the world, are vulnerable to infectious disease caused by either newly emerging or existing diseases spread person to person, through a vector, or through food. A significant infectious disease outbreak, epidemic, and/or pandemic could impact a large portion of the population, create challenges on the built environment, overburden essential public services, and effect the economy. The Planning Team ranked this hazard as a HIGH impact during the hazard prioritization process.

- *Population/Environment*- Populations (or other living organisms) are hardest hit during Infectious Disease events. As observed during the COVID pandemic, exposure to infectious diseases can range from mild conditions to fatalities; each having a significant impact on services provided. Another consideration is addressing the challenges and needs of vulnerable populations (elderly, homeless).
- *Built Environment*- Depending on the type of infectious disease event, impact to buildings may include increased use of equipment (i.e., HVAC, water) and adaptive reuse of space. Additionally, it could also include deferred maintenance to equipment if employees and vendors are unavailable.
- *Economy*- Infectious Disease events can have a significant impact on the economy. While outbreaks and some epidemics may be less impactful, larger epidemics and pandemics can be

devastating. This can range from loss of livestock to loss of business due to limited shoppers, employees, and/or tenants.

County Public Health departments develop and exercise response plans related to infectious disease outbreaks, epidemics, and pandemics. Plans are developed through the coordination efforts of partner agencies to establish a solid foundation for improved coordination and intervention by all participants. The plans, however, are focused on public health-related issues and actions. They lack response efforts needed for recovery of the economy and other aspects.

The City of Redlands, as the rest of the world, is currently going through a pandemic with the Coronavirus (COVID-19). Because of the nature of the infectious disease and the duration gain control over the pandemic, there have been significant impact on the local population and the economy. This has led to closure of local schools and businesses, surge in hospital visits, loss of lives, and loss of jobs.

6.2.5 WILDFIRE

To understand the vulnerability to Wildfire in the City of Redlands, an exposure assessment was used. Because there is a hazard exposure area (or footprint), the Planning Team assessed potential impacts against the building stock, population, and key assets within the hazard footprint. The California Department of Forestry and Fire Protection's (CAL FIRE) has created and maintains the Fire Hazard Severity Zones maps. These maps, part of the Fire and Resource Assessment Program (FRAP), look at both State Responsibility Areas (SRA) and Local Responsibility Areas (LRA).

The City of Redlands leverage the exposure assessment of the general building stock and the critical facilities conducted as part of the SBEFRA Project against Fire Hazard Severity Zones. While there is good exposure information to leverage, some considerations should be given to addressing man-made ignitions. This includes the use (or inappropriate use) of fireworks, deliberate ignitions of fires, and the use of fires in homeless encampments. The Planning Team ranked this hazard as a MEDIUM impact during the hazard prioritization process.

6.2.5.1 GENERAL BUILDING STOCK EXPOSURE ASSESSMENT

For this effort, the improved census-block level building data generated by the SBEFRA project was overlain onto CAL FIRE Fire Hazard Severity Zone maps to quantify the amount of the building inventory that falls within each hazard zone. The results of this overlay are provided in **Table 6.9**. It should be noted that mapped fire hazard severity zones affecting the City are all within LRA. The totals in the table (e.g., total building exposure value, total building square footage, etc.) were derived from census "block" data and will vary slightly from those presented in other tables which were developed from census "tract" data.

Table 6.9- City of Redlands Building Inventory Exposure to CAL FIRE Hazard Zones

Building Inventory Data by General Occupancy	CAL FIRE—Fire Hazard Severity Zones					
	Very High	High	Moderate	Non-wildland/ Non-urban	Urban Unzoned	Total
Building Count						
Residential	1,688	870	1,367	379	15,183	19,487

Commercial	28,447	17,177	173,989	515,605	819,510	1,554,728
Industrial	0	0	52,426	2,170	81,634	136,230
Other	8,845	1,413	5,181	12,938	406,863	435,240
Total	**648,808**	**261,439**	**597,148**	**584,724**	**4,523,869**	**6,615,988**
% of Total	10%	4%	9%	9%	68%	100%
Contents Replacement Value ($1,000)						
Residential	305,758	121,425	182,778	27,006	1,607,915	2,244,882
Commercial	30,827	17,177	187,873	515,605	879,714	1,631,196
Industrial	0	0	78,640	3,255	122,451	204,346
Other	2,873	1,413	3,957	2,748	197,518	208,509
Total	**339,458**	**140,015**	**453,248**	**548,614**	**2,807,598**	**4,288,933**
% of Total	8%	3%	11%	13%	65%	100%

As shown in the Table 6.9, most of the city's buildings (80% of buildings, 77% of building value) are located outside of mapped wildfire hazard areas (i.e., are located in "non-wildland/non-urban" or "urban unzoned" areas). However, 10% of the City's building value is located in the area of Very High Fire Hazard Severity, with an additional 4% located in High Severity, and 9% in Moderate Severity. Most of the exposure to these fire hazard severity zones is residential construction; 1688, 870 and 1367 residential buildings are located in the Very High, High and Moderate Zones respectively, valued at more than $611 million, $242 million, and $365 million.

6.2.5.2 CRITICAL FACILITIES EXPOSURE ASSESSMENT

Under the FEMA-funded SBEFRA project, a wildfire exposure analysis of the critical facilities was performed. The analysis of the Federal and Local Responsibly Area Fire Hazard Severity Zones identified:

- One (1) Fire Station (Fire Station 262) in the Moderate Local Responsibly Area Fire Hazard Severity Zone

- Two (2) Municipal Utility facilities (Henry Tate Water Treatment Plant, Hinkley Surface Water Treatment Plant) and one-hundred-forty-eight (148) RUSD buildings (Arroyo Verde Elementary., Beattie Middle, Highland Grove Elementary., Mariposa Elementary., Mission Elementary., Redlands East Valley High) in the High Local Responsibly Area Fire Hazard Severity Zone
- Twenty-seven (27) RUSD buildings (Cram Elementary) in the Very High Local Responsibly Area Fire Hazard Severity Zone
- Three (3) RUSD buildings (Fallsvale Elementary) in the Very High Federal Responsibly Area Fire Hazard Severity Zone

6.2.6 WINDSTORM

To understand the vulnerability to Windstorms in the City of Redlands, an exposure assessment was used. Because there is not a hazard exposure area (or footprint), the Planning Team considered potential impacts within the entire City. Windstorm events have become more frequent, longer lasting, and are more severe/intense than before. Windstorms have the capability of being of long or short duration. While longer duration events can have significant impact on the population, built environment, lifeline infrastructure, environment, and/or the economy; shorter duration events can be just as damaging if the winds are powerful. Windstorm events could also trigger other hazards. For example, prolonged periods of high winds, could damage power lines; creating power outages and/or wildfires. The Planning Team ranked this hazard as a MEDIUM impact during the hazard prioritization process.

- *Population*- While rare, windstorms have been responsible for injuries and loss of life. High winds have been known to knock people down and cause significant injuries, especially with the elderly. Collapsed structures and flying debris carried along by extreme winds can directly contribute to injuries and loss of life. This is particularly true for falling limbs or branches, or entire trees during wind events. Falling trees can bring electric power lines down to the pavement, creating the possibility of lethal electric shock. Rising population growth and new infrastructure in the region creates a higher probability for damage to occur from windstorms as more life and property are exposed to risk.
- *Built Environment*- Both residential and commercial structures are susceptible to damage. Wind pressure can create a direct and frontal assault on a structure, pushing walls, doors, and windows inward. Conversely, passing currents can create lift suction forces that pull building components and surfaces outward. With extreme wind forces, the roof or entire building can fail, causing considerable. Windstorms can also collapse or damage roads, bridges, traffic signals, streetlights, and other facilities. During periods of extremely strong winds, major roads and highways can be temporarily closed to personal, commercial (high profile trucks), and recreational vehicle traffic. Roads blocked by may also have severe consequences to people who need access to emergency services. Emergency response operations can be complicated when roads are blocked or when power supplies are interrupted.
- *Lifelines*- Historically, falling trees and other flying debris have been the major cause of power outages in the region. Windstorms such as strong microbursts and Santa Ana Wind conditions can cause flying debris and downed utility lines. Winds can also knock out or cause damage to telecommunications equipment (cell towers and/or antennas). Many lifeline systems rely on telecommunication systems to manage and monitor systems.

- *Economy*- Windstorms can result in direct damage and indirect consequences (interrupted services) to the local economy. Direct impacts include loss of business; while secondary (indirect) impacts include damage to buildings, personnel, and other vital equipment.
- *Environment*- During wet winters, saturated soils cause trees to become less stable and more vulnerable to uprooting from high winds. In some instances, this lose could include some older, more historical (or sentimental) trees in the area or involve several trees, changing the characteristic of the area.

6.3 TIER II AND TIER III HAZARDS

As mentioned, this section is focused on Tier I hazards. However, because there are no loss estimation models for the hazards in Tier II and Tier III and the only vulnerability assessment that can be performed is an exposure assessment; the Planning Team decided to include an overview of the vulnerabilities of the Tier II and Tier III hazards. Below is a summary of the assessment:

6.3.1 TIER II HAZARDS

- *Aircraft Accident/Incident*- To understand the vulnerability to Aircraft Accidents/Incidents in the City of Redlands, an exposure assessment was used. Because there is not a hazard exposure area (or footprint), the Planning Team considered potential impacts within the entire City. An Aircraft Accident/Incident, depending on the size of the aircraft and the location of the incident, could have a considerable impact on the population (loss of life from the accident), buildings (damage to structures from debris), economy (shut down of areas to recover), and the environment (fire following, loss of vegetation/habitats, reconfiguration of landscape). The Planning Team ranked this hazard as a MEDIUM impact during the hazard prioritization process.
- *Civil Disturbance*- To understand the vulnerability to Civil Disturbance in the City of Redlands, an exposure assessment was used. Because there is not a hazard exposure area (or footprint), the Planning Team considered potential impacts within the entire City. Southern California is a frequent site of demonstrations due to its high profile and presence of significant government functions and buildings. It is conceivable that a demonstration or movement could turn to violence and begin spreading into neighboring communities. While the City of Redlands does not have a history of civil disturbances, it has a high profile in the area. Civil disturbance can vary in size and length of time, however, in the City of Redlands, it is expected to be smaller and of limited time. A civil disturbance, depending on the cause and effect, could have a considerable impact on the population (injuries, fatalities), built environment (destruction to property), lifeline infrastructure (damage to equipment), economy (disruption to normal business), and the environment (destruction to property). The Planning Team ranked this hazard as a HIGH impact during the hazard prioritization process.
- *Drought*- Because there is not a hazard exposure area (or footprint), the Planning Team considered potential impacts within the entire City. A drought event could have a considerable impact on the population (injuries, fatalities), lifeline infrastructure (damage to equipment), economy (disruption to normal business), and the environment (destruction to landscape). The Planning Team ranked this hazard as a LOW impact during the hazard prioritization process.
- *Extreme Temperature*- Because there is not a hazard exposure area (or footprint), the Planning Team considered potential impacts within the entire City. An Extreme Temperature event could have a considerable impact on the population, built environment, lifeline infrastructure, economy, and the environment. Exposure to extreme heat can result in illness (such as heat stroke

or heat exhaustion) or death for those at greatest risk, including: infants and children up to four years of age; people who overexert during work or exercise; people 65 years of age or older; people who are ill or on certain medications; the homeless population; and, people who are overweight. Extreme temperatures can cause equipment to become overburden and possible fail. Depending on the type of equipment impacted, it could over heat structures, create electric al overloads, and warp (or melt) pieces. If lifeline systems shutdown and/or fail, there are rippling effects on the economy as there is an inability to provided services and/or move merchandise. Additionally, extreme temperatures may require implementation of mitigation actions that impact operating budgets. Extreme temperatures could noticeably impact water supplies and vegetation/landscape. The Planning Team ranked this hazard as a LOW impact during the hazard prioritization process.

- *Hazardous Material Accident*- Because there is not a hazard exposure area (or footprint), the Planning Team considered potential impacts within the entire City. A chemical/hazardous materials spill, depending on the cause and effect, could have a considerable impact on the population (injuries, fatalities), built environment (destruction to property), lifeline infrastructure (damage to equipment), economy (disruption to normal business), and the environment (destruction to property). The Planning Team ranked this hazard as a MEDIUM impact during the hazard prioritization process.
- *Infestation*- Because there is not a hazard exposure area (or footprint), the Planning Team considered potential impacts within the entire City. An infestation event could have a considerable impact on the population (injuries, fatalities), economy (disruption to normal business), and the environment (destruction to landscape/crops). The Planning Team ranked this hazard as a LOW impact during the hazard prioritization process.
- *Landslide*- Because there is a hazard exposure area (or footprint), the Planning Team assessed potential impacts against the building stock, population, and key assets within and around the hazard footprint. The current hazard footprint (*see* Figure 5.16, under Hazard Profile) is located in in areas with very little development and population. However, a landslide event could potentially impact people who may be in the area (injuries, fatalities), damage some property and lifeline infrastructure systems and equipment, disrupt the economy, and damage the environment. The Planning Team ranked this hazard as a MEDIUM impact during the hazard prioritization process.
- *Technology Disruption*- Because there is not a hazard exposure area (or footprint), the Planning Team considered potential impacts within the entire City. A cybersecurity even depending on the cause and effect, could have a considerable impact on the population (injuries, fatalities), built environment (destruction to property), lifeline infrastructure (damage to equipment), and economy (disruption to normal business). The Planning Team ranked this hazard as a HIGH impact during the hazard prioritization process.
- *Train Accident/Incident*- Because there is a hazard exposure area (or footprint), the Planning Team assessed potential impacts against the building stock, population, and key assets within and around the hazard footprint. A train derailment event could have a considerable impact on the population (injuries, fatalities), built environment (destruction to property), lifeline infrastructure (damage to equipment), economy (disruption to normal business), and the environment (reconfiguration of landscape). The Planning Team ranked this hazard as a MEDIUM impact during the hazard prioritization process.

6.3.2 TIER III HAZARDS

- *Dam Breach*- Because there is a hazard exposure area (or footprint), the Planning Team assessed potential impacts against the building stock, population, and key assets within the hazard footprint. The current hazard footprint (*see* Figure 5.12, under Hazard Profile) is located in an area with very little development and population. However, a dam breach could potentially impact people who may be in the area (injuries, fatalities), damage some property and lifeline infrastructure systems and equipment, disrupt the economy, and damage the environment. The Planning Team ranked this hazard as a MEDIUM impact during the hazard prioritization process.
- *Terrorism*- Because there is not a hazard exposure area (or footprint), the Planning Team considered potential impacts within the entire City. A terrorism event, depending on the cause and effect, could have a considerable impact on the population (injuries, fatalities), built environment (destruction to property), lifeline infrastructure (damage to equipment), economy (disruption to normal business), and the environment (reconfiguration of landscape). The Planning Team ranked this hazard as a MEDIUM impact during the hazard prioritization process.

7 MITIGATION STRATEGY

7.1 OVERVIEW

The mitigation strategy for the City of Redlands is based on informed assumptions, recognizing both mitigation challenges and opportunities, with the ultimate mission of creating a disaster resistant and sustainable community for the future. The mitigation strategy is derived from an in-depth understanding of possible deficiencies between potential vulnerabilities and existing capabilities, with the mitigation objectives in mind. The mitigation strategy built upon the previous mitigation actions identified in the City of Redlands 2015 LHMP and was expanded to consider current needs.

7.2 MITIGATION GOALS AND OBJECTIVES

To better assist with the identification of mitigation measures, mitigation goals and objectives were developed. The mitigation goals and objectives support the City's mitigation mission to create a disaster resistant and sustainable community. Well defined goals and objectives help focus efforts and ensure progress toward the mitigation mission. The mitigation goal and objectives were used by the Planning Team as a starting point prior to identifying mitigation measures. The goals and objectives include:

- **GOAL 1: Minimize Life Loss and Injuries**
  - Objective 1.1 Improve understanding of the hazards (location, vulnerability, and measures needed).
  - Objective 1.2 Exchange information about hazards, vulnerabilities, and mitigation measures with all levels of governments, private sector, and the public.
  - Objective 1.3 Ensure that all facilities meet current applicable regulations, standards, and ordinances designed to protect life safety.
  - Objective 1.4 Identify and modify high risk structures to meet life safety standards.
  - Objective 1.5 Improve emergency communications and public warning systems.
  - Objective 1.6 Develop policies and procedures to better serve disadvantaged and vulnerable populations.
- **GOAL 2: Minimize Damage to Structures, Property, and Equipment**
  - Objective 2.1 Encourage new development to occur in locations that avoid or minimize exposure to hazards.
  - Objective 2.2 Develop and adopt enhanced land use, design, and construction policies designed to reduce property loss to hazards.
  - Objective 2.3 Incorporate mitigation into repairs, major alterations, new development, and redevelopment projects in areas subject to substantial life safety risks.
  - Objective 2.4 Ensure that all facilities meet current applicable codes, standards, and ordinances, encourage incorporation of mitigation measures for all structures.
  - Objective 2.5 Encourage non-structural retrofitting on elements and equipment within facilities.
- **GOAL 3: Protect the Environment**
  - Objective 3.1 Implement mitigation and watershed protection strategies that reduce loss of wildlife, habitat, and water.
  - Objective 3.2 Implement mitigation and protection strategies that reduce loss of cultural, historic and environmental resources.

Objective 3.3 Enhance, rehabilitate, and protect natural systems and environmental resources.
Objective 3.4 Encourage balance between natural resource management and land use planning.

- **GOAL 4: Promote Public Awareness of Hazards**
  - Objective 4.1 Develop and implement strategies to bring a greater understanding of the risks associated with hazards, individual preparedness activities, and the benefits of hazard mitigation.
  - Objective 4.2 Develop and implement strategies to bring a greater understanding of mitigation, disaster preparedness, and recovery programs.
  - Objective 4.3 Establish and maintain partnerships between all levels of local government, the private sector, the business community, community groups, and institutions of higher learning that exchange information on hazards and the benefits of mitigation measures.
- **GOAL 5: Improve Emergency Management Capability**
  - Objective 5.1 Identify the need for, and acquire, any special emergency management equipment to enhance response capabilities for specific hazards.
  - Objective 5.2 Develop and maintain emergency plans (Response, Recovery, Preparedness, Prevention, Mitigation)
  - Objective 5.3 Establish and maintain emergency management systems and facilities
  - Objective 5.4 Develop and maintain Public-Private Partnerships
  - Objective 5.5 Develop and maintain Memorandums of Understanding/Mutual Aid Agreements
  - Objective 5.6 Develop, maintain, and share essential data (demographics, hazards, buildings, resources, personnel)
  - Objective 5.7 Develop, maintain, and implement emergency management training curriculum
  - Objective 5.8 Design and implement disaster response exercises (tabletop, functional, full-scale)
- **GOAL 6: Ensure Continuity of Government and Operations**
  - Objective 6.1 Develop, maintain, and exercise Business Continuity Plans; ensuring compatibility with emergency management plans.
  - Objective 6.2 Ensure reliability for vital communications
  - Objective 6.3 Protect vital records
  - Objective 6.4 Protect essential Information Technology equipment and systems
  - Objective 6.5 Promote resiliency of essential functions to minimize economic loss/disruption
  - Objective 6.6 Maintain list of Key Assets and ensure their functionality after hazard events
  - Objective 6.7 Maintain a list of essential personnel and vendors with contact information
  - Objective 6.8 Identify and acquire any necessary equipment to maintain functionality

7.3 PROGRESS IMPLEMENTING MITIGATION MEASURES

As part of the LHMP update process, the Planning Team reviewed the mitigation actions included in the previous plan. The review included identifying the status of the mitigation action (Completed, Not Started, In Progress, or No Longer Needed). Those mitigation actions that were determined to be "On Going" where placed under the Mitigation Governance section of Capabilities Assessment chapter. In other words, the Planning Team deemed that since the mitigation measure did not have a start or stop date, it should not be placed under this section and should be captured in the Mitigation Governance with the other ongoing mitigation programs. For all mitigation actions listed as Not Started, the Planning Team discussed whether or not the mitigation action was still needed. If deemed "as needed", the mitigation

measure was carried over to the new list of mitigation measures. Additionally, descriptions of the carried over, needed mitigation actions were reviewed and, in some cases, the name was changed, the scope was expanded, and/or the mitigation measures was merged with another (i.e., public outreach for all hazards, not just earthquakes). **Table 7-1** indicates the status of each of the mitigation measures from the previous plan.

Table 7-1. Status of Previous Mitigation Measures

Mitigation Measure	Hazard	Status
Mission Zanja- improve drainage	Flood	Not Started
Reservoir Canyon- improve drainage	Flood	Not Started
Downtown- improve drainage	Flood	Not Started
South City- improve drainage	Flood	Not Started
North City- improve drainage	Flood	Not Started
Water Conservation Plan- develop and implement	Drought	Not Started
Vegetation Reduction- abatement program	Wildfire	Ongoing program
Vegetation Management- inspection program	Wildfire	Ongoing program
Fire Resistant Community- outreach and education	Wildfire	Not Started
Household Hazardous Waste- Reduction Program	Hazardous Material	Ongoing program
County Hazardous Materials Responders	Hazardous Material	Not Started
Self-contained Breathing Apparatus- equipment purchase	Hazardous Material	Complete
Education and Outreach- structural retrofitting	Earthquake	Not Started
Structural Retrofitting- City-owned buildings	Earthquake	Not Started
Drought Emergency Plan	Drought	Not Started
Public Outreach, Emergency Notification System, and database of Unreinforced Masonry buildings	Earthquake	Not Started
Emergency Circulation Master Plan	Hazardous Material	Not Started

7.4 MITIGATION MEASURE PRIORITIZATION

The Planning Team used the STAPLEE Criteria (Social, Technical, Administrative, Political, Legal, Economic, and Environmental) to evaluate the feasibility of each of the mitigation measures being considered for inclusion in the LHMP update. The STAPLEE process helped the Planning Team understand possible challenges that could hinder the ability to implement the mitigation measure. The STAPLEE criteria as includes the following considerations:

- **Social**
  - *Is the proposed action socially acceptable to the community?*
  - *Are there equity issues involved that would mean that one segment of the community is treated unfairly?*
  - *Will the action cause social disruption?*
- **Technical**
  - *Will the proposed action work?*
  - *Will it create more problems than it solves?*
  - *Does it solve a problem or only a symptom?*
  - *Is it the most useful action in light of other community goals?*
- **Administrative**
  - *Can the community implement the action?*
  - *Is there someone to coordinate and lead the effort?*

- *Is there sufficient funding, staff, and technical support available?*
- *Are there ongoing administrative requirements that need to be met?*

- **Political**
  - *Is the action politically acceptable?*
  - *Is there public support both to implement and to maintain the project?*
- **Legal**
  - *Is the community authorized to implement the proposed action? Is there a clear legal basis or precedent for this activity?*
  - *Are there legal side effects? Could the activity be construed as a taking?*
  - *Is the proposed action allowed by the general plan, or must the general plan be amended to allow the proposed action?*
  - *Will the community be liable for action or lack of action?*
  - *Will the activity be challenged?*
- **Economic**
  - *What are the costs and benefits of this action?*
  - *Do the benefits exceed the costs?*
  - *Are initial, maintenance, and administrative costs taken into account?*
  - *Has funding been secured for the proposed action? If not, what are the potential sources (public, non-profit, and private)?*
  - *How will this action affect the fiscal capability of the community?*
  - *What burden will this action place on the tax base or local economy?*
  - *What are the budget and revenue effects of this activity?*
  - *Does the action contribute to other community goals, such as capital improvements or economic development?*
  - *What benefits will the action provide?*
- **Environmental**
  - *How will the action affect the environment?*
  - *Will the action need environmental regulatory approvals?*
  - *Will it meet local and state regulatory requirements?*
  - *Are endangered or threatened species likely to be affected?*

Each proposed mitigation measure was assessed and given a score between 1–5 where 5 is favorable/beneficial (or NO major issues/opposition) and 1 is unfavorable/not beneficial (or major issues/opposition) for each of the STAPLEE criteria. The scores were then totaled and a final score was established for each mitigation measure. A relative comparison of mitigation measures helps understand which mitigation measure may have the greatest potential for implementation. However, the Planning Team recognized that this ranking does not (and should not) preclude the City from funding mitigation actions lower on the list first, especially if funding is available.

7.5 MITIGATION MEASURES

The focus of the mitigation measures was on the “high” priority (Tier I) hazards (Earthquake, Energy Shortage/Power Outage, Flood, Infectious Disease, Wildfire, and Windstorm); however, some mitigation measures do address other hazards or cut across all hazards. Mitigation measures were identified by assessing the effectiveness of current capabilities (existing plans, policies, and programs) against the

expected impacts (vulnerabilities). **Table 7-2** represents the proposed mitigation measures identified by the Planning Team.

Table 7-2. Proposed Mitigation Actions

	Mitigation Action	Hazard	Goal
1	Create and maintain a Key Asset Database	Multi	1, 2, 5, 6
2	Develop and maintain Emergency Circulation (Traffic) Plan(s); acquire necessary equipment to support implementation	Multi	1, 4, 5, 6
3	Develop and maintain Memorandums of Understanding (MOUs) and Public-Private Partnerships in support of emergency management and business continuity	Multi	1, 2, 3, 4, 5, 6
4	Develop and maintain Business Continuity Plan(s), emphasize loss of technology (Tech Down) situation	Multi	1, 2, 3, 4, 5, 6
5	Develop and maintain an Emergency Public Communications Plan; acquire necessary equipment and maintain systems to support implementation	Multi	1, 4, 5, 6
6	Develop and maintain an Energy Strategic Plan; acquire necessary equipment to support implementation	Multi	1, 2, 3, 4, 5, 6
7	Develop and maintain a Hazards Public Outreach Program; acquire necessary material/equipment/systems to support implementation	Multi	1, 2, 3, 4, 5, 6
8	Update and maintain an Emergency Operations Plan (EOP); acquire necessary equipment/systems to support implementation	Multi	1, 4, 5, 6
9	Develop a Policy to Incorporate Hazard Risk into other plans and development efforts	Multi	1, 2, 3, 4, 5, 6
10	Develop and/or incorporate Emergency Management Training and Exercise Program into existing training and exercise programs	Multi	1, 2, 3, 4, 5, 6
11	Conduct an Assessment of City-owned Lifeline infrastructure; acquire equipment and materials as need to support implementation. Projects could include: pipeline replacement, adding security systems, retrofit of existing facilities/equipment, incorporating backup generators, and other upgrades and improvements.	Multi	2,3,5,6
12	Participate and continue support of the OA Stakeholder Group	Multi	1,3,4,5,6
13	Establish and maintain the Hazard Mitigation Planning Team	Multi	1,2,3,4,5,6
14	Conduct an Assessment of City-owned Facilities; perform Structural and Non-structural Retrofits as needed	Multi	1,2,4,6
15	Develop a Building Condition Assessment Report for typical of building construction types in the City; develop a program to support structural and non-structural retrofitting	Multi	1,2,4,6
16	Develop and maintain a Vegetation Management Plan	Multi	1,2,3,4
17	Increase coordination with Lifeline Stakeholders to better understand their improvement, mitigation, and resiliency efforts	Multi	1, 2, 5, 6
18	Develop protocols and ensure appropriate personnel are signed up and receive Earthquake Notifications from USGS	Earthquake	1,2, 3, 4, 5, 6
19	Coordinate with Southern California Edison Emergency Management	Energy Shortage/ Power Outage	
20	Continue support of the County Floodplain Management Plan	Flood	4, 5, 6

	Mitigation Action	Hazard	Goal
21	Formalize and expand the role of the Floodplain Manager/NFIP Coordinator	Flood	1, 2, 3, 4
22	Conduct drainage improvements on Mission Zanja	Flood	1, 2, 3
23	Conduct drainage improvements on Reservoir Canyon	Flood	1, 2, 3
24	Conduct drainage improvements in Downtown	Flood	1, 2, 3
25	Conduct drainage improvements in South City	Flood	1, 2, 3
26	Conduct drainage improvements in North City	Flood	1, 2, 3
27	Develop, maintain, and disseminate an Infectious Disease Response Plan; acquire equipment, supplies, and other material as needed to support role	Infectious Disease	1, 4, 5, 6
28	Ensure Fire Resistant Materials are incorporated into existing building modifications and/or future development	Wildfire	1, 2, 4, 6
29	Incorporate Defensive Space Standards in existing and future building designs	Wildfire	1, 2, 4, 6
30	Coordinate with San Bernardino International and Ontario International Airport's Emergency Management Division	Aircraft Accident/Incident	1, 2, 4, 5
31	Coordinate with the County, surrounding local cities, and the regional Fusion Center	Civil Disturbance	1, 2, 4, 5, 6
32	Coordinate with Ca Department of Water Resources	Dam Breach	1, 2, 3, 4
33	Coordinate with State and local Governments; acquire equipment, supplies, and other material as needed to support role	Drought	1, 2, 3, 4, 5, 6
34	Develop and maintain a Water Conservation Plan; implement recommendations	Drought	1, 2, 3, 4
35	Develop and maintain a Drought Emergency Plan; acquire equipment, supplies, and other material as needed to support role	Drought	1, 2, 3, 4, 5, 6
36	Coordinate with State of California local Governments; acquire equipment, supplies, and other material as needed to support role	Extreme Temperature	1, 2, 3, 4, 5, 6
37	Develop and maintain an Extreme Temperature Emergency Plan; acquire equipment, supplies, and other material as needed to support implementation	Extreme Temperature	1, 2, 3, 4, 5
38	Formalize, maintain, and promote the Hazardous Materials Program; acquire necessary equipment, material, and supplies needed to support implementation	Hazardous Material Accident	1, 2, 3, 4, 5
39	Enforce and support annual Training and Exercises	Hazardous Material Accident	1, 2, 3, 4, 5
40	Coordinate with local citrus growers; acquire equipment, supplies, and other material as needed to support role	Infestation	2, 3, 4, 5
41	Work with State and County officials; acquire equipment, supplies, and other material as needed to support role	Infestation	2, 3, 4, 5
42	Develop and maintain a Technology Master Plan; acquire equipment as needed to support implementation	Technology Disruption	1, 2, 4, 5, 6
43	Develop and maintain IT Incident Response Plans; implement recommendations	Technology Disruption	1, 2, 4, 5, 6
44	Coordinate with NTSB, Regional Association of governments, and County Transportation Department; acquire equipment, supplies, and other material as needed to support role	Train Accident/Incident	1, 4, 5

	Mitigation Action	Hazard	Goal
45	Coordinate with the County, surrounding local cities, and the regional Fusion Center; acquire equipment, supplies, and other material as needed to support role	Terrorism	1, 2, 3, 4, 5, 6

The Planning Team made assessments to determine if plans, policies, and/or programs needed to be expanded and/or improved; and whether those changes would support reducing the hazard. Any recommended changes to plans, policies, and programs are reflective in Table 7.2. It is also worth to note, that consideration was also given to needed plans, policies, and programs. They too are also included in Table 7.2.

7.6 MITIGATION MEASURE IMPLEMENTATION PLAN

The following table (**Table 7-3**) reflects the implementation plan for each mitigation measure. The implementation plan identifies the lead department responsible for the action, the estimated cost, potential funding source to support the action, and the proposed timeframe for completion. It is important to note that while a lead department is identified, that some other City departments (i.e., Information Technology, Police, Fire, or Facilities) may actually take the lead depending on the project (i.e., Memorandums of Understanding- *MOUs* and Business Continuity Plan- *BCPs*). Emergency Management may coordinate the effort but the other City departments may actually take the lead to complete the particular MOU or BCP. Additionally, the City intends to actively search for other possible funding source to help implement the mitigation measures but those resources are not known at this time to be listed. It is also worth to note that the City has listed Hazard Mitigation Assistance (HMA) grants under several of the mitigation measures. The City recognizes that HMA grants include the Hazard Mitigation Grant Program (HMGP), Building Resilient Infrastructure and Communities (BRIC), and Flood Mitigation Assistance (FMA) funding. It was deemed better by the Planning Team to list it collectively, instead of only selecting 1 or 2 of the grant programs as to not limit consideration under the other grant programs.

Table 7-3. Mitigation Measure- Implementation Plan

	Mitigation Action	Lead	Cost	Timeframe	Funding	Score
1	Create and maintain a Key Asset Database	Emergency Management	<$100,000	< 1 year	General Fund	35
8	Update and maintain an Emergency Operations Plan (EOP); acquire necessary equipment/systems to support implementation	Emergency Management	<$100,000	< 1 year	General Fund/HMA	35
12	Participate and continue support of the OA Stakeholder Group	Emergency Management	<$100,000	<1 year	General Fund/HMA	35
13	Establish and maintain the Hazard Mitigation Planning Team	Emergency Management	<$100,000	<1 year	General Fund/HMA	35
30	Coordinate with San Bernardino International and Ontario International Airport's Emergency Management Division	Facilitates and Community Services	<$100,000	<1 year	General Fund	35

	Mitigation Action	Lead	Cost	Timeframe	Funding	Score
31	Coordinate with the County, surrounding local cities, and the regional Fusion Center	Police	<$100,000	<1 year	General Fund	35
17	Increase coordination with Lifeline Stakeholders to better understand their improvement, mitigation, and resiliency efforts	Emergency Management	<$100,000	1-3 years	General Fund	34
19	Coordinate with Southern California Edison Emergency Management	Municipal Utilities & Engineering	<$100,000	< 1 year	General Fund/ HMA	34
3	Develop and maintain Memorandums of Understanding (MOUs) and Public-Private Partnerships in support of emergency management and business continuity	Emergency Management	<$100,000	1-3 years	General Fund	33
7	Develop and maintain a Hazards Public Outreach Program; acquire necessary material/equipment/systems to support implementation	Emergency Management	<$100,000	< 1 year	General Fund/HMA	33
38	Formalize, maintain, and promote the Hazardous Materials Program; acquire necessary equipment, material, and supplies needed to support implementation	Fire	$100,000-$300,000	<1 year	General Fund	33
39	Enforce and support annual Training and Exercises	Fire / Emergency Management	$100,000-$300,000	1-3 years	General Fund/HMA	33
44	Coordinate with NTSB, Regional Association of governments, and County Transportation Department; acquire equipment, supplies, and other material as needed to support role	Facilities and Community Services	<$100,000	<1 year	General Fund	33
4	Develop and maintain Business Continuity Plan(s), emphasize loss of technology (Tech Down) situation	Emergency Management	$100,000-$300,000	1-3 years	General Fund/HMA	32
5	Develop and maintain an Emergency Public Communications Plan; acquire necessary equipment and maintain systems to support implementation	Emergency Management	<$100,000	< 1 year	General Fund/HMA	32
21	Formalize and expand the role of the Floodplain Manager/NFIP Coordinator	Municipal Utilities & Engineering	<$100,000	< 1 year	General Fund/ HMA	32

	Mitigation Action	Lead	Cost	Timeframe	Funding	Score
28	Ensure Fire Resistant Materials are incorporated into existing building modifications and/or future development	Fire	$100,000-$300,000	1-3 years	General Fund/ HMA	32
29	Incorporate Defensive Space Standards in existing and future building designs	Fire/Development Services	$100,000-$300,000	1-3 years	General Fund/ HMA	32
45	Coordinate with the County, surrounding local cities, and the regional Fusion Center; acquire equipment, supplies, and other material as needed to support role	Police	$300,000-$500,000	1-3 Years	General Fund / EMPG	32
2	Develop and maintain Emergency Circulation (Traffic) Plan(s); acquire necessary equipment to support implementation	Police / Facilities and Community Services	<$100,000	1-3 years	General Fund/ HMA	31
9	Develop a Policy to Incorporate Hazard Risk into other plans and development efforts	Office of City Manager	<$100,000	< 1 year	General Fund	31
20	Continue support of the County Floodplain Management Plan	Municipal Utilities & Engineering	<$100,000	< 1 year	General Fund/ HMA	31
42	Develop and maintain a Technology Master Plan; acquire equipment as needed to support implementation	Management Services	$100,000-$300,000	1-3 Years	General Fund	31
43	Develop and maintain IT Incident Response Plans; implement recommendations	Management Services	$100,000-$300,000	1-3 Years	General Fund	31
10	Develop and/or incorporate Emergency Management Training and Exercise Program into existing training and exercise programs	Emergency Management	$100,000-$300,00	1-3 years	General Fund/HMA	30
33	Coordinate with State and local Governments; acquire equipment, supplies, and other material as needed to support role	Emergency Management / Municipal Utilities & Engineering	$100,000-$300,000	1-3 Years	General Fund/EMPG	30
11	Conduct an Assessment of City-owned Lifeline infrastructure; acquire equipment and materials as need to support implementation	Municipal Utilities & Engineering	$500,000-$1,000,00	3-5 years	General Fund/HMA	29
14	Conduct an Assessment of City-owned Facilities; perform Structural and Non-structural Retrofits as needed	Municipal Utilities & Engineering	$500,000-$1,000,000	3-5 years	General Fund/HMA	29

	Mitigation Action	Lead	Cost	Timeframe	Funding	Score
15	Develop a Building Condition Assessment Report for typical of building construction types in the City; develop a program to support structural and non-structural retrofitting	Building Division	$100,000-$300,000	1-3 years	General Fund/HMA	29
16	Develop and maintain a Vegetation Management Plan	Facilities and Community Services	<$100,000	1-3 years	General Fund/HMA	29
27	Develop, maintain, and disseminate an Infectious Disease Response Plan; acquire equipment, supplies, and other material as needed to support role	Emergency Management	<$100,000	1-3 years	General Fund/ HMA	29
34	Develop and maintain a Water Conservation Plan; implement recommendations	Municipal Utilities & Engineering	$100,000-$300,000	<1 year	General Fund	29
35	Develop and maintain a Drought Emergency Plan; acquire equipment, supplies, and other material as needed to support role	Emergency Management / Municipal Utilities & Engineering	$100,000-$300,000	<1 year	General Fund	29
36	Coordinate with State of California local Governments; acquire equipment, supplies, and other material as needed to support role	Emergency Management	$100,000-$300,000	<1 year	General Fund	29
37	Develop and maintain an Extreme Temperature Emergency Plan; acquire equipment, supplies, and other material as needed to support implementation	Emergency Management	$100,000-$300,000	<1 year	General Fund	29
40	Coordinate with local citrus growers; acquire equipment, supplies, and other material as needed to support role	Facilities and Community Services	<$100,000	<1 year	General Fund	29
41	Work with State and County officials; acquire equipment, supplies, and other material as needed to support role	Facilities and Community Services	$100,000-$300,000	<1 year	General Fund	29
6	Develop and maintain an Energy Strategic Plan; acquire necessary equipment to support implementation	Municipal Utilities & Engineering	<$100,000	1-3 years	General Fund/HMA	28
32	Coordinate with Ca Department of Water Resources	Municipal Utilities & Engineering	<$100,000	<1 year	General Fund	28
18	Develop protocols and ensure appropriate personnel are signed up and receive Earthquake Notifications from USGS	Emergency Management	<$100,000	< 1 year	General Fund/ HMA	26

	Mitigation Action	Lead	Cost	Timeframe	Funding	Score
22	Conduct drainage improvements on Mission Zanja	Municipal Utilities & Engineering	> $1,000,000	3-5 years	General Fund/ HMA	26
23	Conduct drainage improvements on Reservoir Canyon	Municipal Utilities & Engineering	> $1,000,000	3-5 years	General Fund/ HMA	26
24	Conduct drainage improvements in Downtown	Municipal Utilities & Engineering	> $1,000,000	3-5 years	General Fund/ HMA	26
25	Conduct drainage improvements in South City	Municipal Utilities & Engineering	> $1,000,000	3-5 years	General Fund/ HMA	26
26	Conduct drainage improvements in North City	Municipal Utilities & Engineering	> $1,000,000	3-5 years	General Fund/ HMA	26

8 PLAN ADMINISTRATION

8.1 MONITORING, EVALUATING AND UPDATING THE PLAN

The City of Redlands Fire Department Emergency Management Division will lead the effort and will be responsible for ensuring that this plan is being monitored and evaluated over the next five (5) years. While there is not a confirmed meeting schedule, the Emergency Management Division will ensure that at a minimum there is an annual meeting of the Hazard Mitigation Planning Team and possibly other interested stakeholders to discuss the LHMP. The first annual meeting will occur one (1) year from the date of FEMA approval. The annual review with the Hazard Mitigation Planning Team will include; not limited to:

- Status on progress towards implementing mitigation measures
- The need for additional and/or removal of mitigation measures
- Adjustments to the mitigation measure and/or implementation plan
- Addition to the Goals and/or objectives
- Revisions to the Hazard Profiles, primarily focused on description, history, location

In addition to the annual meetings, the Emergency Management Division may also leverage existing meetings to review, evaluate, and discuss progress on the mitigation actions set forth in this plan. The Emergency Management Division will ensure that the LHMP is an agenda item or incorporated into the discussion in those meetings whenever appropriate.

The Hazard Mitigation Planning Team will also visit the LHMP after significant hazard events; ensuring Lessons Learned and other vital information is captured for incorporation into future LHMP updates. This will provide the Hazard Mitigation Planning Team with an opportunity to evaluate the value of any implemented mitigation actions, validate the needs of the remaining mitigation actions, and possibly identify additional mitigation actions.

Information obtained from all of these meetings will be captured by the Emergency Management Division and made available for the next LHMP update.

The Emergency Management Division will also lead the effort to update the LHMP. Understanding the need not to have the LHMP expire, the Emergency Management Division will begin the process of updating the LHMP two (2) years prior to the plan expiration date. The Emergency Management Division may or may not seek another Hazard Mitigation Assistance grant or the assistance of a consultant to support this effort. If either of these are true, the Emergency Management Division will incorporate appropriate time to account for those needs.

8.2 INCORPORATION INTO OTHER PLANNING EFFORTS

The City of Redlands is aware of the hazards that face its community, as historic incidents prove that disasters are a common occurrence in this area. The City will continue to strive toward protecting the life, property and economy of the City. The City of Redlands also supports an all-hazard approach, encouraging information sharing between City Departments to incorporate into other planning efforts. As other plans are developed, the LHMP information will be leveraged and incorporated when other plans could benefit

from a better understanding of hazards and the potential mitigation measures that can be taken. Over the past five (5) years, fiscal and personnel challenges has limited the City's ability to fully incorporated the LHMP into other plans. While previous Planning Team members have championed and shared LHMP information during other planning efforts, there has not been a formalized process to truly integrate the LHMP information into other plans. The City is still facing some of those same challenges but is committed to keep pushing for better integration of LHMP information. The City of Redlands is anticipating incorporating and/or leveraging the information from the LHMP into the:

- Emergency Operation Plan
- Water System Emergency Response Plan
- Water Conservation Management Plan (Title 13 – 13.06.010)
- Fire Protection Master Plan (Title 15, Section 15.20.580)
- Spill Prevention Control & Countermeasure Plan
- Storm Water Pollution Prevention Plan (Title 3 3.48.020 and 3.56.020)
- Business Emergency Contingency Plan
- Sewer Capital Improvement (Title 3 – 3.44.020)
- Vegetation Management (Title 15, Section 15.20.560)
- Wildland-Urban Interface Fire Area (Title 15, Section 15.20.550)
- Earthquake – Hazardous Building (Title 15, Section 15.52.020)

The City of Redlands incorporated by reference the previously LHMP into the City's General Plan Safety Element. As opportunities present themselves, the City will make every effort to incorporate the new LHMP information into the City's General Plan, where appropriate. In the meantime, the LHMP will be utilized to assess future development in accordance with the General Plan. In addition to reviewing future development against relevant land use and zoning regulations, building codes and fire codes, and environmental and engineering standards, it will also be reviewed against the LHMP. Proposed development projects will be assessed to determine exposure (or risk) to community hazards. The LHMP will also serve as a reference for suggested mitigation measures to reduce and/or eliminate risk from those hazards.

8.3 CONTINUED STAKEHOLDER AND PUBLIC INVOLVEMENT

As mentioned under Section 2.4 and 2.5, the City of Redlands will organize and/or participate in a variety of meetings/events to share and exchange information about mitigation with stakeholders and the public. The City will use its social media platforms and when, appropriate, leverage stakeholder and community social media platforms to announce the meetings/events. The City will also continue to provide public forms with our quarterly Disaster Council which gives the public and local emergency managers the opportunity to collaborate and coordinate prior to an emergency occurring.

8.4 POINT OF CONTACT

Comments or suggestions regarding this plan may be submitted to:

Fire Department; Emergency Management Division
Esther Martinez, Emergency Management Specialist
35 Cajon Street, Suite 12
Redlands, Ca 92373
(909) 798-7600 / emartinez@cityofredlands.org

APPENDIX 1 ADOPTION RESOLUTION

RESOLUTION NO. 8268

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF REDLANDS ADOPTING THE CITY OF REDLANDS HAZARD MITIGATION PLAN AS REQUIRED BY THE FEDERAL DISASTER MITIGATION AND COST REDUCTION ACT OF 2000

WHEREAS, President William J. Clinton signed H. R. 707, the Disaster Mitigation and Cost Reduction Act of 2000, into law on October 30, 2000; and

WHEREAS, the Disaster Mitigation Act of 2000 requires all jurisdictions to be covered by a Local Hazard Mitigation Plan to be eligible for Federal Emergency Management Agency post - disaster funds; and

WHERAS, local mitigation plans are required as a condition of receiving project grant funds under the Hazard Mitigation Assistance Grants and Public Assistance Eligibility; and

WHEREAS, the city of Redlands' Fire Department has acted as the lead agency in the development of the City of Redlands Hazard Mitigation Plan; and

WHEREAS, the City's Fire Department has coordinated the development of the Hazard Mitigation Plan; and

WHEREAS, the City's Fire Department is concerned about mitigating potential losses from natural disasters before they occur; and

WHEREAS, the plan identifies potential hazards, potential losses and potential mitigation measures to limit losses; and

WHEREAS, the City of Redlands General Plan Safety Element references/incorporates the Local Hazard Mitigation Plan; and

WHEREAS, the California State Governor's Office of Emergency Services and Federal Emergency Management Agency have reviewed the plan; and

WHEREAS, formal adoption of the plan by the Redlands City Council is required before final approval of the plan can be obtained from the Federal Emergency Management Agency; and

WHEREAS, the City Council has determined that it would be in the best interests of the City and its residents and visitors as a whole, to adopt the Hazard Mitigation Plan;

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Redlands as follows:

Section 1. The City Council adopts the City of Redlands Hazard Mitigation Plan, dated November 2021, to meet the requirements of the Disaster Mitigation and Cost Reduction Act of 2000, and directs the Redlands Fire Department Emergency Management Division to forward the Hazard Mitigation Plan to the Governor's Office of Emergency Services and Federal Emergency Management Agency on behalf of the City for final approval.

Section 2. A certified copy of the City of Redlands Hazard Mitigation Plan shall be placed on file with the City Clerk's office and is available for viewing by the public.

ADOPTED, SIGNED AND APPROVED this 16th day of November, 2021.

Paul T. Barich, Mayor

ATTEST:

Jeanne Donaldson, City Clerk

I, Jeanne Donaldson, City Clerk of the City of Redlands, hereby certify that the foregoing resolution was duly adopted by the City Council at a regular meeting thereof held on the 16th day of November, 2021

AYES: Councilmembers Foster, Tejeda, Davis, Guzman-Lowry; Mayor Barich
NOES: None
ABSENT: None
ABSTAINED: None

Jeanne Donaldson, City Clerk

HOW TO SUBMIT COMMENTS: Following public health recommendations to limit public gatherings during the COVID-19 pandemic, City Manager Charles M. Duggan Jr., acting as the City of Redlands Emergency Services Director has directed that Commission/Board meetings be closed to the public until further notice or until the current local State of Emergency has been lifted.

In order to have your public comment read into the public record at the meeting, members of the public are asked to submit comments (250 words or less) prior to Thursday, October 22, 2020 at 5:00 p.m. to Esther Martinez by email at **emartinez@cityofredlands.org** or by telephone at (909) 307-7313.

In compliance with the Americans with Disabilities Act, if you need special assistance to participate in this meeting, please contact the Goutam Dobey of Municipal Utilities/Engineering Department at (909) 798-7584 ext. 5. Notification 48 hours prior to the meeting will enable the City to make reasonable arrangements to ensure accessibility to this meeting. (28 CFR 35.102-35.104 ADA Title II)

Individuals with a disability, consistent with the Americans with Disabilities Act, who need assistance with public comment, may contact Esther Martinez by telephone (909) 307-7313 or by email at **emartinez@cityofredlands.org** at least two hours before the meeting to make alternate arrangements.

A. Call to Order (Mayor Paul W. Foster)

B. Pledge of Allegiance (Mayor Paul W. Foster)

C. Public Comment (Mayor Paul W. Foster)
(At this time, the Disaster Council chair will read all public comments, up to 250 words, into record if they are received in accordance with the deadlines stated above. Please Note: The Disaster Council may not discuss or take action on any public comment made..

D. Introductions / Welcome (Chief Sessler)

E. Approval of Minutes (Mayor Paul W. Foster)

F. Old Business
1. No Follow-up items

G. New Business
1. Presentation by Andy Petrow from APetrow Consulting "City of Redlands Local Hazard Mitigation Plan Update"
    a. https://www.cityofredlands.org/sites/main/files/file-attachments/redlands_final_hmp_april_2015.pdf?1552928023

H. Member Announcements (Roundtable)

I. Possible agenda items for next meeting (?)

J. Adjournment
(The next Disaster Council Meeting will be held on January 25, 2021)

In compliance with the Americans with Disabilities Act, if you need special assistance to participate in this meeting, please contact the Goutam Dobey of Municipal Utilities/Engineering Department at (909) 798-7584 ext. 5. Notification 48 hours prior to the meeting will enable the City to make reasonable arrangements to ensure accessibility to this meeting. (28 CFR 35.102-35.104 ADA Title II)

City of Redlands

Local Hazard Mitigation Plan Update

PUBLIC KICKOFF MEETING/PRESENTATION

OCTOBER 26, 2020

Purpose of the Meeting/Presentation

- Introduce the Project
  - What and Why were are doing it
- Gain Common Understanding of:
  - Mitigation
  - Local Hazard Mitigation Plans (LHMP)
- Increase Awareness of the City of Redlands LHMP and Update Process
  - What hazards are being addressed
  - How the LHMP will be updated
- Set expectations moving forward
  - How you can keep updated on progress

Agenda

- Background
- Definition of Mitigation
- Local Hazard Mitigation Plans (LHMP) Overview
- City of Redlands LHMP Overview
- Public Outreach Effort
- Next Steps

Background

- FEMA provides funds after disasters to mitigate future impacts
- Historically difficult to identify eligible projects
  - *pressure to obligate funds*
- In 2000, FEMA revised regulations to require an LHMP to received mitigation funds
- LHMP must be comprehensive and identify projects
  - *Project must be in LHMP to be eligible for funding*

Definition of Mitigation

- Part of the Disaster Cycle
- FEMA defines Mitigation as the *"effort to reduce and/or eliminate loss of life and property by lessening the impacts from hazards"*
- Benefits of mitigation include:
  - Saved lives
  - Reduced damage to property
  - Reduced economic losses
  - Minimized social disruption
  - Shorter recovery period for the community

Local Hazard Mitigation Plans

Goal-

- To develop a strategy to reduce and/or eliminate impacts from hazards

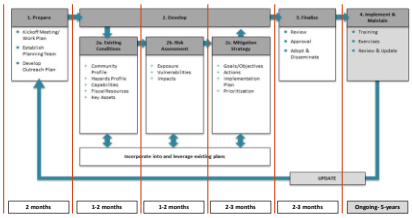
Objectives-

- Apply a comprehensive planning approach
  - Involve the Whole Community (regional stakeholders)
  - Address Multi-hazards
  - Engage the public
- Understand capabilities and vulnerabilities to hazards
  - Identify Key Assets
- Identify projects and actions
- Integrated with other planning efforts

Local Hazard Mitigation Plans (cont)

LHMP Requirements

- Locals prepare, adopt, and maintain….must be update every 5 years
- Cal OES reviews
- FEMA approves



What are Cal OES/FEMA are looking for……

- Proper documentation of planning process
- Current community, hazard, and impact information
- Validation/Identification of projects and actions
- Method for plan review (updating) and implementation
- Verification plan was adopted

City of Redlands LHMP

- Last Approved and Adopted in 2015
- Can be found on the City's website
  https://www.cityofredlands.org/pod/emergency-plans
- Analyzed the following hazards
  - Chemical Agents
  - Chemical/Hazardous Materials Spill
  - Crop Losses/Freezing
  - Dam Breach
  - Disease
  - Drought
  - Earthquake
  - Energy/Power Outage/Excessive Heat
  - Flooding
  - Infestation
  - Mudslide/Landslide
  - Tornado
  - Wildfire
  - Windstorm
- Mitigation Actions (projects) focused on priority hazards

City of Redlands LHMP (cont)

City of Redlands LHMP (cont)

Planning Team

- Representatives from the City Departments
- Representatives from Regional Stakeholders
  - State
  - County
  - Special Districts
  - Non-governmental Organizations
  - Lifelines
  - Hospitals/Care Facilities
  - Businesses (large employment corporations)
- Consultant Team

Public Outreach Effort

- Because of COVID-19 challenges with, outreach will be done virtually
- Two (2) public meetings
  - Project kickoff….*this meeting*
  - Draft plan review
- Status Updates
  - City Social Media (Website, FaceBook, Instagram, LinkedIn, Twitter)
  - Other Social Media (NextDoor, stakeholder social media platforms)
  - Leverage City Council/Community meetings
  - *Possibly* Newspapers/letters (local, regional, city, community organizations)
  - *Possibly* Flyer Announcements (inserts in invoices/bills)

Next Steps

- Review public comments
- Hold additional Planning Team meetings
- Prepare and Review draft LHMP sections
- Provide status updates to the public

Contacts

- Esther Martinez
  - (909) 798-7600
  - emartinez@cityofredlands.org
- Andy Petrow
  - (818) 294-5472

City of Redlands

Local Hazard Mitigation Plan Update

PUBLIC KICKOFF MEETING/PRESENTATION

APRIL 26, 2021

Purpose of the Meeting/Presentation

- Quick Overview of the Project
  - What is a Local Hazard Mitigation Plan (LHMP)
  - Why are we updating the LHMP
- Review Information in the draft LHMP
  - Federal Requirements
  - List of Community Hazards
  - Proposed Mitigation Measures/Actions
- Discuss Next Steps
  - What is left to do

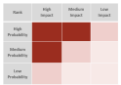
Overview

- FEMA provides funds to mitigate hazard impacts but require a LHMP
  - *Mitigation measure/action must be in LHMP to be eligible*
- LHMP = City's strategy to mitigate impacts from hazards
  - *Must include a comprehensive planning process*
  - *Must understand capabilities and vulnerabilities*
  - *Must include mitigation measures/actions*
- LHMP must be updated every 5 years
  - *City of Redlands last updated in 2015*

Federal Requirements

- Locals prepare, adopt, and maintain
- Cal OES reviews
- FEMA approves

What are Cal OES/FEMA are looking for……



- Documentation of planning process
- List of current capabilities and hazards
- Understanding of impacts (vulnerability)
- Identification of mitigation measures/actions
- Plan for maintaining and implementing LHMP

Capability Assessment

- What tools are in your mitigation toolbox
- Resources
  - ***Personnel-*** *who works (can work) on mitigation efforts*
  - ***Governance-*** *what rules are in place to support mitigation*
  - ***Technical-*** *what special skills are available to support mitigation*
  - ***Fiscal-*** *what kind of funding is available for mitigation efforts*

Hazards in the Draft LHMP

- Analyze all hazards in the community
  - *Provide Description, History, Location, other information*
- Screen (prioritize) all hazards
  - *Probability vs Impact*
- Hazards in the LHMP; Priority hazards in **bold**
  - Aircraft Accident/Incident
  - Chemical Agent Release
  - Civil Disturbance
  - Dam Breach
  - Drought
  - **Earthquake**
  - **Energy Shortage/Power Outage**
  - Extreme Temperature
  - **Flood**
  - Hazardous Material Accident
  - **Infectious Disease**
  - Infestation
  - Landslide
  - Technology Disruption
  - Train Accident/Incident
  - **Wildfire**
  - **Windstorm**

Vulnerability Assessment

- Quantitative Impacts
  - *Damage Assessment models (Hazus)*
  - *Exposure Assessment (hazard footprint)*
- Qualitative Impacts
  - *Population*
  - *Built Environment*
  - *Lifelines*
  - *Economy*
  - *Environment*

Mitigation Strategy

- Only need to address *priority* hazards
- Includes actions that cut across multiple hazards
- Actions need to be prioritized
  - *Assessed against typical challenges to projects (feasibility assessment)*
- Must have an implementation plan
  - *Identify lead Department*
  - *Estimate on how long it will take*
  - *Estimate how much it may cost*
  - *Identify possible funding sources*

Proposed Mitigation Measures/Actions

- Develop a **Key Asset** Database
- Adopt policy to **incorporate hazards** into relevant city plans/programs
- Develop/Expand **MOUs** and **Public-Private Partnerships**
- Develop/Expand **Public Outreach** efforts regarding hazards
- Develop/Expand **Emergency Management Training and Exercises**
- **Assess City-owned Facilities** (structural/non-structural retrofitting)
- Develop **Mitigation Reference Guide** for privately-owned Facilities
- **Build Closer Working Relationship** with utilities, government (State, County, locals), Airports/Rail, Citrus Growers, local Businesses, Faith-based organizations
- **Improve Drainage** throughout the City

Proposed Mitigation Measures/Actions (*cont.*)

- Develop/Expand **Plans/Assessments;** *implement recommendations*
  - *Business Continuity Plan*
  - *Emergency Circulation Plan*
  - *Emergency Operations Plan*
  - *Emergency Public Communications Plan*
  - *Energy Strategic Plan*
  - *Extreme Temperature Plan*
  - *Infectious Disease Response/Recovery Plan*
  - *Technology Master Plan; including an IT Incident Response Plan*
  - *Vegetation Management Plan*
  - *Water Conservation/Drought Emergency Plan*

Next Steps

- Review public comments
  - *Draft LHMP can be found on City website by end of the week*
- Finalize draft LHMP with the Planning Team
- Submit and Review draft LHMP with Cal OES/FEMA
  - *Revise as needed*
- City Council Adoption

Appendix 6 List of Significant Earthquakes in California Since 1700

Date	Magnitude	Name, Location, or Region Affected	Loss of Life and Property
1700, Jan. 26	9.0	Offshore, somewhere between Cape Mendocino and Canada	Limited data available, magnitude is an estimate. Shook northern California, Oregon, Washington, and southern British Columbia; caused tsunami damage to villages in Japan and western US
1857, Jan 9	7.9	Great Fort Tejon earthquake	1 dead; damage from Monterey to San Bernardino County
1906, Apr 18	7.8	Great 1906 San Francisco Earthquake and Fire	3,000 dead; $524 million in property damage (includes damage from fire)
1838, Jun	7.4	San Francisco to San Juan Bautista	Limited data available, magnitude is an estimate. Damage to San Francisco and Santa Clara
1872, Mar 26	7.4	Owens Valley	27 dead; 56 injured; $250,000 in property damage
1980, Nov 8	7.4	West of Eureka	6 injured; $2 million in property damage
1812, Dec 8	7.3	Wrightwood	Limited data available, magnitude is an estimate. 40 dead at San Juan Capistrano
1892, Feb 24	7.3	Laguna Salida, Baja California	Damage to San Diego and Imperial Valley
1922, Jan 31	7.3	Offshore, about 70 mi W of Eureka	
1952, Jul 21	7.3	Kern County earthquake	12 dead; $60 million in property damage
1954, Dec 16	7.3	Fairview Peak, near Fallon, NV	
1992, Jun 28	7.3	Landers	1 dead; 402 injured; $91.1 million in property damage
1923, Jan 22	7.2	Off Cape Mendocino	Destructive in Humboldt County; strongly felt in Reno
1932, Dec 21	7.2	Cedar Mountain, near Gabbs, NV	
1992, Apr 25	7.2	Petrolia	356 injured; $48.3 million in property damage
1812, Dec 21	7.1	Los Angeles, Ventura, Santa Barbara	Limited data available, magnitude is an estimate. 1 dead
1927, Nov 4	7.1	40 km west of Lompoc	Damage in Santa Barbara and San Luis Obispo counties
1954, Dec 16	7.1	Dixie Valley, near Fallon, NV	
1868, Oct 21	7.0	Hayward Fault	30 dead; $350,000 in property damage
1899, Apr 16	7.0	Offshore, about 80 miles west of Eureka	
1934, Dec 31	7.0	In Mexico, about 100 miles SE of El Centro	
1940, May 19	7.0	Imperial Valley	9 dead; $6 million in property damage
1991, Aug 17	7.0	Offshore, about 100 miles NW of Eureka	Preceded by two quakes (M 6.3 and 6.2) on Aug. 16 and 17
1994, Sep 1	7.0	Offshore, about 70 miles W of Cape Mendocino	
1873, Nov 23	6.9	Crescent City region	Damage in California-Oregon border area
1989, Oct 17	6.9	Loma Prieta	63 dead; 3,737 injured; $6 billion in property damage

1872, Mar 26	6.8	Owens Valley	Aftershock of previous entry
1872, Apr 11	6.8	Owens Valley	Aftershock of March 26, 1872 quake
1890, Feb 9	6.8	San Jacinto fault?	Little damage
1918, Apr 21	6.8	San Jacinto	1 dead; several injuries; $200,000 in property damage
1925, Jun 29	6.8	Santa Barbara	13 dead; $8 million in property damage
1954, Jul 6	6.8	Rainbow Mountain, near Fallon, NV	
1999, Oct 16	7.1	Bullion Mountains (Hector Mine)	Minimal injuries and damage due to sparse population in affected area
1954, Aug 24	6.8	Rainbow Mountain, near Fallon, NV	
1976, Nov 26	6.8	Offshore, about 100 mi WNW of Eureka	
1898, Apr 15	6.7	Fort Bragg - Mendocino	Limited data available, magnitude is an estimate. Damage from Fort Bragg to Mendocino; 3 houses collapsed; landslides reported
1899, Dec 25	6.7	San Jacinto and Hemet	6 dead; $50,000 in property damage
1994, Jan 17	6.7	Northridge	57 dead; more than 9,000 injured; about $40 billion in property damage
1892, Apr 19	6.6	Vacaville	1 dead; $225,000 in property damage
1915, Nov 21	6.6	In Mexico, about 60 miles S of El Centro	
1941, Feb 9	6.6	Offshore, about 65 miles W of Eureka	
1954, Dec 21	6.6	East of Arcata	1 dead; several injured; $2.1 million in property damage
1968, Apr 8	6.6	Borrego Mountain	
1971, Feb 9	6.6	San Fernando	65 dead; more than 2,000 injured; $505 million in losses
1987, Nov 24	6.6	Superstition Hills	part of above damage
1992, Apr 26	6.6	Petrolia	Aftershock of the Apr. 25 quake
1992, Apr 26	6.6	Petrolia	Another aftershock of Apr. 25 quake
1852, Nov 29	6.5	Near Fort Yuma, Arizona	Limited data available, magnitude is an estimate.
1860, Mar 15	6.5	Carson City	Limited data available, magnitude is an estimate.
1865, Oct 8	6.5	Santa Cruz Mountains	$0.5 million in property damage
1918, Jul 15	6.5	Offshore, about 40 W of Eureka	
1934, Jul 6	6.5	Offshore, about 100 mi WNW of Eureka	
1934, Dec 30	6.5	In Mexico, about 40 miles S of El Centro	
1947, Apr 10	6.5	East of Yermo	
1956, Feb 9	6.5	In Mexico, about 80 miles SW of El Centro	
1979, Oct 15	6.5	Imperial Valley	9 injured; $30 million in property damage
1992, June 28	6.5	Big Bear	Included with Landers losses, above
2003, Dec 22	6.5	San Simeon	

1836, Jun 10	6.4	Near San Juan Bautista	Limited data available, magnitude is estimate. Older reports reported quake as possibly larger and centered near Oakland
1898, Mar 31	6.4	Mare Island	$350,000 in property damage
1991, Jul 12	6.6	Offshore west of Crescent City	
1899, Jul 22	6.4	Wrightwood	Chimneys knocked down; landslides reported
1911, Jul 1	6.4	Morgan Hill area	
1933, Mar 11	6.4	Long Beach	115 dead; $40 million in property damage
1942, Oct 21	6.4	About 25 miles W of Westmoreland	
1983, May 2	6.4	Coalinga	
1986, Jul 21	6.4	Chalfant Valley	
1800, Nov 22	6.3	San Diego/San Juan Capistrano region	Limited data available, magnitude is an estimate. Damaged adobe walls of missions in San Diego and San Juan Capistrano
1922, Mar 10	6.3	Parkfield	
1995, Feb 19	6.3	Offshore, about 70 miles W of Cape Mendocino	
1980, May 25	6.2	Mammoth Lakes	
1984, Apr 24	6.2	Morgan Hill	$8 million in property damage
1908, Nov 4	6.0	SW of Death Valley	
1948, Dec 4	6.0	East of Yermo	
1980, May 25	6.0	Mammoth Lakes	
1987, Oct 1	6.0	Whittier Narrows	8 dead; $358 million in property damage to 10,500 homes and businesses

Attachment 3

Adoption Resolution

3

City Council **AGENDA ITEM NO. L1.**

DATE: June 2, 2026

TO: Honorable Mayor and City Council Members

SUBJECT: Consideration of two Resolutions related to compliance with Senate Bill 707 (SB 707): Resolution No. 8788 amending and restating Protocols for Resolving Disturbances at Public Meetings and Resolution 8787 No. establishing a Policy for Addressing Connection Disruptions During Hybrid Public Meetings (Assistant City Manager McConnell)

MOTION:

If the City Council determines that staff's recommendation is appropriate, the following motions are provided:

1. I move to adopt Resolution No. 8788 amending and restating protocols for resolving disturbances at public meetings and rescinding Resolution No. 7482; and

2. I move to adopt Resolution No. 8787 establishing a policy for addressing connection disruptions of two-way telephone or audiovisual platforms during public meetings pursuant to Senate Bill 707 (Government Code Section 54953.4(b)(1)).

RECOMMENDATION:

Staff recommends that the City Council adopt two resolutions to ensure compliance with Senate Bill 707 (SB 707), including a resolution amending and restating protocols for resolving disturbances at public meetings; and a resolution establishing a policy for addressing connection disruptions during hybrid public meetings.

DISCUSSION:

In 2025, the State of California enacted Senate Bill 707 (SB 707), to expand public access and participation in local government meetings. Beginning July 1, 2026, qualifying legislative bodies, including the City Council, are required to allow members of the public to participate through two-way telephonic or audiovisual platforms. SB 707 also establishes new requirements related to maintaining order during meetings and addressing technical disruptions that may impact remote participation. The two resolutions presented herein are intended to bring the City of Redlands into compliance with these requirements.

Resolution 8788 amends and restates the City's existing protocols for addressing disturbances during public meetings. Resolution No. 7482, adopted in 2015, established procedures for maintaining order during in-person meetings but does not address remote participation. The proposed updates expand these protocols to apply equally to in-person and remote participants, consistent with SB 707. The resolution establishes a clear warning process and authorizes the Mayor, or presiding officer, to mute or disconnect remote participants who continue to disrupt the meeting after a warning has been issued, while maintaining existing enforcement procedures for in-person disruptions. Adoption of this resolution will rescind Resolution No. 7482 and replace it with updated protocols attached as Exhibit "A."

Resolution 8788 establishes a formal policy for addressing connection disruptions during hybrid public meetings, as required by SB 707 (Government Code Section 54953.4(b)(1)). If a disruption prevents remote participation, the legislative body must recess the meeting for at least one hour to allow staff to make a good faith effort to restore service. If service is restored, the meeting may reconvene; if not, the legislative body may proceed only upon making findings that good faith efforts were made and that the public interest in continuing the meeting outweighs the need for remote access. This policy establishes clear procedures consistent with SB 707 and applies them across all City legislative bodies conducting hybrid meetings.

ALTERNATIVES:

The City Council may choose not to adopt one or both of the proposed resolutions. However, doing so would result in the City not being fully compliant with SB 707 requirements, which take effect July 1, 2026.

STRATEGIC PLAN:

NA

SUBMITTED BY:
Janice McConnell, Assistant City Manager

RECOMMENDED BY:
Charles M. Duggan Jr., City Manager

REVIEWED BY:
Yvette M. Abich Garcia, City Attorney
Janice McConnell, Assistant City Manager
James Garland, Interim Management Services/Finance Director

RESOLUTION NO. 8787

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF REDLANDS ESTABLISHING A POLICY FOR ADDRESSING CONNECTION DISRUPTIONS OF TWO-WAY TELEPHONE OR AUDIOVISUAL PLATFORMS DURING PUBLIC MEETINGS PURSUANT TO SENATE BILL 707 (CALIFORNIA GOVERNMENT CODE SECTION 54953.4(b)(1))

WHEREAS, Senate Bill ("SB") 707 was enacted into law, which amends the Ralph M. Brown Act ("Brown Act") (Government Code Section 54950, *et seq*.) for the purpose of expanding and diversifying public engagement during public meetings of qualified legislative bodies such as the City Council; and

WHEREAS, among the new requirements in SB 707, the Brown Act now requires hybrid meetings of qualified legislative bodies to allow the public to participate remotely through a two-way telephone or audiovisual platform; and

WHEREAS, SB 707 also requires that the City Council adopt a formal policy by or before July 1, 2026 that outlines how the qualified legislative body will address two-way telephone or audiovisual platform disconnections and interruptions that prevent the public from virtually attending and participating in a meeting; and

WHEREAS, SB 707 requires the qualified legislative body to take a recess and to attempt to restore service for at least one hour; and after the expiration of one hour, the legislative body may proceed with the meeting if the legislative body finds that good faith efforts were made to restore service and the public interest in continuing the meeting outweighs remote access; and

WHEREAS, by this Resolution, the City Council adopts this policy for managing technical disruptions of two-way remote participation of public meetings to comply with SB 707 (Government Code Section 54953.4(b)(1)).

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF REDLANDS AS FOLLOWS;

Section 1. Pursuant to Government Code Section 54953.4(b)(1), the City Council and any other city commission, board or committee that is subject to the Brown Act and conducts hybrid meetings utilizing a two-way telephone or audiovisual platform for public participation shall address connection disruptions as follows:

(a) In the event of a connection disruption that makes remote public participation not possible during a meeting, the presiding officer shall recess the meeting for no less than one (1) hour to allow city staff/consultants to make a good faith effort to restore service and allow the public to participate in the meeting remotely. The City Council may meet in closed session during this period.

(b) If service is restored by or before the expiration of one (1) hour, the presiding officer shall reconvene the meeting allowing the public to participate remotely.

(c) After the expiration of one (1) hour, if service is not restored, the City Council shall adjourn the meeting, unless the majority of the City Council by roll call vote makes the following findings to continue the meeting:

(i) Good faith efforts to restore service to allow remote public participation has been made in accordance with this policy; and

(ii) The public interest in continuing the meeting outweighs the public interest in remote public access.

Section. 2. This Resolution shall take effect immediately upon its adoption.

ADOPTED, SIGNED AND APPROVED this 2nd of June, 2026.

Jeanne Donaldson, City Clerk

RESOLUTION NO. 8788

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF REDLANDS AMENDING AND RESTATING PROTOCOLS FOR RESOLVING DISTURBANCES AT PUBLIC MEETINGS

WHEREAS, there are certain basic rights of the public of due process, and an opportunity to address issues with equity, fairness, and equal protection of the law; and

WHEREAS, it is the policy of the City Council and the City's appointed commissions, boards, and committees that the right of the public to express one's views are fundamental to a free society; however, such right is not absolute and is subject to valid regulations; and

WHEREAS, it is the desire of the City Council to balance the right of the public to address the City Council and the City's appointed commissions, boards, and committees with the need to ensure that public comment does not disrupt or hinder the smooth and efficient legislative function of the City Council, and the functions of the City's appointed commission, boards, and committees; and

WHEREAS, during the COVID-19 pandemic of March 2020, in order to comply with Health Department directives, the Governor's Executive Orders permitted the city councils and other commission, boards and committees to hold meetings virtually and the public to participate in meetings using two-way telephone or audiovisual technology; and

WHEREAS, while holding hybrid meetings where members of the public may participate in city council meetings using two-way telephone or audiovisual technology encouraged more public engagement, several jurisdictions slowly transitioned back to in-person participation in public meetings with the introduction of vaccinations, which minimized the public health concerns posed by COVID-19; and

WHEREAS, in 2025, the Governor signed into law Senate Bill ("SB") 707 amending the Ralph M. Brown Act mandating qualified legislative bodies, such as the City Council, to allow members of the public to participate in public meetings using two-way telephone or audiovisual platforms starting July 1, 2026; and

WHEREAS, SB 707 also makes clear that the warning and removal requirements of the Brown Act for members of the public who disrupt or impede the orderly conduct of the meeting applies equally to those individuals participating remotely through two-way telephone or audiovisual platforms; and

WHEREAS, in 2015 the City Council adopted protocols for resolving disturbances at public meetings by those members attending in-person, but the protocols pre-dated the use of two-way audiovisual technology in public meetings; and

WHEREAS, the enactment of SB 707 now requires that the City Council amend its protocols

for addressing meeting disruptions to apply to members of the public who interfere with or disturb public meetings while participating remotely.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Redlands as follows:

Section 1. The protocols for resolving disruptions at public meetings of the City Council and the City's appointed commissions, boards and committees, in the form attached hereto as Exhibit "A," is hereby amended and restated.

Section 2. Resolution No. 7482 is hereby rescinded.

Section 3. This Resolution shall take effect immediately upon its adoption.

ADOPTED, SIGNED AND APPROVED this 2nd day of June, 2026.

EXHIBIT "A"

A. Warning. If a member of the public participating in a City Council meeting either in-person or remotely using a two-way telephone or audiovisual platform, disturbs, impedes or interferes with the orderly conduct of the meeting, the following warning shall be given by the Mayor:

(1) The Mayor shall ask that any person violating the public speaking rules of the Redlands City Council, the Brown Act or Penal Code 403 to be orderly and silent. The warning shall be in substantially the form described below:

You are hereby advised that your conduct is in violation of California Penal Code Section 403, and you are directed to be orderly and silent. Penal Code Section 403 states that any person who, without authority of law, willfully disturbs or breaks up a lawfully convened meeting of the City Council is guilty of a misdemeanor. Continued disruption of this City Council meeting will result in your physical removal from the meeting by the officer present or disconnection from remote participation in the meeting by order of the Mayor, and you will not be permitted to participate for the duration of the meeting. In addition, any continued disruption of this meeting is grounds for your being arrested and charged with a misdemeanor. Do you understand this admonition?

(2) If, after receiving a clear warning from the Mayor, the person persists in disturbing the meeting, the Mayor may order a brief recess of the Council to regain order.

B. Enforcement of Meeting Protocols for In-Person Participation. If the person persists in disturbing the meeting, despite having been previously warned, the Mayor may order him or her to leave the Council meeting.

(1) If the person does not depart the Council Chambers of his or her own volition, the Mayor may order any law enforcement officer who is on duty at the meeting to escort that person from the Council Chambers.

(2) The Chief of Police or the officer present shall carry out all orders and instructions given him/her by the Mayor for the purpose of maintaining order in the Council Chambers.

(3) Upon instructions from the Mayor, it shall be the duty of the Chief of Police or their representative to eject any person from the Council Chambers or place the individual under arrest, or both.

(4) As set forth in the Brown Act (Government Code Section 54957.9), in the event that any meeting is willfully interrupted by a group or groups of persons so as to render the orderly conduct of such meeting unfeasible and order cannot be restored by the removal of individuals who are willfully interrupting the meeting, the members of the Council may order the ***meeting room cleared*** and continue in session. Only matters appearing on the agenda may be considered in such a session. Representatives of the press or other news media, except those

participating in the disturbance, shall be allowed to attend any session held pursuant to this section. Nothing in the section shall prohibit the legislative body from establishing a procedure for readmitting an individual or individuals not responsible for willfully disturbing the orderly conduct of the meeting.

(5) Any person who willfully disturbs or breaks up a Council meeting may be arrested and charged with a misdemeanor, pursuant to California Penal Code Section 403. Penal Code 403 states:,

"Every person who, without authority of law, willfully disturbs or breaks up any assembly or meeting that is not unlawful in its character, other than an assembly or meeting referred to in Section 302 of the Penal Code or Section 18340 of the Elections Code, is guilty of a misdemeanor."

C. Enforcement of Meeting Protocols for Remote Participation. If the person participating in the meeting by two-way telephonic or audiovisual platform persists in disturbing the meeting, despite having been previously warned, the Mayor may order that the remote connection be muted for the remainder of the meeting.

(1) If the person participating remotely continues to engage in conduct to disrupt the meeting despite the remote connection having been muted, the Mayor may order that the remote connection be disconnected.

D. Commissions, Boards, and Committees. The presiding officers of City appointed boards, commissions, and committees shall employ substantially the same protocol as set forth above, including coordination with the City's Chief of Police, to resolve public disturbances that may occur during their respective public meetings.

DISTURBANCES AT COUNCIL MEETINGS PROTOCOL

(AMENDED AND RESTATED ON June 2, 2026)

A. WARNING: The Mayor shall ask that any person violating the public speaking rules of the Redlands City Council, the Brown Act, or Penal Code 403 to be orderly and silent. The warning shall be in substantially the form described below.

> **You are hereby advised that your conduct is in violation of California Penal Code Section 403, and you are directed to be orderly and silent. Penal Code Section 403 states that any person who, without authority of law, willfully disturbs or breaks up a lawfully convened meeting of the City Council is guilty of a misdemeanor. Continued disruption of this City Council meeting will result in your physical removal from the meeting by the officer present *or disconnection from remote participation in the meeting by order of the Mayor,* and you will not be permitted to participate for the duration of the meeting. In addition, any continued disruption of this meeting is grounds for your being arrested and charged with a misdemeanor. Do you understand this admonition?**

If, after receiving a clear warning from the Mayor, the person persists in disturbing the meeting, the Mayor may order a brief recess of the Council to regain order.

B. IN-PERSON PARTICIPATION: If the person persists in disturbing the meeting, despite having been previously warned, the Mayor may order the individual to leave the Council meeting.

If the person does not depart the Council Chambers of their own volition, the Mayor may order any law enforcement officer who is on duty at the meeting to escort that person from the Council Chambers.

The Chief of Police or the officer present shall carry out all orders and instructions given by the Mayor for the purpose of maintaining order in the Council Chambers.

Upon instructions from the Mayor, it shall be the duty of the Chief of Police or their representative to eject any person from the Council Chambers or place the individual under arrest or both.

As set forth in the Brown Act (Government Code Section 54957.9), in the event that any meeting is willfully interrupted by a group or groups of persons so as to render the orderly conduct of such meeting unfeasible and order cannot be restored by the removal of individuals who are willfully interrupting the meeting, the members of the Council may order the meeting room cleared and continue in session. Only matters appearing on the agenda may be considered in such a session. Representatives of the press or other news media, except those participating in the disturbance, shall be allowed to attend any session held pursuant to this section. Nothing in the section shall prohibit the legislative body from establishing a procedure for readmitting an individual or individuals not responsible for willfully disturbing the orderly conduct of the meeting.

Any person who willfully disturbs or breaks up a Council meeting may be arrested and charged with a misdemeanor, pursuant to California Penal Code Section 403. Penal Code 403 states, "Every person who, without authority of law, willfully disturbs or breaks up any assembly or meeting that is not unlawful in its character, other than an assembly or meeting referred to in Section 302 of the Penal Code or Section 18340 of the Elections Code, is guilty of a misdemeanor."

C. REMOTE PARTICIPATION. If the person participating in the meeting by two-way telephonic or audiovisual platform persists in disturbing the meeting, despite having been previously warned, the Mayor may order that the remote connection be muted for the remainder of the meeting.

   If the person participating remotely continues to engage in conduct to disrupt the meeting despite the remote connection having been muted, the Mayor may order that the remote connection be disconnected.

West's Ann.Cal.Gov.Code § **54957.95**

§ **54957.95**. Disruptive behavior during meeting; removal of individual

Effective: January 1, 2026
Currentness

(a)(1) In addition to authority exercised pursuant to Sections 54954.3 and 54957.9, the presiding member of the legislative body conducting a meeting or their designee may remove, or cause the removal of, an individual for disrupting the meeting, including any teleconferenced meeting.

(2) Prior to removing an individual, the presiding member or their designee shall warn the individual that their behavior is disrupting the meeting and that their failure to cease their behavior may result in their removal. The presiding member or their designee may then remove the individual if they do not promptly cease their disruptive behavior. This paragraph does not apply to any behavior described in subparagraph (B) of paragraph (1) of subdivision (b).

(b) As used in this section:

(1) "Disrupting" means engaging in behavior during a meeting of a legislative body that actually disrupts, disturbs, impedes, or renders infeasible the orderly conduct of the meeting and includes, but is not limited to, one of the following:

(A) A failure to comply with reasonable and lawful regulations adopted by a legislative body pursuant to Section 54954.3 or any other law.

(B) Engaging in behavior that constitutes use of force or a true threat of force.

(2) "True threat of force" means a threat that has sufficient indicia of intent and seriousness, that a reasonable observer would perceive it to be an actual threat to use force by the person making the threat.

City Council **AGENDA ITEM NO. L2.**

DATE: June 2, 2026

TO: Honorable Mayor and City Council Members

SUBJECT: Consideration of Resolution No. 8789 approving Agreement 3CA07718 with the Department of Forestry and Fire Protection (Cal Fire) for wildland protection during fiscal year 2026-2027 for an amount not to exceed $319,021.75 (Fire Chief Sessler)

MOTION:

If the City Council determines that staff's recommendation is appropriate, the following motion is provided:

I move that the City Council adopt Resolution No. 8789 with the Department of Forestry and Fire Protection (Cal Fire) for wildland fire protection during fiscal year 2026-2027 for an amount not to exceed $319,021.75

RECOMMENDATION:

Staff recommends that City Council approve Resolution No. 8789 with Cal Fire for supplemental fire resources such as helicopters, aircraft retardant drops, hand-crews, and unified command for wildland fire incidents for an amount not to exceed $319,021.75 during fiscal year 2026-2027.

DISCUSSION:

With the annexation of the area located south of Sunset Drive into the City of Redlands in 1990, Cal Fire and the City of Redlands entered into a Wildland Fire Protection Agreement. Since then, the agreement is reviewed, updated and approved annually. The agreement previously provided for the protection of 2,900 acres of wildland within the city. However, the coverage increased to 5,985 acres in fiscal year 2022. This widened the protection of the wildland areas affected. Specifically, Cal Fire provides supplemental fire resources such as helicopters, aircraft retardant drops, hand-crews and unified command for wildland fire incidents. The agreement covers the period beginning July 1, 2026, to June 30, 2027, and requires annual amendments to reflect any changes in Cal Fire's costs for providing service. The annual cost for FY 2026-2027 is $319,021.75. The agreement allows for a more predictable fire suppression cost, considering that just one moderate vegetation fire could result in significant suppression costs associated with the utilization of highly specialized equipment, materials and the costs of command staff and personnel.

ALTERNATIVES:

City Council may choose not to approve the Wildland Fire Protection Agreement for Fiscal Year 2026-2027.

STRATEGIC PLAN:

Priority B - Public Health & Safety

SUBMITTED BY:
Rich Sessler, Fire Chief

RECOMMENDED BY:
Charles M. Duggan Jr., City Manager

REVIEWED BY:
Yvette M. Abich Garcia, City Attorney
Janice McConnell, Assistant City Manager
James Garland, Interim Management Services/Finance Director

PREPARED BY:
Bruni Reyes, Management Analyst

FISCAL IMPACT

Fiscal Year: 2026-27

Revenue Generating: No

Amount: $319,021.75

Budgeted Y/N: Y

Account No.:

Additional Appropriation Required: No

Discussion:

The total cost for services under the Wildland Fire Protection Agreement from Cal Fire for fiscal year 2026-2027 is $319,021.75. This cost includes a per acre rate of $47.55 and an administrative rate of 12.10% or $5.75 for a total rate of $53.31. The total cost has been included in the FY2027 Proposed Budget.

RESOLUTION NO. 8789

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF REDLANDS APPROVING THE DEPARTMENT OF FORESTRY AND FIRE PROTECTION (CALFIRE) FOR WILDLAND PROTECTION SERVICES DURING FISCAL YEAR 2026/2027.

WHEREAS, the City wishes to approve an agreement with the Department of Forestry and Fire Protection (CALFIRE) for wildland protection services in order to protect the public health and safety from wildfires with supplemental fire resources from CALFIRE such as helicopters, aircraft retardant drops, hand-crews and unified command for wildland fire incidents.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF REDLANDS AS FOLLOWS:

Section 1. The City of Redlands does hereby approve the agreement with the California Department of Forestry and Fire Protection (CALFIRE) dated June 2nd, 2026 (Contract # 3CA07718) attached hereto as Exhibit "A." This agreement provides Wildland Fire Protection during the State fiscal year 2026/2027.

Section 2. The Mayor of the City of Redlands is hereby authorized to sign and execute said agreement on behalf of the City of Redlands.

BE IT FURTHER RESOLVED the Mayor of the City of Redlands is hereby authorized to sign and execute said agreement on behalf of the City of Redlands.

ADOPTED, SIGNED AND APPROVED ON this 2nd day of June, 2026.

2. **AUTHORIZATION**

This Agreement is entered into this 1st day of July, 2025, by and between the State of California, hereinafter called STATE and City of Redlands, County of San Bernardino, State of California, hereinafter called Local Agency through its duly authorized officers. As used herein, Director shall mean Director of the California Department of Forestry and Fire Protection (CAL FIRE). Where the standard clauses for example in Exhibit C, use the word "Contractor" that word shall mean LOCAL AGENCY as LOCAL AGENCY is used in this Agreement.

Section 4142 of the Public Resources Code provides that the Director may enter into cooperative Agreements with local jurisdictions for the purpose of providing wildland fire protection.

3. **SCOPE OF WORK**

LOCAL AGENCY has the responsibility for protection of life, property, and wildland areas comprising 5985 acres of land as indicated on the map included under Exhibit E and desires to contract with the STATE to provide wildland fire protection to said area.

STATE has the ability to provide wildland fire protection for said area, of the type and degree, which it now provides on adjacent State Responsibility Areas.

4. SERVICES BY STATE

A. STATE shall provide wildland fire protection for the areas defined in the above section.

B. For those areas, which are adjacent to State Responsibility Area, STATE will provide wildland fire protection at the same level of service it now provides on adjacent State Responsibility Area.

C. For those areas (islands), which are not adjacent to State Responsibility Area, the wildland fire protection provided by the STATE will be limited to those resources identified in the preplanned wildland response for the respective area. Any resources beyond those specified in the preplanned wildland response are assistance by hire and the financial responsibility of the LOCAL AGENCY.

5. ADMINISTRATION

A. LOCAL AGENCY agrees that STATE may dispatch fire protection resources available under this Agreement to other areas of the state when needed at the sole discretion of STATE.

B. STATE response will be subject to availability of resources.

C. Incident Management within the contract area shall conform to current Incident Command System criteria for Unified Command.

D. STATE and LOCAL AGENCY shall, through established dispatch procedures, immediately notify each other of any fire incident within the contract area.

6. MUTUAL AID

LOCAL AGENCY shall provide mutual aid response into the contract area for wildfires. Structural fire protection remains the jurisdictional and financial responsibility of LOCAL AGENCY.

7. ENTIRE AGREEMENT

This Agreement contains the whole Agreement between the parties. It cancels and supersedes any previous Agreement for the same or similar services.

EXHIBIT B

BUDGET DETAIL, INVOICING, PAYMENT AND RECONCILIATION

1. Invoicing and Payment:

A. LOCAL AGENCY shall pay STATE for providing said protection at the rate of $50.18 per acre, plus an 10.77% administrative charge for a total of $332,672.55 upon presentation of an invoice by STATE. The rate per acre and administrative charge will be calculated by STATE prior to January 1, of each year and annually thereafter, for the succeeding fiscal year subject to approval by LOCAL AGENCY. This Agreement shall be amended each fiscal year to reflect new rates.

B. STATE shall provide thirty (30) day written notice to LOCAL AGENCY of the cost per acre and the administrative charge to be assessed for each subsequent fiscal year during the term of this Agreement; LOCAL AGENCY shall have thirty (30) days to approve said rate; if written approval is not received by STATE within said period, STATE's obligations hereunder shall terminate; LOCAL AGENCY shall be liable for all amounts due up to and including the date of such termination.

C. To minimize the need for reconciliation payment is expected in full after the LOCAL AGENCY receives the STATE invoice. Payments made by the LOCAL AGENCY will cover the protection rate per acre and the administrative charge for the protection services rendered by STATE and including any other costs as provided herein, giving credit for all payments made by LOCAL AGENCY and claiming the balance due to STATE, if any, or refunding to LOCAL AGENCY the amount of any overpayment.

2. Budget Contingency Clause

A. If the LOCAL AGENCY's governing authority does not appropriate sufficient funds for the current year or any subsequent years covered under this Agreement, which results in an inability to pay the STATE for the services specified in this Agreement, the LOCAL AGENCY shall promptly notify the STATE and this Agreement will terminate pursuant to the notice periods required herein.

B. If funding for any fiscal year is reduced or deleted by the LOCAL AGENCY for purposes of this program, the LOCAL AGENCY shall promptly notify the STATE, and the STATE shall have the option to either cancel this Agreement with no liability occurring to the STATE, or offer an agreement amendment to LOCAL AGENCY to reflect the reduced amount, pursuant to the notice terms herein

C. If the STATE Budget Act does not appropriate sufficient funds to provide the services for the current year or any subsequent years covered under this Agreement, which results in an inability to provide the services specified in this Agreement to the LOCAL AGENCY, the STATE shall promptly notify the LOCAL AGENCY, and this Agreement will terminate pursuant to the notice periods required herein.

D. If funding for any fiscal year is reduced or deleted by the STATE Budget Act for purposes of this program, the STATE shall promptly notify the LOCAL AGENCY, and the LOCAL AGENCY shall have the option to either cancel this Agreement with no liability occurring to the LOCAL AGENCY, or offer an agreement amendment to LOCAL AGENCY to reflect the reduced services, pursuant to the notice terms herein.

E. Notwithstanding the foregoing provisions in paragraphs A and B above, the LOCAL AGENCY shall remain responsible for payment for all services actually rendered by the STATE under this Agreement regardless of LOCAL AGENCY funding being reduced, deleted or not otherwise appropriated for this program. The LOCAL AGENCY shall promptly notify the STATE in writing of any budgetary changes that would impact this Agreement.

F. LOCAL AGENCY and STATE agree that this Budget Contingency Clause shall not relieve or excuse either party from its obligation(s) to provide timely notice as may be required elsewhere in this Agreement.

EXHIBIT D

SPECIAL TERMS AND CONDITIONS

1. **Cancellation**

   Failure of either party to meet any of the terms and conditions of this Agreement, including non-payment of monies due hereunder, shall be cause for the termination of this Agreement; such termination shall become effective upon written receipt of 30 day notice of cancellation.

2. **Audit**

   If the Agreement is over $10,000, the parties shall, in accordance with Government Code Section 10532, be subject to examination and audit of the State Auditor General for a period of three (3) years after final payment under the Agreement. Examination and audit shall be confined to those matters connected with performance of the Agreement including, but not limited to, cost of administering the Agreement The Contractor warrants by execution of this Agreement, that no person or selling agency has been employed or retained to solicit or secure this Agreement upon Agreement or understanding.

3. **Operating Plan**

   Prior to April 1 of each year, STATE and LOCAL AGENCY shall establish a joint Operating Plan for the contract area, which shall be attached after Exhibit E. If LOCAL AGENCY received its structural fire protection from another local agency, the local agency providing the structural fire protection must be party to the Operating Plan.

4. **Extension of Agreement**

   Unless there is written notice by LOCAL AGENCY to terminate this Agreement STATE shall extend this Agreement for a single one-year period from the original termination date. The cost of services provided by STATE during the extended period shall be based upon the rates published for the fiscal year in which the extended period falls had a new Agreement been entered into.

5. **Modification**

   This Agreement may be amended at any time by written mutual consent of the parties hereto.

6. **Indemnification**

   Each party, to the extent permitted by law, agrees to indemnify and hold harmless the other party, its officers, agents, and employees from any and all claims and losses accruing or resulting to any person, firm or corporation who may be injured or damaged by the indemnifying party.

Repair of Fire Suppression Damage

1. The nature of fire and other emergency activity work invites accidents, injuries, and general confusion. In addition, fire control forces may take actions that are reasonably necessary to control a fire or other emergency but which are damaging to property. Such actions will be considered reasonable and proper if good judgment is used by responsible personnel according to the conditions that exist at the time of the action. CAL FIRE is not obligated or authorized to make actual expenditures or efforts to repair or replace private property.
2. Advise those claimants who insist upon taking formal action to correspond with the Secretary, State Board of Control, P.O. Box 3035, 926 J Street, Suite 300, Sacramento, 5814. The claimant may be supplied by the Board of Control with a copy of form STD 275, entitled, Damage Claims Against the State of California.

Fire Information

1. Joint fire information dissemination as determined and approved by the Unified Incident Commanders.

General Procedures

1. Plan to be reviewed and updated as necessary prior to June 30th.

2. AUTHORIZATION

This Agreement is entered into this 1st day of July, 2026, by and between the State of California, hereinafter called STATE and City of Redlands, County of San Bernardino, State of California, hereinafter called Local Agency through its duly authorized officers. As used herein, Director shall mean Director of the California Department of Forestry and Fire Protection (CAL FIRE). Where the standard clauses for example in Exhibit C, use the word “Contractor” that word shall mean LOCAL AGENCY as LOCAL AGENCY is used in this Agreement.

Section 4142 of the Public Resources Code provides that the Director may enter into cooperative Agreements with local jurisdictions for the purpose of providing wildland fire protection.

3. SCOPE OF WORK

LOCAL AGENCY has the responsibility for protection of life, property, and wildland areas comprising 5985 acres of land as indicated on the map included under Exhibit E and desires to contract with the STATE to provide wildland fire protection to said area.

STATE has the ability to provide wildland fire protection for said area, of the type and degree, which it now provides on adjacent State Responsibility Areas.

4. SERVICES BY STATE

A. STATE shall provide wildland fire protection for the areas defined in the above section.

B. For those areas, which are adjacent to State Responsibility Area, STATE will provide wildland fire protection at the same level of service it now provides on adjacent State Responsibility Area.

C. For those areas (islands), which are not adjacent to State Responsibility Area, the wildland fire protection provided by the STATE will be limited to those resources identified in the preplanned wildland response for the respective area. Any resources beyond those specified in the preplanned wildland response are assistance by hire and the financial responsibility of the LOCAL AGENCY.

5. ADMINISTRATION

A. LOCAL AGENCY agrees that STATE may dispatch fire protection resources available under this Agreement to other areas of the state when needed at the sole discretion of STATE.

B. STATE response will be subject to availability of resources.

C. Incident Management within the contract area shall conform to current Incident Command System criteria for Unified Command.

D. STATE and LOCAL AGENCY shall, through established dispatch procedures, immediately notify each other of any fire incident within the contract area.

6. MUTUAL AID

LOCAL AGENCY shall provide mutual aid response into the contract area for wildfires. Structural fire protection remains the jurisdictional and financial responsibility of LOCAL AGENCY.

7. ENTIRE AGREEMENT

This Agreement contains the whole Agreement between the parties. It cancels and supersedes any previous Agreement for the same or similar services.

EXHIBIT B

BUDGET DETAIL, INVOICING, PAYMENT AND RECONCILIATION

1. Invoicing and Payment:

A. LOCAL AGENCY shall pay STATE for providing said protection at the rate of $47.55 per acre, plus an 12.10% administrative charge for a total of $319,021.75 upon presentation of an invoice by STATE. The rate per acre and administrative charge will be calculated by STATE prior to January 1, of each year and annually thereafter, for the succeeding fiscal year subject to approval by LOCAL AGENCY. This Agreement shall be amended each fiscal year to reflect new rates.

B. STATE shall provide thirty (30) day written notice to LOCAL AGENCY of the cost per acre and the administrative charge to be assessed for each subsequent fiscal year during the term of this Agreement; LOCAL AGENCY shall have thirty (30) days to approve said rate; if written approval is not received by STATE within said period, STATE's obligations hereunder shall terminate; LOCAL AGENCY shall be liable for all amounts due up to and including the date of such termination.

C. To minimize the need for reconciliation payment is expected in full after the LOCAL AGENCY receives the STATE invoice. Payments made by the LOCAL AGENCY will cover the protection rate per acre and the administrative charge for the protection services rendered by STATE and including any other costs as provided herein, giving credit for all payments made by LOCAL AGENCY and claiming the balance due to STATE, if any, or refunding to LOCAL AGENCY the amount of any overpayment.

2. Budget Contingency Clause

A. If the LOCAL AGENCY's governing authority does not appropriate sufficient funds for the current year or any subsequent years covered under this Agreement, which results in an inability to pay the STATE for the services specified in this Agreement, the LOCAL AGENCY shall promptly notify the STATE and this Agreement will terminate pursuant to the notice periods required herein.

B. If funding for any fiscal year is reduced or deleted by the LOCAL AGENCY for purposes of this program, the LOCAL AGENCY shall promptly notify the STATE, and the STATE shall have the option to either cancel this Agreement with no liability occurring to the STATE, or offer an agreement amendment to LOCAL AGENCY to reflect the reduced amount, pursuant to the notice terms herein

C. If the STATE Budget Act does not appropriate sufficient funds to provide the services for the current year or any subsequent years covered under this Agreement, which results in an inability to provide the services specified in this Agreement to the LOCAL AGENCY, the STATE shall promptly notify the LOCAL AGENCY, and this Agreement will terminate pursuant to the notice periods required herein.

D. If funding for any fiscal year is reduced or deleted by the STATE Budget Act for purposes of this program, the STATE shall promptly notify the LOCAL AGENCY, and the LOCAL AGENCY shall have the option to either cancel this Agreement with no liability occurring to the LOCAL AGENCY, or offer an agreement amendment to LOCAL AGENCY to reflect the reduced services, pursuant to the notice terms herein.

E. Notwithstanding the foregoing provisions in paragraphs A and B above, the LOCAL AGENCY shall remain responsible for payment for all services actually rendered by the STATE under this Agreement regardless of LOCAL AGENCY funding being reduced, deleted or not otherwise appropriated for this program. The LOCAL AGENCY shall promptly notify the STATE in writing of any budgetary changes that would impact this Agreement.

F. LOCAL AGENCY and STATE agree that this Budget Contingency Clause shall not relieve or excuse either party from its obligation(s) to provide timely notice as may be required elsewhere in this Agreement.

EXHIBIT D

SPECIAL TERMS AND CONDITIONS

1. **Cancellation**

   Failure of either party to meet any of the terms and conditions of this Agreement, including non-payment of monies due hereunder, shall be cause for the termination of this Agreement; such termination shall become effective upon written receipt of 30 day notice of cancellation.

2. **Audit**

   If the Agreement is over $10,000, the parties shall, in accordance with Government Code Section 10532, be subject to examination and audit of the State Auditor General for a period of three (3) years after final payment under the Agreement. Examination and audit shall be confined to those matters connected with performance of the Agreement including, but not limited to, cost of administering the Agreement The Contractor warrants by execution of this Agreement, that no person or selling agency has been employed or retained to solicit or secure this Agreement upon Agreement or understanding.

3. **Operating Plan**

   Prior to April 1 of each year, STATE and LOCAL AGENCY shall establish a joint Operating Plan for the contract area, which shall be attached after Exhibit E. If LOCAL AGENCY received its structural fire protection from another local agency, the local agency providing the structural fire protection must be party to the Operating Plan.

4. **Extension of Agreement**

   Unless there is written notice by LOCAL AGENCY to terminate this Agreement STATE shall extend this Agreement for a single one-year period from the original termination date. The cost of services provided by STATE during the extended period shall be based upon the rates published for the fiscal year in which the extended period falls had a new Agreement been entered into.

5. **Modification**

   This Agreement may be amended at any time by written mutual consent of the parties hereto.

6. **Indemnification**

   Each party, to the extent permitted by law, agrees to indemnify and hold harmless the other party, its officers, agents, and employees from any and all claims and losses accruing or resulting to any person, firm or corporation who may be injured or damaged by the indemnifying party.

REDLANDS WILDLAND CONTRACT AREA OPERATIONAL PLAN

Between

CALIFORNIA DEPARTMENT OF FORESTRY and FIRE PROTECTION (CAL FIRE), San Bernardino Unit,

And

REDLANDS FIRE DEPARTMENT

Authority

Public Resources Code Section 4142 - Cooperative Agreements States, "The Department may, with the approval of the Department of General Services, enter into a cooperative agreement upon such terms and under such conditions as it deems wise, for the purpose of preventing and suppressing forest fires or other fires in any lands within any county, city or district which makes an appropriation for that purpose."

Purpose

The purpose of this operating plan is to increase and/or enhance the fire ground operations within the California Department of Forestry and Fire Protection (CAL FIRE) San Bernardino Unit Redlands Wildland Contract area including mutual threat zones. This plan would allow responding agencies to pre-designate the Unified Ordering point, VHF Radio Frequencies, establishment of a Unified Command structure for wildland fires in the contract area.

Definitions

1. Unified Ordering Point
    a. To maintain consistency in the ordering process, a central ordering point is established and is referred to as a Unified Ordering Point (UOP). Establishing the UOP allows the incident ordering process to stay consistent throughout the incident and ensures a single point ordering concept.
2. Unified Command
    b. The organizational structure is implemented on multi-jurisdictional incidents. The Agency Incident Commanders will jointly determine incident objectives.
3. Incident Command Post
    c. That location at which the primary command functions are executed and usually collocated with the incident base.

Proposal

1. The proposed plan is to:
    a. Suppress Wildland fires within the contract area and/or mutual threat zone.
2. Area involved;
    a. See attached map, Redlands Wildland Contract area inclusive of mutual threat zones.

Procedures

1. Regardless of which agency Company Officer is on scene of the incident first, the first arriving Company Officer shall;
    a. Assume command,
    b. Establish jurisdiction,
    c. Determine threats with potential,
    d. Provide a report on conditions,
    e. Formulate and effect a plan of action,
    f. Prioritize control objectives,
    g. Life, Property and Natural Resources,
    h. Request additional resources as appropriate,
    i. Establish the UOP.

2. The UOP shall be the California Department of Forestry and Fire Protection (CAL FIRE) San Bernardino Unit Emergency Command Center (BDCC).

3. Regardless of which agency Chief Officer is on scene of the incident first;
    a. The first arriving Chief Officer will transition command from the initial attack incident commander.
    b. Announce and assume command.
    c. Establish an Incident Command Post (ICP).

4. Wildland fires will be managed via Unified Command structure, affording all agencies with jurisdictional responsibility to establish a common set of objectives and strategies.

5. Common communications shall be established utilizing the FIRESCOPE Statewide channel plan with the following VHF frequencies.
    a. Command
        i. Common command frequency assigned by the BDCC
    b. Tactical
        ii. Common tactical frequencies assigned by the BDCC
    c. Air to Ground
        iii. Common air to ground frequencies assigned by the BDCC

6. Wildland fires in jurisdictions outside of the Redlands Wildland Contract area that are deemed an imminent threat to Redlands Wildland Contract area or mutual threat zone:
    a. Immediate notification will be made to BDCC. BDCC will in turn notify Redlands Fire Department via San Bernardino County Communications Center (XBOC).

7. For Wildland fires originating in the Redlands Wildland Contract area or mutual threat zone, Cal Fire will dispatch resources based on the Low, Medium or High dispatch levels, as well as by the closest resource concept. Additional resources may be dispatched based upon initial reports.

RESPONSE LEVELS			
STATE RESOURCES	HIGH	MEDIUM	LOW
Engines	7	5	3
Dozers	1	1	-
Crews	4	3	-
Helicopter	Type 1 (2) Type 2 (1)	Type 1 (2)	-
Air Tanker	2	1	-
Air Attack	1	1	-
Battalion Chief	1	1	-

Repair of Fire Suppression Damage

1. Fire and emergency response inherently involves risks, including accidents, injuries, and operational complexity. In addition, fire control forces may take actions that are reasonably necessary to control a fire or other emergency, but which are damaging to property. Such actions will be considered reasonable and proper if good judgment is used by responsible personnel according to the conditions that exist at the time of the action. CAL FIRE is not obligated or authorized to make actual expenditures or efforts to repair or replace private property.
2. Advise those claimants who insist upon taking formal action to correspond with the Secretary, State Board of Control, P.O. Box 3035, 926 J Street, Suite 300, Sacramento, 5814. The claimant may be supplied by the Board of Control with a copy of form DGS ORIM 006, entitled, Damage Claims Against the State of California.

Fire Information

1. Joint fire information dissemination as determined and approved by the Unified Incident Commanders.
2. PIOs will meet as needed to discuss procedures and locations of potential information centers. Both agencies will strive to keep personnel certified in the field of public information available for use during emergencies.
3. PIOs will determine which agency will provide the lead information officer. This will normally be the agency with the greatest commitment of resources or the greatest threat to life/property.

   BDU PIO Line: 909-881-6949

General Procedures

1. Plan to be reviewed and updated as necessary prior to June 30th.

Administrative listings

1. California Department of Forestry and Fire Protection (CAL FIRE) San Bernardino Unit Head Quarters 3800 N. Sierra Way San Bernardino, CA 92406. (909) 881-6900.

City Council **AGENDA ITEM NO. L3.**

DATE: June 2, 2026

TO: Honorable Mayor and City Council Members

SUBJECT: Consideration of a Second Amendment to the Agreement with CelPlan Technologies, Inc. for the provision of a video management system replacement to increase the total agreement by an amount of $501,970.00 (Interim Assistant City Manager Garcia)

MOTION:

If the City Council determines that staff's recommendation is appropriate, the following motion is provided:

I move that City Council approve a Second Amendment to the Agreement with CelPlan Technologies, Inc. for the provision of a video management system replacement.

RECOMMENDATION:

Staff recommends that the City Council approve a Second Amendment to the Agreement with CelPlan Technologies, Inc. for the provision of a video management system replacement to increase the total agreement by an amount of $501,970.

DISCUSSION:

In October 2024, the City Council approved an agreement with CelPlan Technologies, Inc. to implement a comprehensive replacement of the City's Video Management System. This initiative introduced a modern, city-wide camera system designed to enhance public safety and operational efficiency.

During the first year of the agreement, CelPlan completed a full-scale redesign of the system, which included deployment of a completely reworked wireless network to support the new high-definition camera units that replaced all existing cameras in the downtown area and in other high-traffic areas around the City. After the first phase of the project was completed, the second phase of the project began with an evaluation of other camera systems at various locations around the City. Many of these locations had camera systems made and installed by various manufacturers and vendors posing a challenge from a management perspective. Additionally, many of these cameras were approaching end-of-life in both equipment and software/support that would necessitate their replacement.

CelPlan Technologies, along with City staff identified cameras across 13 different locations around the City that required replacement and/or additional units to provide comprehensive coverage. These locations not only included gathering areas for the public such as the Community Center on Lugonia Ave., City Hall, and the public parking garage on 6th St., but also City facilities that necessitate monitoring such as the Wastewater Treatment Plant, the Landfill, and the Emergency Operations Center. It was also recognized that additional data storage would be required to accommodate these high-definition camera units, therefore an additional storage server is proposed to accommodate the additional camera recordings.

The requested increase of $501,970 to the first extended term would fund the installation of the replacement cameras and equipment upgrades as well as the necessary software programming and support and maintenance coverage for the first year for these additions. This increase would bring the total, not-to-exceed amount of the agreement to $2,752,039.

ALTERNATIVES:

The City Council may deny the motion and provide alternative directions to staff.

STRATEGIC PLAN:

N/A

SUBMITTED BY:
Danielle Garcia, Interim Assistant City Manager

RECOMMENDED BY:
Charles M. Duggan Jr., City Manager

REVIEWED BY:
Yvette M. Abich Garcia, City Attorney
Janice McConnell, Assistant City Manager

PREPARED BY:
Valerie Abrego, Management Analyst

FISCAL IMPACT

Fiscal Year: 2026

Revenue Generating: No

Amount: $501,970.00

Budgeted Y/N: Yes

Account No.: 604900

Additional Appropriation Required: No

Discussion:

There is sufficient funding in the Division of Innovation & Technology budget to cover the cost of the Second Amendment to the Agreement with CelPlan Technologies, Inc.

SECOND AMENDMENT TO AGREEMENT TO PERFORM PROFESSIONAL SERVICES

This second amendment ("Second Amendment") to the agreement for professional services ("Agreement"), dated October 15, 2024 by and between the City of Redlands, a municipal corporation and a general law city ("City"), and CelPlan Technologies Incorporated, a Virginia corporation ("Consultant"), is made and entered into this 2nd day of June, 2026.

RECITALS

WHEREAS, it is the desire of the City and Consultant to amend their existing Agreement, specifically regarding total compensation.

NOW, THEREFORE, for good and valuable consideration in the receipt of which is hereby acknowledged City and Consultant agree as follows:

AGREEMENT

Section 1. Article 5 of the Agreement, entitled "Payments to the Consultant," is hereby amended to read as follows:

"5.1 Compensation: the compensation for Consultant's performance of the Services shall not exceed the amount of One Million Two Hundred Seventy-Seven Thousand Twenty-Six Dollars and Forty-Two Cents ($1,277,026.42) for the Services provided during the initial Term. This agreement may be extended by four (4) one-year terms (Extended Terms) Should this Agreement be extended, the compensation for Consultant's performance for the Services shall not exceed the amount of Seven Hundred Thirty-Three Thousand Seven Hundred Twenty-One Dollars and Fourteen Cents ($733,721.14) for the first Extended Term; Two Hundred Forty-One Thousand Twenty-One Dollars and Thirty Six Cents ($241,021.36) for the second Extended Term; Two Hundred Forty Seven Thousand Forty-Six Dollars and Ninety Cents ($247,046.90) for the third Extended Term; and Two Hundred Fifty-Three Thousand Two Hundred twenty-Three Dollars and Seven Cents ($253,223.07) for the fourth Extended Term, bringing the total possible amount of compensation to a not-to-exceed amount of Two Million Seven Hundred Fifty-Two Thousand Thirty-Eight Dollars and Eighty-Nine Cents ($2,752,038.89). For the Initial Term and each Extended Term, City shall pay Consultant on a time and materials basis up to the not-to-exceed amount in accordance with the rates specified in Exhibit "C," titled "Schedule of Values," which is attached hereto and incorporated herein by this reference."

Section 2. Exhibit "C" of the Agreement, entitled "Schedule of Values," is hereby amended to include Attachment "1" attached to this amendment.

Section 3. All other provisions of the Agreement shall remain unchanged by this Second Amendment and in effect.

IN WITNESS WHEREOF, the parties have executed this First Amendment, to be effective as of June 2, 2026.

FIRST AMENDMENT TO AGREEMENT TO PERFORM PROFESSIONAL SERVICES

This first amendment ("First Amendment") to the agreement for professional services ("Agreement"), dated October 15, 2024, by and between the City of Redlands, a municipal corporation and a general law city ("City"), and CelPlan Technologies Incorporated, a Virginia corporation ("Consultant"), is made and entered into this 7th day of October 2025.

RECITALS

WHEREAS, it is the desire of the City and Consultant to amend their existing Agreement, specifically regarding total compensation.

NOW, THEREFORE, for good and valuable consideration in the receipt of which is hereby acknowledged City and Consultant agree as follows:

AGREEMENT

Section 1. Article 5 of the Agreement, entitled "Payments to Consultant," is hereby amended to read as follows:

"5.1 Compensation: The compensation for Consultant's performance of the Services shall not exceed the amount of One Million Two Hundred Seventy-Seven Thousand Twenty-Six Dollars and Forty-Two Cents ($1,277,026.42) for the Services provided during the Initial Term. This agreement may be extended by four (4) one-year terms (Extended Terms). Should this Agreement be extended, the compensation for Consultant's performance for the Services shall not exceed the amount of Two Hundred Thirty-One Thousand Seven Hundred Fifty-One Dollars and Thirty One Cents ($231,751.31) for the first Extended Term; Two Hundred Forty-One Thousand Twenty-One Dollars and Thirty Six Cents ($241,021.36) for the second Extended Term; Two Hundred Forty-Seven Thousand Forty-Six Dollars and Ninety Cents ($247,046.90) for the third Extended Term; and Two Hundred Fifty-Three Thousand Two Hundred Twenty-Three Dollars and Seven Cents ($253,223.07) for the fourth Extended Term, bringing the total possible amount of compensation to a not-to-exceed amount of Two Million Two Hundred Fifty Thousand Sixty Nine Dollars and Six Cents ($2,250,069.06). For the Initial Term and each Extended Term, City shall pay Consultant on a time and materials basis up to the not to not-to-exceed amount in accordance with the rates specified in Exhibit "C," titled "Schedule of Values," which is attached hereto and incorporated herein by this reference."

Section 2. Exhibit "C" of the Agreement, entitled "Schedule of Values," is hereby amended to include Attachment "1", attached to this amendment.

Section 3. All other provisions of the Agreement shall remain unchanged by this First Amendment and in effect.

IN WITNESS WHEREOF, the parties have executed this First Amendment, to be effective as of October 7th, 2025.

AGREEMENT TO PERFORM PROFESSIONAL SERVICES

This agreement for the provision of Video Management System Replacement ("Agreement") is made and entered in this 15th day of October, 2024 ("Effective Date"), by and between the City of Redlands, a municipal corporation ("City") and CelPlan Technologies Inc, a Virginia corporation. ("Consultant"). City and Consultant are sometimes individually referred to herein as a "Party" and, together, as the "Parties." In consideration of the mutual promises contained herein, City and Consultant agree as follows:

ARTICLE 1 – ENGAGEMENT OF CONSULTANT

1.1 City hereby engages Consultant to provide a Video Management System Replacement that will include design installation, configuration, and maintenance services for City (the "Services").

1.2 The Services shall be performed by Consultant in a professional manner, and Consultant represents that it has the skill and the professional expertise necessary to provide the Services to City at a level of competency presently maintained by other practicing professional consultants in the industry providing like and similar types of Services.

ARTICLE 2 – SERVICES OF CONSULTANT

2.1 The Services that Consultant shall perform are more particularly described in Exhibit "A," titled "Scope of Services," which is attached hereto and incorporated herein by this reference.

2.2 Consultant shall comply with applicable federal, state and local laws and regulations in the performance of this Agreement including, but not limited to, any applicable State prevailing wage laws.

ARTICLE 3 – RESPONSIBILITIES OF CITY

3.1 City designates Danielle Garcia, Management Services Department Director, as City's representative with respect to performance of the Services, and such person shall have the authority to transmit instructions, receive information, interpret and define City's policies and decisions with respect to performance of the Services.

ARTICLE 4 – PERFORMANCE OF SERVICES

4.1 Consultant shall perform and complete the implementation services in a prompt and diligent manner in accordance with the schedule set forth in Exhibit "B," titled "Project Schedule," which is attached hereto and incorporated herein by reference.

4.2 The term of this Agreement shall be for a period of one (1) year from the Effective Date of this Agreement (the "Initial Term"). The City shall have the option to extend the Initial Term of this Agreement by four (4) additional one-year terms (each, an "Extended

Term"), on the same terms and conditions, by providing written notice to Consultant at least thirty (30) days prior to the expiration of the Initial Term or any Extended Term.

4.3 If Consultant's Services include deliverable electronic visual presentation materials, such materials shall be delivered in a form, and made available to City, consistent with City Council-adopted policy for the same. It shall be the obligation of Consultant to obtain a copy of such policy from City staff.

ARTICLE 5 – PAYMENTS TO CONSULTANT

5.1 Compensation: The compensation for Consultant's performance of the Services shall not exceed the amount of One Million One Hundred Fifty-Eight Thousand Six Dollars and Twenty Nine Cents ($1,158,006.29) for the Services provided during the Initial Term. This agreement may be extended by four (4) one-year terms (Extended Terms). Should this Agreement be extended, the compensation for Consultant's performance for the Services shall not exceed the amount of Two Hundred Thirty-One Thousand Seven Hundred Fifty-One Dollars and Thirty One Cents ($231,751.31) for the first Extended Term; Two Hundred Forty-One Thousand Twenty-One Dollars and Thirty Six Cents ($241,021.36) for the second Extended Term; Two Hundred Forty-Seven Thousand Forty-Six Dollars and Ninety Cents ($247,046.90) for the third Extended Term; and Two Hundred Fifty-Three Thousand Two Hundred Twenty-Three Dollars and Seven Cents ($253,223.07) for the fourth Extended Term, bringing the total possible amount of compensation to a not-to-exceed amount of Two Million One-Hundred Thirty-One Thousand Forty-Eight Dollars and Ninety Three Cents ($2,131,048.93). For the Initial Term and each Extended Term, City shall pay Consultant on a time and materials basis up to the not to not-to-exceed amount in accordance with the rates specified in Exhibit "C," titled "Schedule of Values," which is attached hereto and incorporated herein by this reference.

5.2 Consultant shall submit monthly invoices to City describing the Services performed during the preceding month. Consultant's invoices shall include a brief description of the Services performed, the dates the Services were performed, the number of hours spent and by whom, and a description of reimbursable expenses related to the Services. City shall pay Consultant no later than thirty (30) days after receipt and approval by City of Consultant's invoice.

5.3 Any notice or other communication required, or which may be given, pursuant to this Agreement, shall be in writing. Any such notice shall be deemed delivered (i) on the date of delivery in person; (ii) five (5) days after deposit in first class registered mail, with return receipt requested; (iii) on the actual delivery date if deposited with an overnight courier; or (iv) on the date sent by facsimile or electronic mail transmission (including PDF), if confirmed with a copy sent contemporaneously by first class, certified, registered or express mail; in each case properly posted and fully prepaid to the appropriate address set forth below, or such other address as a Party may provide notice in accordance with this section:

CITY:	CONSULTANT:
City Clerk City of Redlands 35 Cajon Street P.O. Box 3005 (mailing) Redlands, CA 92373 jdonaldson@cityofredlands.org Phone: (909) 798-7531	Paulo Leite, Chief Operating Officer CelPlan Technologies, Inc. 1920 Association Dr. Reston, Virgina 20191 4th Floor paulo@celplan.com Phone: (703) 259-4025

ARTICLE 6 – INSURANCE AND INDEMNIFICATION

6.1 The following insurance coverage required by this Agreement shall be maintained by Consultant for the duration of its performance of the Services. Consultant shall not perform any Services unless and until the required insurance listed below is obtained by Consultant. Consultant shall provide City with certificates of insurance and endorsements evidencing such insurance prior to commencement of the Services. Insurance policies shall include a provision prohibiting cancellation or modification of the policy except upon thirty (30) days prior written notice to City.

A. Workers' Compensation and Employer's Liability insurance in the amount that meets statutory requirements with an insurance carrier acceptable to City, or certification to City that Consultant is self-insured or exempt from the workers' compensation laws of the State of California. Consultant shall execute and provide City with Exhibit "G," titled "Workers' Compensation Insurance Certification," which is attached hereto and incorporated herein by this reference, prior to performance of the Services.

B. Comprehensive General Liability insurance with carriers acceptable to City in the minimum amount of One Million Dollars ($1,000,000) per occurrence and Two Million Dollars ($2,000,000) aggregate, for public liability, property damage and personal injury is required. City shall be named as an additional insured and such insurance shall be primary and non-contributing to any insurance or self-insurance maintained by City.

C. Consultant shall secure and maintain professional liability insurance throughout the term of this Agreement in the amount of One Million Dollars ($1,000,000) per claim made.

D. Business Auto Liability coverage, with minimum limits of One Million Dollars ($1,000,000) per occurrence, combined single limit bodily injury liability and property damage liability. This coverage shall include all Consultant owned vehicles used in connection with Consultant's provision of the Services, hired and non-owned vehicles, and employee non-ownership vehicles. City shall be named as an additional insured and such insurance shall be primary and non-contributing to any insurance or self-insurance maintained by City.

E. Consultant is expressly prohibited from assigning or subcontracting any of the Services without the prior written consent of City. In the event of mutual agreement by the

Parties to assign or subcontract a portion of the Services, Consultant shall add such assignee or subcontractor as an additional insured to the insurance policies required hereby and provide City with the insurance endorsements prior to any Services being performed by the assignee or subcontractor.

6.2 Consultant shall defend, indemnify and hold harmless City and its elected and appointed officials, employees and agents from and against any and all claims, losses or liability, including attorneys' fees, arising from injury or death to persons or damage to property occasioned by any negligent act or omission by, or the willful misconduct of, Consultant, or its officers, employees and agents in performing the Services.

ARTICLE 7 – CONFLICTS OF INTEREST

7.1 Consultant covenants and represents that it does not have any investment or interest in any real property that may be the subject of this Agreement or any other source of income, interest in real property or investment that would be affected in any manner or degree by the performance of Consultant's Services. Consultant further covenants and represents that in the performance of its duties hereunder, no person having any such interest shall perform any Services under this Agreement.

7.2 Consultant agrees it is not a designated employee within the meaning of the Political Reform Act because Consultant:

A. Does not make a governmental decision whether to:

(i) approve a rate, rule or regulation, or adopt or enforce a City law;
(ii) issue, deny, suspend or revoke any City permit, license, application, certification, approval, order or similar authorization or entitlement;
(iii) authorize City to enter into, modify or renew a contract;
(iv) grant City approval to a contract that requires City approval and to which City is a party, or to the specifications for such a contract;
(v) grant City approval to a plan, design, report, study or similar item;
(vi) adopt, or grant City approval of, policies, standards or guidelines for City or for any subdivision thereof.

B. Does not serve in a staff capacity with City and in that capacity, participate in making a governmental decision or otherwise perform the same or substantially the same duties for City that would otherwise be performed by an individual holding a position specified in City's Conflict of Interest Code under Government Code section 87302.

7.3 In the event City determines that Consultant must disclose its financial interests, Consultant shall complete and file a Fair Political Practices Commission Form 700, Statement of Economic Interests, with the City Clerk's office pursuant to the written instructions provided by the City Clerk.

ARTICLE 8 – GENERAL CONSIDERATIONS

8.1 In the event any action is commenced to enforce or interpret any of the terms or conditions of this Agreement the prevailing Party shall, in addition to any costs and other relief, be entitled to the recovery of its reasonable attorneys' fees, including fees for the use of in-house counsel by a Party.

8.2 Consultant shall not assign any of the Services, except with the prior written approval of City and in strict compliance with the terms and conditions of this Agreement. Any assignment or attempted assignment without such prior written consent may, in the sole discretion of City, result in City's immediate termination of this Agreement.

8.3 Consultant is for all purposes under this Agreement an independent contractor and shall perform the Services as an independent contractor. Neither City nor any its agents shall have control over the conduct of Consultant or Consultant's employees, except as herein set forth. Consultant shall supply all necessary tools and instrumentalities required to perform the Services. Assigned personnel employed by Consultant are for its account only, and in no event shall Consultant or personnel retained by it be deemed to have been employed by City or engaged by City for the account of, or on behalf of City. Consultant shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent, nor shall Consultant have any authority, express or implied, to bind City to any obligation.

8.4 This Agreement may be terminated by City, in its sole discretion, by providing not less than five (5) days prior written notice to Consultant of City's intent to terminate. If this Agreement is terminated by City, an adjustment to Consultant's compensation shall be made, but (1) no amount shall be allowed for anticipated profit or unperformed Services, and (2) any payment due Consultant at the time of termination may be adjusted to the extent of any additional costs to City occasioned by any default by Consultant. Upon receipt of a termination notice, Consultant shall immediately discontinue its provision of the Services and, within five (5) days of the date of the termination notice, deliver or otherwise make available to City, copies (in both hard copy and electronic form, where applicable) of project related data, design calculations, drawings, specifications, reports, estimates, summaries and such other information and materials as may have been accumulated by Consultant in performing the Services. Consultant shall be compensated on a pro-rata basis for Services completed up to the date of termination.

8.5 Consultant shall maintain books, ledgers, invoices, accounts and other records and documents evidencing costs and expenses related to the Services for a period of three (3) years, or for any longer period required by law, from the date of final payment to Consultant pursuant to this Agreement. Such books shall be available at reasonable times for examination by City at the office of Consultant.

8.6 This Agreement, including the Exhibit "D," titled "Exclusions," Exhibit "E," titled "Standard Support Terms, Structure, and Procedure," and Exhibit "F," titled "Genetec Global & Privacy Policy," are incorporated herein by reference, and represents the entire
